Bank clearings continue to decrease 9.3 per cent below the corresponding period in 1913. Industrial failures last week were 26 per cent over the corresponding week in 1913. Building activities in 125 cities were about 15 per cent less in January, 1914, than January, 1913. The decline in the steel industry, which is a fair barometer, is most pronounced, notwithstanding the promise, loudly proclaimed, that the "new freedom" would make better times. Last month, when the steel industry was operating about 60 per cent of its capacity, which ran full until the election of the Democratic Party, we were assured that this branch of industry would be revived. But the promise of the revival with the approach of spring has not come, and little hope is entertained that it will come under the present régime. Over 100 more furnaces are idle than in 1912. Over 1,000,000 men are idle in this industry alone and 1,000,000 more in allied industries. We were promised cheaper food, cheaper clothes, and a lowering of the high cost of living, because we were going to buy in the foreign markets. We are buying from Europe, South America, Mexico, and Canada, instead of from our own country. What is the result? Have we captured the markets of the world?

The imports of last December were nearly $30,000,000 more than one year ago. The exports were nearly $17,000,000 less than a like period of a year ago; that is, the balance of trade this December was nearly $47,000,000 against us; or, plainly speaking, we deprived our own producers of that amount of business to favor the foreign producer. That is the item for but one month under this new policy.

The gold movement of that period showed that we were over $16,000,000 worse off in that valuable commodity than a year ago. If that gold movement is kept up it will not be difficult to foretell what will be done in the financial situation that confronts us. From Canada alone the increase of agricultural imports for December was $17,000,000. What effect will displacing such stupendous bulk of products of our own have upon our

farmers? The same trend is seen in other lines. Imports of cotton clothes increased 60 per cent over like period in 1912. A similar situation is seen in woolens.

What effect will this ultimately have upon the American workingman when we cease to purchase the product made by him and buy from the foreign country the product made by foreign labor? The same lesson is to be learned in every line of industry. But why should we affect surprise? Did not the Democratic leaders declare upon this floor that they would buy in the cheapest market? They did this to liberate business, they say. That is the "new freedom." They propose to reduce the cost of living. This they will ultimately succeed in doing. The cost of living will fall when the million American workingmen are displaced for the sake of the foreign laborer at work in a foreign country. If this Nation chooses to go to a foreign country to buy its goods, it is as certain as twice two are four that the American labor will not be employed in at least that degree. Every dollar's worth of product made by a foreigner displaces that amount of labor in this country. When the millions of workingmen and the many millions more dependent upon them have no wages with which to buy the necessaries of life the cost of living will come down. But how can such a policy of cheap prices benefit a man without work? Thus far the cost of living has had no reduction, although millions of dollars' worth of foodstuffs are coming from Canada, South America, and elsewhere.

Dun's report showed last month that about 50 changes in price were noted, of which there were advances in price of over one-half of the articles. This is easily explained and was repeatedly declared upon the floor of the House. It is because we do not eat wheat, but bread. We do not eat cattle, but steak. Twenty-five cents tariff on a bushel of wheat is enough to prevent the Canadian farmer from displacing American wheat. Take off the tariff and at once the Canadian wheat comes across the line to displace that amount of our own. That amount measures the loss to our own producer. Do we get bread cheaper? No. The reduction of cost on a loaf of bread might be one-twentieth of 1 cent. Does the consumer get it? No. We will pay the same for the loaf. Who gets the profit lost by our farmers? The importer, as is always the case. We place hides on the free list because we want cheaper shoes. Did we get the cheaper shoes? No; shoes went up. The importer is the man to advantage. We place wool on the free list. Do we get cheaper clothes? No. The cheap wool is sufficient to cripple for all time the American wool production. Who benefits? The importer. We place sugar on the free list. Do we get cheaper sugar? No. We will by this act cripple, if not dismantle, the sugar factories of the country in the benefit of the Sugar Trust. What is to become of the laborers under these circumstances? They are to become subjects of investigations by governmental industrial commissions, to be fed in soup houses and bread lines, to be housed in public lodging houses, to be organized into Coxey armies, to be fomented into bands of lawless I. W. W. associations—in a word, to become our most serious problem.

Democratic Congressmen and Democratic newspapers may continue to whistle to keep up courage, to denounce as unpatriotic the men who dare to call the country's attention to the folly of Democratic legislation, to stir up the dust in the hope of blinding the country to the real cause of our unfortunate industrial situation, but no such professions will close the eyes of the Nation to the real situation.

Not only is the country's industrial situation unfortunate, but the condition of the National Treasury is becoming alarming. Let the Washington Post, an independent newspaper with Democratic leanings, speak on this point.

In a recent issue this Democratic authority said editorially:

> The Treasury's estimate, based on reports from internal-revenue collectors covering returns from more than 400,000 persons, that the income-tax law will yield about $50,000,000 at the outside, is not as flattering as the more optimistic reckoners figured on by $10,000,000 or more, but it tallies closely with what was claimed for it at the time that section of the tariff bill was before Congress.
>
> The Treasury's calculation of results is for a full year, whereas the first collection is for a 10-month period only, or one-sixth less than the estimated $50,000,000. Thus reduced, the total available for Treasury purposes beginning July 1 will be under $42,000,000. This, be it understood, is aside from the increased receipts expected to be derived from the amended corporation-tax provision, probably $5,000,000, or a total of $47,000,000, wherewith to offset the heavy cut in customs receipts, which source of revenue has yet to feel the effect of putting sugar on the free list.
>
> The partial reduction of the sugar tariff put into force March 1 will not cause a loss this year in excess of $4,000,000, but eventually it will aggregate $50,000,000 a year, which item alone offsets the income-tax revenue. Treasury officials who a few months ago confidently held that the loss in customs would be cared for by the income tax now decline to discuss the effect of revision on articles other than sugar, and which totaled $10,000,000 in February, but they cite internal-revenue returns as showing a gain warranting them in saying that "the bureau is coming to the rescue" of the Treasury.
>
> But how much comfort is derivable from a gain of $2,370,000 in internal revenue as against a loss of $24,000,000 in customs? Besides, internal revenue is decreasing at this time. The increase over last year, which rose in November to $5,000,000, had dwindled to $1,500,000 on March 5. For that matter, the Treasury receipts from all sources decreased at the rate of $800,000 a day during the first days of March, compared with the same time last year. A surplus at this time last year of $10,500,000 has been turned into a deficit of $26,500,000—a difference of $37,000,000.
>
> The showing is alarming, and certainly demands more serious consideration than the unsupported claim that the gap in customs is closed by a bulge in internal revenue. The receipts are growing beautifully less and the expenditures are mounting gloriously higher from month to month. And now comes the decision of the Board of General Appraisers declaring that the 5 per cent discount on all imports carried by ships of American registry is valid. The decision, if sustained by the higher courts, means a further loss of $20,000,000 in customs and opens our markets wider than ever to foreign competition.
>
> The revisionists, in reply to criticisms, declare that the new law has not been in operation long enough to achieve the things predicted for it by its authors, and they repel every suggestion as to amending it; and in that view of the matter, it is to be assumed that they are quietly canvassing some plan of new financing for the relief of business and the Treasury pending the development of conclusive results as regards the advantages of downward revision.

Can there be any doubt of the course the friends of a truly American policy, as against the present foreign policy, will take at the earliest moment? They can not be blind to the deadly parallel with the former Democratic administration of 1893–1897. Within two years after its beginning an army of 3,000,000 men were unemployed. At the present gait, this army will be more than duplicated very soon. Then the Coxey army was regarded as a novelty. To-day the first sound of its march upon Washington is looked upon as most ominous. Then all sorts of explanations were offered; to-day the professional politician is just as fertile in his explanations. Then a man who warned against the assaults upon American enterprise was denounced as a believer in a robber tariff. To-day he is denounced as truckling to the interests. Then a man who reminded the country of the distress of Democratic times was called a calamity howler; to-day he is styled both the calamity howler and unpatriotic. The country's answer of that day to all these charges was the expulsion of the Democratic Party from power for 16 years. The answer to-day to the like flimsy, cheap talk will not be different. The anxiety of the average citizen to vote again is sufficient ground for this assurance. In the face of such startling facts need anyone doubt as to the ultimate action of the advocates of an American system as against this foreign policy?

The believers in a system of protection as against the policy of the "new freedom," the nearest approach to free trade, vastly outnumber the latter. Whatever may be the decision of leaders, the rank and file of the Progressive Party will be in the line with the rank and file of the Republican Party, demanding a policy in the interest of the American people as against the Democratic policy in the interest of foreign nations. This is not mere prophecy; it is the rational conclusion to be drawn from occurrences within the past six months. Division among Republicans is synonymous with Democratic success and continued depression. A union of the rank and file of Republicans, of whatever name, is equivalent to a return to an American policy with the prosperity of our people as we knew it under Republican rule, prosperity which Democrats promised not to disturb or destroy, a promise they have signally failed to keep.

Mr. LEVER. Mr. Chairman, how much time have I remaining?

The CHAIRMAN. The gentleman has 52 minutes remaining and the other side have 39 minutes remaining.

Mr. MANN. I should like to suggest to the gentleman that it is getting pretty late and we have had a long day. We can not possibly finish the general debate to-night.

Mr. LEVER. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. HAMLIN, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 13679, the Agricultural appropriation bill, and had come to no resolution thereon.

### LEAVE TO WITHDRAW PAPERS.

Mr. CLINE, by unanimous consent, obtained leave to withdraw from the files of the House, without leaving copies, no adverse report having been made thereon, the papers in the following pension cases:

Peter S. Hess, guardian of John E. Hess, Company D, Thirty-fifth Regiment United States Infantry, H. R. 21914, Sixty-second Congress;

John W. Paulus, Company D, Thirty-fifth United States Volunteer Infantry, H. R. 20687, Sixty-second Congress; and

Levi D. Bodley, Company E, Seventh Indiana Volunteer Mounted Infantry, H. R. 27511, Sixty-second Congress.

GOOD ROADS.

Mr. QUIN. Mr. Speaker, I ask unanimous consent to print in the RECORD a memorial passed by the Mississippi Legislature on the Shackleford good-roads bill.

Mr. MANN. Reserving the right to object, I will say to the gentleman that it is very unusual to print memorials of different legislatures. Every Member receives many of those things. However, if the gentleman will ask leave to extend his remarks in the RECORD and insert the memorial in that way, I will not make any objection.

Mr. QUIN. I make that request.

The SPEAKER. The gentleman from Mississippi [Mr. QUIN] asks leave to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. QUIN. And also for the cotton tax.

The SPEAKER. The gentleman can print in his speech anything he wants to that is not obnoxious to the rules of the House.

Mr. FARR. I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. The gentleman from Pennsylvania asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. WALSH. I ask unanimous consent to extend my remarks in the RECORD.

Mr. MANN. On the speech the gentleman made the other day?

Mr. WALSH. On the safety bill.

Mr. MANN. The Bureau of Labor safety bill?

Mr. WALSH. Yes.

The SPEAKER. Is there objection?

There was no objection.

HOUR OF MEETING TO-MORROW.

Mr. LEVER. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet to-morrow at 11 o'clock a. m.

The SPEAKER. The gentleman from South Carolina asks unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock to-morrow morning. Is there objection?

Mr. MANN. Reserving the right to object, is it the intention of the gentleman to go ahead with the Agricultural bill?

Mr. LEVER. Yes.

Mr. MANN. How much time remains for general debate?

Mr. LEVER. Fifty-two minutes on our side and thirty-nine minutes on the other side.

The SPEAKER. An hour and a half.

Mr. MANN. I do not object.

The SPEAKER. Is there objection?

There was no objection.

ENROLLED BILLS SIGNED.

Mr. ASHBROOK, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 11338. An act making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1915, and for other purposes;

H. R. 13365. An act to authorize the construction, maintenance, and operation of a bridge across the Tombigbee River near Old Cotton Gin Port, in Monroe County, Miss; and

H. R. 11331. An act to repeal an act regulating the construction of bridges across the Muskingum River in Ohio.

The SPEAKER announced his signature to enrolled bill of the following title:

S. 3454. An act authorizing the Secretary of Commerce to lease to the city of Port Angeles, Wash., certain property.

ADJOURNMENT.

Mr. LEVER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 39 minutes p. m.) the House adjourned until Friday, March 6, 1914, at 11 o'clock a. m.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. THACHER, from the Committee on the Library, to which was referred the joint resolution (S. J. Res. 114) for the appointment of a member of the Board of Regents of the Smithsonian Institution, reported the same without amendment, accompanied by a report (No. 342), which said joint resolution and report were referred to the House Calendar.

## REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. HELVERING, from the Committee on Invalid Pensions, to which was referred the bill (H. R. 14234) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war, reported the same without amendment, accompanied by a report (No. 340), which said bill and report were referred to the Private Calendar.

## CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Pensions was discharged from the consideration of the bill (H. R. 12018) granting an increase of pension to William M. Orr, and the same was referred to the Committee on Invalid Pensions.

## PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. DALE: A bill (H. R. 14231) to increase the Navy; to the Committee on Naval Affairs.

By Mr. STEPHENS of Texas: A bill (H. R. 14232) to authorize the payment of the tribal funds of the Sac and Fox of the Missouri Tribe of Indians to the members of the tribe entitled thereto; to the Committee on Indian Affairs.

By Mr. FERRIS: A bill (H. R. 14233) to provide for the leasing of coal lands in the Territory of Alaska, and for other purposes; to the Committee on the Public Lands.

By Mr. PAIGE of Massachusetts: A bill (H. R. 14235) to increase the limit of cost of public building and site therefor at Southbridge, Mass.; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 14236) to increase the limit of cost of public building and site therefor at Leominster, Mass.; to the Committee on Public Buildings and Grounds.

By Mr. LOGUE: A bill (H. R. 14237) to increase the pensions of those who have lost limbs or have been totally disabled in the same in the military or naval service of the United States; to the Committee on Invalid Pensions.

By Mr. PLATT: A bill (H. R. 14238) authorizing the construction of a post-office building at Newburgh, N. Y.; to the Committee on Public Buildings and Grounds.

By Mr. WEBB: A bill (H. R. 14239) to provide for sale of portion of post-office site in Gastonia, N. C.; to the Committee on Public Buildings and Grounds.

By Mr. DEITRICK (by request): A bill (H. R. 14240) for the retirement of civil employees; to the Committee on the Judiciary.

By Mr. THACHER: A bill (H. R. 14241) to authorize the establishment of a life-saving station between North Scituate Beach and Point Allerton, Mass.; to the Committee on Interstate and Foreign Commerce.

By Mr. KREIDER: A bill (H. R. 14242) to increase the limit of cost for the erection and completion of the United States Federal building at Harrisburg, Pa.; to the Committee on Public Buildings and Grounds.

By Mr. QUIN: Memorial from the Legislature of the State of Mississippi, requesting Congress to return to the State of Mississippi a pro rata share of the cotton tax collected in 1866 and 1867 as a war-debt claim; to the Committee on War Claims.

Also, memorial from the Legislature of the State of Mississippi, indorsing House bill 11686, providing Federal aid in the maintenance of rural post roads; to the Committee on Roads.

## PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. HELVERING: A bill (H. R. 14234) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war; to the Committee of the Whole House.

By Mr. ADAIR: A bill (H. R. 14243) granting an increase of pension to William Dellinger; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14244) granting an increase of pension to Eli Phillips; to the Committee on Invalid Pensions.

By Mr. ASWELL: A bill (H. R. 14245) granting an increase of pension to Peter W. Frederick; to the Committee on Invalid Pensions.

By Mr. BARTON: A bill (H. R. 14246) granting a pension to Emeline Baldwin; to the Committee on Invalid Pensions.

By Mr. BROUSSARD: A bill (H. R. 14247) for the relief of the Chettimanchi Band or Tribe of Indians in Louisiana, and for other purposes; to the Committee on Indian Affairs.

By Mr. DEITRICK: A bill (H. R. 14248) granting a pension to Thomas Comerford; to the Committee on Pensions.

Also, a bill (H. R. 14249) granting a pension to Mary E. Mullen; to the Committee on Pensions.

Also, a bill (H. R. 14250) granting a pension to Mary J. Phinney; to the Committee on Pensions.

Also, a bill (H. R. 14251) granting an increase of pension to William W. Lindsey; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14252) for the relief of John Coughlan; to the Committee on Naval Affairs.

By Mr. DERSHEM: A bill (H. R. 14253) granting a pension to Sarah E. Hood; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14254) granting a pension to Allison F. Kohler; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14255) granting an increase of pension to Jacob Steffen; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14256) granting an increase of pension to William S. Nail; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14257) granting an increase of pension to David Secrest; to the Committee on Invalid Pensions.

By Mr. DUPRÉ: A bill (H. R. 14258) for the relief of Col. James L. Wright; to the Committee on Appropriations.

By Mr. GOEKE: A bill (H. R. 14259) granting an increase of pension to William L. Reece; to the Committee on Invalid Pensions.

By Mr. HENSLEY: A bill (H. R. 14260) granting a pension to Calvin Brown; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14261) granting a pension to Phillip S. Suttle; to the Committee on Pensions.

By Mr. HULL: A bill (H. R. 14262) granting a pension to Albert Whitener; to the Committee on Pensions.

By Mr. KEISTER: A bill (H. R. 14263) granting a pension to Simeon D. Morrison; to the Committee on Pensions.

Also, a bill (H. R. 14264) to correct the military record of John Ousler; to the Committee on Military Affairs.

By Mr. KENNEDY of Rhode Island: A bill (H. R. 14265) granting a pension to George H. Duffany; to the Committee on Pensions.

By Mr. KINKAID of Nebraska: A bill (H. R. 14266) granting an increase of pension to George White; to the Committee on Invalid Pensions.

By Mr. LESHER: A bill (H. R. 14267) granting a pension to Charles W. Faux, alias Charles M. Ward; to the Committee on Pensions.

Also, a bill (H. R. 14268) granting a pension to William G. Yeager; to the Committee on Pensions.

By Mr. MORGAN of Louisiana: A bill (H. R. 14269) granting an increase of pension to Hulda E. Bickham; to the Committee on Pensions.

Also, a bill (H. R. 14270) granting an increase of pension to Mary Ann Foil; to the Committee on Pensions.

By Mr. MOSS of West Virginia: A bill (H. R. 14271) granting a pension to Carrie Castile; to the Committee on Invalid Pensions.

By Mr. ROBERTS of Massachusetts: A bill (H. R. 14272) granting an increase of pension to David S. Curtis; to the Committee on Invalid Pensions.

By Mr. RUBEY: A bill (H. R. 14273) granting an increase of pension to Thomas J. Rowlett; to the Committee on Invalid Pensions.

By Mr. RUSSELL: A bill (H. R. 14274) granting a pension to Ora Garner; to the Committee on Pensions.

By Mr. SIMS: A bill (H. R. 14275) granting an increase of pension to Juan F. Short; to the Committee on Invalid Pensions.

By Mr. J. M. C. SMITH: A bill (H. R. 14276) granting a pension to Charles H. Gorsuch; to the Committee on Invalid Pensions.

By Mr. STAFFORD: A bill (H. R. 14277) granting a pension to Asa T. Brown; to the Committee on Invalid Pensions.

By Mr. SUTHERLAND: A bill (H. R. 14278) granting a pension to Edwin T. Jones; to the Committee on Pensions.

By Mr. WEBB: A bill (H. R. 14279) granting a pension to Guss Hughes; to the Committee on Pensions.

By Mr. WHITACRE: A bill (H. R. 14280) granting a pension to William A. Boyle; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14281) granting a pension to Owen R. Everhart; to the Committee on Invalid Pensions.

## PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. AINEY: Petition of sundry citizens of Wayne County, Pa., against Sabbath-observance bill; to the Committee on the District of Columbia.

Also (by request), petition of Bartenders' Local Union No. 257, of Sayre, Pa., protesting against national prohibition; to the Committee on the Judiciary.

Also, petitions of sundry citizens of Wayne County, Pa., favoring national prohibition; to the Committee on the Judiciary.

My Mr. ALLEN: Petitions of 231 citizens of Hamilton County, Ohio, protesting against national prohibition; to the Committee on the Judiciary.

Also, petitions of sundry citizens of Cincinnati, Ohio, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. ANSBERRY: Memorial of the Washington (D. C.) Central Labor Union, favoring passage of House bill 12873, relative to assessment of real estate in the District of Columbia; to the Committee on the District of Columbia.

Also, memorial of the Manila Merchants' Association, relative to passage of the ocean mail subsidy act to Philippine Islands and Porto Rico; to the Committee on the Post Office and Post Roads.

Also, petition of various members of the St. Paul Methodist Episcopal Sunday School of Napoleon, Ohio, favoring national prohibition; to the Committee on the Judiciary.

By Mr. ASHBROOK: Resolutions of the Glass Bottle Blowers' Association of Newark, Ohio, commending the investigation of the Colorado and Michigan strikes and praying for certain legislation; to the Committee on Rules.

By Mr. BALTZ: Petition of sundry citizens of Illinois, against national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens of the twenty-second congressional district of Illinois, relative to rating as second-class matter certain publications; to the Committee on the Post Office and Post Roads.

By Mr. BARCHFELD: Memorial of the Crafton (Pa.) Board of Trade, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens of the twentieth ward of Pittsburgh, Pa., protesting against national prohibition; to the Committee on the Judiciary.

By Mr. BARNHART: Petitions of sundry citizens of Walkerton, Laporte, Hamlet, North Judson, Plymouth, Argos, Bourbon, North Liberty, Etna Green, Knox, Mishawaka, Claypool, Rochester, Warsaw, Winamac, New Carlisle, Syracuse, Pierceton, and Milford, all in the State of Indiana, in support of tax on foreign mail-order shipments of goods; to the Committee on Ways and Means.

Also, petition of sundry citizens of Marshall County, Ind., relative to game laws; to the Committee on Agriculture.

Also, petition of various Sunday schools of Marshall County, Ind., and of sundry citizens of Fulton County, Ind., favoring national prohibition; to the Committee on the Judiciary.

Also, petitions of the German Alliance Societies of South Bend, Ind., and vicinity, and of Bartenders' Union of the thirteenth Indiana district, against national prohibition; to the Committee on the Judiciary.

By Mr. CALDER: Petition of the Colonel John Jacob Astor Camp, No. 98, United Spanish War Veterans, Department of New York, favoring passage of the widows and orphans' pension bill; to the Committee on Pensions.

Also, petition of the New York State Drainage Association, favoring passage of House bill 8189, for flood control; to the Committee on Rivers and Harbors.

By Mr. CARY: Memorial of the Wisconsin Retail Hardware Association, favoring 1-cent letter postage; to the Committee on the Post Office and Post Roads.

Also, petition of the Memphis Cotton Exchange, relative to certain conditions to be inserted in all contracts for futures; to the Committee on Agriculture.

Also, petition of the Washington Central Labor Union, favoring passage of House bill 12873, relative to assessmen. on real estate in the District of Columbia; to the Committee on the District of Columbia.

By Mr. COX: Petition of 123 citizens of the State of Indiana, protesting against national prohibition; to the Committee on the Judiciary.

Also, petition of 530 citizens of the State of Indiana, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. CURRY: Petitions of sundry citizens of Vallejo, Solano County, Cal., protesting against national prohibition; to the Committee on the Judiciary.

By Mr. DALE: Petition of the Colonel John Jacob Astor Camp, No. 98, United Spanish War Veterans, Department of New York, favoring passage of the widows and orphans' pension bill; to the Committee on Pensions.

Also, memorial of the Washington Central Labor Union, favoring passage of House bill 12873, relative to assessment of real estate in the District of Columbia; to the Committee on the District of Columbia.

Also, petition of A. D. Porter, of Pasadena, Cal., protesting against the increase of postage on magazines; to the Committee on the Post Office and Post Roads.

Also, petition of the Memphis Cotton Exchange, relative to certain conditions inserted in cotton future contracts; to the Committee on Agriculture.

By Mr. DONOVAN: Petitions of sundry citizens of the fourth congressional district and Local Union No. 527, Brotherhood of Painters, Decorators, and Paperhangers, of Connecticut, protesting against national prohibition; to the Committee on the Judiciary.

Also, petitions of officers of K Company, Second Regiment, Connecticut Division, United Boys' Brigade of America, relative to uniforms similar to United States Army uniforms; to the Committee on Military Affairs.

Also, petition of the Connecticut State Association of Post Office Clerks, protesting against any change in Sunday closing law; to the Committee on the Post Office and Post Roads.

Also, petition of the civil-service employees' local branch and the Connecticut State Association of Post Office Clerks, favoring the Hamill bill, a retirement measure; to the Committee on Reform in the Civil Service.

By Mr. DYER: Petition of sundry citizens of Missouri against national prohibition; to the Committee on the Judiciary.

By Mr. EAGAN: Petition of Local Union No. 256, United Brewery Workmen, of Hudson County, N. J., protesting against national prohibition; to the Committee on the Judiciary.

By Mr. ESCH: Petitions of 100 citizens of La Crosse, Wis., protesting against national prohibition; to the Committee on the Judiciary.

Also, petition of the Christian Endeavor Society of the First Presbyterian Church of La Crosse, Wis., favoring national prohibition; to the Committee on the Judiciary.

Also, petition of the Washington (D. C.) Central Labor Union, favoring passage of House bill 12873, relative to assessment of real estate in the District of Columbia; to the Committee on the District of Columbia.

By Mr. GARDNER: Petition of the Massachusetts Veterinary Association, favoring passage of House bill 4541, to increase the efficiency of the Army veterinary service; to the Committee on Military Affairs.

Also, memorial of the Central Labor Union, of Washington, D. C., favoring the passage of House bill 12873, relative to taxation of real estate in the District of Columbia; to the Committee on the District of Columbia.

By Mr. GILMORE: Petition of sundry citizens of Massachusetts, against national prohibition; to the Committee on the Judiciary.

Also, petition of the Business Committee of the Easton Club, of North Easton, Mass., favoring an order of the Interstate Commerce Commission allowing New York, New Haven & Hartford Railroad to continue to operate its Sound line service between New England ports and New York City; to the Committee on Interstate and Foreign Commerce.

By Mr. GORDON: Petition of the Federation of Labor, of Cleveland, Ohio, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. GRAHAM of Pennsylvania: Petition of the employees of the Philadelphia Navy Yard, favoring passage of House bill 12740, relative to adjusting wages of machinists; to the Committee on the District of Columbia.

By Mr. KEISTER: Petitions of sundry citizens of the twenty-second congressional district of Pennsylvania, protesting against national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens of Kalamazoo, Mich., against national prohibition; to the Committee on the Judiciary.

Also, petition of Typographical Union No. 6, of New York City, favoring Bartlett-Bacon anti-injunction bill; to the Committee on the Judiciary.

Also, petition of Orcutt Relief Corps, No. 110, Department of Michigan, Woman's Relief Corps, auxiliary to the Grand Army of the Republic, against changes in the United States flag; to the Committee on the Judiciary.

By Mr. SUTHERLAND: Papers to accompany the bill (H. R. 14278) granting a pension to Edwin T. Jones; to the Committee on Pensions.

By Mr. TEN EYCK: Petition of F. A. Bower, F. A. Sherman, L. F. Hayner, J. H. Burnap, J. H. Wood, H. F. Brokaw, H. E. Hanford, J. R. Grove, H. Smith, and J. F. Speel, all of Albany, N. Y., relative to national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens of Troy, N. Y., relative to national prohibition; to the Committee on the Judiciary.

By Mr. UNDERHILL: Petitions of Frank McCormick and other citizens of Bath, N. Y., protesting against national prohibition; to the Committee on the Judiciary.

Also, memorial of the Memphis Cotton Exchange, relative to certain conditions to be inserted in all contracts for futures; to the Committee on Agriculture.

Also, petition of the Washington (D. C.) Central Labor Union, favoring passage of House bill 12873, relative to assessment of real estate in the District of Columbia; to the Committee on the District of Columbia.

By Mr. VOLLMER: Petitions of sundry citizens of Clinton, Iowa, protesting against national prohibition; to the Committee on the Judiciary.

Also, petition of Dewey Lodge, No. 283, International Association of Machinists, of Clinton, Iowa, for back longevity and back overtime pay of members of organized labor on Panama Canal; to the Committee on Interstate and Foreign Commerce.

Also, petition of the Clinton Commercial Club, that the authority of the Postmaster General to make changes in the administration of the parcel-post law should be limited, and that changes in said law should only be made by congressional action; to the Committee on the Post Office and Post Roads.

Also, petition of the August Wentz Post, Grand Army of the Republic, Department of Iowa, with reference to changes in the United States flag; to the Committee on the Judiciary.

Also, petition of E. S. Wells, Herman Wesenberg, Henry Ketelsen, Nick Diecksel, and 221 other citizens of Iowa, against national prohibition; to the Committee on the Judiciary.

By Mr. WILLIS: Petition of the Friendship Grange, of Kenton, Hardin County, Ohio, in favor of House bill 11897, relative to farm credits; to the Committee on Banking and Currency.

Also, petition of the Bank of Horton, Horton, Kans., suggesting an amendment to the income-tax law; to the Committee on Ways and Means.

Also, petition of the Central Labor Union of Washington, D. C., in favor of House bill 12873, relative to the taxation of real estate in the District of Columbia; to the Committee on the District of Columbia.

Also, petition of the legislative committee of the National Grange, favoring passage of bill for system of farm credits; to the Committee on Banking and Currency.

By Mr. WILSON of New York: Petition of the Washington (D. C.) Central Labor Union, favoring passage of House bill 12873, relative to assessment of real estate in the District of Columbia; to the Committee on the District of Columbia.

Also, petition of the Allied Printing Trades Council of New York City, protesting against increase of postage on second-class matter; to the Committee on the Post Office and Post Roads.

Also, petition of the Colonel John Jacob Astor Camp, No. 98, United Spanish War Veterans, Department of New York, favoring passage of the widows and orphans pension bill; to the Committee on Pensions.

By Mr. WINSLOW: Petition of Otto J. Ekwald and other citizens, of Worcester, Mass., for an investigation of the aim and purpose of the Menace; to the Committee on the Post Office and Post Roads.

## SENATE.

FRIDAY, *March 6, 1914.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, we come to Thee that we may put our feet upon the eternal granite of Thy righteousness. There is but one law in all the ages and one Supreme Ruler in all the universe. If there seems to be a break in the continuance of Thy rule, it is because of our own distorted power of human reasoning or because our sense perceptions are held in bondage unto sin. Ever from Thy throne there goeth forth the one law of human conduct, ever continuing, ever consistent, full of love—the revelation of the divine mind to men. We pray that this day we may square our lives by the divine order and live to glorify Thy name, to extend the interests of the kingdom of truth and righteousness in the earth. For Christ's sake. Amen.

The Journal of yesterday's proceedings was read and approved.

### MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 11338) making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1915, and for other purposes.

The message also announced that the House had passed a joint resolution (H. J. Res. 84) limiting the editions of the publications of the Bureau of Education, in which it requested the concurrence of the Senate.

The message further announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 48) to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes.

### ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills and joint resolution, and they were thereupon signed by the Vice President:

S. 3206. An act for the protection of the water supply of the city of Baker, a municipal corporation of the State of Oregon;

S. 3454. An act authorizing the Secretary of Commerce to lease to the city of Port Angeles, Wash., certain property;

S. J. Res. 90. A joint resolution to continue in effect the provisions of the act of March 9, 1906 (Stat. L., vol. 34, p. 56);

H. R. 11331. An act to repeal an act regulating the construction of bridges across the Muskingum River in Ohio; and

H. R. 13365. An act to authorize the construction, maintenance, and operation of a bridge across the Tombigbee River near Old Cotton Gin Port, in Monroe County, Miss.

### PETITIONS AND MEMORIALS.

Mr. NELSON presented memorials of sundry citizens of St. Paul, Minneapolis, Moorhead, Pelican Rapids, Farwell, and St. Cloud, all in the State of Minnesota, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a petition of the congregation of the Scandinavian Christian Church, of Compton, Minn., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a petition of Hennepin County Lodge, No. 175, Order of B'rith Abraham, of Minneapolis, Minn., praying for the enactment of legislation to permit immigrants seeking refuge from religious or political persecution to enter this country without any educational test, which was referred to the Committee on Immigration.

Mr. KERN presented a petition of the Central Bureau of the Central Verein, of St. Louis, Mo., praying for the enactment of legislation to provide compensation for employees of the United States suffering injuries or occupational diseases in the course of their employment, which was referred to the Committee on Education and Labor.

Mr. SHEPPARD presented memorials of sundry citizens of Fort Worth, Tex., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a petition of the Union Sunday School, of Cochran, Ind., and a petition of sundry citizens of Lynchburg, Va., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. LANE presented a memorial of sundry citizens of Baker, Oreg., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. KERN presented memorials of sundry citizens of Indianapolis, Ind., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented petitions of sundry citizens of Decatur County, Ind., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. LODGE presented a petition of Ida McKinley Council, No. 5, Daughters of America, of Lynn, Mass., praying for the enactment of legislation to further restrict immigration, which was referred to the Committee on Immigration.

He also presented memorials of sundry citizens of Boston and Springfield and of Local Union No. 90, Bartenders' Union, of Lawrence, all in the State of Massachusetts, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a memorial of Captain John M. Pettingell Camp, No. 52, United Spanish War Veterans, of Amesbury, Mass., praying for the enactment of legislation granting pensions to widows and minor children of soldiers of the Spanish-

American War, which was referred to the Committee on Pensions.

He also presented a memorial of the Federated Irish Societies of Massachusetts, remonstrating against the repeal of the clause in the Panama Canal act exempting American coastwise vessels from the payment of tolls, which was referred to the Committee on Interoceanic Canals.

He also presented memorials of sundry citizens of New Bedford, Dartmouth, Acushnet, and Mattapoisett, all in the State of Massachusetts, remonstrating against the enactment of legislation compelling employees in the Postal Service to work on Sundays, which were referred to the Committee on Post Offices and Post Roads.

He also presented a memorial of the John Hancock Branch, American Continental League of America, of Lynn, Mass., remonstrating against an appropriation for the celebration of the so-called "One hundred years of peace among English-speaking peoples," which was referred to the Committee on Foreign Relations.

Mr. SHIVELY presented a memorial of the Board of Trade of Indianapolis, Ind., remonstrating against the enactment of legislation to provide for the inspection and grading of grain entering into interstate commerce, which was ordered to lie on the table.

He also presented petitions of the congregation of the Methodist Episcopal Church of Harlan and of sundry citizens of Fulton County and Culver, all in the State of Indiana, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a petition of Typographical Union No. 412, of Kokomo, Ind., praying for the enactment of legislation to provide an educational test for immigrants to this country, which was referred to the Committee on Immigration.

He also presented a memorial of the Fifth Division, Railway Mail Association, of Indianapolis, Ind., remonstrating against the demotion of certain railway postal clerks by reason of reduction in force and car space, which was referred to the Committee on Post Offices and Post Roads.

He also presented a petition of Honey Creek Grange, No. 1, Patrons of Husbandry, of Vigo County, Ind., praying for the enactment of legislation to provide a system of rural credits, which was referred to the Committee on Banking and Currency.

Mr. BRADLEY presented memorials of sundry citizens of Jefferson County and Kenton County; of the German-American Alliance of Louisville; of sundry citizens of Covington, Lexington, Louisville, Frankfort, Shively, Chapeze, Newport, Paducah, Owensboro, and Early Times, all in the State of Kentucky, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a petition of sundry citizens of French, Charity, Stephens, and Dobins, all in the State of Kentucky, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

He also presented petitions of Sunshine Council, No. 97, Daughters of America, of Bromley, and of Banner Council, No. 7, Daughters of America, of Louisville, both in the State of Kentucky, praying for the enactment of legislation to further restrict immigration, which were referred to the Committee on Immigration.

Mr. BRANDEGEE presented a petition of the Connecticut State Branch, Post Office Clerks' Association, of Bridgeport, Conn., and a petition of the Civil Service Employees' Association, of South Norwalk, Conn., praying for the enactment of legislation to provide for the retirement of superannuated civil-service employees, which were referred to the Committee on Civil Service and Retrenchment.

Mr. GALLINGER presented a petition of the Granite State Dairymen's Association, of Durham, N. H., praying for the enactment of legislation to prohibit the coloring of oleomargarine in imitation of butter, which was referred to the Committee on Agriculture and Forestry.

He also presented a petition of sundry citizens of Nashua, N. H., praying for the enactment of legislation to standardize the sale prices of drugs, which was referred to the Committee on Interstate Commerce.

Mr. POINDEXTER presented a petition of the Chamber of Commerce of Olympia, Wash., praying that an appropriation be made for the improvement of Willapa Harbor, in that State, which was referred to the Committee on Commerce.

He also presented a memorial of Local Union No. 450, Cooks and Kitchen Helpers' Union, of Spokane, Wash., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

He also presented a memorial of sundry citizens of Clarkston, Prescott, College Place, and Farmington, all in the State of Washington, remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which was referred to the Committee on the District of Columbia.

## FISHERIES REGULATIONS.

Mr. JONES. Mr. President, a few days ago the Senate passed a bill adopting some regulations in conformity to a treaty made between this country and Great Britain in reference to international boundary matters. When that legislation was up I did not object to its consideration, because I had been assured by parties who claimed to represent some of the fishing interests of our country that, while they had some objections, they would not oppose the passage of the bill.

I received a telegram this morning asking that the legislation be delayed and setting out the objections these people have to the regulations. I simply ask to have the telegram, in the nature of a petition, printed in the RECORD so that the RECORD will show the objections they make to the regulations.

There being no objection, the telegram was ordered to lie on the table and to be printed in the RECORD, as follows:

[Telegram.]

SEATTLE, WASH., *March 5, 1914.*

Hon. WESLEY L. JONES,
*United States Senate, Washington, D. C.:*

Puget Sound fishing interests will be vitally and injuriously affected by passage of any bill containing regulations for Puget Sound as set out in Root Senate bill 4437 or Flood House bill 13005. Respectfully request all congressional action be deferred until after new satisfactory regulations for Puget Sound can be agreed upon by international commission. This should be accomplished within reasonably short time after a hearing. If American commissioner will cooperate, we would not oppose bill with proper regulations, but must seriously object to regulations contained in pending bills. Regulation 62 prohibits fishing for all salmon from August 25 to September 15 each year. This will destroy entirely humpback-salmon industry on Sound. Regulation 63 provides for a 48-hour weekly close season. State law provides 36 hours, which is ample. The provisions in regulation 64 prohibiting use of jigger on fish traps will diminish efficiency of trap by approximately a third to a half and will put many traps out of existence altogether. This will benefit no one except British Columbia fishermen. There are also other serious objections. If proposed regulations are adopted by Congress they can not be changed for four years, and then after one year's notice by either Government except by agreement of the two commissioners ratified by Congress and Canadian Parliament, which is highly improbable. See article 6. Treaty regulations should be made right before Congress acts. We believe that Prof. Prince and Dr. Smith could be gotten together and easily adjust the matter, so as not to cripple a great industry. A printed protest by salmon fishermen of Puget Sound was furnished to all Members of the Sixty-first Congress. Please examine such protest. Full letter follows.

E. A. SIMS,
T. J. GORMAN,
KERR & MCCORD,
DORR & HADLEY.

## WOMAN SUFFRAGE.

Mr. ASHURST. Mr. President, I have not attempted to encumber the RECORD with the large number of letters, petitions, and telegrams respecting Senate joint resolution No. 1 that I have received, but I have this morning received a telegram here from an excellent lady, which telegram I ask may be read at the desk.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read as requested.

The Secretary read as follows:

[Telegram.]

NEW YORK, *March 5, 1914.*

Senator H. F. ASHURST,
*United States Senate, Washington, D. C.:*

If you allow suffrage amendment to go to vote now, I shall consider you false to our interests and shall not hesitate to make that fact known in important places. Those who have asked you to push the amendment to vote now are not genuinely interested in its immediate success. They are progressives, and are using you. Beware of their advice. We expect you to represent us, not them.

Mrs. OLIVER H. P. BELMONT.

Mr. SMOOT. I should like to ask the Senator from Arizona a question. Is the sender of the telegram a member of the general board on woman suffrage?

Mr. ASHURST. I do not know. She is a very excellent lady, who has taken great interest in woman suffrage. I have just received this telegram, to which she expresses some objections to a vote at this time, and says if the resolution goes to a vote she will feel it to be her duty to say to the country that I have not been diligent or pursued a wise course. I have so much

respect for her I feel that her views ought to be incorporated into the RECORD.

Mr. SMOOT. I wish to say to the Senator that as I understand it she is not on the general board of woman suffrage located at New York, which wants a vote on Senate joint resolution No. 1, introduced by the Senator from Arizona.

Mr. ASHURST. Of course, as to that I do not know. The joint resolution was introduced by the Senator from Oregon [Mr. CHAMBERLAIN].

Mr. SMOOT. Yes; it was introduced by the Senator from Oregon [Mr. CHAMBERLAIN] and reported by the Senator from Arizona [Mr. ASHURST].

Mr. JAMES. If the Senator from Utah will permit me, my information is that Mrs. Oliver H. P. Belmont is one of the recognized leaders, if not the leader, of the movement for woman suffrage.

Mr. SMOOT. I will say to the Senator that I am not aware as to that, and that is the reason why I asked the Senator from Arizona if he knew whether she is a member of the board or not.

The VICE PRESIDENT. The telegram will lie on the table.

INSPECTION AND GRADING OF GRAIN.

Mr. MCCUMBER. I have a telegram here in the shape of a petition, and as it pertains to matters which have been discussed in the Senate I will ask to have it read. It is short.

There being no objection, the telegram was read and ordered to lie on the table, as follows:

[Telegram.]

JAMESTOWN, N. DAK., *March 5, 1914.*

Hon. P. J. MCCUMBER,
*United States Senate, Washington, D. C.:*

The following resolution was passed to-day by the Farmers Grain Dealers' Association of North Dakota in convention assembled:

"*Resolved*, Realizing that at this time a spirit of unrest exists among the citizens of this State in regard to the marketing of farm products, and recognizing that the sentiment exists among producers that there are injustices and irregularities practiced by the grain exchanges of the country detrimental to the producer, therefore we respectfully ask the Congress of the United States to make a thorough and impartial investigation of the grain exchanges of this country, and in particular the Duluth Board of Trade, the Minneapolis Chamber of Commerce, and the Equitable Cooperative Exchange of Minneapolis, Minn., to the end that the truth will be known and remedial legislation be enacted if necessary."

S. W. UNKENHOLZ,
*Mandan, N. Dak.*

REPORTS OF COMMITTEES.

Mr. VARDAMAN, from the Committee on Post Offices and Post Roads, to which was referred the bill (H. R. 9318) to amend the act approved June 25, 1910, entitled "An act to establish postal savings depositories for depositing savings at interest with the security of the Government for repayment thereof, and for other purposes," reported it without amendment and submitted a report (No. 316) thereon.

Mr. WILLIAMS, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred Senate resolution 278, authorizing and directing the Sergeant at Arms to appoint James F. Sellers additional messenger at $1,200 per annum, reported it without amendment.

He also, from the same committee, to which was referred Senate resolution 282, authorizing the Committee on Public Health and National Quarantine to hold hearings, reported it without amendment.

He also, from the same committee, to which was referred Senate resolution 285, authorizing the chairman of the Senate Committee on Post Offices and Post Roads to employ temporarily a clerk, reported it without amendment.

Mr. SMITH of Maryland. I am directed by the Committee on Appropriations, to which was referred the bill (H. R. 10523) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1915, and for other purposes, to report it with amendments, and I submit a report (No. 318) thereon. I desire to give notice that I shall ask the Senate to take up the bill to-morrow after the morning business is concluded.

The VICE PRESIDENT. The bill will be placed on the calendar.

MISSISSIPPI RIVER BRIDGE AT SARTELL, MINN.

Mr. NELSON. I report back favorably without amendment from the Committee on Commerce the bill (H. R. 13545) to extend the time for constructing a bridge across the Mississippi River at the town of Sartell, Minn., and I submit a report (No. 315) thereon. I ask unanimous consent for the present consideration of the bill.

The VICE PRESIDENT. The Secretary will read the bill.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

THE DISTRICT OF COLUMBIA.

Mr. CHILTON. I report back from the Committee on Printing Senate resolution 280, with amendments. The committee reports it favorably. I would call the attention of the Senator from New Hampshire [Mr. GALLINGER], who submitted the resolution, to it, but he is not in the Chamber.

Mr. SMOOT. Let me suggest to the Senator that in making these reports from the Committee on Printing it would be well to ask unanimous consent for their immediate consideration.

Mr. CHILTON. I was thinking of doing that. I ask unanimous consent for the present consideration of the resolution.

There being no objection, the Senate proceeded to consider the resolution.

The amendments of the Committee on Printing were, in line 15, to strike out the word "and" before "report," and at the end of the resolution to insert "and the views of the minority of the joint select committee to frame a government for the District of Columbia, etc. (S. Rept. No. 572, 44th Cong., 2d sess.)," so as to make the resolution read:

*Resolved*, That there be reprinted in one volume, for the use of the Senate document room, 500 copies of Senate report entitled "Memorials of Authorities of City of Washington," etc., by Mr. Southard (23d Cong., 2d sess., Feb. 2, 1835); report of the joint select committee of Congress appointed to inquire into the affairs of the Government of the District of Columbia (S. Rept. No. 453, 43d Cong., 1st sess., pt. 1, pp. 1 to 29, inclusive); report from the Committee on the Judiciary of the House of Representatives on "Legal relations of the District of Columbia and the United States" (H. Rept. No. 627, 43d Cong., 1st sess.); report of a joint select committee appointed to prepare a suitable frame of government for the District of Columbia, etc. (S. Rept. No. 479, 43d Cong., 2d sess); and the views of the minority of the joint select committee to frame a government for the District of Columbia, etc. (S. Rept. No. 572, 44th Cong., 2d sess.).

The amendments were agreed to.

The resolution as amended was agreed to.

CREEK EQUALIZATION FUND (S. DOC. NO. 439).

Mr. CHILTON. I report favorably from the Committee on Printing the motion of the Senator from Oklahoma [Mr. OWEN], submitted on the 3d instant, to print the memorial of R. C. Allen on the Creek equalization fund, and I ask for its present consideration.

The VICE PRESIDENT. The motion will be stated.

The Secretary read as follows:

Mr. OWEN said: Mr. President, I have a memorial from R. C. Allen, national attorney of the Creek Nation of Indians with regard to the Creek equalization fund, giving the data and reasons why it should be disposed of by the Senate. I think the memorial ought to be printed as a Senate document for the information of the Senate. I do not know whether or no the Senate has adopted a rule requiring such matters to be referred to the Committee on Printing. If so, I should like to ask a reference of the memorial to the Committee on Printing and to request a prompt report on it, because the Indian appropriation bill is now before the Committee on Indian Affairs.

Mr. CHILTON. I ask unanimous consent for the immediate consideration of the order.

The VICE PRESIDENT. The question is on agreeing to the order as read.

The order was agreed to.

NATIONAL AID TO GOOD ROADS (S. DOC. NO. 438).

Mr. CHILTON. From the Committee on Printing I report back favorably an article by Jonathan Bourne, jr., on the subject of national aid to good roads, submitted by the Senator from Florida [Mr. BRYAN] on the 20th ultimo. I am directed by the committee to request that the article be printed as a public document.

The VICE PRESIDENT. Without objection, that action will be taken.

REPORT OF THE NATIONAL ACADEMY OF SCIENCES (S. DOC. NO. 437).

Mr. CHILTON. From the Committee on Printing I submit a report (No. 317), accompanied by an original resolution, and ask for its immediate consideration.

The resolution (S. Res. 287) was read, considered by unanimous consent, and agreed to, as follows:

*Resolved*, That the report of the National Academy of Sciences for the year 1913, together with the accompanying appendices, illustrations, and report of the semicentennial anniversary of said academy, be printed as a Senate document.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. THOMAS:

A bill (S. 4701) for the relief of Edwin Price; to the Committee on Post Offices and Post Roads.

By Mr. BRADLEY:

A bill (S. 4702) to amend an act entitled "An act granting pensions to enlisted men, soldiers, and officers who served in the

Civil War and the War with Mexico," approved May 11, 1912; to the Committee on Pensions.

By Mr. CLARK of Wyoming:

A bill (S. 4703) for the relief of the heirs of Granville S. Thompson; to the Committee on Claims.

By Mr. WALSH:

A bill (S. 4704) to amend an act entitled "An act for the survey and allotment of lands now embraced within the limits of the Fort Peck Indian Reservation, in the State of Montana, and the sale and disposal of all surplus lands after allotment," approved May 30, 1908 (with accompany papers); to the Committee on Indian Affairs.

By Mr. CHAMBERLAIN:

A bill (S. 4705) granting a pension to Eli Ziegler; to the Committee on Pensions.

By Mr. LODGE:

A bill (S. 4706) granting a pension to Caroline E. Stevens Van Wormer (with accompanying papers); to the Committee on Pensions.

By Mr. ROBINSON:

A bill (S. 4707) for increasing the efficiency of Army bands; to the Committee on Military Affairs.

A bill (S. 4708) to authorize and provide for the investigation and survey of swamp, wet, and overflowed lands in the Mississippi Valley susceptible of drainage, and to devise plans and systems therefor; to the Committee on Agriculture and Forestry.

A bill (S. 4709) to repeal the several acts authorizing an internal tax on cotton and relating to the same and providing for the payment to the treasurers of the respective States wherein said tax was levied and collected the amounts so collected for the use and benefit of the common-school fund of said respective States and for purposes of general education; to the Committee on Claims.

A bill (S. 4710) appropriating money for improvement, extension, and repair of the Army and Navy Hospital, at Hot Springs, Ark.;

A bill (S. 4711) authorizing the Secretary of the Interior to construct a new bathhouse on the Hot Springs Reservation, Ark., for the accommodation of indigents;

A bill (S. 4712) to authorize the sale of certain lots in the Hot Springs Reservation for church and hospital purposes; and

A bill (S. 4713) authorizing and directing the Secretary of the Interior to cause to be made certain improvements on the Government reservation at Hot Springs, Ark.; to the Committee on Public Lands.

### PANAMA CANAL TOLLS.

Mr. JONES. I submit a resolution and ask that it may be read and lie on the table.

The resolution (S. Res. 288) was read, as follows:

*Resolved by the Senate of the United States,* That the President be, and he is, requested, if not incompatible with the public interests, to advise the Senate what nations have protested against the passage of coastwise vessels through the Panama Canal free of tolls, what representations have been made regarding the same, and copies of all communications received from foreign countries relating thereto together with copies of answers submitted by the United States.

The VICE PRESIDENT. The resolution will be printed and lie on the table.

### TOLL-EXEMPTION PROVISION OF PANAMA CANAL ACT.

Mr. POINDEXTER. I submit a resolution, which I ask to have read.

The resolution (S. Res. 289) was read, as follows:

*Resolved by the Senate of the United States,* That the President be respectfully requested to inform the Senate, in so far as not incompatible with the public interest, what "other matters of even greater delicacy and nearer consequence" are referred to in the President's message of March 5, 1914; and to so inform the Senate what connection such matters have with the proposed repeal of the toll-exemption provision of the Panama Canal act of August 24, 1912.

The VICE PRESIDENT. Is there objection to the present consideration of the resolution?

Mr. SWANSON. It seems to me that the resolution had better go over for a day. I object to its present consideration.

The VICE PRESIDENT. The resolution will lie over.

Mr. POINDEXTER. Mr. President, I should like to make a very brief statement in connection with the resolution.

A few days ago I noticed printed in the Washington Post, of this city, a purported interview with the Senator from Louisiana [Mr. THORNTON], to which I desire to call attention, in connection with the President's message of yesterday, and particularly that portion of it which is quoted in the resolution I have just introduced.

In this purported interview the Senator from Louisiana stated that he had just had an interview with the President; that he had previously been very strongly in favor of the exemption of American coastwise vessels from the payment of tolls for passing through the Panama Canal, but that on account of the statement which the President had just made to him he had changed his mind. I desire to read this language from the statement of the Senator from Louisiana as it is reported:

> But I recognize now, as I always did, the substantial difference between our right of exemption and our enforcement of that right.
>
> Understanding through newspaper reports only that the President believed our national interests would be subserved by the repeal of the exemption clause in the present law, I have appealed to him directly for an expression of his views. He has answered that the repeal of the exemption clause is necessary for the continuance of our present friendly relations with foreign powers and the success of our foreign policies.
>
> FEELS IT HIS DUTY TO ASSIST.
>
> Considering the canal tolls exemption law previously enacted to be a question of policy and not of principle, and recognizing the great responsibility resting on the President for the successful conduct of our foreign relations, and also the delicacy of the present trying situation in regard to those relations, I feel it my public duty to assist the President in carrying out his wishes in this matter.

Mr. President, it occurs to me, if the situation referred to in matters not named is so delicate, and the success of whatever foreign policy the United States at the present time may have depends upon the repeal of the Panama tolls exemption clause——

Mr. SWANSON. Mr. President——

Mr. POINDEXTER. Just one moment, that the Senate ought to be informed what that matter is and in what this delicacy consists which impels Senators to promptly change their expressed attitude upon this great question.

Mr. SWANSON. Will the Senator from Washington yield to me?

The VICE PRESIDENT. Does the Senator from Washington yield to the Senator from Virginia?

Mr. POINDEXTER. I yield to the Senator from Virginia.

Mr. SWANSON. I should like to suggest to the Senator from Washington that the senior Senator from Louisiana [Mr. THORNTON] is not present to-day; he has been ill for several days. Does not the Senator from Washington think it would be better to delay his remarks until the Senator from Louisiana is present and can respond?

Mr. POINDEXTER. I have nothing further to say with reference to the Senator from Louisiana, and I have said nothing with reference to the Senator which in any way involves him further than to give him an opportunity, if he sees fit to do so, to make a statement, which he can do at any time.

Mr. SWANSON. The Senator from Washington has introduced an interview, and he does not know whether it is accurate. I repeat, the Senator from Louisiana is not present, and it would seem to me the better course would be to wait until that Senator is present, as the Senator from Washington desires to comment upon a quoted interview with the Senator from Louisiana. Mr. President, I call for the regular order this morning.

Mr. POINDEXTER. I think I have the floor, Mr. President. I desire to occupy it only very briefly.

Mr. SWANSON. Mr. President, if I mistake not, the regular order——

The VICE PRESIDENT. If the Senator from Virginia insists upon the regular order, morning business must be proceeded with.

Mr. POINDEXTER. Very well, Mr. President.

### HOUSE JOINT RESOLUTION REFERRED.

H. J. Res. 84. Joint resolution limiting the editions of the publications of the Bureau of Education was read twice by its title and referred to the Committee on Education and Labor.

### PRESIDENTIAL PRIMARIES.

The VICE PRESIDENT. Concurrent or other resolutions are still in order. If there be no further concurrent or other resolutions, the Chair lays before the Senate a resolution coming over from a preceding day, which will be read.

The resolution (S. Res. 284) yesterday submitted by Mr. CUMMINS was read, as follows:

*Resolved,* That the Committee on Privileges and Elections be discharged from the further consideration of Senate bill 773, being a bill to establish a primary election for the nomination by political parties of candidates for President and Vice President of the United States, and for other purposes.

Mr. LODGE. Mr. President, the Senator from Iowa [Mr. CUMMINS] who submitted the resolution is not present.

The VICE PRESIDENT. The Chair understands that, by unanimous consent, the resolution is to lie over from day to day, without prejudice, at least until after the Committee on Privileges and Elections had met upon Saturday next. The Chair thinks he is correct in that understanding. If so, the resolution will again go over without prejudice.

LIGHTHOUSE TENDER FOR GENERAL SERVICE.

Mr. NELSON. I ask unanimous consent for the present consideration of Senate bill 2876. It is a very short bill. I have a letter from the Secretary of Commerce urging speedy action upon it.

The VICE PRESIDENT. The Secretary will read the bill for the information of the Senate.

The Secretary read the bill (S. 2876) to amend an act entitled "An act to authorize aids to navigation and for other works in the Lighthouse Service, and for other purposes," approved March 4, 1913.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

Mr. CLARK of Wyoming. I desire to ask the Senator from Minnesota one question. I ask was the original transmission from the department based as to cost upon the estimate of the department?

Mr. NELSON. It was based on an estimate made some years ago, but it is found that a suitable tender can not be constructed for the amount originally estimated.

Mr. CLARK of Wyoming. How many years ago was the estimate made, I will ask the Senator from Minnesota?

Mr. NELSON. I can not recall at this moment.

Mr. CLARK of Wyoming. Does not the bill state it?

Mr. NELSON. The estimate was made before the appropriation was made, and the department has urgently recommended this increase. It is insisted that a suitable tender can not be built for the amount of the original estimate.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Commerce with an amendment, in section 1, page 1, line 6, after the words "Secretary of Commerce," to strike out "and Labor," so as to make the section read:

That the authorization in the act approved March 4, 1913, to authorize aids to navigation and for other works in the Lighthouse Service, and for other purposes, which authorizes the Secretary of Commerce to construct a lighthouse tender for general service at a cost not exceeding $250,000, be, and the same is hereby, amended so as to increase the limit of cost provided in said authorization from $250,000 to $325,000; and the Secretary of Commerce is hereby authorized to have constructed a lighthouse tender for general service as provided in said item in said bill to cost not exceeding $325,000.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

CALLING OF THE ROLL.

Mr. WORKS obtained the floor.

Mr. KERN. Mr. President——

The VICE PRESIDENT. Does the Senator from California yield to the Senator from Indiana?

Mr. WORKS. I yield to the Senator.

Mr. KERN. I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Gore | O'Gorman | Smith, Md. |
| Bankhead | Gronna | Oliver | Smith, Mich. |
| Bradley | Hughes | Overman | Smith, S. C. |
| Brady | James | Owen | Smoot |
| Brandegee | Jones | Perkins | Stephenson |
| Bristow | Kenyon | Pittman | Sutherland |
| Bryan | Kern | Poindexter | Swanson |
| Burton | Lane | Robinson | Thomas |
| Catron | Lea, Tenn. | Root | Thompson |
| Chamberlain | Lewis | Saulsbury | Tillman |
| Chilton | Lodge | Shafroth | Townsend |
| Clapp | McCumber | Sheppard | Vardaman |
| Clark, Wyo. | Martin, Va. | Sherman | Walsh |
| Cummins | Martine, N. J. | Shively | Warren |
| Dillingham | Myers | Simmons | Williams |
| Fall | Nelson | Smith, Ariz. | Works |
| Gallinger | Norris | Smith, Ga. | |

Mr. SHEPPARD. I wish to announce the necessary absence of my colleague [Mr. CULBERSON] and to state that he is paired with the Senator from Delaware [Mr. DU PONT]. This announcement may stand for the day.

The VICE PRESIDENT. Sixty-seven Senators have answered to the roll call. There is a quorum present.

PROHIBITION OF SMOKING IN THE SENATE CHAMBER.

Mr. TILLMAN. Mr. President, will the Senator from California yield to me?

Mr. WORKS. I yield to the Senator.

Mr. TILLMAN. Mr. President, yesterday evening I gave notice that I would this morning call up the antismoking resolution. I was out of the Chamber when the morning business was closed, and as the Senator from California [Mr. WORKS] has the floor and desires to go on, I give notice that I will call up the resolution to-morrow morning immediately after the conclusion of the routine morning business.

"ONE YEAR OF DEMOCRATIC RULE."

Mr. WORKS. Mr. President, we have now had a year of Democratic rule and Democratic legislation. It is an appropriate time to take account of what has been accomplished. The judicial department has remained practically as it was, unaffected by the change of administration. Therefore we must look to the executive and legislative departments of the Government for any achievements for good or evil as they affect the common weal. There has been much boasting of the accomplishments of Democratic management of public affairs. I should like the attention of the Senate while I review in a friendly way the sum of these achievements. I say in a friendly way because what I shall say will not be said in any spirit of animosity, however much I may differ from some of those who sincerely believe, as I do not, that the legislation enacted by this Congress and the conduct of the executive department thus far under Democratic rule have been in the public interest and for the common good.

My review of the events of the year just closed will be in a spirit of personal good will, and I shall hope to make it as fair and just as one can who speaks from the standpoint of a political antagonist and disbelieves, in a great degree, in the principles and policies of the Democratic Party. From that standpoint I shall deal with the question frankly and without reservation.

When the Democratic national convention met in Baltimore it declared for certain principles and announced certain political policies, and upon these declared principles and policies nominated and elected Woodrow Wilson President of the United States and secured control of both branches of Congress, thus placing the party in full control of the Government in all its departments. But the platform of the party was not approved by a majority of the voters of the country, and its candidate for President was elected by a minority of the electors, resulting from a division in the Republican Party. Therefore any change in the policies or principles of government can not be attributed to the people of the country or founded upon public approval. They are the acts of the Democratic Party only, founded on the Democratic platform, rejected by a majority of the voters of the country, and brought about in important particulars mainly by the coercive power of the President, avowedly acting as the head of the party in furtherance of the principles and pledges contained in its political platform. So the Democratic Party should justly be credited with anything good that has been accomplished during the year and held responsible for any wrongs or errors that have been committed.

Now, Mr. President, what has been accomplished by this administration, and how much of good and how much of evil has or is likely to come from it?

For the year the Congress has been almost continuously in session, at enormous expense to the Government. Nothing like it has ever been known. And what has all this been for? Mostly for the political advantage of the Democratic Party. It was conceived that there was a great public demand for a revision of the tariff, and to enact a new tariff law would at once bring the party into public favor. So a special session of Congress was called to enact such a law. Everything else must give way to this purpose. Other important legislation, more important in the public interest than the tariff, was crowded out and neglected. The committees of both Houses, with their calendars full of bills, many of them of great importance, were compelled to remain idle for months because of the desire of the Democrats to force through the tariff bill. Nothing was allowed to stand in its way. It was supposed that when this bill was passed Congress would be allowed to adjourn. But the tariff bill was not well received; it was feared that its passage was going to injure instead of help the Democratic Party at the coming election. Our Democratic friends were in a panic; their efforts had miscarried; something must be done to restore confidence and the party to public favor. It was believed that there was a universal public demand for a new banking and currency law and that to enact such a law would avoid a panic and thus save the Democratic Party from certain disaster. Congress was ready and anxious to adjourn; but this could not be allowed with this cloud of public disfavor resting on the party. The President again came to the rescue. He demanded in no uncertain terms that Congress remain in session and pass a banking and currency bill. Again all other legislation, however important, was subordinated to this supreme effort to restore the Democratic Party to favor. The session was prolonged through the entire summer and fall for the sole purpose of passing this

one bill. It met with unexpected opposition. Prolonged hearings were had upon it. As it was proposed it was not pleasing to Wall Street and the bankers throughout the country. Some way must be found to satisfy the money power. This was not easy to do and still satisfy the people generally. As a result, the entire balance of the special session, from September 9, when the tariff bill was passed, until the beginning of the regular session, the 1st of December, was wasted in waiting for action on the currency bill by the Committee on Banking and Currency. Never before had there been such waste of time and public moneys.

Mr. President, I am going to comment on these two bills and their effect before I have finished, but before doing so I want to point out in a general way what else has been done by Congress in the way of enacting laws.

During the year Congress enacted 63 bills. Of these, 18 were bridge bills simply granting the right to various corporations to construct bridges across navigable streams, none of which were contested and passed as a matter of course; five were appropriation bills that must be passed each year; two related to the Panama Exposition to be held at San Francisco; one to increase the number of midshipmen at the Naval Academy; one providing for mediation, conciliation, and arbitration in controversies between employers and employees; three to limit the cost of certain public buildings; one to provide for representation of the United States in the Fourteenth International Congress on Alcoholism; one authorizing the appointment of an ambassador to Spain; one providing for the acquiring of station grounds by the Great Northern Railway Co. in the Colville Indian Reservation in the State of Washington; one extending to the port of Dallas, Tex., certain privileges in the matter of immediate transportation of dutiable merchandise; one to provide a method for opening lands restored from reservation or withdrawal; one to fix the times and places of holding district court in Arizona; two to amend the Judicial Code; one to create an additional land district in the State of Nevada; one extending the privileges of transportation of dutiable merchandise to the port of Perth Amboy, N. J.; one granting permission to the city of Marshfield, Oreg., to close Mill Slough in that city; one to enable the Commissioner of Indian Affairs to employ additional clerks; one authorizing the Secretary of the Interior to grant further extensions of time within which to comply with the law and make proof on desert-land entries in certain counties in the State of Washington; one to amend the statute relating to mining claims; one authorizing the appointment of envoys extraordinary and ministers plenipotentiary to Paraguay and Uruguay; one fixing the term of the major general commandant of the Marine Corps at four years; one granting the city and county of San Francisco certain rights of way over public lands; one to provide for expenses of representatives of the United States at the International Maritime Conference for Safety of Life at Sea; two amending the law relating to the importation and use of opium; one amending the law relating to the liability of postmasters; one granting the Emigration Canon Railroad Co. the right of way over public lands; one to regulate the payment of postal money orders; one to enjoin and abate houses of lewdness, and so forth, commonly known as the "red-light" act; one authorizing the changing of the names of certain steamships; one providing for the appointment of an additional district judge for the eastern district of Pennsylvania; one to promote the efficiency of the Naval Militia; one appropriating funds for the eradication of hog cholera and dourine; one regulating the hours of employment of women in the District of Columbia; one authorizing the Secretary of the Interior to sell a tract of land to the city of Lawton, Okla., for watershed and water-supply purposes. Then follow the only bills of real public importance passed during the year other than the appropriation bills, namely, the tariff act and the act establishing Federal reserve banks.

THE TARIFF BILL.

For the tariff bill as it passed and became a law the President is responsible. But for the coercion used by him to compel action by Congress it never would have passed. It is not approved by the judgment or conscience of a majority of the Members of Congress in either House. It probably would not have received a majority of the votes of the Democratic Members of the Senate. His demand was for free wool and free sugar. The Members of his party submitted unwillingly to this demand.

There were many other provisions of the bill that were objectionable to Democratic Members of both Houses. In this emergency the demands of the President were supplemented by the secret caucus that stifled the consciences and closed the lips of Democratic Members of Congress who opposed the bill from conviction. As it finally passed it was inimical to the best interests of my State and almost all of its industries. Other States suffered in the same way. The reduction of duties so reduced the revenues of the Government that direct taxation became necessary to make up the loss. So the people are having a taste of direct taxation in the form of an income-tax law, made necessary by the Democratic policy of free trade or a tariff for revenue only. It was openly avowed on the floor of the Senate that no account was taken of the protection of American industries in framing the bill, and that it was framed purely as a revenue measure. Some Democratic Senators declared in positive terms against any legislation designed to protect our home industries by tariff duties. The Democratic Party committed itself, by the passage of this bill, as opposed to all such legislation. Its most injurious and destructive provisions were directed at the farming industries of the country, but the manufacturing and other industries have not escaped the effects of this blighting legislation. Not only so, but the laboring man, who is dependent upon the success and prosperity of the home industries of his country, has not escaped. By taking off the tariff—in many instances placing our products on the free list—the Democratic Party has taken away from our own people their home markets and opened them up to the products of the cheap labor of foreign countries for a reduced duty, or none at all, thus jeopardizing our home industries, cheapening and degrading labor, turning thousands of workmen out of employment, and, at the same time, depriving the Government of needed revenue that must be made up by direct taxation.

Mr. President, what was all this for? Ostensibly for the benefit of the ultimate consumer by cheapening our own products. But has it done so? Quite the contrary. While the importers and foreign producers pay less money to gain entrance for their goods into our markets they have pocketed the difference, and where there has been any reduction in price to our own producers it has not reduced the price of the same goods to the consumer. If the imported goods can be sold for less than will produce a profit to our own producers it only means the surrender of our markets to importers from other countries, leaving them to impose their own prices when they have crowded out our own people. Now, sir, that is just what is being done. Reports from the Departments of Commerce and of Labor show two things beyond dispute, namely, that the tariff bill has brought about largely increased importations, particularly of farm products, with increased prices to the consumer. These are not matters of speculation. They are clearly demonstrated facts.

I submit for the information of the Senate comparative tables of imports covering the months of October, November, and December of the years 1912 and 1913, showing the imports for the corresponding months of the two years. They cover sugar, grapes, olives, walnuts, raisins, lemons, almonds, eggs, oats, wheat, corn, cattle, and fresh meats.

[1] Decrease.

Mr. President, these are all farm products. I have not gone into any others. The tables show the quantity and value of the importations in the same months under the old and new tariff laws and the percentage of increase or decrease for the months following the enactment of the new tariff law commencing with the month of October.

The decreased importations of sugar is significant. The reduction of the duty on sugar did not take effect until March of this year. Therefore no more than absolutely necessary importations of sugar have been made. Foreign sugar will be withheld from shipment or in bond until the lower duty takes effect, when the accumulated supply will be loaded on our markets. The comparative statement as to the other products show a marked increase in nearly all of them, and in some of them the increase is enormous. Take for examples: Grapes, the increase runs from 29 per cent in November to 223 per cent in December. Olives, the greatest increase is in November, and reached 73 per cent. Walnuts, the duty is different on not shelled and shelled. On the unshelled the increase has run up to 181 per cent. On shelled walnuts there has been a decrease, greater in November, being 46 per cent, reduced in December to one-fiftieth of 1 per cent. Evidently importations will increase soon in this case as in the others. In the case of raisins the increase has run up to 165 per cent. Lemon importations have increased 344 per cent. This increase of importations was inevitable. In a speech made by me here when the tariff bill was under discussion I said, after a showing of the facts:

> This shows that it costs the California grower $1 more to grow a box of lemons and prepare it for shipment than it costs a grower in Italy. If we add to this the difference in the freight rate of 84 cents a box that our people must pay with that of 30 cents net that is paid by the importer of lemons from Italy, we have a difference of $1.52 as the cost of production and freight on lemons to New York in favor of the foreign producer.

The duty imposed by the new tariff law is something less than 50 cents a box. The effect of this must be to give over to the importers of foreign lemons, so far as they are able to supply it, the entire eastern market of the country, and enable them to dictate prices when the domestic producer has been driven from the field. This will leave the home producers a limited market, that will prevent further extensions of the industry and render it unprofitable.

In the case of almonds, the increase for the three months has run as high as 223 per cent, depending on the season of the year. The tax of 5 cents a dozen on eggs was entirely taken off and this commonly used food placed on the free list. Under the 5-cent duty no importations were made. Since it was taken off large quantities have been imported, amounting in the month of December to 1,514,296 dozen, valued at $334,315. Of these, in a letter received by me from the Chamber of Commerce of Petaluma, Cal., it is said:

> There have arrived recently in the markets of the coast cities large shipments of eggs imported from China. These eggs cost the importers, we are informed, about 15 cents per dozen at this season of the year, enabling the importer to market them freely and at a handsome profit. They have been selling in San Francisco, Portland, Los Angeles, and other coast cities at a few cents under the price of American eggs, and are used largely by restaurants and bakeries.
>
> The continued importation of Chinese eggs at the low cost quoted will, we are convinced, seriously affect, if not entirely destroy, the very great poultry industry of this section of California. Poultrymen in the Petaluma district alone produce annually upward of 12,000,000 dozen eggs, having a market value of $3,000,000.
>
> Our poultrymen have established the fact that the average cost of producing 1 dozen of the highest quality, large white eggs is 18 cents. To this cost must be added profit for the poultrymen as well as for the retailer. Thus it will be seen that whenever the producer has to sell his eggs under 20 cents he is losing money. He therefore can not compete with the Chinese eggs, and unless some means is found of preventing their importation the California poultrymen must face bankruptcy.
>
> Our information is that the Chinese eggs are produced under conditions that render them unfit for human consumption. The object of this letter is to invite your cooperation in an investigation of this allegation, the purpose being, if the Chinese eggs are found to be unfit for use by the white race, to invoke the pure-food laws and have their importation prohibited.
>
> This is a matter that affects the people of this community vitally, and your active cooperation in the movement here outlined will be fully appreciated.

Shipments of eggs from China have amounted up to January 1, 1914, to 177,935 dozen, and doubtless, as the market is now open, millions more will follow. This is a matter of serious consequence, not only to the State of California, but particularly to the Middle Western States, where this is an important industry.

In the case of oats, the increase in importations has ranged from 61,998 per cent to 666,072 per cent. Wheat has gone to 5,708 per cent; corn from 25,819 bushels to 1,632,643 bushels in November and from 637 bushels to 2,343,444 bushels in December. In the case of cattle, as shown by the statement above, the increase has ranged from 115 to 371 per cent; and in the case of fresh meats of the various kinds, the importations have advanced from nothing under the old tariff to a total of 16,029,189 pounds under the new.

This shows a very serious surrender of our markets to foreign importers. If it were justified by a decrease of cost of these products to the consumer there would be at least a show of justice in the legislation that has brought this about. But there is no such justification or excuse.

Now, Mr. President, let us look for a moment at the other side of the question. Has the consumer benefited by these losses of the home producers or does he pay as much or more for what he gets, to the greater profit of the foreign importers? The conclusive answer to this inquiry comes from the same source. Bulletin 138 of the Department of Labor, Bureau of Labor Statistics, comparing the months of September and October, 1912 and 1913, and summarizing prices of food from 1890 to 1913, is as follows:

> RETAIL PRICES OF FOOD, 1890 TO OCTOBER, 1913.
>
> Bulletin No. 138, soon to be issued by the United States Bureau of Labor Statistics, shows retail prices of the principal articles of food in each of 40 important cities throughout the United States. This bulletin is one of the bureau's regular series on retail prices. It shows actual prices for September and October, 1913, and September and October, 1912, and also summarizes retail prices for the period from 1890 to October, 1913.
>
> Comparing retail prices on October 15, 1913, with prices on the same date 1912, 13 of the 15 articles for which quotations are given advanced and 2 declined in price. Potatoes advanced 42.3 per cent, eggs advanced 14.2 per cent, round steak advanced 12.9 per cent, ham advanced 10.6 per cent, rib roast advanced 8.8 per cent, sirloin steak advanced 8.3 per cent, bacon advanced 8.2 per cent, hens advanced 7.5 per cent, pork chops advanced 6.3 per cent, butter advanced 3.7 per cent, milk advanced 2.7 per cent, corn meal advanced 1.7 per cent, and lard advanced 1 per cent. Sugar declined 8.8 per cent and flour declined 2.6 per cent.
>
> When the price of each of the articles of food is weighted, according to average consumption in workingmen's families, retail prices were at a higher level on October 15, 1913, than at any other time during the last 23 years and 10 months. Retail prices of food on October 15, 1913, were 70.9 per cent above the average price for the 10-year period, 1890 to 1899; 7.9 per cent above the price on October 15, 1912, and 16.9 per cent above the price on October 15, 1911.
>
> The cities for which actual prices are shown are Atlanta, Ga.; Baltimore, Md.; Birmingham, Ala.; Boston, Mass.; Buffalo, N. Y.; Charleston, S. C.; Chicago, Ill.; Cincinnati, Ohio; Cleveland, Ohio; Dallas, Tex.; Denver, Colo.; Detroit, Mich.; Fall River, Mass.; Indianapolis, Ind.; Jacksonville, Fla.; Kansas City, Mo.; Little Rock, Ark.; Los Angeles, Cal.; Louisville, Ky.; Manchester, N. H.; Memphis, Tenn.; Milwaukee, Wis.; Minneapolis, Minn.; Newark, N. J.; New Haven, Conn.; New Orleans, La.; New York, N. Y.; Omaha, Nebr.; Philadelphia, Pa.; Pittsburgh, Pa.; Portland, Oreg.; Providence, R. I.; Richmond, Va.; St. Louis, Mo.; St. Paul, Minn.; Salt Lake City, Utah; San Francisco, Cal.; Scranton, Pa.; Seattle, Wash.; and Washington, D. C.

Bulletin 140 of the same kind and from the same source, but covering comparison of prices at retail for the months of November and December and containing the general summary as before, contains the following:

> Comparing retail prices on December 15, 1913, with prices on the same date in 1912, 12 of the 15 articles for which quotations are given advanced and 3 declined in price. Potatoes advanced 43.7 per cent, fresh eggs advanced 21.9 per cent, pork chops advanced 16.8 per cent, round steak advanced 13.1 per cent, rib roast advanced 10 per cent, sirloin steak advanced 8.9 per cent, ham advanced 7.9 per cent, hens advanced 6.7 per cent, corn meal advanced 6.6 per cent, bacon advanced 4.5 per cent, milk advanced 1.9 per cent, and lard advanced 0.7 per cent. Sugar declined 8.6 per cent, butter declined 2.9 per cent, and flour declined 0.6 per cent.
>
> When the price of each of the 15 articles of food is weighted according to average consumption in workingmen's families, retail prices were at a higher level on December 15, 1913, than at any other time during the 24 years preceding, with the single exception of November 15, 1913, when they reached the maximum of 72.8 per cent above the average for 1890 to 1899. Retail prices of food on December 15, 1913, were 71.7 per cent above the average price for the 10-year period 1890 to 1899; 9 per cent above the price on December 15, 1912; and 14.5 per cent above the price on December 15, 1911.

I have been unable to trace the comparative prices to consumers of all of the articles mentioned in the tables I have presented. No account of them is made in any of the departments of the Government except those mentioned in the above bulletins. But I have ascertained the effect of the low tariff on lemons and the consequent increased importations of that fruit. The tariff was reduced more than two-thirds. The duty was made so low that, so far as the markets of the eastern cities are concerned, they might just as well have been put on the free list so far as it affects the home producers. The above tables show that it has brought about an enormous increase of importations. The alleged reason for reducing the duty on lemons was to reduce the price to the consumer. But just the opposite effect has been produced, as might have been known. We were unwise enough to give up our own markets to foreign importers and thus place our own producers and the consumers at their mercy. The result so far is that a comparison of the retail prices of 27 representative cities for the months of October, November, and December, 1912, and the same months of 1913, the former under the old tariff law and the latter under the new, shows that instead of reducing the price of lemons to the consumer the price has increased 3 cents a dozen. I have no

doubt that if the data could be gathered it would show a like effect of the reduction of duties on other fruits and other articles produced in California.

So, Mr. President, we have an increase of importations by which our people are losing their home market and prices to the consumers steadily increasing. This proves that what is taken from domestic producers does not go to consumers, but redounds to the benefit of the importers of foreign goods, or middlemen, and ultimately the evil effects of such legislation reaches the man who labors to produce the domestic article in the form of lower wages and often the loss of employment. It is not a pleasing prospect.

But to make matters worse, while our home producers are being rapidly crowded out of the market and prices to the consumer are climbing higher and higher instead of being reduced by the reduction of the tariff, as the people were promised, the Government is losing millions of dollars of revenue on account of the reduced duties on foreign goods. The following figures furnished by the Treasury Department tell the melancholy story:

| Customs: | | Customs: | |
|---|---|---|---|
| Oct., 1913 | $30,138,049.37 | Oct., 1912 | $30,216,824.02 |
| Nov., 1913 | 21,173,627.85 | Nov., 1912 | 25,666,353.25 |
| Dec., 1913 | 21,510,139.99 | Dec., 1912 | 24,248,161.30 |
| Jan., 1914 | 23,528,079.83 | Jan., 1913 | 29,334,124.09 |
| Total | 96,349,897.04 | Total | 109,465,462.66 |

This shows that for the four months following the enactment of the new tariff law the Government lost the considerable sum of $13,115,565.62. At this rate, which will grow greater rather than less, the Government stands to lose $39,346,696.86, not including the loss from putting sugar on the free list.

But this is only a small proportion of the loss in revenue that will result from the act. The revenue derived from the duty on sugar in 1912 was $50,951,199. It is estimated that reduction in the duty on sugar, which has now taken effect, will reduce the income from sugar to $40,196,000, making a loss of $10,755,199. The revenue derived from duty on wool from 1912 was $48,361,374. The estimate of receipts under the present law as now in force is $35,745,000, making a loss of $12,616,374. But wool did not go on the free list until December, 1913, and therefore the figures of the Treasury Department, showing a loss of $13,115,565.62 for the four months, includes only two months of the loss on wool. With the full amount of the loss from placing both wool and sugar on the free list, we shall have a total loss upon those two articles of $99,314,573, and the total loss of revenue will amount to $130,598,907.86.

So, Mr. President, while this law is in force no one will be benefited in the least by this great loss except foreign importers, and both our producers and consumers will lose even more; and Democratic politicians are actually trying to make the people of the country believe this is a good law and in their interest. They might hope to succeed but for the actual figures that can not be disputed.

THE INCOME-TAX LAW.

The income-tax law was made necessary by the reduction of the duties on foreign goods. In other words, the people of the country are compelled to make up in direct taxation what the Government loses by a reduction of the duties. This proves the insincerity of the Democratic doctrine of a tariff, not for protection of our home industry, but for revenue only. If the tariff is for revenue, it should be made to produce the revenues needed. There was no excuse, in this view of it, for placing on the free list articles that produced revenue and could not in any way affect the price of the articles to the consumer, or for reducing duties that worked no injury to anybody at home. This was done in many instances. The taxpayers of the country do not relish the idea of making up in direct taxation for the mistake of a Democratic administration of a useless reduction of tariff rates that does no one any good except the importers of foreign goods. The provision requiring the withholding of moneys due to taxpayers, without their consent, at the source is peculiarly offensive and has caused much unfavorable comment. The whole act was made so complicated and unsatisfactory that Democratic officials have been busy ever since it was enacted trying to explain its provisions sufficiently to enable people who desired to comply with its requirements to make the necessary statement of their incomes. These complications, difficulties, and embarrassments will not be kindly tolerated by people who are, without reason, called upon to assume the burdens of direct taxation only because of the reduction of tariff duties.

It is too early to say whether the amount realized from direct taxation will make up the deficiencies resulting from the tariff reductions. It is being whispered about that the actual collections from incomes will fall far short of the estimates on which the bill was founded and that the loss of tariff revenues and the shortage under the income-tax law will result in a deficiency in the Treasury. The great falling off of revenues derived from tariff duties is a certainty. The effect upon this condition of collections under the income-tax law can not now be determined. If the people shall be compelled to bear the burden of income taxes and the revenues still fall short of the needed amount, their dissatisfaction at being thus unnecessarily burdened will be increased.

The imposition of an income tax is attempted to be justified on the ground that the man who makes more than $4,000 a year should bear a greater share in proportion of the burdens of taxation than the man who makes less. That is true if we have reached a time in this country when we are willing, and believe it to be just, to penalize a citizen for being frugal, enterprising, and prosperous. I believe we have reached a point where immense incomes, not acquired by thrift and industry, but by the mere accumulation of millions without effort, should be penalized. Such vast accumulations of wealth should be discouraged and prevented if possible. But this does not apply to the smaller incomes produced by legitimate industry and enterprise and right business or other pursuits open to an American citizen. Such efforts should be encouraged, not penalized. With such, as compared with those realizing a lesser income, the burdens of Government should be equal. Whether an income-tax law is justifiable or not under a Government like ours, where it is necessary to increase the revenues, may be a matter of doubt. But in this case it was only made necessary by a reduction of tariff revenues that was entirely unnecessary and unjustifiable. And everybody knows that an additional burden of taxation imposed on any business is carried on to the consumers or the employees of the business. So at last the latter are compelled to carry it.

THE CURRENCY BILL.

The banking and currency bill was another sore disappointment to most of those who really understood its provisions. The people generally do not understand it or how its passage was brought about. The interests, the bankers and others, who succeeded in having their way about it, have seen to it that the newspapers, generally subsidized by these interests, make it appear to be in the interest of the general public. Some legislation on this subject was demanded chiefly for the purpose of freeing the public from the domination and control of Wall Street and the national banking interest. This law, instead of having this effect, so generally desired, has placed the country more firmly in the grip of those interests, by placing in their hands and under their management and control the immense power of the regional banks with their millions of capital and deposits.

Whether this law results in any benefit to the people must therefore depend entirely upon the conduct of bankers who manage them. The Government is given no adequate or efficient control over them, and the people none at all. Private individuals are allowed to take stock in the banks only in case the existing banks do not take it all, and even then their stock is denied any voting power. They have no right to participate in the election of the directors or other officers of the banks. This power is given over completely to the banks, to the exclusion of the private holders of stock. One of the leading magazines, speaking in commendation of the bill, very truly said:

> They will be banks of banks—banks owned by banks, conducted primarily by banks, and doing business only with banks.

They are not Government banks. They are not people's banks. They are banks' banks. If that is what the people of this country want, then the law is a good one that gives them what they want. But it was not what Congress wanted. The passage of it was an abject surrender to Wall Street and the banking interests. A Democratic Senator, a member of the Banking and Currency Committee, declared on the floor of the Senate, when the bill was on its passage, that unless it was passed in that form the banks would not support it. It could not have been passed except under the coercion of a secret caucus. The issue between Government and bank control was sharply drawn. The Committee on Banking and Currency, composed of 12 members, was evenly divided on the subject, 5 Republicans and 1 Democrat reporting in favor of Government control with the right of the people to subscribe the stock, and 6 Democrats for bank control and the denial of the right of the people to subscribe for the stock. A majority of the Senate was undoubtedly opposed to bank control, but in a caucus a majority of the Democratic Senators could be induced to support it. Why? Because if they did not the banks would not come into the system, and the Democratic Party must pass some kind of a banking and currency bill to satisfy the public demand. A majority of the Democrats could bind the others in a secret caucus, and, thus bound, the bill could be and was

passed. It was in this way that they surrendered completely to the banks, and the banks have come into the scheme with the greatest pleasure.

The people are deceived into the belief that the banks will be under the control of the Government because a reserve board is provided for, to be appointed by the President. This is a fallacious belief. The law provides specifically that "every Federal reserve bank shall be conducted under the supervision and control of a board of directors." It also provides how the board shall be selected. They are divided into classes A, B, and C. "Class A shall consist of three members, who shall be chosen by and be representative of the stockholding banks. Class B shall consist of three members, who, at the time of their election, shall be actively engaged in their district in commerce, agriculture, or some other industrial pursuit." They also are selected by the banks. It seems to be supposed that to require the three class B directors to be engaged in commercial business "at the time of their election" will in some way safeguard the public interests. I do not see how. They are not forbidden to be bankers, and need not continue in commercial pursuits. They are selected by the banks and will no doubt be controlled by them. "Class C shall consist of three members, who shall be designated by the Federal Reserve Board." That is to say, the banks have two-thirds of the members of the board of directors and the Government one-third. Not much Government control in that situation. It should not be overlooked that one of the directors chosen by the reserve board is required to be a banker, or, as the bill says, "of tested banking experience." It is too evident to need comment that these provisions of the act were made in the interest of the banks and at their dictation. The provision giving the banks full control of the regional banks was forced into the act by the threats of bankers that they would not come into the scheme if they were not given control of the new banks and the Democratic Party bowed to the will of Wall Street and the interests, and gave them control.

The Federal Reserve Board is composed of seven members, two of whom are the Treasurer and Comptroller of the Currency. The other five members, two of whom must be, and all may be, bankers, are required to give their whole time to the work. The powers of the reserve board are specifically stated in the law. I undertake to say that they are no greater or more effective than the power and control of the Secretary of the Treasury and Comptroller of the Currency over national banks under the national banking laws. The board has a general supervision of the reserve banks and may suspend and reorganize any one of the banks for cause, but this is no more than the comptroller can do in the case of national banks. The fact still remains that the business of the banks, their daily transactions, will be, must be, governed and controlled by the national banks who hold their stock and elect two-thirds of their directors. It is bank ownership and control with Government supervision and regulation just as in case of national banks.

The banks and bankers who own and control the reserve banks may make them instruments for the public good. Whether they will or not remains to be seen. Experience teaches us that they will whenever it is to their own interests as well as the interests of the public, but not otherwise. The powerful banking interests have been the friends, financial agents, and supporters of the great trusts. They will continue to be so under the reserve-banking law with the added power the new banks give them. The law affords no protection against this use of their power. It is suggested that the establishment of the regional banks will, or I had better say may, serve to break up the enormous reserves held in the great banks in New York and Chicago and distribute them to different parts of the country. Let us hope that at least this expectation will be realized to some extent. But at best it can only be to a very limited extent when the enormous financial and business transactions of the country are considered. The overpowering influence of the great financial institutions of New York will undoubtedly continue to control and dominate the situation in the future as they have in the past unless prevented by other laws, notwithstanding this new banking law. This command of the situation might be overcome, at least in part, by laws severing the connection of banking institutions and the trusts and utility corporations. But this bill not only does not do anything of this kind, but leaves the banks at full liberty to promote and support these offending aggregations of wealth and strengthens their power in this respect by turning over to them the reserve banks.

Mr. President, there is another phase of this question that has received but little attention, and that is the enormous cost to the public of establishing and maintaining the reserve banks. According to my observation since I have been a Member of the Senate the matter of cost, when the people must foot the bills, does not, as a rule, receive very serious consideration. The bill provides for at least 8 reserve banks, with the privilege on the part of the reserve board to increase the number to 12. No doubt the number will be increased to the limit. It is ever so when additional Government agencies are provided for. Let us, for the purpose in hand, take the minimum and not the maximum number. But there is something more coming. The bill provides:

Each Federal reserve bank shall establish branch banks within the Federal reserve district in which it is located and may do so in the district of any Federal reserve bank which may have been suspended. Such branches shall be operated by a board of directors under rules and regulations approved by the Federal Reserve Board. Directors of branch banks shall possess the same qualifications as directors of the Federal reserve banks. Four of said directors shall be selected by the reserve bank and three by the Federal Reserve Board, and they shall hold office during the pleasure, respectively, of the parent bank and the Federal Reserve Board. The reserve bank shall designate one of the directors as manager.

Under this section the reserve banks are compelled to establish branch banks within their respective districts, and the number that may be set up is not limited. Each of these must have seven directors, and four, or a majority of them, are selected by the banks, thus giving them the control of the branches. Now, suppose we consider, just a little, the cost of it all. Whatever the cost is, it must be borne by the people, who are forbidden to exercise any control of the banks or their branches. It is a new burden placed upon the business of the country. To begin with, we have the salaries of the members of the reserve board. Five of the members receive $12,000 a year and traveling expenses. There is added to the salary of the Comptroller of the Currency, as extra compensation for his work on the board, $7,000. So we have an expense, for the salaries of the members of the reserve board alone, of $67,000 a year. This does not include the traveling expenses, rents, office force, fees for attorneys that the board is authorized to employ, and a multitude of other expenses. Congress knows only too well how they grow and multiply. It is fair to say that the expense of this board alone will amount to $100,000 a year. This is a very moderate estimate. Then we have at least eight banks and the same number of branch banks. The former may be increased by four and the latter without limit. The banks must have a board of nine and the branches seven directors, with a president for each, with cashiers, clerks, bookkeepers, and the many other officers and employees necessary to man a bank, all of whom must be paid. Then banking houses must be provided and furnished, and all other expenses of maintaining and carrying on the numerous banks and branches must be met. To add to the unnecessary and already enormous expenses, an advisory council of 1 from each reserve district, 8 or 12, as the case may be—probably 12—is provided for, "who shall receive such compensation and allowances as may be fixed by his board of directors, subject to the approval of the Federal Reserve Board."

Mr. SHAFROTH. Mr. President, will the Senator yield right there for an observation? Does not the Senator realize that all the expense of the reserve banks will have to be paid out of the profits of the reserve banks; that those profits will accrue from the reserves of the national banks and the capital which they put into the reserve banks; and that, consequently, so far as that feature of the question is concerned, it is no expense whatever to the Government?

Mr. WORKS. I was just coming to that.

How much this may be we do not know, but bankers come high, and we may be sure the amount paid for advice from gentlemen distinguished for their ability to give it will not be small. It will be seen readily that all this runs up into the millions every year. It will be said that the expenses will be paid out of the earnings of the banks. But, sir, from whom are these earnings derived, and who receives the profits? The earnings come from and are a burden on the business of the country, and are ultimately charged up to and paid by the ultimate consumers and contribute to the high cost of living. Besides the expenses, they are taxed with the profits, which go to the banks, up to 6 per cent. If anything more is made, then and then only does the Government derive any benefit from it. If the banks make more than 6 per cent profit, then the burden is excessive and should not be allowed. The incidental benefit to the Government of the excessive profits can not meet the heavy expenses borne by the country, and if it does it amounts to a direct tax on the people and is unjust and inexcusable. The matter of profits is thus provided for in the act:

After all necessary expenses of a Federal reserve bank have been paid or provided for the stockholders shall be entitled to receive an annual dividend of 6 per cent on the paid-in capital stock, which dividend shall be cumulative. After the aforesaid dividend claims

have been fully met, all of the net earnings shall be paid to the United States as a franchise tax, except that one-half of such net earnings shall be paid into a surplus fund until it shall amount to 40 per cent of the paid-in capital stock of such bank.

Mr. SHAFROTH. Mr. President, does not the Senator recognize that whatever charge there may be it will not be upon the individual borrower? No individual can go to a Federal reserve bank and borrow a dollar. The new system has been created for the purpose of relieving runs upon the banks; it is the banks that will have to pay; and, consequently, the burden will be no greater than the demand which will be made by the banks.

Mr. WORKS. Mr. President, the Senator from Colorado is altogether mistaken. You must trace these expenses back to the people who support the banks by the payment of interest and otherwise. The loans that are secured from the national banks and other banks are carried on the books of the reserve banks, and therefore the people support them.

Mr. SHAFROTH. Yes; but these banks——

Mr. WORKS. Well, Mr. President, I shall have to decline to be interrupted further. I am perfectly willing to answer any questions, but I do not want to indulge in a discussion of the matter at this point.

Mr. SHAFROTH. Very well.

Mr. WORKS. Mr. President, it is claimed for the act that it will provide a sufficient reserve fund from which to draw in case of need and thereby prevent money panics. Under the present law every national bank is required to maintain in its vaults a reserve that has been regarded as sufficient to meet such emergencies. It has not been the fault of the law that depositors and others have not been protected in this way. It has been largely, if not entirely, the fault of the banks and bankers.

It has been the policy of the banks whenever a money stringency occurred, or was even threatened, to add to it by withholding further loans, drawing in those already made, and hoarding their money by the millions when business and personal demands of the people, whose money they held in their vaults and who were entitled to receive it, needed to have it. Their methods in this respect were most arbitrary and unjust. It was cowardly. They were afraid, and their fears added to the scare and precipitated the panic that they should, and generally could, have avoided. Now, it is proposed to take the money of these same banks, not other or additional money, and put it into other banks and expect thereby to change the timid natures of the bankers and avoid panics. And to make that result perfectly sure we put the new banks and reserves in the hands of these same bankers to operate and control. They will doubtless control these banks just about as they have the others, making a sure profit for themselves and rendering the banks useless as public agencies when they are most needed. The money paid for the stock of the new banks, it must be understood, is paid out of the money of the old banks. It is simply a transfer of the money from one set of banks to the other. It is quite true that if a single bank should get into financial difficulties it could unload its securities onto the reserve banks under this law, thus securing the cash it needs without drawing in its loans. But this aid is now almost uniformly extended to such banks by other banks in the vicinity for their own protection. This is a condition easily met without the aid of this law. When the panic is general and banks all over the country are threatened the reserve banks will be just as helpless as the others. About the only good this law will do in this particular will be to stiffen up the backbones of the bankers, give them courage, and thereby avoid the panics that their own fears bring on. But when the test comes and the law and the reserve banks fail of their object this effect will be gone.

The provision for issuing reserve notes, for which securities must be furnished by the reserve banks, is an aid to be extended by the Government, and will, in case of necessity, be helpful. But this elaborate and expensive banking system was wholly unnecessary for that purpose. The National Treasury has for years extended aid by way of advancing money in case of stringency and threatened panic. All that was necessary was amendments to the then law authorizing the Treasury Department to extend such aid. In fact, this whole matter of giving needed relief in case of panic should have been vested in the Government through its lawfully constituted departments. If a bank should have been necessary as a means to this end, it could have been provided for and made a branch of the Treasury Department. Thus we could have accomplished everything that can be accomplished under this law with one-hundredth part of the expense and with far greater safety. But that would not have furnished salaries to hundreds of bankers and others or 6 per cent interest to the banks, that the people must pay in the end, either directly or indirectly.

Mr. President, this law is not in the interest of the public, but of the bankers. They get most all of the salaries and the profits. The people get nothing but the hope that it may prevent a panic maybe once in 10 years. For this they pay millions of dollars every year. If the President and Congress had possessed the courage to do what the majority wanted to do and knew ought to be done, namely, establish one strong central bank, the stock to be subscribed by the people instead of the banks, that could meet impartially any financial trouble that might arise anywhere all over the country, the administration would have done at least one thing in the public interest. But our Democratic friends lacked the courage of their convictions. They surrendered to the banks, and the people must suffer the consequences.

RAID ON CIVIL SERVICE.

One of the worst features of the two important laws I have been considering—the tariff, including the income-tax law, and the banking and currency act—is their deliberate attempt to limit and eventually overthrow the civil-service laws, rules, and regulations. In the income-tax law it is provided in terms that appointments of the force of agents, deputy collectors, inspectors, and other employees shall be made by the Commissioner of Internal Revenue with the approval of the Secretary of the Treasury, thus throwing this army of employees open to the spoils system. The Republican Members of Congress earnestly protested against this breaking down of the classified service. Several amendments were offered by Republican Senators to bring these appointments under the classified service, but they were all voted down by Democratic votes. There was no reason for taking these employees out of the civil service except to give the jobs to Democrats for political purposes. There are something like 300 of these employees thus placed under the spoils system, instead of subjecting them to competitive examinations and appointing them on their merits by the Civil Service Commission. The same controversy arose over the banking and currency bill. The Republicans in the Senate again contended that the large number of subordinate employees made necessary by the act should be selected from the classified list under the civil-service laws. This was voted down. But our Democratic friends were beginning to be a little timid of public sentiment. The income-tax law in this particular had been strongly and very generally condemned as a raid on the civil service. So they compromised. They wanted the jobs. They wanted them awfully bad. There were so many of their constituents clamoring for jobs that they needed some places to put them. They lacked the courage to take the employees to be appointed out of the civil service, so they provided:

All such attorneys, experts, assistants, clerks, and other employes shall be appointed without regard to the provisions of the act of January 16, 1883 (vol. 22, U. S. Stat. L., p. 403), and amendments thereto, or any rule or regulation made in pursuance thereof.

The act referred to in this clause is the act establishing the civil service. Therefore the civil-service law, rules, and regulations are expressly set aside by the act and the employees, that will run up into the hundreds, opened to the spoils system. But in order to save their faces and avoid public censure the Democrats, pressed by the protests of Republican Members, inserted the clause:

*Provided*, That nothing herein shall prevent the President from placing said employees in the classified service.

This was an unworthy shifting of the responsibility to the President. After declaring, in express terms, that the appointments should not be subject to the civil-service law they said that notwithstanding Congress had provided it should not be done the President might place them in the classified service. The country, and especially the great mass of the people who detest the spoils system and believe in the civil service, will await with interest the action or nonaction of the President under this proviso.

The urgent deficiency bill furnishes another case of the same kind. When the bill was on its passage the following rider was offered by a Democratic Member of the House and passed both Houses and became a part of the law:

All Executive orders heretofore made placing the positions of deputy marshals and deputy internal-revenue collectors in the classified service, and all regulations made thereunder, are hereby revoked, and hereafter appointments to said positions shall be made in the same manner as obtained prior to the making of such Executive orders.

The author of the amendment made the following frank statement of the reason for offering it:

I know that there is no office, in my judgment, under Democratic administration that could not be better filled by a Democrat than by a Republican. If you can call that the spoils system, you are welcome to so denominate it.

The amendment was subsequently enlarged so as to allow collectors and marshals to discharge all subordinate employees in addition to deputies, and to appoint their successors without regard to the civil-service laws, rules, or regulations.

The National Civil Service Reform League telegraphed the President, protesting against this further invasion of the civil service, as follows:

On behalf of the National Civil Service Reform League I earnestly urge that you veto urgent deficiency appropriation bill, because of provision exempting from civil-service law subordinates of collectors of internal revenue and marshals. Provision affects not only deputies, but all subordinates of collectors and marshals, and is a vicious attack on merit system through rider legislation.

In reply the President said:

I am convinced, after a careful examination of the facts, that the offices of deputy collector and deputy marshal were never intended to be included under the ordinary provisions of the civil-service law.

In commenting on this case the North American Review said:

Why did President Wilson permit this backward step to be taken? That is the question. By a nod of his head he could have beaten it in the House of Representatives, where a change of only three votes would have prevented its passage. But no intimation was forthcoming, and the obnoxious "rider" was made a law of the land by the signature at the bottom of "Woodrow Wilson, President of the United States," to which should have been added, for the making of a complete record, "Former vice president of the National Civil Service Reform League."

But, Mr. President, the evident intent of the Democratic Party to break down and destroy the civil service has been manifested in other ways than by direct legislative enactment. There are thousands of assistant postmasters in the country now under the classified service. The Democratic House deliberately attempted to remove all these from that service and make the offices the prey of the hungry office seekers. And I have no doubt that this would have been done but for the fact that the wave of indignation and protest all over the country was such that no political party could ignore it, and the President and Postmaster General were forced by public sentiment to call off this further raid on the civil service. And, as I shall show further along, the President's word is law to this Democratic Congress.

It is singular that this should have occurred under the Presidency of Woodrow Wilson, former vice president of the National Civil Service Reform League, and now claiming to be the head and leader of the Democratic Party. The platform of that party declares:

The law pertaining to the civil service should be honestly and rightly enforced, to the end that merit and ability shall be the standard of appointment and promotion, rather than service rendered to a political party.

That was worthy of a great reform party, and it sounds well. But it was no better than this declaration in a letter from the President to the National Civil Service Reform League as late as October 22, 1913:

My warm advocacy and support both of the principle and of the bona fide practice of civil-service reform is known to the whole country, and there is no danger that the spoils system will creep in with my approval or connivance.

Again the President said, in speaking of the civil-service act:

The President may accept its directions or not, as he pleases. The only force that can hold him to the observance of its principles is the force of public opinion.

Public opinion was not strong enough to "hold him to the observance of its principles" when the question was squarely presented to him by the income-tax act, the banking and currency act, and the urgent deficiency act. They were all most flagrant violations of the principles of the civil service. Protests were urged, amongst others, by the National Civil Service League against this breach of the law. He approved them, notwithstanding his declaration that "there is no danger that the spoils system will creep in with my approval or connivance." I do not know that he connived at this invasion of the civil-service law, in advance, but he did approve it by signing all of the bills with these objectionable provisions in them—provisions that would have been omitted, as in case of assistant postmasters, if he had said the word.

There is another thing that shows with equal clearness that the spoils system has crept in with the approval and by the act of the President himself. There has been much criticism and unfavorable comment in respect of the appointment of Democrats to diplomatic and consular posts. They constitute the most flagrant abuses of the merit system of appointment. To the higher places most of the favored ones were probably appointed because of their large contributions to the Democratic campaign fund or their political activity, others on the ground of personal friendship. I think it can fairly be said that none of them were appointed on merit alone. That is not to say that they are not good men; but they were in most, if not all, cases inexperienced, and for that reason would have been unfit under any fair rule of appointment on merit.

The able editor of the North American Review, himself a Democrat, has this to say on this subject, under the heading "Political debauchery in Latin America":

We come now to the branch of the Diplomatic Service whose reformation upon a higher plane, initiated by Secretary Hay and scrupulously safeguarded by Secretary ROOT and Secretary KNOX, with the full approval of Presidents McKinley, Roosevelt, and Taft, reflects the highest credit upon the Republican Party—and, alas, the scene changes. We refer, of course, to the Latin-American missions, obviously the most delicate and difficult of all in the present state of our relationship to the smaller Republics of the Western Hemisphere. It was to the changes in these posts that President Eliot took exception in his report to the Civil Service Reform League.

He then proceeds to compare the men appointed with those displaced by them, showing the superior qualifications of the old officers as compared with the new, and concludes:

The average experience of the former ministers to these South and Central American Republics was 15¼ years, and their average age at the time of their expulsion was 47. All spoke the language of the countries to which they were accredited. The average age of the new ministers is 54½, five being past 60; no one of them, we believe, understands Spanish; and none, of course, has had diplomatic experience. In other words, 12 trained and capable representatives, several of whom entered the service under competitive examinations and all of whom had long since forsaken partisanship, are superseded by mere party hacks whose ages clearly disqualify them for continuance in office for sufficient time to equip themselves for proper performance of their duties. A clearer case of partisan political debauchery can not be imagined.

This is a fair statement of the case. It is none too strong. It presents a sad case of the spoils system in its worst form. The victors are given the spoils. No more aggravated case of the iniquitous spoils system of rewarding politicians for political work done could be conceived. If Andrew Jackson has been permitted to look down on the performance he must have smiled his approval. Unless he has reformed in the beyond, he must have been delighted at the spectacle.

PATRONAGE.

Akin to the question of the civil service is that of patronage. The law providing for the examination of applicants for positions under the Government and appointments on their merits was intended as far as possible to put an end to the disgraceful and demoralizing spoils system under which places were given out by successful politicians as rewards for party or personal political services. The wisdom of such a law was never more fully exemplified than by the scramble for office and place under the present administration and the manner in which the places have been filled. There never was a more partisan administration of the Government than the present one. I have already pointed out its unfortunate lowering of the Diplomatic and Consular Service. It has been even more deadly in its effects upon the service generally. I can not, I need not, go into details of the demands for places under the Government and the methods resorted to to obtain them. Every Member of this body has been witness to it, especially the Democratic Members who have suffered most from it, and who, I am sure, deplore it as much as I do, although because of the system of appointments that prevails they have been forced to become parties to it.

Mr. President, I have offered a remedy for much of the evil flowing from this disgraceful and degrading condition. I have offered a bill providing for a commission to sift out the applicants for appointments and recommend to the President the best man for appointment in each case, and forbidding Members of Congress to recommend or aid in securing the appointment of anyone to office, and also forbidding anyone to apply to them for aid or recommendation. The bill is so manifestly in the interest of the President, of Members of Congress, and of the public service that I had hoped the Democratic majority would take it up and pass it. But, like hundreds of other meritorious bills, it slumbers in committee without action upon it one way or the other. The necessity of some such law was borne in upon me just lately by one typical case. Under the income-tax law, which, as I have pointed out, provides for appointments in internal-revenue offices, under the spoils system perpetuated in the income-tax law, there were a number to be appointed under one of the collectors of internal revenue in California. The appointments could not be made by the collector, who was responsible for the conduct of the office. They must be made by the commissioner at Washington, who, of course, knew nothing of the merits or competency of the applicants for the places. The collector happened to be an old-time friend of mine, and he wrote me that he had recommended certain people for appointment to places under him and asked me to try to have the commissioner appoint them, as he had selected them for their competency and efficiency. I wrote to the commissioner, saying, in substance, that I knew the collector well and that he could be trusted to select the right kind of people to serve under him, and that he would be responsible for the conduct of the

office, that he must handle millions of dollars, and had given a large bond, and therefore his recommendations might well be followed. This polite communication did not meet with the courtesy of a reply. Much to my astonishment, I learned a few days later that the Democratic Members of the House from California had claimed these appointments as part of their patronage and had named the people they wanted the commissioner to appoint, all different from those recommended by the collector. I took up the matter with one of the Members of Congress and protested earnestly against this manner of imposing employees on a public official as rewards for political work. He finally said he would give up one of his places to the collector, thus allowing him one employee of his own selection. There were 15 or 16 to be appointed. I again wrote the commissioner, protesting against this mode of farming out places in the public service. This letter was not quite as polite as the first one, because I was indignant, but it met with a like fate. It was not answered. What has been done about the appointments I have not been informed.

I hope, Mr. President, that this is an extreme case and that there is none other so bad. But this one shows quite conclusively the evil effects of placing these appointments, hundreds of them, under the dishonored spoils system instead of the civil service. It is a serious reflection on this administration that opportunity for such methods should have been authorized by law.

THE SECRET CAUCUS.

Mr. President, I come now to a brief consideration of the secret caucus as a means of promoting or enforcing legislation. It is a fit companion to the spoils system of appointments. It does not pass laws on their merits. It forces them through almost always against the judgment and conscience of a majority of the legislative body, because if the majority favors any given measure no caucus rule is necessary. It is not new, but it is none the less a great evil. In this administration it has assumed its worst form. It has been resorted to perhaps more frequently, under more objectionable circumstances and in less excusable cases, than ever before. There is some excuse for caucus rule in case of purely political questions or in the election of officers of a legislative body, but there is none whatever when legislation involving vital principles or any other nonpolitical question is concerned. In such cases it is vicious and inexcusable. This has been the most prominent and most unfortunate feature of legislation under this administration. Neither the tariff bill nor the banking and currency bill would have been passed in the form in which they were enacted but for the coercive use and effect of the secret Democratic caucus. We would not have had on the free list many of the articles placed there by this act, and the reductions in other cases would have been kept within reasonable limits and not made destructive of our home industries as they are now. Neither would Congress have bowed the knee and surrendered to the moneyed interests of the country the ownership and control of the reserve banks with the enormous power that goes with them.

There is another feature of the secret caucus, as used in this administration, that intensifies and multiplies its evil effects. They have not been the free and voluntary actions of even a majority of the Democrats of either House of Congress. The power of the executive department has forced caucus action with the very purpose of coercing Members of Congress to do the will of the President in the passage of laws. So we have two illegitimate forces at work to circumvent the majority in Congress and compel the enactment of important legislation against their will. It is not a pleasant thing to think about. Such methods have no legitimate place in the making of laws in a free Republic. The independence of every American citizen should rise up against it.

EXECUTIVE DOMINATION OF CONGRESS.

Mr. President, I come now to comment on what I consider one of the most important of the questions that are confronting Congress to-day, if not the most important of them all, and that is the evident purpose of the Executive to dominate and control the legislative branch of the Government. I have had occasion to speak of it before and since this administration came into power. It was bad enough under previous administrations, but in this one it has increased a hundredfold over anything that has been known in the past. This dominating influence has become so insistent and continuous, and has been submitted to so slavishly by the majority of Congress, that the independence and usefulness of the legislative branch of the Government are both threatened. It has been so asserted and exercised and obediently submitted to that we have come perilously near to a dictatorship. The President has not contented himself by advising what measures should be considered by Congress and vetoing them if they do not meet his approval, as the Constitution authorizes him to do. He has demanded that certain legislation shall be enacted, has insisted upon Congress remaining in session until the laws he insists upon are enacted, and the secret caucus is made the instrument with which to enforce his will. As a consequence we have laws on the statute books that are in effect, and in reality, Executive orders and not legislative acts. They are legislation of and enacted by the executive department and not by Congress. It is a condition that should attract the serious attention of the whole country. We have three distinct departments of government. They were intended by the framers of the Constitution to be independent of each other. It has, up to a very late period, been regarded as absolutely necessary to the liberty of the people and the public welfare that this independence should be maintained. A few days ago we listened to the reading in this Chamber of Washington's Farewell Address. In the course of that address he says:

> It is important, likewise, that the habits of thinking in a free country should inspire caution in those intrusted with its administration, to confine themselves within their respective constitutional spheres, avoiding in the exercise of the powers of one department to encroach upon another. The spirit of encroachment tends to consolidate the powers of all the departments in one, and thus create, whatever the form of government, a real despotism. A just estimate of that love of power and proneness to abuse it which predominate in the human heart is sufficient to satisfy us of the truth of this position. The necessity of reciprocal checks in the exercise of political power by dividing and distributing it into different depositories and constituting each the guardian of the public weal against the invasions of the others has been evinced by experiments ancient and modern, some of them in our country and under our own eyes. To preserve them must be as necessary as to institute them. If in the opinion of the people, the distribution or modification of the constitutional powers be in any particular wrong, let it be corrected by an amendment in the way which the Constitution designates; but let there be no change by usurpation, for though this, in one instance, may be the instrument of good, it is the customary weapon by which free governments are destroyed. The precedent must always greatly overbalance in permanent evil any partial or transient benefit which the use can at any time yield.

This solemn declaration of so evident a truth that seems to have been forgotten by some should be taken to heart now as never before in the history of our country.

The Supreme Court of the United States is even more emphatic in declaring the separation of the departments of Government and their independence. In the case of Kilbourn v. Thompson (103 U. S., 168, 190) this is said on the subject:

> It is believed to be one of the chief merits of the American system of written constitutional law that all the powers intrusted to government, whether State or National, are divided into the three grand departments, the executive, the legislative, and the judicial. That the functions appropriate to each of these branches of government shall be vested in a separate body of public servants, and that the perfection of the system requires that the lines which separate and divide these departments shall be broadly and clearly defined. It is also essential to the successful working of this system that the persons intrusted with power in any one of these branches shall not be permitted to encroach upon the powers confided to the others, but that each shall by the law of its creation be limited to the exercise of the powers appropriate to its own department and no other. To these general propositions there are in the Constitution of the United States some important exceptions. One of these is that the President is so far made a part of the legislative power that his assent is required to the enactment of all statutes and resolutions of Congress.
>
> This, however, is so only to a limited extent, for a bill may become a law, notwithstanding the refusal of the President to approve it, by a vote of two-thirds of each House of Congress.
>
> So also, the Senate is made a partaker in the functions of appointing officers and making treaties, which are supposed to be properly executive, by requiring its consent to the appointment of such officers and the ratification of treaties. The Senate also exercises the judicial power of trying impeachments and the House of preferring articles of impeachment.
>
> In the main, however, that instrument, the model on which are constructed the fundamental laws of the States, has blocked out with singular precision and in bold lines in its three primary articles the allotment of power to the executive, the legislative, and the judicial departments of the Government. It also remains true, as a general rule, that the powers confided by the Constitution to one of these departments can not be exercised by another.
>
> It may be said that these are truisms which need no repetition here to give them force. But while the experience of almost a century has in general shown a wise and commendable forbearance in each of these branches from encroachments upon the others, it is not to be denied that such attempts have been made, and it is believed not always without success. The increase in the number of States, in their population and wealth and in the amount of power, if not in its nature to be exercised by the Federal Government, presents powerful and growing temptations to those to whom that exercise is intrusted to overstep the just boundaries of their own department, and enter upon the domain of one of the others, or to assume powers not intrusted to either of them.

But more conclusive still to the Democratic Party and its leader should be these declarations contained in its national platform:

> We believe in the preservation and maintenance in their full strength and integrity of the three coordinate branches of the Federal Government—the executive, the legislative, and the judicial—each keeping within its own bounds and not encroaching upon the just powers of either of the others.
>
> * * * * * * *
>
> Our platform is one of principles, which we believe to be essential to our national welfare. Our pledges are made to be kept when in office as well as relied upon during the campaign, and we invite the

cooperation of all citizens, regardless of party, who believe in maintaining unimpaired the institutions and traditions of our country.

It would seem that nothing more need be said on the subject. But, sir, there is a feeling, not without foundation, that there should be a closer relation between the executive and legislative branches of the Government in the making of the laws. To this end it has from time to time been suggested that members of the President's Cabinet should be authorized by law to sit in Congress, to take part in the discussion of public questions, and be subject to inquiry on any subject that may arise. This would enable the executive department to present the views of that department to Congress, in an orderly way, in dealing with public questions, and at the same time put it in the power of Congress to test the knowledge of the representatives of the Executive and the wisdom or accuracy of their views. I am not going to discuss that question. I am not prepared to say that it might not be a good thing if authorized by law. But such necessity for participation in the framing of the laws by the executive department, if it exists, can be no justification or excuse for interference with legislation by that department without authority of law. Neither can good intentions affect the question. If such efforts to control legislation are wrong, unauthorized by law, and dangerous, as I maintain they are, the sentiment that prompts them can not affect the question further than to mitigate or aggravate the offense in the individual case.

INDIFFERENCE AND INEFFICIENCY.

Mr. President, one of the most striking features of the work of this body at this time is the apparent apathy and lack of interest in the work before it. This is not confined to the Democratic side of the Chamber. It extends to and affects the whole Senate in the performance of its duties. But it is more pronounced and more general on the other side of the Chamber. Seats in the Chamber are vacant for days, sometimes for weeks, at a time. Senators will not listen to discussions of questions of the greatest importance and most vital to the interests of the country. The Senate seems to have lost snap and vigor and industry. Committees are poorly attended. Quorums are obtained in case of the most important committees with the greatest difficulty, and a prompt meeting of a committee at the time it is called to meet is practically unknown. Some committees having important business before them do not meet at all. The Committee on the District of Columbia, one of the large and very important committees of the Senate, having to do with the vast and important interests of the District, is one of these. There have been over a hundred bills referred to that committee this Congress, some of them very important ones, and only four of them have been reported out. The committee has had but one meeting during this session of Congress. These conditions did not exist under the last Republican administration. Committees met with regularity, and usually in the more important committees a quorum was present. One of the peculiar phases of the present situation is that while the Democrats are in the majority and have larger representation on the committees there are almost invariably more Republicans than Democrats present at committee meetings. It is evident that our friends on the other side of the Chamber do not like committee work.

Now, Mr. President, what is the cause of this condition of stagnation, lack of interest, and consequent inefficiency in the work of the Senate? It was claimed here on the floor only a short time ago, I believe by the Senator from New York [Mr. ROOT], that it was because our system of procedure by committees is a failure. But, sir, I do not believe that is the cause of the inefficiency that exists. It is the result rather than the cause. Work through committees fails only because that work is not well done. No better means of facilitating the work of Congress has been suggested and probably none will be found.

No, Mr. President, that is not the cause nor reason for the extreme conditions that exist at the present time. In my judgment, the reasons are not far to seek, and they are ample. The Senate is indifferent to its work. It has lost interest in it and does not show the vigor and energy of former times, mainly because it is no longer an independent body. Its bills are prepared for it by another department of the Government and are forced through by Executive order and, if need be, by the secret caucus. It is a blight upon the Senate and its work. Men of spirit and independence of character will not work energetically or with enthusiasm if compelled to work under a master. Slavish obedience to the commands of the head of the executive department will sooner or later destroy the independence and usefulness of Congress. It has come perilously near it already. This unwarranted interference of the executive department with the functions of Congress has extended to the committees of both Houses. Committees receive bills prepared by that department. They visit the White House to confer with the President about measures of legislation and are directed by him. Democratic Members hold secret caucuses to the exclusion of Republican Members and formulate and agree upon bills to be passed. Republican members of committees under such circumstances have no voice in the formulation of legislation or the reporting out of bills, and might just as well absent themselves from committee when bills are being considered in that way.

Mr. President, the passing of bills by Executive order and caucus rule affects this side of the Chamber as well as the other, but not to the same extent. The knowledge that the passage of a bill has been agreed upon with the President and decreed by a secret caucus destroys any interest that may be taken in future proceedings upon it on both sides of the Chamber. Any discussion that may be had upon it is wholly perfunctory. On the Republican side anything that is said is known to be useless, except as a protest, and on the Democratic side no discussion at all is necessary. It has been had in the secret caucus. What can be expected of Congress under such circumstances? Why should interest be taken in its proceedings, even by its own Members? If this manner of dealing with legislation continues for long, the country will lose all respect for Congress, and it will richly deserve public condemnation.

WOMAN SUFFRAGE.

Mr. President, one of the most important questions before Congress and the country at this time is that of woman suffrage. It is a live political issue. It is evident to everybody who understands the situation that this administration is opposed to granting suffrage to the women. But it lacks the courage to come out openly and oppose it. Efforts have been made to secure from the President some expression of his views on this important subject. A short time ago a delegation of women called upon the President to secure, if possible, his aid in their effort to so amend the Constitution as to give to their sex the right to vote. He answered their appeal by saying:

> I want you, ladies, if possible, if I can make it clear to you, to realize just what my present position is. Whenever I walk abroad I realize that I am not a free man; that I am under arrest. I am so carefully and admirably guarded that I have not even the privilege of walking the streets. That is, as it were, typical of my present transference from being an individual with his mind on any and every subject to being an official of a great Government, and incidentally, or so it falls out under our system of government, the spokesman of a party.
>
> I set myself this very strict rule when I was governor of New Jersey and have followed it as President—that I am not at liberty to urge upon Congress in messages policies which have not had the organic consideration of those for whom I am spokesman.
>
> In other words, I have not yet presented any legislature my private views on the subject, and I never shall, because I conceive that to be part of the whole process of government, that I shall be spokesman for somebody, not myself.
>
> I am an individual; when I am spokesman of an organic body I am a representative. For that reason, you see, I am by my own principles shut out, in the language of the street, from "starting anything." I have to confine myself to those things which have been embodied as promises to the people at an election. That is the strict rule I set for myself.
>
> * * * * * * *
>
> When my private opinion is asked by those who are cooperating with me I am glad to give it, but I am not at liberty until I speak for somebody besides myself to urge legislation upon Congress.

This was a most remarkable statement to make. He purposely evaded any expression of views or opinion on the subject. But this was not nearly so remarkable as his reason for not doing so. Woodrow Wilson is an American citizen, and as such has a perfect right to express his views on any public question. There is no reason why he should not. He could with perfect propriety have done so in this instance. He could with equal propriety have said that they were his own private views, and should not be regarded as an official declaration. Unfortunately the President regards himself not only as an American citizen and President of the United States but as the leader and spokesman of the Democratic Party. The two latter are entirely inconsistent with each other. No man can be such a President as this Nation is entitled to have and be at the same time the spokesman or leader of any political party. The sooner the country realizes that fact and insists that when a citizen is elevated to the exalted position of Chief Magistrate he shall from that time on be the President of the whole people and not a mere politician, the leader of and trying to do the will of a political party. One of the leading journals of the country, commenting on this subject, very justly says:

> It is one of the evils of personal, public, and vigorous participation of the President in the deliberations of Congress as party leader that he at once falls from the lofty position of President of the Nation to the place of a mere party leader, and thereby invites, is sure to receive, and in this case richly deserves the personal attacks to which it is not well for any of us that a President of the United States should be exposed. It tends to Mexicanization.

The President might very well have said that he did not desire to express any opinion on the subject for himself or anyone else, or that he regarded the question of suffrage as one to be settled by the States, but it was exceedingly unfortunate that he should have sheltered himself behind the fact that the Democratic Party had not declared itself on the subject, and for that reason decline to speak on that account, for that was no reason at all. The President himself has since shown that his reason for not speaking was without force, as I shall show a little further along, by taking a position on proposed legislation in direct opposition to the platform declaration of the party of which he claims to be the leader.

PANAMA CANAL TOLLS.

Mr. President, this administration has declared itself as against free tolls through the Panama Canal for American coastwise ships. The President has again taken the field and is demanding that an act be passed repealing the clause contained in the former act granting our ships free passage through the canal. This is in direct opposition to the plank of the platform of the Democratic Party on the subject, which declares:

We favor the exemption from toll of American ships engaged in coastwise trade passing through the canal.

This declaration was made when the present law exempting our ships from the payment of tolls was under consideration by Congress and with full and accurate knowledge of all objections that had been made to it, including the claim that it was in violation of the treaty with Great Britain. That provision in the canal bill was bitterly opposed and the question was extensively discussed and the free-tolls clause carried by a large majority. It was after the issue on the question was fully made up and with the known attitude of Democrats on the question that the Democratic Party declared itself on the subject. The fight against free tolls was made, principally, by the transcontinental railway companies and the Pacific Mail Steamship Co., owned by the Southern Pacific Railroad Co., and in their interest. There is no doubt that the same interests are at work now to repeal the act. They maintained a powerful lobby here in Washington when the bill was under consideration before. They will, no doubt, be represented here again when the bill to repeal that clause comes on for hearing. The people who believe in the granting of free tolls will want some good reason for this change of front on the part of the Democratic Party under the leadership of the President. If it is done to satisfy the demands of Great Britain, they will not be satisfied with this submission of legislation about our domestic affairs to the dictation of a foreign country. However, if the President is satisfied, for good and valid reasons, that this free-toll clause should be repealed, his advice that it should be done, in spite of the declaration of his party to the contrary, does him credit. In that case he is for once acting as President of the United States and not as the leader of his party. But if he shall attempt to force his views on Congress in this case, as he has in others, his course can not be justified. He may properly advise, but he has no right or authority to command or coerce action by Congress or any Member of it.

EXTRAVAGANCE IN APPROPRIATIONS.

The tendency toward paternalism and extravagance in the appropriation of public moneys is a marked characteristic feature of this administration. The example has been set by previous administrations, but this one has been going beyond them all. It is a tendency that should excite concern. As the Democratic Party has materially reduced the revenues of the Government by an unjust tariff law and imposed a direct tax on the people to make up the deficiency caused by low tariff duties, it might reasonably be expected to reduce the appropriations and expenditures. But this has not happened, and there is no evidence of an intention to reform conditions in this particular. The expenditures of the Government are enormous. The appropriations for carrying on the departments of the Government are necessary and should be ample for that purpose. These are being very considerably increased year by year. But it is the special appropriations that should be carefully looked after and over, or unnecessary expenditures guarded against. I can not take up the time of the Senate in any effort to determine whether the regular appropriations are unduly high or not. It would take up too much time even if I felt competent to deal with this broad subject, which I do not. But I am going to attract the attention of the Senate to some of what I call paternalistic and other special appropriations that deserve consideration. We establish the Agricultural Department. Of that I am not going to complain. The department has done much good. Some of the expenditures of it, notably for the distribution of seeds, are next to useless and wholly indefensible. This costs the Government over $300,000 a year. A reform administration would have done itself credit by abolishing this system. The Agricultural Department costs about $20,000,000 a year. In addition to this, we have expended $77,000,000 for agricultural and mechanical colleges in the States, something that should be done by the States themselves and not by the National Government. At this session we have passed an act appropriating $20,000,000 for the next seven years for demonstration work on the farms in connection with the colleges and $4,800,000 each year thereafter for the same purpose. A bill has passed the House appropriating $25,000,000 a year for the improvement of roads within the States, a burden that should not be imposed on the National Government. We have a bill pending to appropriate $50,000,000 a year for river and harbor improvements. We have passed a bill for the physical valuation of railroads. This will cost at least $12,000,000, according to estimates. We have passed this session a bill appropriating $700,000 for the cure of hogs of cholera, and horses of other diseases. We are spending $20,000,000 a year for the preservation of the public health. For the reclamation of public lands $101,000,000 have been appropriated, of which $81,000,000 have already been expended. We have pending also a bill to appropriate $1,000,000 for the survey of roads within the States, another of $500,000 for the improvement of rural sanitation. We have passed a bill through both Houses of Congress appropriating $35,000,000 to build a railroad in Alaska. The Postmaster General has proposed the purchase of telephone and telegraph lines that would cost hundreds of millions. The new regional bank system will burden the people with millions more every year. The Post Office appropriation has been increased by about $25,000,000; the District appropriation bill as it came from the House by $81,741.49. The appropriations for fortification has been raised in the Senate $1,720,000. We have created the office of vice admiral of the Navy, and provided for the appointment of five such officers at a salary of $12,000 a year when at sea and $8,000 when on land. The larger appropriation bills have not yet passed the House. How much they will be increased, if at all, can only be predicted in the light of what has gone before. And so we go on spending more and more of the public money almost without limit or thought of the ultimate consequences. It is evidently one of the chief objects of the Democratic Party to legislate in this easy and convenient way in the interest of the farmers with the hope of restoring to the party the confidence lost by the passage of the tariff law.

Mr. CHAMBERLAIN. May I interrupt the Senator for just a moment? I assume the Senator is criticizing the administration for some of these large appropriations. I should like to ask him if he himself has been opposed to the appropriation of moneys for the improvement of rivers and harbors and, say, for the construction of a railroad in Alaska? Does the Senator approve those expenditures or not?

Mr. WORKS. Some of them I do. I am not criticizing the President in respect to that. I am calling attention to the tendency of the Senate or of Congress itself. It does not matter to me whether they are Democrats or Republicans.

OUR RELATIONS WITH MEXICO.

Mr. President, to speak of our relations with Mexico and the dealings of this administration with that distracted and unhappy country is an unpleasant task. It is a dark page in our history. Unless the American people shall have lost all virility, courage, and patriotism, it will be read, in the years to come, with sorrow and shame. For three long years American citizens have been murdered, their wives and daughters outraged, their homes pillaged, and their property destroyed, and this administration has done nothing more than enter occasional mild protests and submissive appeals, and to whom? To Huerta, whose government we had refused to recognize and who, according to our view, had no power or authority to act. To Villa, not recognized as a belligerent; not even a soldier, but a brigand and murderer of innocent people. To Carranza, a weakling dominated by Villa and equally without authority. What had we a right to expect from protests and appeals made to such as these?

Now, sir, how did we come to this unfortunate and degrading situation that reflects upon the integrity and courage of our country and the manhood of our people? Diaz, the man of iron will, who ruled over the Republic of Mexico by force and violence, was in his old age dethroned, deprived of his power, and by his own voluntary act banished from his country. Madero, who succeeded to the presidency by revolution and bloodshed, was a failure. He could not govern the Mexican people in peace. He was weak and unreliable. He failed to keep his promises to the people by which he came into power. He, too, was dethroned by a counter-revolution. Having been deprived of power by violence and sent to prison, he was finally assassinated, doubtless by Huerta, who succeeded

him, or with his knowledge and connivance. Our Government refused to recognize Huerta as President or the Government he had formed, because of the means by which he came into power. This left us with no one to negotiate or deal with, no one upon whom we could call for the protection of our citizens or their property or for redress where their rights were violated. Our ambassador to that country was withdrawn and finally removed from office, apparently without cause. So we could only act through subordinate officers or employees with people whom we had denounced as usurpers and wholly without authority. Then commenced a series of conduct of a kind wholly unknown to diplomacy and so absurd as to make us ridiculous at home and abroad. The President sent to Mexico a private citizen, not an officer, without authority of any kind, not as the representative of the Government, but the private representative of the President himself. Then commenced a series of negotiations, if they may be dignified by that name, that surpasses everything that has ever been known in history. Its utter futility was recognized by almost everybody from the beginning. It excited ridicule and derision and made us, as a Government, ridiculous. The President sent to Huerta certain propositions as a basis of settlement of the troubles in Mexico. They were as follows:

1. An immediate cessation of fighting throughout Mexico; a definite armistice solemnly entered into and scrupulously observed.
2. Security given for an early and free election in which all agree to take part.
3. The consent of Gen. Huerta to bind himself not to be a candidate for election as President of the Republic at this election.
4. The agreement of all parties to abide by the results of the election and cooperate in the most loyal way in organizing and supporting the new administration.

Now, why should these propositions be made to Huerta? According to the position we had taken, he was only a private citizen of a foreign country, without any official standing or authority. The so-called constitutionalist leaders were the same. They did not pretend to have authority to bind anybody. They were, as everybody should have known, unable even to control their own followers. So the President laid down certain propositions and made certain demands on people having no power or authority to carry them out. The first was a demand for a cessation of fighting throughout Mexico and a definite armistice solemnly entered into and scrupulously observed. Did the President really think a few private citizens in Mexico could declare an armistice or stop the fighting that was going on all over Mexico? There were roving bands of so-called "soldiers," but really brigands and murderers, who were slaying people and destroying property without hindrance. They were subject to no authority of government or head of an army. No one, neither Huerta nor Carranza, had any control over them and could no more stop their fighting than could the President of the United States by his manifesto. Besides, there was no reason to suppose that there was the slightest disposition on the part of either of the contending forces to cease their warlike operations; and if any such armistice had been entered into, everybody having any knowledge of conditions in Mexico at that time must have known that it would not be scrupulously observed or observed at all. So this demand was impossible of performance, and if performed as to the call to cease fighting, it could not and would not have been observed. Therefore that demand had better never have been made. The next, that a free election be held in which all will agree to take part, was even more clearly impossible. I do not know who was meant by "all" in this proposal, but I suppose it meant all the people of Mexico. If it did, the President was calling for such an election as never was held in Mexico and probably never will be, and one that would be disastrous to the Republic, if all the people were allowed to vote. It would have been much worse than no election at all. The ignorance of the masses of the people in Mexico precludes the possibility of having a free election with desirable results. It would probably bring about the election of a bull fighter for President, and other public officials of a like kind, to plunder and devastate the country. It is inconceivable that anyone at all informed of conditions in that country could believe that any such thing were either possible or desirable.

The next demand, namely, that Huerta should bind himself not to be a candidate for President of his own country, was nothing less than preposterous. What right had the President of the United States to insist that a citizen of a foreign country should not be a candidate at a "free election in which all will agree to take part" or to say that the people of that Republic should not at such an election as he demanded and approved elect whom they pleased as their chief magistrate? Of course no self-respecting or independent man would submit to such a demand. To clinch this election without regard to its results, however disastrous they might be, it was further demanded that all parties, by which I suppose all the people of Mexico was meant, should abide by the result of the election and cooperate in the most loyal way in organizing and supporting the new administration chosen by this election. It must have been a public-spirited people that would allow the head of a foreign nation to dictate how they should hold an election, whom they should not elect, and that they should not contest the election of anyone chosen at the election they were commanded to hold. Every one of these propositions, except that Huerta should not be a candidate, was impossible of execution, and to make such demands was highly unreasonable and presumptious.

Naturally Huerta refused to consider these proposals. What else could have been expected? His refusal put our Government in a most unfortunate position. It could not enforce its demands. It might go to war, but the refusal to comply with the demands could furnish no justification for declaring war, because we had no right to make them. So we had to submit tamely to the position of Huerta, bear the derision and sneers of the Mexican people and the indulgent smiles of all the nations of the world. And, sir, whatever may be said of Huerta in other respects—and I have no disposition to defend him—he did bear himself with courage, wisdom, and moderation in this whole matter. We were in the wrong. Our course was indefensible. He was wise enough to take advantage of us and put us to open shame. This episode was ineffectual to put an end to the conditions in Mexico or even to ameliorate the sufferings of the people. Civil war continued, murders increased, even greater destruction of property ensued. At last a prominent British subject was brutally murdered by Villa or by his orders. Public indignation ran high. The people were aroused, but the State Department maintained its usual degree of composure. I do not know why the murder of a citizen of Great Britain should have created more feeling than the assassination of hundreds of our own people, except that we have assumed to be the protector of the citizens and subjects of all other nations and insisted that such nations should leave this duty and responsibility to us. It therefore involves the question of our good faith toward other nations when we allow their people to be slaughtered in Mexico.

This case was one to put our good faith and our courage to the test. The poor widow asked for the body of her dead husband, buried on Mexican soil. What did our Government do to secure this right? It humbly petitioned Villa, his murderer, to allow his remains to be removed. The State Department spent days in trying to find out whether this man was shot by Villa or put to death by order of a drumhead court-martial, called not by a soldier, not by a belligerent, but by a brigand and professional murderer. What possible difference could it make whether he lost his life one way or the other? For this the sorrowing widow was left waiting for her dead. What should the Government have done in this case? Just what it should have done for one of its own citizens—sent our soldiers into Mexico and brought out the body. What right has Villa to say whether the body of the victim of his wrath and cruelty should be removed or not? What has become of our courage and manhood that we could leave it to him to settle such a question?

Mr. President, I am not going to discuss the question of future dealings with Mexico. I am speaking of what has been done in the past and its consequences, not what should be done in the future. But I am convinced that that is a matter that we shall be forced to deal with in some decisive way, and that very soon. Congress is not without fault in allowing things to go on as they have without protest or action of any kind. If this feeble method of dealing with the Mexican situation has resulted in the unnecessary loss of American lives, Congress may well be regarded as accessory to the act.

Through all this troublous time I have never doubted the good faith or sincerity of purpose of either the President or the Secretary of State. I am sure their ultimate object has been to save this country from intervention in the affairs of Mexico. With that object I am in full sympathy and accord so long as it can be done with honor and consistently with the duty we owe to our citizens in that country and the obligations we are under to protect the subjects of other nations resident there. But I have not been in the least in sympathy with the methods resorted to to accomplish that object nor the failure on the part of the Government to protect our own people there.

We may be forced yet to intervene in some form in Mexico. If we do it should not be for the aggrandizement of our country, the acquisition of territory, or any other advantage to us, but in the interest of the Mexican people and others resident there, the restoration of peace and order, and the establishment of a stable government for our sister Republic.

During the delivery of Mr. WORKS's speech,

Mr. WORKS. Mr. President, I have reached a point where I am about to take up another question. I see the time has arrived for taking up the unfinished business. I will suspend here and give notice that I will complete what I have to say immediately after the close of the morning business to-morrow.

The VICE PRESIDENT. The morning hour having expired, the Chair lays before the Senate the unfinished business, which will be stated.

The SECRETARY. A joint resolution (S. J. Res. 1) proposing an amendment to the Constitution of the United States extending the right of suffrage to women.

[Mr. SMITH of Maryland reported from the Committee on Appropriations the District of Columbia appropriation bill, which appears under the heading "Reports of committees."]

Mr. WORKS. In view of the fact that a part of what I am about to say discusses to some extent the matter presented by the unfinished business, I will ask the consent of the Senate to conclude what I have to say. It will not take very long.

Mr. BRISTOW. I desire to say the Senator does not have to ask consent. The Senator can just proceed to complete his address. He has a perfect right to discuss the unfinished business.

Mr. WORKS. Then I will take advantage of my right.

After the conclusion of Mr. WORKS's speech,

SENATOR FROM GEORGIA.

Mr. KERN. Mr. President, on behalf of the Committee on Privileges and Elections, I submit the report, which I send to the desk, on the credentials of Senator elect WEST from Georgia.

Mr. SMOOT. Mr. President, I should like to ask the Chair what is before the Senate? I understood that the unfinished business was before the Senate.

Mr. KERN. I ask unanimous consent, out of order, for the consideration of the report which I have submitted.

The VICE PRESIDENT. The report submitted by the Senator from Indiana is a question of the highest privilege, the Chair rules.

Mr. SMOOT. I did not know what the report was that the Senator from Indiana had presented.

The VICE PRESIDENT. The report submitted by the Senator from Indiana will be read.

The Secretary read as follows:

UNITED STATES SENATE,
COMMITTEE ON PRIVILEGES AND ELECTIONS.

Mr. PRESIDENT: The Committee on Privileges and Elections, to whom were referred the credentials of WILLIAM STANLEY WEST, claiming a seat in the Senate from the State of Georgia, respectfully report that such credentials are proper in form, and that the said WEST is entitled to be admitted to a seat as a Senator from said State.

JOHN W. KERN, *Chairman.*

The undersigned members of the Committee on Privileges and Elections authorize the chairman to make a favorable report on the credentials of WILLIAM STANLEY WEST, a Senator from the State of Georgia.

JAMES K. VARDAMAN.
W. O. BRADLEY.
WILLIAM S. KENYON.
T. J. WALSH.
W. P. DILLINGHAM.
GEORGE SUTHERLAND.
LUKE LEA.
WILLIAM HUGHES.
WILLIAM H. THOMPSON.
L. Y. SHERMAN.
ATLEE POMERENE.

Mr. KERN. I move that the report of the committee be adopted, and I ask unanimous consent for the immediate consideration of the motion.

The VICE PRESIDENT. The question is on agreeing to the report of the committee.

The report was agreed to.

Mr. SMITH of Georgia. Mr. President, the newly designated Senator from Georgia is in the Chamber, and I ask that the oath of office may now be administered to him by the President of the Senate.

The VICE PRESIDENT. The Senator appointed from the State of Georgia will please present himself at the Secretary's desk to take the oath of office.

Mr. WEST was escorted to the Vice President's desk by Mr. SMITH of Georgia, and the oath prescribed by law having been administered to him, he took his seat in the Senate.

WOMAN SUFFRAGE.

The Senate resumed the consideration of the joint resolution (S. J. Res. 1) proposing an amendment to the Constitution of the United States extending the right of suffrage to women.

Mr. SHAFROTH. Mr. President, I ask that the unfinished business be temporarily laid aside so that the Senator from North Carolina [Mr. SIMMONS] may speak in answer to the Senator from California [Mr. WORKS].

Mr. SMOOT. I suggest that he ask unanimous consent, with the understanding that the unfinished business shall be again taken up at any time this afternoon that the Senator from Arizona [Mr. ASHURST] may desire.

Mr. SHAFROTH. Then, I ask unanimous consent that the unfinished business may be temporarily laid aside, to be taken up immediately after the remarks of the Senator from North Carolina.

The VICE PRESIDENT. Is there objection to temporarily laying aside the unfinished business for the purpose indicated by the Senator from Colorado [Mr. SHAFROTH]? The Chair hears none; and the unfinished business is temporarily laid aside. The Senator from North Carolina.

"ONE YEAR OF DEMOCRATIC RULE."

Mr. SIMMONS. Mr. President, for something over two hours the Senator from California [Mr. WORKS] has proceeded in an attack upon the present administration and its policies, with practically no interruptions. On account of my physical condition to-day and because I have promised the Senator from Arizona [Mr. ASHURST], in charge of the unfinished business, that I would interfere as little as possible with the consideration of that measure, I should prefer, unless it be to correct some misstatement of fact that I may fall into, that I should not be interrupted, as it will require considerable time to present to the Senate the answer which I shall make to the speech of the Senator from California and also some substantive matter that I desire to present to the Senate and to the country. Interruption would not only divert me from the line of my argument, but would extend this discussion far beyond the time I have permission, through the courtesy of the Senator from Arizona, to displace the unfinished business.

Mr. President, I was greatly surprised at the character of the speech of the Senator from California. I was aware of the fact that in the late presidential campaign that Senator had cast his vote for Mr. Wilson for President. I knew that he had always since he has been a Member of this body held himself out as a Progressive and as a tariff reformer. Having understood the Senator from California as strongly favoring tariff reductions, I had supposed that he had supported Mr. Wilson largely because of his position upon the tariff, largely because he did not sympathize with the position of the Republican candidate upon that subject or those of the Progressive candidate.

The Senator from California now tells us that the reduction of tariff duties and the free listing of foreign importations do not tend to reduce prices and are not in the interest of the consumer of products. He tells us that the effect of the somewhat radical reductions made in the present tariff law has not been to bring about a reduction in prices, but, on the contrary, that it has tended to increase prices. In the light of these facts I can not understand the Senator from California's former attitude in favor of reducing tariff duties. If the Senator knows now that a reduction of tariff duties—a reduction so great as was made in the present law—will not affect prices and will not benefit the consumers of this country, he must have known that fact when he was advocating tariff reduction; and so I am at a loss to understand, in the light of his speech to-day, what he meant when he was such an ardent champion of a reduction of tariff duties in the interest of the consumer.

Furthermore, Mr. President, I must express, because I feel it, my very great astonishment at the columbiad which the Senator from California, in view of the fact that he supported him, has leveled at the President of the United States, that great man who now occupies the Executive office, equal in intellectual endowment and admittedly, I am sure I may safely say, equal in his grasp of great public questions, equal in equipment for the duties of his great office, equal in moral force, and equal in patriotic purposes and aspirations and fidelity to the public weal to any man who has ever occupied the office of Chief Magistrate of this country. I say I have been surprised at the Senator's assault upon the President in view of the fact that the Senator gave him his ardent support, as I understand; but I have been still more surprised, if possible, that this man, this great and distinguished Senator of a great State, speaking in this august presence and to the country, in the face and in the light of his past record on the subject of tariff reduction in the interest of the people, in the light of his denunciation of the protective and prohibitive duties of the old Republican tariff—I am amazed to find him in so short a period of time, by implication at least, aligning himself upon this question with the reactionary element of his party.

The Senator seeks to belittle the achievements of the present administration—both that of administration and that of legislation. The Senator declares that during the incumbency of Mr. Wilson there have been passed and approved by him 63 acts—I think that was the number he gave—and all of these, he declares, with the exception of the appropriation bills, the currency bill, and the tariff bill, are of comparative unimportance; and as to the tariff and the currency measures he de-

clares those at best harmful and vicious in their effect upon the welfare of the country.

Mr. President, I do not think there is any considerable number of people in this country, without regard to party, who agree with the Senator from California in this indictment of the first year of Democratic administration. If there is one thing that, to my mind, the sentiment of the country has crystallized upon, it is in the conclusion that during no year of our history and under no administration has so much that makes for the peace, the happiness, the welfare, the greatness, and the glory of our common country and people been accomplished as during the last year, under Democratic administration. That feeling is shared not only by Democrats, but by Republicans who have open minds and appreciate great public service and great national accomplishment. The administration and the Congress may safely submit the indictment of the Senator from California to the calm, deliberate judgment of the American people, who, in my opinion, have already passed upon that subject and have declared the present occupant of the White House to be one of the most remarkable men this country has ever produced and that his achievements during his first year of service are unsurpassed in the annals of our history.

The Senator from California is so eager to find fault with the present administration that he devotes large space in his prepared speech to the charge that the time of the people was wasted, frittered away, during the extra session of Congress, and that the Democratic Party should be held responsible for that. I admit, Mr. President, that we did not pass during that session many measures of any great importance outside of appropriation bills and the currency and the tariff measures. That session was called for the express purpose of dealing with two great vital questions, whose far-reaching consequences affected the highest interest of every American citizen. It was called in response to a public demand, which could not be gainsaid or resisted, because the evils which had grown up with respect to those great subjects under the dominant party during its control of more than a third of a century were of such pressing importance and demanded such urgent remedy it was felt there should be no delay in dealing with them in a broadly remedial way. That was the inspiration and purpose of the special session. When that special session met, it was the distinctive purpose, by the consensus of opinion and agreement, I might say, of both sides of this Chamber, that nothing should be taken up of general importance except those two measures.

The Senator complains of the long hearings and consideration given to both of these measures by the Congress. Mr. President, I want to say in reply to that criticism—I have not heard it made before—that in the beginning of the consideration of these two measures, especially of the tariff, the other side of the Chamber demanded, from day to day, that before action was taken by the committee there should be the most thorough and exhaustive investigation; that the men who were best able to speak with reference to the tariff and the men who were best able to speak with reference to the financial situation should be invited to come here, should even be brought here, and permitted to appear before these two great committees and take such time as they saw fit in the discussion of these questions. The greater part of the time consumed in the consideration of those measures by the committee was devoted to an earnest and patriotic effort on the part of the committee to obtain light in order that they might frame measures which would meet the needs and demands of the country and afford relief against the admitted evils of the old system. It ill becomes those who then insisted upon that course now to make it a cause of complaint against the Democratic Party.

Mr. President, the Senator from California enumerated the different legislative enactments of the present administration; I believe he did not read them, but asked that they be published as a part of his remarks. I do not know what that summary contains, but I want to put alongside of that summary and alongside of the comments that are made, as I assume, in that summary as to the importance or the wisdom of those enactments, a statement, not prepared by myself—I have not taken the trouble to do that—but, fortunately, I have been able to get this morning a summary, with appropriate comments, explanatory of the effect, significance, and importance of each of the larger measures of the last year, prepared by that great Washington correspondent of the New York World, Col. Charles S. Albert. I do not think I will take the time now either to read the statement or to ask that the Secretary read it, but I will ask that it be incorporated in my remarks. I hope when the people of this country come to read the speech of the Senator from California, if they should do me the honor to read also my feeble impromptu remarks in reply to some of his statements and representations, that they will read in parallel columns the Senator's enumerations and his comments and the enumerations and comments of this great correspondent of a great paper.

The PRESIDING OFFICER (Mr. THORNTON in the chair). In the absence of objection, permission is granted.

The matter referred to is as follows:

WHAT WILSON HAS ACHIEVED IN FIRST YEAR—NO SUCH RECORD MADE BY ANY PREDECESSOR.

WASHINGTON, *February 28.*

For the first time in 50 years the hand of Wall Street has been removed from the Government of the United States.

This desirable result is regarded by President Wilson as the paramount achievement of his administration. He considers the elimination of Wall Street as a dominating factor in many governmental functions the best gift of triumphant Democracy to the American people. The removal of this blighting influence will prove beneficial, if not permanent.

Aside from this accomplished blessing, the President views the creation of a new banking and currency system as the most notable event of his incumbency. He believes this great reform takes precedence over downward revision of the tariff, with the partial destruction of special privilege and the transfer of taxation from poverty to wealth.

One year of Woodrow Wilson's service as President of the United States and leader of the Democratic Party has become history. One-fourth of his elective period has expired. In taking stock no Chief Executive has ever found such a remarkable record of performance to his credit. With persistence and wisdom he has steadfastly urged redemption of all pledges carried in the Baltimore platform. He has been supported by both branches of Congress to a more marked degree than any predecessor in office.

GREAT ACHIEVEMENTS.

Among the great achievements which President Wilson has guided to consummation are:

A banking and currency law which has removed the hand of Wall Street and established a democracy of credit.

A tariff act comprising reduction in duties on imported necessities and calculated to lower the cost of living. No favoritism has been shown protected interests, but the people were substituted as beneficiaries. In framing this legislation the supervision of Wall Street and special interests was rejected.

The lobby, representing all those who profited from legislation, through publicity on the part of Mr. Wilson, was removed as a powerful instrumentality in the shaping of statutes. As a result of exposures made by the President, this obnoxious feature of congressional intimidation was removed.

Two important amendments to the Constitution—the first adopted in 43 years—were made effective. One provides for the direct election of Senators by the people. The other authorizes the imposition of a tax on incomes, thus transferring the burden of maintaining the Government from the poor to the wealthy.

Proposals were made to all civilized nations for the arrangement of treaties whereby actual hostilities would be deferred during a year of reflection. Thirty Governments signified their acceptance of this principle.

RETURN TO POPULAR GOVERNMENT.

A return to popular government was encouraged when the President appeared in person and addressed the two branches of Congress on legislative propositions. He thus sought to terminate domination through private arrangements and secret conferences by the aid of public opinion.

The amendment of laws whereby arbitration of disputes between capital and labor was made more successful.

The constitution of peace presented by the President has gone far in the direction of breaking up interlocking directorates, which formed the backbone of trusts and monopolies.

The helping hand of the Government was extended to the farmers when $50,000,000 were distributed to assist in moving crops.

The divorcement of the Government from the New York financial concerns that proposed cooperation with foreign Governments in furnishing funds for China.

The employment of peaceable methods by which the Telephone Trust was dissolved without litigation or expense.

The policy of diplomatic postponement under which the unsettled relations between the United States and Mexico have been handled.

The placing of the Postal System on a self-sustaining basis for the first time in governmental history

The Parcel Post System has been developed and extended to a remarkable degree of efficiency and benefit.

MAJORITY RULE IN CONGRESS.

Parliamentary rules in the Senate and House were amended, removing the heritage received from Aldrich and Cannon, leaving the majority to control.

The pure-food act was extended to include inspection of all meats, thus affording adequate protection to American consumers.

A bureau of markets was established in the Department of Agriculture, providing a scientific method by which farm products may be transported and distributed.

The Armor Plate Trust was compelled to submit competitive bids in connection with the construction of American battleships. The Government was saved more than $2,000,000.

The special delivery system was extended to the parcel post.

The home life of the farmer was given consideration by the Department of Agriculture. Encouragement in the utilization of labor-saving devices was contained in 55,000 letters sent out.

The full protection of the law has been given Indian children.

A new public-land policy was inaugurated. It combines conservation and the proper use of the national domain.

The enactment of an agricultural extension law, which is expected to double the production of American farms.

The institution in the Navy of academic, vocational, and technical instruction.

The two great transportation monopolies of the East and West were forced to dissolve. The Pennsylvania Railroad relinquished its holdings in the Baltimore & Ohio. The Southern and Union Pacific merger was canceled.

The extinction of many great combinations in restraint of trade by agreement.

The ratification of eight general arbitration treaties, which will enable the President to adjust numerous foreign disputes and complications that now prove irritating. Among the treaties approved were those between the United States and Great Britain and with Japan.

The establishment of an eight-hour day for women and girls in the District of Columbia.

TO REDEEM PLATFORM PROMISES.

Marvelous as has been the record of performance, it represents less than 50 per cent of President Wilson's plans for redeeming platform promises and perpetuating prosperity for the people. In addition to the achievements indicated, he has planned and started on the road to legislative completion more beneficial propositions than any predecessor. Many of these will soon be on the statute books. All the remaining features of his program will be enacted into law before another anniversary of presidential incumbency is reached.

The list of important matters under way includes:

The negotiation and ratification of a treaty with Colombia by which payment shall be made for the loss of Panama and the Canal Zone. This is considered on a parity with the great achievements of the past year. It is intended to remove the stain upon national honor caused by the violent seizure of Panama and restore friendly relations with a sister Republic.

The repeal of the tolls-exemption clause in the Adamson Act, under which American coastwise vessels are given free use of the Panama Canal. This is expected to remove causes for irritation between this Government and those of Great Britain and other maritime powers. It will demonstrate that the United States is willing to respect all treaty obligations.

The ratification by the Senate of 16 additional general arbitration treaties.

The continued arrangement of peace treaties until all civilized nations have been brought into a "breathing" agreement with this country.

Continued efforts for the restoration of peace in Mexico without intervention or the employment of force.

Perfection of a treaty with Nicaragua under which this Government will acquire the right to construct a canal over the Nicaraguan route and secure sites for a naval base and fortifications to protect the Panama waterway.

Legislation under which the Federal Government and the various States will unite in the construction of good roads.

Mr. SIMMONS. Mr. President, much of the speech of the Senator from California covers things that have been thoroughly thrashed out upon the floor of the Senate during the long months of debate upon the questions to which they refer. In my judgment, it is not necessary that they should be discussed again in the Senate. I was somewhat surprised that the Senator from California, in his eagerness to put the present administration, whose head he voted for, in the wrong, should have raked and scraped everything that could be tortured into a subject of criticism, should have revamped all of the adverse arguments that were made during the months of consideration of these measures, and should turn them against him and his administration. They do not need to be discussed now, for, as I have already said, most of the subjects upon which he has spoken have already been discussed. They will be discussed again, in the coming election, before the great body of the American people; and I have not a doubt as to what will be the verdict.

In the discussion of the subjects the Senator has covered, I shall limit myself to those things which affect legislation already passed and which pertain to the effect of that legislation upon the welfare of the country. I shall not follow him in the domain of speculation. I shall not seek to vie with him in denunciation. Nor shall I discuss anything unless it pertains to some legislation, or the effect of some legislation or some act of this administration, which is already accomplished and gone into effect.

Mr. President, I assert and shall maintain that what the Democratic Party has done in the way of legislation and administration has, in the main, been well done; that it was in the interest of the people; and that they are daily reaping the benefits; and that as time goes by they will realize them in increasing measure.

The Senator from California was pleased to denounce the caucus as inimical to popular government, and especially to denounce the caucuses held by the Democratic Party over the tariff and over the currency bills as defeating the will of the people with regard to legislation on these subjects. That charge has been repeatedly made and answered before. In reply to these insinuations and charges we have always said, as we say now, that we were charged as a party with the duty of fulfilling our pledges under our system of party government and party responsibility; and that we were responsible for legislation to carry out these pledges of our party and meet the demands of the people upon these vital questions. We adopted the caucus or the conference as a method of accomplishing our purposes, and we submit the result of our action in this behalf to the people of the country with confidence in the verdict.

It is supposed, however, that caucuses are unpopular, and so our action is and has been virulently attacked and animadverted upon. Mr. President, there was a time when the caucus almost always tended to defeat the will of the people, and whatever defeats the will of the people is going to be unpopular with the people; but that was before representative government was restored in this country.

That was when government in this country was government by Wall Street and by special interest. That was when the people had practically no voice in the making of the laws and in the conduct of their business at Washington and in many of the State legislatures. That was during the dominion in this country of the trust and the monopoly and the special interest.

Thank God, that day has passed. The greatest achievement of Woodrow Wilson rests in the fact, recognized by the people, that he has restored representative government in this country; that he has taken the Government out of the hands of these special interests and lodged it once more in the hands of the people, and that the people rule not only at the ballot box but in the Congress of the United States.

Mr. SMOOT. Mr. President——

Mr. SIMMONS. I hope the Senator will not interrupt me. There will be ample time for the Senator to reply to me when I have finished.

The PRESIDING OFFICER (Mr. CHILTON in the chair). The Senator declines to yield.

Mr. SIMMONS. Mr. President, the caucus, acting upon the tariff, brought about this result: It brought about harmony among the Democrats in this body. It brought the Democrats of this body together upon the basis of compromise. It secured a Democratic bill that carried out the pledges of the party to the people, that carried out the will of the people upon this great question; and we were enabled to pass, for the benefit of the people, a Democratic tariff instead of a mongrel Democratic and Republican tariff.

You tell me, when a caucus accomplishes this great result, when a caucus carries out the will of the people, that it will be unpopular with the people. Let us try that. I say to our opponents, you can, if you put that question to the test at the next election. I do not fear the verdict.

The Senator attacks the civil-service record of the present administration in most violent and uncompromising terms. He can see nothing but a purpose on the part of the administration to overturn all the legislation, all of the administration, with reference to the civil service and go back to the spoils system.

Mr. President, it is well known in this country that during the long years of Republican incumbency, by Executive order or by device and manipulation, in many lines of Government employment and service, nearly the whole body of Democrats were displaced, and Republicans, protected by the civil service, took their positions. It has been stated upon the floor of the Senate that in some of the great departments of the Government in this city only a handful of Democrats were holding office when Mr. Wilson came in.

How did that happen? How did that come about? If Democrats have been permitted, under the civil-service law, to stand these civil-service examinations, does anybody believe that Democrats, as a rule, have been so dull, so lacking in aptitude for the duties of those offices that they were unable to pass the examination, and were excluded because they could not qualify themselves?

I think the consensus of opinion in this country is that a Democrat is just about as capable of standing these examinations and filling these offices as a Republican; and yet that was the result. When we came in, in some way, by some process of legerdemain, the Democrats were practically out of civil-service positions in many lines of governmental employment.

Mr. REED. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Carolina yield to the Senator from Missouri?

Mr. SIMMONS. I would rather not yield.

Mr. REED. I remember the Senator's suggestion now, and while what I wanted to say was apropos of what he has been stating, I will not interrupt him.

Mr. SIMMONS. I would rather not yield. I wish to get through as soon as possible.

More than that, it is a matter of record and of common knowledge in this country that just before the retirement of the late President Taft, within less than a month of the election, I believe, when everybody in this country knew that Mr. Taft would not be reelected, and when the sentiment of the country had crystalized in the confident belief that Mr. Wilson would be elected, President Taft made an order covering something like 40,000 fourth-class postmasters, nine-tenths of whom were Republicans, under the civil service, without requiring them to stand any merit test and with full knowledge that they were Republicans.

Mr. President, if there be a position in the public service where the civil service should not apply, it is to the office of the fourth-class postmaster. Any man who has lived in the country

districts of this Nation, among the farmers, near the crossroads and the little villages where these fourth-class postmasters are, any man who has any knowledge of the duties of the fourth-class postmasters knows that what is required in the discharge of those duties is not book learning. The blanketing under the civil service of these 40,000 men, who were Republicans, just before the election by President Taft to keep Democrats out is to be left unrebuked by the Senator from California; while President Wilson, because he has consented to taking out of the civil service some five or six hundred employees, who ought to be under the civil service no more than fourth-class postmasters ought to be, is to be condemned as a spoilsman!

I have some familiarity with the duties of most of the officials taken out of the civil service by the amendments referred to by the Senator from California. For deputy marshals, for deputy collectors, and such officers, men who capture criminals and break up illicit distilleries, intelligence is needed, judgment is needed, discretion is requisite, courage is needed, but not book learning. It is not essential.

Taft is acquitted when he blankets under the civil service 40,000 postmasters who ought not to be under the civil service because of the character of their duties and necessary qualifications; and Wilson is denounced because he has taken from under the civil service five or six hundred people who ought not to be under the civil service, because the civil-service examinations afford no test of their practical efficiency.

Very much to my amazement, the Senator finds great fault with the income tax. He says we have reduced the tariff, decreased the revenues of the Government, and because of that fact we are compelled to resort to this unpopular and odious method of direct taxation. The words "unpopular" and "odious" are mine; but the Senator animadverts on the undesirability of direct taxation. Even in the case of big incomes, as against swollen fortunes, he queries whether it is wise and good policy and right; but as against any others, as to any other incomes, upon anybody except the big and rich, he says that it is a violation of all our traditional policy of opposition to direct taxation.

The Republican tariff system, unaided by the income tax, placed about as high a tax upon the poor man, his wife, his children, and his little cottage as it placed upon the rich man, with his thousands and his hundreds of thousands, and his palatial home. That condition of things, perpetuated by the Republican Party for 40 years, resulted in collecting practically all taxes for the support of the Government from consumption; it levied a tax against the individual and his needs and his necessities, while the rich, who paid but little tax, received, in the protection of their swollen fortunes and their broad possessions, the benefit of possibly more than half of all the money extracted from the people by this process of unjust taxation.

Finally that condition of things, that situation, palled upon the American people, and the public conscience, aroused beyond the point of further endurance of this wrong and this iniquity, passed an income-tax bill. The Supreme Court by a single vote declared it unconstitutional. The agitation became so fierce and so insistent and so irresistible from one end of the country to the other on the part of the masses, practically of both parties, that the States of this Union amended the Constitution, and Congress, in conformity with the will of the people, passed the present act.

Mr. President, if that constitutional amendment was not intended to place a part of the burden of government upon the men of ample fortunes and of great wealth and simultaneously, pro tanto, to take it off the shoulders of the poor and the needy, what was it passed for? What was the purpose of it? Why should the Democratic Party be challenged when putting into operation that amendment as doing a wrong to the American people?

So far from convincing the American people that we were wrong the Senator from California will find that there is no act of this administration that will be more approved than the part of the tariff bill which levies, justly and equitably, a tax upon incomes. We did not include the poor; we did not include anybody whose income was less than $3,000, because it was that class that most largely pays the consumption taxes that we wanted to supplement.

In imposing this income tax we expected that it would make up any deficit that might arise from the customs duties imposed in the bill. You can not relieve the people of the burdens of tariff taxation without reducing tariff duties. We expected that there would be a falling off of revenues on account of the reductions that we made in the interest of the people. We intended to relieve the people of these taxes by putting the rates down, so that there might be importations, so that importations should be possible. We abhorred the Republican thought and idea that rates should be allowed to be so high as to exclude all possibility of importations. We deliberately put some things on the free list to relieve the masses and help the manufacturer to reduce his cost of production in the interest of lower prices. We deliberately reduced duties on others to relieve the masses. In order to do that we had to put them down to a point where importations were possible, and we did it.

Mr. President, if there is any part of the speech of the Senator from California in his discussion of policies and legislation that has amazed me more than another it is his remarks with reference to the banking and currency bill. He charges that the present banking bill is a bill in the interest of the bankers and not in the interest of the people, and from that he would have it inferred that the great controlling financial forces represented in the big banks of the financial centers wanted this legislation, and the bill was framed as a surrender to their demands and their wishes, and that it was satisfactory to them.

Mr. President, the present banking and currency bill is satisfactory to the country bankers. By "the country bankers" I mean all the bankers outside of the reserve cities. It is popular with them, because they have felt the throttling grip of Wall Street. They have been made its slaves and its tools. They have been forced time and again to do things that their conscience and their judgment told them were not only against the interest of the community in which they transacted business, but against the best interests of the country; but they were helpless. They accept this bill as an emancipation from those shackles and from that slavery. They are for it, and uproariously for it, as the great Secretary of the Treasury said when he returned from that wonderful tour, circling the country, which brought him in contact and conference with all the bankers in every section of the country. They were in favor of it. They recognized that it was a great thing for them to be free. It was a great thing to the people of this country and every community of this country to have some place where in stress and need they could take their securities and get money, and there was no reason why they should not have it. It was a great relief from the old system where their masters in a few centers said "yes" or "no" to their pleading, to their cries for help to relieve distress in their communities; and whenever it suited their policy to make money high or to make money cheap, made it so.

But, Mr. President, the opposition came from the men who under the old system absolutely dominated and controlled the finances of this country, and through the finances of the country controlled its business interests for weal or woe. They to a man stood solidly against it. Why should they not have done so? The power that they wielded under the old system was a power that no emperor, king, or potentate in this world ever wielded, the power to decide the welfare and the happiness and the prosperity of the Nation as their selfish interests might dictate, the power by the manipulation of finances to garner even from the poor and the needy as well as the rich and the well to do the coin of the realm. It was not so much the love of money with them as it was the power that the possession and control of money gave them. When they lost that power their loss was equal to that of any monarch who has been forced by circumstances to lay down his scepter and dominion and control.

Yes, Mr. President, the people are amply protected. The Senator from California is mistaken, for they are amply protected. The reserve board is given effective control. It appoints three of the directors and has the power of removal at will of three others. While these three are elected by the bankers, they must be representatives of some one of the great industries of the country, and they can not be stockholders or directors in the banks. These six directors can be controlled or removed. That is ample governmental control.

What grows out of that control, of as great importance as the power to appoint three of these directors, is the power to remove three of them, for in that way practically control is obtained of a majority of the board. Under that law this board, representing the sovereignty of the Government, representing the interests of the great American people, have the right to dictate to the regional banks, every one of them, Morgan's and Rockefeller's included, what interest they shall charge the people of this country.

Do you say that it is no protection to the people of this country to have that power vested in the Government and taken out of the hands of these pirates who have exploited and preyed upon the right to fix the interest charge, to say whether money shall be high or whether it shall be low, to fix that charge according to the necessities and conditions of the different sections or regions?

The Senator from California says people have no interest or control in these banks.

Oh, yes, the people have an interest in these banks. Because the national banks and the State banks are the only stockholders under the system does not imply that the people have no interest in them. Who are the directors of the regional banks? The six who are not appointed by the United States. By whom are they appointed? They are appointed by the member banks of that region. Who owns the stock and elects the directors of those member banks? Who controls the directorate, controls the stock, dominates the policy of these member banks? Why, of course, the thousands upon thousands and tens of thousands of stockholders in those banks, located in every little hamlet and town and city throughout the length and breadth of this great country. If the people who elect the directors are the stockholders of the member banks, then the people have a voice, and not an indirect voice either, but in its influence and in its effect they have a direct voice in the selection of the six directors.

Under the present system, under the new law, every regional bank in this country will be controlled by all the banks of that region, and all the banks of all the regions will be controlled by all the banks in the system. So we have a financial system in which all the banks in all the country which have seen fit to go into the system, and practically all the national banks have gone into it, will control the financial policy of the regional banks. Under the old system the financial policy of all the banks throughout all the country was controlled by a few great banks in the great reserve cities like St. Louis, Chicago, San Francisco, New York, and Boston. That is the difference.

Mr. President, the Senator from California discusses the tariff. The Senator finds great fault with it, upon the ground that it is not a protective tariff. He says it was openly avowed upon the floor of the Senate and House at the time of its consideration that it ignored the protective principle, and for that reason he finds fault with it. It is not, of course, a protective measure. It was not intended to be a protective measure. It was intended to be a revenue measure. The duties were intended to be based upon the principle of fair and reasonable competition as the most just and equitable basis and the one which promised the most revenue to the Government. Let us dismiss the idea that it was intended to be anything that it is not.

But the Senator gravely says this measure has turned over our domestic markets to the foreigner; not that it is going to do it or that in the course of time it will work out that result, but, as I understood the Senator from California, he claims that after four months' operation under the tariff law its effect has been to turn over the industries of this country to the foreigner.

Mr. President, I am utterly amazed at that statement of the Senator in the face of well-known facts. In the face of the common knowledge of all the people of this country, I am amazed the Senator should stand here and say that that has been the effect of the tariff law.

I suppose the Senator was led into this exaggeration of statement and, probably, led into overlooking the patent facts of the situation, by his indignation because the law does not grant to certain products of his State—lemons and raisins, for illustration—a continued prohibitive duty. What the Senator would like to have, what the Senator indicates as his judgment as to what he ought to have, is a tariff rate for lemons and raisins which would force every man, woman, and child throughout this broad country who want lemons or raisins, without reference to how far he lives from the groves and the orchards and the vineyards, to buy only from California. The Senator complains because the Democratic Party refuses to stand for that; because the Democratic Party refuses to say, for the sake of making the lemon industry of California a monopoly, we will require the people of the Atlantic seaboard, 3,000 miles away, to pay the high freight transportation from the Pacific to the Atlantic coast upon lemons, when they might get them elsewhere at more reasonable rates. What is the use of passing a tariff law to relieve people if you are going to get your duties so high that there can be no competition in a product 3,000 miles from where it is raised in this country? It is transportation protection added to production protection.

There have been increased importations of these articles I have no doubt. I am glad to hear that there have been. The old duties were prohibitive. The people upon the Atlantic coast are entitled to import them. There is nothing in justice or common sense that requires that they should be forced to buy from California and pay 3,000 miles' freight charges upon products if they can get them cheaper elsewhere.

The Senator from California says that we have opened the door to the importations of meat and cattle, and that they have been coming here in much larger quantities than heretofore. Undoubtedly that is true. It was our purpose to make that possible in order to control the high cost of living in this country, in the hope that we might break the monopoly in this country. If that monopoly is extended so as to include Canada and Argentina and Australia, so that our tariff can not accomplish any good because of the monopoly extending over the foreign field of supply, as well as the domestic field of supply, then the judicial arm of the Government, the mandates of the courts, together with such additional legislation as the Democratic Party proposes as a part of its great program of reform and relief to the people, will, I hope, relieve that situation.

Mr. President, the Senator says we have also had an increase in our importations of wheat. Yes, a little; almost too little to mention. As far as cattle are concerned, there is not much difference in the cost of raising cattle here and in Canada. So far as wheat is concerned, there is not much difference in raising wheat here and in Canada. We all heard time and again when we were discussing the tariff here the evidence which showed that Canadian wages and American wages are pretty much the same. There has been some importation of wheat. There has been some of cattle. There has been some importation of other things. But, Mr. President, when the Senator goes to calculating the per cent of the increase of these imports I call his attention to the fact that by reason of the prohibitive duties upon wheat and upon cattle there was relatively no importation of those products and others that he mentions into this country before the present tariff law was passed. If there has been any importations worthy of mention of either one since the tariff law was passed, of course starting with practically nothing it does not take much to make a big per cent of increase.

I made some little calculation, rough, probably not altogether correct, with reference to the amount of meat that has been imported into this country for three months—October, November, December, 1913—after the tariff act went into effect. I have found that taking the figures given by the bureau in regard to the increase in importations during these three months of the tariff law there have been imported of meat into this country just about 1½ pounds apiece for every man, woman, and child, or about half a pound of meat per month apiece.

The amount of wheat imported has been so negligible that it need not be mentioned. We heard the outcry of the Senator with reference to the importation of lemons and raisins. The amount of importations has been relatively negligible.

Yet, Mr. President, in face of the fact that there has been practically only half a pound of meat per month per capita imported under this tariff law, in spite of the fact that the amount of importation of wheat has been negligible, in spite of the fact that the amount of importation of products that he enumerates as those of his State have been insignificant compared with the general output of those products in this country, the Senator gravely tells us that the effect of the tariff law has been to seriously injure the cattle-raising industry, the lemon industry, the wheat industry, and so forth. Yet in the very next breath after he has made that statement, after he has charged that the effect of the tariff measure has been to seriously injure these industries in three months through the invasion of our markets by foreign goods, he states that there has been no fall in the price of these commodities; that, on the other hand, during the very period when this foreign invasion was imminently destroying the domestic industry prices were increasing in this country.

Mr. President, as long as prices increase, or as long as prices are maintained, that is conclusive evidence, accepted by every school of economy in the world and by every man of common sense in the world, that there is not any influence at work undermining, disturbing, not to say destroying the industries concerned.

Oh, our friends have failed to look at the record facts. What are the record facts of importations into this country? Taking everything during the last six months of 1912, when the Payne-Aldrich Act was in full force and effect in this country, as compared with the six months closing January 1, 1914, when the present Democratic tariff law was in effect during four months, the records of the Department of Commerce show that during that period of time, so far from a foreign invasion of our markets, so far from importations such as we had expected to come in the course of time, the importations have been slow in coming. National business especially has always slowly adjusted itself to changed conditions. During that period in 1913, when the Democratic tariff law was in effect for four months, the imports into this country were, in round figures, $20,000,000

less than they were during the corresponding six months of 1912. But during those six months, showing our ability to compete not only upon our own soil but throughout the world under the present tariff law, our exportations have increased about $19,000,000; and during the last six months of the year 1913, when this Democratic tariff law had been in operation for three months, there was an increase in our foreign trade balance of $38,000,000 over the trade balance for the like period of the previous year.

Mr. President, those are the facts. Our imports up to this very hour have not been as great as they were during the seven months of 1912, including January of 1913. During this very time, during the three months when the tariff law has been in operation—this law that it was said would paralyze industries, this law that it was said would result in the invasion of our market by the foreigner, this law that it was said would so completely destroy the competing powers of our home industries that they would not be able to hold or maintain the trade we now have in foreign countries—during the last six months of 1913, Mr. President, four months of this time under this Democratic tariff, our exports have exceeded our imports something over $400,000,000. To the foreigner—this man whom we so much fear here at home, this man whom we can not compete with—we are to-day selling, under this tariff, in four months, over $400,000,000 more goods than we are buying from him.

Mr. President, the Senator talks about increases in prices. There have been increases in some prices, I expect. There have been decreases in some prices, too. The truth about the business, Mr. President, as everybody knows, is that up to the present time the importations have not been sufficiently large to materially affect the price of products. These importations will grow; they will increase; certainly until there is a reduction in prices just exactly as we predicted. We did not predict an immediate tumble in prices. We said it would be slow, it would be gradual, almost imperceptible at first, but that it would come. You can not reduce prices through the tariff until there are sufficient importations to potentially affect the supply of the country. Take any of the products that the Senator from California has been talking about, the price of which he says has not been decreased. Although there have been increased importations, you will find that the importations have been so negligible that no man of common sense will expect them to very materially affect the prices.

The Senator has indicated that the price of meat has been increasing in this country. I think his statement was entirely misleading. He said that there had been so much increase, first, from 1900, and, finally, he said there had been an increase in the price from the beginning of 1913 up to the present time. Mr. President, you can see the fallacy of that statement. There may have been no increase at all during the last three months, when the new tariff law was in operation. There may have been a reduction during the last three months, when the new tariff law was in operation, but the increase from the beginning of January, 1913, under the operation of the old system, up to the time the new tariff law went into effect might account for an increase for the entire period, notwithstanding a reduction during the last three months.

I know that there is not that clamor to-day about the high price of meat that there was; I know that there is not that clamor in this country about the high price of eggs that there was; and yet the Senator from California would have us believe that eggs have not fallen in value, even out there in his own community, in his own State, to which, it is said, that China is exporting eggs—eggs unfit for human food, laid by the hens, as it is said in the letter which the Senator read, or produced, to use a politer expression, under conditions in China which render them unfit for use; and yet the Senator would gravely have the country believe that these spoiled, these insanitary, these unfit eggs from China are finding such a ready market on the Pacific coast that they are actually destroying the market for the fine, white, high-quality eggs of the California hen.

The Senator's contention goes a little further than that. We have not only, he says, destroyed the American market, turned it over to the foreigner, but he said, if I caught his words correctly, and I think I did, this measure that we have passed, this great wickedness that we have done in reducing tariff duties below the protective level, ostensibly and professedly in the interest of the people, has cheapened and degraded American labor.

Mr. President, I know of no influence, save one, working in this country which has degraded American labor. I am sure the tariff is not doing it. I will tell you the only thing of foreign origin or production that is cheapening and degrading American labor. It is the importation of ignorant foreign labor induced by the men who have been clamoring for protection to their factories and to their mills, and clamoring for it on the ground that they wanted this protection in order to enable them to maintain the high American standard of wages. It is these ignorant foreigners, imported here to supply the demand of these protected industries, employed by factories deliberately, because as they do not maintain the American standard of living, they can be secured at a less wage. That is doing more than everything else in this country to cheapen and degrade American labor and add to the list of the unemployed. It is the one influence that has stood in the way of the labor organizations of this country, of the labor unions, in their efforts to improve their wages and their condition. Whatever the wage earners have got in the way of better wages in this country they have not got through these protected manufacturers, these beneficiaries of the tariff, who have sought to lower their standard of wages by importing cheap and ignorant labor. They have got it through their organizations.

Mr. GALLINGER. Mr. President——

Mr. SIMMONS. I hope the Senator will not interrupt me. I am trying very hard to get through. I shall be glad for the Senator, when I get through, to say what he should like to say.

Mr. GALLINGER. I was not in the Chamber when the Senator made the request or I should have refrained from interrupting him. There were one or two points which the Senator recently made that I should like to get a little light on.

Mr. SIMMONS. Mr. President, the Senator from California says—and that has been repeated here before—that the tariff law has resulted in putting thousands of laborers out of employment; and yet I have not found a man, when the matter was discussed in the House—and this phase of the matter was debated there, and it has been debated in the press—I have not found a man who was ready to say that there has been a reduction of the wages of labor in any part of this country, in any industry in this country, during the last three months. Of course there may have been isolated cases where wages in that period of time have been decreased, as there have been like cases of increase; but, taking the level, it seems to be conceded by everybody, as I have abundant testimony here, which I shall ask to incorporate in the RECORD, from representatives of various interests throughout the country, that there has been no reduction of wages in the industries of this country since the passage of the tariff law. In another body one of the leading opponents of the tariff law admitted the fact that there had been no reduction in wages in the factories, and I have here, and will put them in the RECORD, statements from others in a position to know, to the effect that there has been no reduction in wages. I take it that it is an admitted fact, therefore, that there has been no reduction of wages in any one of the industries of this country.

I want to put this proposition, Mr. President: When there is a steady maintenance of the rate of wages—according to all theories of economics—is not that a conclusive proof that there are not two men seeking one job; that there is work for every man who wants work? You will not make the American people believe that an unusual number of men are unemployed in this country because of the reduction of tariff duties unless you can convince them that the rate of wages has fallen, because they know that the minute the supply of labor exceeds the demand there will be a reduction in wages in response to the universal law of supply and demand.

Of course, Mr. President, there have been a large number of unemployed in the great cities during the wintertime. There always are a great many more unemployed during the wintertime than at other seasons of the year; but in every season of the year in the big cities of this country, and in the big cities of every other country, there are under all conditions and any conditions a large number of unemployed people—people who do not want to work, who are unemployed, but who, though unemployed, do not come to the surface until the hard stress and necessities of winter, the pinch of cold and hunger, force them to apply for charity.

In my own State, Mr. President, I know there is a great lack of labor. I am satisfied in the industries and upon the farms of my own State that to-morrow 30,000 able-bodied men could secure employment at good wages.

Mr. President, I want to put into the RECORD a clipping, which I think is from the Washington Post, or it may be from the Star, of November 28. The name of the paper is not on the clipping I have. It is as follows:

SEE NO LABOR CRISIS—CONFERENCE ON UNEMPLOYMENT CALLS CONDITIONS NORMAL.

NEW YORK, *February 27, 1914.*

The country is not facing an unusual crisis in its numbers of unemployed. This was the consensus of opinion expressed at the national conference on unemployment, which began a two days' session in New York to-day.

Many women, representing different States and foreign countries, attended the session.

Mayor Mitchel, who opened the conference, declared that this year presented almost unprecedented conditions. Three hundred thousand, he said, might be an exaggerated estimate of the number of unemployed in New York, but the number was at least the largest that had ever flooded the city.

PRESENT CONDITIONS NOT ABNORMAL.

Charles B. Henderson, secretary of the Chicago commission of the unemployed, took issue with Mayor Mitchel. "Present conditions," he said, "are not abnormal. Most agencies report that the number of the unemployed is not larger than usual. The tragedy of the present conditions consists in the fact that they are not abnormal, but are steadily recurring, inevitable results of industrial mismanagement throughout the country."

Mr. Henderson said the two years' work of his commission proved that most of the work in alleviating conditions of unemployment has been done by private bureaus with great economic waste and in some places with grave abuses.

HITS AT FREE PUBLIC BUREAUS.

"Present free public bureaus," he continued, "are almost without exception inefficient. The fact is, it is impossible to furnish men with jobs when no jobs are to be had. The solution lies in reforming industrial methods, so that full staffs of employees may be retained even in slack seasons."

"There is no problem of unemployment in my State," said W. C. Cheney, delegate from Connecticut. "In fact it is the other way around. Not long ago manufacturers were actually unable to procure the labor they needed."

Mr. President, in addition to that I wish to put into the RECORD the statement of several officers of charitable bureaus, who make it a business to look after and to care for the unemployed in the cities in which they live, and cooperatively throughout the country, to the effect that the number of unemployed people at this time is not abnormal; also, a statement of Mr. Gompers, made in a recent address, with reference to the condition of the unemployed in this country.

The PRESIDING OFFICER (Mr. CHILTON in the chair). In the absence of objection, permission to do so will be granted.

The statements referred to are as follows:

[From New York Herald, Tuesday, Feb. 17, 1914.]

STATEMENT OF SUPERINTENDENT OF EMPLOYMENT BUREAU AS TO NUMBER OF PEOPLE OUT OF EMPLOYMENT.

J. J. Fitzgerald, head of the employment department of Gimbel Bros., said:

"Several days ago we placed a big display advertisement in the four leading New York newspapers asking for applications for positions of milliners, copyists, milliner helpers, and apprentices. We offered the highest salaries obtainable by this class of help in New York City. We expected hundreds of applications, but received only seven. The advertisement was taken out of the classified columns and placed in other parts of these four papers, in the belief that we would have better results, but they failed to bring a single answer.

"Picture fitters usually are to be had in any number. We advertised for them, and received seven applications. Two years ago, when business was unusually prosperous, according to all reports, we frequently had 8 and 10 applications from chauffeurs. If we told them that we could not take them on, they frequently asked to be employed as helpers until there was an opening. Now we have few applications, and I haven't heard a chauffeur ask for a helper's job for many months.

MORE HELP NEEDED.

"I was looking over our employment sheets and wondering where I was to obtain more help when the head of the mail-order department telephoned to me and said that he would need several men. Every department store in the city is confronted with the same situation with which we are faced, and I can not remember any period when there was a less number of applicants for work than at present.

"Just previous to the holidays we had hundreds of applications for work, and if there was any business depression it was to be felt then, to judge from the number of unemployed. If we had advertised at that time for sewing-machine salesmen, we would have received scores of applications, many of the persons making an effort to 'bluff' their way through. A few days ago we advertised for this same kind of help and received two applications."

ONE CLASS ALWAYS "OUT OF WORK."

James T. Hunt, business manager of the Bowery Mission and head of the Mission Employment Bureau, said:

"We are having a great number of applicants for work, but not a sufficient number to lead us to think that there are 350,000 men out of work in New York City alone, as has been said. Several months ago we had hundreds of applications from men who had been laid off by railroads, street car lines, telephone and telegraph companies, but they soon began to grow scarce, and I understand that most of them have again been placed at work at their trades.

"It would make no difference what state of prosperity we had, there would always be a certain element looking for work and making a howl about hard times. It is easy to discriminate between this class and that composed of able-bodied, willing, and intelligent workmen who may be thrown out of employment. We will always have both classes to deal with, irrespective of how good business conditions may be.

"During the seven years that our employment bureau has been in existence we have placed 22,000 men. At present we are receiving just as many calls for men as we received during the time when we were supposed to be enjoying an unusual run of prosperity. Manufacturing plants that were partly closed down two months ago are again working with full forces, and in many instances I have heard of extra men being placed at work to take care of increasing business."

GAIN IN TYPEWRITER BUSINESS.

Alfred Augustus Fraser, general manager of the New York office of the Remington Typewriter Co., at No. 327 Broadway, said that his company's business has shown a decided improvement in the last two months.

"Business is better with us in all parts of the country," said Mr. Fraser, "but in New York the improvement is more marked than elsewhere. Our sales in December greatly exceeded those for December, 1912, and since January 1 we are far ahead of our business for the corresponding period in 1913. Orders and contracts now in hand assure us a profitable year. We feel certain that business in general must be good and getting better, because there is no surer barometer to the condition of trade than the typewriting industry. Our employment agency also reflects the healthful tone of business. There is an increased demand to-day for stenographers, and we find that salaries are running higher than they have been for many a day. Employers are ready to pay more now for stenographers and bookkeepers than they were willing to pay at any time last year. Good operators are in demand daily, and where last year they had trouble in obtaining permanent places at relatively low wages they are finding them now at salaries that give no concern about making ends meet."

STATEMENT OF MRS. HARRIMAN, RESIDENT COMMISSIONER ON UNITED STATES INDUSTRIAL RELATIONS, TO THE EFFECT THAT CONDITIONS ARE ABOUT THE SAME IN LABOR MARKET NOW AS THEY ARE AT THIS SEASON EACH YEAR.

Mrs. J. Borden Harriman, resident commissioner of the United States Commission on Industrial Relations, to-day gave out the following statement supplementing yesterday's announcement of an investigation by the commission into unemployment:

"Anyone who fails to realize that conditions are about the same in the labor market now as they are at this season each year is either ignorant of conditions or insincere.

"The unskilled laborers, who are the chief sufferers from these annual periods of unemployment, are for the most part migratory, and belong to the class known as floating labor. This makes the problem an interstate one, which can only be adequately studied by a Federal body."

[Editorial from the New York Herald, Tuesday, Feb. 17.]

UNEMPLOYED IN NEW YORK—AN "ARMY" THAT HAS DISAPPEARED.

President Wilson is fully justified in questioning "statistics" that assume to show the presence of 350,000, or anything like that number, of unemployed in this city. The Herald certainly challenges their accuracy, and examples of Sunday and of yesterday furnish ample warrant for the challenge.

Confronted by the herculean task of clearing the city's streets of the heavy accumulation of snow, Commissioner Featherstone and the contractors working under him sent out urgent calls for men. The response was prompt on the part of those who wanted work. Every man who applied was employed, and still the need for men remained.

Were there 350,000 applicants? Were there one-half, one-tenth that number? Mr. A. F. Gunther, superintendent of the bureau of snow removal, said he had about 13,000 men working yesterday. "We could use many more if they would apply," Mr. Gunther added. Either the "vast army of the unemployed" upon which the croakers have been harping has never existed or it vanished at the first suggestion of work.

STATEMENT GIVEN THE NEW YORK HERALD BY MR. GOMPERS FEBRUARY 26, 1914.

Unfortunately there is considerable unemployment among the working people of our country—and in so far as when any one man is unemployed through no fault of his own, to him it appears that all our social fabric is a failure—but that reports of the tremendous number of unemployed are much exaggerated I have not the slightest doubt. We are in the midst of winter and are now passing through the transitory stage of reconstructive tariff and banking legislation, and my experience warrants me in saying that the number of unemployed at present is comparatively less than during similar seasons of the year when tariff legislation had previously just been enacted. I am also decidedly of the opinion that the period of unemployment will be much shorter than during former similar periods and transitory conditions. The adjustment of industry to the new conditions is of vital consideration.

BUSINESS CONDITIONS.

There are three facts which answer completely the charge that conditions are panicky and that there is no work for the man who wants to work.

First is the fact, admitted by the leader of the House in the discussion in that body on last Friday, not denied by anybody, that there is plenty of money to be had for investment at low rates of interest.

Second, while there has been a slight drop in prices of commodities, prices, as a rule, have been maintained.

Third, wages have been maintained.

These conditions are absolutely the reverse of conditions that exist in times of panic or business stagnation.

Mr. SIMMONS. Mr. President, of course the purpose of the whole argument of the Senator from California was to show that under the present Democratic tariff law there has been stagnation; that there has been depression; that there has been lack of prosperity. It is the usual, ordinary calamity howl. I want to answer that, not by argument, but by presenting a symposium of testimony coming from the press, coming from the heads and representatives of nearly all the great industries of the country from one end of the land to the other, in refutation of the charge that the conditions which exist to-day under the present tariff law are not conditions of prosperity. Before I do that, however, Mr. President, I want to offer and ask to have printed an article from a paper published in the State of Ohio, called the Medina County Gazette. It is not only an answer to the calamity howl that we have heard so much of, but it shows how industriously and systematically, and with a common purpose, these calamity howlers, these prophets of woe and of evil, have been proceeding in order to disseminate a spirit of pessimism throughout the country, to the detriment of the Democratic Party, of course, but more important, and more significant in its criminal purpose and effect, to the detriment of the business interests of the country. The article to which I have referred shows how the Republican State executive committee of the great State of Ohio had this calamity-howl argument boiler plated and sent out, presumably to every Republican paper in that State, as is charged in this article, with the request that it be published, in order that the wave of

pessimism might be started on its career of devastation and ruin.

The PRESIDING OFFICER. Without objection, the article referred to will be printed in the RECORD.

The article referred to is as follows:

[Extract from speech by Representative ANSBERRY, CONGRESSIONAL RECORD.]

CALAMITY-CRY POLITICS SHOWN BY PLATE MATTER SENT BY OHIO REPUBLICAN EXECUTIVE COMMITTEE.

Some time in January of this year the Republican organization in the State of Ohio sent out boiler-plate matter to the little weekly and daily Republican papers throughout the State of Ohio on this same question, containing a calamity howl. Among other papers they sent this boiler-plate matter to the Medina County Gazette, which is supposed to be a stalwart Republican paper; but the Gazette did not look at the world through the colored spectacles of the gentleman who has charge of that organization, and here is what that Republican paper said with reference to the attitude of these men:

"DASTARDLY POLITICS.

"There has been nothing more reprehensible in American politics than the present studied effort on the part of the standpat forces in control of the Republican Party to aid and abet an era of hard times in this country. It was openly proclaimed at the recent meeting of the Republican national committee at Washington that hard times, want, and poverty were to be the life-savers of that party. To-day from every standpat source is coming a calamity howl coldly calculated to shake business confidence and bring on industrial paralysis.

"As we write there lies on our desk a copy of the Republican News Letter, dated at Columbus, January 3, 1914. Editors are invited to use the contents of this letter in whole or in part. And what is this Republican News Letter that all the editors of Ohio are 'invited' to use and bring before their readers? It is a pure calamity howl calculated to bring on a business panic, if possible—and it is nothing else. Its one big, flaring headline reads: 'Industrial depression.' Then follow three columns of 'calamity' talk, prophesying hard times and business disaster.

"At a recent meeting of the Republican national committee at Washington, Senator REED SMOOT, national committeeman from Utah, was cheered again and again when he airily made the following declaration for a turkey-buzzard policy for his party: 'The silent wheels of the factories, the smokeless stacks of our mills, and the suffering of our people under a Democratic administration will speak louder than any national declaration of principles that we can make. All we have to do to bring victory to our banners will be to point to the closed mill doors and say: "Wilson—that's all."'

"No declaration of principles needed, says SMOOT; just wait for calamity and suffering.

"From every other standpat Republican source is coming the same sort of business poison—the studied attempt to bring suffering and want to millions of American citizens to further the political ends of the Penroses and Smoots and Barneses and Daugherties now in control of the Republican Party.

"The attempt to inject this poison into the business arteries of this country is made, too, when reliable financial authorities like Bradstreet's and Dun's and Henry Clews's tell us that the business outlook for 1914 is brightening daily and that there is no business depression nor panic ahead.

* * * * * * *

"The despicable political panic effort has already failed. The country is aroused against it, and the boomerang is already recoiling upon its projectors.

"The political party that seeks a new lease of life at the hands of American voters by encouraging panic and hard times badly miscalculates, for it can reap from such foul sowing only the contempt and distrust of all right-thinking people."

Mr. SIMMONS. Mr. President, the sentiment of this country with reference to the business outlook of the future is one of optimism. That optimism is justified by conditions; the people know it, and they are not going to be influenced by the cry of calamity. I do not envy, in the conditions that exist in this country to-day, the man who for political or for any other reasons under the sun seeks without justification to undermine that spirit of optimism which is such a power of hope and helpfulness to business and to prosperity in this country, especially at this time.

Now, Mr. President, I ask to put in the RECORD, without reading, various and sundry interviews which have appeared in the New York Herald, I think on the 17th, 20th, 21st, and the 22d days of the past month, the New York Journal of Commerce, and the St. Louis Republic with representatives of great institutions from various sections of the country, who testify to the same common end, that conditions of prosperity either actually exist or are indicated as about to arrive and restore normal conditions where there has been any disturbance in business.

The PRESIDING OFFICER. Without objection, permission is granted.

The interviews referred to are as follows:

[From the New York Herald, February 17, 1914.]

CHICAGO.

Charles A. Stevens, president of Charles A. Stevens & Bros., dealers in women's wear: "The prospects of spring trade are better than they have been for several years."

Modie J. Spiegil, treasurer of May, Stern Bros.: "The merchants and jobbers are making more and larger orders than they have in a long time. From the reports I have received from all parts of the country, I take it that these improved conditions are universal."

E. D. Hurlbert, president of Merchants Loan & Trust Co.: "All indications are that the improvement is sound and permanent."

SAGINAW, MICH.

"Industrially, Saginaw has never been in better condition than to-day, and the business prospects never looked brighter. Bankers, manufacturers, and merchants are all enthusiastic." W. S. Lenters, Republican postmaster, said: "The future never looked brighter for Saginaw than it does at the present time."

Charles W. McClure, Republican, president of one of the largest silo-manufacturing concerns in the United States, said: "Our business is 10 times as great as at any time in the history of our company, and prospects never looked brighter for all five of our plants."

W. R. Burt, one of Michigan's wealthiest citizens, is very enthusiastic over the business outlook. He said: "This prosperous condition not only prevails in Saginaw, but statements from towns throughout the St. Croix district show business throughout the section to be excellent, with the best possible prospects for the future."

WICHITA, KANS.

That prosperity has settled on Wichita is evinced by the amount of building that is being contracted for at present. Prospects for the largest crops in the history of the State were never better.

B. F. McLean, president of the Fourth National Bank and a prominent Republican: "Everyone is feeling fine over the outlook."

Judge E. B. Jurlit, vice president of the Farmers & Bankers' Life Insurance Co., a prominent Republican, said: "Every condition points to better times. The farmers all have money."

WHAT THE FOLKS BACK HOME SAY.

DANVILLE, ILL.

Danville, home of Joseph G. Cannon, is in a rich agricultural region. The failure of some crops and curtailment of others, owing to the long drought last summer and the unseasonable weather of fall and this winter, have been felt by business men of this city and the eighteenth congressional district in general; but most of them declare that, notwithstanding these handicaps, their business for the last year has been equal to, and in many instances greater, than any year since 1907.

There have been no business failures here; every business room is occupied, and merchants generally unite in predicting unprecedented prosperity for the next year, barring another crop failure. Real estate values are gradually increasing after several years of depression, and arrangements are being made for unusual building operations with the opening of spring.

Augustus L. Webster, Republican, president of the Webster Grocery Co., is an optimist on the future business outlook of this city and vicinity.

"Early in 1913 the prevailing conditions caused me to believe that business conditions would not improve during the last year, but my opinion was not verified," he said to-day. "The year 1913 was productive of bigger business than any year since I came to Danville, almost half a century ago. I believe every wholesale concern in Danville also enjoyed the same measure of prosperity.

"Comparing conditions existing at the present time with the conditions a year ago, I firmly believe that 1914 will be a greater season for the wholesale business in Danville than the eminently successful year of 1913. This is saying a great deal, but existing commercial and industrial conditions in Danville is the reason for my belief."

Charles L. English, Republican, president of the First National Bank, was more outspoken concerning his opinion of "Uncle Joe's" calamity talk.

"This is largely an agricultural country," said Mr. English, "and, of course, the failure of the oats crop, partial failure of the corn and other crops, was a severe blow from the principal money-producing source. Labor is now pretty generally employed, and there is a fair degree of prosperity in every branch of business. Money may be a little tight for the next six months, but I regard prospects for the coming year as being very bright."

M. S. Plant, Republican, a leading clothing merchant, said: "I regard the business outlook for the coming year as exceptionally good, barring another crop failure."

J. S. Emery, head of a large dry-goods firm; H. C. Adams, president of a building association; and Joseph Schingel, jr., a prominent contractor, expressed practically the same views as the above. One of them stated that the general feeling of optimism for the future and congratulation over past and present conditions in the face of adverse circumstances ought to be sufficient answer to "Uncle Joe."

SEATTLE, WASH.

"Business conditions in the Pacific Northwest," said C. B. Yandell, secretary of the Seattle Chamber of Commerce, "are 20 per cent better to-day than they were during the corresponding period a year ago. Bank clearings, customs receipts, building permits, and railroad business prove my statement. Prospects of the early recognition in the House of Alaskan needs, the opening of the Panama Canal, the recent abundant rains are sure to bring on a feeling that the entire Pacific coast country, particularly Seattle and the Northwest, is entering into an era of prosperity not known here in five years.

CONCORD, N. H.

Secretary James O. Lyford, of the Concord Board of Trade, who was naval officer of the port of Boston from 1898 to 1913, and who now is mentioned as a Republican candidate for the United States Senate in succession to Senator Gallinger, said to-night that there was no business depression in this city or vicinity and no indication that anything of the sort was impending.

"With one exception," he said, "every Concord industry is employing as many men to-day, at as high wages and for as many hours in the week, as was the case a year or two years ago. The one exception is the shops of the Boston & Maine Railroad, where the force employed has been diminished one-fourth owing to the opening of the road's new shops at Billerica, Mass.

"Both our wholesale and retail business houses report trade and collections up to the average for this season of the year."

LYNN, MASS.

After a period of depression, during which hundreds of employees were laid off, the big plant of the General Electric Co. here is getting busy again, and, according to Walter C. Fisher, its general manager, the outlook is bright. Many of the employees who were laid off have returned to work, and within a short time it is expected that every department of the plant will be in operation again. This is the between-seasons period for the shoe factories, but most of them here are busier than they have been for several months, and most of the manufacturers are confident that business will improve steadily from now on. The percentage of persons out of work in Lynn is very small compared with other years.

SIXTEEN HUNDRED MEN RESUME WORK AT GARY STEEL MILLS.

CHICAGO, ILL.

More than 1,600 men have been put back to work recently and the plant is operating about 80 per cent of capacity.

Declaring he is glad to find a factor like the Herald substantiating the position of optimism regarding business conditions he assumed more than a year ago, Henry R. Towne, president of the Yale & Towne Manufacturing Co. and formerly president of the Merchants' Association, said yesterday that he believes business everywhere is safe, sound, and promising.

"Speaking of my own business," Mr. Towne said, "and the insight that gives to allied businesses, and my contact with business men from every part of the country, I hold, and I have steadily held for a year, the conviction that business everywhere is in a sound, safe, and promising condition."

That business conditions in this country are improving as a result of public confidence following the enactment of currency legislation was the statement made to the Herald yesterday by L. H. Shearman, vice president of W. R. Grace & Co., exporters, of No. 7 Hanover Square. Mr. Shearman said:

"It will be admitted by all business men that conditions are improving and that things will be better within a short time. The public fear that President Wilson's currency and tariff legislation might cause serious trouble if not precipitate a money panic, as was predicted by many, proved to be unfounded and a healthy reaction is now taking place. From now on I look for a steady advance in the volume of business in this country."

OPINION OF C. A. SCHIEREN, JR.

Charles A. Schieren, jr., of the Charles A. Schieren Co., No. 34 Ferry Street, and first vice president of the American Manufacturers' Export Association, said that after a careful study of business conditions prevailing in this country the promises for great industrial activity in the coming spring are excellent. Mr. Schieren said:

"There was a decrease in the volume of business by our company in January of only 7 per cent, as compared with the figures for the same month last year. But that loss promises to be made up by a corresponding increase in the business for the current month. These facts coupled with reliable information supplied to me by correspondents in the Middle West assure me that a steady, healthful revival of business is in progress.

"Every business man felt the effect of the calamity cries which arose when the tariff and currency legislation was being discussed. The pessimists seemingly convinced the people of the country that if either of President Wilson's measures was passed a death blow to business would be dealt. But happily this prediction was not verified, the fact being that public confidence, upon which the prosperity of the Nation actually depends, has been restored."

COTTON MILLS INCREASE OUTPUT.

Edward K. Cone, president of the New York Cotton Exchange, said that there is a strong revival of business in the industries associated with cotton. The cotton mills not only have not closed, as was predicted by pessimists, but have steadily increased their output. The consumption of cotton at the mills during January established a new high record. "All the statistics and estimates of the cotton trade," said Mr. Cone, "bear out the Herald's contention that at the base of commercial conditions all is well."

NO HALT IN GROCERY TRADE.

Few men have a better opportunity of obtaining information regarding the general aspect of trade and business than M. E. Roche, manager of the Butler grocery stores throughout the city. Daily he meets salesmen from all parts of the country and confers with the managers of the many stores over which he has supervision. He has to make estimates and purchase accordingly. When business conditions are on the wane he is among the first to realize the fact. When they are otherwise his source of information never fails him. This is what he thinks of the outlook:

"I think the prospect never was better. Business to-day is in a splendid condition. We know by the purchases that are made daily. When there is uncertainty and lack of confidence there is a decrease in the sale of luxuries. At present there is no such thing. As far as the public is concerned, the alarmist reports of a few months ago fell on deaf ears.

"Our business year ended on November 1 last. It was a very successful one. Since then, in view of the various reports which have been circulated concerning the general business situation, I have maintained a close surveillance upon our own affairs. The result is that I am able to report that for the period between November 1 and to-day I find that we are ahead of the corresponding period of last year.

"I do not regard the situation simply from my own standpoint. In the course of my daily routine I meet and converse with men who are active in other lines. Many of these are salesmen, who come here with goods to sell and whose opportunities for gleaning authentic information are remarkably good.

"When sales are slow for them it indicates that business is slow generally. If the merchant is slow to purchase, his sales are not up to the average, and if the public is hesitant, then everything becomes more or less stagnant. But that is not the case now. Everyone seems to be ready to purchase in good quantity."

TEXTILE TRADES PROSPER.

Thomas Smidt, a member of the dry goods firm of Vietor & Achelis, was another who sounded a note of optimism concerning the situation of trade.

"Our own business is in splendid condition," he said, "and the textile trade in general throughout the country is flourishing. That I know. Merchants are beginning to realize that no ill effects have been felt from the change in the tariff, and that none may be expected. This, of course, lends stimulus to trade.

"The prospects for the near future are just as bright as those of a year ago, and as far as we are concerned all departments are just as busy as they ever were. We observe also that trade all around us is in healthy condition, and we place no credence whatever in what some persons have been declaring about hard times. We have plenty of confidence. The Herald's attitude in the matter is praiseworthy indeed."

Samuel S. Campbell, vice president and director of the Fourth National Bank and director in several other concerns, stated that he observed distinct signs of improvement in the business situation generally.

"We observe a much better outlook," he remarked.

COASTWISE SHIPPING ACTIVE.

Anton A. Raven, president of the American Bureau of Shipping, said: "The surest barometer of business conditions I know of is the coastwise shipping trade. There is no better argument that I can advance to show that business generally throughout the country is prospering than to point to the increasing amount of business being handled by our coastwise vessels.

"There has been no appreciable change either for good or worse in the foreign shipping, although an increase was expected in the imports when the new tariff schedule went into effect. Our exports still lead the imports by a healthy margin, and from all indications it would be safe to say that they will show a greater gain at the end of the fiscal year than ever before in history. The shipping interests which confine their operations solely to the coastwise trade have nothing but encouraging news to give out on conditions to-day and the outlook for the future.

"With the situation cleared up in Mexico I believe there will be a great step forward in conditions in this country."

George Doubleday, president of the Ingersoll-Rand Co., said: "Business everywhere is improving, and I hear few complaints. The Ingersoll-Rand Co. is working full time again, and many of the big industrial plants are employing extra help. I hear nothing but encouraging reports. It seems to me that this talk of a business depression is absurd."

ENGINEERING CONCERN BUSY.

S. L. Selden, of the J. G. White Corporation, of No. 43 Exchange Place, one of the foremost engineering and construction concerns of the country, said that in his opinion the country would this year enjoy one of the most prosperous years commercially and industrially known in decades. Mr. Selden said:

"There is not the shadow of a doubt in my mind but we are entering upon a highly prosperous year. This conviction is based upon a careful study of the situation and comparison with the statistical data of previous years. Last autumn we wondered if we would find work enough to keep our forces employed during the winter. That question was answered when we received so many commissions that we must work hard to keep up with them.

"If business conditions had not improved, our corporation would have been among the first to suffer. It is because of this that I say with confidence that this will be a banner year in this country. There never was anything fundamentally wrong with industrial conditions in this country, but the depression noticeable last year was almost wholly due to the groundless fear that radical changes in our financial and tariff systems would bring hard times. This fear was aggravated by senseless predictions of disappointed politicians, but in the face of it all confidence is returning, and with it the inevitable revival of business along all lines."

[From the New York Herald, Feb. 22, 1914.]

GOOD TRADE REPORTS IN WEST AND SOUTH—MERCHANTS, BUYERS, AND TRAVELERS ALL SEE EVIDENCES OF PROSPERITY THROUGHOUT COUNTRY.

Buyers from all sections of the country, traveling salesmen, and manufacturers who were in New York yesterday were practically unanimous in the opinion that the United States is on the threshold of one of the greatest eras of prosperity in its history.

The general business conditions of the country were reflected by the fact that in most cases the buyers are increasing their orders for stocks of goods, according to the buyers and merchants whom I interviewed yesterday.

One of the large buyers who makes frequent trips to New York is George B. Monning, of the Monning Dry Goods Co., Fort Worth, Tex., who is staying at the Albert Hotel, University Place and Eleventh Street.

"The business prospects in Texas," said Mr. Monning, "are much better than at any time in the last six years. This is a conservative opinion based on a thorough knowledge of business conditions throughout the entire State."

GOOD REPORTS FROM GEORGIA.

One of the largest manufacturers of Georgia is L. M. Lynch, who is at the Albert Hotel. Mr. Lynch's concern, the Muscogee Manufacturing Co., of Columbus, Ga., which is in the cotton-goods manufacturing business, has a New York office at No. 47 Leonard Street.

"I have traveled all through the South and the Middle West recently," said Mr. Lynch yesterday, "and I know from personal experience and observation that the country is just as prosperous as the Herald's interviews and editorials have stated."

Walter Lassiter, who is a traveling salesman for Eugene Teschner & Co., dealers in flowers and feathers, at No. 719 Broadway, said that he had just returned from a trip through the Carolinas, Maryland, and Virginia, and found a wonderful condition of prosperity throughout those sections.

"In my own State of North Carolina," he said, "everything is moving in a satisfactory manner. Merchants, farmers, bankers, and, in fact, everybody is prosperous, with the outlook bright for more prosperity during the coming year. Sales are good and everybody is happy."

LABOR.

In discussing the matter every man interviewed said that, so far as he knew, the price of labor had not been reduced. They used this argument to refute the contention that there are unusually large numbers of unemployed men throughout the country.

"If the supply of labor is greater than the demand," they said, "and this situation exists for a great length of time, the price will fall because of the competition. We have noticed no such condition in our section."

SOUTH ENJOYING BOOM TIMES.

"The South is not entering upon but it is enjoying the greatest era of prosperity in its history. The Civil War no longer is a date for commercial comparison. From the Shenandoah to the Gulf and from the Carolinas to Texas the reign of Midas is more nearly absolute than at any other time since the war or than it ever was in the days of slavery."

Thus spoke James L. Tapp, president, general manager, and buyer of the James L. Tapp Co., of Columbia, S. C., which for 30 years has conducted the largest wholesale and retail department store in the State. Mr. Tapp has been here a week on one of his periodical buying trips, of which he usually makes 8 or 10 a year. But he said yesterday that he found it necessary to make several times the ordinary amount of February purchases of stock and that in consequence his present stay would be prolonged nearly a month. Mr. Tapp is a director in the Palmetto National Bank, of Columbia, and is largely interested in other enterprises of that city.

"I have been in business in Columbia 28 years," said Mr. Tapp, "and I never before saw trade so good as it is to-day. Our store did the

largest and most profitable business in its history last year, and the volume of business so far this year is far ahead of 1913.

SEE GREATEST YEAR IN DECADE.

J. J. Selman, representing William Morris & Co., of No. 140 West Twenty-second Street, manufacturers of silk petticoats, and Lichtenstein, Reichlin & Co., of Philadelphia, manufacturers of silk dresses and waists, has just returned from a trip through the South and West. Mr. Selman said yesterday:

"I went as far South as Texas, and everywhere I found business good and the outlook even better. All through the South and West manufacturers and dealers are stocking up as if they expected 1914 to be the greatest business year in a decade. The South is too busy to pay any attention to the political pessimist."

Albert F. Rockwell, president of the New Departure Manufacturing Co., of Bristol, Conn., which employs 1,500 operatives and is running on full time, said, "That we regard business as good and expect it to be better is proved by the fact that we have just completed a large extension to our plant and are about to enlarge further by adding another building for our coaster-brake department."

C. E. Burch, of No. 45 West Thirty-fourth Street, New York buyer for Burch Bros. & Co., owners of dry goods stores in Waterloo, Marshalltown, and Mason City, Iowa, and Aberdeen, S. Dak.: "We have the largest dry goods stores in Iowa, and we can see nothing but prosperity ahead."

A. W. Burch, of Waterloo, Iowa, manager of Burch Bros. & Co.'s Waterloo store: "The West is in very good condition, and it is going from good to better. All the 100 factories in Waterloo have their entire output sold for the coming year. Prosperity prevails throughout Iowa."

1914 "YEAR OF PLENTY."

J. C. Ratcliff, buyer for the Battery Dry Goods Co., of Gaffney City, S. C.: "Business is very good with us and with merchants and manufacturers of South Carolina and the South generally. In fact, we are too busy to think of any possible interruption of prosperity, and there are no indications, so far as I can see, that 1914 will not be a year of plenty and happiness."

THE MEN WHO KNOW BEST.

In interviews with well-known manufacturers occupying a half page of yesterday's issue sentiments such as these were uttered:

R. L. Prather, Boston: "We feel absolutely optimistic, and our sales are excellent."

F. R. Maxwell, Boston: "The fundamental business conditions are all right; the situation only needs an optimistic spirit to make business boom."

H. T. Colwell, Newburgh, N. Y.: "The business outlook for the coming year never was better."

C. B. Hamilton, Grand Rapids, Mich.: "There is every prospect that 1914 will finish strong."

W. Laughlin, Chicago, Ill.: "The country is bound to be more prosperous."

O. B. Carson, Southbridge, Mass.: "The outlook is excellent."

F. I. Towle, St. Johnsbury, Vt.: "The southwestern territory is in particularly good condition."

A. B. Whitlock, Wheeling, W. Va.: "Our sales are ahead of 1913."

A. B. Pfeiffer, Chicago, Ill.: "Prospects for a big business year."

Frank G. Drew, New Haven, Conn.: "The outlook is very encouraging."

Davis H. Reddie, Springfield, Mass.: "Prosperity is in store for us."

Edward Freshl, Milwaukee, Wis.: "Nineteen hundred and fourteen will be a splendid year for business."

[From the New York Herald, Feb. 20, 1914.]

"The year 1914 should be the greatest in the history of our State." This is the statement of Robert Newton Lynch, the president and manager of the Chamber of Commerce of San Francisco. Mr. Lynch added: "As far as we have learned from our business contact with other States throughout the country, there is a general rise in confidence all around and a thoroughly optimistic look."

Concerning employment conditions in the West Mr. Lynch declared that, while labor demands were being met, the supply does not exceed the demand, save in seasonal employments.

[From the New York Herald, Feb. 22, 1914.]

TRADE CONDITIONS.

INDICATIONS FOR GOOD SPRING TRADE.

A. V. Hamburg, president of the Newark Board of Trade, said: "Business is pretty good and orders are coming in well, with indications that the spring trade we are preparing for will materialize."

Attention was called yesterday by an important business man to an anomalous condition faced by the Daily Iron Trade, a Cleveland publication, which about a month ago undertook to collect proof that there was wide depression in the iron, steel, and metal trades of the United States. He exhibited a copy of the publication to show that its own news articles contradicted that assumption. On January 16 last the front page of the Daily Iron Trade, which is an organ for the industry, contained an article under this heading: "Steel trade backs up idle workmen statements."

On page 3 of the same issue appear articles under the following heads: "Structurals in better demand," "See big rail tonnage," "Sheets appear of firmer tone," "Puddling mills to resume work," "Buffalo sold much," "Wire goods in better demand," "Larger bar tonnage."

TEXTILES.

Herman W. Block, of the S. S. Stein Co., said: "Letters we are receiving from retailers and from our agents everywhere speak hopefully of the future. Orders which we are receiving are unusually large for this time of the year."

TYPEWRITING BUSINESS.

The typewriter industry never was more prosperous or more promising than it is now, according to Harry Bates, of the Underwood Typewriter Co., in its head offices in the Underwood Building in Vesey Street.

"Instead of feeling any depressed business condition," he said, "we have been enjoying a continuous boom. Our business is better now than ever before, and contracts in hand indicate unmistakably that it is going to be better still.

"No one thought of crying hard times a year ago, yet business conditions everywhere, as indicated by our business, are better than they were a year ago.

WOMEN'S COSTUMES.

I. Lahm, of Lahm & Deutz, women's costume designers, at Nos. 33 and 39 West Thirty-fourth Street, said he expected the biggest season the firm ever has known.

"Already our sales for this year have exceeded by 10 per cent double the sales of this time last year," he said. "Our collections, which until recently were rather slow, are fine now, and our losses for the last several months have reached a minimum. I regard the promises of this business year as nothing short of phenomenal. Merchants who have come here to place their spring orders are actually sending in hurried reorders, saying that business in its present state promises so well that they do not want to be caught shorthanded. We find right now that our only trouble is the inability to fill orders, not to sell goods."

TRADE IN JEWELRY SPECIALTIES.

Charles Lippman, of the Lippman, Spier & Hahn Co., designers and wholesalers of jewelers' novelties, at No. 1261 Broadway, with branches all over the country and in Europe and South America, said: "Our business, I find, is an excellent index of general conditions. We sell largely to the big department stores, and they buy little of our goods when times are dull, because their customers do not buy many trinkets when they have little money. This year our sales have been heavy, and the quality of the goods has been excellent."

Matthias Stratton, of Alling & Co., manufacturing jewelers, said: "Storms have caused a cessation of orders in our line from the central western section of the country, but otherwise the trade is keeping up. Collections have improved since the first of the year, and jewelry manufacturers generally are working on full time making spring goods, the outlook being good for a brisk demand."

AUTOMOBILES.

From the automobile industry comes the particularly optimistic statement of Harry S. Houpt, president of the automobile company of that name, which deals principally in Lozier cars, at No. 1751 Broadway.

"This is the eleventh year I have been in the automobile business," said Mr. Houpt, "and in January and February of this year I have been more successful than in any other two months since I began. Since the first of the year I have outsold the previous best two months by 14 automobiles."

Arthur B. Underwood, president and manager Riley-Klotz Co., makers of automobile accessories, said: "We are not as busy as we could be, but orders are coming in steadily, and we are hoping that the indications for a brisk trade revival this spring will materialize. There is nothing to croak about, and if the promised forward movement arrives on time we'll all be too busy to even shout for joy."

SANGUINE IN CLOTHING TRADE.

An indication of business conditions from the viewpoint of New York business men was shown in a statement by Maurice Brill, of Brill Bros., dealers in men's wearing apparel. "Everyone in our line of business is sanguine," said Mr. Brill. "Manufacturers and importers are going ahead as fast as ever."

SHOES AND LEATHER.

Johnson & Murphy, shoe manufacturers, reported a full force, working full time. The season is regarded as a good one, with bright prospects for spring trade.

Weingarten Bros.' corset manufactory is running full time, with a force of about 1,500 workers. Sales for January exceeded those for the same month last year and big orders are coming in.

Whitehead & Hoag, manufacturers of badges, buttons, and novelties, have between 750 and 800 hands working full time, a larger force than was employed a year ago.

Peter Loehnberg, Atlantic Leather Co., said: "The leather trade has picked up considerably during the last few weeks. Orders are coming in and there are indications that within the next 60 days the leather-making industry will be humming along at a great rate."

BRIDGEPORT FACTORIES WORKING TO CAPACITY.

BRIDGEPORT, CONN.

Threatened disturbances in business having been found mythical, factories here are working at capacity and some of them overtime to meet demands of their trade. Among others, the Union Metallic Cartridge Co. is working overtime.

D. W. Wheeler, secretary of the Acme Shear Co., said: "The business outlook is very good. We can see good business ahead."

S. T. Davis, jr., president Locomobile Co. of America, said: "As far as our own business is concerned, we know that the tendency is toward improvement. The general sentiment throughout the country is optimistic."

F. J. Kingsbury, president Bridgeport Brass Co., said: "Business is better with us now than at the close of last year. The outlook is for a steadier business than last year."

C. E. Woods, manager of the American Graphophone Co., said: "Up to January 1 we never had such big business, and business at the present is about 20 per cent ahead of last year. There has been no diminution in the export trade."

Charles V. Barrington, secretary Crane Valve Co., said: "We are running full time in our plants here. Everything is picking up and conditions look good for the future. We are shipping to all parts of the United States."

Dever H. Warner, president Warner Bros. Co., manufacturers of corsets, employing 5,000 persons, said: "We look for normal conditions of business during the year and think that the work being done is bound to be a benefit to the country. We believe that the tariff will adjust itself and that from every viewpoint business is bound to be good. Our export business is increasing."

F. E. Baskets, superintendent of the Fletcher Engineering Co., said: "The business outlook in this country is good. We expect a big year not only from the building operations which have already begun, but from contracts upon which we are asked to bid."

Charles Hutchinson, treasurer Barnum & Bailey Circus, said: "We are expecting one of the biggest years in the circus business which we ever have known. The seating capacity of our big tent has been increased several thousand."

Thomas J. Seward, superintendent Electric Cable Co., said: "With a quiet beginning, we look forward to a good business. Our factory is working full time, with new business in sight for March and April. This is an extremely good outlook for what is usually a bad season."

Lynn W. Wilson said: "Business should be better than normal during the year. Many concerns here are putting on help, and some few are working overtime. At this season of the year outdoor workers are usually without employment. When outdoor occupations are resumed in the spring it will be discovered that the scale of employment is greater than it was a year earlier."

[From the New York Herald, Feb. 21, 1914.]

MANUFACTURERS REPRESENTING $500,000,000, IN PROSPERITY CONFERENCES HERE, SEE GREAT BUSINESS YEAR AHEAD.

Sounding a note of present and forthcoming prosperity and of confidence in the stability of the fundamental business principles of this country, more than 50 prominent manufacturers, representing $500,000,000 of invested capital, met yesterday at the Waldorf-Astoria to consider cooperation for immediate expenditures that would develop trade and bring added volumes of business in the revival that they predict is near at hand.

C. L. Forgey, representing Berry Bros., varnish manufacturers: "This year looks fine for us. We have received orders for fine baking japans for use by concerns in Milan, Italy, and Turin. Business is fine and the prospects are bright. Our Detroit, Walkerville, and San Francisco factories are running all the time and one branch of the Detroit plant is running day and night."

R. L. Prather, advertising manager of the Thomas G. Plant Co., Boston: "We manufacture fine shoes for women. Naturally we come into contact with the best stores, not only in America but abroad. We feel exceptionally optimistic, and our sales are most excellent. We have every confidence that the market is going to be just as good, if not better, as the year advances."

GOOD OUTLOOK FOR SHOE TRADE.

F. R. Maxwell, vice president of the Thomas G. Plant Co., Boston, shoe manufacturers: "The fundamental business conditions are all right."

H. T. Coldwell, assistant general manager and secretary of the Coldwell Lawn Mower Co., Newburgh, N. Y.: "There is every reason to say that the business outlook for the coming year never was better. It is so with us. Conditions are good for prosperity, and we are going to have a corking year."

FINE PROSPECTS FOR FURNITURE.

C. B. Hamilton, of the Berkey & Gay Furniture Co., Grand Rapids, Mich.: "There is every prospect that 1914, while it has started slow, will finish strong. Retail stocks are low and every condition points to a successful year."

W. Laughlin, representing Armour & Co., Chicago: "With a greater consumption of 'the ham what am,' the country is bound to be more prosperous."

O. B. Carson, advertising manager of the American Optical Co., Southbridge, Mass.: "The outlook for the current year is excellent. Present business is most encouraging. It started slow for the year, but bids fair to end with record business. We have felt no hard times since President Wilson went into office, and we are expecting a general improvement all around."

Frank I. Towle, of the Towle Maple Products Co., St. Paul, Minn., and St. Johnsbury, Vt.: "From reports given to us by our salesmen throughout the section west of Chicago we find the southwestern territory in particularly good business and financial condition."

A. B. Whitlock, New York representative of the Hazel-Atlas Glass Co., Wheeling, W. Va.: "Our sales are ahead of the same period in 1913. The prospect is good for the rest of the year."

ARMOUR & CO. SATISFIED.

A. F. Pfeiffer, representing Armour & Co., Chicago: "Prospects and conditions are encouraging for a big business year."

Frank G. Drew, sales manager of the Winchester Repeating Arms Co., New Haven: "Business at present is normal with us. The outlook for 1914 is very encouraging."

David H. Reddie, of Smith & Wesson, Springfield, Mass.: "With conditions fairly normal, we believe that prosperity is in store for us."

John H. Eggens, of the L. E. Waterman Co.: "Business is good and improving, as unsettled conditions are being cleared up."

E. P. Seymour, of the L. E. Waterman Co.: "When uncertain matters of legislation are settled, business will resume activities to proportions heretofore unknown in this country."

H. E. Cragin, representing Armour & Co., Chicago: "Conditions are promising."

Edward Freshl, president of the Holeproof Hosiery Co., Milwaukee, Wis.: "Indications are that 1914 will be a splendid year for business."

George W. Dickerman, vice president of the Remington Typewriter Co.: "There seems to be a better feeling generally to-day, with sounder business conditions."

Walter H. McClure, of the Hazel-Atlas Glass Co., Wheeling, W. Va.: "Conditions are normal; orders are plentiful and prospects are good."

George S. Quay, of the Hazel-Atlas Glass Co., Wheeling, W. Va.: "The business outlook for 1914 is very bright."

John Rickaby, of the Towle Maple Products Co., St. Paul, Minn.: "The business outlook is, in our opinion, favorable for healthy progress in all legitimate lines."

John J. Gardiner, sales manager of the Hull Bros.' Umbrella Co., of Toledo, Ohio: "We have every reason to believe this will be our banner year."

Eben C. Speiden, of the International Acheson Graphite Co., Niagara Falls: "Prospects and conditions are encouraging. The Rice Leaders of the World Association represents the most powerful force for the promotion of clean and honest business that ever existed in this or any other country."

Charles M. Steele, vice president and general manager of the Carl M. Green Advertising Agency, Detroit, representing Berry Bros. (Inc.) and the Anderson Electric Car Co.: "Automobile and other business in Detroit show marked improvement. The outlook for the year is very bright."

FACTORIES RUNNING OVERTIME.

Francis D. Bowman, advertising manager of the Carborundum Co., of Niagara Falls: "We sell grinding wheels and other abrasive products to the factories of the world. When factories are running our products move. At present our plant is running overtime to meet demands. The manufacture of grinding wheels and grinding products is a splendid trade barometer."

George U. Crocker, president of the Simplex Electric Heating Co., of Cambridge, Mass. "A period of readjustment to new business ideals is closing and a period of advance under new conditions is in sight."

H. H. Whiting, Pillsbury Flour Mills Co., of Minneapolis, Minn.: "The business outlook is very encouraging at the present time."

P. C. Ludlam, general sales manager of the Coldwell Lawn Mower Co., Newburgh, N. Y.: "Business prospects are excellent and the Rice Leaders of the World Association will materially improve the already prosperous business conditions."

Philip F. Hall, National Veneer Products Co., of Mishawaka, Ind.: "Business is 35 per cent ahead of last year, and it looks as if we will hold it for a year."

BUSINESS IN GLASSWARE GOOD.

J. C. Brady, vice president of the Hazel-Atlas Glass Co., Wheeling, Va.: "Judging solely from our own business, general conditions and prospects are good."

E. C. Waldvogel, assistant general manager of the Yale & Towne Manufacturing Co.: "Business for 1914 will be up to the normal, with more to come."

Lothar W. Faber, of the Eberhard-Faber Pencil Co.: "Present business conditions are normal. The future prospects are favorable, unless interfered with through legislative action."

A. G. Baker, vice president of the Niagara Silk Mills, of North Tonawanda, N. Y.: "Conditions are promising for a good year, and there is every indication of a returning confidence and prosperity."

W. C. Anderson, president of the Anderson Electric Car Co.: "The future depends upon the action of legislation on railroads and corporations. Give prosperity a chance and we will have it."

At the banquet last night at the Waldorf, Job E. Hedges presided, and speeches were made by Isaac F. Marcosson and William B. Howland.

VOTE OF THANKS TO THE HERALD.

Felicitous speeches were made also by C. B. Hamilton, of the Berkey & Gay Furniture Co., of Grand Rapids; H. Seymour, of the L. E. Waterman Co.; E. Eaton, of the Eaton, Crane & Pike Co.; F. R. Maxwell, vice president of the Thomas G. Plant Co.; and Mr. Rice, all of whom had a tone of hopefulness and praised the purposes of the association.

Mr. Hedges brought up the matter of the Herald's attention to prosperous companies, and said that, as this newspaper had exerted itself toward expressing the optimistic side of the situation, he thought it was in keeping with the purposes of the association to extend a vote of thanks. David H. Reddie, of the Smith & Wesson Co., put the question in the form of a motion, and Edward Freshl, president of the Holeproof Hosiery Co., seconded it. Mr. Hedges then put the subject to a vote, and it was passed unanimously.

Nathan Straus, of New York: "We are entering what will be the greatest era of prosperity the country has known. The grip of Wall Street on the United States has been shaken off by the new currency law. It means that all parts of the country may act on their own initiative without being compelled to consult Wall Street."

B. J. Greenhut, of the Greenhut-Siegel Cooper Co., said there is not the slightest indication of slackening in the speed of business in his house, and in coming in contact with others in the same and associated lines he has learned, he said, that the same feeling of confidence is firmly established throughout the country. There are as many employees at work in the various great business houses throughout the city as there were a year ago, and as far as the Greenhut-Siegel Cooper Co. is concerned, said Mr. Greenhut, business is very healthy indeed and everyone is busy.

GLASS.

Commending the Herald's reports on the business situation, Representative EDWIN S. UNDERHILL, of New York, in an interview to-day called attention to the boom conditions in the glass industry. He said:

"It may be of interest to the Herald to know that the Corning (N. Y.) Glass Works is at present enjoying a period of the greatest activity since its establishment 40 years ago. It is the largest glass factory in the United States, employing upward of 1,500 persons. It never employed so many men before and its pay roll was never so large.

"Corning's leading paper states that the pay roll last week was nearly 30 per cent higher than the corresponding period a year ago, and that one of the blowers received $45 for his week's work on the piecework basis, on which the factory operates."

[From New York Journal of Commerce, Feb. 3, 1914.]

NATIONAL ASSOCIATION OF CREDIT MEN ON BUSINESS OUTLOOK.

That business men are more cheerful regarding the outlook is asserted in the February circular letter issued yesterday by the National Association of Credit Men. It says:

"The first month of the new year has clearly given a new note to business. Uncertainty as to what was going to happen next has been giving way during the month to definiteness. Instead of pursuing a policy of self-protection, as business men have thought necessary for several years, they may look forward, in lines where stocks have not been carried over on account of unseasonable weather, with genuine confidence, working aggressively and expansively for business.

"There is a world-wide ease in the money market, a condition almost novel, so long is it since we have been free from financial stress and strain in one or more of the world's centers.

"This note of cheer does not mean that we need be less vigilant in keeping receivables well under control, for no matter how favorable business prospects may be, anything but a close-collection policy is bad business.

"It is obvious, from reports reaching the National office, that during the last two months of 1913 slowness in the settlement of merchandise accounts was general. There are two distinctive reasons for this condition: First, unseasonable weather operating against sales of winter stocks; and, second, timidity on the part of the interior banks pending banking and currency legislation."

[From the St. Louis Republic, Feb. 12.]

GENERAL BUSINESS.

The marked changes in financial conditions in New York to-day are harbingers of a period of great prosperity, according to Ben Altheimer, president of the Altheimer & Rawlings Investment Co., who has just returned from the East.

"There is money everywhere for investment. Interest and discount rates have been lowered. Commercial paper in large amounts is being bought up rapidly by the banks, and new issues of securities are absorbed as quickly as they are offered.

"Banking houses that had prepared February bond circulars to mail to their clients were compelled to withhold them, as the securities were disposed of without the necessity of circularizing.

"Whether this is a natural reaction from the lethargy of business that existed a few months ago, or whether it is caused by the demand resulting from prosperity, I can not say. It is certain, however, that confidence has been restored here and abroad, and Wall Street has proved again that it is not only cold and practical, but also sensitive and sentimental—a contradiction, but a fact.

"There has been no real scarcity of money during the past few months. It was only temporarily out of sight. London and the Continent are again buying our securities, whereas in October and November indifference to American issues was the rule.

"The passage of the currency bill, which will give us a fixed status in banking and currency affairs, has much to do with this change of conditions, no doubt. It has given a stimulus and confidence where doubt and hesitancy existed."

Mr. SIMMONS. I ask permission also, Mr. President, to have printed in the RECORD, without reading, a statement made by the Secretary of the Treasury, Mr. McAdoo, upon his return from the trip around the country in connection with the organization of the regional banks.

The VICE PRESIDENT. Without objection, the request of the Senator is granted.

The matter referred to is as follows:

STATEMENT OF SECRETARY OF THE TREASURY M'ADOO UPON HIS RETURN FROM A TRIP AROUND THE COUNTRY AS A MEMBER OF THE COMMITTEE ON ORGANIZATION OF REGIONAL BANKS.

The committee was presented everywhere with overwhelming evidence of the enormous economic strength of the country and of the rapid progress of every section. The fact that the Nation's banking resources as a whole make enormous advances every 12 or 15 years, approximately doubling in each such period, was made evident. Facts and figures submitted to the committee in every part of the country show amazing growth and strength, and disclosed a condition of financial, industrial, commercial, and agricultural soundness and prosperity that leaves no doubt as to the future.

Mr. SIMMONS. Also an interview of Gov. Craig, of North Carolina, published in the Washington Post, February 23, 1914:

North Carolina was never so prosperous, nor her people so happy, as at present. We have plenty of money, and everyone except a few of our Republican friends is pulling for Wilson. The Democrats have made a great success. They have passed more constructive legislation in the 10 months that Wilson has been in the White House than all the Congresses since the war.

If some of the unemployed men of whom I have read will come to North Carolina, we can give them plenty of work. I believe we could employ 20,000 able-bodied men at once if we could get them.

I wish also, Mr. President, to put in the RECORD certain extracts from the report of the special board of examiners sent during the last month or six weeks by the Secretary of Commerce into the State of Washington to examine into certain charges preferred by a Representative from that State in another body to the effect that about 190 of the mills of that State were under suspension. The report shows that there were no more mills under suspension in December last year than usual under like weather conditions. It also shows that the price of wages has not materially changed since 1908, and that the number of unemployed in the State was no greater in the shingle industry in December, 1913, than at numerous times under similar conditions under the operation of the protective tariff.

The PRESIDING OFFICER. Without objection, the request will be granted.

The matter referred to is as follows:

The closing of the shingle mills in the State of Washington is not an unusual occurrence.

The labor cost of producing shingles in the United States and British Columbia does not differ greatly, if at all.

The cost of timber is probably somewhat greater in the United States than in British Columbia.

American manufacturers are not abandoning their mills nor are they moving to British Columbia. On the other hand, new mills are being built and old ones enlarged in this country.

There has been no reduction of wages in the shingle mills, and in only a very few instances have there been wage reductions in the lumber mills.

There are not more idle men in the State of Washington at this time due to the closing down of shingle mills than there have been at numerous times under a protective tariff.

The list of 194 mills reported closed on December 1, 1913, was not an unusually long one. At some time during every year, practically ever since the development of the shingle industry in the State of Washington, almost all of the interior mills and some of those at tidewater are closed about 60 days. Every man who is now or has been connected with the shingle industry declares that during the winter months a large number of interior mills are forced to close on account of weather conditions. The records of the various shingle associations and the files of the lumber trade journals bear abundant testimony to the fact that in practically no year since the development of the industry have the mills generally been operated more than 10 months.

It is particularly significant that, in order to obtain a list of 194 mills closed, it was necessary to include therein those mills that are always forced to close on account of weather conditions, those that were compelled to close because they had no timber, those that were burned, and those that were bankrupt or in financial distress.

A considerable number of the mills reported closed on December 1 were operating on January 1, 1914, and a still larger number have resumed operations since that time.

In regard to wages, the facts are that there has been no material changes in the rates of wages paid in the shingle industry since 1908.

Mr. SIMMONS. I want also, Mr. President, to have inserted in the RECORD various and sundry statements from magazines and newspapers, such as the Wall Street Journal, the New York Journal of Commerce, the Iron Age, the Square Deal, and a number of other papers and periodicals, which I will not now enumerate, showing the prosperous condition in the steel and iron industry in this country.

The PRESIDING OFFICER. Without objection, the request will be granted.

The matter referred to is as follows:

[From the New York Journal of Commerce, Feb. 3, 1914.]

CONDITIONS IN STEEL INDUSTRY IMPROVED.

GARY SOON TO RUN ON FULL TIME.

CHICAGO, *January 31.*

Conditions in the steel industry at Gary, Ind., improved in the last week, and word was given out by the general managers of the different plants to-day that the mills would be operating to full capacity by the end of February.

The Gary plant of the American Sheet & Tin Plate Co. is now operating at full capacity after a shutdown during December. The American Bridge Co. is operating at three-fourths capacity and is turning out a large order for the Panama-Pacific Exposition at San Francisco.

[From the Wall Street Journal, Feb. 3, 1914.]

STEEL MILLS FAST GETTING UP TO THEIR FULL CAPACITY.

SHARON.

Blast furnace No. 3 of the Carnegie Steel Co., at Farrell, will start up Wednesday. This means an additional battery of coke ovens will be fired immediately. After Wednesday the Farrell works will be running at the same capacity as before the depression. The tin-plate mill is running at full capacity, for the first time in months. Nearly 8,000 men will be employed at the Farrell mills this week.

Production at the Ohio works of the Carnegie Steel Co. will be increased this week when the billet, sheet-bar, and slab mills will be operated to capacity. One of the Bessemer furnaces that went out of blast some time ago for relining has gone to commission. Two other Bessemer stacks are still being overhauled while out of blast. Prospects are much better now at the Youngstown Carnegie mills.

The Republic Iron & Steel Co. will continue to operate in full, excepting the 20-inch bar mill at the Brown-Bonnell works. During the past week all of the mills were operated to nearly full capacity. At the sheet and tube mills the same department will be in commission this week as were operated last week.

CHICAGO.

The American Sheet & Tin Plate Co., at Gary Ind., is operating to full capacity, and American Bridge Co. at 75 per cent of capacity.

The Illinois Steel Co.'s plant is expected, within a few days, to operate at full capacity, employing 8,570 men, including 1,000 reemployed since last autumn.

PIG-IRON OUTPUT HEAVIER.

Increased buying is reported from different centers of the steel trade. Freer purchases of pig iron are commented on by trade periodicals, and an increase of production in the present month is expected. The Iron Age says: "Iron and steel markets have gained ground in the past week. January buying was so large and the behavior of prices so satisfactory that with the opening of February producers in several finished lines have announced advances of $1 a ton."

The Iron Trade Review says: "The effect of the increased bookings of iron and steel products in January clearly is being shown in the movement of the market toward higher price levels. The Steel Corporation this week has raised its operations to 75 per cent of steel capacity, and some predictions now are being heard that the steel industry of the whole country will be close to this rate before the end of February. Larger buyers continue to come into the pig-iron market more freely, and the better volume is hardening prices."

[From the Square Deal, February, 1914.]

CONDITIONS IN WEST VIRGINIA IRON AND STEEL INDUSTRY.

WHEELING.

This city and State have shared in the betterment of business, which began with the new year. There has been a marked improvement in every line of industry which was involved in the depression prevailing during the closing weeks of 1913. State Labor Commissioner I. V. Barton's investigations lead him to report a reduction in the ranks of idle workers and fewer inquiries for employment at the bureau conducted by him.

Within a week normal conditions will prevail in the iron and steel mills, and the starting of 5 of the 10 mills of the Wheeling Co.'s new plant at Tiltonsville, Ohio, will result in a smaller number of idle men in the steel mills of the district than at any time within a year. The big Carnegie plant at Bellaire is going full blast. The Laughlin in Martins Ferry and the Whitaker in Wheeling, both under the same independent management, are running to capacity. The entire steel department of the Riverside plant at Benwood will be going on the 12th for the first time in many weeks, and Furnace B, which has been undergoing repairs for a long time, will be ready for operation within a few days. At the Wheeling Steel & Iron Co.'s operations in Benwood conditions are normal. The La Belle tin mill, which worked three days a week during December, is now going four and five days a week, with a promise of full operation soon.

In railroad circles conditions as to employment are decidedly brighter. At the Benwood yards of the Baltimore & Ohio most of the men who were laid off during December are back at their jobs.

Coal-mining operations throughout the State were not much affected by the depression late in 1913, and it is the confident prediction of several prominent operators that all records for coal output in West Virginia will be broken in 1914.

In the glass and pottery industries conditions are not the brightest, but manufacturers are optimistic. The plants at Newell, W. Va., are running, and the biggest independent glass factory in the world, at Moundsville, W. Va., is going to full capacity. The Owens machine plants at Fairmont and Clarksburg are turning out all the bottles the machines will make. The Central factory in Wheeling, Senator Scott's plant, is enjoying a prosperous run. The glass factories are still experiencing difficulty in securing boys.

The enamel plants in Moundsville and Bellaire are doing fairly well. The latter will be in part removed to other locations, but the departments retained by Bellaire are going full tilt.

PITTSBURGH.

Following four months of depression and gloom, the industries of the Pittsburgh district are brightening up again as 1914 grows older. The steel business is the barometer of conditions here. The estimated production in the district for the first two weeks of the year is 100,000 tons per week. For the three months previous the production had

dwindled to between 60,000 and 65,000 tons per week, making the increase for the first two weeks of the year more than 33 per cent.

Plants in the Pittsburgh district that have not turned a wheel for weeks are resuming operations, bringing back employment to thousands of men. During the dull period mills of the United States Steel Corporation in Sharon, Farrell, New Castle, Homestead, Pittsburgh proper, and other places in this district were forced to close down. These are all opening up and the majority are running full time now.

That the steel manufacturers are not alarmed is proven by the improvements they are making to their plants. Eight companies in the Pittsburgh district are constructing additional open-hearth furnaces that will give them an additional total annual capacity of 2,113,000 tons.

[Journal of Commerce and Commercial Bulletin, Feb. 2, 1914.]

MERCHANT IRON SALES IN JANUARY, 900,000 TONS—EQUAL TO TOTAL ORDERS IN JANUARY, FEBRUARY, AND MARCH, 1913—HEAVIEST MONTH'S BUSINESS SINCE APRIL, 1912—LESS ACTIVITY LAST WEEK—SMALL ADVANCE IN PRICES ACCOMPANIDED THE LARGER TRANSACTIONS—STEEL-MAKING IRON DULL.

Merchant furnaces booked orders for 900,000 tons of pig iron in the various distributing districts during the month of January. This is the largest tonnage booked during a single month since April, 1912, and equals the total orders placed during the first quarter of 1913. In January last year total contracts were 400,000 tons, and the heaviest buying last year was in July, when total orders were 565,000 tons.

IMPORTS, THREE MONTHS, IRON AND STEEL.

Mr. SIMMONS. That the iron and steel industry is not suffering from an invasion from other markets as a result of the lower tariff duties is shown by the fact that during the last three months of the past year, after the tariff bill went into effect, importations of this product fell off 332,000 tons.

*Total iron and steel imported and exported during the months of October, November, and December, 1912 and 1913.*

| | Imports. | | Exports. | |
|---|---|---|---|---|
| | 1912 | 1913 | 1912 | 1913 |
| | *Dollars.* | *Dollars.* | *Dollars.* | *Dollars.* |
| October | 2,773,916 | 2,574,978 | 25,271,559 | 25,189,745 |
| November | 2,793,448 | 2,495,093 | 26,406,425 | 20,142,141 |
| December | 2,649,485 | 2,814,774 | 23,750,864 | 22,616,701 |

The imports for the three months in 1912 were $8,216,849, and imports for the three months in 1913 were $7,884,845, a falling off under the new tariff of $332,004.

Mr. President, I have covered all the ground that I laid out to cover. There are other phases of the speech of the Senator from California which I should like to have taken up, but I knew I would not have time to discuss all of the subjects that he entered upon. Yet I desired to put in the RECORD some substantive matter upon the general conditions of the country, labor conditions, and business conditions, which I thought ought to be given to the people.

Mr. SMOOT obtained the floor.

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Colorado?

Mr. THOMAS. I was not aware that the Senator from Utah had the floor.

Mr. SMOOT. I will yield to the Senator, if he so desires.

Mr. THOMAS. No; my purpose, Mr. President, was to ask for a unanimous-consent order with reference to the unfinished business, but I will do so later.

Mr. THORNTON. Mr. President——

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Louisiana?

Mr. SMOOT. I yield.

Mr. THORNTON. With the permission of the Senator from Utah, I should like to ask if he proposes at this time to discuss Senate joint resolution No. 1?

Mr. SMOOT. Mr. President, I will state that joint resolution No. 1 is not before the Senate at this time; it has been temporarily laid aside——

Mr. THORNTON. I beg pardon.

Mr. SMOOT. With the understanding, however, that if any Senator desired to speak upon it, he could proceed this afternoon.

Mr. THORNTON. Mr. President, I had expected briefly to speak to the Senate on the joint resolution. I did not know that it had been temporarily laid aside. I only reached here at 3 o'clock, and I understood the Senator from North Carolina [Mr. SIMMONS] was replying to some remarks made this morning by the Senator from California [Mr. WORKS].

Mr. SMOOT. I will say to the Senator that I am not going to occupy very much time, and the Senator can follow, if he shall so desire. I am sure he will have plenty of time to do so this afternoon.

Mr. THORNTON. Very well.

Mr. SMOOT. Mr. President, I should not take a moment of the time of the Senate this afternoon to answer the Senator from North Carolina [Mr. SIMMONS] if he had not referred to the value of importations of foreign goods and to the volume of our exportations for the last three months.

The Senator is mistaken as to both. I am not going to fill the RECORD, as the Senator has done, with newspaper clippings with a view of proving the country was never so prosperous. The Senator and everyone else know that is not the case. I could fill thousands of pages of the RECORD with newspaper clippings apparently proving that the industries of this country are in the throes of distress from one end of the land to the other. I do not believe it any more than I believe that there is no suffering among the laboring men for want of employment. The Senator, in having printed in the RECORD as he has newspaper clippings from papers which perhaps he did not know existed, written from a biased point of view, will never convince the American people of the accuracy of the statement made, particularly not in that way, nor will he convince the hundreds of thousands of American wage earners at present out of employment.

I wish the industries and institutions of the United States were as prosperous as the Senator from North Carolina claims them to be. I wish every mill, every factory, and every industrial plant in all the land were so busy with orders they could not possibly fill them, as was the case before the passage of the present tariff act.

Mr. President, there is no need of our deceiving ourselves. There is no need of taking partisan newspaper reports as testimony. We have, in the Treasury Department, accounts kept of the value of every dollar of goods imported into this country and every dollar of custom duties collected. Every Senator has that information or can secure it any day of the week or month. I am going to confine what I have to say to the absolute figures given by the department. I shall state in dollars and cents the exact amounts, and I shall leave the people to decide whether the results of the present tariff act have been to the advantage of the people as a whole or whether it has not.

Mr. President, take the month of November, 1913, as compared with the month of November, 1912. The importations for November, 1912, were $153,094,898. The importations for November, 1913, were $148,216,536.

For December, 1912, the importations were $154,095,444. For December, 1913, they were $184,587,571.

In January of 1913 the importations were $163,063,438. In January of 1914 they were $154,469,263.

That is to say, Mr. President, during those three months under the Payne-Aldrich tariff act the importations were $470,253,780; under the present law for the corresponding months they were $487,273,370, or a difference of importations during the three months of $17,019,590. The imports in those three months of 1912–13 were less than for the corresponding months of 1913–14 by $17,019,590.

That is only one side of the picture. What is the other? Let us see what the Government collected in revenue from goods imported during those months.

In November, 1912, there was collected customs revenues of $25,666,353. In November, 1913, there was collected $21,173,623. In December, 1912, there was collected $24,248,161. In December, 1913, there was collected $21,510,140. In January, 1913, there was collected $29,334,124. In January, 1914, there was collected $23,528,080.

Taking the total for the three months there was collected in customs revenues during that part of the years 1912-13 $79,248,638, and during the same three months of the years 1913-14 but $66,211,828, or a loss in revenue in those three months of $13,036,810, with an increase of importations of $17,019,590.

In other words, Mr. President, the American workman was prevented from the making of $17,000,000 worth of goods, and the Treasury of the United States lost $13,036,810.

I must admit there has been an increase of revenue from one source since the inauguration of the Democratic administration, for I find that the ordinary internal-revenue receipts from October 2, 1913, to February 18, 1914, were $78,447,507.93, and from October 2, 1912, to February 18, 1913, were but $75,780,164.84, showing an increase of revenue derived from the sale and consumption of beer, whisky, tobacco, and so forth, of $2,667,343.09, and at a time when other industries of the country were suffering from Democratic legislation, notwithstanding the claim made by the Senator from North Carolina [Mr. SIMMONS] that conditions never were so prosperous and newspaper clippings submitted by him as proof positive of the same.

Mr. President, taking the month of December and taking the following items—manufactures of aluminum, parts of automobiles, clocks and parts of clocks, watches and parts of watches, cotton goods, knit goods, burlaps, fruits and nuts, glass and glassware, cutlery, tin plate, gloves, linoleum and oil-

cloths, paper and manufactures of paper, pencils and pencil leads, manufactures of silk, wool and manufactures of wool, and wood pulp—what do we find? Of those items alone during the month of December, 1912, there were imported into this country $18,600,970. During the month of December, 1913, there were imported into this country of those items $28,912,679, an increase in importations of those items alone of $10,251,709 and an increase on all goods imported during December of $30,492,127, and with that increase of importations there was a loss of $2,738,021 to the Treasury of the United States.

Mr. President, an increase of $30,000,000 of goods imported from foreign countries in one month means that many less goods made in the United States. Who has been benefited by this? Certainly not the vast number of unemployed workingmen in this country. It would have taken thousands of them to have produced this $30,000,000 worth of goods. This is lost to the American workmen, and the foreign laborers have received the money that was necessary to produce that amount of goods.

I should not find so much fault with that if the consumer in this country had been benefited to the extent of the cost of producing the $30,000,000, but the fact is that the ultimate consumer has not been benefited one iota by the increase in the importations of this class of goods.

I have not been able to obtain the value of the importations for February, 1914, in order that I might compare them with February, 1913, as the Treasury Department has not yet gotten them out for February, 1914. I wish, however, to call the attention of the Senate to the fact that we do have the receipts of customs for February, 1914, and can compare them with the year 1913. For the year 1913 the receipts were $27,605,115.83, and for February, 1914, they were but $17,609,603.70, or a loss to the Treasury of the United States for that one month of nearly $10,000,000.

As I said before, if the ultimate consumer received the benefit of this difference there would be some reason for approval; but, Mr. President, the amount of reduction in duties that has been made in the present tariff law is not passed on to the ultimate consumer. The importer takes a part of it; the foreign manufacturer has taken a part of it; the distributor of goods in this country has taken a part of it; and I doubt whether a Senator here can point to an item which the ultimate consumer purchases for less money on account of the reduction in rates of duties. The middlemen buy for less, I admit, in many cases.

I did intend to take up the question of the amount of importations in certain lines of goods for the month of February and show that up to this time the foreign manufacturers had not adjusted their business so as to take care of their own trade and also extend it to the American market. I wish to say, however, that I do not believe the increase of importations has fairly begun, nor do I believe it will do so until, perhaps, after the election this fall. If the country votes to approve the tariff bill, I have not the least doubt but that the foreign manufacturers will immediately prepare to enter this market; and they can do it. There is no question in my mind about that, nor is there any question in the mind of the manufacturers of foreign countries but that they can do it.

I met here not long ago one of the largest manufacturers in England. He was in my office, and I asked him if he was prepared to make goods for the American market. He said: "Only by increasing the hours of labor; but after the fall election, if the present tariff act is approved by the American people, I expect to increase my plant, and I expect to make a fight for the American market." There is no question in my mind but that that will be done, not only by him but by thousands of others.

Mr. THORNTON. Mr. President, with the permission of the Senator from Utah, I will say inasmuch as he knew I expected to address the Senate this afternoon that, so far as I am concerned, he is entirely at liberty to proceed as long as he wishes.

Mr. SMOOT. I will say to the Senator that I am passing over a great deal of what I intended to say this afternoon. I promise the Senator that I will be through in a very few minutes.

Mr. THORNTON. I request the Senator not to hurry on my account.

Mr. SMOOT. Mr. President, the Senator from North Carolina [Mr. SIMMONS] referred to the importation of cattle and horses and products of the farm, and said that when the bill was passed he really thought there would be an increase. He also said that the importations into this country of products of the farm were negligible and that they amounted to practically nothing. Mr. President, I have here the total importations of such products for four months under the tariff act of 1913 and 1914, and I want to say that the value of those products imported under the present law was $38,066,107, while the value of those same items for the same four months of a year ago, imported under the Payne-Aldrich bill, amounted to but $10,883,810.

I picked up the other evening the handbook of the Ways and Means Committee of the House, and I went through their estimates of importations. The committee based their rates upon the importations that they estimated would come into this country. I was very much surprised to see that their forecast for the year on cattle was $5,570,000, although we have already imported for the first four months under the law $10,110,948. Their forecast for the year on horses was $612,500. We have already imported $933,634. Their forecast for eggs was $210,000. We have already imported $612,700 in four months.

Mr. President, I could go on along the list and tell the Senate of each item, showing that the forecasts and estimates upon which the present rates were based are absolutely worthless.

Mr. GORE. Mr. President——

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Oklahoma?

Mr. SMOOT. I do.

Mr. GORE. My recollection is that when these estimates were submitted to the House there was a duty on cattle in the House bill which was removed in the Senate. I may not be correct as to that, but that is my recollection; and I have the same recollection as to eggs.

Mr. SMOOT. The rates on eggs and cattle, I think, were left the same. There was a change made in the rate on horses. Oats were made free in the House.

Mr. GORE. I think the Senator is entirely mistaken as to cattle. My recollection is that the House put meats on the free list, but retained a duty on cattle, and I think the same was true of eggs. It is easily verified.

Mr. SMOOT. That, of course, can be very easily verified. It makes no special difference, however, because if I had the time I could go through the whole list, and cattle would be only one item showing the same relative increase. As far as that is concerned, on nearly everything that is produced on the farm the increase of importations has been away beyond any estimate made in the House and away beyond the dreams of any speaker in the Senate. No one on the other side supposed the importations could amount to any such figures as they have actually proved to be.

Mr. President, it is so late that I feel that I do not want to discuss the questions to-night that I intended to. Some suitable occasion may arise, however, within the next day or two. I shall therefore avail myself of the first opportunity to answer a number of statements that were made to-day by the Senator from North Carolina. I understand that the Senator from Indiana [Mr. KERN] desires to make a motion at this time, and I am perfectly willing to defer my remarks to a later date.

Mr. THOMAS obtained the floor.

Mr. KERN. Mr. President——

Mr. THOMAS. I yield for the moment to the Senator from Indiana.

### ADJOURNMENT TO MONDAY.

Mr. KERN. I move that when the Senate adjourns to-day it adjourn until Monday next at 12 o'clock.

Mr. FALL. Mr. President, of course, I shall have no objection to the adjournment, but I desire to give notice that immediately following the routine morning business on Monday next I shall address the Senate on Senate resolution 164, which makes a request for information with reference to Mexican affairs, and that I shall also ask to have read at that time Senate resolution 139, on the same subject.

The VICE PRESIDENT. The question is on agreeing to the motion of the Senator from Indiana [Mr. KERN].

The motion was agreed to.

### WOMAN SUFFRAGE.

Mr. THOMAS. I ask that the unfinished business be laid before the Senate.

The Senate resumed the consideration of the joint resolution (S. J. Res. 1) proposing an amendment to the Constitution of the United States extending the right of suffrage to women.

Mr. THOMAS. Mr. President, in view of the fact that it is evident that we shall not be able to get a vote to-day upon Senate joint resolution No. 1, and the further fact that some Senators who desire to be present when the vote is taken will not be here at an earlier time, I ask unanimous consent that the Senate proceed to vote upon the joint resolution and all amendments at an hour not later than 2 o'clock on Tuesday, the 10th instant. I presume a roll call will be necessary for that purpose.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Dillingham | Myers | Smith, Ariz. |
| Bankhead | Fall | Norris | Smith, Mich. |
| Bradley | Gallinger | O'Gorman | Smoot |
| Brady | Gore | Oliver | Sutherland |
| Brandegee | Hitchcock | Overman | Swanson |
| Bristow | Hughes | Owen | Thomas |
| Bryan | James | Pomerene | Tillman |
| Burton | Jones | Reed | Townsend |
| Catron | Kenyon | Robinson | Vardaman |
| Chamberlain | Kern | Root | Walsh |
| Chilton | Lane | Shafroth | Warren |
| Clapp | Lodge | Sheppard | Williams |
| Clark, Wyo. | Martin, Va. | Sherman | Works |
| Cummins | Martine, N. J. | Shively | |

Mr. REED. I again announce the absence of my colleague [Mr STONE] on account of sickness. I make this announcement generally for the day and during his absence. He is paired with the Senator from Wyoming [Mr. CLARK].

The VICE PRESIDENT. Fifty-five Senators have answered to the roll call. There is a quorum present. The Senator from Colorado [Mr. THOMAS]——

Mr. REED. Will the Senator from Colorado yield to me for a moment?

Mr. THOMAS. I yield to the Senator.

Mr. REED. Out of order I ask to be permitted to introduce a joint resolution which I ask to have printed in the RECORD and referred to the Committee on Public Buildings and Grounds.

The VICE PRESIDENT. The joint resolution will be read by title and, without objection, will be printed in the RECORD.

The SECRETARY. A joint resolution creating a joint committee of Congress, and authorizing said committee to acquire, by purchase or condemnation, the property known as Monticello, and so forth.

Mr. WILLIAMS. Will the Senator from Colorado yield to me to make a request?

Mr. TOWNSEND. Mr. President, I wish to make a point of order. I should like to know if it would not be necessary to call the roll again if the proposition to submit a unanimous consent is made and then business is done in the meantime?

The VICE PRESIDENT. The Chair will be compelled to rule that the roll call must proceed again.

Mr. THOMAS. I can not yield if that is the case.

Mr. WILLIAMS. I merely wish to ask to have some printing done. Do I understand the Chair to rule that I can not make a request to print a document without a call for a quorum beforehand?

The VICE PRESIDENT. No; the Chair has ruled that when a roll call is had for the purpose of presenting a unanimous-consent agreement, if business intervenes the roll call must be had again before the unanimous-consent agreement can be presented.

Mr. WILLIAMS. A parliamentary inquiry, then, Mr. President. May I ask what business has intervened since the roll was called?

The VICE PRESIDENT. The Senator from Missouri has introduced a joint resolution by the consent of the Senator from Colorado.

Mr. REED. I presume there is no way to rectify the matter now unless I can withdraw the joint resolution. I do not want to put the Senate to the inconvenience of another roll call.

Mr. O'GORMAN. Mr. President——

The VICE PRESIDENT. The Senator from Colorado has the floor. Does he yield to the Senator from New York?

Mr. THOMAS. I do not wish to yield if by doing so I shall put the Senate to the inconvenience of another roll call.

Mr. BRANDEGEE. Mr. President——

The VICE PRESIDENT. Does the Senator from Colorado yield to the Senator from Connecticut?

Mr. THOMAS. I do not yield unless it be for some inquiry.

Mr. BRANDEGEE. I simply wanted to inquire of the Senator if he would not ask unanimous consent that the Senator from Missouri [Mr. REED] be allowed to withdraw the bill which he introduced and that the unanimous-consent agreement asked by the Senator from Colorado be stated to the Senate.

Mr. THOMAS. I thank the Senator for the suggestion. I ask that unanimous consent be given the Senator from Missouri to withdraw the joint resolution I just offered.

Mr. REED. Mr. President, a parliamentary inquiry. Will that avoid the difficulty which has been suggested?

The VICE PRESIDENT. The Chair will so rule.

Mr. REED. Very well; I concur in the request.

The VICE PRESIDENT. Is there objection? The Chair hears none. The joint resolution is withdrawn. The Senator from Colorado will state his proposed agreement.

Mr. THOMAS. I ask the unanimous consent of the Senate that at the hour of 2 o'clock on Tuesday, the 10th instant, the Senate shall proceed to vote upon Senate joint resolution No. 1 and all amendments thereto, and that debate as to all amendments thereafter offered be limited to 15 minutes to each Senator speaking thereon.

I will state to the Senate that I fixed the hour of 2 o'clock on the 10th instant for the purpose of accommodating Senators who can not be here at an earlier time and who desire particularly to be here and to participate in the voting.

Mr. BRISTOW. That is, the debate is limited to 15-minute speeches on the amendments or on the joint resolution?

Mr. THOMAS. On amendments which are offered after the hour of 2 o'clock.

Mr. BRISTOW. On the joint resolution itself?

Mr. THOMAS. No.

Mr. CUMMINS. I should like to have the consent agreement stated by the Secretary.

The VICE PRESIDENT. It will be read.

The SECRETARY. The Senator from Colorado [Mr. THOMAS] asks unanimous consent that at the hour of 2 o'clock on Tuesday, the 10th instant, the Senate shall proceed to vote upon Senate joint resolution No. 1 and all amendments then pending, and that debate as to all amendments thereafter offered be limited to 15 minutes to each Senator speaking thereon.

Mr. LANE. I should like to suggest to the Senator from Colorado that the hour be 4 o'clock. I understand that the Senator from New Mexico [Mr. FALL] gave notice that he is going to occupy a portion of the time on Monday.

Mr. THOMAS. I am willing to make it 4 o'clock.

Mr. LANE. I believe in free speech and lots of it. We have heard a good deal and I should like to hear more.

Mr. THOMAS. Very well; I will make it 4 o'clock.

Mr. NORRIS. I should like to inquire of the Senator if this proposed unanimous-consent agreement would not permit unlimited debate after the hour named, provided it was on an amendment that had been offered prior to that hour?

Mr. THOMAS. It would practically amount to that, if amendments were offered.

Mr. NORRIS. If the Senator wants to reach that, it seems to me he ought to meet that contingency.

Mr. THOMAS. I desire to meet the wishes of all with reference to the form of the agreement.

Mr. NORRIS. I will ask the Senator if there would be any objection to striking out the word "thereafter"? I think that would cover it then.

Mr. THOMAS. If that were done, then there certainly would be unlimited debate afterwards, because there is a pending amendment.

Mr. NORRIS. I understand as to a pending amendment or any other amendment that might be offered between now and 2 o'clock on Tuesday there could be unlimited debate. So if anyone wanted to prolong the debate to an unlimited extent, the agreement really means nothing.

Mr. THOMAS. There would be unlimted debate in the sense that addresses might be made limited each to 15 minutes.

Mr. NORRIS. Oh, no; I do not understand the agreement in that way.

Mr. THOMAS. Certainly; it reads that way.

Mr. NORRIS. Then I did not get it right when it was read.

Mr. BRANDEGEE. I understood it exactly as the Senator from Nebraska understands it. I wish to suggest to the Senator from Colorado that if the limitation upon debate on any amendment offered after 2 o'clock is 15 minutes—and that is all the unanimous-consent agreement says about it—it will be perfectly proper for the Senator from Mississippi [Mr. VARDAMAN] or any other Senator to take the floor upon the amendment pending offered by the Senator from Mississippi and speak the entire time up to the time we would be compelled to vote, and that would cut off debate upon everything else.

Mr. THOMAS. That is not the design of the agreement.

Mr. BRANDEGEE. I have no doubt that is not the design, but I think that would be the effect.

Mr. THOMAS. The limit I suggest is 15 minutes for each Senator upon a subsequent amendment.

Mr. BRANDEGEE. But the trouble is the amendment I am talking about—that proposed by the Senator from Mississippi—is not a subsequent amendment; it is an amendment pending now.

Mr. THOMAS. So it can be discussed up to the hour of voting.

Mr. BRANDEGEE. Certainly; that is what I am complaining of.

Mr. NORRIS. Why could not only that amendment but any other be discussed after the joint resolution is passed? All a Senator would have to do in order to talk longer than the time

mentioned would be to simply say "I am talking on this amendment which has been offered."

Mr. THOMAS. It is quite evident, to my mind, that the hour fixed in the agreement will be reached before we agree upon it. Therefore I am perfectly willing to accept any suggestion that may be desired for the purpose of reaching an agreement.

Mr. JAMES. Why does not the Senator from Colorado suggest an hour when we shall commence to vote upon the pending joint resolution and all amendments without debate?

Mr. LODGE. Without debate.

Mr. THOMAS. Because there is objection to it.

Mr. JAMES. I have not heard that suggested.

Mr. THOMAS. There might be no objection made, but the Senator from Kansas [Mr. BRISTOW] suggested differently, and I accepted his suggestion and I thought it would be satisfactory.

Mr. CLARK of Wyoming. I ask the Senator if there would be any objection to his including in the request, before or after the words "to be offered thereafter," the words "upon the bill and pending amendments or amendments to be offered."

Mr. THOMAS. No; not on my part.

Mr. CLARK of Wyoming. I think that would confine the debate to 15 minutes to each Senator.

Mr. THOMAS. My impression is that the anticipated trouble will not arise. However, I am willing that that shall be inserted.

The VICE PRESIDENT. The Secretary will state the proposed unanimous-consent agreement as modified.

The SECRETARY. The Senator from Colorado [Mr. THOMAS] asks unanimous consent that at 4 o'clock p. m. Tuesday, the 10th instant, the Senate shall proceed to vote upon Senate joint resolution No. 1 and all amendments thereto, and that the debate upon the resolution itself, on amendments that may be then pending, and on amendments that may be offered shall thereafter be limited to 15 minutes to each Senator.

Mr. THOMAS. That is satisfactory to me if it is to the Senate.

Mr. CUMMINS. May I ask the Senator from Colorado how we can proceed to vote if the right to debate is open?

Mr. THOMAS. This is precisely the rule which the Senate made by unanimous consent in the Alaska Railway case.

Mr. WILLIAMS. And we got into an awful trouble.

Mr. JAMES. That was because the Alaska consent agreement provided that we should vote on the calendar day, as I understand it. There is no provision here for a calendar day. That was the trouble in the Alaskan case. The two agreements are not at all similar.

The VICE PRESIDENT. Before the unanimous-consent agreement is adopted the Chair asks the Senator proposing it to construe what it means. If the Senate is going to vote at 4 o'clock on the joint resolution and the amendments, the Chair is impressed with the idea that it means to vote at 4 o'clock and the subsequent discussion would be after the voting. I have heard that in the Senate, but it can not accomplish any purpose.

Mr. CUMMINS. Mr. President, it seems to me it ought to be that after 4 o'clock debate be limited to 15 minutes on the joint resolution and any amendment that is pending or which may be offered. Then we will reach an end.

Mr. THOMAS. My personal preference would be to arbitrarily fix 4 o'clock as the time to vote on the measure and all amendments. The Senator from Kansas, however, suggests the necessity or expediency of considering amendments which may then be offered. If the suggestion made by the Senator from Iowa is agreeable to the Senator from Kansas it is to me.

Mr. CUMMINS. I have no objection to an agreement that will limit debate to any hour, I care not how soon it may be, and that as soon as that debate is over that we vote. But an agreement which says that at 4 o'clock we shall proceed to vote, accompanied with an arrangement for debating after that time, it seems to me, is very inconsistent; that it is impossible to be either applied or understood.

Mr. THOMAS. I have cited the only precedent for it that I am aware of.

Mr. BRANDEGEE. I ask that the proposed unanimous-consent agreement be restated to the Senate.

The VICE PRESIDENT. The Secretary will restate it.

The SECRETARY. The Senator from Colorado asks unanimous consent that at the hour of 4 o'clock upon Tuesday, the 10th instant, the Senate shall proceed to vote upon Senate joint resolution No. 1 and all amendments thereto, and that debate thereafter, as to all amendments——

Mr. BRANDEGEE. We can not debate after we commence to vote.

The VICE PRESIDENT. That is the query the Chair was propounding.

Mr. BRANDEGEE. The consent must be stated in writing, of course. It is not half understood, nor is it even formulated.

Mr. THOMAS. My own suggestion would be to have the agreement end where the Secretary stopped reading.

Mr. CUMMINS. Is not this what the Senator from Colorado seeks to accomplish, that after 4 o'clock on Tuesday the debate shall be limited to 15 minutes for each Senator?

Mr. THOMAS. That is not all I want to accomplish, but I assume that is all I can accomplish.

Mr. CUMMINS. If debate is open for 15 minutes to each Senator——

Mr. THOMAS. I was going to say that that is all I assume I will be able to accomplish, in view of the suggestions made to me as to what the agreement shall contain.

Mr. JAMES. That is some relief.

Mr. CUMMINS. What further would the Senator from Colorado like to accomplish?

Mr. GALLINGER. Mr. President, I venture to make a very modest suggestion. It is that in place of agreeing to commence to vote at 4 o'clock the Senate shall proceed to the consideration of the joint resolution and amendments and then limit the debate.

Mr. CUMMINS. That is the suggestion I have just made to the Senator from Colorado. It is what he evidently intends.

Mr. THOMAS. I should like to inquire of the Senator from New Hampshire whether that fixes the hour of 4 o'clock for voting?

Mr. GALLINGER. That can follow. We proceed to the consideration of the joint resolution at a certain hour—at 2 o'clock—and then, at 4 o'clock, debate can be limited on the bill and amendments. I apprehend there will be very few amendments offered.

Mr. THOMAS. I do not see, Mr. President, with all deference to the superior experience of the Senator from New Hampshire, that that changes the matter very much.

Mr. GALLINGER. The only difficulty is, Mr. President, as I think the Senator will appreciate, that the proposition of the Senator is that we shall proceed to vote at a certain hour and then that debate shall follow.

Mr. ROOT. Mr. President, will the Senator from Colorado allow me to make a suggestion?

Mr. THOMAS. With pleasure.

Mr. ROOT. I suggest that, starting with the original proposition, it be put in this form: That after 2 o'clock on Tuesday, the 10th instant, debate on joint resolution No. 1 be limited to 15 minutes to each Senator, and that at 4 o'clock p. m. on that day the Senate shall proceed to vote upon the resolution and all amendments thereto without further debate.

Mr. BRISTOW. Mr. President, I should object to that. I object to any agreement to vote at a specific hour without further debate, because, under such an arrangement, amendments may be offered which can not even be explained. An amendment such as has been suggested by the Senator from Mississippi [Mr. VARDAMAN] may be put in here at any time. I shall object to any request for unanimous consent unless there be allowed 15 minutes debate by each Senator on the joint resolution and all amendments that may be offered to it.

Mr. THOMAS. If that is the case, I think I will withdraw my request.

Mr. VARDAMAN. Mr. President, I would suggest, to avoid the difficulty suggested by the Senator from Kansas [Mr. BRISTOW], that the Senator from New York amend his request for unanimous consent by providing that no amendment shall be offered after 2 o'clock.

Mr. BRISTOW. No.

Mr. CUMMINS. I would object to that.

Mr. NORRIS. Since the Senator from Colorado has withdrawn his request and objected to another request, I should like to submit a request for unanimous consent.

Mr. THOMAS. I have not objected to any request. The Senator from Kansas having objected, I perceive the folly of attempting to agree to anything. Therefore I withdraw my request for unanimous consent.

Mr. NORRIS. I understood the Senator from Kansas to say that he would make no objection if 15-minute speeches were allowed on each amendment. I ask unanimous consent that after 2 o'clock on Tuesday next debate on Senate joint resolution No. 1 shall be limited to speeches of not exceeding 15 minutes, so that no Senator would be allowed to speak more than 15 minutes on any amendment.

Mr. BRISTOW. On the joint resolution.

Mr. GRONNA. I should object to that, unless the Senator includes 15-minute speeches on the joint resolution itself.

Mr. NORRIS. I have no objectoin to putting that in. I will modify the request to make it 15 minutes on any amendment or

on the joint resolution itself, and that the vote shall be taken when there is no Senator who desires to speak and when there are no further amendments to be offered.

Mr. SHEPPARD. Mr. President, I rise to a question of order.

The VICE PRESIDENT. The Senator from Texas will state his question of order.

Mr. SHEPPARD. Does not the submission of another proposition for unanimous consent by the Senator from Nebraska require another roll call?

The VICE PRESIDENT. The Chair thinks not. The same question is still before the Senate.

Mr. SMOOT. Mr. President, I can not see any advantage to be gained by putting the discussion off until Tuesday when we could go right along on Monday. Therefore I object to the request for unanimous consent made by the Senator from Nebraska [Mr. NORRIS].

Mr. ROOT. Mr. President, I have tried to amend the form which I suggested. It seemed to be satisfactory except in one respect, and I have amended it to meet the objection, so as to read: "That after 2 o'clock on Tuesday, the 10th instant, debate on Senate joint resolution No. 1 be limited to 15 minutes for each Senator, and that at 4 o'clock p. m. on that day the Senate vote upon the joint resolution and all amendments thereto without further debate, except under the 15-minute rule upon amendments thereafter offered."

Mr. GRONNA. Mr. President, I shall object to that. I suggest that we get the Secretary to draw a unanimous-consent agreement. I believe he could draw one which would be satisfactory to the Senate.

I have not had an opportunity to speak on the pending joint resolution, and I want at least 15 minutes. I suggest that unanimous consent be asked to take the joint resolution up for consideration at not later than 2 o'clock on Tuesday, and that no Senator shall speak more than once and not to exceed 15 minutes upon the joint resolution itself or any amendment after 2 o'clock.

Mr. LANE. I object to that, Mr. President.

Mr. LODGE. The only purpose of a unanimous-consent order is to get a vote and dispose of a pending measure. None of these requests do that, and therefore the unanimous consent, if granted, would be worthless.

Mr. CLARK of Wyoming. Oh, Mr. President, I do not agree with that. Unanimous-consent agreements are entered into for the purpose of hastening action in this body.

Mr. LODGE. This will not hasten it.

Mr. CLARK of Wyoming. I think this will hasten it very materially, because if we begin the discussion at 2 o'clock on Tuesday and every Senator thereafter is limited to 15 minutes, he will only make a 15-minute talk upon something in which he is particularly interested. There probably would be no amendments offered after that time, or, if any should be offered, they would be few, and there would not be very much time consumed in their discussion. It seems to me that something will be accomplished by this suggestion for unanimous consent.

Mr. JAMES. Mr. President, I agree with the Senator that that is true, but it seems like those who have spoken the most and who are most favorable to this joint resolution are the least anxious to have a vote on it.

Mr. KERN. Mr. President, as no agreement has been reached, and as there does not seem to be the prospect of any, I move that the Senate proceed to the consideration of executive business.

Mr. JAMES. Mr. President, I hope the Senator will withhold that suggestion until the request for unanimous consent made by the Senator who has objected is placed before the Senate. We have gotten down now to where there is a request for unanimous consent made by the Senator who objected to all the other requests for unanimous consent, and perhaps we can agree with him on a time for a vote.

Mr. KERN. I withhold my motion for the present.

Mr. GRONNA. I ask that the Secretary read the unanimous-consent agreement as proposed by myself.

The VICE PRESIDENT. Has the Senator from North Dakota a unanimous-consent agreement to propose?

Mr. GRONNA. Yes, Mr. President.

The VICE PRESIDENT. The Senator will state it.

Mr. GRONNA. I ask unanimous consent that the Senate proceed to the consideration of joint resolution No. 1 not later than 2 o'clock on Tuesday next, and that after 2 o'clock on that day no Senator shall speak more than once nor more than 15 minutes upon the joint resolution itself nor upon any amendment that is pending or that may be offered to it.

Mr. LODGE. Mr. President, I will cheerfully agree to any request for unanimous consent that will bring the Senate to a vote at any specified time, but, personally, I do not care to agree to any request that seems to me to be meaningless. Under the rules of the Senate this joint resolution comes up at 2 o'clock on Monday, and we do not need a unanimous-consent agreement to bring it up at 2 o'clock. The suggestions made propose a limitation of the time of debate, and the only valuable thing in a unanimous-consent agreement is to fix a time when we shall vote and dispose of a pending measure. None of the proposed unanimous-consent agreements do that; and so I object.

Mr. NORRIS. Will the Senator from Massachusetts answer a question?

Mr. BRANDEGEE. I ask for the regular order, Mr. President.

Mr. CUMMINS. Regular order!

The VICE PRESIDENT. The regular order is demanded.

## COMMITTEE SERVICE.

Mr. KERN. I present a letter from the junior Senator from Arizona [Mr. ASHURST], which I ask may be read.

The Secretary read as follows:

UNITED STATES SENATE,
*Washington, D. C., March 6, 1914.*

To the PRESIDENT OF THE UNITED STATES SENATE:

I hereby tender my resignation as chairman of the Senate Committee on Industrial Expositions.

Respectfully,

HENRY F. ASHURST,
*United States Senator.*

The VICE PRESIDENT. The resignation of the Senator from Arizona is accepted.

Mr. KERN. I present a letter from the senior Senator from New Jersey [Mr. MARTINE], which I ask may be read.

The Secretary read as follows:

UNITED STATES SENATE,
*Washington D. C., March 6, 1914.*

To the PRESIDENT OF THE UNITED STATES SENATE:

I herewith tender my resignation as chairman of the Senate Committee on Coast Defenses.

Sincerely,

JAMES E. MARTINE.

The VICE PRESIDENT. The resignation of the Senator from New Jersey is accepted.

Mr. KERN. I present a letter from the junior Senator from Maryland [Mr. LEE], which I ask may be read.

The Secretary read as follows:

SENATE CHAMBER, *February 6, 1914.*

Hon. THOMAS R. MARSHALL,
*President of the Senate.*

DEAR SIR: I hereby tender my resignation as chairman of the Committee on Expenditures in the Post Office Department.

Respectfully, yours,

BLAIR LEE.

The VICE PRESIDENT. The resignation of the Senator from Maryland is accepted.

Mr. KERN. I present a letter from the senior Senator from Missouri [Mr. STONE], which I ask may be read.

The Secretary read as follows:

UNITED STATES SENATE CHAMBER.
*Washington.*

To the PRESIDENT OF THE SENATE:

I desire to hereby tender my resignation as chairman of the Senate Committee on Indian Affairs.

Respectfully,

WILLIAM J. STONE.

The VICE PRESIDENT. The resignation of the Senator from Missouri is accepted.

On motion of Mr. KERN it was

*Ordered*, That HENRY F. ASHURST, a Senator from Arizona, is hereby designated and appointed chairman of the Committee on Indian Affairs to fill the vacancy occasioned by the resignation of Senator STONE, of Missouri;

That JAMES E. MARTINE, a Senator from New Jersey, is hereby designated and appointed chairman of the Committee on Industrial Expositions to fill the vacancy occasioned by the resignation of Senator ASHURST, of Arizona;

That BLAIR LEE, a Senator from Maryland, is hereby designated and appointed chairman of the Committee on Coast Defenses to fill the vacancy occasioned by the resignation of Senator MARTINE, of New Jersey; and

That WILLIAM STANLEY WEST, a Senator from Georgia, is hereby designated and appointed chairman of the Committee on Expenditures in the Post Office Department to fill the vacancy occasioned by the resignation of Senator LEE, of Maryland.

## PURCHASE OF MONTICELLO.

Mr. REED. Out of order I introduce a joint resolution, which I ask to have printed in the RECORD and referred to the Committee on Public Buildings and Grounds.

The joint resolution (S. J. Res. 120) creating a joint committee of Congress and authorizing said committee to acquire by purchase or condemnation the property known as Monticello, and embracing the former home of Thomas Jefferson, and the family graveyard in which his remains were interred, with such lands and grounds appurtenant thereto as the committee shall find necessary in order to carry out the various public objects

and purposes in said resolution set forth, all of said property being located in Albemarle County, Va., was read twice by its title, referred to the Committee on Public Buildings and Grounds, and ordered to be printed in the RECORD, as follows:

Joint resolution (S. J. Res. 120) creating a joint committee of Congress, and authorizing said committee to acquire, by purchase or condemnation, the property known as Monticello, and embracing the former home of Thomas Jefferson and the family graveyard in which his remains were interred, with such lands and grounds appurtenant thereto as the committee shall find necessary in order to carry out the various public objects and purposes in said resolution set forth, all of said property being located in Albemarle County, Va.

Whereas the Senate and House of Delegates of the State of Virginia have passed the following resolutions:

"Joint resolution memorializing Congress to acquire Monticello, the home of Thomas Jefferson.

"Whereas Monticello, the home of the immortal Thomas Jefferson, is now private property, and the public has no right of access thereto; and

"Whereas the buildings were placed, the grounds laid out, and the work of construction carried on under the presiding genius of that great statesman, thus in itself forming a fitting memorial to his greatness; and

"Whereas in the shadows of its walls lie the earthly remains of him who was the author of the Declaration of Independence, of the statute for religious freedom in Virginia, and father of the University of Virginia; and

"Whereas by the side of the great leader rest the remains of three other great Virginians—Dabney Carr, the member of the Virginia House of Burgesses, whose resolutions established the Committees of Correspondence between the sister colonies; William Cary Nichols, governor of Virginia and friend of Thomas Jefferson; and Thomas Mann Randolph, governor of Virginia and son-in-law of Thomas Jefferson; and

"Whereas his wife, his children, and his grandchildren to the fifth generation rest by his side on the lonely mountain which he loved so well; and none but his descendants have the legal right to enter the shrine, where all lovers of popular government would gladly repair to pay a tribute of love and devotion and to seek from the works which he wrought the inspiration of his wonderful life; and

"Whereas his services as governor of Virginia, as minister to France, Secretary of State, and President of the United States, together with his political genius shown in the foundation of our Government and shaping her destiny, has made him the patron saint of all parties and his home the mecca of all lovers of liberty in thought and action: Now, therefore, be it

*"Resolved by the house of delegates (the senate concurring)*—

"1. That the General Assembly of Virginia does hereby memorialize the Congress of the United States, now in session in the city of Washington, to acquire Monticello, the home of Thomas Jefferson, to be held in trust for all the people of the Nation.

"2. That the general assembly does hereby request the Senators and Members of the House of Representatives in Congress from Virginia to use all legitimate means to accomplish this end.

"3. That a copy of these resolutions be forwarded to the President of the Senate, the Speaker of the House, and to each of the Representatives from Virginia in the Senate and in the House of Representatives.

"Agreed to by house of delegates, February 11, 1914.

"JOHN W. WILLIAMS,
*"Clerk House of Delegates.*

"Agreed to by the senate, February 16, 1914.

"O. V. HANGER,
*"Clerk of the Senate."*

And

Whereas hundreds of thousands of patriotic American citizens have petitioned Congress to the same effect: Now, therefore, for the reasons aforesaid, and for the reasons hereinafter set forth, be it

*Resolved, etc.*, That there is hereby created a joint committee of Congress, to consist of six members, three of whom shall be Members of the Senate, to be appointed by the President of the Senate, and three of whom shall be Members of the House of Representatives, to be appointed by the Speaker of the House of Representatives. The six persons so named shall constitute a joint committee of Congress, and shall be known as the Monticello purchase or condemnation committee.

SEC. 2. That the members of said committee shall continue to hold the positions aforesaid until the objects and purposes of this resolution have been accomplished, or until their successor or successors are appointed and qualified: *Provided*, That the term of any member shall cease at the termination of his term of office as a Member of Congress, at which time a successor may be appointed by the President of the Senate or Speaker of the House of Representatives, as provided in section 1 hereof. Any member of said committee may be removed by a vote of the branch of Congress of which he is a Member. They shall serve without salary or other compensation, but in lieu of subsistence while absent from the city of Washington or their usual places of abode and engaged in the business of the committee they shall be paid $5 per day and their ordinary traveling expenses.

SEC. 3. That the committee shall at once proceed to negotiate with the owner or owners of the property hereinafter described for the purchase of the same for and on behalf of the Government of the United States of America. If said committee shall receive from the owner or owners of said properties within 30 days after this act shall become a law a proposition in writing to sell said properties to the United States Government at a price which to said committee seems just and reasonable, and said price is further approved by the President of the United States, as in his opinion just and reasonable, then said committee is authorized to purchase said properties and to draw a warrant against the Treasurer of the United States in favor of said owner or owners for the said purchase price; and it is hereby made the duty of the Treasurer to pay the same: *Provided*, That in no event shall the price paid exceed the unexpended portion of the amount hereinafter appropriated.

SEC. 4. That if the owner or owners of said properties shall not within the period of 30 days aforesaid propose to sell said property upon terms deemed by said committee and the President to be just and reasonable, as aforesaid, or shall fail to convey the same with title satisfactory to the committee, then said committee is authorized to notify the Attorney General of the United States of such refusal or failure, and thereupon it shall become the duty of the Attorney General to bring and prosecute in the name of the United States of America proceedings to condemn and take such property, or such part thereof as may be designated by the committee, for the following public uses, namely: To create a public park for the convenience and use of the people of the United States; to preserve the historic mansion house which was erected by and occupied as the home of Thomas Jefferson, author of the Declaration of American Independence, of the statute of Virginia for religious freedom, and father of the University of Virginia; to afford a suitable site on which shall be hereafter erected a monument to his memory, which shall bear appropriate tablets and inscriptions reciting and permanently preserving a concise record of the services rendered by him to the American people and the cause of human liberty; to protect and adorn the grave in which reposes his immortal dust. Said mansion house shall be preserved, and, together with such other buildings as may hereafter be erected upon said grounds, shall be used as a repository in which shall be kept original manuscripts and writings of Thomas Jefferson, especially those connected with his public acts and the public history of the times in which he lived, with such other valuable public and historic documents as the committee shall deem proper. There shall also be collected and conserved in said mansion house and buildings the relics associated with his private life and public services. Said grounds, buildings, writings, and properties shall be acquired for the purposes aforesaid, and shall be kept and maintained for the public benefit, and to enhance the respect and love of the citizens of the United States for their common country, and in order that the truth of history may be preserved for the benefit of the present and future generations.

SEC. 5. That said committee shall be permanent in its character, and shall have the care and custody of said properties, and shall conserve and preserve the same, and shall perform such other duties as may from time to time be designated by Congress.

SEC. 6. That the properties so to be purchased or taken shall embrace the home and family graveyard of Thomas Jefferson, in Albemarle County, Va., together with such lands and grounds appurtenant thereto as the committee shall find necessary to the carrying out of the objects and purposes aforesaid.

SEC. 7. That if at any time during the pendency of such condemnation proceedings the committee shall be able to purchase at private sale, it may do so upon the terms and conditions aforesaid.

SEC. 8. That there is hereby appropriated for the purposes of paying the expenses of said committee and the purchase price, and the expenses incurred in acquiring said properties, either at private sale or by condemnation, the sum of $500,000, or so much thereof as may be necessary, out of any moneys in the hands of the Treasurer not otherwise appropriated.

EXECUTIVE SESSION.

Mr. KERN. I renew my motion that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 25 minutes spent in executive session the doors were reopened, and (at 5 o'clock and 55 minutes p. m.) the Senate adjourned until Monday, March 9, 1914, at 12 o'clock meridian.

Joseph E. Downs to be postmaster at Islip, N. Y., in place of Edgar S. Cloch. Incumbent's commission expires March 11, 1914.

Herbert W. Rackett to be postmaster at Greenport, N. Y., in place of Joseph Ogie. Incumbent's commission expired February 25, 1914.

H. S. Ransom to be postmaster at Ransomville, N. Y., in place of George F. Monahan. Incumbent's commission expired December 21, 1913.

Robert E. L. Reynolds to be postmaster at Amsterdam, N. Y., in place of Thomas Liddle. Incumbent's commission expired December 20, 1913.

Verne Seeber to be postmaster at South Dayton, N. Y., in place of Nathan L. Rowe. Incumbent's commission expired December 21, 1913.

Lee Van Vredenburgh to be postmaster at Rhinebeck, N. Y., in place of Charles E. McCarty. Incumbent's commission expired February 21, 1914.

John E. Walker to be postmaster at Philmont, N. Y., in place of Dean Best. Incumbent's commission expired February 8, 1914.

Samuel N. Wheeler to be postmaster at Hancock, N. Y., in place of George Realy. Incumbent's commission expires March 30, 1914.

NORTH CAROLINA.

Lula F. Bland to be postmaster at Pittsboro, N. C. Office became presidential January 1, 1914.

William C. Blanton to be postmaster at Forest City, N. C., in place of M. M. McCurry. Incumbent's commission expired February 15, 1914.

Samuel Y. Bryson to be postmaster at Hendersonville, N. C., in place of Brownlow Jackson. Incumbent's commission expired February 24, 1914.

Luther B. Carr to be postmaster at Wallace, N. C., in place of Robert B. Colwell. Incumbent's commission expires March 24, 1914.

John K. Cline to be postmaster at Lincolnton, N. C., in place of D. L. Yount. Incumbent's commission expires March 24, 1914.

Hamilton Erwin to be postmaster at Morganton, N. C., in place of Charles F. McKesson. Incumbent's commission expires March 16, 1914.

Owen Gudger to be postmaster at Asheville, N. C., in place of Wallace W. Rollins. Incumbent's commission expires March 7, 1914.

Vernon G. Pleasants to be postmaster at Rowland, N. C., in place of Hayes S. Smith. Incumbent's commission expires March 24, 1914.

W. D. Templeton to be postmaster at Mooresville, N. C., in place of Alonzo C. Kerby. Incumbent's commission expires March 7, 1914.

E. S. Yarbrough to be postmaster at Duke, N. C., in place of Felix M. Kay. Incumbent's commission expired February 25, 1914.

NORTH DAKOTA.

John H. Bloom to be postmaster at Devils Lake, N. Dak., in place of Richard Dacley. Incumbent's commission expires March 11, 1914.

Joseph G. Senger to be postmaster at Harvey, N. Dak., in place of Chester A. Revell. Incumbent's commission expires March 8, 1914.

Robert E. Wessel to be postmaster at Oakes, N. Dak., in place of William H. Bush. Incumbent's commission expired January 6, 1914.

OHIO.

Richard D. Brown to be postmaster at Pataskala, Ohio, in place of Clarence C. Fravel. Incumbent's commission expired February 24, 1914.

John T. Flynn to be postmaster at Bellaire, Ohio, in place of Orlando P. Mason. Incumbent's commission expired February 24, 1914.

Charles L. Hunter to be postmaster at St. Marys, Ohio, in place of John A. Anderson, resigned.

Orrin E. Jones to be postmaster at West Salem, Ohio, in place of W. W. Garver. Incumbent's commission expires March 15, 1914.

Joseph L. Riesser to be postmaster at Ripley, Ohio, in place of Sarah E. Maddox. Incumbent's commission expired February 9, 1914.

Philip Wetzel to be postmaster at Perrysburg, Ohio, in place of Fred Yeager. Incumbent's commission expires March 15, 1914.

OKLAHOMA.

M. E. Dillake to be postmaster at Quinton, Okla., in place of Maud C. White, resigned.

Laura Houston to be postmaster at Woodward, Okla., in place of Sherman M. Smith. Incumbent's commission expired February 16, 1914.

James W. Smith to be postmaster at Grandfield, Okla., in place of Andrew D. Chapman. Incumbent's commission expires March 10, 1914.

W. J. Strange to be postmaster at Chelsea, Okla., in place of J. R. Sequichie, resigned.

OREGON.

Paul C. Belt to be postmaster at Willamina, Oreg. Office became presidential January 1, 1914.

M. M. Fitch to be postmaster at Sherwood, Oreg., in place of Lawrence S. McConnell. Incumbent's commission expired January 12, 1914.

C. W. Holloman to be postmaster at Haines, Oreg. Office became presidential January 1, 1914.

Victor P. Moses to be postmaster at Corvallis, Oreg., in place of Burtis W. Johnson. Incumbent's commission expired February 18, 1914.

Archie Parker to be postmaster at Monmouth, Oreg., in place of O. A. Wolverton. Incumbent's commission expired February 7, 1914.

Russell H. Sullens to be postmaster at Prairie City, Oreg., in place of D. B. Davidson, resigned.

J. H. Young to be postmaster at Hermiston, Oreg., in place of John H. Williams. Incumbent's commission expired January 19, 1914.

PENNSYLVANIA.

David Burke to be postmaster at Bangor, Pa., in place of R. F. Schaeffer, resigned.

Thomas N. Burke to be postmaster at Mount Carmel, Pa., in place of Thomas R. Williams. Incumbent's commission expired January 28, 1914.

John A. Coonahan to be postmaster at Ogontz, Pa., in place of William H. Michener. Incumbent's commission expires March 30, 1914.

Charles S. Duncan to be postmaster at Gettysburg, Pa., in place of C. W. Beales. Incumbent's commission expired March 5, 1914.

Simon P. Geisel to be postmaster at Hooversville, Pa., in place of Fred G. Fryburg. Incumbent's commission expired February 24, 1914.

John K. Gorman to be postmaster at Coalport, Pa. Office became presidential January 1, 1914.

Alonzo W. Jones to be postmaster at Mount Union, Pa., in place of I. Newton Taylor. Incumbent's commission expires March 7, 1914.

W. R. Speer to be postmaster at Everett, Pa., in place of John C. Chamberlain. Incumbent's commission expired January 27, 1914.

Annie H. Washburn to be postmaster at Wyncote, Pa., in place of Annie H. Washburn. Incumbent's commission expired January 6, 1914.

PORTO RICO.

Fernando Callejo to be postmaster at Manati, P. R., in place of Fernando Callejo. Incumbent's commission expired December 21, 1913.

Manuel S. Pacheco to be postmaster at Fajardo, P. R., in place of Manuel S. Pacheco. Incumbent's commission expired December 21, 1913.

RHODE ISLAND.

Alonzo A. Greenman to be postmaster at Kingston, R. I. Office became presidential January 1, 1914.

Daniel G. Coggeshall to be postmaster at Bristol, R. I., in place of Edward J. Prest. Incumbent's commission expired February 9, 1914.

SOUTH DAKOTA.

N. C. Andrews to be postmaster at Irene, S. Dak. Office became presidential January 1, 1914.

William S. Small to be postmaster at Gettysburg, S. Dak., in place of William Toomey, resigned.

TENNESSEE.

M. B. Capps to be postmaster at Livingston, Tenn., in place of Timothy F. Stephens. Incumbent's commission expired January 11, 1914.

I. S. Davidson to be postmaster at Petersburg, Tenn. Office became presidential January 1, 1914.

W. H. Howard to be postmaster at Milan, Tenn., in place of A. D. Holt. Incumbent's commission expired February 21, 1914.

TEXAS.

Clinton Bybee to be postmaster at Willis, Tex. Office became presidential January 1, 1914.

Thomas W. Cain to be postmaster at Bastrop, Tex., in place place of George Realy. Incumbent's commission expires March ary 18, 1914.

F. W. Easterwood to be postmaster at Hearne, Tex., in place of C. J. Hostrasser. Incumbent's commission expires March 18, 1914.

F. P. Henry to be postmaster at Floydada, Tex., in place of Jesse D. Starks. Incumbent's commission expired February 8, 1914.

Archie N. Justiss to be postmaster at Corsicana, Tex., in place of H. E. Kinsloe. Incumbent's commission expired February 7, 1914.

Frank Leverton to be postmaster at Grapeland, Tex., in place of Benjamin F. Hill, resigned.

Maxey McCrary to be postmaster at Calvert, Tex., in place of James A. Gammill. Incumbent's commission expires March 18, 1914.

A. L. Melton to be postmaster at Leonard, Tex., in place of Robert C. May, resigned.

Fred R. Ridley to be postmaster at Campbell, Tex. Office became presidential January 1, 1914.

J. J. Sutton to be postmaster at Stockdale, Tex., in place of Mary A. Haskell. Incumbent's commission expires March 18, 1914.

Arthur T. Terrell to be postmaster at Eagle Pass, Tex., in place of George W. Rohleder, declined.

J. D. Williams to be postmaster at Sinton, Tex., in place of Waldo E. Haisley. Incumbent's commission expired February 8, 1914.

Joe Wren to be postmaster at Normangee, Tex. Office became presidential January 1, 1914.

UTAH.

Noble Warrum to be postmaster at Salt Lake City, Utah, in place of Arthur L. Thomas. Incumbent's commission expired March 2, 1914.

VERMONT.

Henry D. Allen to be postmaster at Wilmington, Vt., in place of Orrin H. Jones. Incumbent's commission expired February 1, 1914.

Cornelius Buckley to be postmaster at Barton, Vt., in place of C. B. Webster. Incumbent's commission expired February 9, 1913.

WASHINGTON.

George H. Bevan to be postmaster at Kettle Falls, Wash., in place of R. A. McKellar. Incumbent's commission expired February 11, 1914.

Andrew Hunter to be postmaster at Issaquah, Wash. Office became presidential January 1, 1914.

F. H. McCroskey to be postmaster at Sprague, Wash., in place of W. A. Buckley. Incumbent's commission expires March 8, 1914.

Charles A. Ramm to be postmaster at Davenport, Wash., in place of Jacob F. Hill. Incumbent's commission expired January 19, 1914.

T. T. Richardson to be postmaster at Northport, Wash., in place of William F. Case. Incumbent's commission expired February 2, 1914.

R. A. Turner to be postmaster at Ellensburg, Wash., in place of Oliver Hinman. Incumbent's commission expired January 24, 1914.

F. L. Whitney to be postmaster at Ferndale, Wash., in place of Minor McLain, removed.

WEST VIRGINIA.

Benjamin L. Brown to be postmaster at Kingwood, W. Va., in place of H. S. Whetsell, removed.

W. W. Johnson to be postmaster at Glenville, W. Va., in place of John S. Brannon. Incumbent's commission expired January 24, 1914.

William G. Keyes to be postmaster at Philippi, W. Va., in place of William A. Mason. Incumbent's commission expired March 2, 1914.

William L. Reinhart to be postmaster at Shepherdstown, W. Va., in place of Harry E. Munday. Incumbent's commission expired February 3, 1914.

Burton B. Rohrbough to be postmaster at Belington, W. Va., in place of J. W. Criss. Incumbent's commission expired March 2, 1914.

WISCONSIN.

J. D. O'Brien to be postmaster at Randolph, Wis., in place of Hugh H. Williams. Incumbent's commission expired February 21, 1914.

Jeremiah J. Cunningham to be postmaster at Janesville, Wis., in place of Charles L. Valentine. Incumbent's commission expired February 21, 1914.

Samuel P. Godfrey to be postmaster at Waupaca, Wis., in place of A. M. Penny, resigned.

Edward Schroeder to be postmaster at Granton, Wis., in place of John M. Tompkins. Incumbent's commission expired February 1, 1914.

James C. Thomas to be postmaster at Poynette, Wis., in place of P. W. Mackenzie. Incumbent's commission expired February 22, 1914.

WYOMING.

James B. Delaney to be postmaster at Saratoga, Wyo., in place of Joseph Munz, resigned.

A. N. Hasenkamp to be postmaster at Laramie, Wyo., in place of Elmer T. Beltz. Incumbent's commission expires March 16, 1914.

## CONFIRMATIONS.

*Executive nominations confirmed by the Senate March 6, 1914.*

POSTMASTERS.

ALABAMA.

Lewis J. Lawson, Greensboro.

CONNECTICUT.

Hugh W. Cronin, Torrington.

IOWA.

Robert C. Plummer, Forest City.

NEW YORK.

William E. Kelley, Brooklyn.

OHIO.

John M. Francis, Cadiz.

UTAH.

William W. Le Cheminant, Garfield.

WEST VIRGINIA.

Maurice E. Wentzell, Harpers Ferry.

## HOUSE OF REPRESENTATIVES.

### FRIDAY, *March 6, 1914.*

The House met at 11 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

We thank Thee, our Father in heaven, for the wisdom which gave us the adage, "Trust in God, but keep your powder dry," which is not only good philosophy, good sense, but good religion. May we trust in Thee and keep a clear head; trust in Thee and keep a clean heart; trust in Thee and be diligent; trust in Thee and do our duty; trust in Thee and be coworkers together with Thee in the establishment of Thy kingdom upon the earth under the spiritual leadership of the Captain of our salvation. Amen.

The Journal of the proceedings of yesterday was read and approved.

ORDER OF BUSINESS.

Mr. POU and Mr. LEVER rose.

The SPEAKER. The gentleman from North Carolina and the gentleman from South Carolina. [Laughter.]

Mr. POU. Mr. Speaker, I move that the House resolve itself into Committee of the Whole to consider bills on the Private Calendar.

Mr. LEVER. Mr. Speaker, I offer a preferential motion, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 13679, the Agricultural appropriation bill.

Mr. POU. Mr. Speaker, I do not understand that the gentleman from South Carolina is recognized, and my motion is pending. But if he is recognized, I make the point of order that his motion is not in order, and upon that I ask to be heard for a very few minutes.

The SPEAKER. The Chair will hear the gentleman. The Chair will suggest to the gentleman that if the House desires to go into Committee of the Whole on the Private Calendar, this is a day which belongs to the Committee on War Claims.

Mr. POU. Upon that point I would like to be heard, also. I respectfully differ with the Speaker.

The SPEAKER. The Chair stated that by way of suggestion.

Mr. LEVER. Mr. Speaker, I make the point of order that this is not claims day or war-claims day.

Mr. POU. I wish to address myself briefly, Mr. Speaker, to this question. Of course I know what the custom of the House

has been with respect to this day. In the first place, I submit that this Friday is not the day for the consideration of bills reported by the Committee on War Claims.

The SPEAKER. How does the gentleman make that out?

Mr. POU. I was about to state. For this reason: On the third Friday in the last month the House went into Committee of the Whole to consider the Private Calendar, giving preference to bills from the Committee on Claims. After the third Friday came the fourth Friday, which, of course, belongs to pensions. Then came the fifth Friday, and under this rule that belonged to the Committee on War Claims.

The SPEAKER. There were only four Fridays in February.

Mr. POU. The Speaker is right, there was not a fifth Friday in the last month; but I know that this is true: There has been a Friday since the Committee on Claims was given consideration by the House, to which the Committee on War Claims was entitled, because I talked with the chairman of that committee, the gentleman from Texas [Mr. GREGG], and he said that he expected to get a part of the day. That being the case, this is the alternative Friday which would belong to the Committee on Claims, provided the House agreed to this motion.

The SPEAKER. The Committee on Claims had the last Friday.

Mr. POU. No; the last Friday, barring the second and fourth, belonged to the Committee on War Claims.

The SPEAKER. The last Friday that we considered claims the Committee on Claims had it.

Mr. POU. That is true; but there has been since then a Friday which properly belonged, under the rules, to the Committee on War Claims.

The SPEAKER. The Chair will ask the gentleman if in such a case as occurred then and the House took Friday away from the Claims Committee, if that is not practically no Friday at all?

Mr. POU. No; I think not. I think this rule contemplates that one Friday shall belong to the Committee on Claims and the next to the Committee on War Claims. I do not think the rule means that if the Claims Committee gets in on a certain day that then the Claims Committee must be shut out until the Committee on War Claims has an opportunity to have its bills considered. It is my duty to be here to do all I can to secure consideration of bills from the committee of which I am chairman. It is the duty of the chairman of the Committee on War Claims to be present on the Friday to which his committee is entitled and have his bills considered. This, I understand, he attempted.

The SPEAKER. The chairman of the Committee on War Claims was here and doing all he could to get in, except that he did not make the motion on the floor. He came to the Chair and asked about it, and the Chair told him he was going to recognize the chairman of the Committee on Appropriations to make a motion to go into Committee of the Whole House on the state of the Union to consider appropriation bills, and would not recognize him, but the Chair would recognize him to-day if he was here, unless the House went into Committee of the Whole House on appropriation bills.

Mr. POU. Mr. Speaker, in any event, I make the point of order that the motion of the gentleman from South Carolina is not in order. If this rule means anything, it means that Friday of each week, barring the second and fourth, shall be set apart for consideration of certain business. It seems to me that in view of the plain reading of this rule the Speaker should hold that the preferential motion should come from the Committee on Claims or the Committee on War Claims. The rule says:

> On Friday of each week, after the disposal of such business on the Speaker's table as requires reference only, it shall be in order to entertain a motion for the House to resolve itself into Committee of the Whole House to consider business on the Private Calendar—

And so forth.

The rule says plainly that on a certain day the House shall give preference to certain business. This rule does not mean that the Committee on War Claims or the Committee on Claims or the Committee on Pensions can be shut out at will by the chairman of some great committee. If the rule meant that, the Committee on War Claims, the Committee on Claims, the Committee on Pensions had better go in advance and appeal to the chairman of the Committee on Appropriations and the chairmen of the other great committees and ask them whether it is their sweet will that we shall have an opportunity to get in on these particular days. I say that if the rule means anything at all, it means that on these particular days the Committee on War Claims, the Committee on Claims, and the Committee on Pensions shall have the preferential right to make the motion to go into Committee of the Whole. The Committee on Claims has 35 bills on this calendar. We have probably 15 other bills ready to be placed on the calendar. What is to become of them? I think I know, if this sort of procedure is maintained. We will have a rule brought in probably giving some night to the consideration of these bills. Then what is going to happen? Whatever we can get through by unanimous consent will go through, and bills to which any Member objects will not go through, and we will be subject to the will of anyone who wants to make the point of no quorum.

I believe that the membership of this House wants these committees to have consideration for bills reported by them on the days set apart by this rule, and I do not believe that under a proper construction of the rule the motion of the gentleman from South Carolina [Mr. LEVER] is in order. On every day set apart, under the rule, for consideration of bills reported by the Committee on Claims I am going to be here and do what I can under the rules to secure consideration of these measures. The membership of this House that voted for this rule, the committee that framed the rule, did not intend that a set of men should be working diligently day after day to put bills on the calendar and then see the result of all their labor nullified at the sweet will of some gentleman who happens to be at the head of one of these great appropriation committees. If this rule has been so construed in the past, I maintain that the time has come to change it, and there is no better time to do that than right here and now.

Mr. MANN. Mr. Speaker, clause 6 of Rule XXIV, to which the gentleman refers, provides:

> On Friday of each week, after the disposal of such business on the Speaker's table as requires reference only, it shall be in order to entertain a motion for the House to resolve itself into Committee of the Whole House to consider business on the Private Calendar in the following order:

The gentleman insists that this shuts out the motion of the gentleman from South Carolina to go into Committee of the Whole House on the state of the Union, but clause 9 of Rule XVI provides:

> At any time after the reading of the Journal it shall be in order, by direction of the appropriate committees, to move that the House resolve itself into the Committee of the Whole House on the state of the Union for the purpose of considering bills raising revenue or general appropriation bills.

So that both motions are in order. The fact that the Private Calendar is in order on Friday does not shut out the other rule. The other motion is also in order. The rules have been frequently construed, and this memorandum follows the Private Calendar rule:

> This rule does not interfere with the highly privileged motion to go into the Committee of the Whole House on the state of the Union to consider revenue or appropriation bills, which may be made immediately after the reading of the Journal on Fridays as on others days, and at any time of the day has precedence of the motion to go into the Committee of the Whole House to consider the Private Calendar.

I think that disposes of the gentleman's contention as to his point of order that the motion of the gentleman from South Carolina [Mr. LEVER] is not in order.

If we should go into Committee of the Whole for the consideration of bills on the Private Calendar, the gentleman from North Carolina insists that the claims bills would have precedence. The last day that was devoted to the Private Calendar outside of pensions was devoted to claims. The rule provides that except on the second and fourth Fridays the House shall give preference to the consideration of bills reported from the Committee on Claims and the Committee on War Claims, alternating between the two committees; and the gentleman from North Carolina claims that this means alternating Fridays, although that is not the language of the rule. This rule has been frequently construed, and the memorandum or note made by the parliamentarian under the rule provides:

> When the House, by special order, devotes Friday entirely to business other than private business the special rules governing the use of the day are thereby suspended.

The alternating is between the committees and not between the Fridays. As a matter of fact, at this session of Congress war claims has had no day whatever. We considered the war-claims bill on claims day, because while the Claims Committee took precedence on that day it had no bills on the calendar. That was the first Friday of this session of Congress, December 5. The House resolved itself into the Committee of the Whole House for the consideration of bills on the Private Calendar, and the Claims Committee came first. It took precedence, but having no bills on the calendar we proceeded with the consideration of the omnibus war claims bill, but that day, theoretically, was devoted to the Committee on Claims which had precedence. Subsequently we have taken up again the Claims Calendar, considering by general consent, I take it, that the war claims having actually called up a bill on a day devoted to the Claims Committee it should be so treated. But the Committee on Claims in any event under no construction

of the rule would be entitled to this day as against the War Claims Committee.

Mr. LEVER rose.

The SPEAKER. The Chair does not care to hear further argument on these points of order. The Chair is prepared to rule. There is not a more vigilant Member of the House than the gentleman from North Carolina [Mr. POU]. [Applause.] He attends to his business, and he is always on hand when the time is propitious, and sometimes when it is not propitious, to get up his bills. But this is the parliamentary situaton: In the first place, some of these rules need recasting to make them harmonious with each other. For instance, one rule provides that a report from the Committee on Rules is always in order, while the rule which the gentleman from Illinois [Mr. MANN] quoted, section 9 of Rule XVI, provides that at any time after the reading of the Journal it shall be in order, by direction of the appropriate committees, to move that the House resolve itself into the Committee of the Whole House on the state of the Union for the purpose of considering bills raising revenue or general appropriation bills. At first blush it would seem that those rules were in direct conflict with each other, and in one sense they are.

Suppose the chairman of the Committee on Rules were here demanding recognition to bring in a rule and the gentleman from South Carolina [Mr. LEVER] were insisting on going into the Committee of the Whole House on the state of the Union to discuss the Agricultural appropriation bill, what would happen? All of these rules must be considered together, to make, if possible, a consistent whole, and they must be considered in the light of common sense. In addition to that, the Speaker is under moral obligation to construe them so as to expedite the business of the House. There are 14 general appropriation bills. The Government can not exist unless the Committees on Appropriations in Congress, under its leaders, perform their functions, and it is the business of the Speaker to expedite the passage of these bills where he can under the rules so that we may be able to get away from here before the frost comes.

Originally private claims did not have any more standing than any other bills, but had to come up under the usual procedure. Finally, the House determined to set aside certain Fridays in order that preference might be given to consideration of claims bills over the ordinary run of business; but that was not to give consideration of those matters preference over a motion of an Appropriation Committee that the House resolve itself into the Committee of the Whole House on the state of the Union for the purpose of considering an appropriation bill, which is of the highest importance.

It has been ruled on—and the Chair wants to settle this thing for all time to come if he can—by three different Speakers; that is, by two Speakers and one Speaker pro tempore—Speaker Reed, Speaker Henderson, and the Hon. John Dalzell, Speaker pro tempore. Now, here is Mr. Speaker Reed's ruling (Hinds' Precedents, volume 4, section 3082):

> The motion to go into the Committee of the Whole to consider general appropriation bills has precedence on a Friday of a motion to go into the Committee of the Whole to consider the Private Calendar. On Friday, February 4, 1898, Mr. James A. Hemenway, of Indiana, from the Committee on Appropriations, moved that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of a general appropriation bill. Mr. Joseph W. Bailey, of Texas, made the point that the motion to go into the Committee of the Whole to consider business on the Private Calendar was of higher privilege than the motion made by Mr. Hemenway. The Speaker said that it had been the invariable construction of the rule that public business had the right of way.

Now, that is the crux of the whole thing. Continuing, Speaker Reed said:

> If the House did not desire to consider appropriation bills, it could vote down the motion of the gentleman from Indiana, and then the motion to go into the Committee of the Whole to consider the Private Calendar would be next in order.

The other two decisions are to the same effect.

The Chair recognizes the gentleman from South Carolina, to go into the Committee of the Whole House on the state of the Union to consider a general appropriation bill.

Now, the House has its remedy. It can do as it pleases. I will give an illustration. A couple of years ago the gentleman from New York, Mr. Sulzer, reported the Diplomatic and Consular appropriation bill, and about five minutes after that Capt. Lamb, of Virginia, reported the Agricultural appropriation bill, and the gentleman from New York was very solicitous to get in first, and he came in the Speaker's room and asked me to recognize him. I said to him, "They will not consider your bill; they will consider the Agricultural bill." He wanted to be recognized anyhow. I said, "They will vote you down 10 to 1." So he was sitting where Judge HOUSTON is, on a front seat, and made his motion and I recognized him. Capt. Lamb was back where the gentleman from South Carolina sits, motioning with his fingers, trying to make the motion to go into the Committee of the Whole House on the state of the Union on the Agricultural bill. I said we could not have two motions of that sort pending at once. He asked me what would be done if the motion of the gentleman from New York was voted down? I said I would recognize him to make his motion. They voted the gentleman from New York down, about 10 to 1, because there were at least 10 men in the House interested in the Agricultural bill to 1 interested in the Diplomatic and Consular bill. [Laughter.] So the House can always do as it pleases. Now, on the other point, about which one of these two committees on claims is entitled to this day, if the gentleman from South Carolina was not interfering, it would be the War Claims Committee. It is not Fridays, as the gentleman from Illinois [Mr. MANN] suggested, that alternate, but the committees. The last time either one of these committees had a Friday it was the Committee on Claims, the committee of the gentleman from North Carolina [Mr. POU]; and, as I stated in an interlocutory way a little while ago, the chairman of the Committee on War Claims [Mr. GREGG] was here and was very anxious to get in, and asked me if I would recognize him, and I told him I would recognize the chairman of the Committee on Appropriations. So next Friday, if the House sustains the Speaker in this matter, the Committee on War Claims will have the right of way unless a privileged matter is called up.

Mr. POU. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. POU. Unless this rule is changed, why, the Committee on Pensions could be displaced if any chairman of one of the great appropriating committees made a motion to go into the Committee of the Whole House, just as the Committee on War Claims and the Committee on Claims.

The SPEAKER. Just exactly; no earthly difference between them.

Mr. LEVER. If the Chair will indulge me for a moment, I desire to say I have no wish to displace the Private Calendar to-day, except for the reason that all of us agree that we must pass these appropriation bills if we are to get away from this Congress at all, and hence my motion this morning.

Mr. POU. I will ask the gentleman from South Carolina if he does not think it is an important matter to look after the pensions of the old soldiers, and does he not think claims are entitled to some consideration from the House also? Is not that public business also?

Mr. LEVER. Oh, yes.

The SPEAKER. If that condition arises and the House wants to consider pensions next Friday, or claims, it can say so.

AGRICULTURAL APPROPRIATION BILL.

The SPEAKER. The question is on the motion of the gentleman from South Carolina that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the Agricultural appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 13679, the Agricultural appropriation bill, with Mr. HAMLIN in the chair.

The CHAIRMAN. The House is in the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 13679, which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 13679) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1915.

Mr. LEVER. Mr. Chairman, I desire to consume just a moment in my own time.

The coincidences of life are always interesting. Gentlemen of the committee will remember that on the morning of March 3 in opening my remarks I made this statement:

> Mr. Chairman, at breakfast this morning I happened to overhear a remark made by one of those two-by-four know-it-alls which set me thinking. It was this: "No class of people in this country except the farmer and the criminal can get any money from the Federal Government for any purpose." Continuing, he said, "Do you know that there are appropriated $50,000,000 a year for the farmers of this country?"

I was very much interested and amused this morning to receive a letter, which I desire to read to the committee, without including the name of the writer. It is as follows:

COSMOS CLUB,
*Washington, D. C.*

Hon. A. F. LEVER, M. C., *Washington, D. C.*

DEAR SIR: On Tuesday morning, March 3, 1914, I had the (unconscious) privilege of breakfasting with you, neither of us at the time being aware of the fact.

Later in the same day upon casually straying into the House of Representatives I was somewhat astonished to hear resounding through the room your words, repeating some of mine, uttered, however, thoughtlessly:

"At breakfast this morning I happened to overhear a remark made by one of those two-by-four know-it-alls which set me thinking. It was

this: 'No class of people can get any money from the Government except the farmer and the criminal.' Continuing, he said: 'Do you know that there are appropriated every year for the farmers of this country,'" etc.

I commend, sir, to your attention the coincidence which allowed you to hear these words of mine, which, however "grossly ignorant," nevertheless "set you thinking," and my subsequent hearing of your own words of corrective statistics on the floor of the House.

I sincerely thank you for your remarks on my personal appearance, which is of small importance, but they did not coincide with the descriptive adjectives in your opening remarks. May I say that you estimated me wrongly; I am 2½ by 5¾, not 2 by 4.

In some seriousness, my remark I believe reflects, at any rate, the well-founded opinion of millions of my class, that much of the money appropriated by the Congress is wasted. The appropriations are increasing, and so is the adverse opinion. We know little of the details of the disbursements, because few Congressmen make speeches as clearly explanatory as your own, but we do know of the useless, free-seed "graft," the abuse of the franking privilege, and many other similar extravagances, and unfortunately these cause more adverse comment than is offset by the real use of certain departments, as that of agriculture.

I ask your pardon for addressing you thus, but believe that you may find the recital of our little coincidence amusing, which it certainly was to me.

I commend to you again, in real earnest, the desirability of catering somewhat to us "two-by-fours," for we are legion in number, and really show signs of restlessness when we see you chaps in Congress spending our money too freely.

Very sincerely, yours, ———— ————.

MARCH 5, 1914.

He signs his name, and them adds this postscript:

I will be at the Shoreham until Saturday night, and if you desire to challenge me to a "dewell," or would honor me by lunching with me, I should be gratified. I assure you that you would be taking no more chance than I.

[Laughter and applause.]

Mr. Chairman, I yield 20 minutes to the gentleman from Iowa [Mr. CONNOLLY].

Mr. CONNOLLY of Iowa. Mr. Chairman, the consideration of this bill accentuates the friendly interest of this Democratic House and its earnest disposition to cooperate with that great producing class represented by the farmer. [Applause.]

The years roll on and with them rolls up in impressive and gigantic volume the population of the United States. The ratio of increase in our consuming population has not been paralleled by our producing population. With the travel of time the volume of our manufactures grows in leaps and bounds, advancing as a most impressive chapter in the history of our exports. With this growth of industry comes an increase in population that bears down heavily upon the resources of our farmers. It is not a great strain upon the imagination to picture the coming conflict of a great consuming demand for food supply on the one hand and the struggling array of food producers upon the other. Therefore with a capacity for consumption on the one hand levying toll upon the agricultural resources of our country, which in some items show an actual decrease in production, it is but natural and obvious that this Democratic House should address itself most seriously to the problem of farm production.

In the time allotted to me I will touch but briefly upon a few of the methods by which we are lending our help and inclining our cooperation to the interests of the agricultural classes.

FARM DEMONSTRATION WORK.

In the matter of farm demonstration work the Department of Agriculture has in a limited way sent out experts frequently in cooperation with the counties interested to devise plans and in a multiplicity of methods to demonstrate to the actual tiller of the soil.

The results in this limited way have been of such a satisfactory and encouraging nature that the Agricultural Committee recently reported out what is known as the Lever extension bill (H. R. 7951) with absolute unanimity.

For a great many years the Government has appropriated funds for investigation, laboratories, experiments, and various kinds of research, with the result that from these different channels there has accumulated a great reservoir of most valuable knowledge, data, and results. The acquisition of these results was a great asset to the Nation, but the problem developed as to a method of tapping this reservoir of knowledge gleaned, passing it through channels that would finally place it on the land of the producer, the actual tiller of the soil. The statutes under which the Government has in the past developed this knowledge was the Morrill Act of 1862, the Hatch Act of 1887, the second Morrill Act of 1890, the Adams Act of 1906, and the Nelson amendment of 1907.

As a justification for the appropriation of Government funds along agricultural lines, you can look to the experience of Europe. Let us contemplate, for instance, the history of Denmark in its application of the results of research and experiment to the problems confronting the actual laborer in the field, and this retrospection is of peculiar advantage in the light of the tendency in some of our great wheat-growing States that some years ago were producing 30 bushels to the acre and now have declined to about 13 bushels to the acre. Many years ago Denmark was at a very low ebb industrially, in its finances, in its commerce, and in its agriculture. The Danish people became thoroughly aroused and they studied their own conditions most seriously and came to a realization that the foundation of its fabric of prosperity was the soil, and so the nation began upon the fields and initiated agricultural schools and laid out agricultural extension work, but this did not suffice, and so the Government sent out throughout the land skilled experts and enlightened evangels of the soil to lead the farmer from the wilderness. These experts lived with the laborer, studied the localities, conditions, the soil, and every agricultural problem, and in a concrete way met these problems by conclusive demonstrations. At the time the percentage of the urban population greatly overshadowed the rural population, but the result of this labor at the basis of national prosperity was a great boom in agriculture, and rising up and concomitant with it went finance, industry, and commerce. As an instance of success of the Danes, compare the average yield of wheat per acre in Denmark of 40 bushels, with soil centuries older than that of the United States and perhaps not so good originally, with the average yield of wheat in the United States of 14 bushels per acre. And contrast, also, the results in the ancient soil of Germany, with its average yield of 28 bushels to the acre; in England, with 32 bushels to the acre; in Belgium, 34 bushels to the acre.

I understand that at one time in Denmark the rural population amounted to only 15 per cent of the total, whereas to-day it is almost 90 per cent. To-day in America the call is to the country, and the Democratic Party harkens to the call. We wish to place before the country the benefits of science and research.

THE BOYS' AND GIRLS' CORN, POTATO, GARDEN, AND CANNING DEMONSTRATION CLUBS.

At this point let us establish a bench mark indicating the difference between ordinary husbandry and the application of science and demonstrated methods of successful farming by introducing the results of the boys' and girls' corn, potato, garden, and canning clubs. In the culture of corn we find that a 10-year average in the United States would show a rate of 25 bushels per acre, and yet last year one of the winners in the Alabama Boys' Corn Club showed a record of 232 bushels to the acre, and as an Iowan I was proud to note that the winner of the Boys' Corn Club of the Northern and Central States was Arthur Runfit, of Reinbeck, Iowa, showing a yield of 138 bushels per acre, with a resultant profit of $133.43, and in the recent visitation of the winners of these different clubs my gratification was further stimulated by the record in the cultivation of tomatoes by Miss Friddall, of Cedar Falls, Iowa, my own district. Among the club she was first in the amount of profit and second in the volume of production, showing on the profit side over $100 per acre, and a yield of 3,403 pounds. [Applause.]

Through research, laboratory, and experiments we have acquired knowledge of incalculable value to the farmer. For instance, in the matter of soil fertility the analysis, the physical and chemical survey of soils have developed typical instances of areas that seemed almost worthless, so thorough was the depletion, and it was found that one element lacking was that of phosphorus or nitrogen, and this almost barren soil was redeemed and brought back to the proud yield of 50 bushels to the acre at a cost of about $1.50 for the requisite phosphorus or nitrogen, as the case happened to be. Then, again, there were the so-called clover sick and sour lands, forming a discouraging prospect to the owner of the soil, but analysis and survey passed over the land and scattered a mixture of ground limestone or marl, and lo! as if by magic wand, the soil produced once more. Besides, in the field of experimentation we are impressed with the beneficent results in the pure-seed grains of barley, corn, and oats and in the valuable data acquired from the study of pests, of rust, and smut.

THE LEVER BILL.

And now to meet the problem of bringing to the farmer the knowledge and accumulated results of our colleges, laboratories, experiment stations, under a Federal supervision, comes the Lever extension bill, by which this Congress provides for cooperative agriculture.

The Lever extension bill affords work through field demonstrations, laboratories, publications, and otherwise, according to a plan recently agreed upon by the Secretary of Agriculture and those land-grant colleges receiving the benefit of the first Morrill Act. The provisions of the bill will tend to eliminate the publication of effort and will secure a better coordination of effort between the Federal Department of Agriculture and the State

agencies. It is the Lever bill that brings the demonstrated methods of successful farming, the management of the farm, home economics, through the medium of the traveling expert giving his ocular demonstrations, down to the last man, the laborer in the field, the actual tiller of the soil.

Besides the regular appropriation of $10,000 to each State assenting, there are additional appropriations for each year, until at the tenth year and thereafter the total appropriation would be $3,480,000 annually. Under the table prepared by the committee it would appear that the allotment for Iowa would be $93,900.

Provision is also properly made that no payment out of the additional appropriation be made unless an equal sum has been provided by the State, county, or local authority for the maintenance of the work provided in the bill.

LEGISLATION LOOKING TO THE ERADICATION OF HOG CHOLERA.

Another piece of legislation in the interests of the farmer that attracted my attention and support is the bill passed by this Democratic House looking to the investigation and the ultimate eradication of that disease so dreaded by the Iowa farmer—the hog cholera. As in many other States, Iowa has yielded heavy tribute to this menace of the stock breeder, and it is not only proper but vitally essential that this Government should assist the swine breeder to shake off the shackles of this disease. [Applause.] It is more than a serious condition to the average breeder; it is an economic tragedy. When he contemplates the loss of his herd fattened by the production of his cornfield he becomes disheartened and is inclined to turn toward other fields of endeavor, and coupled with this tendency is the great problem of feeding our people, who depend more upon pork than on any other meat for their daily food. Thus the ravage becomes double-edged in its destructive influences.

I have a letter from Prof. Kennedy, of the Iowa State College, who writes in behalf of the Iowa swine breeders for legislation looking to the amelioration of these conditions among the breeders. He states that if there was some provision last year for the testing of the commercial serum and virus it would have saved the Iowa farmer ten to fifteen million dollars in losses from hog cholera. It would have standardized the serum, and with the proper serum good results would have been general, and with good results it would have stimulated the use of this preventive and revivify the interest in hog breeding. According to a recent report of the agricultural extension department of Iowa State College, the Iowa farmer, in the year 1913, lost more than $33,000,000 from hog cholera. The reports, which were gathered from 1,125 different men, covering every community in every county in the State, showed that cholera destroyed 2,827,907 swine, or 34.3 per cent of all the hogs in Iowa. In addition to this tremendous loss, the data shows that nearly 2,500,000 young hogs, ranging from 50 to 150 pounds in live weight, were marketed ahead of time—a heavy sacrifice because of the cholera scare. As a matter of fact, cholera manifested itself in every county in the State last year. In some counties, however, the loss was less than 5 per cent, but in most of the counties the loss ranged from 60,000 head to well over 100,000 head, the heaviest loss being sustained by Sioux County in the destruction of 103,765 head. It is interesting in this connection to note the results of the application of serum and virus, it being evident that where good serum was properly used good results went hand in hand. The director of the State serum laboratory has developed data indicating that when healthy hogs were treated the loss after the treatment was less than 2¼ per cent. Where sick herds were treated the loss jumped up to 16 and 17 per cent. In cases where there was an application of good virus but poor serum cholera was given a foothold, and the consensus of opinion of those who have studied the effect of the last year's fight in Iowa against hog cholera is that there should be a thorough testing of serum either by Federal or State government before it can be sold, and also there should be competent men to administer the virus and renew the activity and watchfulness in the development of better sanitary regulations. Personally, I am intensely interested in this campaign against hog cholera, as I am keenly sympathetic with my brother and neighbor, the hog breeder, and I am thoroughly aroused to the human and economic aspects that are accentuated by this unfortunate combination of increased demand by the great consuming masses on the one hand and decreased production of swine breeders on the other.

GOOD-ROADS LEGISLATION FOR THE RURAL COMMUNITIES.

In another department this Government stretches forth a sympathetic and helping hand to the farmer, from the Bureau of Public Roads, and in the latest enactment of this Democratic House, the Shackleford good-roads bill. For some time the Bureau of Good Roads in the Department of Agriculture has been cooperating with the different counties throughout the country in road construction. They sent out experienced road builders to counsel and advise with the local authorities. The counties can avail themselves of the service of these experts in the planning of the road as well as the expert's supervision in the matter of engineering and in the matter of proper materials to be employed.

It was a source of great gratification to me to be of assistance in procuring for Dubuque County, the only county in my district to make application before the fund available was exhausted, to secure an appropriation of $30,000 from the Government to accompany an appropriation of $60,000 on behalf of the county to construct a sample road as an object lesson along a strip of postal and rural free delivery. There happened to be a very keen desire upon the part of the citizens of Dubuque County to initiate through this road construction a general movement for road improvement throughout the entire county. The Bureau of Good Roads has built sample strips of the different types of road construction in various parts of the country and have kept most valuable data upon same that is available for the examination and investigation of the different portions of the country which are already engaged or are about to take up this most important problem of the transportation of farm products to the market.

The Shackleford good-roads bill carries the spirit of friendship and interest to the farmer as it is calculated to stimulate and help the road movement in the rural communities.

And so in many ways this Democratic House manifests its interest in the farmer and its desire to encourage him and to cooperate in the much-desired pilgrimage back to the farm. It extends the hand of fellowship and friendship in the application of the latest scientific results for the use of the farmer, and it raises the voice of encouragement and cheer and stands shoulder to shoulder with him in the great redemption of our lands by scientific study and intensive treatment of his acres.

THE FARMER AND THE TARIFF.

There are, of course, divers views in regard to the effect of the tariff upon the prices of farm products, and I wish to state that I would not consciously participate in any legislation that would produce gross injustice upon the farmer, as some of the Republican Members of this House claim has been placed upon the farmer through the Underwood tariff bill. As to the Republican tariff, the farmer must appreciate that, under the blind of so-called protection upon some of the commodities produced on the farm, he was obliged to purchase the materials needed upon the farm in a market sheltered by a prohibitive tariff wall, and yet in these periods of so-called protection on his own products he has seen prices fluctuate from high to low. He has realized that in many of his products he was on an export basis, and that the price of his products was governed and controlled by a great many conditions. As to any possible effect of the tariff upon the products of the Iowa farmer, and in connection with the claims of some Republican Members of this House, it is always well to revert to the recorded views of the present senior Senator from Iowa [Mr. CUMMINS], in which he states:

I know that my friend from North Dakota [Mr. MCCUMBER] does not agree with me in respect to these things, but I do not believe that we in Iowa receive any direct benefit for the 400,000,000 bushels of corn that we raise every year; I do not believe that we receive any direct benefit from the duty on 8,000,000 or 10,000,000 hogs that we market every year; I do not believe that of the $700,000,000 of agricultural products that we pour every year into the channels of trade, protection advances the price of a tithe of them. * * * We will this year supply the people of the United States and the people of the world with a product that will surpass in value $700,000,000, and it is idle for even any enthusiast to assert that the price of these products is directly affected by the protective tariff.

At this time I will not go into a prolonged discussion of the tariff and the Iowa farmer, but in closing I wish to insert the following article from an issue of an Iowa paper, the Carroll Times, under date of February 26, 1914:

IOWA FARMERS AND THE DEMOCRATIC TARIFF—MARKET QUOTATIONS SHOW PRICES OF FARM PRODUCTS GREATER THAN UNDER REPUBLICAN RULE.

The Iowa farmer enjoys better prices for his corn, cattle, wheat, hogs, and eggs under the Democratic tariff that recently went into effect than he enjoyed under the Payne-Aldrich tariff which preceded it.

This is the answer which the daily market quotations for the month of February make to the lying statements of Republican newspapers that "Democratic free trade" is bringing ruin to the farmers by reason of the competition of Canada and the Argentine Republic.

The daily quotations on corn for February, 1914, under the Democratic tariff average 13 cents a bushel higher than the quotations for the corresponding month in 1913 under the Republican protective tariff.

The daily quotations on wheat average about 3 cents per bushel higher in February, 1914, under the Democratic tariff than they averaged in the same month of 1913 under the Republican tariff law.

The daily quotations on hogs for February, 1914, average 45 cents per hundredweight higher than those of the corresponding month in the preceding year.

The daily quotations on cattle average 18 cents higher per hundredweight in February, 1914, over the prices quoted on the corresponding dates of 1913.

The daily quotations on eggs for February, 1914, average about 9 cents a dozen higher than the quotations for the corresponding dates in 1913.

This advance in prices means millions of dollars of added value to the products of Iowa farms and the revenues of Iowa farmers. Take the one little item of eggs alone: The annual production of eggs in Iowa is estimated by the State department of agriculture at 97,549,731 dozens. An increase of 9 cents per dozen means that this annual production will sell for $8,000,000 more money. The advance of 13 cents in the price of corn means an increase many times greater than that from the advance in eggs.

HERE ARE THE PROOFS.

From the files of the Daily Trade Bulletin, in the office of J. R. Whitney & Co., the Times has taken the quotations of prices for the above-named commodities on the Chicago Board of Trade, for the dates specified. To save time and space, the quotations only for the last market day of each week have been taken, but the quotations for the other days of the week would afford the same contrast.

February, 1913, came in on Saturday. The dates for which quotations are given are, therefore, February 1, 8, 15, and 21. There was no session of the board of trade on Saturday, February 22, a public holiday. The Saturdays of 1914 most nearly corresponding to these were January 31, February 7, 14, and 21. These are the dates for which the following quotations were reported in the Daily Trade Bulletin, and we invite doubters to consult the files themselves for verification or refutation of the figures given by us. The corn prices quoted are the cash prices for No. 3, mixed on track, Chicago, which is selected as a standard grade. Any other grade might be chosen, but the lesson taught by the quotations would be the same. The prices given on wheat are for No. 2 spring. The prices quoted on hogs are the lowest and highest, including both light and heavy grades, but excluding "pigs." The quotations on cattle are for "steers, medium to choice."

CORN—NO. 3 MIXED, ON TRACK CHICAGO.

| Feb. 21 | 8.15 | 8.40 |
| 1914. | | |
| Jan. 31 | 8.25 | 8.50 |
| Feb. 7 | 8.45 | 8.72½ |
| Feb. 14 | 8.25 | 8.60 |
| Feb. 21 | 8.40 | 8.75 |

CATTLE—STEERS, MEDIUM TO CHOICE.

| | | |
|---|---|---|
| 1913. | | |
| Feb. 1 | 7.50 | 8.25 |
| Feb. 8 | 7.60 | 8.25 |
| Feb. 15 | 7.90 | 8.50 |
| Feb. 21 | 7.90 | 8.50 |
| 1914. | | |
| Jan. 31 | 7.85 | 8.85 |
| Feb. 7 | 7.85 | 8.65 |
| Feb. 14 | 7.75 | 8.65 |
| Feb. 21 | 7.85 | 8.60 |

The Chicago prices for eggs in February, 1913, ranged from 15 to 24 cents. The prices for February, 1914, have thus far ranged from 24½ to 27 cents. The average of prices for the past month has been nearly 9 cents higher than for the corresponding period in 1913.

The Times makes no claim that these higher prices are the result of the Democratic tariff revision. We believe now, as we believed through all the years when the robber tariff prevailed, that the prices of things that the American farmer had to sell were determined by the world market, and would neither be increased or diminished by protective duties. The market quotations prove that this belief was correct. They also prove the Republican claim that the prosperity of the farmer was due to the tariff to be utterly false and without foundation. They prove that the calamity bowling of the Carroll Herald and papers of its sort has no warrant in fact. They prove that the statements that such papers have made as to the disastrous effect of the new tariff law are utterly and maliciously false.

Never again should the Iowa farmer permit himself to be misled by the false and delusive claim that he is a beneficiary of the protective policy and that the removal of the duties on such things as he produces would diminish the returns from his farm. He should know from this time forth that the pretense of protection to the farmer is only designed to secure his support to a policy that raises the price of every manufactured article that he buys, while it can not enhance the price of the things he has to sell.

MANUFACTURED GOODS COMING DOWN.

While the farmer is selling his own produce at as high or higher prices than he received under the old Republican tariff, the prices of manufactured goods have begun to fall under the influence of world competition. Sugar is a notable example of this. The wholesale price of sugar one day last week was $4.65 per hundredweight. Last year it was as high as $6.30, and there have been times, when the demand was exceptionally great, as during the fruit season, when it was close to $8 per hundred. In the great eastern cities the prices of dry goods and clothing have already dropped materially, and the purchasers of such goods are realizing the benefit that tariff reduction brings to them.

These are sad facts for the calamity howler to contemplate, but they are nevertheless the facts.

Mr. HAUGEN. Mr. Speaker, I yield 15 minutes to the gentleman from Pennsylvania [Mr. GRIEST].

Mr. GRIEST. Mr. Chairman, when the statistics of the United States census of 1870 were prepared and published, they proclaimed Lancaster County, Pa., to be the greatest of all agricultural counties. The aggregate value of farm products of that county exceeded its closest competitor, St. Lawrence County, N. Y., by $2,000,000. Ten years later the census returns showed a like result; the nearest competitor to Lancaster County then being Monroe County, N. Y., which lagged $3,000,000 behind. In the census of 1890 the leading agricultural counties were Lancaster County, Pa., and St. Lawrence County, N. Y., and the latter was within $1,000,000 of winning. The returns of the census of 1900 classified Chickasaw Nation, Indian Territory, as a single county, and although its area was eight times that of Lancaster County, yet the latter won out, but by a narrow margin. In the last census, that of 1910, the name of Lancaster County again led all the rest in the race for agricultural supremacy, winning against Los Angeles County, Cal., with an aggregate value of $20,767,145 of farm products. For the information of the House and the country I shall include in these remarks statistics furnished me by the Census Bureau for the 12 counties in the United States which rank highest in the last census in the total value of farm products:

*The banner agricultural counties of the Nation, census of 1910.*

| | Total land area. | All land in farms. | Value of farm property. | Value of crops. | Value of live-stock products. | Value of animals sold or slaughtered. | | Aggregate value of farm products. | Rank. |
|---|---|---|---|---|---|---|---|---|---|
| | | | | | | Sold. | Slaughtered. | | |
| Lancaster County, Pa | 602,240 | 550,499 | $84,426,907 | $13,059,588 | $4,037,286 | $2,790,333 | $879,939 | $20,767,146 | 1 |
| Los Angeles County, Cal | 2,602,880 | 757,985 | 199,998,200 | 14,720,884 | 2,492,378 | 710,569 | 63,561 | 17,987,392 | 3 |
| McLean County, Ill | 762,240 | 733,161 | 147,846,611 | 12,811,506 | 1,094,130 | 4,144,602 | 318,180 | 18,368,418 | 2 |
| Champaign County, Ill | 667,520 | 608,428 | 123,312,914 | 9,991,658 | 858,080 | 1,573,316 | 250,486 | 12,673,540 | 7 |
| Livingston County, Ill | 667,520 | 646,551 | 121,558,684 | 11,377,297 | 925,671 | 1,298,383 | 224,813 | 13,826,164 | 6 |
| La Salle County, Ill | 733,440 | 662,755 | 114,911,820 | 10,222,235 | 1,897,834 | 1,991,409 | 206,633 | 14,318,111 | 5 |
| Fresno County, Cal | 3,808,000 | 1,106,616 | 92,583,058 | 7,991,187 | 1,412,843 | 1,324,168 | 89,080 | 10,817,278 | 11 |

This matchless marvel of farm productivity, the county of Lancaster, Mr. Chairman, constitutes the congressional district which I endeavor to represent in this body.

Scanning carefully, as the Representative of this exceptionally productive farm county, the appropriation bill reported by the Committee on Agriculture for the fiscal year 1915, I find in it many meritorious features which entitle the chairman of the committee and its entire membership to commendation and congratulation. An examination of the printed reports of the hearings held by the Agricultural Committee furnishes additional and gratifying evidence of the earnest desire in Congress to serve well those of our countrymen who are devoting themselves to agricultural pursuits.

AGRICULTURAL DEPARTMENT ACTIVITIES IN LANCASTER COUNTY, PA.

In Lancaster County, Pa., the Agricultural Department is engaged in tobacco-growing experiments, is making a soil survey, and is conducting farm-demonstration work. The appropriations carried by this bill for the continuance of these services represent an investment of money which returns to the Government and the people a handsome profit. All three projects are highly valuable. It is evident that the wide range of possibilities for financial results to the farmers is greatest from the farm-demonstration work. It means a study of farm conditions, a determination of the profitableness of farm enterprises, surveys which have to deal with the different types of farms, a study of the soil, the relation between crops, the maintenance of soil fertility, and the demonstration of agricultural experiments with the object of increasing crop production.

There is a wide public interest in what the Agricultural Department actually does for the American farmers, and the general public wants to know of the scope of this work, its possibilities, and the activities of the experts and agricultural scientists in their cooperation with the practical farmers. The successful and ambitious farmer wants all the information obtainable concerning crop production. He welcomes suggestions that will increase the productivity of his land and the fertility of the soil. The demand is strong for knowledge of the science of farming, and public sentiment approves of appropriations which will enlarge the value of the Agricultural Department to the individual farmer. No just complaint can be made for the expenditure of money to demonstrate how the production of corn, wheat, and other cereals can be increased per acre. No protest will be offered by the people for funds appropriated to conduct tobacco-growing experiments in order that the farmer can get the best results from a profitable crop. Good farmers know the value of proper rotation of crop growing, and every dollar spent by the Government in efforts to prove the best order of crop rotation is sure to bring more dollars to the people and advance the public good. The farmers can not be expected to spend their own money to carry on these experiments. That is as much or more the duty of the State and Nation as it was to dig the great Panama Canal or to build railroads in Alaska at the cost of untold millions of dollars.

What the practical farmer wants and is entitled to is practical consideration by his Government. The demonstration work done right on the farm by men trained not only in agricultural science but in practical farming is a sound method of proving what the Federal and State agricultural departments can do to benefit the farmer. A year ago I secured the cooperation of the agricultural authorities, business men, and practical farmers in the establishment of a farm bureau in Lancaster County, Pa., and during the first year the results of the cooperative work of the farm agent and the local farmers shows encouraging results and satisfactory returns to the people for the money and effort expended. Congress has been appropriating less than $1,000,000 yearly for scientific research and demonstration work of this character over the entire United States, but the States and the people themselves have contributed generously in order that the work of the department may be given extended practical value.

FARM DEMONSTRATION AND FARM SURVEYS.

There is special interest in that item of the bill which appropriates $400,000 for farm management and farm demonstration work. It relates directly to the welfare of the individual farmer. No more practical service can be rendered than demonstrations on the farms. The Government annually expends thousands of dollars for research work and the collection of information affecting agricultural subjects, but there has been an absence of means whereby the results might be personally explained and demonstrated upon the local farms for the benefit of the agriculturists themselves.

Recently I suggested to the Agricultural Department that Lancaster County would appreciate the honor—and the entire country would be benefited thereby—should the department determine upon this great agricultural county as a study for farm welfare. Information worth millions of dollars could be secured by the Agricultural Department if a farm survey were made to determine the money-making factors of the capable and industrious farmers residing in the county to which I have referred. Of course this suggestion was not offered without regard for the benefits which it is hoped the local farmers would also derive, because the investigation is expected to locate the things which are grown, with little or no profit, and to indicate the work which would be worth while in the production of crops of profit; in other words, "a study of the profits of the individual farmer to determine the factors that control his income."

It is important that the farmer shall have financial resources to enable him to conduct his business. Likewise is it essential that the individual farmer shall determine the factors that control his income. To make farming a success certain economic problems must be solved. The farming of diversified crops makes the farm a combination of enterprises involving the use of capital and labor, and it is fair to expect that the farmer shall derive both an income on his investment and remunerative wages for his labor.

Although many farmers do not keep statistical records concerning their crops, expenditures, and so forth, it is a fact that most farmers know more about their business than some people in big cities give them credit for knowing. But the farmers do not have the facilities or organization with which to make a community study to determine the types of agriculture suited to their particular region. Here is where a farm-management survey to determine the profitable and unprofitable farm factors can help the individual farmer.

FARM SURVEYS AND FARM PROFITS.

In the interest of my constituents, both producers and consumers, and for the reasons stated, I have made inquiry concerning the results of a farm-management survey of three areas in the best agricultural counties in the corn belt of Indiana, Illinois, and Iowa, where about 700 farms were surveyed. The facts reported by the Agricultural Department are somewhat surprising. About 57 per cent of the farms studied were operated by owners and 43 per cent by tenants. Most of the farmers were not reasonably compensated for their efforts, as the figures show that many farmers received little or no wages for their labor. With the permission of the House, it is desired to include several small statements taken from Agricultural Department Bulletin 41, of January 14, 1914, giving the results of this farm survey:

FARM PROFITS.

INCOMES RECEIVED BY FARM OWNERS.

*Average area, capital, receipts, expenses, and profits on 273 farms operated by owners in Indiana, Illinois, and Iowa.*

| Item. | Indiana. | Illinois. | Iowa. | Grand total or general average. |
|---|---|---|---|---|
| Total number of farms | 123 | 73 | 77 | 273 |
| Average area.....acres.. | 105 | 253 | 176 | 176 |
| Average capital | $17,535 | $51,091 | $23,193 | $30,686 |
| Average receipts | 1,873 | 5,042 | 2,308 | 3,059 |
| Average expenses [1] | 689 | 1,866 | 858 | 1,139 |
| Average farm income | 1,187 | 3,176 | 1,450 | 1,935 |
| Average interest at 5 per cent | 877 | 2,554 | 1,159 | 1,530 |
| Average owner's labor income | 310 | 622 | 291 | 405 |

[1] The value of unpaid family labor, except the operator's, has been added in with the other farm expenses. It is equivalent to the amount that would have been paid to hired help had not the family done the work. The average amount per farm was $86 in Indiana, $127 in Illinois, and $101 in Iowa.

INCOMES RECEIVED BY FARM TENANTS.

*Average capital, receipts, expenses, and profits of tenants on 247 farms operated by tenants in Indiana, Illinois, and Iowa.*

| Item. | Indiana (83 farms). | Illinois (71 farms). | Iowa (93 farms). | Average (247 farms). |
|---|---|---|---|---|
| Average area.....acres.. | 128 | 202 | 167 | 173 |
| Average capital | $1,758 | $2,867 | $2,067 | $2,431 |
| Average receipts | 1,335 | 2,257 | 1,695 | 1,777 |
| Average expenses | 492 | 975 | 759 | 769 |
| Average farm income | 843 | 1,282 | 936 | 1,008 |
| Average interest, at 5 per cent | 88 | 145 | 134 | 122 |
| Average tenant's labor income | 755 | 1,139 | 802 | 879 |

These official figures show that the average net income on the capital invested was 3.5 per cent, all items of expense, including taxes, repairs, seeds, and insurance, being deducted before

figuring the net income. In discussion of the farm income the department says:

The farm income, which represents the income earned by the combined forces of labor and capital, is the amount available to the farmer for his living and savings, provided he had no interest to pay on any mortgage or other debt.

Deducting 5 per cent interest on the average capital leaves an average labor income of $408 for the 273 farm owners. This income, in addition to the food products furnished by the farm, represents the farmer's salary as manager of the business. It is evident that these men are receiving only a moderate sum for their year's work. If they sold their farms at inventory value and invested the money in good securities at 5 per cent the interest alone on a capital of $30,600 would return them $1,530. In addition to this, they would have the amount they were able to earn at other work.

Mr. Chairman, this is convincing evidence that farmers are not making large profits. The report further says:

The assertion that farmers are making large profits is erroneous. They are living on the earnings of their investment and not on the real profits of the farm. A farmer having an investment of $20,000, with no mortgage, may receive a minus labor income, yet have nearly $1,000 as interest on which to live. It is assumed in this discussion that capital should return 5 per cent before allowing the farmer anything for his labor.

Farming is a business and a profession. By studying a sufficient number of farms in a community it can be learned how the more successful farms differ from the less successful. As the business and the professional man makes a study of the best business and scientific methods, so the Congress should provide the Agricultural Department with an appropriation sufficiently large to insure a farm survey which would collect facts upon which the individual farmer can determine the farm enterprises and type of farming which will pay the cost of production, produce an income on the investment, and return wages as a reward for labor.

MARKET STANDARDS FOR VARIOUS FARM PRODUCTS.

The Agricultural Department is doing good work in endeavoring to develop a system of standards for various farm products, and the appropriations for this work and for investigations of the best methods of marketing and distributing farm products are items which merit the approval of Members from both the city and rural districts. The department experts are trying to solve problems which relate to the prosperity of the farmer and the cost of living of the consumer. By the adoption of a system of standards for apples, wheat, corn, and other grains; for eggs, potatoes, and so forth, the seller and buyer can better deal directly, and the parcel post will then become of greater value to the people.

Grades for wheat, apples, oranges, and so forth, have been standardized, and the Agricultural Department reports that by the adoption of standards for eggs it will be possible to sell eggs directly to consumers, with a saving of from 4 to 6 cents per dozen less than it now costs to get the same class of eggs into the city markets. As the egg and poultry business of this country is valued at $750,000,000 to the consumer, of which amount $500,000,000 is accredited to the egg business, it can be readily calculated that the Agricultural Department is endeavoring to render the individual farmers and the ultimate consumers a highly valuable service.

PROTEST AGAINST NONAGRICULTURAL DUTIES.

Mr. Chairman, in the interest of the greatest of all callings—the tilling of the soil—I suggest that there should be limitations to that tendency in Congress to fasten upon the Agricultural Department responsibilities which are not "agricultural." This bill appropriates $18,947,000, a small proportion of the more than a billion dollars which will be appropriated in this session of Congress, and yet only about two-fifths of the amount carried by this bill is to be appropriated directly for agricultural benefits, such as farm experiments, demonstration work on the farms, scientific research, and so forth. The balance appropriated, about $12,000,000, is authorized for purposes that may be termed supervisory work, police duty, or regulatory service, in which the Government is properly engaged but which are not strictly agricultural. These nonagricultural tasks assigned to the Agricultural Department deal with meteorological and climatological problems by the Weather Bureau, the administration of the national forests by the Bureau of Forestry, the enforcement of food and drug laws, game and bird laws, and other laudable purposes not in themselves agricultural.

It is right that we should recognize the present duty to provide and conserve for the welfare of posterity. Pure-food laws are essential to the health and protection of honest producers and all consumers. The Weather Bureau renders the public valuable service for the money expended. These are conceded to be commendable, but they are not directly agricultural, only serving individual farmers as they serve the public generally, and they illustrate my point that since the establishment of the Agricultural Department in 1889, there has been a growing tendency to develop other than agricultural matters under this department.

Quite recently Congress passed a banking and currency law. An attempt was made to have the Secretary of Agriculture designated as a member of the Federal Reserve Board, and the law actually made the Secretary a member of a committee to organize and install the new money system, and he will be engaged in other than agricultural duties for many weeks. That it was a mistake to assign to this task a Cabinet officer having charge of a great scientific department is manifest. If the officials of the Agricultural Department are permitted to concentrate their efforts and energy on work purely agricultural, it will suffice to keep them busy, and the service rendered can be made to return greater profit to the Nation. I protest most earnestly against further legislation which will impose upon officials of the Agricultural Department nonagricultural duties.

REGULATION OF PRICES OF FARM PRODUCTS UNDESIRABLE.

It will be a great mistake if the regulatory powers of the Agricultural Department are increased at the expense of the agricultural service which the department can render the people. Legislative bodies have in recent years enacted all kinds of regulative laws, and much of that legislation has tended to increase the cost of living. Some enthusiasts have even suggested the fixing the prices of farm products. Rome tried that policy 1,600 years ago and failed. The old Romans decreed that wheat was to be sold at 33.6 cents per bushel; rye at 45 cents; pork at 7.3 cents; beef at 4.9 cents; eggs at 5.1 cents; butter at 9.8 cents per pound, and so forth. Any plan to govern the people by a commission which fixes prices may be described as reductio ad absurdam. If the people are burdened with restrictive measures, fair competition among individuals will be impossible.

WHAT THE TARIFF POLICY MEANS TO AMERICAN FARMERS.

For political purposes it was charged that the tariff on agricultural products was responsible for the high cost of living. Those who so contended proclaimed a policy of low tariff and free trade for farm products and pictured the American farmers as barons of finance. Soon after the party now in power gained control of Congress it undertook a revision of the agricultural schedules of the tariff law, and revised the rates so thoroughly as to take the duty totally off many farm products. Thus the 6,361,502 American farmers were placed in open competition with the farmers of foreign countries, regardless of whether the labor, climatic, and other conditions enabled the foreigner to produce crops more cheaply than such crops can be produced in American soil by American labor.

So far as the farmers are concerned they now have free trade in many farm products, and foreign importers are preparing to develop their trade so as to take advantage of the opportunity in this rich American market. Wheat prices have for years been on practically an international or world-wide basis, and the enactment of the Wilson-Underwood tariff law has probably marked the passing of corn and oats in the United States from a domestic to an international basis, which means a lower average price for American farmers. With this readjustment of the tariff the farmers are brought face to face with new and more difficult conditions.

CORN AND OATS.

Prices on corn in the United States have been well above the 10-year average, but with corn deprived of a protective duty of 15 cents a bushel, already 10,000,000 bushels of Argentine corn have been shipped to this country, and Argentina is preparing to place on the market its entire surplus from the new crop of 250,000,000 bushels. Some of this foreign corn has already been contracted for and is being offered at prices 8 and 10 cents a bushel under American prices. The home market has also been opened for 30,000,000 bushels of Canadian oats. Wheat and other cereals likewise have been subjected to foreign competition with similar articles produced on cheaper lands and with cheaper labor. As a result the prices of wheat, corn, and oats have depreciated, but the advantage to the consumer is not apparent.

BUTTER AND EGGS.

An influx of foreign butter from all parts of the world, due to the reduction of the tariff from 5 to 2½ cents a pound, caused a decline in the wholesale price of butter. The importers are shipping butter from Argentina, Denmark, Australia, and Siberia, and it is admitted that the price of American butter will be kept in the future at a lower average level than heretofore. The consumer can benefit only slightly in proportion to the foreign importers, and the farmers and dairymen are the sufferers as the direct result of the tariff reduction. Consignments of eggs are being received from Russia, Denmark, Germany, France, China, and other countries, and it is said they are being landed at an average price of 17 cents a dozen.

FREE TRADE AND THE PRICE OF BEEF.

Many theories have been advanced as causes for the great increase in the price of beef and other meats. One fact, however, seems to be established, namely, that the number of all food animals has been decreased 7,000,000 in four years, while there has been no check in the consumption of meat. The claim was made that the new tariff law would reduce the cost of living. The party now in power totally removed the duty on cattle and meats, but it seems that the big packers have been the beneficiaries from this free trade. For October, November, and December, 1913, the imports of dressed beef were 32,017,647 pounds, which came mainly from Argentina, Uruguay, and Australia, where it costs much less to round up and prepare cattle for the market than it does in the United States. In order to overcome this it is asked, Why do not the eastern farmers raise cattle and supply the demand? The eastern farmer, like any other business man, counts the cost of production. It does not pay eastern and northern farmers to raise steers on high-priced land, when they sell a veal calf for $15 to $20.

It would not pay the farmer to keep and feed the stock two or three years. What the eastern farmers want is feeders or stockers, and with a scarcity of reasonably priced American feeders our people had need for thin and hardy Canadian cattle which, after four to seven months fattening, developed into marketable beef. The Canadian reciprocity act proposed this benefit for the American farmers, but did not contemplate opening the home market for free trade in beef, so that the world would enter into competition with our farmers. To deprive the farmers of every semblance of protection was wrong. Cattle can not be fattened to compete with the price of foreign beef shipped to this country in refrigerator ships.

President McClain, of the Lancaster (Pa.) Live Stock Exchange, is authority for the statement that during 1913 over 4,600 cars of cattle, representing about 150,000 head, valued at $8,000,000, arrived at Lancaster, which handles more cattle for feeding purposes than any other market in the East. These cattle were purchased mainly by farmers to be fattened for the market; 1,417 cars came from Virginia and 1,131 cars came from Buffalo, the latter being largely Canadian cattle. But notwithstanding the removal of the tariff from cattle the Canadian steers were not sold at bargain prices, and owing to the high price of cattle feed in this country to-day, Mr. McClain says that although the prices of beef are high "it will take an even higher price than the price now prevailing to make cattle feeding pay this winter in eastern Pennsylvania." With free trade in beef, as well as cattle, the American farmer is confronted with a serious question which time alone and a statesmanship in sympathy with the tillers of the soil can solve.

CAUSES OF SO-CALLED HIGH COST OF LIVING.

Much injustice has been done the American farmer during the recent discussions relating to the high cost of living. It has been represented that the farmers have been making excessive profits, but the figures of farm earnings which I have quoted contradict the charge. In fact, the profit to the farmers for the growth of various products is notably small when compared with the cost of production and the sale price when handled by intermediaries.

Just take one illustration. The Santa Fe railroad has been gathering facts concerning the cost of distributing farm products, and President Ripley, of that railroad, is quoted as saying:

When, for instance, the housewife buys a package of oatmeal for 25 cents, she is getting 3 cents worth of oatmeal, the rest being fancy packages, advertising, the middleman's profit, and the cost of delivering at the door.

Mr. Ripley reminds us that—

In the old days she used to go to the store with a basket, and the grocer would take her oatmeal out of the barrel.

Here is an apt illustration of one factor that has made living costly.

Another factor is explained by the census statistics, which show that between the years 1900 and 1910 the urban population of the United States increased 34.8 per cent while the rural population increased only 11.2 per cent. In other words, the consuming population increased over three times as much as the producing population, necessarily increasing the cost of, demand for, and the prices of farm products.

Few farmers have amassed wealth from the profits derived from farming; and where success has been attained it is due to skill, hard work, good management, economical living, and persistent endeavor. In order that men may be induced to engage in agriculture, either as owner or tenant, that the back-to-the-farm movement shall become as popular as it is desirable, it must be demonstrated that the farm is profitable for investment and remunerative for personal service. This is the essential step to increase agricultural production in the United States. If the farmer's investment yields less than 5 per cent, and if one farmer out of every three on the surveyed farms cited above paid for the privilege of working his farm—that is, after deducting 5 per cent interest on his investment, he failed to make a plus labor income—then there is every reason why a helping hand should be extended by this Government, if by so doing the science of agriculture shall be better understood and rendered more profitable.

The Father of His Country was not only first in war and in peace, but was the foremost farmer of his time. He favored agricultural schools for the study of the best ideas and the most approved practical methods of farming. He believed farming to be the greatest of all occupations. In his day, and now, and even more so in the future, great responsibility for the welfare and prosperity of agriculture rests upon the Government. To it the farmer is entitled to look for encouragement and protection. In return the perpetuity of the greatest government of the people which history records will rest upon the sure foundation of farm prosperity.

"'Go, till the ground,' said God to man,
'Subdue the earth, it shall be thine';
How grand, how glorious was the plan!
How wise the law divine.
And none of Adam's race can draw
A title, save beneath this law,
To hold the world in trust;
Earth is the Lord's, and He hath sworn
That ere old Time has reach'd his bourne,
It shall reward the just!"

[Applause.]

Mr. HAUGEN. Mr. Chairman, I yield to the gentleman from Wyoming [Mr. MONDELL].

[Mr. MONDELL addressed the committee. See Appendix.]

Mr. HAUGEN. Mr. Chairman I yield to the gentleman from West Virginia [Mr. HUGHES].

[Mr. HUGHES of West Virginia addressed the committee. See Appendix.]

Mr. LEVER. Mr. Chairman, I yield to the gentleman from Massachusetts [Mr. GILMORE].

Mr. GILMORE. Mr. Chairman, I listened with keen interest to the able and clear manner in which the gentleman from South Carolina [Mr. LEVER], who is in charge of the Agricultural appropriation bill, presented and outlined the great works being carried out for the benefit and comfort of the people of our great country by our Department of Agriculture. It should appeal to every Member of this House, regardless of the section of the country he may represent.

In his opening remarks he clearly presented the fact that really only a moderate sum of money is asked in this bill to carry out and maintain and perfect the great work that is being done at the present time and contemplated for the near future in aiding our farmers to more successfully carry on their methods of conducting their farms in order that the maximum of production may be secured and an honest living profit made more certain to the farmer in return for his noble labor. To me it appears that there is no labor more worthy of encouragement and reward than the labor of the farmer. Certainly there is no more necessary labor than his and no other that means so much to the welfare and the happiness of the people of the country. From his fields and his barns and his pens and his trees and his vines comes the very life of our Nation in the shape of our food supplies.

As a Nation we have grown up to immense proportions in all lines. We have spread out most wonderfully in manufacturing and industrial and commercial directions, and have devoted our utmost energies to make them bigger and grander and greater, until we have become almost marvelous in the eyes of the other nations of the world. Our great and steady growth in population has rapidly pushed us far to the front and the top of great nations in these lines. But during all this time we as a people have paid but scanty attention until very recent years to the one greatest of all industries; that is, our farming. We sailed along our sea of prosperity, seldom stopping to think that with all our growth and grandeur we would some day be called to halt and give serious reckoning to the great problem of how we were going to care for the immense body of people that were coming up year by year and adding to our population. We felt in the past that we were secure on this point. Did we not have the great plains of the North, the West, and the South, that seemed almost limitless in their broad expanse, to forever supply our needs? Did we not have the mountain ranges of the great Rocky Mountains and their branches, extending for thousands of miles across our country and furnishing appar-

ently limitless feeding ground for our cattle and sheep, and why should we worry about our food supply? Were we not alone supplying our own wants but likewise supplying the wants to a great extent of the great nations of western and southern Europe? How little we thought only a few years back that we would at this time be facing a situation in which we find ourselves to-day, not a simple one easily solved, but a serious problem that will take the united brain of science and wise legislation to solve in the future. Our farmer was simply looked upon as something we knew was necessary. In the past he was looked upon as an honest, slow, and easy-going person who cast his lot out in the wide expanse to grow and live and prosper if he could, and if not he simply passed out and on to something else. Our hustle and bustle of get-rich-quick men had no time to pay attention to him and no thought of why he did not succeed. He was left to work out his own salvation as best he could, while other walks of life were hammering and crying at the doors of legislative halls here and there for assistance to cure their troubles and their ills. The farmer simply plodded on, asking little.

We glory with pride and spend hundreds of millions of public moneys on our ships of war and our Army. We glory again in our great achievements of building and improving our rivers and harbors for commerce. We are getting ready to spend hundreds of millions out of our Treasury on our roadways throughout the Nation. States and great cities expend immense, almost untold, millions of public money on improvements of all kinds. Plans calling for millions are being discussed and advocated in all parts of our country. Public and private commissions and boards of all kinds who are organized and working to better and make more efficient our industrial methods, that the most economical and greatest amount of product is gained and brought out in all lines of business endeavors; and to all these works and many other similar ones that could be mentioned I say amen to them. It is good work, it is grand work, and I am heartily in accord with it all; but what is the use of it all if in its wake we do not have a happy, healthy, and contented people? We can not all be wealthy; in fact, most all of us must be contented to work and labor for our living by the sweat of our brow at labor wages; and as our outside comforts grow better and pleasanter, we desire our inside comforts to be likewise, and this brings us to those most necessary things that bring us comfort—our food and our clothing supplies. These all come from our farms, our ranges, our trees, and our vines; and if for any reason these food and clothing supplies become curtailed or reduced, the great multitude of our people, the workingman and the laborer whose time and toil must be given in our great factories, mills, and mines, are the ones to feel and suffer the hardship most. Now, what do we find the outlook in this direction? All our great fields and ranges that seemed limitless in the past are being narrowed down and absorbed for other purposes, and the remainder, although yet great in extent, are being heavily taxed to supply our increased home wants and the increased demands and needs of our European neighbors. In the past we received an abundant supply from them, and our industrial workers in all walks of life in our great cities and manufacturing centers were enabled to purchase a great variety of their products at a reasonable price; but of late years the abundant supply of former times has rapidly diminished and scarcity of many of the ordinary necessities of life exists to-day, and as a consequence higher prices are prevailing on all our necessities, bringing a heavy burden on the shoulders of the everyday man and uneasiness and discontent into his life. Where he had the choice of most anything for his table, he now finds himself deprived of many things he formerly enjoyed, and is restricted to the simplest of food supplies. This is the condition prevailing among the people in all our big cities and industrial centers. My district, being largely a manufacturing district, depends greatly on other sections of our country for its great farm products, there being no great, extensive wheat, oat, and corn farms and very little raising of beef cattle, sheep, and hogs to supply its home needs and wants in these lines, and it is only natural that anything that could be done to increase the food supply for my people would be of keen interest to me; and in this bill I find just such work called for and contemplated by our National Department of Agriculture.

Now, being faced with this condition, what are we going to do to try and relieve these conditions and make them normal for our people again? What can we do as legislators of the people to help out this condition as it is presented to us and exists to-day? We have already taken some progressive steps here like releasing all unjust taxation that came through high-tariff laws. We are passing through the process of regulating the money question of our country and putting it on a sound and fair basis that will be most beneficial to the farmer and all our people, and we have done and are contemplating to do shortly many other good and great things to help relieve the burdens that have crept onto our great masses of everyday men and women in the battle of life, and are about to pass this agricultural bill in this House as a step in the right direction that appeals to me to be one of the most necessary and beneficial measures for our future home comfort that will come before us during this session. Each year sees this department branching out in all directions, taking up new scientific experiments and making studies for the purpose of securing the most valuable information to be gotten together and distributed in the most free manner to instruct our farmers how to get the best results and greatest amount of crops from the tilling of the soil upon their farms and the care of their animals and their orchards. Every dollar in this bill is expended for the purpose of increasing the amount of our farm products, our range products, our vine and our orchard products, and at the same time have instructed the farmer how to care for and ship his products so that they are brought to our home and our table in a clean and health-giving manner. What money can we expend that is more beneficial to the life and happiness of our people than that which will help to bring to them plenty of food and clothing at a reasonable price? How long can we hesitate or refrain from taking up and advancing any work that can be done to bring about such a result? Rather can we not afford as a Nation to be liberal in providing the means that will be helpful to our farmers and bring their farms to the highest point of productiveness? Should there be any hesitation or criticism about the little we are doing in this bill when we consider the great benefit to come from it?

The gentleman from South Carolina in charge of this bill well stated how vital every item in it was to the farmer and that it should receive the sanction of every Member in this House. I agree with him; it is also most vital to the interests of every man, woman, and child of our many millions of people who are not farmers and depend on the farmer for their supplies. This is not alone a farmer's bill; it is a nation's people's bill. As a nation, this work means much for our future independency or dependency. It is our future, a nation's food supply; but, if some will have it a farmer's bill, let them have it so, and remember what your farmer and farm is is what your Nation is, and let us encourage and advance him, be he little or big. His past in our national life and growth has been great. We owe him much that we have neglected to give him in our thoughtless past. Let us commence now, and for the future turn our great energies and thoughts to him. I have only mentioned a few of the many important branches of service rendered under this department's care. I fully realize what great subjects are cared for all through this bill, and know that there are many other important matters represented in it that are likewise beneficial to the welfare and comfort of our people on which, if I had the time, I would like to speak of, but before closing I want to say this, that our Agricultural Department deserves great praise for the broad and liberal manner in which it does its work. It reaches out its helpful hand to the small farmer in my section with the same freedom and interest as it does to the great farmers of the North and West and South. Its aid is always freely given to the agricultural colleges of our States, our granges, and societies all over the land, to help and assist them in their good work among the farmers to better their farms and make the home life on the farm sweeter and happier, and when they do this they are engaged in a grand and noble work and deserve all the support we, as Representatives of the people in the Nation, can give them.

Mr. LEVER. I yield to the gentleman from Iowa [Mr. KIRKPATRICK].

Mr. KIRKPATRICK. Mr. Chairman, Mr. Lincoln said that as between labor and capital the former was entitled to the higher consideration; thus in agriculture we find nothing but an obedience to the divine injunction, "In the sweat of thy brow shalt thou eat bread." Therefore the bill now under consideration comes clearly within the highest type of labor demonstration.

To some the amount of this appropriation may seem large, improvident, or extravagant, but when we consider that of this aggregate amount of $25,000,000 there are to be divisions and subdivisions in its application, then it is fair to assume that the same is comparatively small and inadequate to meet just demands.

There are no artificial means by which we can produce bread. The indispensable article of bread and meat must in some way be wrung from the bowels of the earth, and when they are brought or produced they should be husbanded with care and safeguarded by intelligent action. There is still much room for

improvement in the intelligent and economic preparation of food, and to this the good housewives of this country are bending their energies as never before.

Whether in farm, in mine, or in workshop, I am for those who labor, and, first of all, it is the interests of the farmer that this bill seeks to promote and maintain. It is clearly evident that it is the intent of this committee to render assistance in the eradication of hog cholera. In my judgment no more laudable effort could be presented. It is appalling to know that last year the farmers of this country were subjected to a loss of $92,000,000. Now, this is alarming in the extreme and accounts largely for the high price of meat, and the more serious aspect is the apprehension that many thousands of animals may be slaughtered ignorant of the fact that they are inoculated with the dreaded prevalent disease, with no means or methods of knowing of the presence of poisonous germs at the time of slaughter.

We have too long looked upon the buzzard and the carrion crow as sacred scavengers. I would exterminate both, for these foul birds only serve to disseminate disease and death by their filthy, revolting mode of living.

No farmer should allow a diseased animal of any kind to remain in sight after death, and a diseased animal should at once be removed from the herd.

Though old, the adage is true that an ounce of prevention is better than a pound of cure, and in this way let me urge cleanliness in the hogpen as well as elsewhere. The frequent change of bedding in the wintertime, salt, wood ashes, charcoal, small bits of bituminous coal, an acid swill of any kind; never allow the pen to be on or near a public highway; provide the growing pig with pasture grass of some kind and less dry feed. With an observance of all these warnings, let science assist in the prevention of the ravages of this dreaded disease, for in this way can the producer and the consumer be benefited and protected.

If this ravaging disease can be controlled, then the question of building the Alaskan railroad could easily be solved, and, better still, the conversion of the Father of Waters into an Isthmian Canal here at home, a thing devoutly wished for by a majority of our people.

The CHAIRMAN. The gentleman from Iowa [Mr. HAUGEN] has 30 minutes remaining and the gentleman from South Carolina [Mr. LEVER] 29 minutes.

Mr. HAUGEN. I yield to the gentleman from Pennsylvania [Mr. AINEY].

[Mr. AINEY addressed the committee. See Appendix.]

Mr. HAUGEN. Mr. Chairman, I yield to the gentleman from Illinois [Mr. MANN].

Mr. MANN. Mr. Chairman, it is not my intention to discuss at any length the message of the President delivered to the House and Senate yesterday in person, or the Panama Canal toll proposition, at this time. I hope I may have the opportunity to do that later.

But yesterday, in closing his address he stated, after asking Congress to repeal the law:

> I ask this of you in support of the foreign policy of the administration. I shall not know how to deal with other matters of even greater delicacy and nearer consequence if you do not grant it to me in ungrudging measure.

I will confess when I heard the message read I did not fully appreciate the importance or the significance of this remark of the President. But in a cablegram published in the Washington Post this morning there was considerable light thrown upon this delicate situation which is so bothering the President. The following is the article:

> THINK UNITED STATES FEARS JAPAN—MEXICAN SITUATION FORCING AMERICA FROM ISOLATION IS LONDON VIEW.
>
> LONDON, *March 5.*
>
> The policy of the United States toward Mexico occupied a leading place in the editorial columns of the English newspapers again to-day. The Evening Standard discovers "a marked change in the whole trend of American foreign policy. Instead of 'haughty isolation' based on the strict letter of the Monroe doctrine, the United States is now becoming anxious to stand well with the European powers. The Government at Washington is apprehensive lest if it became involved in intervention in Mexico, Japan might seize the occasion to carry her ambitious designs on the Philippines and Hawaii into effect, and believes that Europe, if so disposed, could lay an embargo on Japanese ambitions."

After reading that article I can appreciate the significance of the last remark of the President yesterday, indicating that he would not know how to deal with the delicate situation in relation to our foreign affairs unless, at the behest of Europe and in order to gain their friendship and protect us from desolation, following a war with Japan, we should yield on this question.

As for me, Mr. Chairman, I do not court, but I am not afraid of, a war with Japan or anybody else. [Applause.] And I would not yield what I believed to be right on the part of the Government of the United States through fear, whatever else I might do. [Applause.]

Mr. LEVER. Mr. Chairman, I yield 15 minutes to the gentleman from Indiana [Mr. COX].

The CHAIRMAN. The gentleman from Indiana [Mr. COX] is recognized for 15 minutes.

Mr. COX. Mr. Chairman, in addressing the committee at this time I am aware of the old adage that it is no use to lock the barn door after the horse is gone. But I want to put in the RECORD a few remarks embracing my views upon the conference report on the Post Office appropriation bill, expressly stating that they are my own views. I am not calling anyone to task for the part they have taken in the framing of the Post Office appropriation bill or in the conference report or in the adoption of the report, but I do not approve of some things contained in the report, and I can not remain idly by without submitting my protest and making it a matter of record.

I undertook to get an opportunity to speak yesterday morning while the conference report was up for consideration, but I could not do it on account of lack of time. There was pending before the Committee on the Post Office and Post Roads, of which I am a member, for quite a while different bills proposing to increase the salaries of rural-route carriers. I have no quarrel with or criticism of this class of Government employees whatever. They are a high class of men and do a splendid and noble service, but I was opposed to the bill to increase their salary while the same was pending before our committee, and I hope before I close to be able to put into the RECORD reasons justifying my opposition to this proposed increase.

For years rural-route carriers have beseeched Congress in season and out of season to increase their salaries, first, on the ground of the increased cost of living, which to a certain extent was a justifiable ground. Later they retreated from that position and took the position that their salaries should be increased solely because the salaries of the city letter carriers were higher than theirs. This may be true; I do not know, nor do I express any opinion upon it. I am disposed to believe that the salary of the city letter carrier is too high, and if it is too high two wrongs never make a right.

Later, however, the rural-route carriers have retreated from the last position and have taken refuge in an attempt to have their salaries increased on account of the increased weight of the parcel post. The proof before our committee was that the increased weight upon the rural-route carriers by reason of the parcel post was a negligible increase in weight, and if this be true there is no justifiable argument on this proposition that their salaries should be increased by reason of the parcel post.

I have heard various departments of the Government and various bureaus in the different departments of the Government criticized upon the floor of the House by Members time and time again because of their everlasting and incessant demands for more money. But here is a place, gentlemen, where no criticism whatever should fall upon the Post Office Department or any of its bureaus. The Postmaster General, a man of extended experience, a former Member of this House, always liberal in the increase of salaries, stated before our committee that he did not ask an increase of salary for any of his employees, that while none of them were overpaid they were all paid a sufficient salary. Notwithstanding the statement and desire of the Postmaster General not to have an increase of salaries of any of his employees, the conference report on the Post Office bill, adopted yesterday, shows that we have increased the salaries of employees to an amount of approximately $5,000,000 a year. So far as the Post Office Department is concerned, I hope that in the future no man will rise on the floor of this House and criticize it, when we have given it upward of $5,000,000 more than it asked.

The provision to which I refer got on the floor of the House when the appropriation bill was pending here, and was stricken out on a point of order. The friends of the increase sought the Senate, and it was inserted in that body and became a law in the agreeing to the conference report. No hearings were had before our committee whatever as to what the bill would cost the Government, and, so far as I know, no information was sought by our committee from the Post Office Department upon the bill proposing to increase the salaries of rural-route carriers. The conference report shows that this item alone will increase the appropriations of the Post Office bill $4,350,000 a year. In addition to this, the conference report agreed to another item in the nature of an increase of salaries, which will cost the Government I do not know how much.

I do not believe we can justify this wild extravagance with the people's money. While the political exigencies of our party may be great in the way of procuring nominations and reelec-

tions to Congress, yet I oppose this way of making appropriations. It is unfair to the taxpayers of this country, and I desire to protest against it in the most vigorous and positive language possible. If I were talking for home consumption, I would keep my mouth shut and say nothing about it, because I have a large number of rural-route carriers traveling all over my district six days in every week, and no doubt they will be electioneering against me. But I can not, in the discharge of my duty, remain idly by and see the people burdened to the extent of practically four and a half millions a year by a class of people that, in my judgment, are already receiving a sufficient salary. Two or three years ago we were denouncing the Republican Party on the floor of the House as plundering the Treasury of the United States, in their wild, extravagant appropriations, and we have denounced them time and time again in the most vehement language in our platforms, and I am wondering whether this denunciation upon the floor of the House of the Republican Party for their appropriations, and our denunciation of their course in our party's platform, were solely for the purpose of getting into power. If the denunciation was in good faith, we ought to live up to it, and live up to our platform promises and pledges.

It may not be amiss at this time to read into the RECORD some of our platform promises and denunciations of the Republican Party for their extravagance with the people's money. In 1908 our platform contained the following plank:

Economy in administration: The Republican Congress in the session just ended made appropriations amounting to $1,008,000,000, exceeding the total expenditure of the past fiscal year by $90,000,000, and leaving a deficit of more than $60,000,000 for the fiscal year just ended. We denounce the needless waste of the people's money which has resulted in the appalling increase as a shameful violation of all prudent considerations of government and as no less a crime against the millions of working men and women from whose earnings the great proportion of these colossal sums must be extorted through excessive tariff exactions and other indirect methods. It is not surprising that in the face of this shocking record the Republican platform contains no reference to economical administration or promise thereof in the future. We demand that a stop be put to this frightful extravagance and insist upon the strictest economy in every department compatible with prudent and efficient administration.

Mr. Chairman, it is hard for me to conceive of an act being criminal unless we have criminals to commit the act. I do not believe when the platform of 1908 was written we were denouncing the Republican Party as being criminals, but I am disposed to believe that we were endeavoring to call the attention of the country to the fact that, through the profligacy, waste, and exorbitant appropriation of the people's money, the Republican Party was no longer fit to control this Nation and should be driven from power. The Baltimore platform uses language almost as stringent as the plank contained in the platform of 1908. The Baltimore platform says:

Economy in administration. Republican extravagance.—We denounce the profligate waste of the money wrung from the people by oppressive taxation through the lavish appropriation of recent Republican Congresses, which have kept taxes high and reduced the purchasing power of the people's toil. We demand the return to that simplicity and economy which befits Democratic government and a reduction in the number of useless offices the salaries of which drain the substance of the people.

Does this conference report square with either the plank of 1908 or the plank of 1912? Let the English language speak for itself. I say not. If it be true that the salaries drain the substance of the people—and grant they do—then why are we adding, in the way of increased salaries, $5,000,000 per year to the burdens of the people? If these two items in the conference report square with the platform adopted at Baltimore, upon which we were elected, then I must confess I am unable to read and construe the English language plainly written.

The estimates of the Post Office Department for the year 1915 were $306,953,117. The amount carried in the House bill for the year 1915 was $305,401,767. The bill as it passed the Senate for the year 1915 carried $311,772,067, an increase over the estimates of the Post Office Department for the year 1915 of $4,818,950, this being an increase over the House bill of $4,758,200. The conference report therefore shows that we gave to the Post Office Department approximately $5,000,000 more per year than they asked for, nearly all for the increase of salaries to men who are already getting round, sound, sufficient salaries.

I said, and I repeat it, that I do not believe we can justify ourselves before the country upon this proposition at all. There are 2,300 rural-route carriers in my State. If everyone of them should resign, in less than 48 hours there would be five, yes, ten times that number of men ready, willing, and anxious to accept these jobs upon the salaries as they originally were, to wit, $1,100 per year, and this increases the salary to $1,200 per year.

I was recently told by a Member upon the floor of the House that last summer there was an examination in his district to fill a vacancy in the position of rural-route carrier, and that 57 men took the examination and 24 of them made the eligible grade. I was told by another Member on the floor of the House that an examination was held in his district last summer to fill a vacancy in the position of rural-route carrier, and that 117 men took the examination. This shows that these jobs do not go begging at the salary formerly paid; yet there are countless thousands, yea, hundreds of thousands, of men in the United States who stand ready, willing, and anxious to take these jobs to-day at a salary of $1,100 per year on a standard route of 24 miles per day.

Mr. Chairman, I may be wrong in my position, I may be mistaken, and I may be regarded as a man without charity and unwilling to aid his fellow men. But this is not so; it is untrue. Who is going to talk for the farmers of the country, for the laboring men of the country, upon whose backs this $5,000,000 per year must be laid? Because this money must be raised, and can only be raised by taxation. This is the class of men I am talking for.

I recently heard Judge SABATH, of Illinois, make a very significant remark upon the floor of the House when the Post Office appropriation bill was going through. We were discussing the item of pay to contract stations in the cities, and, as I recall, the judge was trying to get the salary of these men increased, and he remarked that this class of men were unorganized, and that that was the reason they could not get an increase of salary.

To me his remark was significant. Can it be that solely because rural-route carriers are organized they are able to swoop down upon Congress and force an increase of their salary? Can it be that it takes organization, concerted action, to force these increases through, whether needed or not?

I would rather talk for and defend the great unorganized mass of people—the countless millions of men and women on the farms, in the factories, the foundries, and machine shops—against these wild, extravagant appropriations. We shall see in the next session of Congress, when the parcel post is worked out to the 100-pound limit, this same class of men coming back here and asking for another increase of their salaries; and, if Judge SABATH's ideas are sound, they will be able, through organization and fear, to force it through again.

Where it can be shown to me that an increase in salary is justifiable, I care not on what ground, I am willing to vote the increase; but I have given this question thorough study, and, as a result of my investigations, I unhesitatingly state that this increase in salary is unjustifiable, can not be defended; and, in my judgment, when the people of the Nation wake up to the situation they will hold us responsible for it. [Applause.]

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. HARRISON having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. 4167. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and of other wars than the Civil War, and certain widows and dependent relatives of such soldiers and sailors;

S. 4168. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors;

S. 3403. An act to abolish the office of receiver of public moneys at Springfield, Mo., and for other purposes;

S. 2725. An act authorizing the sale of certain lands to the Dwight Mission School, on Sallisaw Creek, Okla.;

S. 1618. An act granting to the Inter-City Bridge Co., its successors and assigns, the right to construct, acquire, maintain, and operate a railway bridge across the Mississippi River; and

S. 2226. An act for the relief of Joel J. Parker.

The message also announced that the Senate had passed without amendment bill of the following title:

H. R. 13545. An act to extend the time for constructing a bridge across the Mississippi River at the town site of Sartell, Minn.

The message also announced that the Vice President had appointed Mr. PAGE and Mr. LANE members of the joint select committee on the part of the Senate, as provided for in the act of February 16, 1889, as amended by the act of March 2, 1895, entitled "An act to authorize and provide for the disposition of useless papers in the executive departments," for the disposition of useless papers in the Department of Commerce.

AGRICULTURAL APPROPRIATION BILL.

The committee resumed its session.

Mr. HAUGEN. I yield 15 minutes to the gentleman from Nebraska [Mr. SLOAN].

Mr. SLOAN. Mr. Chairman, on yesterday the gentleman from Alabama devoted most of his time in an extended speech to endeavor to show that farmers do not believe in protection and that farmers' protection did not protect. The remainder of his time was devoted to me personally. That, of course, was complimentary, because to bask in his smile were a gleam of heaven, to feel his frown were indeed "sweet sorrow." Who would not be delighted with his caress? Nearly all would be grateful for his stroke. Standing before a score of enraptured colleagues, a sartorial cynosure, a prince of pulchritude, with a voice rich, unctuous, and mellifluous, he gave a feast to the eye, a banquet to the ear, and allowed the auditor's mind absolute rest. [Laughter and applause.]

Tariff and farming. On the first his speech showed no sordid effect of study. There was a supreme disregard for unaccommodating facts, wholly unhampered by any of the considerations which so often furnish let or hindrance to the flow of language. On farming he showed himself equally well informed. This being an agricultural bill, my discussion was confined almost wholly to the tariff as it related to farm products. He saw fit not to be so limited. But with a voice as of one who wept he complained of the Republicans having taxed window glass, infant swaddling clothes, and tombstones. While doing so he charged me with being a young Member. This I admit, but I hope that I shall never become a Member so old that a great tariff bill may be passed by my party of whose terms I shall be, as the gentleman from Alabama is, entirely and woefully ignorant. [Applause.]

Under the Underwood bill, for which he voted, there was placed a tax on window glass of 28 per cent, while he was voting for free northern meats and 29 per cent on southern mica. On swaddling clothes—I am not sure whether he meant swaddling clothes for infants or for those Congressmen who have never doffed theirs, though having served five or six terms. [Laughter.] If he referred to the infant born in comparative poverty, its swaddling clothes are found to be taxed under his vote. Its swaddling clothes are made up of Carolina cotton, which was by his vote taxed at 30 per cent, while he was voting for free corn of the Northwest and 18 per cent protection on the rice of the South. If the child were born in the winter, and its swaddling clothes were flannel, we would find those garments taxed 35 per cent, for which he voted, and at the same time voted for free wheat of the North under condition, but retained a duty of from 60 to 160 per cent on the tobacco of the South. If the child had been born with a silver spoon in its mouth and in harmony therewith entitled to silken swaddling, we would find that this product of the New Jersey mills was protected by a duty of 45 per cent under his vote, and at the same time Virginia peanuts retained upon the protected list at 10 to 18 per cent and the poultry of the Northwest placed upon the free list. And finally he complains of tombstones. I find that there is a duty in the Underwood bill, for which he voted, on granite and marble from 6 to 45 per cent, while by the same vote he placed a protective duty of 15 per cent on the hair of the Angora goat of the South and placed northern wool on the free list. [Applause.]

And that reminds me that he saw fit to characterize my defense of the farmers' interests of the Northwest as the work of the sacrifical goat. Had he been awake during the tariff debate and had a lucid interval he would have recalled the discussions of that time which show that the goat under these piping Democratic times has ceased to be a term of reproach and has been exalted to the real brute aristocracy by the Democratic Party, because while they reduced the duty on the mule—hybrid emblem of his party—there was retained a protective duty of 15 per cent on goat hair, which, as Representative GARNER was reported as saying, "by the holy horns of the sacred goat, there it shall remain." [Applause.]

It is related that in the caucus debate when the goat-hair protection was being discussed, numerous Ohio Democratic Members said that it would be a reversal of the Scripture, which, in the inspired gospel of Matthew, places on the great day the sheep upon the right and the goats upon the left, giving eternal protection to the former and sending the goats to everlasting free trade or the well-known equivalent thereof. [Laughter.] Some one said, "That will be easy; we can reverse the Scriptures, we can repeal in part the Ten Commandments, we can repudiate the Baltimore platform." But the real trouble is, How can HEFLIN, when he wakes up to make a tariff speech, accommodate his stories to the situation? They are "like the laws of the Medes and Persians, they change not," and, like the poor, always with us. In looking up his record, the investigator does not seek to find how he voted—yea or nay—on any great question; he simply ascertains which of his four stories or which of his five jokes he told on that particular occasion. [Applause.]

If I am selected for some slight reproach for daring to defend the interests of my people, I find myself in good company. The Republican convention declared in favor of protecting products of the farm as are other products protected. In almost similar terms the Progressive Party so declared. The National Grange and the Farmers' Congress make substantially similar declarations. The Democratic Party in its platform did not dare declare nor did any Democratic orator of the Northwest in 1912 declare in favor of free farm products when speaking in any country district. Moreover, the farmers of the South are in favor of protecting farm products, as witnessed by the tenacity with which they insisted on protected peanuts, Angora goat hair, tobacco, and rice. When the gentleman from Alabama says that the farmers of the Northwest know that protection is not to their interests, he would unwittingly give what he regards as a compliment to them which he denies to the farmers of his own section, because the latter have not shown their opposition to protection on the farm products.

The gentleman evidently considers that his work in this direction has been like the work of the searchlight upon a great ocean liner, which can illuminate from neighboring wave to the far-off horizon, but can not throw a gleam on to its own deck. [Applause.]

Moreover, the Ways and Means Committee of this House believes that free farm products will cheapen them, as will be seen from the expressed purpose of their bill and the table presented on page 3 of the tariff-bill report. Moreover, that the free listing of meats and cereals would reduce the selling price in the United States millions of dollars is the judgment of the Ways and Means Committee of the last House in support of the free-list bill of that time, the estimate of saving to the producer and consequent loss to the seller being, by that committee, measured by one-half the tariff rate which was proposed to be removed. Moreover, in the vote in 1912 in that part of the United States where men vote their convictions and not their prejudices 3 votes out of every 5 were cast favorable to protection for farm products.

It will be some source of relief from the charge made by the distinguished gentleman from Alabama for the farmers of the Northwest to know politically who their genial self-appointed guardian from Alabama is. He represents a dainty little district beyond the swamp and back of the log which has polled, on an average, since he came to Congress 10,000 votes, about one-fifth the vote of a congressional district in the Northwest. [Applause.]

But apart from all these considerations it is always a delight to hear this philosopher of felicity and fallacy, who, if I would properly characterize him, would say "he is the personification of the voice of Alabama." Interpreted, means vocalization without attending or connected mentality. [Laughter.] He always delights, but never instructs; seldom right, usually wrong, I pay him my compliments. Viva La Heflin Tom. [Applause.]

Mr. LEVER. Mr. Chairman, I yield to the gentleman from Kansas [Mr. DOOLITTLE].

Mr. DOOLITTLE. Mr. Chairman, as a member of this great Agriculture Committee it has been my pleasure to sit in almost constant session for more than a month taking testimony, sifting facts and adjusting items, and finally voting with the other members of the committee to report this Agriculture appropriation bill to this House for passage. We listened with earnest ears to the statements of every person and expert who appeared before the committee, from the Secretary of Agriculture of the United States down. On some items we had witnesses from as far away as Montana; we insisted on first-hand information from men actually on the ground, and we got it. It was our aim to economize wherever possible without hampering efficient service, and this bill we present states our conclusions. Without going into detail, I will say that in some items we were obliged to cut the sum estimated by the various departments, while in other items, such as the appropriation to fight disease in animals, the committee increased the estimates. This bill will, of course, pass the House and the Senate without material amendment; the very maintenance of this great branch of the Government is based on its passage. The bill provides the money to furnish weather forecasts, so essential not only to the agricultural sections of the country but to all business, shipping, planting, harvesting, safety at sea, and all matters of life. It provides for the proper supervision of serums and toxins used so successfully in the treatment of diseases among animals when properly handled and when properly made. It provides for the quarantine and inspection work of the Government, and the construction of dipping vats, the breeding of live stock, chickens, and chicken feeding. We are actually trying to discover some feed that will make hens lay in the wintertime. We provide for further investigation of the diseases of grain, fruit, plants, and

vegetables. We want to stop the rust in wheat and the smut in corn; yes, and we have a very important item in the bill that goes after the chinch bug, and we propose to get him. You Members from the cities may not know what a chinch bug is, but I do. He kills millions of acres of wheat and corn every year, and, in my opinion, is the farmer's worst enemy, except drought.

The head of the department has testified that he has found a killer that will work, and your committee is presenting to you a means whereby we can put this chinch bug killer—it is a parasite—at large all over the country. We want to stop the blight in fruit trees and destroy the web worm; to endeavor to stop potato "rot" and to assist in furnishing seed grain that will grow; to encourage the movement of "back to the farm" and increased yields; the knowledge gained from actual tests and demonstrations on Government farms to the country, and show, for instance, that there is at least one kind of alfalfa that grows 3 feet high and produces four crops a year and another similar appearing kind that grows only a foot high and furnishes but two cuttings a year—and the big one produces the most seed, too—there are eight principal varieties; to protect the forests from timber thieves and forest fires; for the survey and platting of Government lands to be opened for settlement; to investigate and perfect a sucessful method of freezing, drying, storing, and transporting eggs and poultry, fish, meat, and other foodstuffs; to enforce the pure food and drugs act; to procure soil surveys that will demonstrate what cereal will best grow on different land; to investigate bee culture and attack insects that damage and destroy the garden; to print valuable information on all these lines and get it to the people most interested; to continue the experiments of the department to determine the best fat-building food for live stock and the most nutritious for human beings; to ascertain the feasibility of irrigation in districts not now considered possible and to look after drainage and prevent overflow; for inquiries regarding systems of road management and for expert demonstration and construction when required—the item will be handy when the $25,000,000 expenditure is made for State aid to highways recently passed by the House, and of which my good State of Kansas will receive about $773,750—to establish an office of markets; for the demonstration of live-stock production in connection with the $500,000 appropriation we made two weeks ago to stamp out hog cholera in this country, the scourge of the farmer and stockman and the ruination of many an honest and hardworking citizen of the Republic. And last, gentlemen, we have provided a small sum to do what we may to prevent the complete extinction of that noble old American patriarch, that pioneer of the plains, the forerunner of civilization, found now only in parks and Federal reserves, whose bones have whitened the prairies and whose hide has decorated the homes of kings and paupers—the buffalo.

These, gentlemen, are a few of the important items provided for in this bill which you will soon be called upon to pass into law. [Applause.]

Mr. LEVER. How much time have I remaining, Mr. Chairman.

The CHAIRMAN. The gentleman has 19 minutes.

Mr. LEVER. I yield 9 minutes to the gentleman from Illinois [Mr. BALTZ].

Mr. BALTZ. Mr. Chairman, the Agricultural appropriation bill, now under consideration, is a bill that interests me more than any one of the other appropriation bills, because agriculture has been my life work from boyhood until the day I came to Congress. I am still a farmer, and no one knows better than I the benefits derived by the farmers through the Agricultural Department. I want to say right here that every dollar we appropriate for the purpose of promoting agriculture is money well invested, because the country at large will be benefited through the superior knowledge farmers receive by reading the Agricultural Department literature, which in most cases has a free distribution.

Mr. Chairman, no objection to the provisions of this bill rises in my mind. I look at it simply from the standpoint of a moderately successful farmer, not an experimental farmer, who recreates on the land in the summer and piles up his wealth in the cities in the winter, or the farmer who cultivates some fad or fancy on the farm through the hands of hired employees and who pockets his losses without a regret, so long as his theories or ideas are carried out. No; it is from the view of an old-fashioned, horny-handed, early-to-bed and early-to-rise farmer that I look upon this bill and admire it. To me it is a revelation to think of the millions of dollars herein appropriated for agriculture and its many branches. It means much to the farmers of this country if they will pause and think and learn of the advantages, scientific and otherwise, which will be laid before them through the provisions of this act. No doubt the Government is doing a mighty work for agriculture, and no question but that it is being more and more appreciated by the farmers throughout the country. What astronomy has done for the navigator the Government is endeavoring to do for the farmer, and this measure is the annual portion of the foundation of that great structure which is being erected for the welfare of the men who till the land and protect and conserve the forests.

Still, is there not something more and beyond all this? Can we not secure results more rapidly than we are doing by getting closer and nearer to that great class of the farming element which reads only when work is done, and whose hours of daily labor are not controlled or regulated by any organization or State or governmental enactment?

With thousands of immigrants daily pouring in upon us from foreign shores; with farms abandoned yearly; with our population in the cities increasing by leaps and bounds; with production lessening daily, where is relief? It must be in the land, and I am one who believes that in time the pendulum will swing back to the point where farming will become a profession; when the broad acres of this country will bloom with bumper crops; when science and industry and love of nature will join hands and produce hundreds where only bushels grew before.

To bring this about, in my mind at least, there are two things necessary: First, to so educate the young, to so instill in their minds the love of the soil, the home, and the occupation that the bustle, the glare, and the excitement of the cities will not attract them, inducing them to leave the old folks on the farm, either to rent or abandon it when age shall have rendered them too feeble to care for it. Second, our education of the young—at least in the rural communities—must be conducted along different lines. Please do not understand me as opposed to education. Far from it. Yet I believe the sons and the daughters of the farmers of the present generation have been too highly educated in certain branches. It is the sort of education which drives from these pupils the love of plants and fruits and flowers; of growing and unfolding and ripening crops; of lowing kine and the scent of new-mown hay. It leads them along the pathways of higher ambitions, of (to them) loftier ideals and aspirations, to which many aspire and few attain. It beckons them to fields of luxury and ease and opulence, only in the end to vanish and leave them hopelessly shattered and deserted.

Let us, for a moment, look at conditions in this country, especially with regard to the urban and rural population. In 1800, 97 per cent of our population was rural and 3 per cent urban. In 1900 only 59½ per cent was found in the rural communities. In 1910 this was reduced to about 54 per cent, and to-day it is estimated to be not quite 50 per cent, or, for the first time in our history, the urban population is greater than the rural. No wonder the cost of living has increased. No wonder our Treasury reaped great balances from import trade. Little wonder that the people of this country applauded a tariff bill which by its provisions will increase those imports at lower prices to the consumer.

Foreign nations long ago recognized this danger of the absorption of the rural population by the cities and towns. The smaller the countries the more imminent was the danger. Denmark, for instance, only in area about as large as the State of Illinois, was among the first to see the importance of counteracting this condition. Her wise men were wise indeed. Their remedy was education; not the education of which I spoke a moment ago; not the university in the populous centers; not the school of arts and languages. Better than this, they established schools among the people; they carried education of the proper sort to the homes of agriculturists. There are schools for the young, for the youths, for the men and women—"grown-up" schools they call them. From the moment the youth of 5 enters these schools until he has completed a course at his agricultural college there is instilled in his mind love of country, love of home, and love of the soil. He is instructed in farming and how to make it pay. He is taught how to establish a home on the farm and how to live contentedly in it. He is grounded in the belief that the farmer, the producer, the furnisher, is the most useful, the most independent, and the most desirable citizen. And all this labor and expenditure has paid. In 1840 of the total population of Denmark, 85 per cent was rural; in 1890 that population had fallen to 21 per cent; in 1901 it rose to 28 per cent; and in 1906 it had grown to the unbelievable degree of 90 per cent. This wonderful result is a glowing tribute to Denmark's system of education in the rural communities. Her present contentment, prosperity, and happiness are due to nothing else.

So to one whose education has been neglected, who has never been won by the lure of the cities, but who still believes that in the farm is hidden the jewel of harmless prosperity and real content, it seemed permissible at this time that he might intrude his views upon this House, and venture the hope that at some no distant day, in a measure such as we are now considering, provision might be made for the education of the young of our rural communities along the lines which will instill into their minds the fact that agriculture is a worthy occupation; that will teach them that the farm, large or small, is a little kingdom, a monarchy all their own, where no whim of fortune, no depression of business, nothing but a nation-wide disaster, can upset their thrones or bring want to their doors.

The farmer can use all the honorable means that any business man invokes. He can do more. He can watch every dollar of his profit grow and can rest easily and comfortably in the thought that its growth is not taking away from another that which he has thus earned.

I thank you for your attention. [Applause.]

Mr. LEVER. Mr. Chairman, I have but one speech on this side. I shall be glad if the gentleman from Iowa will use some of his time.

The CHAIRMAN. The gentleman from Iowa [Mr. HAUGEN] has 13 minutes left.

Mr. HAUGEN. I yield back my time, Mr. Chairman.

Mr. LEVER. Then I yield 10 minutes to the gentleman from Alabama [Mr. HEFLIN]. [Applause.]

Mr. HEFLIN. Mr. Chairman, it is very evident that my speech on yesterday has greatly disturbed the high-tariff champion of Nebraska. I felt it my duty to give the gentleman a word of warning before it was everlastingly too late—to tell him of the dangers that lurk along the highway of Republican protection, and to warn him of the political pitfalls and quagmires that await his footsteps if he continues to advocate the repudiated high-tariff doctrine of the old stand-pat Republican Party. It was my purpose, Mr. Chairman, to prevent, if I could, the repetition of the thoughtless and inexcusable blunder of the gentleman—that of standing here in this enlightened age trying to convince the farmers of the country that it is to their interest to have added to the price of their necessities the additional burden of a tariff tax. But, Mr. Chairman, it seems that I have warned and pleaded in vain with the gentleman from Nebraska. Some people stumble over a situation and never see it. They have eyes to see and see not, ears to hear and hear not, minds to understand and understand not. Let me paraphrase the Scripture, and say the wise man foreseeth the evil and hideth himself, but the foolish pass on and are punished.

The American farmer can no longer be deceived and imposed upon by the agents and advocates of high protection. He has suffered long at the hands of the Republican Party. If he had in his pocket now the money that your party has wrung from him through unjust and burdensome tariff taxes, he could enjoy more of the comforts and conveniences of life. Be it said to the everlasting credit of the farmer that he has at last repudiated the system that gave him 10 cents in a tariff tax on what he had to sell and took from him 90 cents on what he had to buy.

Mr. Chairman, if the gentleman from Nebraska had been any kind of a philosopher the old standpatters over there could never have imposed on him as they did when they induced him to appear and seriously contend that a tariff tax benefits the farmer. They never could have persuaded him to mount that old tricky protection steed and proclaim that a tariff tax helps the farmer. If he had been even a feeble philosopher, he would have observed that many gentlemen on that side were thrown by that old protection steed in the last campaign, and he would have profited by their example.

But, Mr. Chairman, in this connection I am reminded of the story of old Uncle Rufus. Uncle Rufus said, "The trouble with the rising generation is they don't know how to ride a mule nohow. The way to ride a mule is to draw the reins close up on his neck, mount him, slip your feet under his forelegs, and stay wid him. Now I want all you little niggers to gather around here and watch Uncle Rufus ride dis mule. Now, you see I am gwyne to draw de reins close up on his neck, and den I am gwyne to mount him and slip my feet under his forelegs and stay wid him." One little nigger who had observed some of the antics of the mule said, "Yas, sir; maybe." [Laughter.] When Uncle Rufus mounted the mule he went up in the air in the shape of an interrogation point, darted to the right, wiggled like an eel, and threw Uncle Rufus 3 rods away in the plowed ground. [Laughter.] Uncle Rufus got up very much humiliated but still retaining his wit. As he brushed the dust from his clothes he said, "Dat's de way to do it. Whenever you see they are gwyne to throw you, git off uv 'em." [Laughter and applause.] I recommend the story of old Uncle Rufus to the gentleman from Nebraska and advise him to "git off uv 'em." [Laughter and applause.]

Mr. Chairman, in reply to the gentleman's speech pleading for the old tariff-tax system that oppressed the farmer and nearly everybody else, I read in this House yesterday what Senator CUMMINS, a Republican Senator from the Western State of Iowa, said about the tariff and the claim that it benefits the farmer. The Senator from Iowa contended in that speech that the farmer was not benefited one cent by the protective tariff.

Now, I want to read to the gentleman what the master of the Washington State Grange, Mr. C. B. Kegley, said upon the subject. He said:

> The businesslike course open is for the farmer to fight the system—not to continue it, but to smash it.

I place these two western witnesses against the rehashed and warmed-over protection argument of the gentleman from Nebraska. For a long time you deceived the farmer, and when he achieved prosperity, not by reason of but in spite of the tariff-tax system of your party, you told him that the tariff had brought him those blessings and benefits. He has at last realized that you were robbing him for the benefit of those who were creating monopolies and trusts. But I want to say to the gentleman that the farmer refuses longer to kiss the hand that smites him. [Applause.]

Senator CUMMINS expresses the view of the farmer when he says protection does not benefit him one cent, and the master of the State Grange of Washington expresses their determination when he says, "Let us no longer dally with it, but let us smash it." The farmer lived under the system of high protection for 16 years, but, with all its boasted blessings and benefits, no farmer in the length and breadth of the country has accumulated a fortune and retired to count his accumulations and clip his coupons. But trust magnates and tariff barons have flourished and multiplied under that system. Take Carnegie, for instance, who wrung tribute money from every farmer in the country on every implement in which there was steel. In three years, under the Dingley tariff law, his fortune increased from $10,000,000 to $360,000,000.

The gentleman from Nebraska can not deceive the farmer into believing that this Democratic Congress has injured him. This Democratic Congress and the House preceding it have enacted laws for the benefit of the farmer that a Republican Congress failed and refused to enact for 16 long years. Epidemics of hog cholera have seriously injured the farmer in many sections, but it remained for a Democratic Congress to make the first appropriation to check that disease. It remained for a Democratic Congress to establish in the Department of Agriculture the Office of Markets. And, Mr. Speaker, I want to remind the gentleman from Nebraska that it remained for a Democratic House at this session of Congress to pass an appropriation of $25,000,000 to build roads leading to the homes and farms of the farmer. The Democratic Party has done more for the farmer in 12 months than the Republican Party did in 16 years. The present Agriculture appropriation bill is teeming with provisions that look to the benefit of the farmer. [Applause.]

The CHAIRMAN. The time of the gentleman has expired, all time has expired, and the Clerk will read the bill under the five-minute rule.

The Clerk read as follows:

Salaries, office of the Secretary of Agriculture: Secretary of Agriculture, $12,000; Assistant Secretary of Agriculture, $6,000; Solicitor, $5,000; chief clerk, $3,000, and $500 additional as custodian of buildings; private secretary to the Secretary of Agriculture, $2,500; stenographer and executive clerk to the Secretary of Agriculture, $2,250; 1 appointment clerk, $2,000; 1 chief, supply division, $2,000; 1 inspector, $2,750; 1 law clerk, $3,000; 2 law clerks, at $2,500 each; 7 law clerks, at $2,250 each; 1 law clerk, $2,200; 8 law clerks, at $2,000 each; 4 law clerks, at $1,800 each; 3 law clerks, at $1,600 each; 1 expert on exhibits, $3,000; 1 telegraph and telephone operator, $1,600; 4 clerks, class 4; 8 clerks, class 3; 11 clerks, class 2; 21 clerks, class 1; 1 accountant and bookkeeper, $2,000; 9 clerks, at $1,000 each; 8 clerks, at $900 each; 1 clerk, $840; 15 messengers or laborers, at $840 each; 11 assistant messengers or laborers, at $720 each; 1 chief engineer, $2,000; 1 assistant chief engineer, $1,400; 1 assistant engineer, $1,200; 2 assistant engineers, at $1,000 each; 8 firemen, at $720 each; 8 elevator conductors, at $720 each; 1 construction inspector, $1,400; 1 cabinetshop foreman, $1,200; 4 cabinetmakers or carpenters, at $1,200 each; 2 cabinetmakers or carpenters, at $1,100 each; 8 cabinetmakers or carpenters, at $1,020 each; 2 cabinetmakers or carpenters, at $900 each; 1 electrician, $1,100; 1 electrical wireman, $1,000; one electrical wireman, $900; 2 electrician's helpers, at $720 each; 2 painters, at $1,000 each; 2 painters, at $900 each; 5 plumbers or steam fitters, at $1,020 each; 1 plumber's helper, $840; 2 plumber's helpers, at $720 each; 1 blacksmith, $900; 1 lieutenant of the watch, $1,000; 2 lieutenants of the watch, at $960 each; 38 watchmen, at $720 each; 5 mechanics, at $1,200 each; 2 skilled laborers, at $960 each; 1 janitor, $900; 21 assistant messengers, messenger boys, or laborers, at $600 each; 19 laborers or messenger boys, at $480 each; 1 charwoman, $540; 2 charwomen, at $480 each; 15 charwomen, at $240 each; for extra labor and emergency employments, $14,000.

Total for office of the Secretary, $329,830.

Mr. FOWLER. Mr. Chairman, I reserve a point of order against the paragraph. I desire to direct the point of order

particularly to the salary of the Assistant Secretary of Agriculture. On February 9, 1889, the Department of Agriculture was created, and fixed the salary of the Assistant Secretary of Agriculture at the same as the Assistant Secretary of the Interior, which was at that time $4,500.

Mr. Chairman, since that time there has been an appropriation in violation of that statute, increasing the salary to $5,000. I therefore make the point of order against the same, carried in the bill, $6,000, for the Assistant Secretary of Agriculture.

Mr. LEVER. Mr. Chairman, I concede the point of order and offer the following amendment.

The CHAIRMAN. The point of order is sustained.

Mr. LEVER. I offer an amendment. On line 1, page 2, after the dollar mark, insert the figure "5" in lieu of the figure "6."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 2, line 1, by inserting the figure "5" instead of the figure "6" after the dollar mark, so that it will read "$5,000."

Mr. FOWLER. Mr. Chairman, I reserve a point of order to the amendment.

Mr. LEVER. I submit, Mr. Chairman, that the point of order is not well taken. The last appropriation act, the current law, contained that provision, which was inserted in the Senate and is in the law at this time. I call particular attention to this language:

And hereafter every officer or employee of the Department of Agriculture whose rate of compensation is specified herein shall receive compensation at the rate so specified.

I submit that this is permanent law and controls the salaries in this bill.

The CHAIRMAN. Does the gentleman from Illinois make the point of order?

Mr. FOWLER. I make the point of order, and I desire to be heard on it. Mr. Chairman, the statute to which I referred creating the Department of Agriculture fixes the salaries of only a very few of the employees, among which was the Assistant Secretary of Agriculture. If the last act appropriating for the Department of Agriculture is to be construed as fixing permanently the salaries of all of the officers whose compensation is carried in this bill, it is very unfortunate, Mr. Chairman, that these two lines and a half should be tacked on to an appropriation bill for the purpose of dealing with these great problems of fixing salaries for the employees of a great department.

If there is one thing needed in this Congress, it is a committee in each one of the great departments of this Government for the purpose of classifying the employees in the departments and classifying and grading the salaries therein. I can not think, Mr. Chairman, that it was intended by the Agricultural Committees in both branches of Congress to undertake to fix these salaries in this bill as permanent salaries hereafter. If that was the intention, Mr. Chairman, it is most unfortunate for Congress. In the hands of a small number of people, a conference committee dealing with the grave problems like this, where Congress has not had the opportunity to hear, discuss, and determine the wisdom of such change—I say if such legislation is to be taken as permanent legislation fixing the salaries of the employees of the Agricultural Department it certainly is unfortunate for this Congress and for the people of the United States.

It is not known to the people how easy it is to make legislation by a conference committee. Their report comes into the House, with no right on the part of any Member to object or offer amendments, and no right to be heard, and I say, Mr. Chairman, I can not believe that the gentlemen who constituted that committee intended to fix the salaries of the various employees of the Agricultural Department. If that was true, then how unfortunate it is that at the very next session of Congress an effort should be made to raise the highest salaried office save one carried by the bill. If that be true, that these two lines and a half were intended to fix permanently the salaries, then it applies to the Secretary of Agriculture the same as it does to the Assistant Secretary. His salary, like the Assistant's, was fixed by an act many years ago by permanent law, and has been increased thereafter by a like permanent law, by a bill brought into this House for the purpose of discussing it regularly, so that every Member of the House might be heard upon it. I repeat, Mr. Chairman, that I can not think that it was the intention of the conference committee to permanently fix the salaries. If that were true, it was an evasion of the rights of Members of Congress, who have made points of order against unreasonable increases in salaries. I say again, Mr. Chairman, if this committee proceeds in that way hereafter it will not meet with the approval of the people of the country, because some man on the floor of this House will expose it.

Mr. MANN. Mr. Chairman, last year the Agricultural appropriation bill, now in force for the current fiscal year, carried the item, "Assistant Secretary of Agriculture, $5,000." In the bill presented this year it is proposed to increase the salary to $6,000. That has gone out on a point of order. The gentleman now in charge of the bill offers an amendment to restore the appropriation to what the existing salary is, at $5,000. My colleague [Mr. FOWLER] has made a point of order to that on the ground that the law providing for the Assistant Secretary provided for a smaller salary. In the first place, I very much regret that anyone should invoke the technical rule of the House as to the salary carried in the bill. This office is held by Dr. Galloway, for many years the head of the Bureau of Plant Industry in the Department of Agriculture, who was promoted by the President, without any regard whatever to politics, to be Assistant Secretary of Agriculture. This was not a political appointment. Dr. Galloway stands at the very head, in my opinion, of agricultural study and development in this country. In the office of Chief of the Bureau of Plant Industry he rendered as much service to the country, to the farmer, and to all of the people of the country as any one man has ever rendered in the same length of time. I think his salary ought to be increased to $6,000. I think he ought to receive as high a salary as the Chief of the Weather Bureau—a division under him—receives, and I hope that when this bill passes the House and goes to the Senate the Senate will amend it in this respect and make it $6,000; and, if it does, it is very certain that no one person can prevent it going into the law at $6,000.

On the point of order the current law provides that—

Hereafter every officer or employee of the Department of Agriculture whose rate of compensation is specified herein shall receive compensation at the rate so specified.

The amendment now offered proposes to fix the salary of this officer at the rate which was specified in the current law, wherein this item of legislation appears, and we have considered for years that inserting the word "hereafter" in the bill makes it permanent law. So that the salary of the Assistant Secretary of Agriculture is now $5,000 a year.

Mr. LEVER. And the gentleman from Illinois knows, Mr. Chairman, that the Comptroller of the Currency has held time and time again that the use of the word "hereafter" makes permanent law.

Mr. MANN. Yes; and that has always been held by the Chair. My colleague criticizes the conference committee because this item appears in the current law. It never lies in the mouth of a man who seeks himself to invoke a technical rule to complain about technicalities in other people. I do not know how anyone has the license to criticize Congress for having inserted this item in the agricultural appropriation law of last year; but certainly, when one Member here tries to invoke the rule himself and all the other Members of Congress are opposed to him, as is the case in this particular proposition, he can not criticize because a committee of conference did something by inserting a particular word in a bill. I do not believe there is a single Member of the House, with the exception of my colleague, who would reduce Dr. Galloway's salary from $5,000 to $4,500, and I doubt if there is another Member of the House who would not favor the increase from $5,000 to $6,000. My district is not an agricultural district. I come from the city that helps to pay the taxes for the maintenance of this department, and I am glad to represent a people who are proud to have a chance to contribute money for the payment of a salary to a man like Dr. Galloway, and I am surprised that any gentleman on the floor of the House representing an agricultural district should seek to strike down the Agricultural Department. [Applause.]

The CHAIRMAN. The Chair will rule that the point of order is not well taken, and therefore overrules the point of order. The question recurs on the amendment offered by the gentleman from South Carolina.

The amendment was agreed to.

Mr. FOWLER. Mr. Chairman, I now make the point of order against the salary of $5,000 for the Solicitor, and I desire to be heard upon that.

Mr. MANN. That is the same situation exactly.

Mr. LEVER. Exactly.

Mr. MANN. The salary is $5,000 in the current law.

The CHAIRMAN. Let me ask the gentleman a question. It is conceded that $5,000, the amount stated in this bill, is the amount carried in the current law?

Mr. LEVER. That is the fact, Mr. Chairman.

Mr. FOWLER. Mr. Chairman, what I was trying to determine was as to who had the floor.

The CHAIRMAN. Does the Chair understand the gentleman from Illinois to make a point of order against that particular part of the paragraph?

Mr. FOWLER. Yes; and I desire to be heard on the point of order.

The CHAIRMAN. The Chair will hear the gentleman briefly.

Mr. FOWLER. Mr. Chairman, up to 1905 the agricultural appropriation bill carried a provision for a law clerk at the sum of $2,500. During the consideration of the bill for that session of Congress it was contended that there was no use for a law clerk, but there was use for a solicitor, and the argument was then made that in order to dignify the position there ought to be some dignified word invented and applied so that the Nation at large might know how important that office was. So "law clerk" was omitted entirely as a useless adjunct, and in lieu thereof "solicitor" was created, at a salary of $2,500, but at the next session of Congress "law clerk" was revived, at a salary of $2,000. The solicitor's salary has repeatedly been increased annually from $2,500 in 1905–6 to $3,000 in 1906–7, to $3,500 in 1907–8, to $4,000 in 1908–9, to $4,500 in 1909–10, and to $5,000 in 1911–12. Not only that, but from that time we began to see an extravagance in the "law clerk" after his new advent in 1906 until, instead of having an increased salary of one man—the "solicitor"—we have seen the "law clerks" grow in number until to-day there are 26 altogether with this same solicitor, carrying the enormous salaries of $58,950 instead of the sum of $2,500, less than 10 years ago.

The CHAIRMAN. Will the gentleman permit the Chair just to make a suggestion or an interruption? That perhaps will go to the argument of the merits of the proposition; but what the Chair wants to hear, if the gentleman desires to discuss it, is the question of the point of order.

Mr. FOWLER. Mr. Chairman, I presume that if the Chair is going to hold the act of 1913 as permanent law it applies to this solicitor the same as it does to the Assistant Secretary of Agriculture.

Mr. LEVER. I call the gentleman's attention to the fact that the Chair has already held that.

The CHAIRMAN. Then the Chair will say again in his opinion we have got to assume at least that Congress intended what it said when it included in the current bill this language:

> Hereafter every officer or employee of the Department of Agriculture whose rate of compensation is specified herein shall receive compensation at the rate so specified.

Now, as was correctly stated by the gentleman from Illinois [Mr. MANN], it has been repeatedly, and as far as the Chair knows always, held that the word "hereafter" makes permanent law. That being true and it being a fact that the amount specified in the present bill as the salary of the solicitor is the same as in the current law, it naturally follows that the Chair will be compelled to overrule the point of order raised by the gentleman from Illinois [Mr. FOWLER].

Mr. FOWLER. Mr. Chairman, I make a point of order on the words "One accountant and bookkeeper, $2,000," in lines 12 and 13, page 2. It is not an office which was carried by the bill in which it is claimed the permanent law was passed.

Mr. LEVER. Mr. Chairman, if the Chair will return me my copy of the old act, I will be obliged to him.

Mr. MANN. That is a new office.

Mr. LEVER. Mr. Chairman, I will say that it is not in fact a new position, but it is a transfer, as I recall the fact, from the Division of Accounts—the same man, with the same amount of salary, and the office the same.

Mr. MANN. Suppose it is a new office; what is the difference?

Mr. LEVER. It is not subject to a point of order even if it were a new provision.

Mr. MANN. No.

Mr. LEVER. It is a transfer, as I have said, from the Division of Accounts. Members will remember that under an act of Congress a few years ago the Division of Accounts in the Department of Agriculture was directed to be reorganized, with the purpose of decentralizing its work and compelling each head of a bureau to be responsible for his own accounts; and this is in line with that, and it is only a transfer, and of course it would not be subject to a point of order even if it were absolutely a new place, because the Secretary of Agriculture has a right to employ persons to carry out the purposes of the creation of the department.

Mr. FOWLER. Mr. Chairman, if this law which my colleague from Illinois has been stoutly invoking and which the chairman of this committee is invoking is worth anything, it is worth nothing more nor less than this, to establish the character of offices in the Agricultural Department and to fix the salaries thereof. I repeat, Mr. Chairman, that if the act of 1913 is worth anything, it means that Congress intended to fix the character of the offices in the Agricultural Department and to fix the salaries in those offices. If that be true, and if the contention of the gentlemen who have just been arguing this question is to be taken as the basis on which to found a ruling of the Chair, then this is a creation of a new office entirely, which is subject to the point of order.

Mr. LEVER. Will the gentleman yield for a moment?

Mr. FOWLER. Certainly.

Mr. LEVER. While I call the attention of the gentleman, and also the attention of the Chair, to section 523 of the Revised Statutes, which reads as follows:

> The Commissioner of Agriculture shall appoint a chief clerk, with a salary of $2,000 a year—
>
> And so forth—
>
> and he shall, as Congress may from time to time provide, employ other persons for such time as their services may be needed, including chemists, botanists, entomologists, and other persons skilled in the natural sciences pertaining to agriculture.

And the Chair has held a hundred times that under that language we had a right to create a new place in this bill.

Mr. FOWLER. Mr. Chairman, the distinguished chairman of the Committee on Agriculture unfortunately mistakes the power granted in that law. It is when an emergency arises that additional labor may be employed, and not for the purpose of dealing with permanent offices that have been created by law.

Mr. Chairman, it has been repeatedly held that where the statute fixes a number of offices and the salaries thereof, a new and distinct office can not be tacked on as a rider to an appropriation bill. And that is just what this means in the light of the act of 1913. Here was an act undertaking to fix the salaries and the number of offices in the Agricultural Department.

Mr. LEVER. The gentleman is entirely mistaken. It fixes the salaries and not the number of offices.

Mr. FOWLER. And if it is to take any precedence whatever, it is to do away with all other laws on this subject. And if that be true, Mr. Chairman, as I verily believe in the light of the investigation of that act, then this is a new office entirely, which can not be created as a rider on an appropriation bill.

Now, if the officers are classified and graded as they ought to be, this condition would not arise. I am surprised to find the officers of this great department in an uncertain and loose condition. No greater opportunity for political graft ever presented itself to a legislative body. Were the various positions in this department graded and classified as grades 1, 2, 3, 4, and so forth, carrying servants in each grade, it has been held, Mr. Chairman, that the number of servants in one or more of the grades may be increased, but where no such grades exist and a new position is proposed in an appropriation bill, as is the case here, it has been uniformly stricken out on a point of order.

Mr. TAYLOR of New York. Are you aware of the fact that the Secretary of Agriculture did go through the entire department, regrade all his officers and make certain changes and transfers, and that all through this bill there are statements of that fact?

Mr. FOWLER. I am aware of the fact that he did not do it.

Mr. TAYLOR of New York. Why, he did. He changed all these offices. He went through all the departments and graded some of the offices, and changed some of them and put them in other locations.

Mr. FOWLER. I desire to say to the gentleman that that duty devolves upon Congress, and not upon the heads of bureaus. I want to say to him that there lies one of the great evils in government, namely, for Congress to be governed and controlled by the heads of the bureaus and departments. Shall we give up this Congress to the whims and caprices of chiefs in the departments, or shall we stand up here like men, like students and statesmen, legislating for the good of this country?

Mr. TAYLOR of New York. Mr. Chairman, may I ask the gentleman whether he has read——

Mr. FOWLER. I yield for a question only.

Mr. TAYLOR of New York. Have you read the estimates of the Secretary of Agriculture in the report which he sent to this House?

Mr. FOWLER. I desire to say to the gentleman that the Secretary of Agriculture has no authority under the law to report estimates to Congress. That duty devolves upon the Secretary of the Treasury, and you had better inform yourself on that question.

Mr. TAYLOR of New York. Have you read his estimates? Are you acquainted with them?

Mr. FOWLER. I have read them.

Mr. TAYLOR of New York. Do you know that in his estimates he made certain recommendations, and do you know that he did make certain transfers and changes and grades in his offices?

Mr. FOWLER. I repeat that he had no right to make a recommendation of estimates to this Congress.

Mr. TAYLOR of New York. Do you not know that he has done it, as a matter of fact, whether he had a right to do so or not? Do you not know that he did the very thing you wanted him to do?

Mr. FOWLER. I would pay no attention to any recommendation made without authority.

Mr. TAYLOR of New York. Well, do you not know that it has been done, as a matter of fact, namely, the very thing you want done, the grading of these offices?

Mr. FOWLER. I know the Secretary of the Treasury has submitted estimates, and I have examined all of them, if that will satisfy the gentleman.

Mr. TAYLOR of New York. Do you know, as a matter of fact, that these estimates were submitted, that these offices were transferred, and regraded, and reclassified, for the purpose of making the department more efficient? Are you acquainted with that fact?

Mr. FOWLER. I have answered the gentleman. There has been no such classification as provided for by law.

Now, Mr. Chairman, I repeat that this is a new office, created solely by an appropriation bill in the form of a rider. Now, Mr. Chairman, my distinguished friend the chairman of this committee is a good man, and I know his heart is bent on good. I am sorry I can not say as much regarding some of the rest of my friends. [Laughter.] My colleague from Illinois [Mr. MANN], the gentleman who has just taken his seat, made a great laudation of the Assistant Secretary of Agriculture. I have nothing to say against him. He made the same laudation of the Chief of the Weather Bureau, who was compelled to surrender his position by an order of the Executive of the United States. Was my colleague [Mr. MANN] mistaken when he used the following language concerning Mr. Moore's management of the Weather Bureau, found on page 1815, CONGRESSIONAL RECORD, second session Sixtieth Congress?—

I think, from my own knowledge of the situation, that this service is the most economically administered service, with the work that has been done, in the governmental service anywhere; that the chief of that service is more careful about the expenditure of money; that he gets the best results from the expenditure of money, and gives way a fewer number of times to extravagances than any other chief in the service. * * * It seems to me it would be worth a good many thousands of dollars if Congress would advertise that where a bureau chief insists not only upon economy in the service under him, but himself exercises economy in making his appointments and does not ask for excessive appropriations, that in such a case we will slightly increase his salary. I think that under the circumstances the chief of this service is worth the money for the work that he has done.

Mr. Chairman, this matter interests me only as a Member of Congress and as a citizen, but I insist that before new positions are created they shall go through the regular channels and be presented by a bill to be considered by this House and by the Senate. No other honorable way can be pursued.

Now, Mr. Chairman, I feel that the point of order ought to be sustained in this case.

Mr. LEVER. Mr. Chairman, I hardly think it is necessary to argue that point of order further. I want to say, however, once and for all, that as a member of the conference committee which permitted this language, against which my friend from Illinois directs his attack, to go into the law, I have no apologies whatever for it. I can demonstrate to this committee very easily that the employees of the Department of Agriculture are probably the lowest-paid employees in the Government service. The Committee on Agriculture believes that the employees of the Department of Agriculture, who are devoting their lives and their time and their energy and their minds to the development of better agricultural methods and the bringing together of scientific information that will be of value to this great country, are entitled to as good salaries as are paid to other officers and employees of this Government.

I want to call these facts to the attention of my good friend from Illinois—and he is my good friend and I am going to make him keep on being. The Bureau of Standards pays higher salaries than does the Department of Agriculture. The Director of the Bureau of Standards receives $6,000—the amount that the committee thought that the Assistant Secretary of Agriculture should be entitled to. The Director of the Geological Survey receives $6,000. I wonder if anybody believes that the duties of the Director of the Geological Survey are comparable to the duties and the importance of the position of the Assistant Secretary of Agriculture?

Mr. FOWLER. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. LEVER. I yield to the gentleman; yes.

Mr. FOWLER. Why did you not cut down, then, the salaries of the Bureau of Standards, instead of trying to increase these?

Mr. LEVER. May I ask the gentleman why he himself does not do that? He is the "watchdog of the Treasury," not the gentleman from South Carolina. [Laughter.]

Mr. FOWLER. But the gentleman from South Carolina is the chairman of this great committee.

Mr. LEVER. The gentleman from Illinois, of course, knows, I hope, that the chairman of the Committee on Agriculture has no jurisdiction whatever over the Bureau of Standards. The gentleman knows that, does he not?

Mr. FOWLER. Yes.

Mr. LEVER. I thought so. The Director of the Reclamation Service draws a salary of $7,500. One of his consulting engineers also receives $7,500. One engineer is paid $6,500. Another is paid $6,000. In the Bureau of Mines—a new bureau—the director has a salary of $6,000. I understand that the Assistant Postmasters General, four of them, receive salaries of $6,000 each; and with all due deference to them—because I think they are all faithful men—I do not hesitate to say that I do not believe that there is in the Government service to-day a man who is more efficient, more capable, and more energetic than Dr. Beverly T. Galloway. [Applause.] I have no apology, either for myself or for my committee, for trying to put the salaries of the great Department of Agriculture, the farmers' department, upon an equality with the salaries of lesser departments and of less important bureaus in this Government. [Applause.]

Now, Mr. Chairman, as to the point of order, the Chair has already held that the language in the current law fixes the salaries of that bill. I want to direct the attention of the Chair to section 523 of the Revised Statutes, which he has already read and to which I have already directed his attention, and call his attention to the fact that precedent after precedent can be found in the debates on this very bill, holding that we do have the right to create positions in the nature of employees in the Department of Agriculture.

Mr. FOWLER. Mr. Chairman, will the gentleman yield?

Mr. LEVER. I yield.

Mr. FOWLER. The gentleman says that the act of 1913——

Mr. LEVER. The act of 1913-14, covering the fiscal year 1914——

Mr. FOWLER. Yes; fixes the salaries. Is it possible——

Mr. LEVER. I do not say it. The Chair has said it.

Mr. FOWLER. Is it possible to fix salaries without fixing positions for the salaries?

Mr. LEVER. Surely. This paragraph in the act for 1914 provides—

And hereafter every officer and employee of the Department of Agriculture whose rate of compensation is specified herein—

Not hereafter—

shall receive compensation at the rate so specified.

It does not preclude us from exercising the right to add, under the rules of this House and in accordance with the fundamental law, other employees whose salaries may be fixed from time to time as Congress sees fit to fix them.

Mr. FOWLER. But it does provide only for those who were in the last bill.

Mr. LEVER. It provides for the salaries for those who were carried in the last bill.

Mr. FOWLER. Only.

Mr. LEVER. Not at all. That does not preclude the adding of others if Congress wants to do it.

Mr. Chairman, I ask for a ruling.

The CHAIRMAN. Does the gentleman from Illinois [Mr. MANN] want to be heard?

Mr. MANN. Yes. I wish to be heard, Mr. Chairman.

This is a very important proposition. It involves all of the bill; not merely the item that the gentleman makes the point of order on, but the rest of the bill, too.

The departments of the Government have certain authority granted to them for the appointment of employees of the departments. The employees of a department are never named in the law creating the department. We provide for the chief of a bureau, or an accountant, possibly, and a chief clerk, or something of that sort, and other employees, to be provided for by Congress in different language in different laws. Of course it is manifestly impossible in creating a department or a bureau to indicate the number of clerks that shall be employed in that department or bureau, because necessarily, with the passage of time and the growth of the Government, the work done by any bureau increases if it is doing active work, and if it is not it is likely to decrease, so that it is impossible in any organic act to name the employees and fix their salaries.

Now, it has been held consistently for many years that, as to the salary of an employee, the current law fixes it. That is impossible in a new law. That was a purely arbitrary ruling in the first instance. Of course in this particular case that question is not involved, because we have here a specific law, enacted last year, making the salaries of the current law the

legal salaries. That is the item that has already been referred to.

It has also been consistently held that the insertion of a provision for an office in one appropriation law is no authority for inserting it in the next appropriation law. In other words, the consistent ruling is that while you may create an office in an appropriation bill, that is considered created only for the fiscal year and has no existence beyond that unless it is carried in another appropriation law; that is, it is not permanent law. So that when we come to a question like this we have to determine whether you have authority to insert an item for an office under the authority which the department has to make use of its employees or to employ clerks or other employees.

Now, there is no distinction between the item here that my colleague makes the point of order on and almost every other item in this paragraph and almost every other item in the bill that refers to an employee. There is no provision of law, outside of the appropriation act, for more clerks. There is no provision of law for messengers. There is no provision of law for one assistant chief engineer or for one assistant engineer or for two assistant engineers or for eight firemen and things of that sort.

Mr. FOWLER. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. MANN. In just a moment—except that they are carried in the current appropriation law, which is not sufficient, unless we say that the organic act providing for the department authorizes the Secretary of Agriculture to employ these employees when provided for by Congress; and it has always been ruled that as to the ordinary employees of a department the organic act is a sufficient authority to authorize the appropriation for those ordinary employees in the appropriation bill. That does not refer to some fanciful office. Here is the item: One accountant and bookkeeper. The Chair knows and will take official notice of the fact that no department of the Government can operate without an accountant and bookkeeper. It is just as much necessary as it is to have an engineer to take care of the furnaces and to turn on the steam heat. You might provide a Department of Agriculture that would only be in operation during the summer time; that would not require heat; but the Chair knows that you can not operate the Department of Agriculture without an engineer to handle what is necessary for heat and power, and the Chair knows that you can not operate the Department of Agriculture without a bookkeeper; and the authority to the Secretary of Agriculture in the organic act to employ other persons or other employees is sufficiently broad to authorize Congress to make an appropriation for this person, who is an ordinary employee of such department. Now I yield to my colleague.

Mr. FOWLER. The positions to which you have referred, such as the law clerk, telephone operators, and messengers, have been created heretofore, have they not?

Mr. MANN. They have not been created, except in the sense that they are carried in the appropriation act, which, so far as those offices are concerned, is good only for the current fiscal year. That is not permanent legislation at all.

Mr. FOWLER. The last appropriation act has always been regarded as the law for a position, has it not?

Mr. MANN. It has never been regarded as the law as to the creating of positions. It has always been regarded as the law as to the fixing of a salary of a position which is provided for.

Mr. FOWLER. But this is an effort to create an entirely new office which has not heretofore been carried by an appropriation bill.

Mr. MANN. That does not make any difference at all.

Mr. TAYLOR of New York. Is it not a fact that the duties of the Department of Agriculture have been added to from time to time by the food and drug act and other acts?

Mr. MANN. That is undoubtedly the fact.

Mr. TAYLOR of New York. Does not that increase the need for a law clerk?

Mr. MANN. That does not affect the point of order. That affects the desirability of having the offices. Let me remind the Chair that some years ago—I think possibly before the present incumbent of the chair was a Member of the House; I know before my colleague the gentleman from Illinois [Mr. FOWLER] was a Member of the House—the gentleman from Georgia [Mr. HARDWICK] and my colleague then from Illinois, Mr. Prince, started to tear to pieces one of the appropriation bills of the House.

We were considering the legislative, executive, and judicial appropriation bill. These two gentlemen made points of order upon every item in the bill as far as it was ever read, and the gentleman who was then occupying the chair held that unless an office was particularly provided for by law, practically by name, the item was subject to a point of order; and as far as the legislative bill was read, after my two distinguished friends were through with it, it looked like a skeleton. There was nothing left in it. That was the ruling of the Chair; but that ruling never was followed after that time. It became perfectly apparent that if the House was to sustain—which it did not on that occasion—the position that in order to have a place in an appropriation bill fixed by name you had to have a law specifically authorizing that place, you could not ever pass any appropriation bill through the House, and we would absolutely turn the functions of this House over to the Senate, where such rules did not prevail. Since that ruling every Chairman has overruled the decision made at that time, and has held that the natural and ordinary offices in a department are authorized to be carried in an appropriation act by the provision in the organic act authorizing the heads of the departments to employ other necessary employees.

Mr. LEVER. Let me call the gentleman's attention to another illustration. The gentleman will recall that several years ago I myself attacked the authority of the Secretary of Agriculture to appoint the so-called Remsen Board, and made the point of order on the floor of the House, which was debated here for several hours, as I recall it; but the Chair then held, although I was taking a position opposite to that which I take now, that under the words "as Congress may from time to time provide employ other persons," under the words "other persons" he had the right to appoint that Remsen Board.

Mr. MANN. If the Chair will permit one other suggestion, I have made this same argument every year at the beginning of the consideration of the Agriculture appropriation bill, certainly for more than 10 years, and every year, up to the present time, the Chair has sustained my contention that those items in the bill were in order, and that no one could object to them by making a point of order that an ordinary position could not be newly created in the bill.

Mr. FOWLER. Mr. Chairman, I desire to say that since my short service in this House, where a new position different to any other position in an appropriation bill has been offered to be created, when a point of order has been interposed against it that point of order has been sustained; but the rule that my colleague from Illinois [Mr. MANN] refers to is this, that where there has been a classification and the bill has carried a certain officer—for instance, as the law clerk—it has been held that it is proper to appoint two law clerks, but where an entirely different office has been created, invariably the Chair has held that it was not proper. I have made these points of order myself and the Chair has sustained them.

The CHAIRMAN. The Chair is ready to rule. The Chair recognizes the rule which the gentleman from Illinois [Mr. FOWLER] seeks to invoke as a salutary one, but the Chair is of the opinion that he misapplies it. In the creation of these great executive departments it would be utterly impossible, and it is physically impossible for the organic act to anticipate the name of every subordinate position, unimportant in one way but important in another way, that will be found necessary to carry on the work of that department. If we create the department, we must provide the machinery; and it seems to the present occupant of the chair that it would be utterly impossible to anticipate all of these necessary positions. The Chair thinks that Congress in the past has recognized that fact more than once, and has given to the heads of these different departments certain discretion——

Mr. FOWLER. Will the Chair submit to one question?

The CHAIRMAN. In a moment. Section 169 of the Revised Statutes authorizes the executive departments to employ clerks, and so forth, as Congress may appropriate from year to year. This has been held to be authority for making an appropriation to pay the salaries of such clerks, and so forth. That question came up on December 6, 1912, and it seems to be almost on all fours with this question here. The gentleman from Tennessee [Mr. GARRETT] was in the chair, and in passing upon this question he construed the authority under section 169 to employ clerks to carry on the work of these different departments. It was his conclusion, which conforms entirely to the conclusion of the present occupant of the chair, that the point of order was not well taken. Therefore the Chair feels constrained to overrule the point of order.

Mr. FOWLER. Mr. Chairman, suppose the salary of this clerk was fixed at $100,000.

The CHAIRMAN. The gentleman could move to amend and have it cut down.

Mr. FOWLER. Would it not be subject to a point of order?

The CHAIRMAN. The Chair thinks not; if the House wanted to vote $100,000 for a bookkeeper, it could do it.

Mr. FOWLER. Mr. Chairman, I interpose a point of order against the new position, "one cabinet shop foreman, $1,200." I do not care to argue the point of order.

The CHAIRMAN. The point of order is overruled for the same reason.

Mr. FOWLER. Mr. Chairman, I interpose a point of order against the language "one chief clerk at $3,000, and $500 additional as custodian of buildings." The statute creating the office fixes the salary at $2,000.

The CHAIRMAN. Will the gentleman designate the line and page.

Mr. FOWLER. That is on lines 1 and 2, page 2.

Mr. LEVER. Mr. Chairman, I call attention to the fact that that is in the current law with the same salary and is no change whatever.

The CHAIRMAN. The point of order is overruled.

Mr. LEVER. Mr. Chairman, I move that the committee do now rise.

Mr. FOWLER. Mr. Chairman, I suppose the point of order against the paragraph will still be pending?

The CHAIRMAN. Certainly. The gentleman from South Carolina moves that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and Mr. FITZGERALD having taken the chair as Speaker pro tempore, Mr. HAMLIN, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 13679, the Agriculture appropriation bill, and had directed him to report that the committee had come to no resolution thereon.

## ALASKAN RAILWAY.

Mr. HOUSTON. Mr. Speaker, I call up the conference report on the Alaskan railway bill.

The SPEAKER pro tempore. The Clerk will read the report.

Mr. HOUSTON. Mr. Speaker, I ask unanimous consent to omit the reading of the report and read the statement.

The SPEAKER pro tempore. The gentleman from Tennessee asks unanimous consent that the statement may be read in lieu of the report. Is there objection?

There was no objection.

The conference report is as follows:

### CONFERENCE REPORT (NO. 341).

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill S. 48, an act to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House and agree to the same with an amendment as follows: In lieu of the matter proposed in said House amendment insert the following:

"That the President of the United States is hereby empowered, authorized, and directed to adopt and use a name by which to designate the railroad or railroads and properties to be located, owned, acquired, or operated under the authority of this act; to employ such officers, agents, or agencies, in his discretion, as may be necessary to enable him to carry out the purposes of this act; to authorize and require such officers, agents, or agencies, to perform any or all of the duties imposed upon him by the terms of this act; to detail and require any officer or officers in the Engineer Corps in the Army or Navy to perform service under this act; to fix the compensation of all officers, agents or employees appointed or designated by him; to designate and cause to be located a route or routes for a line or lines of railroad in the Territory of Alaska not to exceed in the aggregate 1,000 miles, to be so located as to connect one or more of the open Pacific Ocean harbors on the southern coast of Alaska with the navigable waters in the interior of Alaska and with a coal field or fields so as best to aid in the development of the agricultural and mineral or other resources of Alaska and the settlement of the public lands therein and so as to provide transportation of coal for the Army and Navy, transportation of troops, arms, munitions of war, the mails, and for other governmental and public uses, and for the transportation of passengers and property; to construct and build a railroad or railroads along such route or routes as he may so designate and locate, with the necessary branch lines, feeders, sidings, switches, and spurs; to purchase or otherwise acquire all real and personal property necessary to carry out the purposes of this act; to exercise the power of eminent domain in acquiring property for such use, which use is hereby declared to be a public use, by condemnation in the courts of Alaska in accordance with the laws now or hereafter in force there; to acquire rights of way, terminal grounds, and all other rights; to purchase or otherwise acquire all necessary equipment for the construction and operation of such railroad or railroads; to build or otherwise acquire docks, wharves, terminal facilities, and all structures needed for the equipment and operation of such railroad or railroads; to fix, change, or modify rates for the transportation of passengers and property, which rates shall be equal and uniform, but no free transportation or passes shall be permitted except that the provisions of the interstate-commerce laws relating to the transportation of employees and their families shall be in force as to the lines constructed under this act; to receive compensation for the transportation of passengers and property, and to perform generally all the usual duties of a common carrier by railroad; to make and establish rules and regulations for the control and operation of said railroad or railroads; in his discretion, to lease the said railroad or railroads, or any portion thereof, including telegraph and telephone lines, after completion under such terms as he may deem proper, but no lease shall be for a longer period than 20 years, or in the event of failure to lease, to operate the same until the further action of Congress: *Provided*, That if said railroad or railroads, including telegraph and telephone lines, are leased under the authority herein given, then and in that event they shall be operated under the jurisdiction and control of the provisions of the interstate-commerce laws; to purchase, condemn, or otherwise acquire upon such terms as he may deem proper any other line or lines of railroad in Alaska which may be necessary to complete the construction of the line or lines of railroad designated or located by him: *Provided*, That the price to be paid in case of purchase shall in no case exceed the actual physical value of the railroad; to make contracts or agreements with any railroad or steamship company or vessel owner for joint transportation of passengers or property over the road or roads herein provided for, and such railroad or steamship line or by such vessel, and to make such other contracts as may be necessary to carry out any of the purposes of this act; to utilize in carrying on the work herein provided for any and all machinery, equipment, instruments, material, and other property of any sort whatsoever used or acquired in connection with the construction of the Panama Canal, so far and as rapidly as the same is no longer needed at Panama, and the Isthmian Canal Commission is hereby authorized to deliver said property to such officers or persons as the President may designate, and to take credit therefor at such percentage of its original cost as the President may approve, but this amount shall not be charged against the fund provided for in this act.

"The authority herein granted shall include the power to construct, maintain, and operate telegraph and telephone lines so far as they may be necessary or convenient in the construction and operation of the railroad or railroads as herein authorized, and they shall perform generally all the usual duties of telegraph and telephone lines for hire.

"That it is the intent and purpose of Congress through this act to authorize and empower the President of the United States, and he is hereby fully authorized and empowered, through such officers, agents, or agencies as he may appoint or employ, to do all necessary acts and things in addition to those specially authorized in this act to enable him to accomplish the purposes and objects of this act.

"The President is hereby authorized to withdraw, locate, and dispose of, under such rules and regulations as he may prescribe, such area or areas of the public domain along the line or lines of such proposed railroad or railroads for town-site purposes as he may from time to time designate.

"Terminal and station grounds and rights of way through the lands of the United States in the Territory of Alaska are hereby granted for the construction of railroads, telegraph, and telephone lines authorized by this act, and in all patents for lands hereafter taken up, entered, or located in the Territory of Alaska there shall be expressed that there is reserved to the United States a right of way for the construction of railroads, telegraph and telephone lines to the extent of 100 feet on either side of the center line of any such road, and 25 feet on either side of the center line of any such telegraph or telephone lines, and the President may, in such manner as he deems advisable, make reservation of such lands as are or may be useful for furnishing materials for construction and for stations, terminals, docks, and for such other purposes in connection with the construction and operation of such railroad lines as he may deem necessary and desirable.

"SEC. 2. That the cost of the work authorized by this act shall not exceed $35,000,000, and in executing the authority granted

by this act the President shall not expend nor obligate the United States to expend more than the said sum; and there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $1,000,000 to be used for carrying out the provisions of this act, to continue available until expended.

"SEC. 3. That all moneys derived from the lease, sale, or disposal of any of the public lands, including town sites, in Alaska, or the coal or mineral therein contained, or the timber thereon, and the earnings of said railroad or railroads, together with the earnings of the telegraph and telephone lines constructed under this act, above maintenance charges and operating expenses, shall be paid into the Treasury of the United States as other miscelleanous receipts are paid, and a separate account thereof shall be kept and annually reported to Congress.

"SEC. 4. That the officers, agents, or agencies placed in charge of the work by the President shall make to the President annually, and at such other periods as may be required by the President or by either House of Congress, full and complete reports of all their acts and doings and of all moneys received and expended in the construction of said work and in the operation of said work or works and in the performance of their duties in connection therewith. The annual reports herein provided for shall be by the President transmitted to Congress."

And the House agree to the same.

W. C. HOUSTON,
FRANK E. GUERNSEY,
*Managers on the part of the House.*

KEY PITTMAN,
GEORGE E. CHAMBERLAIN,
W. L. JONES,
*Managers on the part of the Senate.*

The Clerk read the statement, as follows:

STATEMENT.

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendment of the House to the bill S. 48, an act to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon and recommended in the conference report, namely:

The provision as agreed to retains all of the important provisions of the House amendment. The only substantial changes are the striking out of the provision with reference to the application of the interstate-commerce law. The committee of conference has left the operation of the road, as long as the President retains the operation of it in his hands, unhampered, giving him absolute authority in reference to it, but have provided that if the road should be leased, then it shall become subject to the operations and provisions of the interstate-commerce laws.

And rights of way have been granted through public lands, and a provision made for the express reservation of such rights of way in patents which may be issued for these lands, and full power has been given to the President to make whatever reservations he may deem necessary for terminal station grounds.

The verbiage has been reformed and changed in different places by the elimination of unnecessary repetition, and the transposition and rearrangement of sentences, clauses, and words which do not make any material alteration in the provisions of the bill, as follows:

(References are to "amendment" as passed by the House.)

In line 7, section 1, after the word "act," the words "such officers, agents, or agencies to be appointed or designated by him or under his direction" are omitted.

In lines 12 and 13 of section 1 the words "or any official in the civil list of the United States" are stricken out.

In line 3, on page 2, of section 1, after the word "exceed," add the words "in the aggregate."

In lines 7 and 8, page 2, the words "yielding coal sufficient in quality and quantity for naval use" are omitted.

In line 12, page 2, after the word "Navy," there is inserted the words "the transportation."

On page 2, all of line 25, and lines 1, 2, 3, 4, and part of line 5, on page 3, to and including the word "thereto," are stricken out.

In line 7, page 3, beginning with the word "for," down to the word "property," in line 8, is stricken out.

In lines 12, 13, and 14, page 3, the words "subject to the supervision of the Interstate Commerce Commission, as hereinafter provided," are stricken out.

In line 12, page 3, after the word "property," there is added the following: "which rates shall be equal and uniform, but no free transportation or passes shall be permitted, except that the provisions of the interstate-commerce law relating to the transportation of employees and their families shall be in force as to the lines constructed under this act."

In lines 16 and 17, on page 3, the words "not in violation of law" are stricken out.

In line 1, page 4, after the word "Congress," there is inserted the following clause: "*Provided*, That if said railroad or railroads, including telegraph and telephone lines, are leased under the authority herein given, then and in that event they shall be operated under the jurisdiction and control of the provisions of the interstate-commerce law."

In line 2, page 4, after the word "acquire," there is added the words "upon such terms as he may deem proper."

In line 4, page 4, after the word "him," the words "in the first instance, upon such terms as he may deem proper" are stricken out.

In line 10, page 4, after the word "property," there is inserted the following words: "Over the road or roads herein provided for, and such railroad or steamship line or by such vessel owner."

After the word "act," in line 11, page 4, the remainder of the paragraph is stricken out and instead of it there is inserted a clause from the Senate bill, as follows: "To utilize in carrying on the work herein provided for any and all machinery, equipment, instruments, material, and other property of any sort whatsoever used or acquired in connection with the construction of the Panama Canal, so far and as rapidly as the same is no longer needed at Panama; and the said Isthmian Canal Commission is hereby authorized to deliver said property to such officers or persons as the President may designate, and to take credit therefor at such percentage of its original cost as the President may approve, but this amount shall not be charged against the fund provided for in this act."

In lines 17 and 18, on page 4, the language is changed so as to read: "The authority herein granted shall include the power to construct, maintain, and operate telegraph and telephone lines," etc. This is a mere change in phraseology without altering the meaning.

In line 22, page 4, after the word "hire," strike out all of the remainder of the paragraph.

In line 12, page 5, the word "lawful" is stricken out and the word "necessary" inserted.

In line 13, page 5, the word "necessary" was stricken out because it was inserted above.

In lines 14 and 15, page 5, the words "*Provided*, That" are stricken out and the word "The" is begun with a capital and made the beginning of a sentence.

In line 19, page 5, after the word "designate," there is inserted the following: "Terminal and station grounds and rights of way through the lands of the United States in the Territory of Alaska are hereby granted for the construction of railroads, telegraph and telephone lines authorized by this act, and in all patents for lands hereafter taken up, entered, or located in the Territory of Alaska there shall be expressed that there is reserved to the United States a right of way for the construction of railroads, telegraph and telephone lines to the extent of 100 feet on each side of the center line of any such road and 25 feet on each side of the center line of any such telegraph or telephone line, and the President may, in such manner as he deems advisable, make reservation of such lands as are or may be useful for furnishing materials for construction and for stations, terminals, docks, and for such other purposes in connection with the construction and operation of such railroad lines as he may deem necessary and desirable."

On page 5 all of section 2 is stricken out.

On page 6 section 3 is numbered section 2.

In line 5, page 6, after the figures "$35,000,000," the word "that" is stricken out and the word "and" inserted instead.

On page 6 section 4 is numbered section 3.

In line 15, page 6, the word "net" is striken out, and after the word "railroads" there is added the following: "Together with the earnings of the telephone and telegraph lines constructed under this act."

Section 5 on page 6 is numbered section 4.

W. C. HOUSTON,
FRANK E. GUERNSEY,
*Managers on the part of the House.*

Mr. HOUSTON. Mr. Speaker, as set out in this statement the provisions of the House bill in the main are retained. There

are very few changes that have any important effect on the bill. The amount is retained the same as provided in the House bill of $35,000,000. Also the amount appropriated is retained at the sum of $1,000,000, as provided in the House bill. There was a change made in the House bill by striking out the clause that provided for the interstate-commerce laws to apply to this road. We changed that so as to make them apply only in case the road was leased. In case the road is leased or operated by private companies it will be operated under the terms of the interstate-commerce law, but if run by the President we thought it best not to have any limitation or anything to hamper his free hand and the exercise of his discretion.

The right of way has been granted through public lands in such terms as were not provided in the House bill, and it is provided that express reservations may be made by the President in order to secure rights of way without any hindrance or anything to interfere with the right of way over the public domain. It was also provided that patents issued on public land hereafter should contain a clause stipulating that the right was reserved to the Government to retain right of way, so as to prevent any delay or hindrance in acquiring rights of way.

There was another change in regard to the transportation of parties on free passes. That has been forbidden by a clause inserted here, which was taken from the Senate bill, providing that free transportation or free passes should be given only to the extent provided in the interstate-commerce law for employees and their families.

There are a number of other changes in phraseology, some transposition of words and sentences, which I do not think make any material difference.

Mr. FERRIS. Will the gentleman yield?

Mr. HOUSTON. Certainly.

Mr. FERRIS. I notice on page 2 of the bill that emerged from conference you have retained the provision which places a limitation on the right to purchase other railroad stock at its actual physical value.

Mr. HOUSTON. Yes.

Mr. FERRIS. I believe that is a provision that went out in the House committee.

Mr. HOUSTON. It was in the bill as it passed the House. The language in the present bill is identical with the language as it passed the House.

Mr. FERRIS. It was my impression that it was eliminated in committee

Mr. HOUSTON. Yes; and was inserted on the floor of the House.

Mr. FERRIS. There is another question I want to ask the gentleman about, and the gentleman will understand it is not a criticism, but I find it was in the House bill, and that is the language in the bill which authorizes the use of the Panama Canal appurtenances, but reciting that it shall not in any sense be charged up to the Alaskan account with reference to the cost of the railroad.

Mr. HOUSTON. Yes.

Mr. FERRIS. It seems to me that that was unwise. What were the conditions that led the conferees to agree to that?

Mr. HOUSTON. Upon that point, I will state that it was thought wise to provide that any machinery, or tools, or implements of any kind that might not be needed in the completion of the Panama Canal, that could be utilized in building this road, it would be a proper thing to let the Government take charge of such machinery and tools and use them in carrying on this work here.

Mr. FERRIS. Of course, that is not the part, as the gentleman understands, that I object to.

Mr. HOUSTON. I am coming to that. It is provided here that the Isthmian Canal Commission shall receive credit for the amount that these tools and machinery are valued at, but that it shall not be charged against the fund appropriated for the construction of the railroad.

This is Government property. It is Government machinery, but the Government has no longer any use for it at the Panama Canal, because the provision in the bill is that it shall be turned over when the same is not needed there. It is nothing but right and proper that the Government, which is undertaking to enter another great enterprise, should have the benefit of this machinery. This belongs to the Government. Let the Government get the benefit of it in building this railroad, and, incidentally, let Alaska get the benefit of the free use of this property which the Government has already on hand.

Mr. FERRIS. Yes; but the anomalous position is this, that the property we are to transmit to Alaska, whether it be much or little, is charged against the Panama project, but when we take it up to Alaska and install it there we do not charge it against that project. In other words, it seems to me that the thing that we use in Alaska being transported from the Panama Canal ought to figure in the project, so that in the last analysis we might be able to tell what our total expenditure has been, and, in turn, how far we have been reimbursed. This bill is based on the theory that the Alaskan resources will reimburse us. That being true, I wondered what the plan was to eliminate this one feature.

Mr. HOUSTON. This bill provides we shall take this machinery at a certain valuation, and the Panama Canal Commission gets credit for that valuation. The only question is whether or not you will make the Government pay for its own property, which it is going to use in the construction of the Alaskan railroad. There is a desire on the part of the friends of this measure to make a success of it and do it as cheaply as possible, and we think it but a small favor to ask of the Government that it shall take this property it already has, and has no further use for, and let us have it; and if we want to know what it is worth, this act provides it is to be given credit for it, and you can add that to the cost of the road.

Mr. FERRIS. Undoubtedly; but instead of doing that the bill specifically precludes it from being done.

Mr. HOUSTON. I think not.

Mr. FERRIS. No; the language specifically says that.

Mr. HOUSTON. It provides that we shall have the free use of these tools.

Mr. FERRIS. That is right. It is a gift to the Alaskan project to that extent.

Mr. HOUSTON. Yes.

Mr. MANN. Mr. Speaker, will the gentleman yield?

Mr. HOUSTON. Yes.

Mr. MANN. On that same point I had intended to address the House when the bill was under consideration, but I thought it safer to leave it open. I do not understand, and I would like to ask the gentleman if he made any inquiry, how it is possible for the Isthmian Canal Commission to take credit for a percentage of the original cost of any machinery. I would like to ask if the gentleman made any inquiry as to the modus operandi. Does it mean that they give themselves credit when they talk about it, or that they put it on the books of the Treasury?

Mr. HOUSTON. I think it is more a matter of bookkeeping than anything else. It shows what it is probably worth when they get through with it.

Mr. MANN. I know of no way in bookkeeping of entering an item on one side of the ledger without having a corresponding item on the other side of the ledger, if you are going to balance your books.

Mr. HOUSTON. It provides this: That the Government takes that machinery at whatever it is worth for the needs of the Canal Commission and gives the commission credit for it. Then we provide that it may be used in the construction of this railroad.

Mr. MANN. I am not criticizing the proposition. What I asked was whether any inquiry was made as to how it could be done, because it is perfectly patent that you can not take credit on the books unless there is a corresponding charge made on the books.

Mr. LENROOT. Would not the charge be made to the Government?

Mr. MANN. The charge can not be made to the Government; certainly not.

Mr. LENROOT. On the books?

Mr. MANN. The books must balance. There is no appropriation from the Government to do this.

Mr. MANAHAN. It is all the Government's.

Mr. MANN. Whether it is all the Government's or not, you can not enter an item on one side of the ledger with no item on the other side of the ledger. The machinery has been paid for and the item is closed, so far as that is concerned. The books have been balanced, as far as this machinery is concerned. If you enter an item on the ledger or on the books of the Government—and I do not know whether that is the intention or not—you must have a corresponding item somewhere. It is not against the Government. In other words, you bring the Government into debt to these people, and that can not be done.

Mr. HARDY. Mr. Chairman, will the gentleman yield?

Mr. HOUSTON. Certainly.

Mr. HARDY. Mr. Chairman, it seems to me the bookkeeping proposition would be to credit the Canal Commission with this machinery received and charge the Government with what it took back from the canal.

Mr. MANN. And then have a claim against the Government for all time standing on the books of the Government.

Mr. HARDY. The Government would simply be charged just as if it had purchased a horse, and the horse might die later.

Mr. MANN. But the Government is never charged with the buying of a horse and you can not do it without an appropriation. You can not get that sort of item on the books.

Mr. HARDY. Suppose you have an appropriation or an authorization when you pay for a thing; you have to balance that somewhere.

Mr. MANN. Yes; but this is no authorization.

Mr. HARDY. This will equivalently authorize the Government to buy this property from the Canal Commission.

Mr. MANN. It will not do any harm. It will give the governor of the Canal Zone, when he makes his annual report, authority to say that they have turned this machinery over to the Alaska railroad and that he claims credit for a certain amount of reduction in expenses. It will not change any item on the books, because it can not under the terms of the law.

Mr. HARDY. Let me ask the gentleman how he would square his books if we passed a law now taking back from the Panama Canal account the machinery they had there; just charging it back to the Government and allowing them credit for it, to say nothing about Alaska?

Mr. MANN. They could not square the accounts on the books in that way.

Mr. HARDY. Then it ought not to be squared now.

Mr. MANN. It should be squared now. We take it back from the Panama Canal Commission. The gentleman talks about the Government owning machinery; the Government owns the machinery now.

Mr. HARDY. Suppose for the sake, however, of wanting to see what the Panama Canal has cost when they get through with their work we have certain remnants of property for which we have no further use and they turn them back to the Government.

Mr. MANN. Turn them back to the Government! They are owned by the Government now; they can not turn them back.

Mr. HARDY. The gentleman wants to do something to show the Panama Canal left that property; that is all.

Mr. MANN. Well, that is done by writing an essay, it can not be done by keeping books.

Mr. HARDY. I think this is an essay.

Mr. STAFFORD. Will the gentleman from Tennessee yield?

The SPEAKER pro tempore (Mr. FITZGERALD). Does the gentleman from Tennessee yield?

Mr. HOUSTON. I yield to the gentleman.

Mr. STAFFORD. In the gentleman's exposition, I believe he inadvertently omitted to call the attention of the House to a very material change. As I understand, one of the main purposes of this legislation was to provide a railroad to reach the coal fields which would yield coal of such a quality as could be used in the Navy. Now I find in the bill reported by the conferees all reference omitted of that special clause in the House bill which says the purpose is to construct a railroad to reach coal fields yielding coal sufficient in quality and quantity for naval use. That is stricken out entirely and in lieu thereof I find this phraseology:

To construct a road connecting with a coal field or coal fields so as best to aid in the development of the agricultural and mineral and other resources of Alaska.

Now, I wish to ask the gentleman why the supporters of this project abandoned the contention that this railroad is to be built to furnish a supply of coal suitable for the Navy, and under the bill as now presented to the House there is no such restriction whatsoever in the construction of the road?

Mr. HOUSTON. In answer to that question I would say that the reason we struck out the words "sufficient in quantity and quality for naval use" was because, after consideration, we concluded they were improper terms to qualify and describe just the character of the coal to be established or describe the purpose for which the road was to be built. There is no very definite meaning in those terms; you can not tell what quantity or how much would be sufficient; you can not beforehand judge accurately as to a sufficient quantity or exactly just what the grade might be; but the provision which is inserted there provides it is for the purpose of shipping coal for the use of the Navy, and there is no need of a limitation such as these words contain.

Mr. STAFFORD. I beg the gentleman's pardon; there is no qualification in the bill which is now reported that the coal shall be of a quality for use of the Navy——

Mr. HOUSTON. Where is it?

Mr. STAFFORD. First page, about six lines from the bottom.

And with a coal field or fields so as best to aid in the development of the agricultural and mineral or other resources of Alaska and——

Mr. HOUSTON. And it says also to provide for the transportation of coal for the Army and Navy, troops, arms, munitions of war, and so forth.

Mr. STAFFORD. It says to provide transportation of coal for the Army and Navy, but I understood the bill as it originally passed the House to provide the road could not be built unless there was coal of such a quality that it could be utilized for the Navy, but now the road will be built or is authorized to be built regardless of whether there is coal there of a quality that can be utilized for naval purposes.

Mr. HOUSTON. Well, if the gentleman will just think about this he is sure to realize when you provide to build a road to a point to ship coal sufficient in quantity or quality for naval use that that is an indefinite thing, that perhaps the engineer and the Government officials, having that impression in mind, might possibly make a mistake and take it to some field which might not be of the very highest order desired. It is a vague qualification, it is a vague limitation, and it is not necessary, especially in view of the fact we provide just afterwards it shall be for the purpose of shipping coal for the Army and Navy. Now, I think the gentleman voted for the bill?

Mr. STAFFORD. I did. I will say to the gentleman I voted for it because it was to provide coal for naval purposes and for that especially. If I had understood there was no coal up there that would be suitable for naval purposes, I could not justify my vote in favor of this bill.

Mr. HOUSTON. We thoroughly believe that it will provide for the transportation of coal of a very high quality and for naval use. We believe all that. Yet we do not think it proper to make that a qualification as to the location of a road and make it depend upon that.

Mr. LENROOT. Will the gentleman yield?

Mr. HOUSTON. I yield.

Mr. LENROOT. I would like to ask the gentleman from Wisconsin [Mr. STAFFORD] a question. If there was a coal field containing coal not suitable for the Navy but for commercial purposes within 20 miles of the main line of the railroad, do you not think the President ought to have authority to build a branch to that coal field?

Mr. STAFFORD. He would have authority under the House bill to build such feeders. Under that bill he would not have authority to construct this railroad unless there was coal there suitable for naval purposes, but under the bill now presented to the House he has authority to build this railroad whether there is coal there for naval purposes or not.

Mr. WATSON. Will the gentleman from Tennessee yield?

Mr. HOUSTON. I yield.

Mr. WATSON. I wanted to ask the gentleman from Wisconsin a question. I understood the gentleman to say that he voted for this bill when it passed the House?

Mr. STAFFORD. The RECORD so shows; and not only does the RECORD show it, but I stated on the floor of the House that I was going to vote for it, and stated the reasons why I voted for it.

Mr. WATSON. I wanted to remind the gentleman that the coal in Alaska has not changed from that day to this, and if it was good for naval use then it is now.

Mr. STAFFORD. From the exposition held on the floor of the House I was in doubt, from statements made, whether they did have coal there fit for naval use. However, I resolved my doubts in favor of the proponents of the measure. I did not know but that you had a notion now that it was about passed to withdraw the mask from the bill and admit that it is a bill purposely for the exploitation of the "frozen north."

Mr. HOUSTON. Mr. Speaker, I yield five minutes to the gentleman from Kansas [Mr. MURDOCK].

Mr. MURDOCK. Mr. Speaker, as the Alaskan railroad bill comes back in its final form to the House it contains a provision that no free transportation—that is, passes—shall be permitted upon the roads. I think that provision, if it does nothing else except to emphasize that policy, is in point, for there is evidence in the country that the antifree-pass policy is breaking down.

The Interstate Commerce Commission has made several investigations as to the violation of the provision in the interstate-commerce law against the use of free passes, and indictments have followed in Colorado. They have also investigated in Montana and have found violations there. While the Interstate Commerce Commission was investigating in Montana it had occasion to look into the books in the general offices of two railroad companies in Chicago, and it found there some very curious documents, documents which purport to be letters signed by one "John T. Denvir," chairman of a joint committee, known as the "legislative public-utilities commission" of the State

of Illinois. It seems that among the documents unearthed in the general offices of those two transcontinental roads is a letter signed, or purported to be signed, by John T. Denvir, requesting an annual pass over the Burlington lines on account of the legislative public-utilities commission. I am now quoting from the Interstate Commerce Commission report:

A reply having been mailed to John T. Denvir at what is understood to be his regular address, stating that the Burlington issues no free transportation, State or interstate, the following communication bearing the same signature in the same handwriting was later received by the general counsel of the company on what appears to be the official letterhead of the commission.

I recommend this letter to the attention of the House. It is purported to be from John T. Denvir, and is as follows:

I regret exceedingly to acknowledge receipt of your letter in which you refuse me annual transportation over your lines in Illinois. As chairman of the public-utilities commission you can look for legislation that will work hardship to your company, and I wish to assure you that when our commission get through with you that you will find your road in the hands of a receiver, for you certainly are violating the laws of the State in a great many respects, and we know it, but have gone along and been friendly to you; but inasmuch as you are inclined to be so diplomatic in your statement that you would not "like to violate the custom you have indulged in." I feel inclined to think that a little resolution with respect to a committee for a thorough investigation of your gross negligence with regard to your methods of procedure will be well to adopt at the next meeting of the senate.

Hoping that you can see fit to favor our commission's request, I am, as ever,

Faithfully, yours, JOHN T. DENVIR.

The commission continues:

When these and other letters in the same file of correspondence were called to Mr. Denvir's attention he denied that the signatures were his or that the letters were written by his authority. When his attention was called to the fact that the above letter was in direct reply to a letter addressed to him by the general counsel of the Burlington, at his Chicago residence, and that he alone could have used the pass had one been issued, Mr. Denvir vaguely stated that some one had been playing a joke. Although the opportunity for a full explanation was afforded Mr. Denvir, it was not forthcoming, and we deem it our duty to make this record of the matter. It is well to add that our investigations of the records of other carriers at Chicago show that many requests have been made in the past for free transportation for the use of "John T. Denvir." The records of the Illinois Central show that a refusal to issue such a free pass was followed by the receipt of a letter to its vice president as follows—

And I commend this to the attention of this House. This is the letter—

Replying to your favor, which I am returning to you, will say that I insist you grant me transportation requested, and will not accept no as the answer. In the event you disregard my request you can rest assured that in the next general assembly, the forty-eighth, of which I will be a member, I will introduce a bill with regard to frontage on the lake front from Sixty-third Street to Randolph Street, which belongs to the State of Illinois, and which you realize was never purchased or leased.

Furthermore, if you object, you can refuse to honor my annual pass over your lines also. It is not my aim to be disagreeable in the matter, and I am therefore at a loss to understand how you can consistently refuse me.

Soliciting your reply, I beg to remain,

Yours, very truly, JOHN T. DENVIR.

The commission says:

The signature to this document apparently is in the same handwriting as the signature to the letter quoted above.

Now, the commission in its——

Mr. FERRIS. Do all the rest of the commission have the same amount of intelligence that this man seems to have?

Mr. MURDOCK. There is no evidence to that effect.

Mr. STEPHENS of Texas. What is the date of the letter?

Mr. MURDOCK. The date is not given.

The SPEAKER pro tempore. The time of the gentleman from Kansas has expired.

Mr. MURDOCK. I would like one minute more.

Mr. HOUSTON. I yield one minute more to the gentleman.

Mr. MURDOCK. It is fair to say and it is wise to say that the commission is on guard on this matter, and every time a violation occurs takes steps and notifies the proper officer to prosecute. And the commission, at the conclusion of the bulletin I am reading, issued February 4 last, speaking of the widespread practice of the use——

Mr. MANN. This was intrastate business.

Mr. MURDOCK. The law passed in 1906, a copy of which I have——

Mr. MANN. That does not affect these passes at all.

Mr. MURDOCK. It does affect passes given to interstate shippers.

Mr. MANN. Oh, certainly.

Mr. MURDOCK. That is what I am speaking of.

Mr. MADDEN. The matter that the gentleman refers to does not affect interstate commerce.

Mr. MURDOCK. It affects it if Mr. John T. Denvir was an interstate shipper. He was a Republican, I believe.

Mr. MANN. Oh, he was a Democrat.

Mr. MURDOCK. Was he a Democrat?

Mr. MANN. I think so.

Mr. MURDOCK. I thought he was a Republican. But there is nothing here to show it.

Mr. MADDEN. I simply say to the gentleman from Kansas that the matter referred to, that he is reading to the House, had nothing to do with interstate transportation at all. It was purely an intrastate matter.

Mr. MURDOCK. There is nothing in this to show it. Now, if the gentleman from Tennessee [Mr. HOUSTON] will yield to me a minute further, I want to put something into the RECORD.

Mr. GARDNER. The gentleman said he would yield to me in a minute. I would like to ask the gentleman a question.

Mr. HOUSTON. I will yield one minute more to the gentleman from Kansas.

Mr. MURDOCK. The commission says it is diligent and vigilant in this matter and it issues this general warning, and I think it is such a good thing that it should go into the RECORD:

On broad general grounds, however, all must condemn such practices, and the carriers that dissipate their revenues in that form and recoup the loss in their rates will find, sooner or later, that this commission will not lose sight of the practice when their rates are questioned in complaints pending before us.

Mr. GARDNER. Now, will the gentleman yield?

Mr. MURDOCK. Yes.

Mr. GARDNER. Does the gentleman think it any worse for a man to seek transportation by a free pass than for a President of the United States to accept a free railroad train, as a recent President did? [Laughter and applause.]

Mr. MURDOCK. Oh, I do not know. Will the gentleman say he has never traveled on free transportation?

Mr. GARDNER. Yes. I have refused it repeatedly.

Mr. MURDOCK. Then the gentleman is one man out of ten thousand.

Mr. GARDNER. Understand me. I do not boast about it and I never said this before, but I never did travel on a free pass.

Mr. MURDOCK. The gentleman means not since there is an express provision in the law forbidding the use of passes.

Mr. GARDNER. Oh, no. I ask the gentleman whether there is any difference between a man seeking transportation by a free pass and the President of the United States taking free trains, as the leader of the gentleman's party did? [Laughter.]

Mr. MURDOCK. Oh, no; "the leader of the gentleman's party" did not.

Mr. HOUSTON. Now, Mr. Speaker, I yield five minutes to the gentleman from Oklahoma [Mr. DAVENPORT].

The SPEAKER pro tempore. The gentleman from Oklahoma [Mr. DAVENPORT] is recognized for five minutes.

Mr. DAVENPORT. I believe, Mr. Speaker, it would now be very well to declare war with Mexico inasmuch as we have the standpatters and Progressive Republicans at war over the statement of Mr. Denvir, a gentleman who is said to be a Democrat. [Laughter.] I think it is an opportune time now for war.

Now, I want to say, with reference to the adoption of this conference report, that the gentleman from Wisconsin [Mr. STAFFORD] asked a very pertinent question, although I do not think that it is material now because he is wedded to the bill, and he had an opportunity to investigate the facts as to what the quality and the quantity of the coal in Alaska is, so far as statistics went, before he cast his original vote.

So far as the conference report is concerned, I believe that as the literal construction of the bill goes the bill is as good a bill as you can get for those of you who want a bill enacted to construct a railroad in Alaska. But I have not seen anything to change my mind and to cause me to change my vote since the bill originally passed the House.

I am not going to take up the time of this House in asking for a roll call, and I am not going to take up the time of this House which is needed for other business that should be dispensed with and delay the House longer on this report, except to say that I feel as I did when the bill passed the House, that I am not in accord with the measure, not in regard to its form, but in regard to its principle and the theory underlying the project by which we are undertaking to construct a railroad in Alaska. Therefore I yield back the balance of my time, Mr. Speaker, and content myself with saying that I am opposed to the passage of the bill in its entirety.

The SPEAKER pro tempore. The gentleman from Oklahoma yields back the remainder of his time.

Mr. HOUSTON. Mr. Speaker, I yield two minutes to the gentleman from Oklahoma [Mr. FERRIS].

The SPEAKER pro tempore. The gentleman from Oklahoma [Mr. FERRIS] is recognized for two minutes.

Mr. FERRIS. Mr. Speaker, I desire only to say that I have doubted the propriety of the passage of this bill from the start. I doubt it now with the same earnestness as I did then.

But I want to say that we now have the cart not in front of the horse but behind it, from the fact that another body has just passed a bill to open the coal mines of Alaska, and whatever value the coal up there may have, you will soon have before you a bill opening the way for its disposal, and giving an opportunity to haul away from there whatever coal there may be.

Mr. MANN. Mr. Speaker, how much time have I?

The SPEAKER pro tempore. The gentleman has 10 minutes.

Mr. MANN. Mr. Speaker, I yield to the gentleman from Pennsylvania [Mr. MOORE].

Mr. MOORE. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER pro tempore. Is there objection to the gentleman's request?

There was no objection.

Mr. MOORE. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The time of the gentleman has expired. [Laughter.]

Mr. MANN. Mr. Speaker, the gentleman from Kansas [Mr. MURDOCK], under the mistaken impression that he was casting odium upon an Illinois Republican, reads some letters about him asking for passes, and said it was a violation of the law. The latter statement is incorrect. There is no law in Illinois—at least there was none when these letters were written, and I do not know whether there is now in Illinois or not, but I think not—forbidding the use of railway passes within the State. While I certainly do not admire the discretion of the person who wrote——

Mr. MURDOCK. Mr. Speaker, will the gentleman yield?

The SPEAKER pro tempore. Does the gentleman from Illinois yield to the gentleman from Kansas?

Mr. MANN. In just a moment. While I do not admire the discretion or the good sense or the sense of propriety of the person who wrote the letter practically demanding passes, or really demanding passes under threat of legislative action, still he was not in conflict with the law passed in 1906 forbidding the giving of passes. Now, I yield to the gentleman.

Mr. MURDOCK. I will change the form of my question, because the gentleman has gone on. Would it not be in violation of the law if he were an interstate shipper?

Mr. MANN. He would not be violating the law unless he was an interstate shipper; and he was not a shipper, by the way. He is not a shipper at all; he is a State senator, a member of the Senate of Illinois. He did not violate the national law any more than Mr. Roosevelt did when he took a special train, and he did not violate the law, nor did he at the time violate the common practice.

I am not sure that I agree with the idea that there shall be no passes granted on the Alaska railroad. I wish it were possible that a majority of this House could be compelled to go to Alaska and have an opportunity of riding free upon a railroad or anything else owned by the Government there.

It would certainly add very much to the value of the information possessed by the House.

Mr. Speaker, I took the floor not for the purpose of making those remarks but for the purpose of congratulating the gentleman from Tennessee [Mr. HOUSTON] upon the conference report which he brings in and upon the success which he has achieved in this legislation. [Applause.] The Alaska bill was under general debate in this House longer than any other bill not a great revenue bill, or an appropriation bill, or something of that sort has been debated since I have been a Member of the House. It received very careful consideration under the five-minute rule for amendment. It was materially changed in the House by way of amendment in some respects. The Senate had devoted a considerable time to the discussion of the measure, but very little in the way of amendment was inserted there which remains in the bill. Most of the amendments that were inserted in the House remain in the bill under the conference report. I am very glad that we have decided to build a railroad and pay for it out of the Treasury without resorting to bonds, while we still keep a separate account of all sorts of receipts from public lands or leases in Alaska, including any profits—ahem—from the operation of the railroad. I do not believe there will be any direct financial profit for years to come, so far as the railroad is concerned, but I do believe that the construction of this railroad in Alaska, even if it shall be only a short line, will aid greatly in the development of Alaska. Suppose the President only builds, in the first instance, a road from the sea to the coal fields, and we open up the coal fields and find out how far that coal can be utilized and sold and burned on the Pacific side. We will have learned a great deal. Then, suppose we go ahead with a little further development, reaching here and there, and in the course of time—I apprehend not immediately—we construct $35,000,000 worth of railroad. Probably by that time we will have learned enough to know whether we ought to increase the length of the road because of the industries or the development in Alaska. In my opinion, we could not retain Alaska as a possession or Territory of the United States without doing something toward its development, and we have reached the time when we must proceed, and I think it is a good thing to proceed along these lines. [Applause.]

Mr. HOUSTON. I yield three minutes to the gentleman from Wisconsin [Mr. LENROOT].

Mr. LENROOT. Mr. Speaker, I am heartily in favor of the adoption of this conference report, and I rise only to make one observation. We have reached the last stage of one of the most important bills that this Congress has considered. It is the first great, important bill that this House, as a House of Representatives, has been permitted to consider upon the floor, and it has been demonstrated that as to any bill which does not in itself involve party or partisanship matters it is not necessary to hold a Democratic caucus and put through the bill under caucus rule. Every Member of this House will admit that this is a better bill to-day because both sides of this aisle have been free to offer amendments, and amendments have been considered upon their merits. That action has improved the bill, and we have a better bill than we would have had if you had attempted to legislate upon it through your Democratic caucus. [Applause.]

Mr. GARDNER. Is not that same statement true of the immigration bill?

Mr. LENROOT. Absolutely.

Mr. HOUSTON. Mr. Speaker, I move the previous question upon agreeing to the conference report.

The previous question was ordered.

The SPEAKER pro tempore. The question is on agreeing to the conference report.

The conference report was agreed to.

On motion of Mr. HOUSTON a motion to reconsider the vote by which the conference report was agreed to was laid on the table.

## AGRICULTURAL APPROPRIATION BILL.

Mr. LEVER. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 13679) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1915.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the Agricultural appropriation bill, H. R. 13679, with Mr. HAMLIN in the chair.

Mr. FOWLER. Mr. Chairman, in line 5, page 3, I discover that there are two new places, called "lieutenants of the watch." I desire to ask the chairman of the committee the necessity for creating those two places.

Mr. LEVER. Mr. Chairman, the Department of Agriculture has 25 or 30 buildings to care for, and a number of watchmen are employed to take care of those buildings. It was thought better to designate two of these men as lieutenants of the watch; in other words, as foremen. There is no change whatever in the salaries of these two men. There is just simply a change of title, in order to give them the positions of foremen of the other watchmen.

Mr. FOWLER. How many new positions have been created under this paragraph?

Mr. LEVER. One clerk of class 1, two lieutenants of the watch at $960—the men we are talking about—four watchmen at $720, and two charwomen at $240.

Mr. MADDEN. And there are three assistant messengers, are there not?

Mr. LEVER. I will say to the gentleman from Illinois that those are transfers from other departments.

Mr. BOOHER. I will ask the gentleman from South Carolina if the duties of these lieutenants are the same?

Mr. LEVER. The duties are not exactly the same. Their duties will be to have supervision of certain messengers and watchmen under them. Their salaries are not increased at all. They are the same men who have been doing watchmen's service heretofore.

Mr. BOOHER. Is it not a fact that the duties of the lieutenants will be the same as those of the lieutenant who is getting $1,000?

Mr. LEVER. Yes.

Mr. BOOHER. Then, why not pay these two lieutenants $1,000 each, the same as you pay the other lieutenant, if they are performing the same duties?

Mr. LEVER. The committee followed the suggestion of the department, in order to do as the department wanted, and to keep up its line of promotion. If a vacancy occurs in the position of the $1,000 lieutenant, by death or otherwise, there will be a line of promotion for those of less salary.

Mr. BOOHER. And the one who is promoted will receive the $1,000 salary?

Mr. LEVER. Exactly.

Mr. WEBB. Mr. Chairman, I ask unanimous consent to address the committee for five minutes.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent to address the committee for five minutes. Is there objection?

Mr. MANN. Reserving the right to object, is it on a political subject?

Mr. WEBB. No; it is about a matter that arose here in the House last Saturday.

Mr. LEVER. I have no objection.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. WEBB. Mr. Chairman, I do not usually notice newspaper reports of my conduct. However, I notice in this morning's Post these headlines:

May bar Army horses—WEBB would prohibit officers' mounts in shows—"Joker" slipped in the bill—North Carolina Member declares economy calls for cut in money allowed for exhibition—Chairman HAY, of the Military Committee, protests in vain—Prominent officer's view.

Now, Mr. Chairman, it is not true that this amendment was "slipped" in. It is not true that it is a "joker." I wish to read from the RECORD, page 4417, of last Saturday, when the amendment was agreed to:

Mr. WEBB. Mr. Chairman, I desire to offer an amendment, on page 27, line 17, after the word "available," to add:

"*And provided further*, That hereafter no part of this or any other appropriation shall be expended for defraying the expenses of officers, enlisted men, or horses in attending or taking part in horse shows."

The CHAIRMAN. The gentleman will send his amendment to the desk.

Mr. HAY. I have no objection to that amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

"Amend, page 27, line 17, after the word 'available,' by adding:

"'*And provided further*, That hereafter no part of this or any other appropriation shall be expended for defraying the expenses of officers, enlisted men, or horses attending or taking part in horse shows.'"

And yet the newspaper states that it was put in over the protest of Mr. HAY. Mr. KAHN, the gentleman from California, debated this amendment and mildly resisted it, but finally the Committee of the Whole adopted it. So there is no "joker" about it; nor was it "slipped" in; it was done on the floor of the House, as the RECORD clearly shows. That is all I care to say. I will talk about the merits of the amendment later, because the "prominent Army officer" says that the transportation of Army officers, their horses and enlisted men to care for them, is a mere trifle. I will show in the debate later on that it is not a mere trifle, but that it is a tremendous and an unwarranted expense to the country. I want to keep the newspapers straight and not allow them to misrepresent me or the CONGRESSIONAL RECORD.

For several years the Government has been paying large sums for transporting privately owned horses of officers to attend horse shows in the United States and even to Stockholm, Sweden. These horses are shipped in palace Arms cars, the mileage of the officers is paid at 7 cents per mile, their regular salary goes on, stallage for horses is paid, and the transportation of all enlisted men to take care of the horses is paid. There are four or five shows a year which officers and horses thus attend, from Denver, Colo., to New York City. I contend that there is no warrant of law for such expenditures, nor are such displays of official and equestrian vanity useful to the Army service. I estimate that we have been spending $50,000 to $75,000 yearly for such shows.

Mr. KAHN. Mr. Chairman, the statement the gentleman from North Carolina has made, as to the amendment which he offered to the Army appropriation bill not being a joker, is absolutely correct. There was no joker about it. It is only fair to the gentleman to make such a statement. The gentleman offered his amendment and it was agreed to by the House. I called attention to the amendment. Personally I did not think it advisable to adopt it. Personally I do not think it applies to the section to which the gentleman offered it, and that practically it is of no legislative value as it now stands in the bill; but there was nothing in the nature of a joker about it.

Mr. WEBB. The gentleman from California so stated at the time, but he understood the amendment fully, as did the committee.

Mr. MANN. I want to say that I had nothing to do with the newspaper article. As a matter of fact this matter has been proposed several times, and I have been successful in keeping it out, but I was not present at the time this amendment was adopted.

Mr. WEBB. The gentleman tried a year ago to prevent the knocking out of the polo shows, but he did not succeed. We knocked them out just as we are going to knock out horse shows.

Mr. MANN. He did succeed.

Mr. WEBB. It was done over the gentleman's protest.

Mr. KAHN. Mr. Chairman, I rather think that if there is any joker about the matter the joke is on the gentleman from North Carolina. The amendment should have been offered to the item which covers transportation for the Army, but the gentleman offered it at a place where it will not apply and it will do no harm.

Mr. WEBB. It evidently hit somebody, and particularly this "prominent Army officer," because he thinks the horse shows are ended unless the Senate rescues them. The amendment provides that "hereafter no part of this or any other appropriation" shall be used for horse shows, and so forth, and I think that covers whatever appropriation there is in the Army bill, and I am satisfied with it. My object was, however, to show to the House and the newspaper writer that there was no "joker" about it and that it was not "slipped" in, and that the newspaper report is entirely erroneous.

Mr. GARDNER. Mr. Chairman, I move to strike out the last word. A few minutes ago the gentleman from Kansas [Mr. MURDOCK] asked if I had ever accepted free transportation from a railroad company, to which I replied I never had; and I said that when passes were offered to me I sent them back. I made a mistake, because only one pass was ever offered to me, and I did send that back.

I have been in Congress since 1902. I heard a great deal about the passes that were thrust on us. I have had but one offered to me, and that was from the Canadian Pacific Railway, accompanied by Sir Thomas O'Shaunessy's card. I sent it back, and I never was offered any other. I never was offered any when I was in the State legislature. I never accepted any here; and now, Mr. Chairman, I wish to ask the gentleman from Kansas if he ever accepted free transportation from a railroad company since he has been a Member of Congress.

Mr. MURDOCK. Does the gentleman yield to me?

Mr. GARDNER. Yes.

Mr. MURDOCK. I am going to answer the question. The gentleman has an unfortunate habit of speaking for himself and also trying to speak for me. I acknowledge the gentleman's monumental virtue. I have sat for years with admiration for its magnitude. I did not suspect the gentleman had ever accepted transportation when I asked him the question. I thought probably he could answer as he did, that he never had. Now, I will answer the gentleman that since I have been a Member of Congress I have traveled on railroad transportation——

Mr. GARDNER. Free passes.

Mr. MURDOCK. Free passes. I will say to the gentleman that long before I came to Congress I traveled on free railroad transportation. As a newspaper man, I traveled on free railroad transportation for years. They were sent to the office, I suppose, on application; I did not apply to the railroad; I applied to the newspaper office. After I was elected to Congress, I received passes galore. I do not know that I have received one signed by one whose name started with "Sir," but I did have transportation free to a considerable extent sent me.

Mr. GARDNER. They knew that you were in the habit of receiving them.

Mr. MURDOCK. Oh, I do not claim the gentleman's great virtue, but I do try to be frank with the gentleman and the House. Long before they passed a law here, which I hold in my hand, the law of 1906, I stopped using railroad transportation, because the light came to me that it was not right for Congressmen to use free transportation.

Mr. GARDNER. How about the owner of a newspaper?

Mr. MURDOCK. Oh, unlike the gentleman from Massachusetts, I was not born absolutely pure.

Mr. GARDNER. Did the gentleman carry railroad advertisements in his paper?

Mr. MURDOCK. Oh, heavens, I do not know. I was engaged in the editorial side of my newspaper, and I do not suppose they did; but if they did they were paid for.

Mr. GARDNER. But the gentleman was in the habit of riding on free passes.

Mr. MURDOCK. Certainly. When I came to Congress I traveled on passes, as most of the other Members did.

Mr. GARDNER. I am not a Progressive and I am not virtuous, but I never did.

Mr. MURDOCK. As I said a moment ago, Mr. Chairman, we all stand astonished at the fact that the gentleman from Massachusetts is absolutely pure and that he was born pure.

Mr. MANN. I suppose, Mr. Chairman, that even the gentleman from Kansas was born pure.

Mr. MURDOCK. No; I do not think I was.

Mr. MANN. Though certainly he has not been since.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Salaries, Weather Bureau: One chief of bureau, $6,000; 1 chief clerk and executive assistant, $3,000; 1 chief of division of stations and accounts, $2,750; 1 chief of printing division, $2,500; 3 chiefs of division, at $2,000 each; 8 clerk, class 4; 11 clerks, class 3; 23 clerks, class 2; 30 clerks, class 1; 22 clerks, at $1,000 each; 10 clerks, at $900 each; 1 telegraph operator, $1,200; 1 assistant foreman of division, $1,600; 1 chief compositor, $1,400; 1 lithographer, $1,500; 2 lithographers, at $1,200 each; 1 pressman, $1,200; 5 compositors, at $1,250 each; 14 printers, at $1,200 each; 11 printers, at $1,000 each; 4 folders and feeders, at $720 each; 1 chief instrument maker, $1,400; 3 instrument makers, at $1,200 each; 2 skilled mechanics, at $1,200 each; 7 skilled mechanics, at $1,000 each; 1 skilled mechanic, $840; 1 skilled mechanic, $720; 6 skilled artisans, at $840 each; 1 engineer, $1,300; 1 fireman and steam fitter, $840; 5 firemen, at $720 each; 1 captain of the watch, $1,000; 1 electrician, $1,200; 1 gardener, $1,000; 4 repairmen, at $840 each; 6 repairmen, at $720 each; 4 watchmen, at $720 each; 17 messengers, messenger boys, or laborers, at $720 each; 6 messengers, messenger boys, or laborers, at $660 each; 31 messengers, messenger boys, or laborers, at $600 each; 88 messengers, messenger boys, or laborers, at $480 each; 5 messengers, messenger boys, or laborers, at $450 each; 27 messenger boys, at $360 each; 1 charwoman, $360; 3 charwomen, at $240 each; in all, $328,270.

Mr. FOWLER. Mr. Chairman, I reserve a point of order against the paragraph. There are several new pieces of legislation in the paragraph and several increases of salary in violation of the statute; that is, the permanent law. I desire to direct my point of order against the increase in the salary of the Chief of the Weather Bureau. The statute fixes that salary at $4,500, which is in the same category of places that were spoken of in the act of 1913. I do not desire to discuss the question.

Mr. LEVER. Mr. Chairman, if the Chair will permit me I will call attention to the fact that the salary here is exactly the same for the fiscal year.

The CHAIRMAN. The point of order is overruled.

Mr. FOWLER. Mr. Chairman, I desire to make a point of order that there was an assistant chief of the bureau, which office was filled by Henry E. Williams, at a salary of $3,250, and that there has been an effort in the bill to transfer him to the Division of Forecasting. I think it is proper to call the attention of the House to this question now, in order to save time.

Mr. LEVER. Mr. Chairman, does the gentleman make the point of order against that reduction, or does he intend to try to restore the language?

Mr. FOWLER. No; I am not complaining about the saving, because there is no saving. It is absolutely a changing of Henry E. Williams as Assistant Chief of the Weather Bureau into another division at a salary of $3,250; and, so far as the saving in the salary is concerned, there is no saving whatever. Henry E. Williams was with Mr. Moore, the former chief of the bureau. He was one of the fellows who was in Mr. Moore's Landmore apartment-house scheme, a list of whose officials I hereby insert:

COPY OF CERTIFICATE OF INCORPORATION, RECORDER OF DEEDS, WASHINGTON, D. C.

[Landmore Apartment House Co., No. 6418, book 18, page 142. Received for record November 3, 1904.]

Object of incorporation: To acquire the property of the Landmore Apartment House Co. of Virginia, consisting of an apartment house in Washington, D. C., Twenty-fourth Street, between L and M Streets, NW., lot 10, in square 37, and to own, operate, manage, maintain, transfer, convey, sell, and mortgage the same.

Existence of corporation: Perpetual.

Capital stock: Fifty thousand dollars.

Shares: Five hundred, at a par value of $100 each.

Directors of corporation for first year: Willis L. Moore, Frederick V. Coville, Henry E. Williams, Theodore Harding, Edgar B. Calvert, Elizabeth V. Coville.

Incorporators, all of whom are residents of the District of Columbia: Willis L. Moore, Frederick V. Coville, Henry E. Williams, Edgar B. Calvert, Theodore Harding, Elizabeth V. Coville.

Acknowledgement: Before D. J. Carroll, a notary in and for the District of Columbia.

The CHAIRMAN. Will the gentleman indicate what line that is?

Mr. LEVER. Mr. Chairman, I make the point of order that the gentleman from Illinois does not have anything before the House. He has not made a point of order, nor has he submitted an amendment.

Mr. FOWLER. Mr. Chairman, I have reserved the point of order against the paragraph.

The CHAIRMAN. If the gentleman would point out the part of the paragraph to which he is directing his attention, the Chair will be obliged.

Mr. FOWLER. In line 16 there is an omission of the position of Assistant Chief of the Weather Bureau, which position was filled by Mr. Henry E. Williams. An effort has been made to transfer him to another department.

The CHAIRMAN. What the Chair would like to know is, Where does the gentleman from Illinois get the information that there is an attempt made to transfer him somewhere else?

Mr. FOWLER. I have looked into it, and know.

The CHAIRMAN. But it does not appear in this paragraph, does it?

Mr. FOWLER. The last bill carried a provision for an assistant to the Chief of the Weather Bureau.

The CHAIRMAN. In order that the gentleman may understand the position of the Chair, does the gentleman make his point of order against a proposition that some position is left out of the paragraph?

Mr. FOWLER. No. I am calling the attention of the House now to this effort to make a change, in order that a point of order may be properly maintained at the proper place, if it is in the bill.

Mr. LEVER. Mr. Chairman, I call the Chair's attention to the fact that there is absolutely nothing in this proposition to which the point of order could lie, because the gentleman is discussing something that is not in the bill at all.

The CHAIRMAN. The Chair will hear the gentleman for a short time.

Mr. FOWLER. Mr. Chairman, in line 17 there is a new position attempted to be created—one Chief of Division of Stations and Accounts, $2,750. That is a new position entirely, not carried in the bill heretofore, as I recollect, and I have run the matter down and have marked it new. I make the point of order against it.

The CHAIRMAN. Does the gentleman make the point of order against that position?

Mr. FOWLER. Yes.

Mr. LEVER. Mr. Chairman, I think it is unnecessary to argue that point. The Chair has already taken its position upon it, and I have nothing further to say.

Mr. FOWLER. Mr. Chairman, it has been repeatedly held here that where there is an effort to create a new office entirely distinct from what the bill has ever carried heretofore, it is subject to a point of order, and that has been the unanimous ruling of the Chair heretofore. I have interposed these points of order myself, and the Chair has uniformly sustained the point of order. This is not a position similar to a position heretofore held in this bureau, but it is the creation of a new place for a new man, to add new burdens to the taxpayers of the land, and I am trying to save the people these burdens, and these positions ought not to be created so promiscuously without some kind of authority of law.

Mr. LEVER. Mr. Chairman, if the gentleman from Illinois will yield, I do not care to discuss the point of order, because, as I said a moment ago, the Chair has already ruled on the proposition, but for the information of the gentleman from Illinois I desire to say that the position against which he is complaining is not the creation of a new place at all, and if it were it would not affect the point of order. It is a transfer, under authority of Congress and under the direction of Congress, of a man from the Division of Accounts and Disbursements to the Weather Bureau, at the same salary that he held in the Division of Disbursements and Accounts, and that appropriation is accordingly there reduced, as is set out very fully in my report. This man is not a new man, he has been doing this work for many years, and he has been located in the Weather Bureau and heretofore has been attached officially to the Division of Accounts and Disbursements, but Congress, through an act in 1912, I think, required that each bureau should do its own accounting, and that the Division of Accounts and Disbursements should hold only a revisionary accounting. It is not a new place; it does not increase the appropriation; it is only a transfer directed to be done under the law; and even if it were a new place it would not be subject to a point of order. I ask the Chair for a ruling.

The CHAIRMAN. Does the gentleman from Illinois desire to be heard any further?

Mr. FOWLER. Mr. Chairman, I submit this is a new place, a creation of a new office, and my point of order ought to be sustained.

The CHAIRMAN. The Chair would like to ask the gentleman from South Carolina a question. The Chair based his ruling a while ago on the proposition that there are certain details of organization in these different departments that must be left, necessarily, to the discretion of the heads of the departments in order that the work of the department may be carried on, but the Chair is somewhat reluctant to extend that ruling to posi-

tions other than subordinate detailed minor positions of the department. Now, the Chair desires to ask the gentleman in charge of the bill is this a new position which is being created?

Mr. LEVER. It is not a new position, but a transfer under the direction of law of a man who has heretofore been carried on the roll of the division of accounts and disbursements, but actually doing work in the Weather Bureau. I desire to call the attention of the Chair further to section 4 of the act creating the Weather Bureau, which provides:

That the Weather Bureau shall hereafter consist of one Chief of the Weather Bureau and such subordinate employees as Congress may annually provide for and as may be necessary to properly perform the duties involving on said bureau by law, and the Chief of the Weather Bureau shall receive, etc.

Clearly the statute that created the Weather Bureau gave Congress the right from time to time to afford it such employees as are necessary to carry out the work for which it is created. If the Chair desires to see this law, I will send it to him.

The CHAIRMAN. The Chair would be glad to have you send it up.

Mr. FOWLER. But, Mr. Chairman, that statute does not give Congress the right to create new positions.

Mr. LEVER. I want to say the gentleman's contention has this very remarkable effect: If the contention of the gentleman from Illinois is correct that the section of the Revised Statute which the Chair has before him does not give authority to Congress to create sufficient positions to carry on the necessary work of the Weather Bureau, then every single, solitary item of this statutory roll is subject to the point of order, except the item for the salary of the Chief of the Weather Bureau. It is just exactly in line undoubtedly with the ruling of the Chair this morning and with the argument of the gentleman from Illinois [Mr. MANN].

The CHAIRMAN. The Chair does not quite agree with the gentleman from South Carolina on that proposition, and yet in the main the Chair thinks there is not much difference between us. This position would come, the Chair thinks, in another category from the class of employees we were considering a few moments ago, and the Chair wants to ask the gentleman this question: The Chair understood the gentleman to say a while ago that this same work has been done in the bureau by the same person and at the same salary, but perhaps under a different title. Is that true that it is only a change of title?

Mr. LEVER. It is not even a change of title. This work has heretofore been done in the Division of Accounts and Disbursements, but under an act of Congress the Division of Accounts and Disbursements was decentralized; and this man who has been doing this work, with his office located in the Weather Bureau, has been transferred from the roll of the Division of Disbursements and Accounts to the roll of the Weather Bureau, doing precisely the same work.

The CHAIRMAN. Well, that is the point the Chair desired to have made clear. The Chair understood the gentleman at first to make that statement. If that be true, there is really no new position created; and, therefore, the Chair will overrule the point of order.

Mr. FOWLER. Mr. Chairman, in line 24 there is a new office created—one pressman, at $1,200. I make the point of order against it as being new matter.

The CHAIRMAN. The point of order is overruled for the same reason that the Chairman gave a moment ago.

Mr. FOWLER. On page 4, line 2, there is one chief instrument maker, at $1,400—a new position—and it is a chief position.

Mr. LEVER. I would say to the Chair that this is only a change of title. It is "one chief instrument maker" in lieu of "one chief mechanic," at $1,400. The salary is exactly the same, the work is the same, and the man is the same. The only thing we did here was to try to set out more distinctly and accurately his line of work.

The CHAIRMAN. The point of order is overruled.

Mr. FOWLER. Mr. Chairman, I call the attention of the Chair to the fact that the chairman of this committee has relied upon the act of 1913—the two-line-and-a-half provision—for the salaries of this bureau. Now, he is bringing in at the very next session of Congress an increase to that force by creating new places and then contending that, because they may have been carried somewhere else, they are not new places. "Somewhere else" was a place where a man had no duty to perform and was compelled to get out. "Now" is a new place created in this bureau for the purpose of taking care of him. That is what this case is.

Mr. LEVER. Oh, the gentleman is making a statement which, I trust, he ought to know does not state the facts, because I tried to state to the gentleman as plainly as I knew how to use the English language to convey my thoughts that this was the same man at the same salary and doing the same work, and that it was only a change of title. I hope the gentleman will not so far forget himself as to impugn my veracity as to a statement upon the facts in this bill. The "gentleman from South Carolina" is not given to doing that kind of work, I will say to the gentleman from Illinois.

Mr. FOWLER. The gentleman from South Carolina has the respect of the "gentleman from Illinois."

Mr. LEVER. I believe that, and I am proud of it.

Mr. FOWLER. Repeatedly so. But I want to say to the gentleman from South Carolina that I have gone into this bill with some degree of care, the same as he has.

Mr. LEVER. Does the gentleman deny the truth of the statement I make that this is nothing but a change of title?

Mr. FOWLER. I say that this place was not provided for in the last bill.

Mr. LEVER. It is exactly the same place, except we call him by a different name. "A rose by any other name would smell as sweet."

Mr. FOWLER. That is one of the ways the appropriation committees have had in the past to create new offices, and then reinstated the old fellow under the old title.

The CHAIRMAN. The Chair has overruled the point of order on that proposition and it is not necessary to take up any more time on it.

Mr. FOWLER. On page 4, Mr. Chairman, in line 3, there is the item "3 instrument makers"—new material and new places, and at $1,200 each.

Mr. LEVER. Mr. Chairman, the same explanation, exactly, applies to that as applies to the item above. They are three instrument makers, at $1,200 each, in lieu of three skilled mechanics, at $1,200 each. In other words, the department desired to change the title of these men in order more clearly to express the character of work they are doing. They are the same men, doing the same character of work.

Mr. FOWLER. And then you will come along at the next session of Congress and ask that the three skilled mechanics be reinstated.

Mr. LEVER. I hope the gentleman will trust me not to do that.

Mr. FOWLER. That was what was done with the law clerk and solicitor, and you made 21 law clerks instead of 1 law clerk two years ago.

The CHAIRMAN. The point of order is overruled.

Mr. FOWLER. On page 4, line 9, is a new place; not exactly a new place, but an increase in the salary over the salary of last year of a gardener. The word "gardener" is a misnomer. He is nothing but a lawn mower, and if they would change the title to that of "lawn mower" and give him $1,200 a year I would be satisfied with it, and I hope the gentleman will see proper in the next bill to properly name this man.

Mr. LEVER. I am afraid the gentleman would make a point of order against it.

The CHAIRMAN. Does the gentleman from Illinois [Mr. FOWLER] make a point of order against this item?

Mr. FOWLER. No, Mr. Chairman; I do not desire to make a point of order on that.

I desire also to ask the gentleman if it is not a fact that he is not a gardener, but just a lawn mower?

Mr. LEVER. It is not a fact.

Mr. FOWLER. What garden work does he do?

Mr. LEVER. Here is what is disclosed in the hearings:

Mr. CALVERT. That gardener is a remarkable man. Without any assistant whatever, he takes care of all the ground and flower beds about the Weather Bureau premises. He does it in a manner that is highly creditable.

Mr. MCLAUGHLIN. How much ground have you?

Mr. FOWLER. It is about a quarter of an acre?

Mr. LEVER. I do not know. I have not stepped it off myself. I will read further:

Mr. CALVERT. I can not say. It is probably an acre or a little bit more; but it is so cut up that it involves a considerable amount of work.

Mr. HAUGEN. You have more than a block, haven't you?

Mr. CALVERT. We have only a little more than a fourth of a block. It is a very large block. It is the same block in which the Columbia Hospital is located.

Mr. SLOAN. How long has he been gardener?

Mr. CALVERT. I do not recall exactly, but I should say five years.

The CHAIRMAN. Has he had an increase of salary since he came into the service?

Prof. BOWIE. He had an increase of $10 a month last year.

Dr. GALLOWAY. Mr. Chairman, last year there was a general increase of salaries of gardeners in the department. That was made without any estimates being submitted, and about 15 or 20 gardeners had their salaries increased.

The CHAIRMAN. How does this salary compare with the other gardeners of the department?

Dr. GALLOWAY. It is less. Some of the gardeners receive salaries ranging from $1,200 to $1,400.

The CHAIRMAN. For the same kind of work?

Dr. GALLOWAY. No; the high-class men doing propagating work, of course, are paid the higher salaries.

Mr. FOWLER. The only thing I am complaining about——

Mr. LEVER. Now, that is all the information I have.

Mr. FOWLER. However, he is nothing but a lawn mower.

Mr. LEVER. Then the gentleman has more information than has the department official.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

General expenses, Weather Bureau: For carrying into effect in the District of Columbia and elsewhere in the United States, in the West Indies, and on adjacent coasts, in the Hawaiian Islands, in Bermuda, and in Alaska, the provisions of an act approved October 1, 1890, so far as they relate to the weather service transferred thereby to the Department of Agriculture; for the employment of professors of meteorology, district forecasters, local forecasters, meteorologists, section directors, observers, assistant observers, operators, skilled mechanics, instrument makers, assistant foremen, proof readers, compositors, pressmen, lithographers, folders and feeders, repairmen, station agents, messengers, messenger boys, laborers, special observers, display men, and other necessary employees; for fuel, gas, electricity, freight and express charges, furniture, stationery, ice, dry goods, twine, mats, oils, paints, glass, lumber, hardware, and washing towels; for advertising; for subsistence, care, and purchase of horses and vehicles, and repairs of harness, for official purposes only; for instruments, shelters, apparatus, storm-warning towers and repairs thereto; for rent of offices; for repairs and improvements to existing buildings and care and preservation of grounds, including the construction of necessary outbuildings and sidewalks on public streets abutting Weather Bureau grounds; and the erection of temporary buildings for living quarters of observers; for official traveling expenses; for telephone rentals and for telegraphing, telephoning, and cabling reports and messages, rates to be fixed by the Secretary of Agriculture by agreements with the companies performing the service; for the maintenance and repair of Weather Bureau telegraph, telephone, and cable lines; and for every other expenditure required for the establishment, equipment, and maintenance of meteorological offices and stations and for the issuing of weather forecasts and warnings of storms, cold waves, frosts, and heavy snows, the gauging and measuring of the flow of rivers and the issuing of river forecasts and warnings; for observations and reports relating to crops and for other necessary observations and reports, including cooperation with other bureaus of the Government and societies and institutions of learning for the dissemination of meteorological information, as follows:

Mr. FOWLER. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. FOWLER. Will this bill be read by paragraphs or by sections?

The CHAIRMAN. It is read by paragraphs. The Clerk will read.

The Clerk read as follows:

For necessary expenses in the city of Washington incident to collecting and disseminating meteorological, climatological, and marine information, and for investigations in meteorology, climatology, seismology, evaporation, and aerology, $122,000.

Mr. FOWLER. Mr. Chairman, for the first time, as I recollect, in the history of the Weather Bureau, a new term has crept in, namely "seismology," and I desire to make a point of order against it.

The CHAIRMAN. The gentleman will state his point of order.

Mr. LEVER. Will the gentleman reserve it?

Mr. FOWLER. Yes; I will reserve the point of order.

Mr. LEVER. Mr. Chairman, in this connection I desire to say this: The Department of Agriculture for a number of years has been requesting the Committee on Agriculture to include that language in the bill. Up to 1913 the department, in fact, through its Weather Bureau, was doing seismological work, but the Comptroller of the Treasury held that there was no authority under the law for the Weather Bureau to do it. The committee, however, held that inasmuch as we have opened the Panama Canal, and inasmuch as we were continuing to build higher and higher structures, and in the West to erect drainage canals and irrigation canals, and with the evidence before us of the value of information as to just where the earth fissures were, probably this would be a rather good investment.

I want to call your attention to the statement of President John C. Banner, of Stanford University, made on December 13, 1913:

[From the Star, Washington, D. C., Sunday, December 14.]

EARTHQUAKE SHOCK CALIFORNIA PUZZLE—STANFORD UNIVERSITY PRESIDENT DECLARES THERE IS "CONSPIRACY OF SILENCE"—GLARING NEED OF DATA IN PANAMA CANAL ZONE—THINKS WHOLE PROBLEM SHOULD BE PART OF DUTIES OF THE WEATHER BUREAU HERE.

SAN FRANCISCO, *December 13.*

There is an "earthquake problem" in this country, according to President John C. Branner, of Stanford University, and it can and ought to be coped with in the same way that a business problem or a pestilence would be met.

In a speech here to-day he spoke deprecatingly of the "conspiracy of silence," which he said had hindered a scientific and sane study of the "active faults" in the earth's crust in California which would make possible a campaign against a repetition of the disaster of 1906.

"We must study quakes, where they originate, how and why," he said. "Our study of the 1906 earthquake enabled us to map out the entire distance of the fault which caused the damage—the fracture of the earth's crust which slipped and caused the tremble.

WORKING TO LOCATE FAULTS.

"There are plenty of active faults in California, and we should be working now to locate them. When we know where they are we can keep our houses, bridges, dams, pipe lines, and other structures off them, or we can do our engineering so that when the next earth slip comes the effect will be negligible.

"If the wrigging line of the 1906 fault had been accurately known the Spring Valley Water Co would not have had its pipe line laid over it, the water would not have been shut off, and this city would not have been destroyed.

"In projecting the great Hetch Hetchy municipal water system to this city, Engineer Freeman asked my advice as consulting geologist. I pointed out that near Civington the line would have to cross an active fault, which sooner or later would shift and cause a break in the line. Freeman proposes to remedy this by constructing a valve above the fault and erecting a repair station near by

LOS ANGELES AFFECTED.

"In the enormously long and expensive pipe lines which Los Angeles has built from Owens Valley it has been impossible to avoid crossing an active fault, which in time will cause a break. The city of Los Angeles has sought to minimize the danger by constructing a huge reservoir and repair facilities near by.

"In the Panama Canal Zone there is a glaring example of the need of gathering earthquake data. At present it is evident that there is no intelligent study and the engineers are working in the dark.

"This whole problem should be under Government supervision. Economically, it should be a part of the duties of the Weather Bureau. In due time the comparison and tabulation of information on all quakes would give us a working knowledge of all menacing faults, and we could guard against their damaging effects."

I read the following memorandum:

UNITED STATES DEPARTMENT OF AGRICULTURE,
WEATHER BUREAU, OFFICE OF THE CHIEF,
*Washington, D. C., December 16, 1913.*

MEMORANDUM FOR THE ASSISTANT SECRETARY ON THE SUBJECT OF SEISMOLOGY AND THE WEATHER BUREAU.

DEAR DR. GALLOWAY: I wish to ask your attention to the inclosed clipping from the Washington Sunday Star of December 14, wherein Dr. Branner, president of the Leland Stanford University, points out the great need of seismological work, especially in California and the Canal Zone, and incidentally states that, economically, this work should be a part of the duties of the Weather Bureau. I hope you will bring this matter to the attention of Mr. LEVER not only because the Weather Bureau estimates contain the authority to engage in seismological observations, but because I made it the subject of special remarks in connection with our estimates for taking up forecast work in the Caribbean Sea and the Canal Zone. Both aspects of the matter are touched upon by President Branner, who is one of the foremost students of the great problems of seismology confronting residents and engineers of California.

Very respectfully,

C. F. MARVIN, *Chief of Bureau.*

I want to call my friend's attention to the further fact that the United States is the only great Government on the face of this earth that is not doing seismological work. I concede the point of order, Mr. Chairman. The language is subject to a point of order. But the committee recognized that when it put it in the bill, but we thought that the matter was of such importance and that the cost of doing it is so little—$10,000 is the estimate—and it does not increase the sum heretofore carried in this bill for the purposes of the Weather Bureau. They are going to take it out of something else if we should allow it.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from South Carolina yield to the gentleman from Minnesota?

Mr. LEVER. I do.

Mr. ANDERSON. Does the insertion of this word involve any increase in the amount of the appropriation in this item or in any other item?

Mr. LEVER. It involves no increase in the funds for the present fiscal year, but of the funds provided in this bill from eight to ten thousand dollars will be used in this work. In other words, let me say to the gentleman from Minnesota, all we need to do is to purchase a few of these instruments which record the movement of the earth. For instance, the other night in the great storm we had the seismological instrument that they have at the Georgetown University described distinctly the motion of the earth under the tremendous pressure above it. The Weather Bureau officials are capable of doing this work. All we need to do now is to provide them with a few instruments, and in the future only a small sum of money will be needed to keep up with that work.

Mr. ANDERSON. I understand the department is now doing this work, but that the Comptroller of the Treasury has held that they had no authority to do it.

Mr. LEVER. Yes. The comptroller said they had no authority. I concede the gentleman's point of order, if he makes it.

Mr. STAFFORD. Mr. Chairman, I desire to know if there is any handle upon which to hang this appropriation in order to make it in order? I desire to ask if the other matters carried in the paragraph are authorized by existing law? If they are, then this whole paragraph is subject to a point of order, and the point of order being made to one item only, under the familiar rule this item would not be subject to a point of order.

Mr. LEVER. Mr. Chairman, I will say to the gentleman that I contend and absolutely believe that the other items are not subject to a point of order. I hope the gentleman from Illinois [Mr. FOWLER] will not make his point of order, because I know this will be very valuable work.

Mr. FOWLER. Mr. Chairman, I do not believe that seismology has any more connection with astronomy than the forest fires that originate in Canada; none whatever. If we embark on the study of seismology in the Agricultural Department, it undoubtedly will carry us adrift.

Mr. LEVER. Mr. Chairman, will the gentleman yield for a minute?

The CHAIRMAN. Does the gentleman yield?

Mr. FOWLER. Yes; in a moment. The great pressure that will be brought to bear upon the committee and upon Congress was indicated by the distinguished chairman of this committee when he said that in the region of the Panama Canal there is an earthquake zone. That will be brought with the greatest force on earth before Congress for future appropriations, and I have no doubt, Mr. Chairman, that if we place in the scope of the authority of the Agricultural Department seismology it will cost the United States more than the digging of the Panama Canal. For that reason, Mr. Chairman, I make the point of order.

The CHAIRMAN. The point of order is sustained. The Clerk will read.

The Clerk read as follows:

For necessary expenses outside of the city of Washington incident to collecting and disseminating meteorological, climatological, and marine information, and for investigations in meteorology, climatology, seismology, evaporation, and aerology, $1,189,000, including not to exceed $591,000 for salaries, $120,000 for special observations and reports, $275,000 for telegraphing and telephoning, and $30,000 for traveling expenses.

Mr. MADDEN. Mr. Chairman, I make a point of order against that.

The CHAIRMAN. The gentleman from Illinois [Mr. MADDEN] makes a point of order against that paragraph.

Mr. MADDEN. It is a change of existing law.

Mr. LEVER. Mr. Chairman, I do not think that that point of order is well taken. I wish to call the attention of the gentleman from Illinois [Mr. MADDEN] to what the committee is undertaking to do in this rearrangement of the language of this bureau.

This language under general expenses under the Weather Bureau has been a matter of a good deal of attention on the part of the committee for several years. Heretofore the bureau has been doing its work upon a basis absolutely different from that of any other bureau of the Department of Agriculture. In the estimates the department submitted certain language, rearranging the old language of the bill, but conferring no new authority upon the bureau. The Committee on Agriculture was not entirely satisfied with the language submitted, and we had the department submit other language time and time again until we found such language as we thought would meet the situation.

Heretofore the Weather Bureau has been doing its work on the line of the material used rather than upon the basis of projects. In other words, if you were building a house, what you would be interested in would be the total cost of the house. Now, the Weather Bureau heretofore has been submitting its estimates not upon projects but upon how much the brick in the house will cost; how much the laths will cost; how much the cement will cost; how much the doors will cost; how much the labor will cost, and the like of that. I do not know that this arrangement is the very best we can get ultimately, but what we want to do is to put the Weather Bureau on a project basis, just as the other bureaus of the department now are.

Mr. STAFFORD. Will the gentleman yield in that connection?

Mr. LEVER. Yes; I yield.

Mr. STAFFORD. I notice that in last year's appropriation act you segregated much more specifically than you have in this bill as to the various provisions. One of those items, carrying an appropriation of $590,500, was for the employment of professors, meteorological inspectors, and the like. In the phraseology which is submitted by the committee in the present bill there is no language authorizing the employment specifically of professors for the purposes herein indicated. Does the gentleman think, or does the committee believe, that it is good legislation to combine under general authority and give the department wide discretion in the expenditure of the appropriation, or whether, as some other committees believe, it is better policy to segregate the items as far as possible?

Mr. LEVER. I will say to the gentleman that as a general proposition I believe the more we can segregate these items the better.

Mr. STAFFORD. Will the gentleman point out wherein he would place any limitation whatsoever on the activities of the Weather Bureau in the employment of professors of these various kinds, if there is no limitation as to the amount that can be expended?

Mr. LEVER. I call the gentleman's attention to the language on page 6, line 19:

Including not to exceed $591,000 for salaries,

That is the limitation. As I said a moment ago, what we are trying to do is to get the Weather Bureau on a project basis, and hence we have divided it up in this way—so much in the city of Washington, so much outside of the city of Washington, so much for the maintenance of a printing office, and so much for the erection of buildings. But you will notice that in that second division we have put limitations and divided that up. While it carries a total of $1,189,000, not to exceed $591,000 is to be used for salaries, $120,000 for special observations and reports, $275,000 for telegraphing and telephoning, and $30,000 for traveling expenses. In other words, when it comes right down to bedrock, we have more nearly segregated the items here than in the old bill.

Mr. STAFFORD. I take the contrary position, because under the general phraseology "for necessary expenses," that might include employment of services that would not be considered strictly as salaries. I address the inquiry in all good faith to the chairman, whether he thinks that in the preparation of future bills the Weather Bureau will be held to as strict an account when you lump these items together, as in the former bills, when we had separate paragraphs in which they were limited specifically to the various kinds of work that they might do?

Mr. LEVER. I will say to the gentleman that the Secretary of Agriculture is required to file a detailed statement with Congress as to the lines of expenditure, and the Committee on Agriculture never makes up one of these bills without looking very carefully into that.

Now, I want to call the attention of the gentleman to a specific case which illustrates how necessary it is that we get upon a project basis, and not upon a material basis, as it were. In other words, here is one man who is doing a number of lines of work, and yet he must keep a separate account of how many hours he puts upon climatology, how many hours upon meteorology, how much fuel is used while he is devoting his time to climatology, how much gas is used while he is devoting his time to sending out forecast warnings. It was the thought of the committee that if we could place this upon a project basis, in the future we would be able to keep such a hand upon it that we could actually effect a real economy in the work of the Weather Bureau, and that is the thought of the Department of Agriculture in its rearrangement.

Mr. STAFFORD. I direct the gentleman's further attention to some other segregated items in last year's appropriation act:

For fuel, gas, electricity, freight and express charges, furniture, stationery, and all other necessary supplies and miscellaneous expenses, $106,500.

That item is not segregated in any way in this general omnibus provision.

Mr. LEVER. For the very reason I suggest. Here is a man who is in charge of climatological work, in charge of meteorological work, in charge of the issuing of flood warnings, in charge of the issuing of forecasts. All these things are done by the same man.

Mr. ANDERSON. Would not the gentleman's reasoning apply to every other department?

Mr. LEVER. To some extent; yes.

Mr. STAFFORD. He is in the same bureau?

Mr. LEVER. But this man, doing this work, is required to keep a separate account against every line of work he is doing.

Mr. STAFFORD. Not under these segregated items for fuel and materials used.

Mr. LEVER. Undoubtedly.

Mr. STAFFORD. Congress is surrendering supervision as to the amount that may be expended for these different items. I will take the following item in last year's appropriation act:

For instruments, shelters, apparatus, storm-warning towers, and repairs thereto, $43,500.

Where is there any such segregated item in this general omnibus paragraph that the committee reports?

Mr. LEVER. That is carried for necessary expenses outside of Washington.

Mr. STAFFORD. Under "necessary expenses" you are leaving to the control of the department the expenditure of money and surrendering the control of Congress over limitations.

Mr. SELDOMRIDGE. I would like to ask the gentleman from Wisconsin a question.

Mr. LEVER. I will yield to the gentleman from Colorado.

Mr. SELDOMRIDGE. Is not Congress entitled to know the expenditures of each station outside of Washington?

Mr. STAFFORD. It has been the policy of Congress to segregate as far as practicable every item that it was possible to segregate. For years and years Members have been trying to have the appropriations in the Agricultural bill segregated. For years the bill came in without much segregation, but after a while Members made an attack on that plan and the committee in a subsequent Congress then revised and segregated it somewhat. Now, I am fearful that the committee is going back to that old way of surrendering the authority to the department. Politics has nothing to do with this question; but in past administrations abuses grew up in the Agricultural Department which had their seat in the fact that there was no limitation on the expenditures of the vast sums of money that were committed to the discretion of the various bureau heads. I believe in segregation. We all know that every person at the head of a bureau has a hobby, and how they always try to emphasize the importance of their special work by extending in all possible directions if there is no limitation on their power or on the separate amount that may be expended.

Mr. LEVER. Let me call my friend's attention to this fact: The Secretary of Agriculture appointed a committee from his department to go into the matter and reorganize the Weather Bureau, put it on a project basis in keeping with the line of work of the various other bureaus of the department. That committee, as I suggested a moment ago, submitted the language which the gentleman will see in the items. The committee did not believe that it carried out the purpose that the gentleman is now suggesting, the segregation of these items, to such an extent as would meet the will of Congress. Hence we sent back to them for additional segregation of these items. The result was that they brought to us this language which we offer, which I went over very carefully to see that there was no new authority slipped in, and which the committee likewise did, and we believe that we are beginning—we may not have accomplished it yet—but we believe we have set out to place the Weather Bureau on a project basis so that hereafter Congress will know exactly how the money is being spent.

There are 202 principal weather bureau stations. We would like to know how much money we are spending. There is not a line in the old bill that will designate that proposition or indicate how and where it is spent, but we can do it under this bill.

Mr. STAFFORD. Will the gentleman point out under this item as it is framed how much money will be spent for instruments, shelter, and apparatus?

Mr. LEVER. Of the $1,189,000 there is not to exceed $591,000 for salaries; that is to be expended outside the city of Washington.

Mr. STAFFORD. Where is there any provision that restricts the expenditure for instruments?

Mr. LEVER. The bill says not to exceed $120,000 for special observations and reports, $275,000 for telegraphing and telephoning, and $30,000 for traveling expenses.

Mr. STAFFORD. Yes; but where is there any limitation upon what should be expended for instruments? That was segregated in the last year's appropriation bill.

Mr. LEVER. There is not anything as to instruments, but I call attention to this fact, that it would be impossible to segregate that amount without doing what we do not want to do—going back to the old line of appropriation.

Mr. MADDEN. Will the gentleman yield?

Mr. LEVER. Certainly.

Mr. MADDEN. All the items covered in this paragraph have been provided for in previous bills under a different form of language?

Mr. LEVER. Undoubtedly. If my friend will look at the old language and read it with the new language he will find that there is not a word of new language in this bill that was not in the old bill, except the word "seismology," which my friend from Illinois, Mr. FOWLER, had excluded on a point of order.

Mr. MADDEN. The thing that occurred to me was that it had been the policy of the House in the past, as far as possible, to itemize the different appropriations for the various activities of each department.

Mr. LEVER. And the committee is in line with the gentleman from Illinois.

Mr. MADDEN. I am afraid the language used in this paragraph departs from that practice and goes back to a policy which was in existence before the beginning of the system which itemized the statements and expenses in the various bureaus of the different departments of the Government.

Mr. LEVER. The committee, on the contrary, believes that we are beginning—we may not have accomplished it fully in this bill, because it is the first time we have attempted it—but we believe that this is the beginning of such segregation as the gentleman has outlined.

Mr. MADDEN. Now, there are $591,000 that may be used in this paragraph for salaries. My thought was, and is, that we ought to state the number of men to be employed, the salaries to be paid, and the duties to be performed. But under this method of appropriation we yield all of that to the judgment of the head of the department, and we leave it to him to say whether he shall employ 100 men at $200 a month each or whether he shall employ 200 men at $100 a month.

Mr. LEVER. The gentleman will understand that the scientific employees have always been carried in a lump sum, while the clerks, pure and simple, are carried on the statutory roll under act of Congress.

Mr. MADDEN. Are not clerks paid out of this item?

Mr. LEVER. These are all scientific men. I want to call attention to a statement I have in my hand showing that the committee is informed of the names of these men, the salaries that are paid to them, where they are located, and so forth, 55 pages of it.

Mr. MADDEN. The only thing that prompted me to raise the point of order was the doubt as to whether or not we were not departing from the custom that we have heretofore adhered to and yielding up all of our authority to the heads of the department.

Mr. LEVER. It was the earnest intention of the committee to work in the very direction which has been outlined by the gentleman from Illinois, the gentleman from Wisconsin, and the gentleman from Minnesota. If we have not succeeded, we do believe that we have begun a start which will end in such a setting out of the items in our bill as will put Congress in full possession of the amount expended in the various lines of work.

Mr. MADDEN. Of course I have no disposition to make the point of order if there is no reason why it should be made.

Mr. FOWLER. Mr. Chairman, I reserve the point of order.

Mr. MADDEN. Mr. Chairman, I withdraw the point of order.

The CHAIRMAN. The gentleman from Illinois withdraws the point of order, but his colleague [Mr. FOWLER] reserves the point of order on the paragraph.

Mr. FOWLER. Mr. Chairman, I feel quite sure that certain portions of the language in that paragraph ought to be stricken out. For instance, the word "seismology" ought to be stricken out, in harmony with the ruling of the Chair a short time ago.

The CHAIRMAN. The Chair presumes the chairman of the committee will concede that. The gentleman from Illinois raises the point that in this paragraph the word "seismology," in harmony with the ruling a while ago, ought to go out.

Mr. LEVER. Mr. Chairman, I am perfectly willing that that should go out.

Mr. FOWLER. Of course, Mr. Chairman, that would carry the entire paragraph.

Mr. LEVER. Mr. Chairman, I understand the gentleman from Illinois to make the point of order against the word "seismology," on page 6, line 18?

Mr. FOWLER. I have not done that yet.

Mr. LEVER. Mr. Chairman, I ask unanimous consent that the word "seismology" may be stricken out.

Mr. FOWLER. Mr. Chairman, I do not desire to yield the floor.

Mr. LEVER. Oh, I thought the gentleman just wanted to get that word out.

Mr. FOWLER. No. Mr. Chairman, there are other features in this paragraph than that of seismology that are objectionable, and I desire to point some of them out. The distinguished chairman of this committee is always frank and generous. I know he never makes a mistake unless it is purely a mistake, and does not intentionally at any time, I believe, try to deceive this House. I could not pay a higher tribute to any other man in the House than he is deserving of, but as he has well said, he is not the Committee on Agriculture, but only a member of it and its chairman, and he stands like other chairmen of committees. He is dependent upon the information which he receives from the Secretary and chiefs of bureaus and those who may be connected with important parts of the work. Mr. Chairman, there is one feature of this paragraph that to my way of thinking is absolutely horrible, and that is the lump-sum appropriation of $591,000. This appropriation is made for an alibi. There is not a single man in this bill for which any of this money is to be appropriated. If he were charged with an offense and wanted to interpose a plea of alibi, he could successfully maintain his position and be acquitted. Mr. Chairman, it has been the practice for a goodly number of years to appropriate lump sums. In 1900 the lump sum was something like $380,000, but since that time we have seen it almost double itself, and there ought to be a change made some time, so that

Congress would know for what purpose the appropriations are being made. There is a statute providing that this force of laborers, skilled laborers, or professional men, as the case may be, can not be paid above $3,500. There is a provision in this bill to extend that to $4,500.

Mr. LEVER. It is $4,000 at the present time, and the provision is to extend it to $4,500.

Mr. FOWLER. Mr. Chairman, I understand from the chairman of the committee that the law now is $4,000, but I had understood it to be $3,500; I may be mistaken. There is a provision in this bill proposing to raise that limit to $4,500. Mr. Chairman, I have in my hand a list of 465 employees whose salaries are fixed solely by the chiefs, or by the Chief of the Weather Bureau, which I desire to extend in the RECORD.

*Weather Bureau employees on miscellaneous roll of "General expenses, Weather Bureau, station salaries."*

Professors of meteorology ($3,500): H. J. Cox, H. C. Frankenfield, A. J. Henry, A. G. McAdie, C. F. Marvin. Total (5), $17,500.

Professor of meteorological physics ($3,500): W. J. Humphreys. Total (1), $3,500.

Professors of meteorology ($3,000): C. Abbe, H. L. Heiskell (on furlough until further orders), J. Warren Smith (on furlough until further orders). Total (3), $9,000.

Professors of meteorology ($2,500): O. L. Fassig, H. H. Kimball, F. J. Walz, W. M. Wilson. Total (4), $10,000.

Junior professors of meteorology ($2,400): W. R. Blair, C. F. Talman. Total (2), $4,800.

District forecaster ($3,000): E. H. Bowie. Total (1), $3,000.

Inspectors ($3,000): N. B. Conger (on furlough until further orders), H. B. Hersey (on furlough until further orders). Total (2), $6,000.

Climatologist and chief of division ($2,500): P. C. Day. Total (1), $2,500.

District forecasters ($2,400): E. A. Beals, F. H. Brandenburg, I. M. Cline, D. Cuthbertson, M. W. Hayes, J. H. Scarr, J. W. Smith. Total (7), $16,860.

Local forecaster ($2,400): W. G. Burns. Total (1), $2,400.

Local forecasters ($2,000): W. H. Alexander, F. A. Carpenter, P. Connor, W. C. Devereaux, E. H. Emery, H. Pennywitt, G. T. Todd. Total (7), $14,000.

Section directors ($2,000): G. S. Bliss, B. Bunnemeyer, A. J. Mitchell, T. G. Purssell, C. F. Schneider, C. F. von Herrmann. Total (6), $12,000.

Local forecasters ($1,800): A. Ashenberger, L. H. Daingerfield, L. M. Fee, S. C. Emery, H. O. Geren, W. S. Palmer, C. D. Reed, J. M. Sherier, J. H. Spencer, C. M. Strong, L. M. Tarr, J. R. Weeks, L. A. Weish, G. H. Wilson. Total (14), $25,200.

Section directors ($1,800): H. F. Alciatore, V. H. Church, E. A. Evans, R. Nunn, G. A. Loveland, G. N. Salisbury, P. H. Smyth, W. B. Stockman, A. H. Thiessen, R. F. Young. Total (10), $18,000.

Local forecasters ($1,600): H. F. Alps, J. H. Armington, W. S. Belden, M. E. Blystone, H. B. Boyer, A. Brand, A. Buell, L. C. Cover, W. S. Currier, E. R. Demain, C. J. Doherty, L. J. Guthrie, J. K. Hooper, F. P. Jones, W. W. Neifert, E. S. Nichols, E. H. Nimmo, G. H. Noyes, J. N. Ryker, M. R. Sanford, J. H. Scott, C. Stewart, W. P. Stewart, R. H. Sullivan, C. D. C. Thompson, J. F. Voorhees, G. B. Wurtz. Total (16), $25,200.

Section directors ($1,600): W. E. Barron, L. A. Denson, S. W. Glenn, R. G. Grant, F. E. Hartwell, H. C. Howe, T. B. Jennings, R. E. Pollock (on furlough until further orders), G. Reeder, O. W. Roberts, J. F. Shuster, E. L. Wells. Total (12), $19,200.

Local forecasters ($1,400): O. O. Atte, A. H. Bell, W. E. Bonnett, T. I. Bridges, W. R. Cade, J. L. Cline, E. D. Coberly, F. H. Coleman, J. W. Cronk, W. L. Day, T. F. Drake, W. M. Dudley, E. D. Emigh, M. L. Fuller, R. W. Gray, R. M. Hardinge, J. S. Hazen, F. Jermin, B. C. Kadel, J. M. Kirk, D. S. Landis, G. S. Lindgren, R. T. Lindley, P. McDonough, G. W. McDowall, E. R. Miller, W. A. Mitchell, J. F. Newsom, L. M. Pindell, W. F. Reed, jr., H. W. Richardson, D. A. Seeley, W. A. Shaw, M. B. Summers, N. R. Taylor, E. C. Vose, B. L. Waldron, G. N. Wilson, C. S. Wood. Total (39), $62,400.

Local forecasters ($1,200): W. J. Bennett, A. G. Burns, E. C. Horton, L. G. Sutton, E. C. Thompson. Total (5), $6,000.

Section directors ($1,400): R. R. Briggs, H. S. Cole, C. E. Linney, C. J. Root. Total (4), $5,600.

Observers ($1,400): G. J. O'Connor. Total (1), $1,400.

Observers ($1,200): J. C. Alter, R. L. Anderson, J. D. Blagden, T. A. Blair, F. W. Brist, A. L. Brockway, W. S. Brotzman, J. W. Byram, C. C. Callin, H. G. Carter, H. T. Collman, M. Connell, F. W. Conrad, H. B. Cowdrick, J. Craig, A. W. Crosby, N. M. Cunningham, T. F. Davis, W. Davis, F. L. Disterdick, C. A. Donnel, R. A. Dyke, C. H. Eshleman, W. H. Fallon, G. W. Felger, C. E. Faulhaber, L. C. Fisher, J. Fitzgerald, S. D. Flora, W. D. Fuller, C. C. Garrett, F. Gillam, E. B. Gittings, jr., F. Z. Gosewisch, W. R. Gregg, G. K. Greening, jr., J. Grover, D. C. Grunow (on furlough for a longer period than three months), O. M. Hadley, E. H. Haines, W. B. Hare, G. Hass-Hagen, J. E. Hutchison, V. E. Jakl, H. A. Jones, L. A. Judkins, J. L. Kendall, H. E. Kichline, J. H. Kimball, G. W. Lady, N. D. Lane, W. T. Lathrop, G. E. Lawton, J. G. Linsley, L. Lodholz, D. P. McCallum, A. F. Magrum, H. A. Marks, G. W. Mindling, C. L. Mitchell, R. C. Mize, D. R. Morris, S. L. Mosby, D. C. Murphy, C. E. Norquest, H. R. Patrick, S. P. Peterson, J. C. Piercy, R. P. Powell, A. W. Pugh, W. J. Reed, W. W. Reed, C. H. Richardson, M. V. Robins, H. H. Roche, E. E. Row, G. V. Sager, J. W. Schaeffer, W. B. Schlomer, W. H. Scholl, B. J. Sherry, R. W. Smith, H. H. Spindler, M. Sprague, M. B. Stubbs, T. R. Taylor, W. W. Thomas, A. R. Thorson, H. Tullsen, J. L. Vanderpool, J. I. Wehmeyer, A. Wiesner, J. R. Williams, H. M. Wills. Total (94), $112,800.

Section director ($1,000): G. M. Chappel. Total (1), $1,000.

Observers ($1,000): W. Bailey, H. McP. Baldwin, W. Bell, T. J. Considine, H. B. Dick, R. L. Fisher, H. A. Frise, W. H. Green, G. E. Grimes, S. Hackett, H. P. Hardin, H. K. Holcomb, M. R. Hovde, J. J. Kelliher, C. W. Ling, E. W. McGann, W. U. Simons, R. M. Williamson, M. Wright. Total (19), $19,000.

Assistant observers ($1,000): H. J. Andree, E. C. Band, jr., J. Bily, jr., D. Blake, L. W. Blanchard, W. R. Bormann, E. T. Burns, L. W. Carroll, R. E. Clark, W. F. Clark, F. T. Cole, M. S. Collom, F. S. Cushing, A. J. Davis, R. H. Dean, C. Dill, L. Dorman, S. L. Dosher, M. W. Dow, J. A. Dusseault, M. C. Faulk, E. L. Felton, D. Fisher, J. S. Garrason, E. J. Glass, C. C. Grant, H. C. Gross, C. Hallenbeck, H. G. Harp, J. C. Hayden, C. E. Heckathorn, P. Hess, M. S. Howard, H. M. Howell, H. E. Hyre, J. H. Jaqua, H. N. Johnson, W. Johnstone, J. Jones, A. A. Justice, E. E. Lanning, E. G. Larson, B. R. Laskowski, O. T. Lay, H. Legler, O. L. Lewis, D. M. Lillie, J. E. Lockwood, H. W. McKenzie, F. E. McLeary, F. A. Math, H. H. Martin, W. D. Maxwell, K. Meeker, G. C. Merchant, H. C. Metcalf, E. M. Minehart, O. E. Merry, M. T. Nesmith, J. J. O'Donnell, E. J. Olsen, E. Peterman, G. W. Pitman, T. R. Reed, M. A. Rice, O. R. Rogers, J. E. Sanders, A. H. Scott, R. M. Shaver, A. W. Shilling, T. G. Shipman, J. B. Sloan, O. D. Stewart, A. R. Teeple, R. W. Thomas, W. H. Tracy, G. E. Turner, H. E. Vail, O. Whitman, B. B. Whittier, J. B. Wilson, C. A. Woodworth, W. L. Wyland, E. E. Yeager (on furlough for a longer period than 3 months). Total (84), $84,000.

Assistant observers ($900): F. H. Ackelow, F. H. Ahearn, C. G. Andrus, C. D. Asher, W. Atkins, R. A. Barrie, F. J. Bavendick, C. A. Bell, H. C. Berger, G. J. Brands, T. R. Brooks, E. A. Brown, L. M. Camnfield, A. A. Catterall, T. J. Chancellor, L. T. Chapel, E. G. Conner, M. E. Conway, S. R. Creider, L. L. Criswell, C. I. Dague, J. Daily, C. R. Davenport, W. P. Day, S. Deitch, R. M. Dole, G. W. Eddey, A. F. Farkhauser, W. F. Feldwisch, R. H. Finch, T. D. Firestone, J. C. Fisher, jr., E. H. Fletcher, G. D. Frost, T. Gibson, J. H. Gordon, C. E. Hadley, L. Hagen, W. C. Haines, C. C. Hamme, O. H. Hammonds, I. F. Hand, P. R. Hathaway, D. B. Hayes, H. M. Hickman, H. D. Helby, H. E. Hever, P. R. Hill, C. T. Hilmers, E. W. Holcombe, W. H. Hossler, H. B. Hovde, P. E. Johnson, E. H. Jones, T. J. Jordan, J. F. Jungermann, L. H. Junken, A. G. J. Kautz, H. B. Lake, A. S. Lane, C. S. Ling, F. Long, W. McDonald, P. G. McGinnis, M. M. Maguire, W. Mahaffy, M. F. Marsh, E. E. Meadley, F. I. Moses, R. L. Murdoch, L. A. Murphy, W. A. Oates, C. B. Odenweller, O. Parker, W. H. Parker, H. L. Pugh, J. W. Raplee, L. Raplee, T. E. Reed, W. G. Riley, K. C. Rupert, A. D. Sanial, W. J. Schnurbusch, S. S. Schworm, L. E. Scott, R. E. Seaton, J. C. Smith, J. H. Smith, G. M. Sullivan, W. J. Summerville, W. W. Talbott, V. B. Tallman, F. J. Thomas, E. H. Thompson, E. E. Unger, H. F. Wahlgren, J. F. Warren, R. C. West, G. C. Westervelt, A. E. White, C. E. Wilson, H. R. Wright, F. D. Young. Total (103), $92,700.

Local forecasters ($1,000): H. C. Bate, W. T. Blythe. Total (2), $2,000.

Local forecaster ($900): S. S. Bassler. Total (1), $900.

Assistant observer ($840): G. E. Matthew. Total (1), $840.

Observer ($600): E. S. Wiest. Total (1), $600.

Student assistants ($500): J. M. Hazen, W. M. Kenealy, P. H. Miner, J. Pennywitt, R. M. Rightsell. Total (5), $1,500.

Expert in vessel reporting ($840): L. Rogers. Total (1), $840.

Unskilled laborer ($360): Bryan Byrd. Total (1), $360.

Congress has never had anything to do with fixing these salaries at all, except as to the maximum amount that can be paid, and here are these men, some receiving $3,500 a year and some of them $200 a year. Who fixes the amount that shall be paid? The Chief of the Weather Bureau. It was through this system, Mr. Chairman, that the late unfortunate Chief of the Weather Bureau, Willis L. Moore, wrecked himself, because by virtue of the power in the lump-sum appropriation he organized a system of men within the Weather Bureau to fight his campaign to be appointed Secretary of Agriculture, and he fell. I do not think this Congress ought ever to place in the hands of any man such a great power which might be abused and bring scandal and disgrace upon any great bureau of the Government. There ought to be some kind of exactness and certainty which will limit those who have charge of work in the expenditure of money.

Mr. COX. Mr. Chairman, will the gentleman yield?

Mr. FOWLER. Yes.

Mr. COX. Mr. Chairman, I quite agree with what the gentleman has said, but I desire to ask him if he has ever introduced a bill proposing to repeal the law that fixes this lump-sum appropriation, and whether he has followed that bill to the proper committee and asked that committee to report it?

Mr. FOWLER. Mr. Chairman, I have not; but I have stood on the floor of this House, even when I was in my swaddling clothes as a Member, and I have interposed objections for the purpose of getting regularity, a system whereby political graft could not show its miserable visage anywhere. Mr. Chairman, not only do we have a vast sum of money, aggregating more than half a million dollars, at the disposal of one man for the purpose of employing professional help in the Weather Bureau, but we find that a portion of this money is being used for the purpose of educating other men's children. That may be right. I may not have enough knowledge of the situation to fathom the deep and wonderful recesses of education, but I do have some well-defined ideas about that. I believe that the best education that any man ever received is that which is prosecuted by his own will and his own determination and paid for from his own earnings. However, I am not against furnishing young men bountifully in procuring an education. Here is a young man over here at Pittsburgh, named Pennywith, who is being educated at Cornell University out of this lump sum, and here are four more——

Mr. ANDERSON. Mr. Chairman, a parliamentary inquiry. What is before the House?

Mr. BARTLETT. Mr. Chairman, I make the point of order. The gentleman can not stop a gentleman by a parliamentary inquiry. He must make some point of order.

The CHAIRMAN. That is true, the Chair thinks, without doubt.

Mr. FOWLER. I will yield to the gentleman in a moment.

Mr. ANDERSON. I make the point of order that the gentleman from Illinois is not discussing the question under consideration.

The CHAIRMAN. The gentleman from Minnesota makes the point of order that the gentleman is not discussing the point of order. The point of order is well taken, and the gentleman will please confine his remarks to the point of order.

Mr. FOWLER. I beg the pardon of the Chair, because I thought I was giving reasons why I should impose this point of order which I think ought to be known to this House, but if the Chair rules it is not proper then I will conform to the ruling of the Chair most gracefully.

The CHAIRMAN. The Chair does not want to indicate what line of argument the gentleman shall pursue, but only requests him to confine himself in his argument to the point of order since that question has been raised.

Mr. LEVER. Does the gentleman make the point of order against the language——

Mr. FOWLER. Mr. Chairman, unless there can be some agreement somewhere about this lump sum which has been the cause of so much scandal in the Weather Bureau I will have to make the point of order against the whole paragraph. I do, Mr. Chairman, make the point of order against the paragraph.

Mr. LEVER. Mr. Chairman, I concede the point of order is well taken and offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 6, by inserting after line 14 the following:

"For necessary expenses outside of the city of Washington incident to collecting and disseminating meteorological, climatological, and marine information, and for investigations in meteorology, climatology, evaporation, and aerology, $1,189,000, including not to exceed $591,000 for salaries, $120,000 for special observations and reports, $275,000 for telegraphing and telephoning, and $30,000 for traveling expenses."

Mr. FOWLER. Mr. Chairman, I reserve a point of order against the amendment. I think the amendment is subject to a point of order because it carries with it, as I understand, some new material which has not heretofore been in the law. Is that true?

Mr. LEVER. That is not true if I know myself.

Mr. FOWLER. Has it carried "evaporation" heretofore?

Mr. LEVER. Oh, yes.

Mr. FOWLER. Well, I do not care for it at all.

Mr. LEVER. The bill last year provided for investigations in climatology and evaporation, including the erection of temporary buildings, and so forth. I will say to my friend that I looked the matter over as carefully as I looked over anything in my life, and this is nothing but a continuation of these very items in the present law, with the exception of the word "seismology."

Mr. FOWLER. I desire to withdraw the point of order.

Mr. STAFFORD. Mr. Chairman, I renew the reservation for the purpose of obtaining some information. I should like to inquire whether under the phraseology, "for special observation and reports," included in the pending paragraph the Weather Bureau would be authorized to make seismological investigations and observations?

Mr. LEVER. No; the Comptroller of the Currency has held during the last year, 1913, that under this language, which is a repetition of the old language, the Weather Bureau would have no right to make seismological investigations.

Mr. STAFFORD. I do not recall anything in the language of last year's act which contained the phrase, "for special observations and reports." If there is no limitation on that phraseology, it is certainly vesting in the executive head of this bureau a very wide discretion. He could branch off and go into any line of activity he sees fit, providing it is observations.

Mr. LEVER. I would like to call my friend's attention to this, that in the old act there were a number of observations provided for in these words, "and other observations, warnings, and reports, and for the pay of special observers," and so forth.

Mr. STAFFORD. Where is that found?

Mr. LEVER. In the old language.

Mr. STAFFORD. What paragraph?

Mr. LEVER. I do not have the old bill.

Mr. STAFFORD. I have last year's act before me, and I have glanced over it and I do not find the phraseology that the gentleman is now reading.

Mr. LEVER. It is on page 3, about the seventh paragraph from the top, where it says:

For observers, for rivers, rain, snow, ice, crops, evaporation, aerial, storm, hurricane, and other observations, warnings, and reports, and for pay of special observers and display men.

Mr. STAFFORD. The gentleman is a good enough lawyer to know——

Mr. LEVER. I will say the gentleman is not a lawyer.

Mr. STAFFORD (continuing). To know that the Comptroller of the Currency in construing that phraseology in last year's act would hold observations to be of such a kindred character to the generally stated purposes mentioned in the paragraph.

In the provision now before the House there is no limitation whatsoever. You provide for "special observations and reports, $120,000." I respectfully contend that if there be no limitation whatever the head of the Weather Bureau can branch out in all kinds of observations.

Mr. LEVER. I will say to my friend that I am not a lawyer, but I took a short course over here at Georgetown. However, I am lawyer enough to believe that no man construing this act would construe this language for special observations and reports to give him authority to go beyond the general scope provided for in the language creating the Weather Bureau.

Mr. STAFFORD. But you are giving special authorizations for observations and providing $120,000 for that purpose without any limitation whatsoever. It only goes to emphasize that your so-called revised plan does not contain much segregation. In fact, it is going back to the old general omnibus authorization without any restrictions or qualifications.

Mr. MANN. Will the gentleman from Wisconsin yield?

Mr. STAFFORD. I will be glad to do so.

Mr. MANN. Is not that provision limited by the first appropriation that comes under the head of "General expenses, Weather Bureau," the first paragraph? It starts in "as follows," and then follows the appropriation. It provides for doing certain things that are enumerated, and then the appropriation follows. The appropriation is all limited to the scope of that work as enumerated.

Mr. LEVER. As fixed by the fundamental law regulating the bureau.

Mr. STAFFORD. Not fixed by the fundamental law, but as fixed by the enumeration of those purposes indicated in the preceding paragraph. Of course, if it would bear that construction, I would have no objection to the phraseology. I have no objection, I will say to my friend across the aisle, to the Weather Bureau even making investigations in this seismology field.

Mr. MANN. The gentleman from Wisconsin [Mr. STAFFORD] will notice that, beginning with the paragraph beginning with "the Weather Bureau," it provides for carrying into effect, and so forth, and for doing certain things, the first paragraph carrying no appropriations, and ending up "as follows." Then comes the appropriation, all of which comes under the first paragraph, so far as the scope of authority is concerned.

Mr. STAFFORD. With that explanation, Mr. Chairman, it being quite certain it would be limited to the purposes as carried in the preceding general statement, I withdraw the point of order.

Mr. FOWLER. Mr. Chairman, I move to strike out the last word. This paragraph carries $275,000 for telegraphing and telephoning. The bill at the session of the Sixty-second Congress carried $306,000 for the same purpose.

Mr. Chairman, this affects the farmers of the country directly. Living far away from centers, in order that they may have a knowledge of the conditions of the weather, so that they may more scientifically govern themselves in the harvesting and management of their crops——

Mr. LEVER. Mr. Chairman, I think I can explain that to the gentleman in a moment if he desires an explanation.

Mr. FOWLER. In a moment. I am exceedingly anxious, Mr. Chairman, that that work shall be carried on to the very fullest extent, because I do not think there is another department, if I should use that term here—I use it in a limited sense—in the entire Weather Bureau that brings to the country as great a service as the knowledge of the conditions of the weather when brought to the farms.

Mr. LEVER. I agree with the gentleman's position, and if he will permit——

The CHAIRMAN. Will the gentleman yield?

Mr. FOWLER. In a moment, Mr. Chairman. I feel, Mr. Chairman, that we ought to extend this service further than it has already been extended. I know that an immense saving can be had to the farmer by virtue of supplying him with the necessary information regarding conditions of the weather. I think this appropriation ought to be increased. My section of the State is agricultural, and there we depend upon the warnings from Evansville and St. Louis, and if we can not get the proper appropriations for this purpose we are left to guess at the weather, as the old farmer used to do.

Now, Mr. Chairman, I yield to the gentleman for a moment.

Mr. LEVER. I wanted to make a statement, but I will make it in my own time.

Mr. FOWLER. Mr. Chairman, I have in mind that this appropriation ought to be increased to what it was a year ago, at

least, so that the farmers of the country can get the full benefit of the conditions of the weather. This bureau in that department was inaugurated many years ago by a very scientific man, who has spent many years in that bureau and given the best part of his life to it. It ought to be kept up. It ought to be extended, and we ought to have weekly and daily crop reports sent throughout the farming districts of the country.

Mr. Chairman, I desire to ask unanimous consent to extend my remarks in the RECORD at this point by inserting certain information regarding the Weather Bureau, dealing with the question of a lump-sum appropriation and the uses made thereof.

The CHAIRMAN. The gentleman from Illinois [Mr. FOWLER] asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

The question is on the amendment offered by the gentleman from South Carolina [Mr. LEVER].

The question was taken, and the amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For the maintenance of a printing office in the city of Washington, for the printing of weather maps, bulletins, circulars, forms, and other publications, including the pay of additional employees, when necessary, $26,000.

Mr. BARNHART. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from Indiana offers an amendment which the Clerk will report.

The Clerk read as follows:

At the end of line 2, on page 7, insert the following proviso:

"*Provided*, That no printing shall be done by the Weather Bureau that can be done at the Government Printing Office without impairing the service of said bureau."

Mr. LEVER. Mr. Chairman, I reserve a point of order on that.

The CHAIRMAN. The point of order is reserved by the gentleman from South Carolina. The gentleman from Indiana [Mr. BARNHART] is recognized.

Mr. BARNHART. Mr. Chairman and gentlemen of the committee, the purpose of that amendment is plain; but the fact is, for a good many years the disposition of the heads of departments has been in the direction of segregating the printing business of the Government. In the very recent past—in the last two to four years—the intention of the Congress has been in the other direction. We have a very elaborate Printing Office in Washington, maintained at enormous cost; we have all the facilities there necessary to do all the Government printing. We have the machinery; we have the material; we have light, heat, and organization, and it is under the immediate direction and supervision of the Joint Committee on Printing.

Mr. STAFFORD. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. BARNHART. In just a moment, please. The purpose of that amendment is this: A new printing bill is about to come forth, and in that bill provision will be made for taking care of this printing for the department heads at the Government Printing Office, so far as possible.

The adoption of this amendment will give the Joint Committee on Printing, if the new bill becomes a law, the right to pass on questions of a bureau to print what it please for its department. The difficulty about that, Mr. Chairman, is that we have a separate printing office in each one of the departments, and, segregated as they are, they cost a good deal more money than if they were consolidated; and the reason for that is there is a waste of material, there is light and fuel and heat to be paid for, and many other items of expense in a great many printing offices that can be avoided if we had them all under one department.

As I see it, Mr. Chairman—and I hope the committee will see it in the same light—the amendment will in no way interfere with the good intentions of the bill, but I think the tendency is to turn back from the concentration policy and give the Weather Bureau a little more money than it has had in recent years. But I am not objecting to that. I think they give good reasons for it. But I do believe that the adoption of this amendment will enable us to provide in line with the present purpose of the Joint Committee on Printing, to curtail the printing expenses of the Government as much as possible, and I hope the chairman of the committee will accept the amendment.

Mr. HAUGEN. I would like to ask the gentleman if the Government Printing Office is to do the work that is done in the Weather Bureau? Have they the rapid rotary presses that are needed?

Mr. BARNHART. Yes; they have all the necessary machinery to do this printing, and yet the Government Printing Office is not insisting on doing any printing—and neither will the new printing bill require the Government Printing Office to do any printing—that can be done more expeditiously and economically in any of the departments than it can be done under the supervision of the Government Printing Office.

Mr. HAUGEN. The gentleman understands this has reference to the printing of maps under the immediate supervision of the Weather Bureau, and that it can be done at less expense and better advantage in the bureau?

Mr. BARNHART. I know that is the contention of the bureau, Mr. Chairman, but I am not conceding that; neither am I prepared to dispute it. I have not the necessary information at hand to do that. But I do say that the adoption of the amendment will in no way interfere with the privilege of the bureau to do all the printing that is necessary for it to do, and yet it will reserve the right to the Joint Committee on Printing to decide between the Weather Bureau, and the Government Printing Office as to what printing can be done to best advantage by either.

Mr. HAUGEN. If it can be done just as well in the Government Printing Office, I think it should be done there. However, if it can be done better in the bureau, I would prefer that it should be done there. I think the amendment is so worded that it works no hardship on the bureau?

Mr. BARNHART. No; it does not work any hardship on the bureau.

Mr. CANDLER of Mississippi. The language of the amendment will not interfere with the necessary printing that is now being done or will be done hereafter in the bureau itself. It simply provides for such printing in the Government Printing Office as need not be done with special expedition?

Mr. BARNHART. That is all.

Mr. LEVER. Mr. Chairman, I withdraw my point of order and accept the amendment of the gentleman from Indiana [Mr. BARNHART], unless there is some objection.

The CHAIRMAN. The point of order is withdrawn. The question is on agreeing to the amendment offered by the gentleman from Indiana [Mr. BARNHART].

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For the erection of a building at Neah Bay, Wash., to be constructed under the supervision of the Chief of the Weather Bureau, plans and specifications to be approved by the Secretary of Agriculture, and for all necessary labor, materials, and expenses connected with this work, $3,000

Mr. MANN. Mr. Chairman, I reserve the right to object on that paragraph.

The CHAIRMAN. The gentleman from Illinois [Mr. MANN] reserves the right to object on the paragraph.

Mr. MANN. May I ask the gentleman whether it is customary for these new stations to be constructed out of general funds, at the discretion of the Chief of the Weather Bureau? Can the Secretary of Agriculture, without specifying the particular appropriation, build a station at a particular place?

Mr. LEVER. I will say to my friend from Illinois that my recollection is that heretofore these appropriation bills from the Committee on Agriculture have carried authority for the construction of buildings of this kind. I recall that in the city of Columbia, in the district I have the honor to represent, the Weather Bureau did erect out of the general fund a building of this character. That was six or eight years ago.

But I see no objection to this. On the contrary, I think it would be well for the Department of Agriculture to let the House know, through the Committee on Agriculture, just when it does want to erect a building.

Mr. MANN. I take it, without knowing what district in Wisconsin this is——

Mr. STAFFORD. It is in the State of Washington, I can assure the gentleman, not in Wisconsin.

Mr. LEVER. It is really to rebuild the present station there. The recommendation before the committee is that the man who is in charge of the station at Neah Bay, Wash., is in charge of one of the termini of the cablegraph, and he has been living in a little shed there for a good many years, and his place has become absolutely uninhabitable, and they ask this to build decent quarters in which he can live.

Mr. MANN. I think it ought to be erected. Is there not some appropriation from which they can erect it themselves, if they think proper? In other words, I do not think it is good policy for Congress to start in and indicate certain stations. I remember a few years ago the distinguished Committee on Agriculture either recommended particular stations or brought in an appropriation in which they indicated where the stations were to be erected, and at that time all the stations that were to be erected were to be erected in districts represented by the

distinguished members of the Committee on Agriculture—which was very natural, because they knew better about the conditions in their own districts than they knew about the conditions in other districts. [Laughter.]

Mr. CANDLER of Mississippi. Nobody on the committee represented that section, I will say to the gentleman, so that this is a patriotic investment to be made in the State of Washington.

Mr. MANN. I am speaking of the general principles.

Mr. LEVER. In the present law we carry general authority for the construction of buildings outside of the District of Columbia by the Weather Bureau, under the direction of the Chief of the Weather Bureau.

That is in the present law; but I take it in naming this station here the department desired to call attention to the fact that it was one of their special stations out in that wild, bleak country.

Mr. MANN. This is a station already located?

Mr. LEVER. Yes; it is a station already located, and this is really for the repair of a building.

Mr. GARNER. Will the gentleman yield?

Mr. LEVER. Yes; I yield.

Mr. GARNER. If I understand it correctly, there is a general fund out of which buildings can be erected at the discretion of the Secretary of Agriculture?

Mr. LEVER. I think there is no fund in this bill out of which he could do so; but, as I said to the gentleman from Illinois, I remember that about six or eight years ago the Secretary of Agriculture did erect, in my own district, in the city of Columbia, S. C., a building which cost $12,000; but I was not quite so well informed then as I am now, I hope, on the proposition. If the Secretary has any fund now out of which he can erect a building I do not know it. It has not been called to our attention.

Mr. CANDLER of Mississippi. I think the building to which the gentleman refers was erected out of a lump fund which was carried in the bill for that year, but there is no lump fund of that kind in this bill.

Mr. GARNER. I want to get exact information, if I can, from the committee, whether or not there is carried in this bill any appropriation out of which the Secretary of Agriculture can erect buildings in which the keepers of Weather Bureau stations throughout the country may live?

Mr. LEVER. I will say to my friend from Texas very frankly that it is my belief that there is not a single dollar in this bill that can be used for that purpose, except as carried in this particular item to which we have called attention.

Mr. GARNER. Does not the gentleman realize the difficulty of a Member of Congress who has weather stations in his district, when a provision of this kind is carried in this bill, and in the future he may not be able, possibly, to get a similar appropriation for the housing of a man and his family in the district which he represents? Does not the gentleman realize that some good reason will have to be given for that?

Mr. LEVER. I will say, in answer to that, that the department is not going to locate observation stations in anyone's district unless it provides the funds with which to house the man who has charge of the station and his family, if he has one, and the instruments with which the observations are made.

Mr. GARNER. Does the gentleman mean to say that in each one of these two hundred and odd stations that he speaks of there is a house provided by the Government to take care of the man in charge of the station——

Mr. LEVER. Oh, undoubtedly.

Mr. GARNER. Wait a moment. Does the gentleman mean to say that there is a house built?

Mr. LEVER. Either built or rented.

Mr. GARNER. There is a good deal of difference between a house built by the Government and one rented by the Government; and what I am trying to call the attention of the gentleman to is that by virtue of the carrying in this bill of the provision for this station, there will be a discrepancy between this station and others where they must rent houses, and there will be a continuous effort made by Members of Congress, doubtless, in response to requests from the men who are taking care of weather stations, to have the Government make a direct appropriation for the building of a house at each station to take care of the family of the weather observer.

Mr. LEVER. I think if my friend will take into consideration the fact that this is an existing station, and that it is far out on the coast of Washington, at an uninhabited place, he can very readily distinguish that case from the average Weather Bureau station.

Mr. GARNER. That makes a very different proposition, when the gentleman states that there is no house there to be rented for the occupancy of the gentleman in charge of that station.

Mr. LEVER. Let me call the gentleman's attention to the language of the hearing:

Mr. CALVERT. Neah Bay is the terminus of one of the Weather Bureau's telegraph lines, a point from which observations must be obtained. It is in a wild, uninhabited section of the country. For a number of years this operator has been occupying a building which was formerly a storehouse for an Indian post. It was repaired and put in some sort of order. It has got to a point now where it is unfit for human habitation, and we propose to put up a small habitable house to replace that structure. We must have a house there, because it is a telegraph terminal line and there are no houses in that section that can be rented.

Mr. GARNER. I am in perfect accord with the gentleman that he ought to carry this provision in this bill. What I am calling attention to is that if we once establish the policy of building a house at each one of these two hundred and odd stations throughout the United States, we must do it by wholesale, and not at retail, as indicated here. The explanation given by the gentleman that it is not possible to rent a building at this station, presents an entirely different case; but I believe that, as a general proposition, it is more economical for the Government to rent houses at the various stations throughout the United States rather than to build them. The Government is building $50,000 post offices where it can rent a building suitable for a post office for $10 a month. That is the reason I have undertaken to call this matter to the attention of the committee at this time.

Mr. HAUGEN. I wish to state that the Government owns but a few of the buildings; that the bureau has not constructed the buildings except where Congress authorized it. I wish also to state that a good deal of pressure has been brought to bear on the committee to authorize appropriations, but the committee has been going very slowly in that direction. I believe the last committee reported in favor of constructing four buildings, but it went out on a point of order.

Mr. GARNER. At this point it occurs to me, and I am sure the gentleman from South Carolina and the gentleman from Iowa, the ranking Member on the Republican side, would agree with me that if we undertook to establish the policy of building these houses to take care of the keepers of the weather stations they would need to go into this matter very thoroughly. If it is more economical, it ought to be done, but if it is not, I do not believe we ought to start by piecemeal, because of some pressure that is brought to bear on the committee to build some particular station.

Mr. HAUGEN. The committee has never authorized the building of any except where a very strong showing was made, and it has been left to the discretion of the Secretary.

Mr. CANDLER of Mississippi. This is an emergency; it is isolated, and there is nothing like it in any other section of the country.

Mr. GARNER. I agree with the gentleman that this ought to be constructed, but in regard to leaving it to the discretion of the Secretary of Agriculture, as mentioned by the gentleman from Iowa, it is like leaving the establishments of stations throughout the country to the discretion of the Secretary of Agriculture. The stations would be likely to be established where the strongest pressure is brought to bear. If a lump sum were appropriated for that purpose, the buildings would be built where the most pressure was brought to bear on the Secretary. I do not want to subject the Secretary of Agriculture to this tremendous pressure.

Mr. HAUGEN. We have no lump-sum appropriation in this bill for building these buildings.

Mr. GARNER. Mr. Chairman, I withdraw the point of order.

Mr. MANN. Mr. Chairman, I do not agree with the gentleman from Texas about bringing pressure to bear on the Secretary of Agriculture, in whom I have a great deal of confidence. Undoubtedly pressure is brought to bear on him, but it was discovered long ago that it was easier to work around and through the members of the committee than it was to work through the head of a department.

Mr. GARNER. I want to say that I have as high an admiration for both the outgoing and the present Secretary of Agriculture as any Member in this House.

Mr. MANN. I am glad to hear the gentleman say that. Apparently there would be no item in the bill out of which this building could be constructed except the $1,189,000 item for collecting and disseminating meteorological, climatological, and marine information, and so forth. I suppose that is intended to be used elsewhere. Mr. Chairman, I withdraw the point of order.

Mr. LEVER. I think it is fair, Mr. Chairman, to say that the Government erects no buildings except where there are certain local conditions that make it absolutely necessary.

Mr. SELDOMRIDGE. Will the gentleman yield?

Mr. LEVER. Certainly.

Mr. SELDOMRIDGE. Referring to the paragraph on page 6, I think the chairman stated that amount had been increased in order to provide for observations relating to seismology.

Mr. LEVER. No; my statement was that out of the total fund the Weather Bureau thought it could set aside a sufficient amount to begin the work, and that the cost of the seismological work would not be over $10,000. It would take them a year or more to organize the work.

Mr. SELDOMRIDGE. In view of the fact that the committee has stricken out the word "seismology," would it not be well to provide for that amount of reduction?

Mr. LEVER. No; we do not think so, for the reason that this appropriation does not become available until July, and of course the department would have to reorganize the forces to handle the work.

The Clerk read as follows:

The Secretary of Agriculture is hereby authorized, in his discretion, to sell and dispose of in whole or in part, or lease in whole or in part, the tract of land consisting of 84.81 acres of land, more or less, known as Mount Weather, and located in the counties of Loudoun and Clarke, in the State of Virginia, including all buildings thereon, and the sum accruing from such sale or lease, after deducting the cost of sale or lease, shall be covered into the Treasury of the United States as miscellaneous receipts.

Mr. GARNER. Mr. Chairman, I reserve a point of order to the paragraph. I would like to hear the chairman of the committee state the reason for this item in the bill.

Mr. LEVER. Mr. Chairman, in 1903, about 10 years ago, the then Chief of the Weather Bureau bought about 84 acres of land at a point called Mount Weather, out in Virginia, and erected what is known to us on the committee as the Mount Weather station. There was an investigation as to whether or not he had the authority to do that under the law, and my recollection, at least, is that it was held that he did have such authority. We have expended at Mount Weather the sum of $183,075.15. The work at Mount Weather is largely scientific, the exploration of the upper air by means of balloons and kites, to determine the solar radiation and what effect it has on atmospheric conditions, and the like of that.

Of course, that is purely a scientific proposition, with which I am not so familiar, and perhaps my explanation of it is not very lucid. It has been determined, under the reorganization of the Weather Bureau by its present chief, that this character of work can be done best in the West, in the pathway of the storms. They call attention to the fact that in sending their balloons up, sometimes as high as 20 miles, the drift of the wind frequently carries them out to the Atlantic Ocean and the records are lost, which results in a great deal of valuable information floating somewhere on the waves of the Atlantic Ocean.

They contend, also, that the atmospheric conditions at Mount Weather do not make for the best study of this problem.

Mr. COOPER. Mr. Chairman, will the gentleman yield?

Mr. LEVER. Yes.

Mr. COOPER. Do they send balloons up, as the gentleman said, 20 miles?

Mr. LEVER. I am informed that that is the fact.

Mr. COOPER. More than 100,000 feet?

Mr. LEVER. Yes. They attach a little instrument to the balloon. Of course, the instrument is very sensitive, and it records the varying conditions of the upper air. Attached to the instrument is a notice that if anybody finds it, he will please return it to the Weather Bureau, and from this data they have been collecting there for 10 years they have been able to issue some remarkable scientific information. I presume it would not be fair to say that this half million dollars, in round numbers, had been wasted, because I do not believe that money expended along investigational lines is ever wasted. It may be we will never reach a conclusion from it, but the fact will remain that if we should happen to reach a conclusion that is of any value to civilization and humanity, it will be of so much value as will offset all that we have spent in a negative way in getting to the conclusion.

Mr. ANDERSON. Is there any provision in this bill for a continuance of this work?

Mr. LEVER. There is no provision in this bill for a continuance of this work. As set out by the item, it is the purpose of the Department of Agriculture to establish in connection with the Signal Corps service at Omaha, Nebr., this same character of work, because Omaha happens to be in the path of the storms which sweep across from the west into the Central West and across the continent, and their plan is to have 15 or 20 outlying stations near Omaha for the purpose of developing not only what takes place within the center of the storm region, as the storm goes by, but what takes place on the outskirts of the storm also, and they inform us they need nothing at all in connection with this work except a few very cheap buildings that will house their instruments, balloons, and kites. Instead of having a great structure and four or five magnificent buildings, as they have at Mount Weather, we shall have only a few little sheds to house the instruments with which to do the work.

Mr. ANDERSON. Where is the authority for the construction of these buildings in Omaha and the vicinity?

Mr. LEVER. There is no authority, and I imagine the buildings will not cost $25 apiece.

Mr. ANDERSON. But they must have some authority to construct them, no matter what they cost.

Mr. LEVER. There is no definite authority in the bill.

Mr. STAFFORD. If they could take out $25 from this lump-sum appropriation, why could they not just as well take out $25,000?

Mr. LEVER. I may be entirely mistaken about that. The gentleman from Wisconsin, dealing as he does with a large appropriation bill, knows how hard it is to think of everything.

Mr. STAFFORD. But in the preparation of the Post Office appropriation bill we go to extremes in segregating the various items, because it was brought to the attention of the committee 10 years ago, when I first served on that committee, that appropriations under lump sums begot graft and peculation, and it was necessary to restrict the department officials as far as possible in the exercise of wide discretion in unlimited appropriations.

Mr. LEVER. On second thought I am sure that I am mistaken as to any fund here provided from which they can pay for the erection of any buildings, for here is a memorandum furnished me by the Chief of the Weather Bureau in which he says that it is not proposed to erect permanent buildings or establish any extensive plant, but to rent the necessary quarters and provide the simplest possible equipment that will make it possible to send up kites and balloons from this point at the central station. In other words, they are going to rent some buildings, and not build any.

Mr. ANDERSON. Mr. Chairman, the reason I made the inquiry is because we have apparently blown in $400,000 in establishing a summer resort at Mount Weather, and there ought to be some limit upon the expenditure of a sum for the same purpose.

Mr. LEVER. The gentleman's inquiry was quite pertinent, and I am glad that he called my attention to it.

Mr. STAFFORD. While the gentleman has the floor I would like to direct one query to him. I take it from his exposition of this weather resort down here on the Potomac, or whatever it is, that the present Secretary of Agriculture or the present officials supervising the Weather Bureau deem it is no longer practicable or expedient to continue its operation.

Mr. LEVER. It is the intention of the service to use Mount Weather Station for a simple observatory station, keeping one man at a salary of about $1,000 annually.

Mr. STAFFORD. If it is the confirmed opinion of the departmental officials and the conviction of the committee, as I take it, that there is no further use for this resort, then I ask the gentleman why has the gentleman provided in this paragraph an authorization to the department to lease it? Why not dispose of it outright; why should the department engage in a policy of leasing property for which it has no use and for which it will never have any use?

Mr. LEVER. The committee took that very proposition into consideration, and we felt that to direct the Secretary outright to sell this property would mean we would have to sacrifice it outright.

Mr. STAFFORD. In your phraseology the committee left it in the discretion of the Secretary to sell. There is no mandatory direction to sell at a sacrifice price, and it can not be construed he would be obliged to sell at a sacrifice.

Mr. LEVER. I will say to the gentleman again I am not a lawyer, but the lawyers who are on the committee thought that a direction to the Secretary of Agriculture to sell without this proviso would mean that he would have to sell.

Mr. STAFFORD. The gentleman does not direct him to sell. Your plain phraseology does not require that.

Mr. LEVER. We are trying to give the Secretary the power to try to get the most he can for the property.

Mr. STAFFORD. No; you are authorizing the Secretary of Agriculture to go into the leasing business, to continue holding this property for years under a lease system, if he so elects.

Mr. LEVER. If my friend will let me make a statement for about three minutes, I think I can clear it up in that length of time. We put this proviso in here for the purpose, as I said a moment ago, of giving the Secretary the right to sell or lease

at his discretion, but in the meantime we will spend $1,000 per annum at the station there. We are providing for only that much. There is a rumor going along, which seems to be pretty well confirmed, that a street railway is to be built from Bluemont, I believe it is, a terminus of a little railroad out of Washington, out to Mount Weather. If that is true, it may be a year or so before the railroad will be built; certainly that property will be much more valuable than it is now. This place is about 6 miles from a railroad, 1,800 feet up on a mountain. It is a beautiful spot which overlooks the Shenandoah Valley on one side and Loudoun on the other. Nobody will want this property, or at least want to give anything like its true value for it unless they have some means of communication. We think it would be better to give discretion for a year or two, and that is all there is to it.

Mr. ANDERSON. Mr. Chairman, I desire to direct the attention of the chairman of the committee to the report of the Secretary of Agriculture upon this proposition. Referring to Mount Weather, he says:

> A committee of scientists from the bureau reported against the use of this property for aerial research in 1903, and within the past year other committees reported that solar radiation, upper-air research, and dynamic meteorology could better be carried on at other locations. For this reason the department has determined to discontinue the research work at this observatory and operate it simply for the taking of climatological records. This can be done by the man who will protect the property, at a total cost of about $1,000 a year. This will make available approximately $12,600, which can be expended to far greater advantage for scientific research.

Mr. LEVER. That is right.

Mr. ANDERSON. It struck me if this property, which has cost $480,000, will only bring about $13,000 rent a year, less than 3 per cent, we had better get rid of it.

Mr. LEVER. Well, the Secretary of Agriculture now has no authority on earth to rent the property or to sell it. It is not rented at all, and probably will never be used for the purpose for which it was built; but it is our intention——

Mr. ANDERSON. But the Secretary apparently has no intention whatever of renting it.

Mr. LEVER. Well, the Secretary, I take it, will follow the direction of Congress, and we are directing him here in this bill to rent or sell it, in his discretion.

Mr. COOPER. Will the gentleman permit an interruption?

Mr. LEVER. Yes.

Mr. COOPER. What does the gentleman from South Carolina think of a proposition to permit an executive officer of the Government to sell 80 acres and more of Government land at any figure that may please him without first reporting the terms of sale to Congress? It may be worth $500,000. It is customary when public lands are to be sold to have them appraised and the executive officer instructed to sell, but not at a price less than the appraised value.

Mr. LEVER. I take it, Mr. Chairman, that the Secretary of Agriculture, under the language of this bill, would go through the ordinary procedure in the sale of public property. I take it he would have it advertised for sale and have it appraised, and the proceeds of it, as the gentleman will see, are to be turned into the Treasury of the United States as a miscellaneous fund. If my friend will offer an amendment that a report shall be made to Congress, I will accept it.

Mr. GARNER. The point of order is still reserved against this paragraph.

Mr. COOPER. Will the gentleman permit me to say one word?

Mr. GARNER. Certainly.

Mr. COOPER. I do not think that Government real estate should be turned over to any executive officer to be disposed of in his discretion without any appraisal and without a minimum price fixed by law. We all know that the present Secretary of Agriculture is a man of the very highest integrity, but this is a government of laws and not of men; and in disposing of Government lands we ought always to remember that maxim. My judgment is that there ought to be a price fixed by this bill below which he can not sell, and that, in any event, such sale should be subject to confirmation by Congress before title can pass.

Mr. LEVER. I hope the gentleman will prepare such an amendment.

Mr. COOPER. I will.

Mr. GARNER. I had two objects in reserving a point of order against this proviso—first, to bring out the thought that has already been suggested, that this extravagant expenditure of money was made without the Committee on Agriculture apparently knowing anything about it. And I want to draw the committee's attention to the fact that this bill ought to be guarded in the future so that no Secretary of Agriculture or Chief of the Weather Bureau or any other chief can make an extravagant expenditure of money of this character without Congress knowing something about it. [Applause.] And in this connection I want to call the gentleman's attention to one remark he made a while ago, that possibly the Secretary of Agriculture now had authority under this bill to erect buildings in Omaha or somewhere else, although they might not cost more than $25. If there is such authority in here I hope the gentleman will point it out to the committee, in order that we may have an opportunity to discuss the matter and see if it should not be stricken out of this bill. Because if you can expend $25 for the purpose of erecting buildings at Omaha or any other place you can expend $25,000 or $250,000 if carried in this bill. Evidently these buildings were erected at these summer resorts without Congress knowing anything about it, or else it would not have been done, and I believe that this committee ought to so guard these appropriations that these palaces and these winter or summer resorts can not be built unless they first come and submit their estimates to the judgment of the Congress.

Mr. CANDLER of Mississippi. Will the gentleman yield?

Mr. GARNER. I will.

Mr. CANDLER of Mississippi. The buildings at this Mount Weather station were built out of a lump-sum appropriation. It was not carried in this bill, and probably never will be carried in the bill as long as the present chairman presides over this committee and as long as the membership is as it is now. But from year to year, where the stations were not designated specifically, like the one stated in this bill, a lump-sum appropriation was made, and it left it to the Chief of the Weather Bureau or the Secretary of Agriculture to locate those buildings and erect those buildings, one building at a time, in addition to the building at Mount Weather, until the present plant was erected.

Mr. GARNER. I understand this was a near public scandal. In fact, it is as much subject to criticism as any one act of its size that you can think of within the last 10 years.

Now, may I ask the chairman another question? If I understand the law applying to public lands, the lands used by the Agricultural Department, the War Department, or other departments of the Government, there is absolutely no necessity for this legislation. I understand the law to be that when any public property, occupied or used by any department of the Government, is no longer necessary for the use of the Government, a mere Executive order carries that property into the public domain and authorizes the Secretary of the Interior to sell it under the general laws that now exist on the statute books. If I am in error on that I would like to know it, but if that is the rule there is no necessity for the proposition in this bill.

Mr. LEVER. As I have suggested so many times, I am not a lawyer; but this matter was urged on us by the Secretary of Agriculture through the Assistant Secretary of Agriculture, and I take it, of course, that the proposition had been submitted to the solicitor of the department, who is a very able lawyer, I understand. But even if the gentleman's contention is correct, it would do no harm to leave the provision in the bill.

Mr. GARNER. Well, I think some harm could be done. Why is it necessary to have two departments of the Government authorized to sell the public domain?

Mr. STAFFORD. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. GARNER. In just a moment. For instance, there are a number of military posts in this country that are being abandoned, and constantly Executive orders are being issued carrying them into military reserves.

Mr. MANN. There is a special law on that subject.

Mr. GARNER. I understand that there is a special law on that subject. But what I am trying to ascertain is whether there is a statute authorizing the President of the United States to issue an Executive order carrying into the public domain any public property that is no longer needed for the purposes for which it was formerly used?

Mr. STAFFORD. I believe, so far as my information goes, that the departments are without any authority to dispose of public land, unless there are special statutes authorizing it, as in the case of abandoned Army posts.

But, again, I will call the gentleman's attention to the fact that he suggests that if this is to go into the national domain, it might be sold for the small figure of $1.25 an acre, and I do not suppose the gentleman will favor such a reckless policy as that.

Mr. GARNER. No. I suppose the gentleman from Wisconsin will not undertake to try to create the impression that the present able Secretary of the Interior, under the rules governing the sale of the public domain, which permit him to sell it in as large or as small lots as he may desire, would sell it,

even if he desired to, at such a low figure as the gentleman names.

Mr. STAFFORD. Under the general law he could do that.

Mr. GARNER. He would not have the right to enter upon that, but the Secretary would have the right to sell it in such quantities as he might see proper, and if he did that, he would do it at public auction.

Mr. STAFFORD. I think the gentleman is in error as to the law.

Mr. LEVER. It seems to me, Mr. Chairman, that the two propositions are entirely different. I do not take it that in the general sense of the use of the words "public domain" this property would be included, but I want to call my friend's attention to this fact: Assuming that there is such a law as that to which he refers, and the President does have authority by Executive order to sell this land, does not the gentleman think that it is a rather unwise policy and is it not a rather unwise thing to ask the President of the United States to issue an order about a proposition concerning which he can not know very much, and is it not far better that these people should act under the authority of law and by the direction of Congress?

Mr. GARNER. I will say to my friend from South Carolina that the President could secure just as much information upon this subject as the committee could regarding this property.

Mr. MANN. Mr. Chairman, I would like to ask the gentleman from Texas if he thinks the President could order the Capitol Building sold?

Mr. GARNER. I hardly think so.

Mr. MANN. Why not, on the gentleman's statement?

Mr. GARNER. I say if it is no longer used he might.

Mr. MANN. Well, the President might determine that it was no longer used.

Mr. GARNER. I will ask the gentleman from Illinois whether he thinks the President has the right to convey back into the public domain any property of the United States that is now used by some department of the country and is no longer necessary for such use?

Mr. MANN. Clearly he does not have that authority. As to military reserves, there is a special law providing that they shall be covered into the public domain and sold in a particular manner, as set forth in the law, and the difficulties surrounding such a transaction are so great that whenever we have one we pass a special law throwing it into the general method of entering the public domain.

Mr. GARNER. Mr. Chairman, I withdraw the point of order.

Mr. MANN. I reserve the point of order. [Laughter.]

Mr. Chairman, I am one of those who believe that scientific investigation is profitable, even though the results may not be immediate. Gentlemen here without much knowledge of the subject have idly referred to this as "a summer resort" or "a winter resort." I was over in Atlantic City last Sunday, and read in the New York Sun, when it came in the morning, that it was going to be a fair day. I do not know where they got their information. This purported to be a weather report. I was out walking with the gentleman from Wisconsin, and we walked for 6 miles in a bitter, biting snowstorm. Probably that was not the fault of the Weather Bureau.

The truth is no one has yet learned and is able to tell the principles that guide the weather, and yet we know that nothing happens in nature except under law. The weather is guided by law. These people in the Weather Service some years ago attempted to obtain information of the upper currents of air, in the hope that in course of time they might learn more in regard to the principles which govern the movement of air upon the earth's surface. They have not learned a great deal, probably, in the way of principles, although they have learned a great deal in the way of facts. It was a surprise, undoubtedly, to nearly everyone in the House to hear the gentleman from South Carolina [Mr. LEVER] say that they have been sending up balloons for a distance of 20 miles. I say that if any Member of the House who is not acquainted with the facts had been asked if it were possible to send up a balloon 20 miles in the air he would have said it was not possible.

They have learned a great deal concerning air currents. They do not desire to abandon the work, but having experimented here, where they can compare one experiment with another, the department now wants to move the experiments off to some distant point, where comparisons will be of no value. I do not agree with that. It is the tendency of new officers to say that the work of their predecessors was valueless. Why, these men in the Weather Service may be gone to-morrow. They will, at any rate, soon be gone, and the next crop that comes in may think that these experiments ought to be carried on here, where they were before.

While it is immaterial to me whether they keep on with these experiments, I think they ought to keep the ground and the buildings—buildings which have cost a great sum of money and which can not be replaced without a great expense if they should ever be used. Of no value to sell, they can not be sold for any price to speak of. Having been constructed for this particular class of work in the main, they had better keep them, at least for a few years, before they dispose of them. And the chances are that the present officials in the Department of Agriculture in the course of a little longer time will themselves reach the conclusion that when they know so little about predicting the future of the weather, as they proved last Sunday, they will want to get additional information about the upper currents of the air in the hope that they may be able to make their predictions more accurate and for a longer time in the future.

I make the point of order.

The CHAIRMAN. The point of order is sustained.

Mr. LEVER. I am trying to find the appropriation from which they have made the expenditure for the conduct of that work. Is it the gentleman's purpose to ask that we continue the work out there; and if so——

Mr. MANN. I think that has been paid out of the lump-sum appropriation, which is here $1,189,000.

Mr. LEVER. It has been costing $25,000 a year, approximately, to do that.

Mr. MANN. I should imagine that they will do what the Secretary has indicated was his intention, to maintain some one there to do ordinary work in the way of observation and take care of the property. There is no loss about it.

Mr. LEVER. I take it that is correct.

Mr. HAUGEN. The statement of the Secretary is that it will cost about $25,000 to maintain these buildings, and then the average cost of maintaining an ordinary office.

Mr. MANN. They say they want somebody to make observations.

The CHAIRMAN. The Clerk will read.

Mr. MANN. I suggest to the gentleman that the House met at 11 o'clock this morning, and we can not go very far with the Bureau of Animal Industry to-night.

Mr. GARNER. Let us read down through page 9.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Total for the Weather Bureau, $1,668,270.

Mr. SELDOMRIDGE. In reply to what the gentleman from Illinois [Mr. MANN] has said with reference to the weather in Atlantic City on Sunday, I think he was misled by the weather forecasts published in the New York Sun. I believe the officials of the Weather Bureau claim that the bureau foretold the coming of this blizzard or storm, and thereby saved the shipping of the country something like $10,000,000.

Mr. MANN. Yes; they said that after the storm had passed by.

Mr. SELDOMRIDGE. I do not wish the gentleman to claim that the New York Sun is more reliable than the officials of the Weather Bureau.

Mr. MANN. The Sun got its information from the Weather Bureau.

Mr. GARNER. Does the gentleman undertake to tell the House that the Weather Bureau as now constituted is totally inefficient?

Mr. MANN. I do not.

Mr. GARNER. Does the gentleman undertake to say it is any more inefficient than it was two years ago?

Mr. MANN. I do not.

Mr. GARNER. That is all right.

Mr. MANN. I undertake to say that no one has yet learned enough to forecast the weather accurately on every occasion.

Mr. GARNER. To that statement I think everyone agrees.

Mr. MANN. I am not criticizing the Weather Bureau.

The Clerk read as follows:

BUREAU OF ANIMAL INDUSTRY.

Salaries, Bureau of Animal Industry: One chief of bureau, $5,000; 1 chief clerk, $2,500; 1 editor and compiler, $2,250; 6 clerks, class 4; 1 clerk, $1,680; 13 clerks, class 3; 2 clerks, at $1,500 each; 23 clerks, class 2; 2 clerks, at $1,380 each; 3 clerks, at $1,320 each; 1 clerk, $1,300; 1 clerk, $1,260; 39 clerks, class 1; 1 clerk, $1,100; 1 clerk, $1,080; 50 clerks, at $1,000 each; 2 clerks, at $960 each; 64 clerks, at $900 each; 1 architect, $2,000; 1 architect, $900; 1 illustrator, $1,400; 1 laboratory helper, $1,020; 2 laboratory helpers, at $840 each; 1 laboratory helper, $720; 1 laboratory helper, $600; 1 laboratory helper, $480; 1 instrument maker, $1,200; 1 carpenter, $1,100; 2 carpenters, at $1,000 each; 1 messenger and custodian, $1,200; 1 messenger and custodian, $1,000; 1 skilled laborer, $1,000; 33 skilled laborers, at $900 each; 2 skilled laborers, at $840 each; 3 skilled laborers, at $720 each; 9 messengers, skilled laborers, or laborers, at $840 each; 10 messengers, skilled laborers, or laborers, at $720 each; 2 messengers, skilled laborers, or laborers, at $660 each; 11 laborers, messengers, or messenger boys, at $600 each; 3 laborers, messengers, or messenger boys, at $540 each; 32 laborers, messengers, or messenger boys, at $480 each; 6

laborers, messengers, or messenger boys, at $360 each; 1 watchman, $720; 1 charwoman, $600; 1 charwoman, $540; 11 charwomen, at $480 each; 4 charwomen, at $360 each; 1 charwoman, $300; 2 charwomen, at $240 each; in all, $347,030.

Mr. FOWLER. Mr. Chairman, I reserve a point of order against the paragraph.

Mr. LEVER. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. HAMLIN, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 13679, the Agricultural appropriation bill, and had come to no resolution thereon.

SENATE BILLS REFERRED.

Under clause 2, Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

S. 4167. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and of other wars than the Civil War, and certain widows and dependent relatives of such soldiers and sailors; to the Committee on Pensions.

S. 4168. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors; to the Committee on Invalid Pensions.

S. 3403. An act to abolish the office of receiver of public moneys at Springfield, Mo., and for other purposes; to the Committee on the Public Lands.

S. 2725. An act authorizing the sale of certain lands to the Dwight Mission School on Sallisaw Creek, Okla.; to the Committee on Indian Affairs.

S. 1618. An act granting to the Inter-City Bridge Co., its successors and assigns, the right to construct, acquire, maintain, and operate a railway bridge across the Mississippi River; to the Committee on Interstate and Foreign Commerce.

S. 2226. An act for the relief of Joel J. Parker; to the Committee on Claims.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted to Mr. J. M. C. SMITH, for 10 days, on account of important business.

HOUR OF MEETING TO-MORROW.

Mr. LEVER. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet to-morrow morning at 11 o'clock.

The SPEAKER. The gentleman asks unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock to-morrow.

Mr. MANN. Reserving the right to object, does the gentleman think that at this stage of the session it is necessary to have the House meet every morning at 11 o'clock and interfere with all the committee meetings of the House?

Mr. LEVER. I will say to the gentleman from Illinois that the Committee on Agriculture has a number of very pressing matters that it desires to take up for consideration.

Mr. MANN. How will that committee be able to do it when the next committee that has charge of an appropriation bill will want us to meet at 11 o'clock in the morning, and the point of no quorum is raised, and the Committee on Agriculture are called over to the House in the midst of their committee meeting?

Mr. LEVER. The gentleman from Illinois has been here long enough to know how that can be done.

Mr. MANN. I know it can not. When the House meets at 11 o'clock there is not much chance for committees to work. A few committees like the Committee on Agriculture have the authority to sit during the sessions of the House, but a point of no quorum is often made, and if no one is here it ought to be made.

Mr. LEVER. Does the gentleman from Illinois object? I would like very much to go along to-morrow because of the reasons I have stated.

Mr. MANN. To-morrow is Saturday; what time will the gentleman agree to adjourn if we come in at 11 o'clock?

Mr. LEVER. Not later than this time.

Mr. MANN. That is no concession.

Mr. LEVER. I will concede half an hour, then.

Mr. MANN. Will the gentleman say half past 4? I think we had better meet at the regular hour and thus give the committees a chance.

The SPEAKER. The gentleman from Illinois objects.

PANAMA CANAL TOLLS.

Mr. ADAMSON. Mr. Speaker, I ask unanimous consent that four legislative days be allowed the minority of the Committee on Interstate and Foreign Commerce to file views against the bill with reference to exempting vessels in the coastwise trade from tolls at the Panama Canal.

The SPEAKER. The gentleman from Georgia asks unanimous consent that four legislative days be allowed the minority of the Committee on Interstate and Foreign Commerce to file their views on the bill repealing free tolls of the Panama Canal. Is there objection? [After a pause.] The Chair hears none.

ADJOURNMENT.

Mr. LEVER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 25 minutes p. m.) the House adjourned until to-morrow, Saturday, March 7, 1914, at 12 o'clock noon.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. ADAMSON, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 1922) to repeal that part of the act entitled, "An act to provide for the opening, maintenance, protection, and operation of the Panama Canal, and the sanitation and government of the Canal Zone," approved August 24, 1912, which exempts vessels engaged in the coastwise trade from tolls at the Panama Canal, reported the same without amendment, accompanied by a report (No. 343), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. HAYDEN, from the Committee on Indian Affairs, to which was referred the bill (H. R. 11246) for the restoration of annuities to the Medawakanton and Wahpakoota (Santee) Sioux Indians, declared forfeited by the act of February 16, 1863, reported the same without amendment, accompanied by a report (No. 344), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. DECKER, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 13771) extending the provisions of the act of March 3, 1913, authorizing the construction of a bridge over the Missouri River, near Welden Springs Landing, Mo., reported the same with amendment, accompanied by a report (No. 345), which said bill and report were referred to the House Calendar.

## CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 14181) granting a pension to Jennie Adel; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 14088) granting a pension to Eliza F. Greenwood; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 1032) granting a pension to Frank Sanford Stirling; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

## PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions and memorials were introduced and severally referred as follows:

By Mr. MURDOCK: A bill (H. R. 14282) to extend the benefits of the act of June 27, 1890, as amended by the act of May 9, 1900, granting pensions to soldiers and sailors who served in the military or naval forces of the United States, their widows, minor children, and dependent parents, and the act of February 6, 1907, and the act of May 11, 1912, as amended by the act of March 4, 1913, to the officers and enlisted men who served in the Eighteenth Regiment of Kansas Volunteer Cavalry; to the Committee on Invalid Pensions.

By Mr. TAGGART: A bill (H. R. 14283) for the erection of an addition to the post-office building at Lawrence, Kans.; to the Committee on Public Buildings and Grounds.

By Mr. O'LEARY: A bill (H. R. 14284) amending paragraph 81 of the act creating a Public Utilities Commission; to the Committee on the District of Columbia.

By Mr. CARY: A bill (H. R. 14285) providing for the improvement of the river at South Milwaukee, Wis.; to the Committee on Rivers and Harbors.

Also, a bill (H. R. 14286) to provide for the examination and survey of the river at South Milwaukee, Wis.; to the Committee on Rivers and Harbors.

By Mr. SHREVE: A bill (H. R. 14287) requiring double postage on certain mail matter forwarded on which sufficient postage is not prepaid; to the Committee on the Post Office and Post Roads.

By Mr. TAGGART: A bill (H. R. 14288) relating to contracts for the erection or alteration of public buildings; to the Committee on Public Buildings and Grounds.

By Mr. GREGG: Resolution (H. Res. 434) referring certain claims to the Court of Claims for finding of facts and conclusions of law under section 151 of the act of March 3, 1911, entitled "An act to codify, revise, and amend the laws relating to the judiciary"; to the Committee on War Claims.

By Mr. TAYLOR of New York: Memorial of the Legislature of the State of Illinois, favoring the establishment and maintenance of vocational training schools; to the Committee on Education.

By Mr. FITZGERALD: Memorial of the New York State Legislature, relative to immigration of insane aliens; to the Committee on Immigration and Naturalization.

## PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ANTHONY: A bill (H. R. 14289) granting a pension to Mattie Slater; to the Committee on Invalid Pensions.

By Mr. BOWDLE: A bill (H. R. 14290) granting an increase of pension to Alice M. Miller; to the Committee on Invalid Pensions.

By Mr. CARY: A bill (H. R. 14291) granting a pension to John Iverson; to the Committee on Pensions.

By Mr. FRANCIS: A bill (H. R. 14292) granting an increase of pension to Hiram Bucey; to the Committee on Invalid Pensions.

By Mr. GOEKE: A bill (H. R. 14293) granting an increase of pension to George Cleckner; to the Committee on Invalid Pensions.

By Mr. GRIEST: A bill (H. R. 14294) granting a pension to Mary A. Ruth; to the Committee on Invalid Pensions.

By Mr. HELVERING: A bill (H. R. 14295) granting an increase of pension to Margaret Munson; to the Committee on Invalid Pensions.

By Mr. IGOE: A bill (H. R. 14296) granting an increase of pension to Ruth A. Everett; to the Committee on Invalid Pensions.

By Mr. KIRKPATRICK: A bill (H. R. 14297) granting pensions to Agnes Mann and Mary Mann; to the Committee on Invalid Pensions.

By Mr. McANDREWS: A bill (H. R. 14298) for the relief of Katie O'Brien; to the Committee on Claims.

By Mr. McGILLICUDDY: A bill (H. R. 14299) granting an increase of pension to Mary I. Keene; to the Committee on Invalid Pensions.

By Mr. OGLESBY: A bill (H. R. 14300) to pay the several sums of money found due certain navy-yard employees by the Court of Claims; to the Committee on Claims.

By Mr. O'HAIR: A bill (H. R. 14301) granting an increase of pension to Jacob P. Fishback; to the Committee on Invalid Pensions.

By Mr. PALMER: A bill (H. R. 14302) to reimburse Saunders Lewis, jr., for expenses of the office of clerk of the circuit court of appeals for the third circuit; to the Committee on Claims.

By Mr. PADGETT: A bill (H. R. 14303) for the relief of the estate of John V. Wright; to the Committee on Claims.

By Mr. POST: A bill (H. R. 14304) granting an increase of pension to Melville Whiteman; to the Committee on Invalid Pensions.

By Mr. ROUSE: A bill (H. R. 14305) granting an increase of pension to Patrick Owens; to the Committee on Invalid Pensions.

By Mr. SCOTT: A bill (H. R. 14306) for the relief of C. W. Davis; to the Committee on Claims.

By Mr. SELLS: A bill (H. R. 14307) granting a pension to Winnie May Barlow, Annie Alice Barlow, and Niles Brunette Barlow; to the Committee on Pensions.

Also, a bill (H. R. 14308) granting a pension to Serena C. Dodd; to the Committee on Invalid Pensions.

By Mr. SHERLEY (by request): A bill (H. R. 14309) for the relief of Thomas J. Craycroft; to the Committee on War Claims.

By Mr. SHERWOOD: A bill (H. R. 14310) granting an increase of pension to Henry C. Van Fleet; to the Committee on Invalid Pensions.

By Mr. SHREVE: A bill (H. R. 14311) granting a pension to Henrietta Ross; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14312) granting an increase of pension to Joshua M. George; to the Committee on Invalid Pensions.

By Mr. SMITH of Idaho: A bill (H. R. 14313) granting a pension to Edward L. Herriman; to the Committee on Pensions.

By Mr. SUTHERLAND: A bill (H. R. 14314) granting a pension to R. Roy Hamby; to the Committee on Pensions.

By Mr. TAGGART: A bill (H. R. 14315) granting an increase of pension to William H. Young; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14316) granting an increase of pension to William Muer; to the Committee on Invalid Pensions.

By Mr. TEN EYCK: A bill (H. R. 14317) granting a pension to Catherine Fitzpatrick; to the Committee on Invalid Pensions.

By Mr. WALLIN: A bill (H. R. 14318) for the relief of Patrick J. Purcell; to the Committee on Claims.

## PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ADAIR: Petitions of various members of the Christian Endeavor of the United Brethren Church, the Methodist Episcopal Sunday School, and the United Brethren Sunday School, all of Decatur, Ind., and the Adams County (Ind.) Civic League and sundry citizens of the State, favoring national prohibition; to the Committee on the Judiciary.

By Mr. ALLEN: Petition of the Albert Sidney Johnston Chapter, Ohio Division, United Daughters of the Confederacy, relative to naming of forts along the Panama Canal; to the Committee on Military Affairs.

Also, petition of various Methodist and Episcopal clergymen of Cincinnati, Ohio, favoring national prohibition; to the Committee on the Judiciary.

By Mr. ANTHONY: Petition signed by members of Local No. 911, Farmers' Union, of Sabetha, Kans., in favor of House bill 10076, to prevent stock-exchange gambling in farm products, etc.; to the Committee on the Post Office and Post Roads.

By Mr. ASHBROOK: Petition of Mrs. George E. Blakely and 14 other ladies, of Doylestown, Ohio, in favor of the Sheppard-Hobson prohibition amendment; to the Committee on the Judiciary.

By Mr. BELL of California: Petitions of sundry citizens of Monrovia, Cal., protesting against the Sabbath observance bill; to the Committee on the District of Columbia.

By Mr. BROWNING: Memorial of Camden Mannerchor and sundry citizens of Camden, citizens of Swedesboro, Woodbury German Society, and sundry citizens of Woodbury, all of the State of New Jersey, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. BURKE of Wisconsin: Petition of sundry citizens of Oxford, Wis., against Sabbath observance bill; to the Committee on the District of Columbia.

By Mr. BUTLER: Petition of 383 members of the Baptist Sunday School of Phoenixville, Pa., and the Concord Quarterly Meeting of Friends, at Media, Pa., favoring national prohibition; to the Committee on the Judiciary.

Also, petitions of the National Bank of Coatesville, Pa., and of the Farmers and Mechanics' Trust Co., of West Chester, Pa., favoring change in income-tax law relative to collection at source; to the Committee on Ways and Means.

By Mr. CARY: Petition of Mrs. James Bennett, of Kentucky, relative to protection of white and colored male and female citizens of the United States in their constitutional right to vote; to the Committee on the Judiciary.

Also, petitions of the Boston Stove and Rail Division of the Merchants and Manufacturers' Association, of Milwaukee, Wis., protesting against passage of House bill 13305, referring to stipulated price of certain merchandise; to the Committee on Interstate and Foreign Commerce.

By Mr. CURRY: Petitions of 100 citizens of Stockton, Cal., and of 20 citizens of Oakley, Cal., favoring national prohibition; to the Committee on the Judiciary.

Also, petition of 17 union-labor organizations of California, favoring the seamen's bill; to the Committee on the Merchant Marine and Fisheries.

Also, resolutions of Unity Post, No. 171, Department of California and Nevada, Grand Army of the Republic, opposing the proposed monthly payment of pensions by coupons; to the Committee on Invalid Pensions.

Also, petition of the Cooks and Waiters' Union, No. 561, of Sacramento, Cal., opposing House joint resolution 168 and Senate joint resolutions 88 and 50, relative to national prohibition; to the Committee on the Judiciary.

laborers, messengers, or messenger boys, at $360 each; 1 watchman, $720; 1 charwoman, $600; 1 charwoman, $540; 11 charwomen, at $480 each; 4 charwomen, at $360 each; 1 charwoman, $300; 2 charwomen, at $240 each; in all, $347,030.

Mr. FOWLER. Mr. Chairman, I reserve a point of order against the paragraph.

Mr. LEVER. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. HAMLIN, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 13679, the Agricultural appropriation bill, and had come to no resolution thereon.

SENATE BILLS REFERRED.

Under clause 2, Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

S. 4167. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and of other wars than the Civil War, and certain widows and dependent relatives of such soldiers and sailors; to the Committee on Pensions.

S. 4168. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors; to the Committee on Invalid Pensions.

S. 3403. An act to abolish the office of receiver of public moneys at Springfield, Mo., and for other purposes; to the Committee on the Public Lands.

S. 2725. An act authorizing the sale of certain lands to the Dwight Mission School on Sallisaw Creek, Okla.; to the Committee on Indian Affairs.

S. 1618. An act granting to the Inter-City Bridge Co., its successors and assigns, the right to construct, acquire, maintain, and operate a railway bridge across the Mississippi River; to the Committee on Interstate and Foreign Commerce.

S. 2226. An act for the relief of Joel J. Parker; to the Committee on Claims.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted to Mr. J. M. C. SMITH, for 10 days, on account of important business.

HOUR OF MEETING TO-MORROW.

Mr. LEVER. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet to-morrow morning at 11 o'clock.

The SPEAKER. The gentleman asks unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock to-morrow.

Mr. MANN. Reserving the right to object, does the gentleman think that at this stage of the session it is necessary to have the House meet every morning at 11 o'clock and interfere with all the committee meetings of the House?

Mr. LEVER. I will say to the gentleman from Illinois that the Committee on Agriculture has a number of very pressing matters that it desires to take up for consideration.

Mr. MANN. How will that committee be able to do it when the next committee that has charge of an appropriation bill will want us to meet at 11 o'clock in the morning, and the point of no quorum is raised, and the Committee on Agriculture are called over to the House in the midst of their committee meeting?

Mr. LEVER. The gentleman from Illinois has been here long enough to know how that can be done.

Mr. MANN. I know it can not. When the House meets at 11 o'clock there is not much chance for committees to work. A few committees like the Committee on Agriculture have the authority to sit during the sessions of the House, but a point of no quorum is often made, and if no one is here it ought to be made.

Mr. LEVER. Does the gentleman from Illinois object? I would like very much to go along to-morrow because of the reasons I have stated.

Mr. MANN. To-morrow is Saturday; what time will the gentleman agree to adjourn if we come in at 11 o'clock?

Mr. LEVER. Not later than this time.

Mr. MANN. That is no concession.

Mr. LEVER. I will concede half an hour, then.

Mr. MANN. Will the gentleman say half past 4? I think we had better meet at the regular hour and thus give the committees a chance.

The SPEAKER. The gentleman from Illinois objects.

PANAMA CANAL TOLLS.

Mr. ADAMSON. Mr. Speaker, I ask unanimous consent that four legislative days be allowed the minority of the Committee on Interstate and Foreign Commerce to file views against the bill with reference to exempting vessels in the coastwise trade from tolls at the Panama Canal.

The SPEAKER. The gentleman from Georgia asks unanimous consent that four legislative days be allowed the minority of the Committee on Interstate and Foreign Commerce to file their views on the bill repealing free tolls of the Panama Canal. Is there objection? [After a pause.] The Chair hears none.

ADJOURNMENT.

Mr. LEVER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 27 minutes p. m.) the House adjourned until to-morrow, Saturday, March 7, 1914, at 12 o'clock noon.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. ADAMSON, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 1922) to repeal that part of the act entitled, "An act to provide for the opening, maintenance, protection, and operation of the Panama Canal, and the sanitation and government of the Canal Zone," approved August 24, 1912, which exempts vessels engaged in the coastwise trade from tolls at the Panama Canal, reported the same without amendment, accompanied by a report (No. 343), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. HAYDEN, from the Committee on Indian Affairs, to which was referred the bill (H. R. 11246) for the restoration of annuities to the Medawakanton and Wahpakoota (Santee) Sioux Indians, declared forfeited by the act of February 16, 1863, reported the same without amendment, accompanied by a report (No. 344), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. DECKER, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 13771) extending the provisions of the act of March 3, 1913, authorizing the construction of a bridge over the Missouri River, near Weldon Springs Landing, Mo., reported the same with amendment, accompanied by a report (No. 345), which said bill and report were referred to the House Calendar.

## CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 14181) granting a pension to Jennie Adel; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 14088) granting a pension to Eliza F. Greenwood; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 1032) granting a pension to Frank Sanford Stirling; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

## PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions and memorials were introduced and severally referred as follows:

By Mr. MURDOCK: A bill (H. R. 14282) to extend the benefits of the act of June 27, 1890, as amended by the act of May 9, 1900, granting pensions to soldiers and sailors who served in the military or naval forces of the United States, their widows, minor children, and dependent parents, and the act of February 6, 1907, and the act of May 11, 1912, as amended by the act of March 4, 1913, to the officers and enlisted men who served in the Eighteenth Regiment of Kansas Volunteer Cavalry; to the Committee on Invalid Pensions.

By Mr. TAGGART: A bill (H. R. 14283) for the erection of an addition to the post-office building at Lawrence, Kans.; to the Committee on Public Buildings and Grounds.

By Mr. O'LEARY: A bill (H. R. 14284) amending paragraph 81 of the act creating a Public Utilities Commission; to the Committee on the District of Columbia.

By Mr. CARY: A bill (H. R. 14285) providing for the improvement of the river at South Milwaukee, Wis.; to the Committee on Rivers and Harbors.

Also, a bill (H. R. 14286) to provide for the examination and survey of the river at South Milwaukee, Wis.; to the Committee on Rivers and Harbors.

By Mr. SHREVE: A bill (H. R. 14287) requiring double postage on certain mail matter forwarded on which sufficient postage is not prepaid; to the Committee on the Post Office and Post Roads.

By Mr. TAGGART: A bill (H. R. 14288) relating to contracts for the erection or alteration of public buildings; to the Committee on Public Buildings and Grounds.

By Mr. GREGG: Resolution (H. Res. 434) referring certain claims to the Court of Claims for finding of facts and conclusions of law under section 151 of the act of March 3, 1911, entitled "An act to codify, revise, and amend the laws relating to the judiciary"; to the Committee on War Claims.

By Mr. TAYLOR of New York: Memorial of the Legislature of the State of Illinois, favoring the establishment and maintenance of vocational training schools; to the Committee on Education.

By Mr. FITZGERALD: Memorial of the New York State Legislature, relative to immigration of insane aliens; to the Committee on Immigration and Naturalization.

## PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ANTHONY: A bill (H. R. 14289) granting a pension to Mattie Slater; to the Committee on Invalid Pensions.

By Mr. BOWDLE: A bill (H. R. 14290) granting an increase of pension to Alice M. Miller; to the Committee on Invalid Pensions.

By Mr. CARY: A bill (H. R. 14291) granting a pension to John Iverson; to the Committee on Pensions.

By Mr. FRANCIS: A bill (H. R. 14292) granting an increase of pension to Hiram Bucey; to the Committee on Invalid Pensions.

By Mr. GOEKE: A bill (H. R. 14293) granting an increase of pension to George Cleckner; to the Committee on Invalid Pensions.

By Mr. GRIEST: A bill (H. R. 14294) granting a pension to Mary A. Ruth; to the Committee on Invalid Pensions.

By Mr. HELVERING: A bill (H. R. 14295) granting an increase of pension to Margaret Munson; to the Committee on Invalid Pensions.

By Mr. IGOE: A bill (H. R. 14296) granting an increase of pension to Ruth A. Everett; to the Committee on Invalid Pensions.

By Mr. KIRKPATRICK: A bill (H. R. 14297) granting pensions to Agnes Mann and Mary Mann; to the Committee on Invalid Pensions.

By Mr. McANDREWS: A bill (H. R. 14298) for the relief of Katie O'Brien; to the Committee on Claims.

By Mr. McGILLICUDDY: A bill (H. R. 14299) granting an increase of pension to Mary I. Keene; to the Committee on Invalid Pensions.

By Mr. OGLESBY: A bill (H. R. 14300) to pay the several sums of money found due certain navy-yard employees by the Court of Claims; to the Committee on Claims.

By Mr. O'HAIR: A bill (H. R. 14301) granting an increase of pension to Jacob P. Fishback; to the Committee on Invalid Pensions.

By Mr. PALMER: A bill (H. R. 14302) to reimburse Saunders Lewis, jr., for expenses of the office of clerk of the circuit court of appeals for the third circuit; to the Committee on Claims.

By Mr. PADGETT: A bill (H. R. 14303) for the relief of the estate of John V. Wright; to the Committee on Claims.

By Mr. POST: A bill (H. R. 14304) granting an increase of pension to Melville Whiteman; to the Committee on Invalid Pensions.

By Mr. ROUSE: A bill (H. R. 14305) granting an increase of pension to Patrick Owens; to the Committee on Invalid Pensions.

By Mr. SCOTT: A bill (H. R. 14306) for the relief of C. W. Davis; to the Committee on Claims.

By Mr. SELLS: A bill (H. R. 14307) granting a pension to Winnie May Barlow, Annie Alice Barlow, and Niles Brunette Barlow; to the Committee on Pensions.

Also, a bill (H. R. 14308) granting a pension to Serena C. Dodd; to the Committee on Invalid Pensions.

By Mr. SHERLEY (by request): A bill (H. R. 14309) for the relief of Thomas J. Craygroft; to the Committee on War Claims.

By Mr. SHERWOOD: A bill (H. R. 14310) granting an increase of pension to Henry C. Van Fleet; to the Committee on Invalid Pensions.

By Mr. SHREVE: A bill (H. R. 14311) granting a pension to Henrietta Ross; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14312) granting an increase of pension to Joshua M. George; to the Committee on Invalid Pensions.

By Mr. SMITH of Idaho: A bill (H. R. 14313) granting a pension to Edward L. Herriman; to the Committee on Pensions.

By Mr. SUTHERLAND: A bill (H. R. 14314) granting a pension to R. Roy Hamby; to the Committee on Pensions.

By Mr. TAGGART: A bill (H. R. 14315) granting an increase of pension to William H. Young; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14316) granting an increase of pension to William Muer; to the Committee on Invalid Pensions.

By Mr. TEN EYCK: A bill (H. R. 14317) granting a pension to Catherine Fitzpatrick; to the Committee on Invalid Pensions.

By Mr. WALLIN: A bill (H. R. 14318) for the relief of Patrick J. Purcell; to the Committee on Claims.

## PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ADAIR: Petitions of various members of the Christian Endeavor of the United Brethren Church, the Methodist Episcopal Sunday School, and the United Brethren Sunday School, all of Decatur, Ind., and the Adams County (Ind.) Civic League and sundry citizens of the State, favoring national prohibition; to the Committee on the Judiciary.

By Mr. ALLEN: Petition of the Albert Sidney Johnston Chapter, Ohio Division, United Daughters of the Confederacy, relative to naming of forts along the Panama Canal; to the Committee on Military Affairs.

Also, petition of various Methodist and Episcopal clergymen of Cincinnati, Ohio, favoring national prohibition; to the Committee on the Judiciary.

By Mr. ANTHONY: Petition signed by members of Local No. 911, Farmers' Union, of Sabetha, Kans., in favor of House bill 10076, to prevent stock-exchange gambling in farm products, etc.; to the Committee on the Post Office and Post Roads.

By Mr. ASHBROOK: Petition of Mrs. George E. Blakely and 14 other ladies, of Doylestown, Ohio, in favor of the Sheppard-Hobson prohibition amendment; to the Committee on the Judiciary.

By Mr. BELL of California: Petitions of sundry citizens of Monrovia, Cal., protesting against the Sabbath observance bill; to the Committee on the District of Columbia.

By Mr. BROWNING: Memorial of Camden Mannerchor and sundry citizens of Camden, citizens of Swedesboro, Woodbury German Society, and sundry citizens of Woodbury, all of the State of New Jersey, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. BURKE of Wisconsin: Petition of sundry citizens of Oxford, Wis., against Sabbath observance bill; to the Committee on the District of Columbia.

By Mr. BUTLER: Petition of 383 members of the Baptist Sunday School of Phoenixville, Pa., and the Concord Quarterly Meeting of Friends, at Media, Pa., favoring national prohibition; to the Committee on the Judiciary.

Also, petitions of the National Bank of Coatesville, Pa., and of the Farmers and Mechanics' Trust Co., of West Chester, Pa., favoring change in income-tax law relative to collection at source; to the Committee on Ways and Means.

By Mr. CARY: Petition of Mrs. James Bennett, of Kentucky, relative to protection of white and colored male and female citizens of the United States in their constitutional right to vote; to the Committee on the Judiciary.

Also, petitions of the Boston Stove and Rail Division of the Merchants and Manufacturers' Association, of Milwaukee, Wis., protesting against passage of House bill 13305, referring to stipulated price of certain merchandise; to the Committee on Interstate and Foreign Commerce.

By Mr. CURRY: Petitions of 100 citizens of Stockton, Cal., and of 20 citizens of Oakley, Cal., favoring national prohibition; to the Committee on the Judiciary.

Also, petition of 17 union-labor organizations of California, favoring the seamen's bill; to the Committee on the Merchant Marine and Fisheries.

Also, resolutions of Unity Post, No. 171, Department of California and Nevada, Grand Army of the Republic, opposing the proposed monthly payment of pensions by coupons; to the Committee on Invalid Pensions.

Also, petition of the Cooks and Waiters' Union, No. 561, of Sacramento, Cal., opposing House joint resolution 168 and Senate joint resolutions 88 and 50, relative to national prohibition; to the Committee on the Judiciary.

Also, petition of Moving Picture Operators' Union of Sacramento, Cal., opposing House joint resolution 168 and Senate joint resolutions 88 and 50, relative to national prohibition; to the Committee on the Judiciary.

By Mr. DALE: Petition of Mrs. James Bennett, of Kentucky, relative to protection for white and colored male and female citizens of the United States in their constitutional right to vote; to the Committee on the Judiciary.

Also, petition of members of the Fred N. Rix Camp, No. 1, United Spanish War Veterans, favoring passage of House bill 7374, for widows and orphans' pension bill; to the Committee on Pensions.

By Mr. DYER: Petitions of William E. Hearn and other citizens of St. Louis, Mo., protesting against national prohibition; to the Committee on the Judiciary.

By Mr. ESCH: Petitions of sundry citizens of La Crosse County, Wis., protesting against national prohibition; to the Committee on the Judiciary.

Also, petitions of the Pastors' Union and pastors and ministers of the Protestant churches of La Crosse, Wis., favoring national prohibition; to the Committee on the Judiciary.

By Mr. FITZGERALD: Petition of the Commodore Barry Branch, No. 331, Continental League of America, against "One hundred years of peace celebration"; to the Committee on Foreign Affairs.

Also, petition of sundry citizens of New York State, favoring remedial legislation in the form of pension bills now before Congress; to the Committee on Invalid Pensions.

Also, petition of Swedish Hundred Men's Society, of New York, favoring a bill for the erection of a memorial to John Ericsson; to the Committee on Appropriations.

By Mr. GALLAGHER: Petition of sundry citizens of Cook County, Ill., against national prohibition; to the Committee on the Judiciary.

By Mr. GILMORE: Petition of the Anthony Wayne Branch, American Continental League, against repeal of exemption clause in Panama Canal act; to the Committee on Interstate and Foreign Commerce.

Also, petition of the First United Presbyterian Church of Brockton, Mass., against section 6 of House bill 12928, relative to changing compensatory time clause for Sunday work by postal employees; to the Committee on the Post Office and Post Roads.

By Mr. GRAHAM of Pennsylvania: Petition of the Washington Central Labor Union, favoring passage of House bill 12873, relative to taxation in the District of Columbia; to the Committee on the District of Columbia.

By Mr. GRIEST: Petition of the Chamber of Commerce of Pittsburgh, Pa., protesting against passage of the Burnett immigration bill (H. R. 6060); to the Committee on Immigration and Naturalization.

Also, memorial of the Chamber of Commerce of Pittsburgh, Pa., protesting against passage of the Bartlett-Bacon anti-injunction bill; to the Committee on the Judiciary.

Also, memorial of the Walnut Street Business Association, of Philadelphia, Pa., suggesting the last Monday in October be set apart as national Thanksgiving Day; to the Committee on the Judiciary.

By Mr. HAMMOND: Petitions of 46 citizens of Madelia, Minn., protesting against national prohibition, and 88 citizens of Worthington, Minn., protesting against Columbus Day as a national holiday; to the Committee on the Judiciary.

By Mr. HULINGS: Affidavits to accompany House bill 10168, relative to a claim of Leon Greenbaum, of New York City; to the Committee on Claims.

Also, petitions of sundry citizens of Pennsylvania, protesting against barring The Menace from the mails; to the Committee on the Post Office and Post Roads.

By Mr. HUMPHREY of Washington: Petitions of sundry citizens of Stanwood, Wash., protesting against the passage of the Sabbath observance bill; to the Committee on the District of Columbia.

Also, petitions of various officers of the Bartenders' Local No. 454, of the third congressional district of the State of Washington, and of sundry citizens of the third congressional district, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. IGOE: Petition of John A. Beekcoll, of St. Louis, Mo., protesting against national prohibition; to the Committee on the Judiciary.

Also, petition of the St. Louis Waiters' Union, Local No. 20, favoring the passage of the seamen's bill (S. 136); to the Committee on the Merchant Marine and Fisheries.

Also, petition of A. D. Porter, of Pasadena, Cal., protesting against increasing the postage on magazines; to the Committee on the Post Office and Post Roads.

Also, petition of the Washington Central Labor Union, favoring passage of House bill 12873, relative to taxation in the District of Columbia; to the Committee on the District of Columbia.

By Mr. KENNEDY of Iowa: Petition of various voters of the State of Iowa, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. LIEB: Petitions of E. Determann; Harry Loewenthal; A. C. Blinn; Samuel L. Orr; Edward Miller, jr.; William Hinspeter; Boswell Torian; J. L. Knauss; Harvey O. Herndon; and R. A. Brennan, all of Evansville, Ind., protesting against national prohibition; to the Committee on the Judiciary.

By Mr. LINDBERGH: Petitions of citizens of St. Cloud, Elk River, and Akeley, all in the State of Minnesota, protesting against joint resolutions 168, 88, and 50 relative to national prohibition; to the Committee on the Judiciary.

By Mr. LONERGAN: Petition of the State Business Men's Association of Connecticut (Inc.), protesting against the passage of Senate bill 3631, providing for the appointment of clerks of the courts of the United States by the President; to the Committee on the Judiciary.

Also, petition of the State Business Men's Association of Connecticut (Inc.), protesting against the repeal of the clause in the Panama Canal bill exempting coastwise commerce from tolls; to the Committee on Interstate and Foreign Commerce.

Also, petition of the Connecticut State Association of Post Office Clerks, opposing any change in the Sunday closing law as regards post offices; to the Committee on the Post Office and Post Roads.

Also, petition of the local branch of the Civil Service Employees of South Norwalk, Conn., favoring passage of the Hamill bill relative to pensions for civil-service employees; to the Committee on Reform in the Civil Service.

Also, petition of the Connecticut State Association of Post Office Clerks, favoring the passage of the Hamill bill relative to pensions for civil-service employees; to the Committee on Reform in the Civil Service.

Also, petition of the Memphis Cotton Exchange, Memphis, Tenn., urging legislation relative to cotton futures; to the Committee on Agriculture.

Also, petition of the Manila Merchants' Association, of Manila, P. I., favoring the legislation for including the Philippines in the 2-cent postal convention between the United States and Great Britain; to the Committee on the Post Office and Post Roads.

By Mr. MADDEN: Petitions of sundry citizens of Chicago, Ill., protesting against national prohibition; to the Committee on the Judiciary.

Also, petitions of various voters of the State of Illinois, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. MAGUIRE of Nebraska: Petition of various voters of the first congressional district of Nebraska, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. MANN: Petition of the Chicago Association of Commerce, favoring bureau for bill drafting and reference; to the Committee on the Library.

By Mr. MAPES: Petition of sundry citizens of Michigan, against national prohibition; to the Committee on the Judiciary.

By Mr. McKELLAR: Petition of sundry citizens of Tennessee, favoring House bill 5308, relative to taxing mail-order houses; to the Committee on Ways and Means.

Also, petition of sundry citizens of Tennessee, against national prohibition; to the Committee on the Judiciary.

By Mr. J. I. NOLAN: Petition of J. F. Behrend, of San Francisco, Cal., and 31 other citizens and voters of the city of San Francisco, Cal., against the passage of House joint resolution 168 and Senate joint resolutions 50 and 88, relative to national prohibition; to the Committee on the Judiciary.

By Mr. O'BRIEN: Petition of E. Dillstrom, Peter Kiefer, and Louis H. Rovey, citizens of Brooklyn, N. Y., protesting against national prohibition; to the Committee on the Judiciary.

Also, petition of Charles Mannhardt, of Brooklyn, N. Y., favoring House bill 11898, known as the "Mothers' pension bill"; to the Committee on Pensions.

Also, petition of the Merchants' Association of New York, favoring New York City for Army-Navy football game; to the Committee on Military Affairs.

Also, petition of the Colonel John Jacob Astor Camp, No. 98, United Spanish War Veterans, of New York City, favoring the passage of House bill 13044, for pensions for widows and orphans of Spanish War veterans; to the Committee on Pensions.

Also, memorial of the General Henry W. Lawton Camp, No. 21, United Spanish War Veterans, of Brooklyn, favoring passage of House bill 7374, for pensions for widows and orphans of Spanish War veterans; to the Committee on Pensions.

Also, petition of Michael James Burke, member of the New York Mailers' Union, No. 6, favoring the Bartlett-Bacon bill to exempt labor unions from the provisions of the Sherman anti-trust law; to the Committee on the Judiciary.

By Mr. PATTEN of New York: Petition of the Kathryn Fellows Auxiliary, No. 28, Department of New York, Auxiliary to the United Spanish War Veterans; and the Colonel John Jacob Astor Camp, No. 98, United Spanish War Veterans, Department of New York, favoring House bill 13044, relative to pensions for widows of Spanish War veterans; to the Committee on Pensions.

By Mr. PAYNE: Petitions of various voters of the thirty-sixth congressional district of New York, protesting against national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens of Cayuga County, favoring prohibition amendment; to the Committee on the Judiciary.

By Mr. PLUMLEY: Petitions of the Champlain (Vt.) Aerie, No. 793, Fraternal Order of Eagles, and D. M. Jones, of Williamstown, Vt., protesting against national prohibition; to the Committee on the Judiciary.

By Mr. REILLY of Connecticut: Petition of the Washington (D. C.) Central Labor Union, favoring the passage of House bill 12873, relative to taxation in the District of Columbia; to the Committee on the District of Columbia.

Also, petition of the State Business Men's Association of Connecticut, protesting against the repeal of the clause in the Panama Canal bill for free tolls; to the Committee on Interstate and Foreign Commerce.

Also, petition of the State Business Men's Association of Connecticut, protesting against the passage of House bill 3631, relative to appointment of clerks of the courts of the United States; to the Committee on the Judiciary.

By Mr. ROUSE: Petition of 100 citizens of Kentucky, against national prohibition; to the Committee on the Judiciary.

By Mr. SABATH: Memorial of the city council of Chicago, favoring passage of House bill 5139, providing for retirement with pension of civil-service employees after 30 years' service; to the Committee on Reform in the Civil Service.

Also, petition of the National Jewelers' Board of Trade, protesting against amending the Sherman Act and favoring amending the national stamping act; to the Committee on Interstate and Foreign Commerce.

Also, petition of William A. Reichert, of Henderson, Ky., relative to increase in appropriation for reclaiming swamp lands, etc.; to the Committee on Rivers and Harbors.

Also, petition of the Washington (D. C.) Central Labor Union, favoring passage of House bill 12873, relative to taxation in the District of Columbia; to the Committee on the District of Columbia.

Also, petition of the Memphis Cotton Exchange, relative to certain conditions to be inserted in contracts for futures; to the Committee on Agriculture.

By Mr. J. M. C. SMITH: Petition of sundry citizens of Michigan, against national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens of Kalamazoo, Mich., favoring investigation of Pere Marquette Railroad; to the Committee on Interstate and Foreign Commerce.

By Mr. SMITH of Idaho: Petitions of eight business firms of Rieidfield, Idaho, favoring passage of House bill 5308, relative to mail-order houses; to the Committee on Ways and Means.

By Mr. STAFFORD: Memorial of various voters of the fifth congressional district of Wisconsin and Coopers' Union No. 30, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. STEENERSON: Petition of J. S. Wambach, W. H. Diemert, and other citizens of Moorehead, Minn., against national prohibition; to the Committee on the Judiciary.

By Mr. SUTHERLAND: Affidavits to accompany a bill (H. R. 14314) granting a pension to R. Roy Hamby; to the Committee on Pensions.

By Mr. TAYLOR of New York: Petitions of sundry Jewish citizens of the United States, relative to ritual murder in Kief, Russia; to the Committee on the Judiciary.

Also, memorial of the Manufacturers and Business Men's Association, favoring changes in the Federal reserve bill; to the Committee on Banking and Currency.

Also, memorial of the Board of Trade of Tampa, Fla., favoring passage of House bill 8199, for flood control; to the Committee on Rivers and Harbors.

Also, petition of the American National Retail Jewelers' Association, favoring a rigid examination of the Postal Department of the Government; to the Committee on the Post Office and Post Roads.

By Mr. THACHER: Petitions of the Young Men's Christian Association and the New Bedford Ministerial Union, all of New Bedford, Mass., protesting against any change in law relative to Sunday work for post-office employees; to the Committee on the Post Office and Post Roads.

By Mr. WHITE: Petition of Russell French, Herbert A. Terry, Jay Dudley, Charles Geis, A. I. Kappes, F. E. Durant, and 206 other citizens of Zanesville, Ohio, and of Maurice Hartman and 35 other citizens of Duncan Falls, Ohio, against national prohibition; to the Committee on the Judiciary.

By Mr. WHITACRE: Petition of sundry citizens of Ohio against national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens and churches of Ohio, favoring national prohibition; to the Committee on the Judiciary.

By Mr. WILLIS: Petition of M. J. Pfeifer and other citizens of Wyandot and Morrow Counties, Ohio, against House joint resolution 168, relative to national prohibition; to the Committee on the Judiciary.

Also, petition of Berlin Grange, No. 629, of Delaware, Ohio, in favor of House joint resolution 168, relative to national prohibition; to the Committee on the Judiciary.

## HOUSE OF REPRESENTATIVES.

### SATURDAY, *March 7, 1914.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

We bless Thee, our heavenly Father, for the degree of civilization we have attained, especially for the ideal civilization for which we are continually striving; for whatever attainments we have reached as individuals, and for the ideal manhood which is just beyond for which we all long in our better moments; but, above all, for that spirit which is ever leading us toward the higher life in Christ Jesus, illustrated in the life and language of the great Apostle to the Gentiles.

Not as though I had already attained, either were already perfect; but I follow after, if that I may apprehend that for which also I am apprehended of Christ Jesus. Amen.

The Journal of the proceedings of yesterday was read and approved.

#### HYGIENE OF PAINTERS' TRADE.

Mr. BARNHART. Mr. Speaker, I present the following privileged resolution, which I send to the desk and ask to have read.

The Clerk read as follows:

House resolution 389 (H. Rept. 347).

*Resolved*, That the Committee on Printing is hereby authorized and directed to have printed 16,000 copies of House Document No. 1477, Sixty-second Congress, third session, entitled "Hygiene of the Painters' Trade."

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

#### TREATIES, CONVENTIONS, ETC.

Mr. BARNHART. Mr. Speaker, I present also the following privileged Senate concurrent resolution, which I send to the desk and ask to have read.

The Clerk read as follows:

Senate concurrent resolution 11 (H. Rept. 346).

*Resolved by the Senate (the House of Representatives concurring)*, That there be printed for the use of the Senate 1,000 additional copies of Senate Document No. 357, volumes 1 and 2, Sixty-first Congress, and Senate Document No. 1063, Sixty-second Congress, being a compilation of the treaties, conventions, international acts, protocols, and agreements between the United States of America and other powers from 1776 to 1913; and that the superintendent of documents is hereby authorized to order reprinted such copies of the foregoing documents as may be required for sale by his office in accordance with law.

The SPEAKER. The question is on agreeing to the Senate concurrent resolution.

Mr. MANN. Mr. Speaker, will the gentleman yield?

Mr. BARNHART. Yes.

Mr. MANN. I notice that this resolution provides for the printing of 1,000 copies for the use of the Senate. That is a document which is very frequently referred to. Of course this is to bring it down to date?

Mr. BARNHART. Yes.

Mr. MANN. It seems to me that while we are printing these 1,000 copies for the use of the Senate it would be entirely appropriate to print copies for the use of the House.

Mr. FITZGERALD. Otherwise the House would purchase the copies from the Senate and the Senate would get theirs free.

Mr. BARNHART. Mr. Speaker, that is not an uncommon course of procedure.

Mr. FITZGERALD. It should be.

Mr. MANN. I do not remember ever when we have done it before, unless it was particularly a Senate document.

Mr. PAYNE. The first document, I understand, was only for the use of the Senate. I know that I had a great struggle to get hold of a copy.

Mr. MANN. We have printed at least two editions of conventions and treaties. Of course the purpose of reprinting the document at this time is to bring it down to date. A Member of the House consulting a volume of this kind ought to have it down to date. It is not quite so important for us, perhaps, as it is for the Senate, and yet the extra cost of printing while the plates are on the press will not be very great. Has the gentleman any objection to printing copies for the use of the House?

Mr. BARNHART. Mr. Speaker, the Committee on Printing took that into consideration, but inasmuch as there had been no demand, either formally or otherwise, for this document the Committee on Printing did not feel it was within its province to amend the resolution and probably print something for which there was no demand. The chairman of the committee is ready, however, to accept an amendment.

Mr. PAYNE. Mr. Speaker, I had demands for it. In fact I had to give away the copy that I had obtained for myself, because of insistent demands.

Mr. MANN. Mr. Speaker, I move to amend the resolution, if the gentleman will yield the floor for that purpose——

Mr. BARNHART. I yield.

Mr. MANN. By inserting the words "and 1,500 copies for the use of the House."

Mr. BARNHART. Mr. Speaker, I will be very glad to accept that amendment. Does the gentleman think 1,500 copies are enough?

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Line 3, after the word "thousand," insert: "And for the use of the House, 1,500."

The SPEAKER. The question is on agreeing to the amendment.

Mr. BOOHER. Mr. Speaker, if it is not too late, I do not believe 1,500 copies will answer the demand that will be made. This is a very important book, and there is not a law library in any Member's district that will not ask for a copy of it. I think while we are printing them we may as well double the number, and I move to amend the amendment by striking out the words "one thousand five hundred" and inserting in lieu thereof the words "three thousand."

Mr. BARNHART. That is satisfactory to me.

Mr. MANN. I have no objection.

The SPEAKER. The gentleman offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend the amendment by striking out the words "one thousand five hundred" and inserting in lieu thereof the words "three thousand."

The SPEAKER. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The SPEAKER. The question now is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The question now is on agreeing to the resolution as amended.

The resolution was agreed to.

### MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 2876. An act to amend an act entitled "An act to authorize aids to navigation and for other works in the Lighthouse Service, and for other purposes," approved March 4, 1913.

### SENATE BILL REFERRED.

Under clause 2 of Rule XXIV, Senate bill of the following title was taken from the Speaker's table and referred to its appropriate committee, as indicated below:

S. 2876. An act to amend an act entitled "An act to authorize aids to navigation and for other works in the Lighthouse Service, and for other purposes," approved March 4, 1913; to the Committee on Interstate and Foreign Commerce.

### THE PRESIDENT.

Mr. BOWDLE. Mr. Speaker, I desire to prefer a request for unanimous consent. Within the past few days there has appeared in one of the leading journals of the country an excellent appraisal of the most illustrious living Democrat, Mr. Woodrow Wilson, by the most illustrious living Republican, Mr. Taft. I ask unanimous consent that this appraisal be printed in the RECORD. I do this with more than ordinary pleasure, because until very lately the distinguished Republican named was a resident of my own district.

Mr. MANN. That is not an illustrated article?

Mr. BOWDLE. No.

The SPEAKER. From what journal?

Mr. BOWDLE. The article appeared recently in one of the leading journals of the country, the Saturday Evening Post.

Mr. BARNHART. Mr. Speaker, reserving the right to object——

Mr. MANN. I would not object; the President needs it pretty badly now. [Laughter on the Republican side.]

Mr. BARNHART. I am not going to object.

The SPEAKER. The gentleman from Ohio [Mr. BOWDLE] asks unanimous consent to print in the CONGRESSIONAL RECORD an article by President Taft, published in the Philadelphia Evening Post, eulogizing President Wilson. Is there objection?

Mr. J. R. KNOWLAND. Mr. Speaker, reserving the right to object, I would like to ask unanimous consent to print an editorial by Mr. Hearst on the President. [Laughter on the Republican side.]

Mr. FITZGERALD. Mr. Speaker, I object to printing them all. We can not print all the editorials written about the President, both favorable and critical, in the RECORD.

The SPEAKER. To what does the gentleman object, the Hearst editorial or both of them?

Mr. FITZGERALD. I will object to both, so as to show no partiality.

The SPEAKER. The gentleman from New York objects to both.

### PROCEEDINGS OF THE HOUSE.

The SPEAKER. The Speaker asks unanimous consent to address the House for a few minutes, not perhaps to exceed 10. [Applause.]

There was no objection.

The SPEAKER. As a basis for these remarks I will, without objection, direct the Clerk to read the article marked.

There was no objection.

The Clerk read as follows:

"RING" RULES, HE SAYS—ZUEBLIN WANTS A COMMISSION TO GOVERN UNITED STATES—CALLS THE HOUSE UNWIELDY"—SOCIOLOGIST, LECTURING UNDER SUFFRAGE AUSPICES, INTIMATES PRESENT FORM OF GOVERNMENT OBSOLETE—GROWS SARCASTIC ABOUT SOUTHERN CHIVALRY—SPEAKS AT ALEXANDER GRAHAM BELL'S.

Application of commission and manager forms of government to States and even of the Nation was advocated last night by Charles Zueblin, former professor of sociology at the University of Chicago. His address on "Man and Woman" was delivered before a gathering of 100 men and women at the residence of Dr. and Mrs. Alexander Graham Bell, under the auspices of the Congressional Union. In the audience were many women prominent in social circles.

"The House of Representatives," he said, "is too unwieldy to accomplish anything, and will never grow less so. The situation is such that any majority member must go to Representative UNDERWOOD or Speaker CLARK to find out what he himself thinks.

MUST SIMPLIFY, HE DECLARES.

"You who live under the shadow of this thing have got to know more about its workings," he continued. "All who believe in the right of either men or women to vote should recognize their obligation to look into it. The system must be simplified."

As an instance of control by the minority Dr. Zueblin cited the vote in the House on the report of the Mulhall investigation, asserting that the Speaker announced the number voting for a roll call was 23, whereas 50 men, he said, have signed a statement that they rose to their feet. "I am not blaming all this on the Speaker," said Mr. Zueblin. "He is only one of the ring up there.

"We should have a twentieth century Government, based on twentieth century conditions, not a fabric created by Alexander Hamilton."

RAPS SOUTHERN "CHIVALRY."

Chivalry, Mr. Zueblin described as "a circumlocution to gratify masculine egotism," whatever may be the ideas of large southern statesmen. "Women of the South," he declared, "have had a difficult time getting ordinary civic improvements from the men who prate to them of chivalry."

The SPEAKER. In what I shall say about this matter I propose to use parliamentary language. [Laughter.] Unparliamentary words never yet added force to any statement. I am now serving my twentieth year in the House, and never yet rose to a question of personal privilege and would not do so now if it were simply a personal question involved, but the words of Prof. Zueblin, of Winchester, Mass., as reported in the Washington Post, go far beyond that. I have been lied about so much that I have grown used to it. His words are not only a foul and malicious slander on me, but involve the integrity of the proceed-

lngs of the House—a much more important matter—as well as the courage, intelligence, patriotism, vigilance, and fidelity of at least 165 Members, for that many were here in the Hall by actual count. This is too serious a thing to permit to go unchallenged, for some people believe everything they see in the newspapers. What this man wanted his hearers to believe, though he did not say so in so many words, is this: That on the demand by Mr. MACDONALD, of Michigan, for the yeas and nays, on the motion of Mr. GARRETT of Tennessee, to refer the matter to the Committee on the Judiciary, 50 Members rose in the affirmative and that I reported only 23, and that 165 Members sat here dumb and made no protest against my action. It is absolutely unthinkable that any Speaker would do such a brazen, outrageous, and corrupt thing, and it is equally incredible if any Speaker should be so unworthy of his high responsibility as to do such a thing that 165 Members should be so forgetful of their duty to themselves, their constituents, their country, and the cause of representative government as to sit mute and motionless. All any Member had to do to expose such a performance on my part, if there had been any such performance, was either to raise the point of no quorum, which would have been well taken, because there were only 165 Members present, while it takes 218 to constitute a quorum, or any Member could have demanded tellers. Now, here is what happened on the point involved.

The committee, of which Mr. GARRETT of Tennessee was chairman, to investigate these Mulhall charges brought a report in and it was read. They made no recommendation. They did not think, under the resolution which authorized that inquiry, that they had authority to do it; neither do I. The gentleman from Michigan [Mr. MACDONALD] made a minority report, and wound up by offering two resolutions. The gentleman from Tennessee [Mr. GARRETT] moved to refer his resolutions to the Committee on the Judiciary, and after a good deal of wrangling about parliamentary points one way and the other the gentleman from Tennessee moved the previous question; and on a division there were 129 ayes and 36 noes. Nobody raised the point of no quorum. Any Member could have done so, and thereby forced a roll call. Nobody asked for tellers. Then the yeas and nays were demanded on the previous question. There were 22 ayes and 129 noes. On the previous vote it took 33 to order the yeas and nays. Nobody raised the point of no quorum on that; nobody asked for tellers. On the first vote the noes were 36, and on this other vote it had fallen off to 22. Everybody who has been here much knows that men frequently vote against a thing, but they are not willing to waste time to have the yeas and nays, and will not vote for the yeas and nays when opposition is hopeless. Now, they had two chances to test my count on that and two chances on the other. That is, when the motion to refer was voted on the ayes were 133 and the noes were 34. I had declared that vote before the gentleman from Michigan rose, but nevertheless and notwithstanding I recognized him, in spite of the fact that the point of order was made against it; and then he got 23 votes. There were two opportunities to demand the yeas and nays and two opportunities to demand tellers, and the truth is that if the Chair had not helped the gentleman from Michigan [Mr. MACDONALD] out at least twice that day, and stretched the rules, because he was a congressional freshman and was not supposed to know much about them, he would not have gotten in at all on divisions.

Here is what happened:

THE SPEAKER. The gentleman from Michigan asks for a division. Those in favor of referring these resolutions, and so forth, to the Committee on the Judiciary will rise and stand until they are counted. [After counting.] One hundred and thirty-three gentlemen have arisen in the affirmative. Those opposed will rise and stand until they are counted. [After counting.] Thirty-four gentlemen have arisen in the negative. On this question the ayes are 133 and the noes are 34.

He could have made a point of no quorum, if he had wanted to do so. I will quote further:

Mr. MACDONALD. Mr. Speaker, I demand the yeas and nays.
SEVERAL MEMBERS. Too late!
Mr. MANN. Oh, no; the gentleman demanded the yeas and nays in time.
THE SPEAKER. The gentleman from Michigan [Mr. MACDONALD] demands the yeas and nays.

So the Speaker ruled in his favor. Technically, the rule barred him out. Further:

THE SPEAKER. The gentleman from Michigan [Mr. MACDONALD] demands the yeas and nays. Those in favor of taking the vote by yeas and nays will rise and stand until they are counted. [After counting.] Twenty-three gentlemen have arisen in the affirmative—not a sufficient number—and the resolutions, and so forth, are referred to the Committee on the Judiciary.
Mr. MACDONALD. Mr. Speaker, I make the point of order that there is no quorum present.

It was too late on that vote. The gentleman from Alabama [Mr. UNDERWOOD] moved to adjourn, which motion was agreed to. Now, there are a good many men who have been here a long time, and they could tell instantly whether 50 men were standing up or whether 23 were standing up. They would not have to count. They might not know there were exactly 50, but they would know that there were more than 23.

The custom of the Chair is, if there is a very large vote on each side, to count by fives, and in the shuffling around that takes place in the House, if there is anything like a full vote, it would not be anything strange if he was out of plumb 5 or 6, or even 10, votes. But when a few gentlemen stand up and try to get the yeas and nays, or do anything else which they have a right to do, the Chair counts with the greatest accuracy possible.

This man declares that he is in favor of a commission form of government. Evidently what he is trying to do, and men like him, is to bring into disrepute and disrespect every man of prominence under this system of Government, and to make the country believe that all of the officers of the Government and men in Congress are a lot of crooks. I thought it was my duty to bring this matter up in order to give him a contradiction, not so much because it affects me as that it brings the representative system of government into disrepute; and when you think of the number of people who swallow everything that they hear or read that is bad about a public man—it does not make any difference whether he is a Democrat or a Republican or a Progressive—it is a matter of grave concern whether we shall let such slanders go on uncontradicted.

I have been nominated twice unanimously for minority leader and twice unanimously, in a Democratic caucus, for Speaker, a record no other man living or dead ever had. I have been elected Speaker of this House twice by the unanimous vote of the Democrats and with the personal good will of every Republican and Progressive in the House. [Applause.] Facts of which I am naturally proud. I am willing to put those facts over against any mountebank slanderer roaming around over the land. [Applause.] He says there is some sort of a ring up here. I would like to see it. Now, if there was a wrong committed when the aforementioned proceeding was had, I will tell you some of the men it would take in. It would take in myself as Speaker; the gentleman from Alabama [Mr. UNDERWOOD], the very able majority leader; the gentleman from Illinois [Mr. MANN], the distinguished Republican leader; and the enthusiastic leader of the Progressives, the gentleman from Kansas [Mr. MURDOCK], because he was here consenting.

If there is any ring up here, I do not know. This man says a Democrat can not vote unless he comes to the gentleman from Alabama [Mr. UNDERWOOD] or myself and asks how to vote. Each one of us has entered on his twentieth year here. It would be a strange and unfortunate thing if the Speaker of the House and the majority leader, after being here for going on 20 years, would not have some influence in the House. Why, once in a long while somebody will come along and say, "How ought I to vote on this question?" And sometimes I know and sometimes I do not. If I know, I tell him what I think; and if I do not know, I tell him that I do not know, for I have not studied it. I have not consulted the gentleman from Alabama [Mr. UNDERWOOD] about it, but I have no doubt he acts in the same way, and that the gentleman from Illinois acts in the same way, as well as the gentleman from Kansas. The gentleman from New York [Mr. PAYNE], or any other of the old Members here, or even some of the new Members, may know more than some others. Sometimes the new ones do. Anyhow, they have the courage of inexperience. [Laughter and applause.]

Mr. MACDONALD. Mr. Speaker, in view of what the Speaker has said, and since I was the proponent of the resolution at that time, I think perhaps I ought to say that neither at the time nor after the vote was taken, or at any other time, have I ever said or believed that there was any question in the count on the demand for the roll call. I heard it questioned at that time, and stated my opinion, and have stated it since, to the effect that I had no doubt the count was correct. [Applause.] And I stated so at the very time to the gentleman from Kansas [Mr. MURDOCK], when we discussed the matter after leaving the floor following the adjournment.

I think that is all I need to say in regard to my connection with this matter at present, but I would like to say that there are some criticisms of a general nature in regard to this whole transaction that I expect to take opportunity to make when the matter comes up properly in the House again, but nothing concerning anything in regard to the count or this action of the Speaker. [Applause.]

Mr. MANN. Mr. Speaker, I ask for five minutes.

The SPEAKER. The gentleman from Illinois asks unanimous consent to proceed for five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. MANN. Mr. Speaker, I remember the incident very well. It is not an uncommon habit for many Members of the House to count those who are standing upon a standing vote, especially when there is not a large number and the count is easily made. I counted those who rose in favor of asking for a roll call on that day, and I know a number of other gentlemen who counted, including some of the gentlemen who rose, who have told me that they made the count at the time, and that their count agreed with the count of the Speaker, as mine did. [Applause.]

But, Mr. Speaker, it would be an error which ought not to be permitted to go forth for the people to believe that the Speaker has the power to defraud the House by a wrong count. If there had been 50 gentlemen who rose at that time, it would have been an easy matter to have asked for tellers on that proposition, and thus take the count out of the hands of the Speaker and place it in the hands of two gentlemen representing each side of the proposition. We frequently resort to tellers, not because we doubt the count of the Speaker or of the Chair, but because we wish to have gentlemen pass between the tellers so everyone can see them, and give those who do not happen to be in the Hall when the first vote was taken on a division an opportunity of voting.

It is undoubtedly true that many persons throughout the country believe that at least in some of the State legislatures the speaker exercises the gavel to do what they call "gaveling things through" regardless of the vote. I have served in this House now for quite a number of years, and I never yet have seen any Speaker attempt to override the House by the exercise of autocratic power in refusing a fair count or a fair vote. In many places, especially in conventions outside or congresses outside of legislative bodies, people take advantage of certain situations to declare that the demand for a division or the demand for a roll call comes too late. That is seldom exercised in the House of Representatives. Here the Speaker attempts to preserve the rights of every Member to have an actual count of the real vote, and no Speaker would be permitted to remain as Speaker 48 hours who attempted to defraud the House of its right to a square vote upon a proposition. [Applause.]

I have had many political contests with the Speaker, many battles over political propositions, over economic suggestions, over bills pending before the House, but on this, his sixty-fourth birthday, I am proud—— [At this point there was, first, general applause, and then all the Members of the House rose and cheered.] I am proud to be able to say that no man has the right to question his honor, to doubt his integrity, or to disbelieve in his fairness as Speaker. [Renewed applause.]

Mr. BUTLER. Mr. Speaker, I ask unanimous consent to be heard for a couple of minutes.

Mr. MADDEN. Mr. Speaker, I would like to have a minute or two.

The SPEAKER. The gentleman from Pennsylvania [Mr. BUTLER] asks unanimous consent for two minutes. Is there objection?

There was no objection.

Mr. BUTLER. Mr. Speaker, it is one of the pleasures of my life to be able to admit in this public place that I have served in this House with its present Speaker almost 18 years, and during all that time, while he has been criticized on our side for his partisanship, no man has ever doubted his integrity and his fairness. [Applause.]

Mr. Speaker, I recall the incident you refer to. It is in my mind clearly, because of some criticism that has been made publicly of the count of the vote made that day. I sat at this corner of the Chamber, along with the gentleman from Illinois [Mr. MADDEN] and two or three others. Before the vote was announced you demanded that those who were in favor of the yeas and nays should rise and stand until they were counted. We counted together, and did not make the count as large as the Speaker made it.

It is not necessary for anyone to offer any evidence of any kind to sustain the honor and the integrity of this Speaker, but inasmuch as the incident is fresh in my mind, and because I desire to see justice done a good man, I presume to offer this testimony. [Applause.]

Mr. MADDEN. Mr. Speaker——

The SPEAKER. The gentleman from Illinois [Mr. MADDEN] asks unanimous consent for two minutes. Is there objection?

There was no objection.

Mr. MADDEN. I take great pleasure, Mr. Speaker, in testifying that I was here on the day referred to; that I counted the men who rose in response to the request of the Speaker; and that there were only 23 men who rose in their places.

No man in the history of my experience has proved himself more worthy of the confidence of the men associated with him than has the distinguished man who presides over this body. [Applause.] He is always clean and honest and fair; and no man living could induce him to do a wrong thing. [Applause.]

If this man Zueblin has the names of 27 men who rose in their places, in addition to the 23 who actually did rise, I would like to know who they are and where they are. I do not believe he has them; but if he has, he ought to publish them for the information of the House and of the country, because I do not believe that any man who did not rise in his place has the right to say he did. Every man ought to have the courage of his convictions, and I believe every man here has. Every man here should be willing to go on record, and I feel sure that the membership of the House never hesitated to do so when the public interest demands it. I am proud to be able to certify to the truth of every word spoken by the Speaker of the House, and I am glad to know that every man here, regardless of political affiliations, believes in his integrity and has confidence in him, as the people of the Nation have and ought to have. [Applause.]

Mr. MURDOCK. Mr. Speaker——

The SPEAKER. The gentleman from Kansas asks unanimous consent for two minutes. Is there objection? The Chair hears none.

Mr. MURDOCK. I did not ask for two minutes, but I will use the two. I do not know Zueblin, but I was intensely interested in the scene about which this controversy has arisen. My recollection is—and I do not claim to be letter perfect upon it—that Mr. MACDONALD, from Michigan, had offered two privileged resolutions; that against those resolutions the gentleman from Tennessee [Mr. GARRETT] made the point of order; that Mr. MACDONALD talked for five minutes; that the gentleman from Tennessee [Mr. GARRETT] then began a discussion on the point of order, did not continue it very long, and then made a motion to refer those resolutions to the Committee on the Judiciary. I am frank to confess that I did not believe at the time that the gentleman from Tennessee [Mr. GARRETT] had the right to the floor to make that motion. I believed that after the point of order was disposed of the floor reverted to the gentleman from Michigan. However, whether that be true or not, the vote came upon the proposition to refer those resolutions. I was very anxious for a roll call, and so far as I know the parliamentary rules of the House—and I do not know them exceptionally well—I would have exhausted every measure on earth to get a roll call. When the Speaker put the proposition of those in favor and those against I watched. I did not count, but my impression was that there were 23, 25, 26, or maybe 28 men on their feet. The RECORD shows that the Speaker counted 23, and there is no question in my mind at all that that is the exact number who arose. [Applause.]

I do not agree with everything that has been said here this morning, and I hope my two minutes have not gone. I do not think the count always has been square in this House. I have watched a former Speaker of this House, as virtually 100 Members here this morning have watched him in the old days, and he used to count this House by blocks, with the gavel in his left hand, swinging it this way. It is an absolute impossibility for a man to count in that fashion. He may make a very close estimate.

Mr. FITZGERALD. Was that the case except on a division? Was not the Speaker to whom the gentleman refers always as careful and particular in counting those rising to obtain the yeas and nays as any other Speaker?

Mr. MURDOCK. Well, I will say I did not distinguish as to that. That may be true, but the gentleman will remember the famous gesture of the former Speaker in counting by blocks.

Mr. FITZGERALD. Anyone who ever occupied the chair knows that the occupant of the chair never makes an attempt to count on an ordinary division with the particularity that is necessary in counting on a demand for the yeas and nays.

Mr. MURDOCK. I suppose that is true; but now——

Mr. FITZGERALD. I am making this statement so that no injustice will be done to any Speaker, so that no one will have the slightest suspicion as to the integrity of the proceedings in this House under any Speaker.

Mr. MURDOCK. I have undoubtedly seen miscounts, even at the time the gentleman refers to. When the present Speaker came to the chair I was anxious to see if he would continue that practice. As a matter of fact, he did not. He did not continue the old practice of counting by blocks, even on the minor matters, but he has been very careful——

Mr. SHERLEY. Will the gentleman yield?

Mr. MURDOCK. Let me complete this statement and then I will. He has been very careful on every occasion to count each individual Member. I think that is the way it should be done, and I honor him for it, and I think he counted correctly when

he counted 23 on that day. Now, I will yield to the gentleman from Kentucky.

Mr. SHERLEY. Does the gentleman ever recall an instance in his service in this House where there was an incorrect count for the purpose of affecting or that did affect the actual results? I think that is a matter of high importance to this House. I have served here 11 years and I have never seen such an instance.

Mr. MURDOCK. Well, I do not now recall a specific instance. I will say to the gentleman that I saw one thing much more serious than that. I saw the inclusion of a man's name in a roll call when he was not present either in the Chamber or in the House.

Mr. SHERLEY. Did the gentleman call attention to it?

Mr. MURDOCK. The gentleman from Minnesota [Mr. STEENERSON], I think, did on the following morning.

Mr. SHERLEY. Was it corrected?

Mr. MURDOCK. Yes; I think it was corrected. My recollection is that it was.

Mr. SHERLEY. Well, then, what is the gentleman's point?

Mr. MURDOCK. While I can not give the gentleman specific instances of a miscount, the gentleman will not stand here and say to me that in former Congresses there was always a square count.

Mr. SHERLEY. I have never——

Mr. MURDOCK. Will the gentleman say that?

Mr. SHERLEY. I will say this: I do not believe there has ever been a miscount that affected the result.

Mr. GARNER. Mr. Speaker, I call for the regular order. I do not believe any good can come by continuing this joint debate.

Mr. SHERLEY. I want to answer the question the gentleman is asking. I have never seen a decision in regard to a count made either by a Speaker of the House or a Chairman of the Committee of the Whole that I thought was erroneous in the sense of affecting in any degree the result. Everybody knows——

Mr. MURDOCK. If there was, the remedy was in the Member, who could always call for tellers.

Mr. SHERLEY. Why, of course. But what is more important is that there should not go out as the result of the remark of the gentleman from Kansas the inference that there has been unfairness in counts here. [Applause.] I have too much respect for my place and for the dignity of the House of Representatives to sit silent and allow even an inference of that kind.

Mr. MURDOCK. Oh, I know; but that does not alter the proposition that there have been miscounts.

Mr. SHERLEY. The gentleman ought to qualify a statement of that kind——

Mr. MURDOCK. I will qualify it by saying that if there is a miscount the remedy lies with the Member to call for tellers.

The SPEAKER. The time of the gentleman from Kansas has expired.

Mr. MANN. Mr. Speaker, I ask for one minute.

The SPEAKER. Is there objection?

There was no objection.

Mr. MANN. Mr. Speaker, my friend from Kansas [Mr. MURDOCK] is so obsessed with the idea of trying to throw odium upon former Speaker Cannon that he is never at himself when he is discussing any subject relating to the former Speaker. If my friend from Kansas ever gets to occupy the chair, which seems unlikely [laughter], he will discover what everybody knows who has ever occupied the chair, that it is easier and safer to count 250 members in blocks than it is to endeavor to count them individually. Almost every chairman, in counting a large number of men, will count very much after the fashion that former Speaker Cannon used, although he may not use the same gesture. There is always a remedy for a miscount, if any should occur. No one pretends that any Speaker can count 250 Members standing on the floor and tell accurately whether there is 248 or 252. There is a remedy under the rule for a miscount, and there never was a miscount while Mr. Cannon was Speaker. [Applause.]

Mr. LLOYD. Mr. Speaker, I would like to address the House for one minute.

The SPEAKER. The gentleman from Missouri asks unanimous consent to address the House for one minute. Is there objection?

There was no objection.

Mr. LLOYD. Mr. Speaker, everybody in this House, of the older Members, knows that I have never agreed in a partisan, political way with the previous Speakers. No one here questions the integrity and fairness of the present Speaker. I have served under Speaker Reed, Speaker Henderson, and Speaker Cannon, and I do not hesitate to say that I have not the slightest doubt of the absolute integrity of all three of these men in reference to the counting of votes. [Applause.]

## AGRICULTURAL APPROPRIATION BILL.

Mr. LEVER. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 13679, the Agricultural appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. HAMLIN in the chair.

The CHAIRMAN. When the committee arose last night there was a point of order pending to the paragraph on page 8.

Mr. FOWLER. Mr. Chairman, I withdraw the point of order.

The CHAIRMAN. The gentleman from Illinois withdraws the point of order, and the Clerk will read.

The Clerk read as follows:

General expenses, Bureau of Animal Industry: For carrying out the provisions of the act approved May 29, 1884, establishing a Bureau of Animal Industry, and the provisions of the act approved March 3, 1891, providing for the safe transport and humane treatment of export cattle from the United States to foreign countries, and for other purposes; the act approved August 30, 1890, providing for the importation of animals into the United States, and for other purposes; and the provisions of the act of May 9, 1902, extending the inspection of meats to process butter, and providing for the inspection of factories, marking of packages, etc.; and the provisions of the act approved February 2, 1903, to enable the Secretary of Agriculture to more effectually suppress and prevent the spread of contagious and infectious diseases of live stock, and for other purposes; and also the provisions of the act approved March 3, 1905, to enable the Secretary of Agriculture to establish and maintain quarantine districts, to permit and regulate the movement of cattle and other live stock therefrom, and for other purposes: *Provided*, That hereafter all the provisions of the said act approved March 3, 1905, shall apply to any railroad company or other common carrier whose road or line forms any part of a route over which cattle or other live stock are transported in the course of shipment from any quarantined State or Territory or the District of Columbia, or from the quarantined portion of any State or Territory or the District of Columbia, into any other State or Territory or the District of Columbia; and for carrying out the provisions of the act of June 29, 1906, entitled "An act to prevent cruelty to animals while in transit by railroad or other means of transportation"; and for carrying out the provisions of the act approved March 4, 1913, regulating the preparation, sale, barter, exchange, or shipment of any virus, serum, toxin, or analogous products manufactured in the United States, and the importation of such products intended for use in the treatment of domestic animals; and to enable the Secretary of Agriculture to collect and disseminate information concerning live-stock, dairy, and other animal products; to prepare and disseminate reports on animal industry; to employ and pay from the appropriation herein made as many persons in the city of Washington or elsewhere as he may deem necessary; to purchase in the open market samples of all tuberculin, serums, antitoxins, or analogous products, of foreign or domestic manufacture, which are sold in the United States, for the detection, prevention, treatment, or cure of diseases of domestic animals, to test the same, and to disseminate the results of said tests in such manner as he may deem best; to purchase and destroy diseased or exposed animals or quarantine the same whenever in his judgment essential to prevent the spread of pleuropneumonia, tuberculosis, or other diseases of animals from one State to another, as follows:

Mr. STAFFORD. Mr. Chairman, I reserve a point of order. I notice in reading the bill that you are carrying in this provision much the same phraseology as was carried last year, and which in that act was made permanent law. I want to direct my query as to the reason for carrying it in this bill when in last year's bill a considerable portion was made permanent law.

Mr. LEVER. I will say to the gentleman from Wisconsin that there is absolutely no change in the phraseology of this paragraph relating to the Bureau of Animal Industry, except what may be found on page 10, lines 9 to 15. This is the language of the act of Congress which we passed last year permitting the inspection of virus and serums and the like of that. It has been the custom in the general-expense items to call attention briefly to the statutes without setting them out in full.

Mr. STAFFORD. Last year's appropriation act was made permanent law by providing that hereafter, and so forth, and you incorporate the same phraseology in the bill this year.

Mr. LEVER. Exactly, that has been done ever since I have been connected with the Agriculture Committee, simply to call attention to the acts which are to be enforced. There is absolutely no change in the phraseology.

Mr. STAFFORD. It is all permanent law, but the purpose is to direct attention as a basis for the following appropriations?

Mr. LEVER. Exactly.

Mr. STAFFORD. Mr. Chairman, I withdraw the reservation of the point of order.

Mr. COX. Mr. Chairman, I renew the point of order. I want to call the gentleman's attention to the language on the top of page 11, "to purchase and destroy diseased or exposed animals." To what extent does the department indulge in that line of work?

Mr. LEVER. Only once in my experience of 10 years on the committee has the department undertaken to destroy and pay for condemned animals, and then they did it under a

special appropriation made by Congress at the recommendation of the committee, because of the outbreak of the foot-and-mouth disease six or eight years ago. But I will say to the gentleman they would have the authority in an emergency that was great enough, in order to prevent the spread of any contagious or infectious animal disease, to purchase stock and condemn it and pay for it, if they had the appropriation.

Mr. COX. Of what benefit or use or value are these animals? Why pay for them if they are diseased or have been exposed to disease?

Mr. LEVER. The gentleman understands that this language he is referring to is under a permanent statute enacted in another Congress. I think the theory is that in case of an outbreak of the foot-and-mouth disease, for instance, in cattle, which might spread very rapidly and involve the property in the different States, it would not be fair to expect the unfortunate owner to lose the whole value of the cattle in which the foot-and-mouth disease occurred. I think in those cases the State paid half and the Federal Government paid half on an assessed three-quarters value of the animal.

Mr. COX. Does the gentleman believe that it is fair for the people of the United States to pay any part for any animal that is afflicted with this disease that is incurable?

Mr. LEVER. Undoubtedly I do.

Mr. COX. I beg to differ with the gentleman.

Mr. LEVER. Take the outbreak of dourine in horses.

Mr. COX. What is a horse afflicted with that disease worth?

Mr. LEVER. A horse with that disease is worth nothing for general purposes except for a certain length of time. He is valuable for six or eight years, but ultimately he becomes a worthless animal. He might be the means of spreading the disease from his State into other States. It was not thought right to take that horse, which might be useful for six or eight years, away from the man who owned him in Iowa to protect the people of South Carolina against the infected animal, kill the animal, and make the owner bear the whole burden entirely.

Mr. COX. I think he should bear the burden. I think it is wrong to tax the people for animals that are suffering with an incurable disease. I can not agree with that kind of legislation. I know that it is a permanent statute and the gentleman and the committee are not to blame.

Mr. LEVER. I can say emphatically that the department since I have been connected with the committee has never exercised the right except when it has come to Congress for specific appropriation.

Mr. COX. Does the gentleman know how much the department has expended for this purpose?

Mr. LEVER. I think the appropriation for the foot-and-mouth disease is half a million dollars.

Mr. COX. Five hundred thousand dollars paid out for the destruction of animals admittedly suffering with an incurable disease.

Mr. LEVER. But it might have been the means of infecting every animal in the country.

Mr. COX. Is there not a criminal statute that makes the owners of those animals liable if they sell them?

Mr. LEVER. There is a quarantine law against that; yes.

Mr. COX. And they are criminally liable if they violate it?

Mr. LEVER. I think so.

Mr. COX. Why not prosecute the fellow who would undertake to violate the statute?

Mr. LEVER. It is not a question of criminal prosecution, it is a question of equity; that is to say, must the individual bear the entire burden incident to the enforcement of a Federal statute for the protection of the entire public? I think not.

Mr. COX. I think it is a question of obeying the law and not compelling people to buy peace at public expense. I withdraw the point of order.

Mr. LEVER. I do not think the item is subject to a point of order, anyway.

Mr. McLAUGHLIN. Mr. Chairman, I reserve the point of order. It seems to me that an appropriation of money to destroy diseased animals is improper, and any provision that would appropriate money for paying the value of diseased animals is subject to a point of order unless the animals are destroyed for the purpose of preventing the spread of disease with which human beings may be affected. Under the general law, or under the law under which appropriations for this kind of work are made, it is expressly provided that no payment shall be made for animals destroyed unless they are destroyed to prevent human beings being infected with the disease from which animals are suffering. In the last Congress, to be specific, gentlemen representing near-by districts in the State of Virginia came before the committee and told its members of serious diseases affecting the cattle of their districts, cattle which furnished the milk supply for the city of Washington, and they stated that it had been found necessary to destroy some of those animals and wished an appropriation made to reimburse the owners of the animals so destroyed. The committee refused to make that appropriation because the law does not permit it, the law permitting appropriations only to pay the value of animals destroyed to prevent the spread of disease among human beings. It would seem to me that this provision, which heretofore has escaped my attention, would accomplish just what the Representatives from the State of Virginia wished to accomplish when they asked us to incorporate in the bill a year ago a provision to pay for cows in their district because they were affected with tuberculosis.

Mr. STAFFORD. Mr. Chairman, will the gentleman yield?

Mr. McLAUGHLIN. Yes.

Mr. STAFFORD. Will the gentleman indicate to the committee in what part of the bill those words are to be found?

Mr. McLAUGHLIN. Page 11, line 2:

To purchase and destroy diseased or exposed animals or quarantine the same whenever in his judgment essential to prevent the spread of pleuropneumonia, tuberculosis, or other diseases of animals from one State to another.

Mr. STAFFORD. Do I understand the gentleman contends there is no authorization in existing law for that appropriation?

Mr. McLAUGHLIN. That is my impression, and I made the point of order with the idea of directing the attention of the committee to those words, having in mind that if they are permitted to become law it will permit the use of money in an improper way—in a way not justified by law.

Mr. LEVER. Mr. Chairman, the Bureau of Animal Industry was established not only for the purpose of studying the diseases of animals, but for the prevention of the spread of the diseases of animals. Section 2 of the act of May 29, 1884, establishing the Bureau of Animal Industry, contains the following language:

That the Commissioner of Agriculture is authorized to appoint two competent agents, who shall be practical stock raisers and experienced business men, to examine and report upon the best methods of treating, transporting, and caring for animals, and the means to be adopted for the suppression and extirpation of contagious pleuropneumonia, and to provide against the spread of other dangerous, contagious, infectious, and communicable diseases.

That section sets out also the salaries of these agents of the department. I think under that language—"and the means to be adopted for the suppression and extirpation of contagious pleuropneumonia, and to provide against the spread of other dangerous, contagious, infectious, and communicable diseases"—the Secretary of Agriculture has the right to employ such means for the prevention of the spread of these diseases as he may see fit to do. The Chair will notice that that language is as broad as English can make it, and it is only a question of finding means to carry out the intent of the law.

Mr. BOOHER. Mr. Chairman, have we ever carried such a provision in the bill before as that beginning on line 2, page 11?

Mr. LEVER. The provision has been carried in the bill for a number of years.

Mr. BOOHER. Permitting the Secretary of Agriculture to purchase and destroy cattle?

Mr. LEVER. Yes. There is absolutely no change in this.

Mr. BOOHER. Do I understand that the gentleman is in favor of that provision?

Mr. LEVER. I am, undoubtedly, and for the reason I suggested to the gentleman from Indiana [Mr. COX]. Take the gentleman's own farm, for instance. The foot-and-mouth disease breaks out on his farm, we will say. It is a very dangerous disease, and it rapidly kills his stock. His stock is worth nothing to him after they are dead, but here are his neighbors' stock, and the gentleman's stock is liable to contaminate their stock. Here is the neighboring State of Kansas and my State of South Carolina. It is not quite fair that the gentleman who has been so unfortunate as to have his cattle contract this dangerous disease, which threatens the entire cattle industry of the country and in which every man in the country is interested, should bear the entire burden of the act of the law, which compels him to kill this stock to keep the disease from spreading.

Mr. BOOHER. But the gentleman does not take this into consideration. We can only do this to prevent the spread of the disease from one State to another. Is not that right?

Mr. LEVER. Oh, no.

Mr. BOOHER. Yes; it is.

Mr. LEVER. I presume as a general legal proposition that is true, but they always have a cooperative arrangement with the State.

Mr. BOOHER. That is the trouble with the whole matter. They always have an arrangement by which they do certain things, but unless the animal is to be transported from one State to another and is liable to communicate disease to the animals of another State the department can not act, and the gentleman's argument is destroyed.

Now, take glanders, for instance. You have a provision in this bill for the first time concerning glanders, a disease of horses. I do not think there is a State in the Union but what has a law against the disease of glanders in horses. Take my own State. If a neighbor of mine has a horse that is thought to have the glanders and we can not agree upon it, we call the State veterinarian to come there and examine the stock. He examines it, and if the veterinarian determines that the animals are diseased and that others are exposed to it, he calls it to the attention of the county court, and they appoint three men whose duty it is to go to the farm and examine the stock and to bring a report back to the court, with an appraisement of the value of the stock. The animals are destroyed, and the State pays for it, just exactly what the State ought to do in this case, instead of putting the burden upon the people of the whole country. To prevent the spread of pleuropneumonia in your State you put a burden upon all the people instead of putting it upon the people of the State, where it properly belongs.

Mr. LEVER. I disagree with the gentleman.

Mr. BOOHER. Take the question of dourine, which we had up here before. There is no doubt but what it is a bad disease, and there is no doubt but what it is a disease that ought to be controlled. What are the States where this disease prevails doing to control it? Anything? Not a thing.

Mr. LEVER. Undoubtedly they are doing a great deal.

Mr. JACOWAY. Will the gentleman yield for a question?

Mr. BOOHER. Yes.

Mr. JACOWAY. Suppose a State is unable to cope with this disease, which is communicable. Does not the gentleman think the Federal Government ought to do something in order to prevent the spread of that disease to the other States?

Mr. BOOHER. If the gentleman has a law giving the control and defining the power and right of the Federal Government, not putting into the hand of some inspector to go out and tell what shall be done, it would be all right; but you have no regulation touching this at all, and under this provision they go into the State and inspect animals that are never intended to be exported from one State to another, and if found to be diseased purchase and destroy them. They are doing a thing within the jurisdiction of the State, and if they are to be destroyed because they have the disease in the State it ought to be a State law and a State regulation, and not at the expense of the General Government. Now, take the question of dourine in horses. There is no doubt, as I said before, but what it is a very dangerous disease; but what is the appropriation of $100,000 made the other day for and what was the argument? Why, that you wanted to examine the blood of those animals to ascertain whether the animal was diseased or not. There is not a State in this Union but what has a State chemist, who could examine the blood just as well at home and determine that fact, and not send an expert down there who does not know any more than they do.

Mr. NORTON. Will the gentleman yield?

Mr. BOOHER. I will.

Mr. NORTON. In making that statement in reference to these for which an appropriation of $100,000 was made a few days ago, the gentleman is very much mistaken. There is no chemist in any State to make that investigation to determine whether that disease exists in the blood of the horse or not.

Mr. BOOHER. I want to say I will have to differ with the gentleman. There are States that have got chemists who can do it. If you have chemists in your own State, I have no doubt it is true of the gentleman's State. If they can not, you have not got any chemist at all.

Mr. NORTON. The gentleman is in error.

Mr. BOOHER. Why not let the State determine it? Then, after they have determined that the disease exists and they can not control it, then let them call upon the General Government for an appropriation, and not leave it to a bureau, just as this intends to leave it. Then you will know exactly what you are going to do and what you are going to spend. I will tell you where this thing sprang from and where it is going to, and you can see no end to it. You began with an appropriation for eradicating the cattle ticks in Texas. There is where the whole thing started from, and it is going on——

Mr. LEVER. I will say to my friend this provision was in the bill long, long before we appropriated anything for the cattle tick.

Mr. BOOHER. Oh, no——

Mr. LEVER. The gentleman is mistaken.

Mr. BOOHER. Let us see what this item says:

To purchase and destroy diseased or exposed animals or quarantine the same whenever in his judgment essential to prevent the spread of pleuropneumonia, tuberculosis, or other diseases of animals from one State to another.

Now, the chairman of the committee argues that the Agricultural Department has got the right to go into a State and examine the animals and if they find they are suffering from this disease, they have the right to destroy them and the Government pay for them whether they are intended to be exported out of the State or not.

Mr. LEVER. In cooperation with the State.

Mr. BOOHER. When did a State ever appropriate a single dollar to cooperate with the Government in this kind of work?

Mr. LEVER. I will state to the gentleman that the States of the South are appropriating hundreds of thousands of dollars to cooperate in the eradication of the cattle tick. My own legislature, at the request of farmers from all over the State, appropriated $30,000 to do that work.

I went before the legislature of the State, the joint assembly, during the last month and made a speech, and they appropriated $30,000 for that work.

Mr. HAUGEN. Mr. Chairman——

The CHAIRMAN. Does the gentleman from South Carolina yield to the gentleman from Iowa?

Mr. LEVER. Massachusetts has appropriated several hundred thousand dollars, as I understand it—and I have it here somewhere—to help the Federal Government in the eradication of the gypsy moth and the brown-tailed moth. The State of Pennsylvania has appropriated a large sum of money, or did, to help in the fight against the chestnut-bark disease. A number of the States are doing exactly the same thing. I doubt if there is a State in this Union that is not, through its many and various agents, endeavoring to cooperate with the United States Government to stamp out these insects that infest animals and plants.

Mr. HAUGEN. The gentleman should state for the information of the committee that the purchase and destruction of diseased animals is confined to the District of Columbia, and the department does not go into the States. We had a proposition before us where it was proposed that the department should go outside of the District, and the committee turned down the appropriation. Whatever money is spent in this way is confined to the District of Columbia and does not go into the States. The gentleman seems to hold that it is proper for the State to pay for the diseased animals. I would like to submit to the gentleman if Congress does not occupy the same position to the people of the District as the government of a State does to the people of the State, and that it is the duty of the Congress to protect animals in the District of Columbia.

Mr. BOOHER. Yes; that is right; but why does the United States pay for the diseased animal in the States of Virginia, Maryland, or Pennsylvania, say, if there is no intention to convey that animal outside of the State and thereby spread the disease?

Mr. HAUGEN. The answer is this, that the department is not doing that except as to foot-and-mouth disease. The authority is there, but the appropriation is not in the bill.

Mr. BOOHER. Is it not a fact that that disease is peculiar to the Western States among sheep? Is there a State out there that could ship its sheep out to the markets without having them first treated for the disease, and the owner of the sheep pay for the treatment? And is it not a fact that when they go to the markets of the East, at Chicago, St. Joseph, Kansas City, or Omaha before these sheep are put upon the market to be sold to the farmers as feeders, and before they go through the stockyard, they have to go through another treatment, and does not the man who purchases the sheep pay for it?

Mr. HAUGEN. That has reference to the dipping of the stock.

The CHAIRMAN. The gentleman from Michigan [Mr. McLAUGHLIN] reserved the point of order.

Mr. BOOHER. I also did the same thing a while ago, and I have not given up the floor.

Mr. LEVER. I call attention to the fact that the gentlemen are not discussing the point of order, and I would like to have the Chair rule on that proposition, and then, if the gentleman desires, he can offer an amendment to strike that matter out and then discuss the question.

Mr. BOOHER. Mr. Chairman, I reserved a point of order on the paragraph.

The CHAIRMAN. The point of order has been reserved.

Mr. LEVER. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. LEVER. Do I understand the Chair to say it is possible for a member of the committee to reserve a point of order and then speak beyond five minutes?

Mr. GARNER. All the gentleman from South Carolina has to do is to call for the point of order, and then they have either to make the point of order or withdraw it.

Mr. LEVER. I have always understood the practice to be, even in discussing the point of order, that you are confined to the five-minute rule in the Committee of the Whole.

The CHAIRMAN. The Chair may be in error, but he is of the opinion that when a point of order is reserved he has no right to rap a Member down at the end of five minutes. The trouble in this case is that we are proceeding under a reservation of a point of order, and the remedy that occurs to the Chair would be for the Member in charge of the bill to demand the regular order if he wanted to shut off debate. But inasmuch as the Chair is informed that the practice has been to enforce the five-minute rule under those conditions, the Chair will do it.

Mr. BOOHER. Will the gentleman from Michigan [Mr. McLAUGHLIN] give me just a minute, and I will be through?

Mr. McLAUGHLIN. Yes, sir.

Mr. BOOHER. Now, it seems to me everything could be accomplished in that paragraph by striking out all except the quarantine provision, and permitting the Government to quarantine against a shipment of this diseased stock from one State to another, and striking out everything about the purchasing of it. Just give them the power to quarantine, and then it belongs to the people of the State to protect themselves.

Mr. McLAUGHLIN. Mr. Chairman, I think the gentleman from Missouri [Mr. BOOHER] is right in that Congress ought not to make an appropriation for the purchase and destruction of animals affected by disease. As far as we ought to go is to establish a quarantine, and then, for their own protection, the people of the State can make provision for destroying animals and paying the owners for them. But on the point of order, I wish to insist, Mr. Chairman, that there is no law that will permit this appropriation. This Government has never undertaken to pay owners for animals destroyed on account of disease, has never done it, and attempts have been made to incorporate into this bill appropriations to enable the Government to make such payments, and they have always been refused, because there is no law to permit them.

The gentleman speaks of the situation in the District of Columbia.

The CHAIRMAN. To what particular language does the gentleman from Michigan [Mr. McLAUGHLIN] direct his point of order?

Mr. McLAUGHLIN. Against the latter part of the paragraph, at the top of page 11, particularly to the word "purchase," which seems to me to be the objectionable word.

Mr. LEVER. Now, let me call the attention of the gentleman to the fact, in order to get his views on that, that the language was carried in the present current law.

Mr. McLAUGHLIN. It may have been carried in the last bill, but I do not know that the word "purchase" was used there.

Mr. LEVER. Yes.

Mr. McLAUGHLIN. But if it appears in the current law it does not become permanent law, and it is proper for us now to make a point of order against continuing those words. Therefore I make the point of order.

Mr. LEVER. Mr. Chairman, I desire to be heard briefly.

Mr. McLAUGHLIN. It is true, as the gentleman from Missouri [Mr. BOOHER] states, that the States of the Union, realizing that they must take care of this matter themselves and not depend upon the Federal Government, have enacted laws and have made appropriations which are used for the purpose of reimbursing the owners of animals killed on account of disease. Almost every State in the Union has such a law. They have not depended upon the United States. But if we were to make an appropriation providing money to reimburse the owners for animals killed on account of disease, how long would the States make these appropriations? How much State money would be used? There would soon be an entire dependence upon the Government of the United States and upon the money that it furnished.

Mr. HAUGEN. What would the gentleman suggest in order to protect the people of the District of Columbia against the milk or meat from cattle infected with tuberculosis?

Mr. McLAUGHLIN. There is a law now which permits of the destruction of animals affected with disease when there is danger that that disease may be communicated to human beings. That is as far as that law goes. If it is thought best to have a law providing for the destruction of animals infected with disease, and providing payment to the owners, let that law be enacted, so that there may be a basis for an appropriation to carry it on.

Mr. HAUGEN. But the gentleman will agree with me that unless the appropriation is made the law is of no value whatever?

Mr. McLAUGHLIN. There is a law—I can not direct the gentleman's attention to it now, because I have not the books—but there is a law relating to the District of Columbia which permits the destruction of animals affected with disease to prevent the spread of that disease among human beings; and it seems to me it provides for the payment of the value of those animals to the owners out of the appropriations by the Federal Government. But there is no law, even as it relates to the District of Columbia, that will permit an appropriation to be made to pay for animals that are killed for any other purpose than to protect human life, even in the District of Columbia, and there is no law which will permit an appropriation, or any law upon which an appropriation may hang, for paying private owners for animals destroyed elsewhere in the country. If it has been incorporated in the law heretofore, it has been because of an oversight.

Mr. HAUGEN. Oh, no.

Mr. McLAUGHLIN. There is no law upon which to hang it.

Mr. LEVER. Mr. Chairman, has the gentleman concluded?

Mr. McLAUGHLIN. Yes.

Mr. LEVER. Mr. Chairman, in addition to the language of the fundamental act creating the Bureau of Animal Industry, which I read to the Chair a moment ago, and to which I desire to call his attention again—the language authorizing the Secretary of Agriculture to adopt such means for the suppression and extirpation of contagious pleuropneumonia, and to provide against the spread of other dangerous contagion and infection and communicable diseases—I want to call the attention of the Chair to section 2 of an act of Congress approved February 2, 1903, where this language occurs:

> That the Secretary of Agriculture shall have authority to make such regulations and to take such measures as he may deem proper to prevent the introduction or dissemination of the contagion of any contagious, infectious, or communicable disease of animals from a foreign country to the United States, or from one State or Territory of the United States or the District of Columbia to another, and to seize, quarantine, and dispose of any hay, straw, forage, or similar material, or any meats, hides, or other animal products—

And so on.

Mr. BOOHER. Mr. Chairman, will the gentleman yield to me for just a question?

The CHAIRMAN. Does the gentleman yield?

Mr. LEVER. I yield to the gentleman from Missouri.

Mr. BOOHER. Does the gentleman claim that that language is broad enough to permit the Secretary to purchase and pay for diseased cattle?

Mr. LEVER. Undoubtedly.

Mr. COX. In a State?

Mr. LEVER. Of course not. My contention and that of the gentleman from Missouri [Mr. BOOHER] was that the Secretary of Agriculture was not going into a State except at the request of the State and in cooperation with it, but his purpose in being there would be to prevent the spread of disease beyond the State line.

Mr. COX. The gentleman is discussing the point of order?

Mr. LEVER. Yes; I am discussing the point of order. I do not want to argue the merits of the matter now.

Mr. COX. Suppose the Secretary of Agriculture does go into a State and he finds animals suffering from this disease. Under such circumstances does the gentleman contend, if this language were permitted to remain in the bill, that he could go into a State and pay for the killing of animals that are never intended to be exported or shipped outside of the State?

Mr. LEVER. The language would not call for that, of course. We have nothing to do with it except in interstate commerce.

Mr. COX. That is just what they have been doing—going into the States and killing animals diseased, or exposed to disease, and paying for them out of the appropriation.

Mr. LEVER. I do not think the gentleman from Indiana catches my point of view at all. I will state it again. If there is an outbreak of foot-and-mouth disease in Pennsylvania, for example, as there was some years ago, and the authorities of the State of Pennsylvania request the Federal Government to come in and help them, and Congress appropriated half a million dollars for that purpose—the idea of Congress was to prevent the spread of that disease, which had to be localized, or stateized as you might call it, and prevent it from spreading across the State line and getting into interstate commerce.

Mr. COX. But would you have the right to go in and quarantine them?

Mr. LEVER. Yes; you would have the right to go in and quarantine them. There would be no sense in acting after the danger had been incurred; and hence the Federal Government, in its wisdom, strikes while the iron is hot.

Mr. COX. That is all true; but, taking the case that the gentleman refers to in the State of Pennsylvania, when the Secre-

tary of Agriculture went in there to stop the spread of that disease, suppose the Secretary of Agriculture went into the State of Pennsylvania and condemned to death a large number of animals suffering from that disease. Is there any appropriation carried in this bill that would justify the Secretary of Agriculture in paying for the loss of those animals?

Mr. LEVER. If the gentleman will read down the page upon which he finds this language, he will see just exactly how we have segregated those items. So that while there is authority here to do it, I do not believe that there is any money with which to do it; and what the Secretary would do, very probably, would be to come to Congress and ask for an emergency appropriation, if the emergency should arise.

Mr. COX. The gentleman thinks he would not undertake to use the appropriation for that purpose?

Mr. LEVER. He has never done it, as far as I know, in my 10 years' experience on the committee.

Mr. McLAUGHLIN. The gentleman has read the law. I will ask if the construction put upon it has not always been that the department had no authority to pay money to the owners of animals destroyed?

Mr. LEVER. That has not been my interpretation of it, I will say to the gentleman.

Mr. McLAUGHLIN. Further, have not the gentlemen connected with the Department of Agriculture appearing before the committee told us that they had been forbidden to use the money to pay for animals destroyed?

Mr. LEVER. I will say to my friend from Michigan that the gentleman from North Dakota [Mr. HELGESEN] and myself called up Dr. Melvin, the Chief of the Bureau of Animal Industry, with reference to horse dourine, and inquired whether or not he would have the right under the general law to condemn horses in North Dakota and pay for those condemned. The gentleman [Mr. HELGESEN] will recall that he said he did have the right under the general law to do that, and that it had been so held. Is that correct?

Mr. HELGESEN. That is correct.

Mr. LEVER. That is correct. Now, I want to call attention to some other language as bearing out the general thought that this language is broad enough to give the Secretary of Agriculture the right to choose his own machinery by which to accomplish the purpose of Congress to prevent the spread of contagious and infectious diseases in animals.

Section 2 of the act of 1884 reads:

That the Commissioner of Agriculture shall report annually to Congress, at the commencement of each session, a list of the names of all persons employed, an itemized statement of all expenditures under this act, and full particulars of the means adopted and carried into effect for the suppression of contagious, infectious, and communicable diseases among domestic animals.

The Secretary of Agriculture, acting under the broad provisions of the law, has issued a regulation to this effect—regulation 8 of the Secretary of Agriculture, covering the Bureau of Animal Industry, which contains this provision:

When, in order to prevent the spread of a disease, it becomes necessary to slaughter any diseased or exposed live stock and the purchase of such live stock by the United States is authorized by law, and an appropriation is available therefor, the value of the live stock shall be ascertained and compensation made therefor, either by agreement with the owner or by appraisement in the manner provided by the laws of the State or Territory wherein the owner of the live stock has his legal residence.

Mr. BOOHER. Who pays for the stock—the State or the United States Government?

Mr. LEVER. The United States Government.

Mr. BOOHER. That is the order of your Secretary, and that is exactly why you have got this provision in the bill.

Mr. MADDEN. Does the gentleman contend that under the existing law the Secretary of Agriculture has the right to go into any State in the Union and pay for horses or cattle that may be destroyed on account of disease?

Mr. LEVER. I do.

Mr. MADDEN. Out of the Federal Treasury?

Mr. LEVER. I do; to prevent the spread of disease; yes.

Mr. MADDEN. I always assumed that was a State function and that the State always, as a matter of course, paid all such bills.

Mr. LEVER. The gentleman's assumption is incorrect. I will repeat that, as far as my memory goes, the practice has not been to do so, except when direction was had through Congress.

Mr. MADDEN. I do not agree at all that under the law read by the gentleman a moment ago the Secretary of Agriculture has the right or the power to go into any State in the Union and pay for the destruction of horses or cattle that may be diseased; but, on the contrary, it becomes his duty to notify the State of the difficulty and to call the attention of the State officers to the necessity for destroying the cattle that may be diseased, and to require them to pay for any losses that may be sustained as the result of that disease.

Mr. JACOWAY. Will the gentleman yield?

Mr. LEVER. Yes.

Mr. JACOWAY. Has the Secretary of Agriculture ever exercised this authority and taken money out of the Federal Treasury to pay for animals slaughtered that were afflicted with disease?

Mr. LEVER. I have said repeatedly that within my memory he has not, but I do not question his right to do so under the law, if he has the money.

Mr. COX. He has not, except where he has a specific appropriation.

Mr. LEVER. No; that is true.

Now, I want to call your attention to the fact that this identical language is carried in the act of 1914. It is carried in the act of 1913. It is carried in the act of 1912. I have those three acts before me, and the question has never been raised before. I do not think it is a proposition that is going to give the Secretary of Agriculture the right to do something that he ought not to do, and my contention is that the language creating the Bureau of Agriculture, which the Chair is now reading, is so broad as to give to the Secretary of Agriculture the right to employ such means as he thinks wise to prevent the spread of contagious and infectious diseases among animals. Language can not be made any more broad than that is. He is absolutely limited only by the amount of appropriations he has available. If he wants to quarantine, he can do so. If he wants to pen animals and keep them shut up, he can do so. He is given the broad authority to employ such means as he sees fit to employ to do the work which Congress has imposed upon him.

Mr. JACOWAY. I should like to ask the gentleman further if the testimony before the committee does not disclose the fact that this disease is becoming so prevalent there that the State itself is helpless to prevent it?

Mr. LEVER. That was the case with dourine.

Mr. JACOWAY. That is what I am speaking of.

Mr. LEVER. Yes.

Mr. REILLY of Wisconsin. Is it a fact that that is an emergency provision, giving the Secretary of Agriculture the right to take charge and exercise authority where the State, in his judgment, can not handle it?

Mr. LEVER. My idea is that the language here is the department's interpretation of the fundamental laws governing the bureau in this regard, and they put the language in here for the purpose of calling the attention of Congress to their interpretation of their powers under the law.

Mr. MANN. Will the gentleman yield for a question?

Mr. LEVER. Certainly.

Mr. MANN. This language in the first paragraph relating to the general expenses of the Bureau of Animal Industry is supposed to be a compilation of the statutory authority conferred upon this bureau, is it not?

Mr. LEVER. That is true, and is also true of all the general-expense items in the bill.

Mr. MANN. In that respect this bill is unusual and different from any other appropriation bill.

Mr. LEVER. Yes; but not unusual from other bills from this committee.

Mr. MANN. It is unusual and different from other appropriation bills. You carry what you suppose to be the statutory authority of the different bureaus.

Mr. LEVER. In the general-expense items.

Mr. MANN. There is no appropriation here, but you set out the statutory authority and then you make the appropriation by items.

Mr. LEVER. Exactly.

Mr. MANN. There is no appropriation in this paragraph——

Mr. LEVER. None whatever.

Mr. MANN. But you keep it in the paragraph, because it has been in the bill in the past, and some year you might want to make an appropriation for the purpose.

Mr. LEVER. Yes. There might be an emergency, and we would have authority to do it. I will ask the Chair to rule.

The CHAIRMAN. The Chair is of the opinion that Congress has intended to give the Secretary of Agriculture full power to prevent the spread of disease among animals. The same language is in the current law that is carried in this bill without any change whatever so far as the language of the part against which the gentleman from Nebraska makes the point of order.

Mr. LEVER. If the Chair will indulge me, the two preceding appropriation bills carried the same language exactly.

The CHAIRMAN. The Chair will direct the attention of the committee to current law in the same paragraph to which the

language objected to here is carried—"that hereafter all provisions of said act approved March 3, 1905," and so forth; and then without any break includes the language against which the point of order is made in this case.

Mr. MANN. I think the Chair is in error.

The CHAIRMAN. The Chair had not completed his sentence. The Chair is in doubt whether it is intended to apply to that part to which the gentleman has leveled his point of order.

Mr. MANN. The hereafter provision refers only to the railroad provision, and it does not cover anything beyond.

The CHAIRMAN. The Chair is inclined to think that the gentleman from Illinois is correct, and was proceeding to say that the Chair is in doubt whether that does apply to the whole paragraph. The Chair is of the opinion that it is the plain intention of Congress to give the Secretary of Agriculture authority to take such measures and means as he may find necessary to prevent the spread of pleuropneumonia or tuberculosis among animals from one State to another. The means to be used by him to successfully carry out that work must of necessity be left largely to his discretion. It having been carried in the present law and in the law the year before and the year preceding that, the Chair is inclined to and does overrule the point of order.

Mr. BOOHER. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

On page 11, line 2, after the word "to," strike out all down to and including the word "or" in line 3.

Mr. LEVER. Mr. Chairman, I reserve a point of order.

Mr. MANN. It is not subject to a point of order.

Mr. BOOHER. Mr. Chairman, it does appear to me that the language proposed to be stricken out by the amendment ought to go out of the bill.

Mr. MANN. Will the gentleman yield?

Mr. BOOHER. Certainly.

Mr. MANN. The gentleman's amendment is plainly not just what he wants. He would leave in the words "to quarantine the same."

Mr. BOOHER. We will have to put in some other language if this amendment is adopted.

Now, Mr. Chairman, take the regulations made by the Secretary of Agriculture, which have been in force for a long time, in which he proposes to do exactly what the chairman of the committee in his opening argument said they would do—go into the State and kill diseased animals whether intended for exportation or not and pay for them. They are only waiting for an opportunity to go into some State where there is a disease and stamp it out, killing the animals and not charge it up to the State, but make the people of the whole country pay for it.

This is the regulation:

8. When, in order to prevent the spread of a disease—

He does not say from one State to another. He does not put that in. He contracts the law always when they come to the question of spending money—

When, in order to prevent the spread of a disease, it becomes necessary to slaughter any diseased or exposed live stock by the United States as authorized by law, and an appropriation is available therefor, the value of the live stock shall be ascertained and compensation made thereof either by agreement with the owner or by appraisement in the manner provided by the law of the State or Territory wherein the owner of the live stock has his legal residence.

Here you have him authorized to purchase, and that is the part that I want to strike out. Now, it does not provide that the State shall pay for it, it does not say who shall pay for it. The Government is condemning it and the Government is destroying it under the laws of the State. The Government will be the paymaster.

Mr. COX. The way the regulation reads it plainly provides that the Government shall pay for it when there is an appropriation.

Mr. BOOHER. Yes; when an appropriation has been authorized. And it is so easy to get an appropriation, if some one or somebody who is a farmer among Congressmen or a Congressman among farmers gets up and tells them that it is for the interest of the farmer. Nobody raises his voice against it, because it is for the farmer. Gentlemen, we are undervaluing the intelligence of the farmers of this country. The farmers of the country know as much about this proceeding as we do.

They know as much about their rights and to what they are entitled as we do, and we are constantly making appropriations here for one thing and another, and presume upon the ignorance of the farmer to indorse it, because we say it is in the interest of the farmer. I want to call the attention of the committee for just a moment to something that took place the other day in the State of Nebraska. It is interesting to show the difference between the idea of the farmers of one section of the country and another. In the State of Nebraska the State agricultural department had a regulation which prevented the farmers of that State from treating their own hogs. The farmers could not use the serum for the prevention of hog cholera unless they employed a veterinary surgeon. For several years the farmers of that State worked with that State board of agriculture to get them to change that regulation. The board refused to do it, but finally the State grange as an organization took it up, and here was the result of it. It is interesting, and I commend this to the chairman of the Committee on Agriculture and to all members of that committee. I think we ought to know something about it. It shows that the farmers of one State in the Union, at least, are in favor of taking care of themselves if you will give them an opportunity of doing it.

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. BOOHER. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. BOOHER. I want to read this article taken from the St. Louis Globe-Democrat:

NEBRASKA FARMERS CAN NOW INJECT HOG SERUM.

LINCOLN, NEBR., *February 1.*

The right of farmers to administer hog-cholera serum to their own hogs and not call in veterinarians for every administration thereof was fought over and settled favorably to the farmers at a meeting of the State live stock sanitary board held here recently.

The question was fought over at a preliminary meeting at which there were present J. H. Bulla, South Omaha member of the live-stock board; F. G. Odell and T. F. Sturgess, of Omaha; O. E. Davis and L. S. Herron, of this city; Charles Graff, of West Point; J. A. Ollis, of Ord; and other officers of live-stock associations. The meeting, together with a lengthy session held during the forenoon, was called upon invitation of Gov. Morehead and the sanitary board members in the hope that the matter could be settled in full justice to the farmers of the State and in a way that will afford stockmen full protection.

Millions of dollars' worth of Nebraska live stock are affected by the action taken by the board. Rules were promulgated which it has been impossible to pass through even legislatures of agricultural make-up because of disagreement over details. In less than 24 hours' labor the "peace conference," so called because it meant a fusing of live-stock and farming industries, the veterinarian association and the State board members accomplished a task that puts Nebraska far in the lead of other States in restricting shipments of stock into the State and in the care of animals subjected to plagues and scourges of various kinds of diseases. Following were the rules adopted:

Farmers will be permitted to apply their own or neighbors' hog-cholera serum.

Five qualified veterinarians to be employed by the board and available for use in any part of the State when emergencies arise.

No inspectors of interstate stock shipments will be employed who are not qualified to practice veterinary medicine in the State.

Live stock shipments from other States shall be received only under strict regulation and full information regarding origin and destination and health must be given.

Stock sent in for grazing or slaughter purposes shall be accompanied by affidavits giving full information of the animals in the shipment.

Producers of veterinary biological products must possess licenses in accordance with Federal provisions or a permit from the State board.

All hogs vaccinated by the "simultaneous" treatment shall be confined on premises at least 30 days.

All sales of hog-cholera, blackleg, and other disease or scourge preventives and veterinary bacteriological products shall be reported to the State veterinarian within 48 hours after sale.

All bulls for public service shall be submitted to the tuberculin test annually.

The gathering, easily the most important that has taken place in the State outside of the legislature in several decades is also significant in that it forecasts the delegation of more power to department, the conservation of power in a few boards, and the accomplishment of needed reforms through other than the tedious legislative procedure.

Suggestion that outside forces be called in and that rules satisfactory to the interests most vitally affected came first from Gov. Morehead. The executive was an interested listener at the sessions of the board and was called upon to address the variegated, but finally harmonious, meeting after the rules had been agreed upon.

I desire now to call attention to another little paragraph from a paper in my own district, which shows that if the farmers could get the serum to use for the prevention of hog cholera they do not want any Federal inspector or Federal officer running all over the country lecturing to them and telling them how to do it. All they want is to have the serum prepared and be enabled to buy it at what it costs. They will administer it to their own stock. Here is what one farmer in my district did, and what he did dozens of others in the same neighborhood have been doing. This is taken from the Holt County Sentinel, a newspaper published in Holt County, Mo.:

[Bigelow correspondent in Jeffersonian, December 4.]

Last week J. E. Slater vaccinated 305 hogs on his farm west of town, at a cost of $225. They weighed 30 to 490 pounds. Mr. Slater believes in keeping his stock in good shape and not run any chances of cholera. There are one or two cases of hog cholera near here, it is said.

That simply shows that if you will give the farmer an opportunity he will take care of his own stock, and do it better and on less money to himself and the people of the country than the Federal inspectors and Federal officers will do and have been doing all over this country.

Mr. LEVER. Mr. Chairman, will the gentleman yield?

Mr. BOOHER. Yes.

Mr. LEVER. If the gentleman from Missouri will write to the gentleman about whom he has just read a statement in the newspaper and get him to say that he did not have the use of a veterinary inspector when he did that, I will buy him the best 50-cent cigar in the city of Washington.

Mr. BOOHER. That is from the Government or a veterinary surgeon that he hired himself?

Mr. LEVER. Oh, he probably hired him himself, but I venture that he was a trained veterinarian.

Mr. BOOHER. If he hired him himself, it is not the Government inspector. What I am complaining about is the Government inspector running all over this country and spending money to advise the farmers when the farmer knows more in a minute than one of your experts does in a year.

Mr. STEPHENS of Texas. Mr. Chairman, will the gentleman yield?

Mr. BOOHER. Yes.

Mr. STEPHENS of Texas. I desire to ask the gentleman if he is acquainted with the cattle fever in Texas? Does he not know that our cattlemen spend a million dollars a year for the purchase of material of different kinds preparing vats and dips for the purpose of eradicating the cattle tick?

Mr. BOOHER. Well, it ought to be eradicated, but here is the proposition: If you have discovered the remedy, after the Government has furnished the people with the remedy which will kill the ticks on the cattle, what is to prevent the gentleman's own people, without the interference of an inspector or some expert from the Federal Government, taking care of the cattle themselves? Do they not know how to do it?

Mr. STEPHENS of Texas. Every ranchman has his vat prepared and his dip prepared and he takes care of his own cattle.

The CHAIRMAN. The time of the gentleman from Missouri has again expired.

Mr. BOOHER. Mr. Chairman, I ask unanimous consent to proceed for two minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. BOOHER. Mr. Chairman, in reply to the gentleman from Texas, does he know that this bill carries an appropriation of $400,000 for that very thing? It does. I believe that the Government ought to study these questions thoroughly and if possible find a remedy, and then let the people do the rest.

Mr. STEPHENS of Texas. That is for the purpose of dipping cattle that leave infected parts of the country and are liable to go to uninfected parts of the country, so as to prevent the carrying of disease from one part to another.

Mr. BOOHER. The gentleman from Texas is taking all of my time. My point is that the Government ought to study these diseases carefully and thoroughly; and, if it finds a remedy, it ought to provide that remedy for the people for what it costs the Government to provide it. After it has provided the people with the remedy, then the people themselves ought to use it and not call on the Government to show them how to do it. Why, I heard people on the floor the other day object to a bill brought in to provide for teaching people of this country how to read. They did not want that kind of a law; but here you are spending money to teach people how to kill cattle ticks in Texas and in other parts of the country. It is more important to teach them to do that than to teach them to read, I suppose.

Mr. HELGESEN. I would like to ask the gentleman if he knows that there are dangerous diseases among the cattle and horses of the country and no farmer can determine whether his stock has those diseases or not?

Mr. BOOHER. I know that.

Mr. HELGESEN. And the gentleman does not want the Government inspector to go and find out whether they have disease or not?

Mr. BOOHER. No, sir; the State inspector should do that, because I think the gentleman knows that almost every State in the Union has a veterinary bureau.

Mr. HELGESEN. If I understand aright, the gentleman said he is not opposed to this if it applied only to those animals which went in interstate commerce. Is that right?

Mr. BOOHER. Oh, no; the gentleman misunderstood me. When we were arguing the interstate-commerce proposition I was replying to the chairman of the committee. He took the position that you could go into the State and kill them whether they are to be transported or not.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. LEVER. Mr. Chairman, I do not care to take up the time of the committee to argue the merits of this amendment, except to say this, that the Federal Government, through its Congress, has from time to time authorized the Secretary of Agriculture to enforce quarantine laws for the purpose of preventing the spread of contagious and infectious animal diseases. The quarantine laws against the cattle tick, it is estimated, is costing the South from $40,000,000 to $60,000,000 a year. I have no doubt that the quarantine against the spread of horse dourine will cost the people of the State of North Dakota alone a million of dollars, and I put the proposition squarely before this committee, that if Congress, in its wisdom, prevents the free shipment of our stock, whether diseased or not, is it not the duty of Congress to help bear some of the burdens of the enforcement of such quarantine law? Now, that is all there is to this proposition, and for that reason, Mr. Chairman, I make the point of order against the amendment on the ground that it is a change of existing law and in keeping with the ruling of the Chair a moment ago.

Mr. BOOHER. Not a change of permanent law. There is no law upon the subject.

Mr. LEVER. The Chair has held the other way.

Mr. BOOHER. I do not think the Chair held that it had the force and effect of law. I had not heard of such a ruling.

The CHAIRMAN. Does the gentleman make the point of order?

Mr. LEVER. I make the point of order against the amendment offered by the gentleman from Missouri.

Mr. MANN. Mr. Chairman, it is very plain the amendment is not subject to a point of order. The gentleman ought not to make the point of order. This is to strike out something that is authorized by law, but we are not obliged to keep it in.

Mr. LEVER. It seems to me that by striking out a provision of law you are certainly changing the law.

Mr. MANN. Oh, not at all. This is an appropriation bill. The law remains as it was before, but this is an appropriation bill.

Mr. LEVER. But, if we strike out this matter here, it seems to me we are bound to affect the permanent law wherever it might be.

Mr. MANN. Not at all.

Mr. LEVER. You are certainly interfering with the authority of the Secretary of Agriculture.

Mr. MANN. Well, we do not make an appropriation to carry into effect the permanent law when you leave it out.

Mr. LEVER. My contention is——

Mr. MANN (continuing). Where the permanent law authorizes the Secretary of Agriculture to purchase and destroy diseased or exposed animals, or quarantine the same, we can say that we will authorize him, so far as the appropriation is concerned, to purchase, or we can say we authorize him to destroy or sell, or we will authorize him to quarantine so far as the appropriation is concerned. We do not affect the permanent law in this.

Mr. LEVER. My contention is this: The Chair has held that the language in this bill is in order because it is a part of permanent law. Now, if we adopt this amendment suggested by the gentleman from Missouri, we have to that extent limited the authority of the Secretary of Agriculture as given to him by existing law, and that being the case, it seems to me there is no doubt that it is subject to a point of order.

Mr. MANN. Mr. Chairman, the paragraph commences, "For carrying out the provisions of the act approved May 29, 1884," and so forth, "for carrying out the provisions of the act of June 29, 1906," and so forth, "and to enable the Secretary of Agriculture to collect and disseminate information," and so forth; "to purchase in the open market samples of all tuberculin," and so forth; "to purchase and destroy diseased or exposed animals," and so forth, "as follows." This is contained in an appropriation bill. This is not law, but it is part of an appropriation act, and I do not understand the Chair to hold that placed in the current bill it made current law, but the Chair held that under the act of Congress this provision in this bill is authorized by law, and the Chair referred to the fact that being in the current law, and it had been in the previous act, that does not make it in order here. We are not required in an appropriation bill to include all that is authorized by law; that is our province to determine whether we will or not.

Mr. LEVER. Let me ask the gentleman this question: The Secretary of Agriculture now under the law, as I understand it, has the authority to purchase and destroy diseased or exposed animals or to quarantine them?

Mr. MANN. Yes.

Mr. LEVER. Now, then, by act of Congress in this bill we say we do not want to put it in.

Mr. MANN. Oh, not at all.

Mr. LEVER. What does it mean, then?

Mr. MANN. The Secretary of Agriculture has authority now to purchase and destroy, and so forth, exposed animals, if he has an appropriation. He has the authority, but he can not do it unless he has an appropriation. Now, you are making the appropriation here, and you can decline to include those words. As a matter of fact, they do not mean anything in this bill, anyhow.

Mr. LEVER. I think that is very true.

Mr. MANN. There is no actual appropriation. But we can leave that out. We are not required to appropriate for a thing where we have authorized the department to do something. We may authorize the Secretary of the Treasury to construct a building. You might bring in an act here that provided to carry out the purposes of constructing buildings in a dozen towns, where he has authority, and we can strike any of them out if we want to do so. We are not required to appropriate.

Mr. LEVER. Let me take the gentleman's illustration and see what effect that would have on the Secretary of the Treasury in erecting this building. Suppose that there is a provision in an act of Congress that a building should be 10 stories high, and we did not provide any appropriation for it at all, and then the next year we did provide an appropriation for a building, limiting it to 9 stories?

Mr. MANN. That would be subject to a point of order.

Mr. LEVER. That would be subject to a point of order, undoubtedly, but it seems to me to be absolutely on all fours with this. Here the Secretary of Agriculture has authority under the law to purchase and destroy diseased animals. The Secretary of Agriculture, it seems to me, if this amendment prevails, would take that to be a direction from Congress that hereafter he should not do that.

Mr. MANN. Take the case that the gentleman puts, and suppose that the Secretary of the Treasury was authorized to construct a building 10 stories high. Now, by law, all that we do is to make an appropriation for that building. The law fixes the height of it. We do not describe it in making the appropriation; but suppose we did describe it in the appropriation bill, and say, "for a building 10 stories high." That conforms with the law, and hence the appropriation is in order. If some gentleman would move to insert "9" in place of "10," that would be contrary to the rules of the House, because that would change the building, but if some one would move to strike out "10 stories" that would be in order, although it would not change in the slightest degree the building to be constructed, because the appropriation is for a building; but we can refuse to make the appropriation at all, even though it has been authorized.

The CHAIRMAN. The Chair is ready to rule. In overruling the point of order made by the gentleman from Michigan [Mr. MCLAUGHLIN] a few moments ago, to certain language in the bill, the Chair thinks the effect of that was simply to hold that the committee would have the right to place that language in the bill or retain it in the bill if they desired to do so. But, of course, that is a question for the committee. The Chair does not think the amendment is contrary to the existing law; therefore the Chair does not think the amendment is subject to a point of order. The point of order is therefore overruled.

Mr. LEVER. Mr. Chairman, I ask that the Clerk report the amendment again.

The CHAIRMAN. The Clerk will again report the amendment.

The Clerk read as follows:

Page 11, line 2, after the word "to," in line 2, strike out all down to and including the word "or" in line 3.

Mr. LEVER. So that it will read——

The CHAIRMAN. The Clerk will report the paragraph as it will read.

The Clerk read as follows:

To quarantine the same whenever in his judgment essential to prevent the spread of pleuropneumonia, tuberculosis, or other diseases of animals from one State to another, as follows:

Mr. BOOHER. Of course, if that amendment is adopted, there will have to be some change made in there.

Mr. LEVER. I suggest to the gentleman that he put his amendment as he wants it, because the amendment as reported does not connect up at all.

Mr. BOOHER. It connects entirely; but, if that is in, there will have to be some change made.

Mr. MCLAUGHLIN. Mr. Chairman, I offer an amendment. Inasmuch as the gentleman from Missouri [Mr. BOOHER] has not his amendment in shape, perhaps mine will reach it.

The CHAIRMAN. There is an amendment pending.

Mr. LEVER. Offer the amendment.

Mr. MCLAUGHLIN. Mr. Chairman, my amendment is to strike out the words "purchase and," so it will read:

To destroy diseased or exposed animals or quarantine the same.

And so forth.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Michigan.

The Clerk read as follows:

Page 11, line 2, strike out the words "purchase and."

The CHAIRMAN. The question is on the amendment to the amendment.

The amendment to the amendment was rejected.

The CHAIRMAN. The question is now on the amendment offered by the gentleman from Missouri [Mr. BOOHER].

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For inspection and quarantine work, including all necessary expenses for the eradication of scabies in sheep and cattle, the inspection of southern cattle, the supervision of the transportation of live stock and the inspection of vessels, the execution of the 28-hour law, the inspection and quarantine of imported animals, including the establishment and maintenance of quarantine stations and the alteration of buildings thereon; the inspection work relative to the existence of contagious diseases, and the tuberculin and mallein testing of animals, $625,520, of which sum not more than $3,000 may be used for the construction of a superintendent's house on the ground of the United States animal quarantine station for the port of Boston, at Littleton, Mass.

Mr. MONDELL. Mr. Chairman, I move to strike out the last word. I would like to have the opinion of the chairman of the committee relative to the paragraph that has just been read. It provides for inspection and quarantine work, including all necessary expenses for the eradication of scabies in sheep and cattle, and so forth. Now, that paragraph, unlike the paragraph which has just been passed, contains no reference to the purchase and destruction of diseased animals. Does the gentleman understand that under the appropriation carried in this paragraph it would be possible for the Secretary to purchase or pay for animals destroyed?

Mr. LEVER. I do not. My opinion is that the language of the paragraph which the gentleman has read specifies the only lines of work that the Secretary of Agriculture can undertake with the appropriation which is carried.

Mr. MONDELL. Well, then, to what specific appropriation does the language which has been discussed at some length to purchase and destroy, and so forth, apply?

Mr. LEVER. It does not apply to any appropriation whatever. It is set out in the general expense items of the bureau only in order to call the attention of Congress to the statute under which the Department of Agriculture, or that bureau of the Department of Agriculture, is acting.

Mr. MONDELL. Does the gentleman understand that the Secretary has general authority to pay for animals that are killed?

Mr. LEVER. That is true if he has the money with which to do it. But the gentleman will see that the general-expense language in the bill is followed by specific language carrying the appropriations and showing exactly the lines of work that can be done under the general-expense language.

Mr. MONDELL. The gentleman is of opinion, then, that while the "general-expense language," as he calls it, recognizes the authority of the Secretary, as a matter of fact these specific appropriations themselves could not be used for the payment of animals destroyed?

Mr. LEVER. That is absolutely true. I want to call the attention of the gentleman to the new language on page 10 of the bill, with reference to "the preparation, sale, barter, exchange, or shipment of any virus, serum, toxin, or analogous products, manufactured in the United States, and the importation of such products intended for use in the treatment of domestic animals." This is a way of calling to the attention of the House the fact that there is a permanent law authorizing the Secretary of Agriculture to do this work. But the gentleman will see that in the itemized language carrying the appropriation we carry no appropriation for that virus work, for the reason that we carry that in a separate bill which was passed the other day—the hog-cholera bill.

Mr. MONDELL. Yes. Another question: We passed a bill the other day which is now a law, I believe?

Mr. LEVER. Yes.

Mr. MONDELL. A law authorizing the expenditure of a large sum for the eradication of hog cholera and dourine in horses?

Mr. LEVER. Yes.

Mr. MONDELL. As I recollect it, there was no specific language in the bill authorizing the use of that appropriation for the payment for animals that might be killed?

Mr. LEVER. No.

Mr. MONDELL. Does the gentleman understand that any part of the appropriation could be used for that purpose?

Mr. LEVER. That is a close question. The Secretary of Agriculture might hold that under the general law he had the right to use a portion of that money for the purpose of paying for exposed animals. I am sure that he would not do it, and I am not sure in my own mind that he could do it, because, as I have said a number of times, I am not a lawyer and these legal points "ball" me up, but my opinion is that he does not have the authority to use the funds in the way suggested.

Mr. BOOHER. Mr. Chairman, will the gentleman yield for a moment?

The CHAIRMAN. Does the gentleman yield?

Mr. LEVER. Yes.

Mr. BOOHER. Does not the gentleman think he would be authorized, under the language which we refused to strike out, to do the very thing that the gentleman from Wyoming asked about? Could he not take the money and pay it?

Mr. LEVER. He certainly could not take any money in this bill, and I do not believe he would have the right, without the specific authority of Congress, to use any of the fund that we appropriated some days ago.

The CHAIRMAN. The time of the gentleman from Wyoming has expired.

Mr. MONDELL. Mr. Chairman, I would like to have five minutes more.

The CHAIRMAN. The gentleman from Wyoming asks unanimous consent to proceed for five minutes more. Is there objection?

There was no objection.

Mr. TOWNER. Mr. Chairman, will the gentleman yield to me for a moment?

Mr. MONDELL. Yes.

Mr. TOWNER. It would be quite clear, I think from the language of the bill that we passed the other day, that unless it was used in some demonstration and experiment work, no hogs could be paid for. In other words, as I understand the gentleman's question, the question is whether or not the department could go out and pay for the loss of hogs of some individual that had occurred because of hog cholera.

Mr. MONDELL. Hogs and horses; and my recollection is that the chairman of the committee a moment ago stated that he and the gentleman from North Dakota [Mr. HELGESEN] called up some official of the department, the Secretary or some other official, and asked if the department had general authority to pay for animals killed for the purpose of preventing the spread of disease, and he stated that they had. If he has such general authority, query, Can they exercise it without specific authorization in the item carrying the appropriation?

Mr. ANDERSON. It is a question of money rather than of authorization?

Mr. MONDELL. I would not say, answering the question of the gentleman from Minnesota, that it is a question of money, because if they had only a hundred dollars and wanted to use it and had the right to use it in payment for an animal, of course they would have a hundred dollars for use for that purpose.

Mr. ANDERSON. But they could not use it unless it had been appropriated for that purpose.

Mr. MONDELL. This is what I am trying to get clear in my mind.

Mr. LEVER. Let me answer the gentleman and call his attention to this fact: That while the Secretary of Agriculture has general authority to purchase exposed animals, that authority is contingent upon his having the money with which to purchase these animals.

Now, here we have a large sum of money—$625,520—but that fund is to be used for inspection and quarantine work, including "all necessary expenses for the eradication of scabies in sheep and cattle, the inspection of southern cattle, the supervision of the transportation of live stock, and the inspection of vessels, the execution of 28-hour law," and so on. There we specify the uses to which the fund may be applied, and the Secretary of Agriculture would not go beyond what he had specific direction for.

Mr. ANDERSON. Does not the authority to quarantine carry with it the right to destroy animals, if necessary, in order to maintain the quarantine?

Mr. GARNER. Mr. Chairman, will the gentleman from Wyoming yield?

Mr. MONDELL. Yes.

Mr. GARNER. Is it not the purpose here to provide an appropriation for the purpose indicated on page 11, beginning with line 7? Do we not make the foundation for the future so that if in the future an item were offered in the appropriation bill a point of order could not be raised against it?

Mr. LEVER. That is it.

Mr. GARNER. So that Congress in the future may make an appropriation for this identical work if it wants to; and, not carrying any appropriation at this time, it is easier to get it through than it would be if you carried a large appropriation?

Mr. LEVER. Yes.

Mr. TOWNER. If the gentleman will yield to me, it seems to me there will be no question but that. Referring to the question of hog cholera, the authority would be in the department to pay for and kill the hogs, because of the fact that, in order to establish a quarantine station for effective operations, it might be necessary to obtain an area upon which they could experiment by eliminating danger from the surrounding territory. I think there would be no question but what they would have that authority.

Mr. LEVER. Mr. Chairman, let me call the attention of the gentleman from Wyoming to this fact: I want to get this bill through as speedily as possible, but this language has been in the bill since I have been a member of the Committee on Agriculture, without the changing of a word, the dotting of an "i," or the crossing of a "t." It is identically this language. It is perfectly proper for the gentleman to inquire about it, but I am satisfied that there is no "negro in the woodpile" in this language.

Mr. MONDELL. I have not had any thought that there is any African concealed here that ought to be dug out. I am simply trying to get a clear notion of what the situation is.

The CHAIRMAN. The time of the gentleman from Wyoming has again expired.

Mr. LEVER. Mr. Chairman, I have been trying to give the gentleman my view. I ask that the Clerk read.

The CHAIRMAN. The gentleman from Wyoming [Mr. MONDELL] withdraws his pro forma amendment. The Clerk will read.

The Clerk read as follows:

For all necessary expenses for the eradication of southern cattle ticks, $400,000, of which sum $50,000 may be used for live-stock demonstration work, in cooperation with the Bureau of Plant Industry, in areas freed of ticks, and of this amount no part shall be used in the purchase of cattle for breeding purposes: *Provided, however*, That no part of this appropriation shall be used in the purchase of materials for or in the construction of dipping vats upon land not owned solely by the United States, except at fairs or expositions where the Department of Agriculture makes exhibits or demonstrations; nor shall any part of this appropriation be used in the purchase of materials or mixtures for use in dipping vats except in experimental or demonstration work carried on by the officials or agents of the Bureau of Animal Industry.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the paragraph.

The CHAIRMAN. The gentleman from Wisconsin reserves a point of order on the paragraph.

Mr. McLAUGHLIN. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from Michigan offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend, page 11, in line 24, by striking out the word "cattle" and inserting in lieu thereof the word "animals."

Mr. LEVER. If my friend will permit me, I have no objection to that amendment. It will save time.

The CHAIRMAN. If there be no objection, the amendment will be agreed to.

There was no objection, and the amendment was agreed to.

Mr. STAFFORD. Mr. Chairman, I have reserved a point of order on this paragraph. My purpose was to inquire of the chairman of the committee the object of this $50,000 for live-stock demonstration work. That is something new in this appropriation bill, but perhaps the department has been doing similar work heretofore.

Mr. LEVER. I am satisfied the language is not subject to a point of order, but I will tell my friend the character of the work we desire to undertake. The gentleman from Wisconsin knows that we have a great area in the South infested with the cattle tick. For several years we have been spending about $375,000 a year for the purpose of eradicating the cattle tick, which is an insect that causes Texas fever and great loss among cattle. We have freed about 218,000 square miles from this pest, and the thought of the Secretary of Agriculture, in which I agree most heartily, is that we ought to begin to teach the people in those free areas how to grow good beef cattle and good stock.

Mr. STAFFORD. How is it proposed to engage in that character of work?

Mr. LEVER. I will tell my friend how it is working out practically, and I will illustrate by my own State, because I

happen to know more about that. The department has sent a man to South Carolina who is cooperating with the authorities of our agricultural college at Clemson. This man goes from courthouse town to courthouse town. He calls a meeting. The farmers come in, sometimes 100, sometimes 500. He gives them a lecture on the value of live-stock growing as an adjunct to farming and as a profitable undertaking. Then he organizes a live-stock association in that county. Frequently he will have from 50 to 75 progressive, up-to-date farmers who will join that association. Then from time to time, probably every two weeks, he will go back to the courthouse, call his associates together, and teach those people the best breeds of cattle and how to grow cattle properly. I recall reading in my home paper this morning of a recent meeting in the city of Greenville, where they have organized such an association.

Mr. STAFFORD. Then, as I understand the gentleman, this is only for the expenses of this demonstrator who goes around to country towns, elucidating information particularly connected with live-stock work?

Mr. LEVER. Yes. In other words, it is nothing more nor less than an attempt of the Department of Agriculture to get its accumulated information out of Washington to the people who need it.

Mr. STAFFORD. Do I understand the gentleman to state that the department has been successful in eradicating the cattle tick from a large territory?

Mr. LEVER. From 218,000 square miles.

Mr. STAFFORD. Then what is the necessity of increasing this appropriation which is here $400,000, which last year was $325,000?

Mr. LEVER. We still have about 725,000 square miles to free from the cattle tick.

Mr. STAFFORD. I notice in the section which we are now considering, that of the Bureau of Animal Industry, the committee has increased the amounts sometimes twofold, but the instances are rare where the amounts have not been increased. What is the occasion for some of these inordinate increases of hundreds of thousands of dollars in this special industry?

Mr. LEVER. In making up this bill, whenever the committee were dealing with a bureau which was devoting its efforts to increasing the food supply or the clothing supply of the people of the United States, it was the general policy of the committee to act liberally with regard to that bureau.

Mr. STAFFORD. I assume that the committee acted liberally last year.

Mr. LEVER. I was not the chairman of the committee last year.

Mr. STAFFORD. But a very potential member.

Mr. LEVER. I call the attention of my friend to the fact that in my opening address on this bill I called attention to the vanishing meat supply of this country and the vanishing bread supply of this country. These facts impressed the chairman of the committee, as they impressed every member of the committee, with the necessity of dealing most liberally with the great constructive bureaus of the Department of Agriculture, such as this Bureau of Animal Industry and the Bureau of Plant Industry, also. We said that we could not afford to be parsimonious or small minded in the matter of furnishing means for this great constructive work of helping to supply the people of this country with food and clothing.

The CHAIRMAN. The time of the gentleman has expired.

Mr. STAFFORD. I am speaking on my reservation of the point of order.

The CHAIRMAN. The Chair will make this statement——

Mr. STAFFORD. Has the Chair changed his opinion that he recently expressed concerning that?

The CHAIRMAN. The Chair is informed that the practice has uniformly been to proceed under the five-minute rule.

Mr. STAFFORD. I was quite advised of that when the Chair made his former statement. I am glad he has changed his ruling to conform to the uniform practice.

Mr. LEVER. I ask unanimous consent that the time be extended two minutes.

The CHAIRMAN. The gentleman asks that the time be extended two minutes. Is there objection?

There was no objection.

Mr. STAFFORD. May I ask the gentleman whether in these amounts that the committee has recommended the amounts of the estimates have been allowed almost uniformly?

Mr. LEVER. In some instances that is true and in some instances it is not true.

Mr. STAFFORD. In those instances in which it is not true, are there cases where the committee has gone beyond the estimates?

Mr. LEVER. That is true in some instances and in some instances not.

Mr. STAFFORD. What are those instances, if the gentleman can inform the committee?

Mr. LEVER. There is no item for this bureau, as I recall, where the estimates have been exceeded or where they have been very much reduced, except in the item for Army horse breeding.

Mr. STAFFORD. In the gentleman's explanatory statement he did not single out those items in which the Committee had gone beyond the estimates of the department.

Mr. LEVER. I think if the gentleman will look at the report that the chairman of the committee filed with this bill he will find every single item explained rather fully.

Mr. STAFFORD. I have glanced at it, but I do not see that you single out an item where you have exceeded the estimates.

Mr. LEVER. I do not know that we have, but I can put my finger on each item of that kind.

Mr. STAFFORD. Mr. Chairman, I withdraw the reservation of the point of order.

Mr. BOOHER. Mr. Chairman, I renew the point of order.

Mr. GARNER. Mr. Chairman, I move to strike out the last word. I was very much interested in the statement the gentleman made with reference to the use that the $50,000 was to be put to, and I think it can be utilized to very great advantage.

Mr. LEVER. I do not think there is a more important item in the bill than that.

Mr. GARNER. I heartily agree with the gentleman. What I wanted to call attention to is that you confine the expenditure of the $50,000 to a small area in the United States—about 170,000 square miles. Now, if this money can be so efficiently utilized for the purpose of teaching the people how to produce cattle more economically and thereafter have a greater supply of meat, why not extend the area? If this can be used to such an advantage, why not increase the area and, if necessary, increase the amount of the appropriation?

Mr. LEVER. I will say to my friend that the thought of the committee was that this being the first time that we have attempted this line of work, we felt that we ought to go slowly on it.

Mr. McLAUGHLIN. Mr. Chairman, I do not like to offer any opposition to the provisions in this bill, because I took some part in preparing it, but I want to express myself in relation to this particular measure as I expressed myself in the committee. I am not opposed to the use of the money for this particular purpose, but I am opposed to the appropriation being made in this way. There is an appropriation for farm-demonstration work, carrying $378,000, ostensibly for work in the destruction of the boll weevil, but it is purely farm-demonstration work.

Mr. LEVER. The gentleman is not discussing the item to which he is objecting; this is the cattle tick.

Mr. McLAUGHLIN. I know. There is also an appropriation of $400,000 for farm-demonstration work and farm-management work. It seems to me the two items ought to be combined. These appropriations for farm-management and farm-demonstration work ought to be put in one appropriation.

Then, in order to get more money, an appropriation is asked to assist farmers in another particular section of the country to engage in other lines of agriculture, which is also farm-management and farm-demonstration work. There ought not to be separate appropriations for this work; the appropriation ought to be large enough, and there ought to be only one appropriation.

Mr. CANDLER of Mississippi. The gentleman does not object to the amount, but only as to the division made in the expenditure.

Mr. McLAUGHLIN. The gentleman from Mississippi knows that I have taken that position all the time. Here is $50,000 for farm-demonstration work in an area free of the cattle tick, $400,000 in the States of the North, $378,000 for farm-demonstration work in the boll-weevil section, and $10,000 carried in the bill for farm-demonstration work in the cane area, put in at the suggestion of the gentleman from Georgia [Mr. PARK]; also $50,000 dollars for farm-demonstration work in the Louisiana cane area—all farm-demonstration work. Why not make it $700,000 or $800,000, or whatever is necessary for farm-demonstration work, and be done with it, and let the country know how big the appropriation is and the kind of work being done.

Mr. CANDLER of Mississippi. The gentleman would be willing to put it all under one head and make one appropriation?

Mr. McLAUGHLIN. I would; and give the department authority to use that money where it could be best used.

Mr. CANDLER of Mississippi. The money is well expended, the gentleman thinks?

Mr. McLAUGHLIN. I do think it is well expended, but I do not think one appropriation ought to be made for farm management and its use limited to an area described as the cattle-tick

area, another appropriation limited in its use to the boll-weevil area, and another appropriation to be used for the same purpose in the Louisiana cane area. Let there be one appropriation.

Mr. MANN. Will the gentleman yield for a question?

Mr. McLAUGHLIN. Certainly.

Mr. MANN. I take it that these items have to be expended by experts. In the gentleman's opinion, would it be more desirable to have the experts in charge of the live-stock demonstration in the Bureau of Animal Industry and not in the Bureau of Plant Industry, where the demonstration work will be carried on?

Mr. McLAUGHLIN. In answer to the gentleman, my idea is that this work can be done by any well-informed man going into a community and suggesting better methods of agriculture, in stock raising, and in other lines.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. McLAUGHLIN. I ask for five minutes more, Mr. Chairman.

Mr. LEVER. Mr. Chairman, I ask unanimous consent that all debate on this paragraph and amendments thereto be closed in 10 minutes.

Mr. BOOHER. Ten minutes is not time enough, Mr. Chairman, and I object.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent that his time be extended five minutes. Is there objection?

There was no objection.

Mr. McLAUGHLIN. Mr. Chairman, my objection is that, under this method of making appropriations, one man goes into the tick area to teach farmers a better way of raising hogs and cattle. Another man, under another appropriation, administered by the Bureau of Plant Industry, covers exactly the same territory and undertakes to teach the farmers to raise in a better way some of the crops they are engaged in raising. Another man will come along from another department, under another appropriation, the same kind of a man in the same territory, meeting the same people, and suggest some better method of agriculture in some other line. One man could do the entire work, and it could be better done under the administration of one department than several.

Mr. HAUGEN. If the gentleman will allow me to suggest that often two men are sent from the same bureau in the same field to do practically the same thing.

Mr. McLAUGHLIN. That is true.

Mr. STAFFORD. As I understand it, all of these respective agents are qualified to do all of the work, and they are merely duplicating the work of some other agent?

Mr. McLAUGHLIN. I think they are qualified; they ought to be. It is not difficult work. It does not, as I think the question of the gentleman from Illinois [Mr. MANN] implies, take an expert.

Mr. MANN. Mr. Chairman, will the gentleman yield?

Mr. McLAUGHLIN. Yes.

Mr. MANN. I have a brother who is pretty well known among agriculturists with reference to raising crops, and I have frequently heard him say that he did not know enough about fattening cattle to undertake it under any circumstances.

Mr. McLAUGHLIN. Would the gentleman say, then, that it was incumbent upon the Federal Government to hire a man to go on his brother's farm to show him how to feed cattle, another to show him how to feed hogs, another man to show him how to cultivate and harvest oats, and still another to teach him in regard to wheat? That is what this policy of separate appropriations leads to.

Mr. MANN. They have not anybody in the Government employ who can show my brother anything about raising oats and crops of that kind.

Mr. LEVER. Mr. Chairman, will the gentleman yield?

Mr. McLAUGHLIN. Yes.

Mr. LEVER. The gentleman has been a member of the Agricultural Committee for a long time, under Republican and Democratic administrations. I desire to ask the gentleman if this bill is not the first bill that has ever come from this committee since he has been a member of it which provides for such a reorganization of the Department of Agriculture as will take care of the very thing about which he is complaining?

Mr. McLAUGHLIN. Mr. Chairman, in answer to that I will say that this bill more than any that has come from the committee is separating these different lines of work and providing for the employment of a number of men to do the same kind of work where one man might do it all.

Mr. LEVER. The item in the bill to which I was calling attention is that item which provides that the Secretary of Agriculture shall submit his estimates upon a plan of reorganization that must be worked out, and does not the gentleman also know that the Secretary of Agriculture has in mind the very thought that all of the demonstration, extension, and teaching work shall be done through one agency; that all of the research work of the department shall be done through one agency; that all of the quarantine work of the department shall be done through one agency; while the Weather Bureau, because it is of the type it is, of course would have to be separate and distinct, as would also the Forestry Bureau? I think the gentleman ought to say that Secretary Houston, Assistant Secretary Galloway, and practically every man from the Department of Agriculture who discussed the subject, discussed it along the line of running the department in the future, if this language stays in the bill, as I hope it will, with the end in view of coordinating all of the work of the department so that we will get rid of the lost motion that the gentleman complains of now.

Mr. McLAUGHLIN. Mr. Chairman, I do not know that I am justified in talking much longer upon this, as I approve the general purpose of the department in these particular matters. I simply object to the manner in which the money is appropriated.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. BOOHER. Mr. Chairman, I agree thoroughly with the gentleman from Michigan [Mr. McLAUGHLIN]. We are not appropriating too much money for the benefit of farm work in this country, but we are appropriating too much money to be expended in certain localities for certain specific purposes. I think the appropriation for farm demonstration work ought to be liberal, and it ought to be expended in an intelligent manner in every section of the country for the benefit of all the farmers. I know something about this cattle proposition. The chairman says that the beef, the food cattle of the country, are constantly decreasing, and that they want to teach the farmer in certain sections of the country that it would pay him better to raise a high-grade animal than it would to raise a scrub. There is not a farmer in the United States, there is not a farmer anywhere, who has brains enough to be a farmer, who does not know that without the Government expert telling him. When my friend talked the other day about the decrease of beef cattle in this country he should have told us that the beef product had increased as the number of cattle had decreased, and he would then have stated the entire facts, because two beef animals sent to the market to-day will make from three to five beef animals sent to the market 20 years ago. We have no more of these great range cattle that went to the markets as they used to go. They are not being raised. The farmers and the stock raisers all over this country are improving their stock, and they do not need an expert to tell them that it pays. It is proposed to spend $50,000 to go amongst the farmers who took the first prizes at the great National Stock Show in Chicago—the farmers in Mississippi—and tell those people that it will pay them to raise good cattle. If I represented Mississippi, I would resent that.

Mr. LEVER. I would like to see one gentleman from Mississippi do it.

Mr. BOOHER. No; they probably would not have the nerve, but they would fight something else.

Mr. CANDLER of Mississippi. Oh, the gentleman from Missouri would never question the nerve of a Mississippian. [Laughter.]

Mr. BOOHER. No; I would not on certain subjects. The testimony taken by the Committee on Agriculture is very interesting.

Mr. LEVER. It is a very interesting committee.

Mr. BOOHER. It is an interesting and able committee, but they put more in here than they ought to put in if they expect the people to swallow this appropriation for teaching the farmer how to raise good cattle. Of course, there is a dispute between Arkansas and Mississippi as to whether the particular prize animal was bred in Mississippi or Arkansas. There is no dispute that it was born in Mississippi and taken from there to Chicago and that it took the first prize in the National Stock Show as the best Hereford bull in the United States. It is now proposed to go down there and spend $50,000 to teach that kind of farmer that it is a good thing to raise good cattle. For years and years the breeders up in Missouri, Kansas, and Iowa have been raising blooded cattle, and the cattlemen of the South have been coming up there and shipping that blooded stock down by the carload and the trainload, and they did not have to have a Government expert tell them that it was to their advantage to do so.

Mr. HUMPHREYS of Mississippi. Will the gentleman yield?

Mr. BOOHER. I will yield to the gentleman.

Mr. HUMPHREYS of Mississippi. The gentleman says this animal took the prize as being the finest in the United States. It was the finest in the world, as the world was admitted to that contest.

Mr. BOOHER. Will my friend tell me whether the animal was from Mississippi or Arkansas?

Mr. HUMPHREYS of Mississippi. It was from Mississippi. [Applause.]

Mr. BOOHER. The Arkansas gentlemen will not admit it. Now, I say that that ought not to be in this bill. I say that it ought to be stricken out and be left to general farming work. Let us make this appropriation $2,000,000 for farm demonstration work, if necessary. Let us make it, and if the Agricutlural Department thinks it ought to be spent down there eradicating the Texas tick, let them do so, instead of making a specific appropriation not exceeding $625,000 for that purpose and say to the farmers all over the rest of the country, "You may hustle if you want to get a single dollar out of the appropriations for farm demonstration work."

The CHAIRMAN. The time of the gentleman has expired.

Mr. BOOHER. I would like to have five minutes more.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent to proceed for five minutes longer. Is there objection?

Mr. LEVER. Mr. Chairman, I am not going to object, but I want to say, certainly to gentlemen on this side of the House, that we must get along with this bill. The statement of the gentleman from Missouri is very interesting, but I want to ask my friend that we move along here a little to-day.

Mr. BOOHER. Well, I will not take any more time from the gentleman. Now I want to get back to the prize animal. Here is the evidence; this is what Dr. Rommel said; he is an expert of the Agricultural Department:

Mr. ROMMEL. It was raised in Arkansas. The herd came from Mississippi.

Mr. HAWLEY. Bred in Arkansas?

Mr. JACOWAY. It was raised at Booneville.

I presume that meant Booneville, Mo., in my friend's district.

Mr. WINGO. Mr. Chairman, I object. There is only one Booneville, and that is in my district, where the animal was raised.

Mr. BOOHER. Here is what Dr. Melvin said:

And a few years ago they would not have thought it possible.

That is, a few years ago they would not have thought of raising such an animal. Now, that is a reflection upon the intelligent farmer everywhere. It is a reflection upon him to say that a few years ago it was up to him to improve his stock and now appropriate money to tell him he was right about it.

If you will give the farmer credit of having as much sense as people have who are engaged in other business, that he has as much sense and knows as much about agriculture as we do, although we are farmers, if you will just give him credit and then send some experts out through the country to tell him how much better he can apply his knowledge than by making this kind of an appropriation, you will do our farmers a great amount of good. Now, that is what we ought to do with the money. I say, we are not appropriating too much for the farmer; but let us see what the Agricultural Department is doing. It issues bulletin after bulletin telling the farmers what to do. Is that the reason why you did not want the farmers to learn how to read, so they would read these farm bulletins? They tell the farmer how to apply all these things, and let us appropriate money enough to put the farmers' bulletins in the hands of every farmer in this country, so that those engaged in a particular kind of industry will read them, which he can and will be glad to do.

Now, in regard to the cattle-tick business. What has the Government done for the people down there? Why, they have issued bulletins telling these farmers about this process of dipping in the vats, and they have gone so far as to give a sectional diagram of the vat and giving the complete vat. They have got a vat with an animal swimming through it and a gentleman, well dressed, sitting on the fence with his back to the audience; and I presume he is there as an expert, watching the poor steer go through the vat. That is the way you are spending your money. Now, if the farmer is furnished with the means, after he knows how to do these things that are furnished, I tell you the farmer will do all he can, and he does not need a man to stand up and tell him he can drive an animal through a vat of this dipping medicine in some way or another way. He has got sense enough to do the thing himself.

Let me tell you what some of these experts did at the stockyards in St. Joseph, Mo. Under the law they had to dip sheep down there. Every sheep that had been shipped in from the West that the farmer wanted to take out to feed had to be dipped. One farmer in my county bought 600 head of sheep, and all of them had to be dipped at his expense at the rate of 3 cents a head. The Government expert stood there and superintended the dipping of those sheep, and 300 of the 600 died, mostly before he got them home. Why? It was because of the expert. The dip had to be warmed to a certain temperature, and the expert stood at the foot of the vat and made his tests instead of at the head, where he ought to have been and where the hot liquid was coming in all the time, and as a result the sheep were scalded and died from the effects of it. That is your expert!

Another gentleman, in the district of my friend from Missouri [Mr. ALEXANDER], bought sheep at the same time and at the same place, and they were dipped by the same expert, and that farmer lost nearly all of his sheep. There is no pay for that. The Government denies all liability.

Mr. MADDEN. It is rather a bad case of expert.

Mr. SELDOMRIDGE. I will say to the gentleman that in 1877, in Colorado, they were dipping sheep, and the sheepmen, by using a thermometer, knew how hot the liquid was, and they had no trouble.

Mr. BOOHER. Oh, when I was a boy 10 years old I helped my father dip sheep, and we did not have an expert to help us, either. Farmers all over the East did that, and I presume they are doing it now. My contention here is to strike out all these appropriations for special work. Let us make a lump-sum appropriation for the benefit of farm work, and leave it with the Secretary of Agriculture to determine in what sections of the country he will spend it.

The CHAIRMAN. The time of the gentleman from Missouri [Mr. BOOHER] has expired.

Mr. LEVER. Mr. Chairman, I have listened to my friend from Missouri, and I have listened to my friend from Wisconsin [Mr. STAFFORD]. My friend from Missouri says that we should put all of these appropriations into one great lump fund.

Mr. BOOHER. I say for farm work.

Mr. LEVER. For farm work, and that amounts to three or four million dollars, all told. My friend from Wisconsin says to segregate them. And we are between the devil and the deep blue sea, and gentlemen can take their choice.

Mr. STAFFORD. Will the gentleman permit?

Mr. LEVER. Yes.

Mr. STAFFORD. I never made any such claim as to segregation where it permitted of such duplication of work as suggested by the gentleman from Michigan, but I did insist on some segregation where you would have control over the department against spending money wastefully, especially as to items connected with the Weather Bureau.

Mr. LEVER. Ever since I have been a Member of this House I have heard this argument about the segregation of the items. The Congress requested this segregation several years ago, so that every Member might know just how every dollar is being spent and for what purpose, and the committee has been trying to follow as nearly as it could the direction and the will of Congress in that respect.

I want to say another thing, and I think the time has come when I should say it. If gentlemen do not believe that the work of the Department of Agriculture is a wise expenditure of Federal money, the people's money, they ought to have the courage to announce their amendments to this bill and strike out these items. I am willing to submit every proposition in this bill to the judgment of the House of Representatives. I am willing to stand here and defend every item of this bill as being a wise investment upon the part of the Federal Government, and if gentlemen do not believe that to be the case, if they believe that it is a wasteful expenditure of the people's money, it is their duty, representing honestly and courageously the people of their districts, to take the floor here and offer amendments by which these appropriations shall be cut down or stricken from the bill entirely. It is one thing, my friends, to complain; it is one thing to criticize; it is one thing to destroy—it takes one kind of mind to do that, but it takes an entirely different kind of mind to create or construct something. [Applause.]

The Committee on Agriculture stands here as a constructive, creative committee. We have no apologies to make for any of the items in this bill. I would be willing to submit them to a popular vote in the United States, and I venture the assertion that of all the appropriation bills passed by this Congress the Agricultural appropriation bill would prove itself the most popular by a vote of 50 to 1 of the people of the United States.

I am getting a little bit tired of complaint and criticism. I have seen appropriation bills carrying $94,000,000 for the Army, $140,000,000 for the Navy, $180,000,000 for pensions, $9,000,000 for this little District of Columbia, and $11,000,000 for the In-

dians of this country, and I have not seen these gentlemen who are complaining now standing on the floor of this House fighting those appropriations. But every time the Agricultural appropriation bill comes on the floor, a bill that is seeking to do something for agriculture, the greatest industry of the American people, gentlemen find fault, criticize, talk, and complain. [Applause.]

Mr. YOUNG of Texas. Mr. Chairman, I move to strike out the last word.

My friend from Missouri [Mr. BOOHER] has made some criticism of the $400,000 item carried in this bill for the eradication of the southern cattle tick. It has not been many years, Mr. Chairman, since the Government began in this great work, but they have made the discovery that there is a remedy by which the southern cattle tick that infests all of the Southern States can be absolutely destroyed. That remedy is now being used throughout the infested districts. It is a difficult matter to get these discoveries to the individual farmer, and it is still a more difficult matter when the discovery, as made in this instance, carries with it, in order to have it avail anything, a large expense account to make it available.

In my State, a great cattle-producing State, according to the last census we had more than 7,000,000 head of cattle below the quarantine line. The Government has seen fit to throw a dead line above us and say to our people that they can not ship one hoof of those cattle beyond that dead line unless they have freed them from this tick pest. That same dead line is thrown above every Southern State. The Government has done it. Now, what effect does it have? It holds from the commerce of the world more than 7,000,000 cattle in my State. It holds from the commerce of the world from 700,000 to 1,200,000 in each of the other Southern States of this Union. Since the Government throws this dead line about us, is it not a part of the business of this Government to help carry out and disseminate this information among the meat-growing people of the country to the end that this pest may be completely eradicated?

Now, in the State of Texas the great ranch owners provide their own dipping vats, at an expense of from $500 to $800 a vat, and they are freeing these ranches very speedily of the cattle tick. But going into the eastern portion of the State, where the cattle are grown by the individual farmer, the man on the 100 acres or 50 acres of land, and in the other Southern States, where the conditions are the same as they are in the eastern part of my State, how are they going to get the information?

The States have begun to act. Practically every Southern State has made an appropriation in aid of the extermination of the cattle tick, and why delay this matter? Why not increase the appropriation here, as the States have increased it, and sweep the cattle tick away by one fell swoop, in order that we may increase the meat supply of this country? The people of Illinois, the people of Indiana, the people of Ohio, the people of the corn belt of the country need the southern cattle in order to use the supplies that they raise on their farms to the best advantage; and the meat-eating people, who need meat, are compelled to pay an increased price by reason of shortage in cattle grown for market, and this Government could not engage in a better work than this identical work, and the successful culmination of the Government's endeavors along this line will directly benefit practically every citizen of this Republic. [Applause.]

The CHAIRMAN (Mr. MURRAY of Oklahoma). The time of the gentleman has expired.

Mr. MANN. Mr. Chairman, I ask unanimous consent that the gentleman from Massachusetts [Mr. PAIGE] may address the House for five minutes on another subject. It is agreeable to the gentleman from South Carolina.

Mr. LEVER. Yes. I have no objection.

The CHAIRMAN. The gentleman from Massachusetts [Mr. PAIGE] is recognized for five minutes.

Mr. PAIGE of Massachusetts. Mr. Chairman, during my short stay in this House I have listened frequently to expressions of opinion in favor of and against the present tariff bill. I would like to leave that discussion for a moment, and refer to a matter which, in my judgment, is one of the greatest concern to the business of this country, and to a far greater extent than the people generally realize.

There is one great question which must be solved, and solved speedily, and as that question is solved, right or wrong, depends the weal or woe of our people for years to come.

I refer to the railroad problem. The railroads of this country, assuming all of the criticism of their financial management that has been made to be true, are nevertheless confronted by a condition and not a theory at the present time, and should receive consideration at the hands of Congress and the American people.

In the month of November last the gross earnings of the leading railroads of this country showed a decrease in earnings over the figures of November, 1912, of $9,000,000, while their operating expenses showed an increase of $6,000,000 over the corresponding month of the previous year. Thus the net earnings of these roads are decreased by $15,000,000 for one month alone. Now, what does this mean? It means simply this: That if the railroads of the country are compelled, as they are and have been, to pay increased wages, increased cost of supplies, increased interest charges, on account of their credit being injured by the onslaughts made by State and National legislatures upon them, it will be but a short time before the railroads of the country will all be in bankruptcy if they are not allowed a reasonable increase of rates to cover the increased expenditures forced upon them.

Mr. GORDON. Mr. Chairman, I make the point of order that the gentleman is out of order. The case he refers to is now being tried by the Interstate Commerce Commission, and it is not proper to discuss it here.

Mr. PAIGE of Massachusetts. I meant to discuss it as it applies to agriculture.

Mr. MANN. Mr. Chairman, the gentleman has unanimous consent to discuss it.

Mr. GORDON. Is it proper, Mr. Chairman, to discuss a case that is on trial in the Interstate Commerce Commission? The question is whether this 5 per cent increase ought to be granted or not, and it seems to me that ought to be left with the Interstate Commerce Commission.

Mr. MADDEN. Mr. Chairman, the House granted the gentleman consent to speak on any subject he wanted to speak on.

The CHAIRMAN. The gentleman from Massachusetts is in order and will proceed.

Mr. PAIGE of Massachusetts. The railroads are compelled to accede to the demands of the public to furnish better rolling stock, more frequent train service, to abolish grade crossings, and hundreds of other things to satisfy the demands of the public, and yet when they come forward, as they have for the past 10 months, asking for a small increase in rates, they are turned down by the State or the Nation, and in the meantime their credit is injured to the extent that they are not able, if they thought it the part of wisdom, to accede to the demands of the public.

Take it in my own State. The New Haven Railroad has been made a football for the politicians for the last half a dozen years. No corporation, whether it be a railroad or a manufacturing concern, could avoid bankruptcy that has the onslaughts made upon it that have been made upon this road.

But a great many people have an idea that the depreciation of railroad stocks and railroad securities affects the Morgans and the Rockefellers and the other great captains of finance, and they stand by indifferent as to results. There never was a greater mistake. There is not a savings bank, a life insurance company, or a trust estate that has not thousands or millions of dollars invested in railroad securities.

The credit of the railroads has been injured to such an extent that they are obliged, if they borrow money, to pay exorbitant rates for the same, and what is the result?

The millions of securities held by these institutions and these trustees are depreciated in value just the difference between the high rates of interest they are compelled to pay to-day and the amount of interest-bearing bonds issued when sanity prevailed in regard to railroad properties and the onslaughts upon the railroads had not begun.

I want to quote a statement made by the Hon. Henry M. Whitney, of Boston, one of the leading business men of my State, a Democrat of prominence, and one who has been the nominee of that party for governor of Massachusetts, who said:

> The railroads of Massachusetts have stood the friends of the people from the time the first spike was driven in the building of the first railroad in the United States to the present day. I warn the working men and the working women of the State of Massachusetts that their homes and their firesides are in danger; that their means of livelihood are threatened by the folly and the stupidity and corrupt use of political power by their representatives in high places.
>
> To reasonable control and regulation of railroads there can be no objection. But legislation which has no excuse for being except prejudice and political exigencies, should find no place on the statute books of this Commonwealth. But if such things are to be and are to go on unrebuked by the people themselves, then the ax has been laid at the root of the tree of our industrial prosperity and we may well pray, God save the Commonwealth of Massachusetts.

I commend these words to the attention of the legislators on the floor of this House, and say here and now that the time has come to cry a halt against the sandbagging of the railroads of the country, whether it emanates from the corner grocery, the editorial rooms of the great newspapers of the country, or in the State legislatures, or the Halls of Congress.

We have recently passed a bill in this House appropriating $35,000,000 toward building a railroad in Alaska. I actually believe that there would accrue far greater benefits to the people of this country to appropriate that amount of money to save the railroads that we now have; to save the great business interests that are dependent upon the prosperity of the railroads; and to conserve the interests of the laboring men employed by the railroads, whose interests run far up into the millions.

I have been surprised, when the friends of the present tariff bill have been endeavoring to answer the charges of diminished business in the steel trade of the country, the shutting down of mills, the throwing out of employment of workmen, and the like, that some one has not arisen on the other side of the House and made a statement that the railways consume, directly and indirectly, between 40 and 50 per cent of all the iron and steel products of the country, and the present condition of the railroad business and the restriction in the consumption of iron and steel by the railroad companies vitally affects this industry.

But I understand very well that it is so popular to antagonize and to be opposed to anything favoring the railroads of the country that no one has had the courage to stand up and make this statement, for fear they would be charged with being owned by the railroads.

Whenever the purchases by the railroads decline, prosperity is not only threatened but will soon become an acknowledged fact.

I have not the time to go into the details of the present condition of the railroads of the country, but I desire to insert in my remarks an address delivered by Mr. Howard Elliott, president of the New York, New Haven & Hartford Railroad Co., at the Waldorf-Astoria Hotel, in New York, on December 11, 1913.

I speak on this subject at the present time not because it is the popular side of the matter, but because my State and New England are threatened, in my judgment, with great business disaster, that will in turn affect the country as a whole.

We may possibly survive a tariff that discriminates against New England manufacturers and New England agriculturists; our manufacturers may possibly survive the inequality of hours of labor and of child labor in the South. But we can not stand having our transportation facilities crippled, as they bid fair to be at the present time, and I believe we have reached the danger point where some one should speak out.

It is easier to avoid the danger line than it is to face the crisis, but if the men who fought at Gettysburg had avoided the danger line the history of the country would have to be rewritten.

For one I believe the antagonism to railroads has gone beyond all reason, and I believe the time has come when men who have the interests of the country at heart should take their stand and cry a halt against the policy that has not only crippled but bids fair to destroy one of the greatest industries of the country.

The railroads of the country constitute its greatest industry next to that of agriculture, and while we are giving deserved attention to the needs of agriculture, in order that the agriculturists may prosper, we utterly ignore the present railway conditions of the country.

If we really wish to enhance the interests of the agriculturists, we must not ignore the present needs of the railways of the country. Unless we either by our acts or, at least, by expression of opinion lend our assistance in straightening out the great railroad problem of the Nation we are singularly remiss in our duty. [Applause.]

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. PAIGE of Massachusetts. I ask unanimous consent, Mr. Chairman, to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Massachusetts [Mr. PAIGE] asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. PAIGE of Massachusetts. Mr. Chairman, I insert the following as a part of my remarks:

THE RAILWAYS AND THE GOVERNMENT.

[Address by Howard Elliott, chairman of the New England Lines, delivered at the fifth annual dinner of the Railway Business Association, the National Association of Manufacturers of Railway Materials, Equipment, and Supplies, at the Waldorf-Astoria Hotel, New York, December 11, 1913.]

This is a gathering of representative men who contribute much to the industrial activity and prosperity of the Nation. The opportunity of speaking to you was accepted with hesitation, and only because it gives me a chance to meet many old friends and make, I hope, some new ones, and also because gatherings like this help us to appreciate our mutual interests. It is well to talk over those problems which the remarkable social and industrial evolution of the Nation has placed upon the business men, who are anxious that this country shall progress, and who believe that the social and intellectual advancement of the people depend upon reasonable success in all forms of industry—a class of men also who are as high minded and patriotic and as great believers in the United States and its future as any class of men in the country.

INDUSTRIAL INTERDEPENDENCE.

The rapid increase in the country's population, accompanied, as it has been, by a racial mingling unprecedented in history, has produced new economic conditions and has brought to the fore new problems and new theories of the relation of the Government and the citizen in his business. The application of the principle of increasing Government supervision of business emphasized more than ever before the interdependence of all industry.

The industries which you and I represent are very closely related. Lack of sustenance and stagnation in one affects the others. If the railways of this country are to be maintained and operated as they should be, increasing their facilities to meet the increased demand of the growing business of the Nation, then they must be supplied with materials, and this benefits the many industries which you represent. These purchases of the railway stimulate the activities of the whole country. [Applause.] On the other hand, any curtailment in the purchasing power of the railway will have a withering effect on many industries and retard the prosperity of some which have been leading factors in the commercial growth and expansion of the Nation.

RAILWAY GROWTH.

The growth of the railways in the United States is without a parallel in any other nation. In their present form these railways have been constructed practically within the last 50 years. The total operating revenues of railways earning $1,000,000 or more for the fiscal year ending June 30, 1913, were $3,057,089,811, of which $2,134,563,789 came from transportation of freight and $678,440,089 from carrying passengers. In the same year these railways paid out for expenses $2,118,529,173, of which $407,156,008 was for maintenance of way and structures, $501,663,582 for maintenance of equipment, $1,074,914,428 for the actual expenses of transportation, and $134,795,155 for administration and traffic expenses. The net operating revenues of the railways of the country in the last fiscal year amounted to $938,560,638, out of which was paid in taxes $123,682,118.

The railways east of the Mississippi and north of the Ohio and Potomac Rivers in the same year did a business of $1,386,073,429, of which $992,403,390 was from freight and $293,234,927 from passengers carried. For the three items which make up between 90 and 95 per cent of the expense of operation, maintenance of equipment, maintenance of roadbed, bridges, etc., and transportation, these roads spent, in 1913, $246,727,105 for maintenance of equipment, $180,273,335 for maintenance of tracks, bridges, etc., and $502,734,000 for transportation.

THE RAILWAY PAY ROLL.

Everyone admits now that the transportation question in this country is a very vital one, and these few figures are given to emphasize its importance. And the importance to the general welfare is not alone in the service rendered by transporting man and his property but also because the railway is a great paymaster. The railway pay roll is one of the greatest pay rolls in the country, more than 1,700,000 employees receiving in wages and salaries last year nearly $1,250,000,000. Adding the families of those employees, there are nearly 7,000,000 people, about 7½ per cent of the total population, supported by this pay roll. Think of what this means to the communities in which these railway employees live, to the tradesmen to whom their earnings go for food and clothing! Think of the effect upon the business interests of this country generally of the distribution of this sum of money, passing through the hands of this multitude of purchasers into the channels of trade! It would be difficult to find a person in this country who is not, in one way or another, benefited by this employment of labor. The railway employee is an important factor in his community, and there is no better proof of the theory that the prosperity of a railroad and the section it covers are interdependent than that furnished by the part the railway employees' purchases play in helping business.

Out of $2,750,667,435 which the railways earned in 1910, $1,143,725,306, or 41.58 per cent, was distributed in wages and salaries; in 1911, out of $2,789,761,669, $1,208,466,470, or 43.32 per cent; and in 1912, out of $2,826,917,967, $1,243,113,172, or 43.97 per cent. And each year this wage distribution has been taking a larger proportion of the railway dollar. Between 1910 and 1911 there was an increase of 5.66 per cent in the pay roll and only 1.42 per cent in the operating revenues. Between 1911 and 1912 the increase in the pay roll was 2.87 per cent and in operating revenues 1.33 per cent. There are no very complete statistics of the amount of material purchased by the railways, but it is very large—many hundreds of millions of dollars.

Obviously, as an abstract proposition, because of its effect on general business activities and upon the welfare and happiness of so many people, everybody must want this great pay roll maintained and want the railways to go on spending money. Curtailment of the railway purchasing power, or a diminution of its pay roll, would be felt in millions of homes. A continued improvement of the railway will stimulate trade, give a general steadiness to business, and minimize depression. The money the railways would spend in expanding their facilities as they should be expanded, to keep pace with the growth of business in the country, would percolate into every conceivable artery of trade. Can it be doubted that this would impart that wholesome stimulus to business that is so anxiously awaited at the present time?

To a large extent the railway is simply a collecting and distributing agency of the sums, small in units but large in the aggregate, that the public pays for the service it performs. The railway owner retains for himself what, compared with many forms of other business, is a relatively small return on the value of the railway plant. If there is to be a halt in railway activity, if the railways of the country are to be forced, by the conditions imposed upon them, to abandon all new construction and restrict their outlay to the absolute necessities of maintenance and operation, what will be the result? Will there not follow a corresponding contraction, especially in those industries, many of them very large, which the railroad helps to support, and be imparted by them, in turn, through still other trade channels until an adverse influence is felt throughout the entire business life of the country? For example, the railways purchase a very large proportion of all the iron and steel made in this country. Thus their prosperity is very closely interwoven with the prosperity of the great metal industry of the country, and upon this industry enforced economies and the suspension of construction by the railways will have a most serious effect.

RAILWAY EARNINGS.

There is indisputable evidence that that expansion of our railways which has contributed so much to the country's prosperity has, by

reason of the conditions now imposed upon them, reached a point of practical suspension. There is hardly any new construction being undertaken, and improvements are being postponed wherever practicable, because of lack of funds. This is due, in part, to the great increase in the cost of labor and materials, in part to the elaborate and luxurious facilities which the people demand, and in part to the rise in the rates of interest, all of which is reflected in the loss in net earnings shown by recent statements of the railways; and this despite an increase in gross earnings maintained until very recently, though there are signs to-day of a falling off even in gross. In the case of the eastern roads, the gross earnings increased $187,000,000 from 1910 to 1913, while operating expenses and taxes increased $201,000,000, the increase in tax payments alone amounting, in those three years, to $11,590,000. There was an actual decrease in the net operating income of these roads of $16,311,000. In 1913 these railways earned in gross $1,424,000,000. Their net operating income was $336,754,000, and after payment of interest on funded debt and other obligatory charges there was left $206,600,000. The dividends paid out of this amounted to $130,000,000, which was 5.10 per cent on the capital stock outstanding. This was $19,000,000 less than the dividends paid in 1912 and $7,000,000 less than the dividends paid in 1910.

In the Central Freight Association territory a group of 28 roads, having 23,167 miles of road, or 51.5 per cent of the entire mileage in the territory—roads like the Big Four, Vandalia, Wabash, Chicago & Alton, and Illinois Central—in the year ending June 30, 1913, earned $63,000,000 more than in the panic year of 1908, but their operating expenses and taxes were $62,000,000 more, and after paying expenses and taxes their net operating revenues were only $811,000 more than in 1908, and their net corporate income was actually $8,000,000 less, although in these five years $180,000,000 of new capital had been invested in these properties.

The reduction in net is shown very strikingly in the statements of the New York Central, the Pennsylvania, and the New Haven for the first four months of the present fiscal year. In this period the New York Central lines showed an increase in gross earnings of $4,339,442, as compared with the same period of 1912, but as a result of increased expenses there was a decrease in the net earnings of $7,614,542. The Pennsylvania, for the same period, showed an increase in gross earnings of $5,100,192, but a decrease in net earnings of $4,367,795, while the New Haven, including all transportation lines in which it is interested, showed a decrease of $790,379.12 in gross and $4,020,311.51 in net operating revenue and of $4,934,725.01 in net corporate income, after allowing for all fixed charges of every kind.

THE RAILWAY PROBLEM.

I think that all candid and thoughtful persons will admit that the situation as reflected here is a serious one, not only as affecting the railways themselves but the entire business of this country. Indeed, with railway credit impaired, it would seem difficult for the railways to extricate themselves from the present situation unless a change occurs in public sentiment and in the treatment they receive from the people, as expressed through their various governmental agencies. Undoubtedly various causes have contributed to bring this situation about. Some of these have been economic and some social, and the railway has suffered from both, perhaps, more than any other industry in that the price of its service is no longer within its own control, and the same may be said of its great pay roll.

Is it not incumbent upon all thoughtful men who wish to see this country continue to prosper to stop and ask themselves what can be done in this emergency? Is this trouble a socialistic one, due to new currents of thought and feeling in the minds of a majority of our citizens fostered possibly by ideas of government brought here by many of our new citizens from the Old World, who influence many others with whom they come in contact? And if the trouble is socialistic, does it not behoove every citizen who does not believe in this kind of doctrine applied to business to speak out?

PRESENT TENDENCIES.

Many of us have hazy ideas about socialism, but the principle underlying the proposed socialistic state, as expressed by many socialists, is that from everyone shall be expected according to his ability, and that to everyone shall be given in accordance with his needs. The socialistic ideal thus expressed is that every man shall do his utmost, but that he is not to be paid in proportion to the amount of work that he does or in proportion to its value, but, on the contrary, he is to be paid in accordance with his needs. The tendency of the people of the United States, however, seems to be not to extend to the railways even that treatment which is expressed by this socialistic ideal. [Applause.] Under that ideal the railways would be expected to do all that they can, and would be allowed to receive all that they need, but is it not true to-day that the railways are expected to do more than they can and at the same time are not permitted to receive what they need?

THE HUMAN FACTOR.

For example, first and foremost, the railways are expected to run their trains without causing injuries or deaths that would be avoidable by all ordinary human precaution. Yet distinction is seldom made between the need for care and caution on the part of the public and the need for care and caution on the part of those intrusted with railway operation. [Applause.] A very large number of the injuries and half the deaths charged against the railways are of trespassers on railway property. If people will not keep off railway property the law should compel them to do so. [Applause.] Yet, although the railway companies have time and again urged legislatures to pass laws against trespassing, only two or three State legislatures have responded. In other words, more is expected of the railways in diminishing the number of casualties and fatalities than they can do, and there is not given them that protection which they need and which the people need. [Applause.] Wrecks and accidents are sometimes due to the delinquency of those charged with the management and operation of a railway, and it is only right that the managing officers of a railway should be held directly to account for defects in administration and carelessness in directing operation. But there is another side, and if the officers are to be held responsible for the administration and discipline the employees of a railway should be held responsible for submission to proper discipline and should not consider their allegiance to their brotherhoods above their allegiance to the company which employs them [great applause] or their duty to the public who supply the money for their wages. The Interstate Commerce Commission has pointed out that one of the most disturbing causes of accidents is the carelessness of the railway employees. Under these conditions, quite generally acquiesced in by the public and the press, the people make it difficult for the railway managers to preserve the discipline that the hazardous business of train operation demands and are asking almost more than the railways can do. [Applause.] If the railways are quasi public servants, their employees are also quasi public servants, and the people should hold the man as well as the master to his responsibility. [Applause.] By not demanding this responsibility, the people are not according to the railways that which they need and that which the people need.

IMPROVEMENTS.

While the railways should be held directly to account for maintaining roadbed, track, and other facilities in proper condition, the fact should not be lost sight of that safety in operation, as the people look upon it to-day, means equipment of steel or steel underframe in the passenger service, and other heavy expenditures in consequence. To demand that such improvements be made within any short period of time, in advance of the ability of the railways to pay for them, is to demand of the railways more than they can accomplish. And to hold them down and so to impair their credit that they can not obtain funds for such improvements is certainly not to accord to them that which they need. [Applause.] Again, in insisting that they serve the end of efficiency from the standpoint of economical operation and at the same time meet the requirements for fast and frequent service the people demand of the railways more than they can do. If they desire such service without allowing the railways the compensation that justifies it, they are not according the railways what they need.

In this respect the railways of Europe are treated better than ours, because there the justice of charging a higher rate for a fast freight service has been recognized. In Europe, as in this country, there are generally three kinds of service—express freight on passenger trains, expedited or fast freight, and ordinary or low-speed freight. But while in this country no distinction is made between the fast and slow freight in the matter of compensation, in Europe a higher rate is permitted in the case of "accelerated freight." Such a charge, if permitted here, would increase earnings and help the railroads to make improvements now badly needed and yet would not impose an undue burden upon the public. [Applause.]

COMPETITION VERSUS COMBINATION.

There is another respect in which the people of this country are dealing at cross purposes with the railways, and this is a question of transcendent importance, not only in the field of transportation but throughout industry and commerce. This is a question of competition versus combination. The New Haven road is a consolidation of 189 companies; the Boston & Maine and Maine Central of 200 companies. Before the consolidation of these lines, when it was desired to move a carload of freight from one end of New England to another, separate arrangements had to be made and varying instructions issued for each railway and endless bargaining and higgling over rates and schedules, as well as the expense of many separate organizations. In this combination of separate railways in one organic whole there is the possibility of efficiency under proper management, both from the standpoint of economical operation of the railways and from the public's standpoint of improved service. Because of practices incident to the great construction period of American development, and not confined to railways, the people created the Interstate Commerce Commission, which has pretty effectually not only restrained competition but stifled it, so far as rates are concerned. As the commission has the power to prevent the railroads from charging unreasonable rates and to prevent unjust discrimination, it is a grave question whether it is not an economical error to object to combinations of railways which, under suitable management, can be made to serve the ends of efficiency by more economical operation and better service. [Applause.] Here, again, we find an inconsistency on the part of the people, who insist that the railways shall practice the greatest economy and efficiency in operation, but who, at the same time, object to principles that will further such economy. If the railways are not supported by the people, they can not render service to the people. The very expression "The railroads and the people" indicates a distinction, a separation of interests, that the prosperity or the adversity of the railways is a matter of indifference to the people, and vice versa. Such a feeling occasionally finds expression in such an utterance as was made recently in the New Orleans Picayune, which editorially called upon the voters to oppose any candidate who was not "fully competent and willing to place the people's interests above those of the railroads and transportation lines under all circumstances," when, as a matter of fact, their interests are identical. One reason, I believe, for this attitude is that our people do not realize that railroading is business just as much as rail making or producing paint is business and that railways are as much a part of everyday life as any other business.

MULTIPLICITY OF LAWS.

There are State legislatures which pass laws concerning the railways within their State, and the laws of one State sometimes conflict with those of another and sometimes with those of the National Government. The effect of this multiform and heterogeneous regulation is to compel the railroads to serve 49 masters, although the impossibility of serving even two masters has been crystallized in a proverb. [Applause.] The effect of this multiplicity of laws also has been to undermine the confidence of investors, whose money is needed for the extension and the improvement of the railroads. It has been estimated that nearly $1,000,000,000 will be required within the next year to improve the railways so that they may meet the demands of growing business and safer and more luxurious service. How can this money be raised? How can this condition be remedied? Must it not come from cooperation of the people with the railways and from the conviction in the public mind that railways are rendering to the people not only an essential but a vital service?

GOVERNMENTAL EFFICIENCY.

If the people, by reason of new tendencies of thought, are exacting more of the railways and allowing them less in return for service rendered, are the people following the same rule with respect to the great machine of government which they themselves have created and in whose management they have a potent voice? There has been criticism of lack of efficiency in railway administration, and some of it is just, because railway officers and men are human and imperfect, but as a class they are doing better year by year. As a class they are high-minded, patriotic gentlemen, dealing with a problem that at times is very discouraging. They believe in frank and honorable business methods. They are doing the very best they can, and they should receive help and commendation from the public instead of hindrance and hostile criticism. [Great applause.] Does the Government set any better example to the business men or to the youth of this country of the necessity of hard, efficient, and high-minded work? [Applause.] In 1896 there were in the executive civil service, excluding employees

in the Congress, the judiciary, and enlisted men and officers of the Army and Navy, 178,717 persons, and in 1910, 355,635, an increase of 100 per cent in 14 years. While the population of the country has increased, it has not increased 100 per cent; and is the Government doing the careful, efficient work the taxpayer has a right to demand? [Great applause.] If the Government, with all its power, has been unable to resist the demands for greater elaborateness and more employees, can it be expected that the railways can escape these same forces? [Applause and cries of "No!" "No!"] Again, does the Government exemplify in its own dealings with others the principles of justice and business morality which the people, through this same agency, exact from those subservient to it?

STANDARDS OF CONDUCT.

There has been a gradual and desirable change in the standards of business in the past 20 years, and particularly in the past 10. Practices that a few years ago were considered proper in financial, commercial, manufacturing, and transportation business are contrary to the ideas of the public to-day.

In this business uplift I think the great railway systems of the country, taken as a whole, are in the front rank in trying to do their work on a high plane and in trying to observe the complicated laws of the land. [Applause.] And the larger and more complicated the business the more rigid is the carrying out of the maxim that "honesty is the best policy." [Applause.]

Some people are still ready to ask for the rebate, the pass, and the special privilege. Because of some glaring failures here and there the press and the public sometimes are too prone to condemn all. But every man in modern industrial business life knows how insistent the majority of men charged with the responsibility of management is for honesty, good morals, industry, and avoidance of sharp practice, and of trying to get something for nothing. [Applause.]

The moral effect of this policy on the young man in business must be good, because whether he likes it or not he must behave or be thrown into the discard. What kind of an example does the United States Government set before the youth of the land in its treatment of the great transportation lines? The Government should surely be as scrupulously honest and high-minded in dealing with the railways as it expects the railways to be in dealing with the people; but is it? [Applause.]

RAILWAY MAIL PAY.

Look at the mail and parcel-post situation for a moment. The Government pays the railways for transporting the mail on the basis of weights obtained in the autumn of 1912 for four years, beginning July 1, 1913, although there is always some increase in weight each year. In January, 1913, the parcel post began with a weight limit of 11 pounds, then increased it to 20, and it is now, in some cases, to be 50 pounds. The parcel post takes business away from the express business of the railway and reduces earnings in that way, but the Government pays nothing for the extra weight carried, as the test weighing was before the parcel post began. So for four years the railways must carry the increasing weight of the ordinary mail and the rapidly growing parcel-post freight for nothing, unless the Government takes steps to pay for service already performed and to be performed, which, so far, it seems disinclined to do. [Applause.]

On the New Haven Road, which right now needs all the help it can get [laughter and applause], a careful computation made by chartered accountants showed that the company was performing service costing $743,000 a year more than it received, and what is true of the New Haven is true of many other roads. Yet there is little criticism of the action of the Government, although it is taking large sums of money away from the railroads. [Applause.] Do you remember all the outcry there was, and justly so, when it was found some years ago that an importer in Brooklyn was defrauding the Government through false weights? [Laughter and applause.]

The New York Times, in an editorial in October, 1913, said:

"Every receiver of a postal parcel carried at the cost of the railways whose services are not paid for is a receiver of stolen goods." [Laughter and applause.]

The Chicago Inter-Ocean, in commenting on this, said:

"Any man who, merely because he has the power, compels another to give him unpaid service is a robber. [Great applause.] He has taken from the other his time, his strength, or his property in some form without making due compensation. If 10 men thus combine to rob 8, the immorality remains. Because several millions have combined, 'through Government,' thus to rob their fellow citizens who happen to own railroads, the wrong of it is not made right."

SERVICE WITHOUT PAY.

This is strong language, but is it not true?

Here are the railways, struggling to make both ends meet, and the Government takes service from them worth, exclusive of the parcel post, at least $15,000,000 per year, and no pay. What kind of an example is this for the great United States Government to set to the younger men of the country? [Laughter and applause.]

The whole theory of modern railway regulation is to secure honesty of operation and fairness of treatment on the part of the railway toward all classes of the public. Does it not therefore behoove the Government, in all of its relations with the transportation companies, to treat them with most scrupulous regard to the dictates of honesty and fairness? Treatment by the Government, however, of the question of compensating the railways for carrying the people's mails suggests a lack of full appreciation of this converse proposition by some of our highest governmental authorities. While not a single definite and practical step has been taken with a view of compensating the railways for carrying the additional weight of the mail for the period of the first six months of the parcel post, the Postmaster General was empowered, after July 1, to add not exceeding 5 per cent to the pay of the railways. But on August 15 the Postmaster General increased the weight limit from 11 to 20 pounds, and the Interstate Commerce Commission only last week gave its approval to his recommendation of a further increase to 50 pounds. No arrangements were made, however, and no arrangements have as yet been made, to compensate the roads for this additional weight. Is it any wonder that the parcel post under such conditions has been eminently successful? [Laughter and applause.] And is it any wonder that some advocates of Government ownership have seized upon its success as an argument for other theories, particularly with respect to its efficiency and economy? [Laughter and applause.]

The Supreme Court has ruled that the railways are not compelled to carry the mails, but that if they do carry them it must be under the rules laid down by the Postmaster General. Any thinking man will realize that they could not seriously consider refusing to carry the mails. If the law compelled them to carry the mails under rates fixed by Congress which were not compensatory, they would have some standing before the courts, but under the law as it stands they must make now a contract with the Post Office Department upon terms dictated by that department, and can only appeal to public opinion for a redress.

THE RAILWAY FACTOR.

The more men of fair and unbiased mind study the economic situation in this country, affected as it undoubtedly is by some of these experiments of government, the more are they impressed with the importance of the railway situation as a factor. Sir George Paish, eminent in the field of finance and economics, commenting on the country's condition after a long trip of observation, said recently:

"In considering the economic outlook of the United States in the immediate future, it is evident that the factor of most immediate importance is the application of the railways of the Eastern States to the Interstate Commerce Commission for an advance in rates. The difficulty experienced by the railways in raising capital has already caused many of them to reduce their new capital expenditures, and this reduction, in a large measure, accounts for the reaction in the iron and equipment trades that is now observable. If the difficulties of raising new capital become still greater, then it is obvious that the railway companies would practically stop improvement works and a serious setback in trade would result. If, however, the railways succeed in funding the large amount of notes which fall due in the current year, and in raising the new capital they require to expend on works of improvement and on new equipment, then the reaction in trade, due to international conditions and other influences, would, in my judgment, be comparatively small. Thus the action of the Interstate Commerce Commission in altering or disallowing the railways of the East to advance their rates by 5 per cent will have important economic consequences."

RAILWAY IMPROVEMENT NECESSARY.

With all our troubles, however, I still feel that we will come out all right, but—and this is a great big but—care must be taken in working out these problems, and the public must be told the truth or harm will be done that will take years to cure and the best results will be delayed. It is foolish in this country to admit that all railway improvement must be given up. These things must go on; public opinion will not tolerate a deterioration of the railways. It will insist upon their being able to furnish the service required by growing business, and by the very logic of the situation the public will provide the means for them so to do. But it is most important not to delay too long.

HOPEFUL SIGNS.

There are some rifts in the clouds. Signs indeed are multiplying of a readjustment of ideas in the public mind, which ought to find a reflection in the attitude of governmental agencies. The miasma which has arisen from the misrepresentation of the past is disappearing and the public mind is clearing in consequence. That a constructive rather than a destructive sentiment is growing is apparent. This drift in public sentiment is clearly beginning to make itself felt, as shown in some recent expressions of a friendly nature coming from those in Government offices. Such, for example, was the statement made only a short time before his death by Interstate Commerce Commissioner Marble: "We are seeking to bring about a condition that will be fair and equitable and that will make the railroads successful under present ownership." [Applause.] In the newspapers this drift is finding expression in a rebuke of continued criticism and intemperate denunciation of former practices, and a general realization that such a course can only produce widespread business atrophy.

CURING THE PATIENT.

National need of terminal and other railway facilities having been thoroughly impressed upon the public mind, shippers and editors generally convinced that larger net railway returns should be permitted, what are the reasons and perplexities which prevent the people from giving effect to a policy that will cure the trouble, making it unanimous? Even if there is only a vigorous minority opposed to such policy, candid consideration of their objections is due them.

It is claimed that the management of some roads has not been honest—that insiders have profited when they should not. The morals of all kinds of business have improved year by year, and things have been done in railway and other business in the development of the country that were probably not right then, and that certainly are frowned upon now by law and public opinion. Such things ought never to have been done. Owners of railways should root out dishonesty if it exists, and if they will not, public authority will do it. But is there anything in the situation that warrants calling a halt on the development of the continent? [Applause.] Every time a clergyman, a doctor, a senator, or a cashier is punished, are we forthwith to abolish all clergymen, all doctors, all senators, and all cashiers, while we unfrock that particular clergyman, convict that particular doctor, expel that particular senator, or jail that particular cashier?

RAILWAY SECURITIES.

Others say that some railways are overcapitalized. Whether they are or not—and certainly American roads have led the world in refraining from it—no more capitalization ought to be created than is necessary in order to serve the public. If too much was issued by some roads in the past, this is to be regretted, but no workable method has been suggested by which securities issued legally and bought in good faith can be taken from their owners without failures and receiverships that harm many more people than the owners of the securities. [Applause.] As for the future, every railway of importance runs through one or more States which regulate security issues. And apart from that, those responsible for railway management realize, as they never did before, the absolute necessity of sound business principles in issuing securities, law or no law. The present problem is not to restrict the issues of securities but to find people willing to buy them. [Laughter and applause.]

Another says that if securities were sold over the counter the bankers' commission would be saved. Perhaps, some day, if confidence can be restored, part of such commissions might be saved; but a railroad must have financial experts, as well as engineering experts, and pay a fair price for services rendered. If the commissions can be saved, they ought to be. But not even city, State, and Federal Governments, whose credit is based on the taxing power, have been able at all times to float even moderately large popular loans without the aid of bankers. [Applause.]

Others object because they say the new revenue would go to increased dividends. So some of it would and must. The dividend which a stockholder receives is not all that he would like or that his managers want to pay, but is an amount needed to induce him and others to buy more stock or bonds when an enlarged plant is necessary in order to meet the desires and absolute necessities of the public.

EFFECT OF ECONOMIES.

It is said that the increased income needed could be had by economies. It is true that economies have been introduced, and there is room for more of them. Railroad managers, as a whole, are pushing hard every day to improve men, methods, and facilities. Many economies, however can only be adopted by throwing away old appliances and buying new ones, which is the case in mills and factories as well as in railroads. And if the railroads have no money with which to get the new tools, they must do the best they can with the old ones. No effort in this direction should be neglected, and no other industry is, or in the nature of thing can be, so thoroughly organized nation wide as the railways to cooperate in studying, experimenting, and standardizing their progress. But, in view of the wonderful savings already accomplished, both major and minor, in the past few years, and in spite of the larger percentages of gross earnings absorbed by expenses and taxes, it is doubtful if the people should depend on such measures to offset the apparently irresistible rise in wages and in the price of materials, the higher cost of capital, and the demands for more elaborate facilities and luxurious service.

Are any of these obstacles sufficiently important to delay such revision of rate schedules as will meet this anomalous situation of increasing gross earnings, but declining net earnings, and still more rapidly declining net corporate income after payment of fixed charges?

The railway managers of the country want to know where to improve. They welcome just criticism based on a real knowledge of all the actual facts. It is their purpose to profit by it. To serve the public adequately, on the other hand, is also their purpose, and it is their duty to seek diligently from the appropriate authorities the sanction and help necessary if the railway is to do what the people want and must have if the country is to grow. So it would seem as if it was to the interest of the people to be patient with a railway which has practically no control over the price of what it has to sell—transportation—and very little control over the price of labor needed to produce that transportation.

New England is a great educational and financial force. She has sent her sons all over the country to help do the work needed. In the last edition of "Who's Who in America" 20 per cent of the names are those of men born in New England. Anything that affects adversely the credit and social welfare of New England will in turn affect the whole country. Her welfare and the welfare of her railways are important to the entire country. These six New England States have one-fourteenth of the national population and have one-twelfth of the national wealth. They consume one-eighth of the materials of manufacture and they have one-sixth of the bank deposits. For the New England lines that I represent I ask the patient good will of her people and of the Nation while her peculiar and difficult transportation problems are being solved. [Great applause.]

I do not think I ever sat in a board that felt so badly as the New Haven board did yesterday when the figures forced them to make the decision that took away a dividend, coming at Christmas time, from thousands and thousands of people. [Applause.] But they had the courage to take that position because they felt in the long run it would be better for the property, better for New England, and better for the stockholders themselves. [A voice: "Good!" "Good!"]

The business men of the country who benefit from the accumulated savings of New England, from her large purchases from other parts of the country, from her great and continuous contributions to the national welfare in sending out trained men and women, should at this time of storm and stress help the situation in every reasonable way. It is to your interest to do it, and as patriotic citizens, interested in the welfare of the whole country, I ask you most earnestly to help. [Great outburst of applause and prolonged cheering, Mr. Elliott rising and bowing.]

Mr. BORLAND and Mr. TOWNER rose.

The CHAIRMAN. The gentleman from Iowa.

Mr. TOWNER. Mr. Chairman, I desire to ask the gentleman from Missouri [Mr. BOOHER], if he is present, whether he withdrew his point of order against that language?

The CHAIRMAN. The gentleman from Missouri [Mr. BORLAND] is recognized.

Mr. TOWNER. Mr. Chairman, I was recognized by the Chair.

The CHAIRMAN. The Chair recognized the gentleman, but not to take the time of a gentleman who did not have any time.

Mr. TOWNER. I understand he did have the time.

The CHAIRMAN. He did not have any time.

Mr. TOWNER. I ask for time in my own right, Mr. Chairman.

The CHAIRMAN. The gentleman then should move to strike out the last two words.

Mr. TOWNER. If the point of order was not made, I desire to make it; and I make it against this language of the bill as new legislation. I want to call the attention of the Chair to this——

Mr. STAFFORD. Will not the gentleman withhold his point of order until the chairman of the Committee on Agriculture returns?

Mr. MANN. It is too late now to make the point of order.

Mr. TOWNER. I thought it was pending.

Mr. MANN. If the gentleman from Missouri [Mr. BOOHER] has not withdrawn his point of order, it does not need to be made again.

Mr. CANDLER of Mississippi. Mr. Chairman, the point of order was made by the gentleman from Missouri [Mr. BOOHER], and has not been withdrawn. The gentleman is not on the floor now, and I ask the gentleman from Iowa [Mr. TOWNER] not to make his point of order until the gentleman returns.

Mr. TOWNER. I offer this amendment, then, Mr. Chairman. We ought to know whether the point of order is withdrawn or not.

Mr. MADDEN. The point of order is not withdrawn.

Mr. McLAUGHLIN. Mr. Chairman, the remarks of the gentleman from South Carolina [Mr. LEVER], the chairman of the Committee on Agriculture, are, as it seems to me, something of a reflection on those who have differed from him as to how the bill should be made up.

I venture to say, however, that he intended no reflection on me, because I have been a member of that committee with him during the last six or seven years, and it has been my pleasure to cooperate with him. I am proud of my connection with him, and I congratulate him on the character of the work he has done and on what he has accomplished. He not only has the full confidence of his fellow members on the committee, but he has gained and richly deserves the confidence of the entire House. [Applause.]

But in some respects I differ from him as to the make-up of the appropriation bill, and I have expressed the same difference of opinion to-day. We have been speaking of the great work of farm demonstration and of farm management. Many of the Members of the House know that I have heartily approved of that work, although I have questioned the form of the appropriations providing for it. I found when I came to the House and learned better than I knew before the character of the work the great Department of Agriculture was doing, and learned better than I knew before the results of its investigations and experiments—I have felt that if results could be taken to the country in such form that they could be readily understood and applied by those who ought to know them and ought to have opportunity to apply them immense benefit would result. And I learned that insufficient appropriations were made for the purpose of carrying on what we may call this practical work of taking to the farmers in a practical way the results of investigations and experiments. And I have said before and I feel now that in the Department of Agriculture, as in the colleges throughout the country, the results of investigations and experiments load down the shelves.

The books are full of the results of experiments and investigations, which, however, are practically worthless unless they can be taken out to the farmers of the country in such a way that they can be understood and used in a practical way.

I say I have criticized the form of the appropriation because there is one providing for the taking of the results of these investigations to the farmers, providing for the employment of men to go into the southern section of the country, infested with the cotton-boll weevil, to teach the farmers there better methods of agriculture. That money, however, has been appropriated by Congress, it seems to me, under a misapprehension.

The words of the law are that the Department of Agriculture is to use the money in learning the best methods of combating the boll weevil, when the fact is that they have not been combating the boll weevil at all. They have been sending men into the southern country to teach farmers to raise corn and cattle and potatoes, without any reference to the weevil, and that money has been spent in many instances hundreds of miles away from the section of country infested with the boll weevil.

Mr. LEVER. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Michigan yield to the gentleman from South Carolina?

Mr. McLAUGHLIN. Yes.

Mr. LEVER. I did not hear the opening remarks of the gentleman from Michigan, but I understand he took some exceptions to my remarks, made a little while ago. I want to say to the gentleman that I do not include him at all in those remarks, because the gentleman from Michigan has been a very warm advocate of all the projects carried in this bill, and his only complaint while he has been on the committee has been that they have not been properly lumped. I want to say that we have not had a more efficient and more faithful member of the committee than the gentleman from Michigan.

Mr. McLAUGHLIN. I thank the chairman for what he says of my work on the committee and of my attitude toward projects provided for in this bill, but his former statement was general and seemed to apply to all who differ from him or who oppose the bill in its present form. I therefore felt justified in explaining my position.

I approve the work the Department of Agriculture is doing under appropriations made for farm demonstration, farm management, and farm practice, but appropriations are not carried in proper form in this bill, nor have they been properly carried in former bills. I have spoken of the appropriation now reaching $378,000 for "study and demonstration of the best methods of meeting the ravages of the cotton-boll weevil," which appropriation, I believe, is made by Congress with the idea that the money is used for the purpose of attacking directly the ravages of the weevil, whereas the money, as I have said, is used in

regular farm-demonstration work to pay salaries and expenses of men who undertake to teach farmers in the cotton-growing section new and improved methods of agriculture. Much of the money is spent in sections of the country not yet reached by the boll weevil.

Another paragraph of the bill carries an appropriation of $400,000 for improving "methods of farm management and farm practice and for farm-demonstration work." This appropriation is for exactly the same kind of work as is carried on under the boll-weevil appropriation, except that it is generally carried on in the North, whereas the boll-weevil appropriation must be spent in the South. These appropriations are to be used by the Bureau of Plant Industry.

This bill, on page 11, carries an appropriation of $50,000 to be "used for live-stock demonstration work in cooperation with the Bureau of Plant Industry in areas freed of cattle ticks." This appropriation, providing for work which is farm-demonstration work pure and simple, is to be used by the Bureau of Animal Industry.

On page 19 we find an appropriation of $10,000 for "investigations in connection with the production of sirup and sugar cane and the utilization of cane by-products," which appropriation is to be used by the Bureau of Plant Industry. On page 17 there is an appropriation of $38,000 for "investigations of cotton, corn, and other crops introduced from tropical regions, and for improvement of cotton by cultural methods, breeding, and selection." Both cotton and corn are mentioned in this clause, but the words "other crops introduced from tropical regions" evidently make it necessary for the Bureau of Plant Industry to use the money in the States of the South.

On page 67 the bill carries an appropriation of $50,000 for "the development of live-stock production in cane-sugar and cotton districts of the United States." This is farm-demonstration work, and the appropriation ought to be included with those made elsewhere in the bill for this kind of work; and, besides, I believe these appropriations ought to be made without any restriction as to the section of the country in which the money is to be used.

After speaking of the different sections of the bill carrying separate appropriations for one and the same kind of work, I repeat my criticism and enlarge on my reason for insisting that only one appropriation ought to be made, and that all money appropriated for this farm-management work ought to be used by one bureau of the department. Perhaps the excuse for making several appropriations is that larger amounts and a larger amount in the aggregate may be appropriated. My insistence is that only one appropriation—although it may reach the large sum of $926,000, as it does—ought to be made, and that Congress and the country ought to know the amount of money used in this kind of work. Only one appropriation ought to be made, and it ought to be administered by one bureau, because under the present way of doing business it is absolutely certain that there will be duplication. Different kinds of work are provided for, but all are along the same general line of farm-demonstration work, and in one community one man ought to be employed to do all the different kinds of work. If this plan is not pursued, the result will be that one man will be sent into a community to advise and assist farmers in the production of one kind of live stock, another will be sent to give help in producing another kind of stock, another will work in the community with a view of assisting farmers in improvement of sugar cane and the use of cane by-products, another will work in the same community for the purpose of assisting farmers to improve their methods of producing other crops; and the upshot of the whole proposition will be that four or five—perhaps more—men, some from one bureau and some from another, some paid out of one appropriation and some out of another, will be sent into one community, each to do some work in the line of farm management or farm demonstration, whereas one man who understands his business could perform all these duties himself.

I am not finding fault with the amount of the appropriations nor with the character of the work the officers and employees of the department are doing. I believe the farm-management and farm-demonstration work is absolutely necessary, and I agree with what former Secretary Wilson said, to the effect that this line of work is one of the most important lines of work in which the department is engaged. I find fault with the form in which appropriations are made. They ought to be made so that Congress and the country may understand the amount appropriated and so there may be no duplication of work or waste of money.

Mr. ANDERSON. Mr. Chairman, of course I have no objection to the members of the committee throwing bouquets at one another, but if exceptions are to be inferred from the remarks of the gentleman from South Carolina, it seems to me fair that he should state the gentlemen to whom he did refer.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BORLAND. Mr. Chairman, I believe we are still under the discussion of this item relating to the extermination of the southern cattle tick, and more especially the $50,000 appropriation for farm demonstration work. I want to say that the work of the extermination of the southern cattle tick has been remarkably successful. It has shown substantial results. The report of the committee here shows that approximately 25,000 square miles are annually cleared of the cattle tick and added to the free zone, and that, in all, about 215,000 square miles have been cleared of the cattle tick and added to the free zone.

Mr. MADDEN. And there are 725,000 square miles left in it.

Mr. BORLAND. A very large percentage of the cattle we are getting to-day comes from the Southern States, and much of it south of what we call the quarantine line. When these cattle have been sent to northern markets for butchering, they have been compelled to submit to charges and delays and exactions caused by the existence of the cattle tick in their region. They are required to be put in a special quarantine yard at Kansas City, or St. Louis, or Chicago, or St. Joseph, so that they will not mingle with other cattle and communicate the disease. The expense and delay of handling them is considerable, both to the transportation company and to the owner of the cattle, and incidentally to the man who buys them for butchering or export. As fast as any portion of the country can be cleared of the cattle tick it brings in a large section suitable for the raising of beef where there are no quarantine regulations, and where the cattle may be sent to a northern market or an export market directly without the restrictions to which I have referred.

Now, we know that the supply of cattle in this country has gone down in the last five or six years from about 52,000,000 head to less than 35,000,000 head. For a while that enormous shrinkage was made up by heavy importations from Mexico. Those importations, of course, came from a tick-infested region, according to our classification; but they came into a tick-infested region, so that there was not very much distinction. But the cattle have ceased to come from Mexico to a great extent. I understand that there is not only an export tax on cattle now in Mexico under present conditions, but that the supply of cattle there has been greatly depleted by the disturbed condition of the country. There is only one way in which we can increase the supply of beef in this country for the American consumer, and that is, as speedily as possible to clear the Southern States of the tick-infested area. Then, with the cultivation of corn that they are engaging in down there, which is being encouraged by their boys' corn clubs, and that sort of thing, with the cultivation of winter feed, they will be able to feed cattle on the farm, as our Missouri, Iowa, and Kansas farmers do. They can take a bunch of feeders, fatten them, and send them to a northern market. Now, if they can go into Missouri, Iowa, and Kansas and buy bunches of feeders and take them down there where they have this equable climate, and fatten them and bring them back, that is going to increase the beef supply of this country. An increased beef supply is going to redound to the benefit of the wage earners of the city and the producers of the country and every section of our population. There is not an item of this bill that reaches more people directly than this item to increase and make available a larger area for the raising of beef cattle in this country. [Applause.] The place where we must look for the increase of that area is in the Southern States, where in the past we have had a large area that was quarantined because of the cattle tick. If we are driving this tick line back at the rate of 25,000 square miles a year, we ought to continue to drive it back until it is driven clear over the Mexican border and there is not a foot of American soil anywhere that can not be used for beef cattle, so that the feeders and the fat cattle can be shipped from that section to any market in the United States. [Applause.]

Mr. SLOAN. Did I understand the gentleman to say that there were not large numbers of cattle being shipped from Mexico?

Mr. BORLAND. I said there had been a decrease in the number, and I think that is true. Eighteen months ago there was a very large number of cattle came in from Mexico.

Mr. SLOAN. How long ago?

Mr. BORLAND. Eighteen months ago a large number of cattle came across the border. My understanding is that decrease comes from two causes: First, the imposition of a heavy export tax by the Mexican authorities; and, second, a decrease in the Mexican supply of cattle.

Mr. SLOAN. My information is that there has been a marvelous increase in the last four months, and that something over a quarter of a million cattle have been imported.

Mr. BORLAND. The gentleman will recognize that that is not a normal or healthy increase. That must be due to some temporary cause and that drovers are selling their herds, because surely they have not raised the cattle to ship.

Mr. SLOAN. I understand that they are actually coming to this country and paying the export duty.

Mr. BORLAND. That is not a permanent condition of export from Mexico to this country, but indicates that the temporary condition which existed about 18 months ago has broken out again. It means a clearing off of the Mexican pastures if it means anything.

Mr. SLOAN. It means that cattle are being imported under the Underwood tariff law.

The CHAIRMAN. The time of the gentleman from Missouri [Mr. BORLAND] has expired.

Mr. BORLAND. I ask unanimous consent for two minutes more.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent for two minutes. Is there objection?

There was no objection.

Mr. BORLAND. Now, the time has gone by when cattle can be herded on the range in this country. I think they are still herded on the range in Mexico. When I was a boy and worked at the Kansas City stockyards they were herded on the range in this country, and the long-horned animals commenced to come in in September by the trainload, with a drover on top of the cars. But that time has gone by, and the source of the beef supply in this country is the little farmer, who goes to the local market and buys a bunch of feeders, or buys out his neighbor's yearlings, takes them over where he has a supply of corn and a little pasture, or where he can buy a little corn, and he takes those cattle, sometimes borrowing the money to buy the feed, and in 90 or 120 days he puts so many pounds of beef onto those cattle and then sends them to market.

Now, that is our beef supply. It is bound to be our beef supply. As we extend the area in the South it is going to benefit the southern farmer if he can know that he can buy a bunch of feeding cattle and use his grass in the winter, with the help of extra feed. I believe in this $50,000 appropriation for farm demonstration work. There is no use in publishing research work printed in books, contained in magazines by the ton, that does not reach the farmer. But if you can have farm demonstration work right before him, you will have results in relation to beef cattle. If every farmer, in proportion to his water and grass, would keep a bunch of cattle, you would find that the number of cattle would come up again from the thirty-five million mark up past fifty million, and you would be more independent in the beef supply.

Mr. LEVER. Mr. Chairman, I understand the gentleman from Iowa has made a point of order to the paragraph.

Mr. TOWNER. There was a point of order made by the gentleman from Missouri, and it is still pending. I will ask the gentleman from Missouri if he withdraws his point of order?

Mr. BOOHER. I will withdraw the point of order, Mr. Chairman.

Mr. TOWNER. Then, Mr. Chairman, I make a point of order against this part of the paragraph beginning in line 21, page 11, "of which sum $50,000 may be used for live-stock demonstration work in cooperation with the Bureau of Plant Industry in areas freed of ticks, and of this amount no part shall be used in the purchase of cattle for breeding purposes."

I make the point of order on two grounds. First, that it is new legislation, that there is no authorization and never has been in law for this form of appropriation.

I desire further, Mr. Chairman, to make a point of order against it for the reason that it is not germane to this section and has no relation to it whatever. It will be noticed that there was first an appropriation of $400,000 for the reduction of the southern cattle tick. Then follows an appropriation of $50,000 which has no connection with the eradication of the cattle tick, and, as the gentleman stated, was to be used for an entirely different purpose—for the purpose of showing down there in the cattle-tick areas how they might raise a better kind and class of cattle.

That has nothing to do with the cattle tick except that you limit it to the area where the cattle tick can be found. It seems to me clearly it is not germane to this appropriation. Everybody ought to understand that this is a part of the general demonstration work and ought to be included in the appropriation for that work. It has no relation to the eradication of the cattle tick and is new legislation here. If it could be considered a part of the eradication of the cattle-tick section, it is entirely new legislation to say that within the area where they may have had cattle tick there shall be special work of farm demonstration to instruct people there that they can raise a better class of cattle. I submit that on both grounds this clause in this place ought to be taken out.

Mr. LEVER. Mr. Chairman, I call the attention of the Chair to the fact that the language of the organic act creating the Department of Agriculture is sufficient authority to provide for this work. I read to the Chair:

> There shall be at the seat of government a Department of Agriculture, the general design and duties of which shall be to acquire and diffuse among the people of the United States useful information on subjects connected with agriculture in the most general and comprehensive sense of that word.

It seems to me, Mr. Chairman, that that language is broad enough, and it has been held to be broad enough to permit any proposition coming upon this bill where the relationship to agriculture can be shown. Of course, the Chair will recognize the importance, from the standpoint of agriculture, of demonstration work in teaching the people of these free areas the better practice and methods of live-stock growing. In addition, I think it is only a limitation on the appropriation bill, and for that reason would be in order.

Mr. MANN. Mr. Chairman, the gentleman from Iowa [Mr. TOWNER] makes two points of order, one of which is that the provision is not germane. Of course that point of order is not good. The bill itself determines what is germane in the bill. The question of germaneness can only arise where an amendment is offered. You determine whether it is germane to the provisions in the bill. The bill that is introduced does not have to be germane in its different parts to each other, unless it is a matter of privilege, and then you can take out the part that is not privileged. So that point of order is not good.

The gentleman makes a point of order that this is for something not authorized by law. It is for live-stock demonstration work, authorizing the use of $50,000 of an appropriation of $400,000 for live-stock demonstration work. The Chair will notice on page 19 in this bill that there are two items: "To investigate and encourage the adoption of improved methods of farm management and farm practice and for farm-demonstration work, $400,000"; "for farmers' cooperative demonstrations and for the study and demonstration of the best methods of meeting the ravages of the cotton-boll weevil, $378,240." If these items are in order, then this item is in order. If this item is not in order, then these items on page 19 ought to go out.

Mr. LEVER. And does the gentleman agree with me that this item here is in order under the organic act establishing the Department of Agriculture?

Mr. MANN. I do think that they are all in order. What is the situation? Here is a proposition to use $50,000 for live-stock demonstration work in areas free of ticks. The question is whether that is the acquirement and diffusion of knowledge relating to agriculture in its broadest sense. What are the facts which the chairman will take notice of in reference to agriculture in this country? Here is a proposition to diffuse knowledge by demonstrating in reference to the raising of cattle in the South. Only a few years ago cattle were cheap; they were plentiful because we had great areas in the West useless, at that time, for any other purpose than for grazing cattle on the public domain without charge.

We had great herds of cattle in the West and in Texas, many of which were sent afterwards to the feeders for fattening on corn. We had great supplies of cattle in this new area, but the new area has been largely taken up by farmers. We have no longer the great, numerous herds of cattle over the entire western range that we had a few years ago. Farmers in the North, largely in the corn country, do not encourage to a great extent the raising of cattle, because a man who can raise corn on land worth $250 an acre usually can not afford to raise food cattle upon it; and the bulk of those farmers do not raise cattle at all except a few dairy cows. They buy some cattle from the West for feeding purposes and feed the corn, but no longer can we supply the meat markets of the country with cattle raised in the West on the ranges or cattle raised in the northern corn belt. Where have we to go for cattle? We have got to go largely for our future supply of cattle to the South, where the climate is equable, where it is cheaper to raise cattle than it is in the North, both by reason of the lack of the rigorous winters and by reason of the fact that the land is not worth so much per acre. But what is the trouble about raising cattle in the South? The Texas fever, we used to call it. I do not know what they call it now.

Mr. LEVER. The same thing.

Mr. MANN. It comes from the tick. They can not afford to raise cattle in the South to a large degree because of the tick. I can remember when a very prominent old agriculturist and farmer of my State, old Sam Allerton, who died a few days ago, owning great areas of land, a large cattle owner, laughed at the idea that the Texas fever was passed on by the tick. But we

have learned better than we knew then. We know now that this fever is communicated by the tick. We have learned that if we can wipe out the tick we can preserve the cattle from the fever. We have learned that we can absolutely wipe out the tick from areas of land and extend the area. What is the proposition? To go to these farmers who live in this area where the tick no longer lives and show to them that with the tick gone—and they knew very little about the tick while it was there—they can raise cattle for the market to provide meat for the country. I do not believe there is a more important thing for our country. I am willing to give $50,000 or more in order that we may raise by our own farmers the meat that we consume rather than be compelled to import it from Argentine or Australia. [Applause.]

Mr. LEVER. Mr. Chairman, I ask for a ruling.

Mr. TOWNER rose.

Mr. LEVER. Mr. Chairman, I ask for a ruling. We have made only two pages of this bill to-day.

Mr. TOWNER. Mr. Chairman, I desire to be heard for a few words more.

The CHAIRMAN. The Chair will hear the gentleman.

Mr. TOWNER. Mr. Chairman, I only desire to say this in reply to the gentleman from Illinois [Mr. MANN] with regard to the question of germaneness: Here is a provision made for the eradication of the southern cattle tick, and then follows a provision by which $50,000 of the $400,000 that is to be provided for the eradication of the cattle tick is to be used by the terms of this clause not for the eradication of the cattle tick but for the purpose of teaching the people down there how to raise live stock. It occurs to me that there is a diametrical difference between them. They are in no way related. While it is true, doubtless, that there is legislation that will authorize the $400,000 to be used for the eradication of the cattle tick, to which I do not object, and while it is perfectly proper to allow money to be expended for demonstration work, to which I do not object, yet it seems to me it is not good legislation and that it can not be proper legislation to say that you shall appropriate $400,000 for the eradication of the cattle tick, and then say that $50,000 of that appropriation shall not be used for that purpose, but shall be used for the purpose of teaching people how to raise live stock.

Mr. LEVER. Has not the gentleman simply said, when we get down to common sense, that we shall use $350,000 for cattle tick and $50,000 for this other work?

Mr. TOWNER. If the chairman will pardon me, that is what I think the bill should say, but does not.

Mr. LEVER. We have said it in our own way in the bill.

Mr. TOWNER. In your own way—yes; that is probably true. I insist on the point of order, although I have some doubt about it on one ground that has not been argued by the gentleman, and that is that possibly it may be a limitation on the appropriation.

Mr. MANN. It is not a limitation.

The CHAIRMAN. The point of order is overruled, and the Clerk will read.

Mr. SLOAN. Mr. Chairman, I move to strike out the last word. I desire to say in answer to the suggestion of the gentleman from Missouri [Mr. BORLAND], in reference to the importation of cattle, that during the months of October, November, December, 1913, and January, 1914, the importation from Mexico was 271,387 head, which was twice as many cattle as were imported in a similar period one year before from all sources. And that during four months first specified there were imported from all sources, including Mexico, 431,911 cattle, or three times what were imported in the similar period the year before from all sources. I state this simply to make the record clear on the proposition submitted. I desire to say that my views on the matter of protecting cattle by every means, including this appropriation, are well known, and coming from a part of the country which has produced most of the cattle heretofore that have been fitted and have gone to market, I look forward to the day when a majority of our cattle will be produced in the southern part of this country. I think the increased production of cattle will be a source of wealth to all of the people of the South. I think the more we encourage it in this way and by other legislation, the more the people of the South will be benefited. I believe those who have recently been so free with their votes and influence to discourage cattle raising in the South by throwing it into open competition with all the other nations of the earth, will, inside of five years, be as ready to protect, foster, and encourage cattle raising in the South by protecting it from competition with other nations as I am at the present time.

Mr. MANN. We will do that long inside of 10 years from this side of the House.

The CHAIRMAN. The Clerk will read.

Mr. McLAUGHLIN. Mr. Chairman, I understood there was a point of order pending.

Mr. LEVER. The point of order has been overruled.

Mr. McLAUGHLIN. Mr. Chairman, I move to strike out the paragraph. Mr. Chairman, I do that for the purpose of asking the chairman of the committee if he will not consent to a transfer of this item, providing for an appropriation of $50,000, to the appropriation to be made to the Bureau of Plant Industry for farm-demonstration work in the South, increasing that appropriation so as to include the $50,000. Does not the gentleman admit that the employment of this money by the Bureau of Animal Industry and the employment of the other money by the Bureau of Plant Industry will result in a duplication; that it is actually the same kind of work? When this appropriation was suggested, the chairman will remember that the Chief of the Bureau of Plant Industry intended to carry on some demonstrations of stock raising, and the note accompanying this paragraph in the Book of Estimates suggested the purchase of pure-bred animals for that purpose. The committee did not think it wise to appropriate money for the purchase of animals, so this clause has been amended to provide "that no part of the money shall be used for the purchase of animals." Now, it seems to me this amendment makes this strictly farm-demonstration work, and the appropriation ought to be used under the direction of the Bureau of Plant Industry.

Mr. LEVER. Mr. Chairman, in reply to the suggestion of the gentleman from Michigan, there are two objections to the transfer of this item at this time. There may be something in the gentleman's contention as to the proposition that all farm demonstration work ought to be carried under one item, and, as I have already suggested, I am confident that upon the reorganization of the Department of Agriculture, which is to occur soon if the recommendation of the committee is adopted, this is contemplated. The two objections which I have in mind on this proposition of the gentleman from Michigan are, first, that the committee has not had an opportunity to consider the proposition of this transfer; in fact, if there was any consideration given to it at all—and the committee did consider it somewhat—it refused to make the change. In the next place, there is no reason for carrying this item in separate sections of the bill. Gentlemen can quite well understand how an expert in plant growing, for instance, would not necessarily be an expert on the proposition of the breeding of animals or animal husbandry, and it is very well to keep these items separate in the bill, in my judgment, until there is a reorganization of the department and the slacks of the department taken up and the complete work of the department put upon such a new plan as that we can put all kinds of work of the same character under one head and all of another character under another head, and so on down the line, but I would not like to do it in this bill at this time.

Mr. STAFFORD. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. STAFFORD. When this paragraph was first read I reserved a point of order on it, and just about that time the gentleman from Michigan [Mr. McLAUGHLIN] offered an amendment striking out the word "cattle," in line 24, page 11, and inserting the word "animal." The chairman of the committee expressed no objection to the amendment, but I believe the amendment was not in order until the point of order was withdrawn. The amendment could not have been in order until the point of order was either withdrawn or passed upon.

The CHAIRMAN. The gentleman from Wisconsin withdrew his point of order, and the amendment was then adopted.

Mr. STAFFORD. I did not recall the amendment having been adopted after I withdrew the reservation of the point of order.

The CHAIRMAN. The question is on the motion of the gentleman——

Mr. McLAUGHLIN. Mr. Chairman, I withdraw my motion to strike out the paragraph.

The CHAIRMAN. The gentleman from Michigan withdraws his motion to strike out, and the Clerk will read.

The Clerk read as follows:

For all necessary expenses for investigations and experiments in dairy industry, cooperative investigations of the dairy industry in the various States, inspection of renovated-butter factories and markets, $256,490.

Mr. ANDERSON. Mr. Chairman, I move to strike out the last word for the purpose of asking the chairman of the committee a question. This item in this bill is increased, I understand, $70,000 over the bill of last year. May I ask the chairman what that increase covers?

Mr. LEVER. If the gentleman had done me the honor to read my report, he would have found the exact information that he desires. The increase of the provision is for the purpose of enabling the dairy division to extend its work. First they

need some little additional funds for the renovated butter factory work; then they need some little additional funds for the matter of teaching our folks how to produce a better dairy product—demonstration work; then we need some funds to cooperate with health officials and the like in respect to dairy supplies to cities. I can give the gentleman, if he will permit me, the exact information, if he desires:

The general work of the division, including clerks, etc., is what we call administration, and for this year we have $11,855. Our work this year has been extensive for the amount of our funds. Next year we are asking for $6,500 more for this general work, to meet all sorts of unexpected and unforeseen demands of a general character, which are largely of an educational nature, and also to take care of the growth of our work.

Mr. ANDERSON. I do not care about that.

Mr. LEVER. The next item is "dairy farming," and there they ask for an increase of $20,500. The next item under dairy farming is $9,000 to provide dairy specialists to aid county agents.

Mr. ANDERSON. The gentleman is not reading from his report?

Mr. LEVER. No; perhaps I did not make my report as full as I should on this point. The next is dairy manufacturing investigation, for which they are asking an increase of $7,190. The next is market-milk investigation, and so on down the line.

Mr. ANDERSON. The gentleman is not reading from the report, is he?

Mr. LEVER. I beg the gentleman's pardon. I am reading from the hearings, and the gentleman's criticism of the report in that respect is probably correct.

Mr. ANDERSON. I am not making any criticism of the report. I merely wanted to get a little information.

Mr. LEVER. Now, then, for market-milk investigation; there had been at this time $7,500. They are asking for an increase of $8,500, which will give them about three additional men for this work, and I think that is very worthy work, because it does not entail any great responsibility upon the department. In other words, I will say to the gentleman from Minnesota, as I said this morning in a general statement, this very division of the Department of Agriculture is one of the constructive divisions of the department, and the committee felt we ought to be liberal with those divisions and bureaus of the Government which were seeking to provide more food and more clothing for the country.

Mr. ANDERSON. Now, Mr. Chairman, I want to say in reply to the gentleman's reflections, that I have not only read his report but I have also read the hearings which he has just put in the RECORD. My complaint is not that the committee has allowed a large amount, but if I have heard any complaint at all upon this item and some others, it is that the committee has not allowed enough.

Mr. LEVER. We have allowed the estimates in this item.

Mr. ANDERSON. Now, I want to know from the chairman how much of this money was to be spent in the vicinity of Washington or in Washington? To make clear exactly what I want, I desire to call the chairman's attention to the language of the paragraph. It says:

Cooperative investigation of the dairy industry in the various States.

I have been trying for nearly a year to persuade the Bureau of Animal Industry to cooperate with a State creamery located in the district which I have the honor to represent.

The CHAIRMAN. The time of the gentleman from Minnesota [Mr. ANDERSON] has expired.

Mr. ANDERSON. Mr. Chairman, I ask for five minutes more.

The CHAIRMAN. Is there objection. [After a pause.] The Chair hears none.

Mr. ANDERSON. The creamery was established under a law passed by the State legislature in 1911. It is maintained by an appropriation from the State. As I have said, I have been trying to get the Bureau of Animal Industry to cooperate with the State creamery in making some experiments, but I have been met with the proposition that the bureau would be very glad to cooperate with the dairy industry of Minnesota, and particularly with this creamery, provided I would move the creamery and the dairy industry down here to Washington.

Mr. LEVER. I would say to the gentleman from Minnesota that my information is that the bulk of this appropriation is used in the field.

Mr. ANDERSON. I want to call the chairman's attention to the Book of Estimates, which shows, under the item of "Dairy industry," that the amount spent in Washington is $60,730, for salaries alone, and outside of Washington $65,416.

Mr. LEVER. The gentleman understands that this item not only covers the work in the field, but also the scientific investigational and research work. That is work in connection with cream, milk, and cheese, and other scientific investigations which are necessarily carried on in laboratories here at Washington, but the bulk of this appropriation is to be expended in the field. And as to the gentleman's proposition, which he suggested a moment ago, that they regretted very much they could not do so unless they had a little increase of fund or move down here to Washington, I think that complaint could be made by a great many Members of Congress.

I think it is rather human nature that the scientists in all of these departments—not only in the Agricultural Department, but in all of them—live within their own little sphere and imagine that is the world, and they are frequently reaching out and wanting more money for their special lines of work and trying to find means to get it. That has been the experience of every man on the Committee on Agriculture. My mail is filled with letters every day asking for increase in this item or that item. I would not say they were inspired by department officials, but I think it is safe to assume that these subchiefs and chiefs of divisions would not be averse to the proposition of having just as much money as they could get from Congress for these matters. It is natural, and I do not criticize it, but our discretion must control.

Mr. ANDERSON. I understand that; but my complaint is this: That the amount of money which is spent in investigational work in the city of Washington and in the vicinity of Washington is disproportionate to the amount of money spent in the field. Now, in the particular case to which I have reference, the State creamery is operated under State patronage. The State offers to turn it over to the Bureau of Animal Industry, let them run it to suit themselves—remodel it, if necessary—and afford them opportunity to make demonstrations where the dairy interests are. They want to make the demonstrations down here in Washington, where there is no dairy industry and can not be any.

Mr. LEVER. I desire to call the attention of the gentleman to this fact, that $66,747 of the salaries of this appropriation in the current law last year was expended outside of the city of Washington. I will say to the gentleman this, that the committee in allowing these figures had in mind the fact that we understood the bulk of this increase would be used in the field rather than in Washington, and if you will notice the hearings, Mr. Rawl, the chief of the Dairy Division, sets out in great detail just how this increase is to be used, and very little, in fact, practically none, is to be used in the city of Washington.

Mr. ANDERSON. The gentleman makes the statement, as I understand him, that it was the committee's intention to provide that the bulk of this increase should be used in the field in cooperation with the States?

Mr. LEVER. I do; exactly.

Mr. GARNER. Will the gentleman from South Carolina yield to me?

Mr. LEVER. I have not the floor, but I will yield anyhow.

Mr. ANDERSON. I will yield to the gentleman.

Mr. GARNER. Is there any way by which Congress can be informed as to the amount of money appropriated in this bill to the Agricultural Department, outside of the question of forestry and real agricultural work—between $9,000,000 and $10,000,000, I understand——

Mr. LEVER. A little over $9,000,000.

Mr. GARNER. A little over $9,000,000. About how much of that money is spent in the District of Columbia and how much in the field?

Mr. LEVER. I will say to the gentleman that I have not those figures at hand, but we have them in our committee room. They are available. The department publishes a statement showing the expenditures in the Agricultural Department, which I hold in my hand. Take the Bureau of Animal Industry, for instance.

Mr. ANDERSON. Mr. Chairman, I ask for five minutes more.

The CHAIRMAN. The gentleman from Minnesota [Mr. ANDERSON] asks unanimous consent to proceed for five minutes more. Is there objection?

There was no objection.

Mr. LEVER. Take, for example, the scientific investigations of the diseases of animals: Statutory salaries, $24,834; under the lump-sum appropriation, $18,927; or $43,761. The one is the lump fund out of the city of Washington, the other being in the city of Washington; a total of $88,000. Then, for traveling and field expenses, and so on, we have it particularly itemized, but it is hard to carry all the figures in one's mind.

Mr. GARNER. I will say to the gentleman from South Carolina, if the gentleman from Minnesota [Mr. ANDERSON] will indulge me a moment, that the only criticism I have ever heard made of the Department of Agriculture and its work by practical farmers and cattlemen and others interested in it has been that,

in their judgment, a larger percentage of the money appropriated was used in the District of Columbia than ought to be used; that the gentlemen connected with the department were anxious to stay around here in Washington and its vicinity, and that work that ought to be done in the field is in many cases undertaken to be done here. If that is a just criticism, the Committee on Agriculture ought at least to call the attention of the department to this matter and insist that the work should be done in the most economical way, regardless of the wishes and convenience of their employees.

Let me say one word further. I have much confidence in the heads of this department, especially in the Secretary of Agriculture and in the Assistant Secretary of Agriculture, who has been connected with that department for many years; but it is necessarily impossible for those gentlemen to understand and to go into the details of these matters to the extent that the chiefs of bureaus do, and they must be guided to a large extent by their chiefs, and the chiefs, in turn, are influenced more or less by the employees in that department, and they want to suit their own convenience as far as possible in the District of Columbia.

Mr. LEVER. Yes. If my friend from Minnesota will let me reply to the suggestion of the gentleman from Texas [Mr. GARNER], I desire to call his attention to the fact that it is only very recently that the plan has been adopted of getting out to the people the scientific and useful information that we have been getting here in the Department of Agriculture since its creation in 1887. I think the time is coming when a very small part of the appropriations carried in this bill will be used in the city of Washington.

Mr. GARNER. And the gentleman believes that is to be for the betterment of the service?

Mr. LEVER. Undoubtedly; but I do not want to be put in the attitude of overlooking the importance of the investigational and research work of the Department of Agriculture, because, first of all, we must get the information before we can disseminate it, and I feel there is danger of our going too far with our demonstration idea, because it is necessarily more popular, and making it out of balance with regard to the investigational and research work in the Department of Agriculture.

Mr. ANDERSON. Mr. Chairman, in answer to the question of the gentleman from Texas [Mr. GARNER], I just wanted to read a paragraph of the Secretary's report, which very fully answer's his question. The Secretary says:

> The present appropriations for work of a regulatory nature or only indirectly affecting agriculture constitute about three-fifths of the total funds of the department, or approximately $15,000,000, leaving two-fifths, or $9,000,000, available for scientific research, experiments, and demonstration work directly affecting the farmer. While it would be difficult to segregate the funds which are used for purely demonstration work, because of its close relation in many instances to investigational work, it is safe to say that more than $1,000,000 is devoted to such work.

Thus the Secretary indicates that the amount of money expended in the demonstration work is very small indeed in comparison with the total appropriations made for the department.

Mr. LEVER. I think the gentleman ought to say this, however: That that does not carry with it the idea that $15,000,000 of this appropriation is expended in and around Washington here.

Mr. ANDERSON. But about eight millions are expended around here.

Mr. LEVER. The fact is that five millions go to the Forest Service, and the bulk of it is expended in the field and not in the city of Washington.

Mr. GARNER. But what the gentleman did intend to say was that out of this $9,000,000 that goes to the execution of this work only one-ninth is expended in the field and the rest is spent in the District of Columbia; so that my complaint is that of this nine millions that we appropriate for the benefit of the farmer and for the benefit of the cattle raiser about eight millions is consumed in the District of Columbia, whereas only $1,000,000 of it is used for the direct benefit of the people for whom it is appropriated.

Mr. LEVER. I do not understand, from the reading of the Secretary's report, that he made any such statement as that, because I could recall, offhand, appropriations of more than a million dollars that are expended in the field. For example, over $400,000 is expended in the field for the extermination of the cattle tick and $289,000 for sheep scabies, and I can think of several others.

The CHAIRMAN. The time of the gentleman from Minnesota has again expired.

Mr. LEVER. Mr. Chairman, I ask that the Clerk read.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

> For all necessary expenses for investigations and experiments in animal husbandry; for experiments in animal feeding and breeding, including cooperation with the State agricultural experiment stations, including repairs and additions to and erection of buildings absolutely necessary to carry on the experiments, including the employment of labor in the city of Washington and elsewhere, rent outside of the District of Columbia, and all other necessary expenses, $182,840: *Provided*, That of the sum thus appropriated $30,000 may be used for experiments in the breeding and maintenance of horses for military purposes: *Provided further*, That of the sum thus appropriated $24,500 may be used for experiments in poultry feeding and breeding, including the feeding and breeding of ostriches and investigations and experiments in the study of the ostrich industry: *And provided further*, That of the sum thus appropriated $5,000 may be used for the importation of Corriedale sheep from New Zealand for breeding purposes.

Mr. COX and Mr. MONDELL rose.

Mr. ANDERSON. Mr. Chairman, I reserve a point of order on that.

The CHAIRMAN. The gentleman from Minnesota [Mr. ANDERSON] reserves a point of order on the paragraph.

Mr. COX. Well, Mr. Chairman, I make the point of order on the last proviso. We might just as well settle it.

The CHAIRMAN. The gentleman from Indiana [Mr. COX] makes a point of order on the last proviso.

Mr. MONDELL. Does the gentleman make the point of order on the paragraph?

Mr. COX. No; I make it on the last proviso.

Mr. MONDELL. Will the gentleman reserve it?

Mr. COX. I will reserve it a reasonable length of time, but later on I will make it.

Mr. MONDELL. Well, if the gentleman wants to make it, he can make it now. I would like, however, to say a few words.

Mr. COX. I will reserve it, so that the gentleman may make a statement; but after that I shall make the point of order.

Mr. MONDELL. Well, I have no desire to say anything about it. If the gentleman desires to make the point of order, all right.

Mr. LEVER. Mr. Chairman, I desire to speak on that for a moment. This estimate was not submitted by the Department of Agriculture. The gentleman from Wyoming [Mr. MONDELL] came before the Committee on Agriculture in the regular way and called our attention to the high mutton character of this breed of sheep, known as Corriedale sheep or New Zealand sheep. We felt that if we could import to this country a breed of sheep which would improve the breed that we now have, it would certainly be a wise investment of money, and while the committee had no statement from the Department of Agriculture, we took the initiative ourselves of putting this into the bill, because we thought it a wise thing to do. I think I can say that the Committee on Agriculture is trying as hard as any committee in this House to serve the people, and if it is necessary for us to import into this country different breeds of sheep, cattle, or horses to improve our breeds of sheep, cattle, and horses we ought to authorize the importation.

Mr. SELDOMRIDGE. Will the gentleman yield for a question?

Mr. LEVER. I yield to the gentleman from Colorado.

Mr. SELDOMRIDGE. Is there any specific provision in this bill that directly affects the wool or mutton growing industry of this country?

Mr. LEVER. There is not.

Mr. SELDOMRIDGE. You have provided for the cattle industry, have you not?

Mr. LEVER. Yes.

Mr. SELDOMRIDGE. And for the horse-breeding industry?

Mr. LEVER. Yes.

Mr. SELDOMRIDGE. And the poultry industry?

Mr. LEVER. Of course, the gentleman understands that we appropriate $289.000 for the eradication of sheep scab?

Mr. SELDOMRIDGE. But you are doing nothing for the information of the people as to sheep breeding in this country?

Mr. LEVER. Of course the department has the general authority and funds for that work. What it is doing I do not know.

Mr. SELDOMRIDGE. Could the department take $5.000 out of any fund and invest it in this particular breed of sheep for the purpose of importing them?

Mr. LEVER. No.

Mr. SELDOMRIDGE. They could not do it under any other appropriation in the bill?

Mr. LEVER. No; they would not have the right to import them unless specifically authorized to do so.

Mr. COX. Now, will the gentleman yield?

Mr. LEVER. I yield.

Mr. COX. On what ground does the gentleman base his argument that the Government should do this at public expense,

instead of letting private individuals do it? If they want to go abroad and import these sheep, let them do it.

Mr. LEVER. I will answer the gentleman's question in this way: What reason on earth is there that the Federal Government should appropriate $500,000 for the eradication of hog cholera? What reason on earth is there that the Government should appropriate $400,000 for the eradication of the cattle tick? What reason on earth can there be that the department should expend in this very bill here $182,000 for carrying on animal-husbandry work, or $30,000 for experiments in the breeding and maintenance of horses for military purposes, and so on?

Mr. COX. I am dead against that. Does the gentleman propound that question to me?

Mr. LEVER. Yes.

Mr. COX. I am in absolute sympathy with the position taken on the floor of the House this evening by the gentleman from Missouri [Mr. BOOHER]. I do not believe that the Government of the United States has any right on earth or any moral duty to tax the whole people of this country to manufacture hog-cholera serum and turn that serum over to the farmers of this country. I thoroughly agree with the gentleman from Missouri [Mr. BOOHER] on that; and in response to the query put to me by the gentleman from South Carolina, I wish to say that when the Government has discovered the means of solving these problems, that is as far as the Government's functions ought to go. If the Government has discovered a remedy for hog cholera, I believe it to be the duty and function of the Government to turn that remedy over to the States and let them handle it. So far as cattle ticks are concerned, I have no objection to appropriating all the money that is necessary to enable the Government to discover a remedy; and after it has done that I deny the right of Congress to appropriate a single dollar for the purpose of aiding the States along that line. The gentleman has asked me, Why appropriate $30,000 for the breeding of horses? I do not agree with that at all. I think it is absolutely erroneous.

Mr. LEVER. Then the gentleman is opposed to this bill?

Mr. COX. Oh, no; I am not opposed to this bill.

Mr. LEVER. I thought the gentleman must be, because the bill contains these items.

Mr. COX. I am opposed to these items which the gentleman has mentioned in his question.

Mr. LEVER. Is the gentleman opposed to the work of the Dairy Division?

Mr. COX. They are doing lots of work that does not do any good, in my judgment.

Mr. LEVER. Is the gentleman opposed to it? Will he vote against it?

Mr. COX. No; I will not vote against it, just as I have voted many times for appropriations that I, in my individual opinion, do not believe are necessary at all.

Now, why spend $5,000 here to import a certain breed of sheep, when men all over this country in the sheep business are willing to spend this money out of their own pockets? Let them do it. I make the point of order, Mr. Chairman.

Mr. MONDELL. Mr. Chairman, I should like to be heard.

Mr. COX. I reserve the point of order.

Mr. MONDELL. The gentleman reserved the point of order and then proceeded to talk about general matters for five minutes.

Mr. COX. I told the gentleman distinctly that I would reserve the point of order and then make it after the gentleman had made his statement. That was what I said.

Mr. MONDELL. Mr. Chairman, I move to strike out the last word.

Mr. LEVER. Has the point of order been decided?

The CHAIRMAN. The point of order is reserved. The gentleman from Wyoming is recognized.

Mr. MONDELL. It is an amazing thing to me, Mr. Chairman, that gentleman will sit here and pass over without a word of objection paragraphs carrying $50,000, $100,000, $200,000, $300,000, or $400,000, and then an item of $5,000 so arouses their ire and indignation that it must go out on a point of order. This bill carries $400,000 for wiping out the cattle tick, $50,000 for teaching the man whose cattle you have cured of tick how to raise cattle free of tick. It carries hundreds of thousands of dollars for farm-demonstration work in the South, but not a penny for the great sheep industry of the country; millions for cattle, but nothing for sheep. This item, Mr. Chairman, provides for the importation of Corriedale sheep.

CORRIDALE SHEEP.

The Corriedale is a new breed of sheep which has been developed in New Zealand and, to some extent, in Australia. The breed has been produced by crossing high-grade Merino ewes with Lincoln rams. One of the best-known Corriedale flocks, the Teviotdale, of Canterbury, New Zealand, was established about 35 years ago. This and other flocks, like the White Rock flock of the same locality and some flocks in Australia, have been carefully bred for many years with a view of retaining the best characteristics of the Merino and at the same time adding to the size of the animal and the length and weight of the fleece. The Corriedale is, in other words, a fixed type, having the characteristics of the best examples of what has been known in the sheep and wool business for years as the half-breed.

Crosses of the Merino and the heavier and longer wool sheep like the Lincoln, the Leicester, the Shropshire, and the Cotswold, have been common for many years. In fact, comparatively few growers of Merino sheep have confined themselves to the pure Merino blood, but have endeavored, by crossing and recrossing, to produce a type of sheep which, while retaining the Merino characteristics, would yield a somewhat heavier fleece and a larger body of greater value for mutton purposes. The Corriedale seems to be the only breed, however, in which the best characteristics of the Merino has become fixed in a new type or breed of increased size of body and weight of fleece. This result has been obtained by careful selection and judicious inbreeding until it is claimed that a fixed type and breed has been obtained.

The best type of half-breed has long been recognized as having advantages over the pure Merino as a combined mutton and wool sheep, and crossing has been common except in those localities and regions where the preference of owners or special conditions have warranted the maintenance of the pure Merino blood. This crossing has been most general in those regions, at home and abroad, where the wool and sheep industry has been carried on on a large scale.

The placing of wool and mutton on the free list under the present tariff law, thus placing our sheep growers and wool producers in competition with those of all the world, has accentuated the importance, if not the necessity, of securing a larger sheep and a heavier fleece if the wool and sheep industry, particularly in the range States, is to sustain itself under the new conditions. The problem of meeting this competition, particularly in the range States, is not a simple one, for where sheep are ranged in large flocks in a region of sparce vegetation, of rough and mountainous pasture, with considerable extremes of temperature, it is essential that the predominant characteristics of the merino be retained.

These characteristics include a marked gregarious habit, rendering it possible to handle them in large flocks; a disposition to hustle and secure feed where the grasses are sparse and short; a nimbleness in getting over rough country; and a hardiness of constitution enabling the animal to withstand extremes of temperature and the inroads of diseases to which sheep are liable. Not only would the sheep business, as now carried on in the Mountain States, be impossible with the substitution of the heavy, nongregarious, clumsy, and tender sheep of the long and coarse wool mutton breeds, but the country would suffer an irreparable loss if deprived of its splendid annual crop of fine and medium wool.

It is claimed for the Corriedales that, on the same pasture, the lambs at marketing age and the sheep when full grown are considerably heavier than the average merino and that they produce a fleece of appreciably greater length and weight and of considerably less shrinkage than the pure-blood merino. The wool is claimed to run from fifties to sixties. It is hoped that the importation of enough of these sheep to form the nucleus for a breeding herd will not only give the American woolgrower an opportunity to secure the benefits of this fixed cross, but that it will also encourage the development here of other crosses into fixed breeds that may prove quite as satisfactory or even better adapted to our conditions than the Corriedales.

Mr. SUMNERS. Will the gentleman yield?

Mr. MONDELL. I will, if I have the time.

The CHAIRMAN. The time of the gentleman from Wyoming has expired.

Mr. SUMNERS. Mr. Chairman, I ask unanimous consent that the gentleman's time be extended one minute in order that I may ask him a question.

The CHAIRMAN. The gentleman from Texas asks unanimous consent that the time of the gentleman from Wyoming be extended one minute. Is there objection?

There was no objection.

Mr. SUMNERS. The gentleman stated that $400,000 was appropriated to eradicate the cattle tick and that nothing had been appropriated to help the sheepmen. I want to ask the gentleman if he had overlooked the fact that the bill carries $289,000 to help eradicate sheep scabies?

Mr. MONDELL. The bill does carry an item for a great number of purposes, of which that is one. It does not contain any item under which, after you have helped eradicate the scabies, you propose to show the sheepmen how to grow sheep.

Mr. LEVER. Mr. Chairman, I have grave doubt whether the language in the bill is subject to a point of order. We make a general appropriation on line 20, page 12, of $182,400, and then we proceed to limit the manner in which that fund shall be used. I am strongly of the opinion that this could be held to be in order as a limitation upon the appropriation bill.

Mr. COX. Mr. Chairman, if the chairman of this committee bases his objection to the point of order on the language carried in this paragraph I think the reading of the paragraph completely answers his argument. There is no statutory law, or at least none has been brought forward by the chairman, that would justify any such appropriation.

Mr. LEVER. Let me call attention to this further fact. On page 12 of the bill we provide all necessary expenses for investigations and experiments in animal husbandry, namely, for experiments in animal feeding and breeding. It seems to me that Congress has the right to indicate the method by which we shall make these experiments in animal feeding and breeding. Now we provide that $5,000 may be used for the importation of these Corriedale sheep for breeding purposes. I do not think the language is subject to a point of order at all.

The CHAIRMAN. The Chair is of the opinion that this can not fairly be regarded as a limitation on an appropriation bill. If that were true, the Chair can conceive where you can start in on the first paragraph of the bill appropriating eighteen or nineteen million dollars and make everything in order by provisos.

Mr. LEVER. If the Chairman will permit me, this language is either a direction to the Secretary of Agriculture or else it is a limitation upon this appropriation bill. Now, the Chair will see that we do not direct him; we say he may use the sum of $5,000, if in his wisdom he deems it advisable, for the purpose of carrying out one of the provisions of the bill, namely, the experiment and investigation into the matter of animal breeding.

The CHAIRMAN. It gives him authority to enter a new field which has not been authorized by law heretofore, and the Chair thinks the point of order ought to be sustained. The Chair therefore sustains the point of order.

Mr. ANDERSON. Mr. Chairman, I had a point of order reserved on the paragraph. I withdraw the point of order and move to strike out the last word. If the gentleman from Indiana [Mr. Cox] had been honestly desirous of calling attention to language in this paragraph that was really objectionable, he ought to have directed attention to this proviso on page 12:

That of the sum thus appropriated $30,000 may be used for experiments in the breeding and maintenance of horses for military purposes.

Mr. COX. Mr. Chairman, I will say to the gentleman that that has been carried heretofore time and again.

Mr. ANDERSON. I did not say that it was subject to a point of order, but I say that if the gentleman desires to practice real economy, if he desires to object to an item which is really objectionable, it is his duty to direct the attention of the committee to this item and to move to strike it out. I understand that under this item the department has some 40 stallions. These stallions breed some 35 mares each. About 35 per cent are foaled, making abou. 14 colts to each stallion. It costs $1,250 a year to maintain each one of these stallions, making each one of these colts cost approximately $100 apiece to breed. In addition, I understand as a compensation the War Department is permitted to buy these colts at $150 each, provided the farmer is willing to sell, when they are 3 years old, or, in case they do not buy them, the owner of the colt pays the department a breeding fee of $15. It strikes me that that is very poor economy indeed.

Mr. SELDOMRIDGE. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. Certainly.

Mr. SELDOMRIDGE. I would like to ask the gentleman if these breeding operations are carried on in his part of the country to any extent?

Mr. ANDERSON. They are not.

Mr. SELDOMRIDGE. I want to say in this connection that the farmers in my State have been very anxious to avail themselves of some of these privileges, but so far it has been impossible for them to secure any results.

Mr. ANDERSON. I can understand why farmers would be desirous of availing themselves of this opportunity, because they would be getting their mares bred at $15, where it costs the Government $100 to breed them.

Mr. MONDELL. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 12, line 20, strike out "$182,840" and insert "$202,840." Line 21, strike out "$30,000" and insert "$50,000."

Mr. MONDELL. Mr. Chairman, my amendment increases the total item under this head by $20,000, and increases by a corresponding sum the appropriation for experiments in the breeding and maintenance of horses for military purposes. I want to say at the outset that I have not been very enthusiastic about this military horse-breeding business. I have been rather inclined to the opinion that the farmers of the country, with proper encouragement other than direct aid of this sort, would produce plenty of horses for military purposes, but we have started on this work. We have spent a considerable sum of money in connection with it. We now own a considerable number of stallions, and if we are going to carry on this horse-breeding business for military purposes we ought to begin to breed some horses in the country where a good military horse can be grown, and that is in the range country of the West. This work is now being carried on only in Vermont, New Hampshire, Virginia, West Virginia, Kentucky, and Tennessee, and mostly in Virginia and Vermont. For a number of years past our western people have been making inquiries with regard to this appropriation, and they have not understood why it was that in our country, where the horse business—the raising of horses—is one of the important industries of the country, we have not had the benefit of this particular class of Government service. For many years a very large portion of the cavalry horses of the country came from the range territory, so called, where horses are grown in large bands, where horses of good lung power, courage, and great endurance are grown; but in encouraging the development of the Army horse by breeding, so far we have confined the work entirely to the eastern section of the country, and to a very limited area there. I have offered this amendment increasing the amount of the appropriation in the hope that if the appropriation is increased a portion of this increase will be used in the plains country, in the intermountain country, where the horse industry is a very important one, and where we can produce, we believe, the best military horse grown anywhere.

Mr. LEVER. Mr. Chairman, I rise to oppose the amendment offered by the gentleman from Wyoming and to make this statement. I think it is the almost unanimous opinion of the members of the Committee o Agriculture that we ought not to go into the general business of experiments in the breeding and maintenance of horses for military purposes. Personally I do not believe we have any more right to send stallions around through the country than we have to send he goats or chicken roosters for breeding experiments. But the committee was confronted with this proposition: Congress at its last session provided an appropriation of $50,000 for the purchase of these stallions for breeding for military purposes. The committee thought that we ought to wait sufficiently long to see what the results were before stopping that work entirely. We have put into the bill $30,000 for maintenance purposes. My good friend from Iowa [Mr. HAUGEN], who is the business man of the committee, figured that under governmental management of stallions it would cost about $800 to $1,000 per annum for that purpose, and hence the committee allowed this appropriation.

Mr. HAUGEN. Mr. Chairman, the estimate furnished by the department is $1,250 for each stallion, or $50,000 for 40 stallions.

Mr. LEVER. Mr. Chairman, what we are trying to do is to provide only a fund sufficient to maintain the stallions. We already have 40 and by doing that we will indirectly compel the Department of Agriculture not to buy any more for this purpose until further authorized by Congress.

Mr. MONDELL. If it is a good thing to carry on this class of work in Virginia and in Vermont, why is it not a good thing to carry it on in Texas and in Montana and in the Dakotas and in Wyoming?

Mr. LEVER. Mr. Chairman, I yield to the gentleman from Iowa.

Mr. HAUGEN. Mr. Chairman, I will say to the gentleman that it is not a good thing to do anywhere in Texas, Montana, or any other State.

Mr. LEVER. That is the opinion of the committee.

Mr. MONDELL. Then, as I understand it, options that are not a good thing anywhere are carried in the bill, providing they are for a certain section of the country, and any little item representing another section of the country, whether good or bad, goes out?

Mr. HAUGEN. The whole practice ought to be discontinued.

Mr. MONDELL. In that I agree that——

Mr. HAUGEN. I can not believe anybody will contend it is a good policy of the Government to spend $100 for a simple option to buy a scrub colt at $150, providing subsequently they will sell the colt at the age of 3. That is the option the Government has.

Mr. LEVER. Mr. Chairman, I ask for a vote.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wyoming.

The question was taken, and the amendment was rejected.

Mr. SELDOMRIDGE. Mr. Chairman, I move to strike out the last word. This discussion, it seems to me, has revealed the fact that this bill is carrying a provision which is largely of no benefit whatever to a section of the country which is very much interested in the development of the horse industry.

Mr. LEVER. Mr. Chairman, if my friend will allow me just a moment I think I can satisfy him, as we would like to get along with the bill. We have in Vermont a horse-breeding station that has been carried in the bill for 10 or 15 years, and we have in Colorado a breeding station of carriage horses, and this item was put in the bill last year——

Mr. SELDOMRIDGE. Mr. Chairman, if my friend will permit, I want to say this: We have in Colorado a large homestead population, made up of very zealous, industrious, and energetic farmers, who have gone out there with little capital, and they are trying to establish homes. They are located in a section of the country where they are dependent in some measure upon the development of the live-stock industry. When I was in Colorado last fall I met a delegation of some 40 or 50 of those men, some of whom came over 40 miles to see me to urge a change in the policy of the department which would make the provision we are now considering available for them. Now, the facts are that at the agricultural college at Fort Collins we do have a type of carriage horse, which is of little benefit to the farmer.

If the farmer can get a Morgan-Percheron or some form of draft animal that will be available for the farm, that purpose will be met, but when he has to accept driving horses when he needs draft horses, the animal is of no benefit to him, and this military proposition, we have been informed, is simply available in certain sections of the country. They will gladly respond and cooperate with the department if some opportunity were given them to avail themselves of the law.

Mr. LEVER. The gentleman will understand it would be impossible in this bill to say how many horses should go to Colorado, how many to South Carolina, and how many to Vermont, and, after all, it is a proposition for the Department of Agriculture.

Mr. SELDOMRIDGE. Will the committee accept an amendment that $10,000 of this amount shall be expended west of the Missouri River?

Mr. LEVER. Oh, the committee could not do that. I ask the Clerk to read——

Mr. GARDNER. Mr. Chairman, I ask unanimous consent to address the committee for five minutes with reference to what appears to be a fraudulent use of my name, and I have no doubt the same fraud is being perpetrated in other gentlemen's districts.

The CHAIRMAN. The gentleman from Massachusetts asks unanimous consent to address the House for five minutes. Is there objection?

Mr. LEVER. Mr. Chairman, reserving the right to object, I wonder if we can not agree we may run until we finish this bureau? It has only one more page, and I would like to get through and finish this bureau.

Mr. MANN. As long as it is Saturday night, and we have had a very hard week——

Mr. LEVER. Yes; and I have had a very hard day, and we have taken up a lot of time; but I do not think there is any disposition to cut off the gentleman.

Mr. MANN. I would like to get through with half the bill, but I do not see any prospects.

Mr. LEVER. I shall not object.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. GARDNER. Mr. Chairman, this is a letter from the principal of a high school in Haverhill, Mass., in my district, and reads as follows:

THE HIGH SCHOOL,
*Haverhill, Mass., March 5, 1914.*

Capt. AUGUSTUS P. GARDNER,
*House of Representatives, Washington, D. C.*

DEAR SIR: It may be of interest to you to learn that a gentleman who gives the name of G. A. Macdonald is canvassing Haverhill on what I believe to be a false representation in connection with a set of books called "Messages of Presidents." He endeavors to persuade his prospective customers that his firm has been delegated by Congress to distribute volumes which he calls "Government documents" and tries to leave the impression that he is in some way connected with the Government itself. In talking to me he did not use your name, but I understand that with others he has referred to "our Congressman" and given the impression that you and other Members are in some way connected with the distribution of these volumes. The price which he asks is $59.50 for 11 volumes, and the whole scheme is palpably a fraud. I am wondering if possibly the Government will not want to investigate this matter a little, and am inclosing the card which Mr. Macdonald left with me yesterday. I hope that I am not intruding unduly on your time and attention in writing you on this matter.

* * * * * * *

Thanking you for your attention, I am,
Very truly, yours.

WALTER D. HEAD, *Principal.*

Now, Mr. Chairman, I have called the attention of Members to this letter because I believe that many will find on investigation that the same thing is going on in their own districts.

Mr. SELDOMRIDGE. If the gentleman will yield to me for a moment, I have evidence in my district to the same effect, that it has been canvassed in that way, perhaps not using the name of the Congressman, but conveying the impression these are official publications.

Mr. CRAMTON. I found a somewhat similar condition existing in my district last October at Mount Clemens.

Mr. GARDNER. Mr. Chairman, you will observe that the name of the publication which is being sold is "Messages of the Presidents." These volumes have been sold before in much the same way. It is an old story. It is 15 years since the Government originally printed the compilation. Each Member of Congress at that time was entitled to distribute a few copies, I have been told. Subsequently Congress gave the plates to a certain gentleman who had done work in preparing the compilation. Whoever is publishing it now is undoubtedly using the old Government plates. The canvassers are trying exactly the same scheme which they tried 15 years ago. They pretend that the Government has some connection with the matter. That is untrue. Unless you are on the lookout you gentlemen will find when you get home that your names are being used for purposes of which you do not dream.

Mr. SELDOMRIDGE. The impression has been created that these plates are now the private property of an individual whom it is not necessary to name, and that it is through an arrangement with him that these plates are being used. Is that correct?

Mr. GARDNER. I do not know about that. Of course, I know the name of the party to whom the gentleman alludes, but I do not know whether the statement that he is still the owner of the plates is correct or incorrect. Now, the card sent me in Mr. Head's letter reads "G. A. Macdonald, Washington, D. C." That is the name and address which the canvasser gives. There is no such name in the Washington Directory which I hold in my hand. There is a "G. A. McDonald," but he is a plumber, not a book agent.

Mr. LEVER. Mr. Chairman, I ask that the Clerk read.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Meat inspection, Bureau of Animal Industry: For additional expenses in carrying out the provisions of the meat-inspection act of June 30, 1906 (34 Stat. L., p. 674), there is hereby appropriated for the fiscal year ending June 30, 1915, the sum of $300,000: *Provided*, That the provisions of the meat-inspection law may be extended to the inspection of reindeer.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the proviso. I would like to have some statement as to the purpose of the committee in recommending that the meat-inspection law be extended to the inspection of reindeer.

Mr. LEVER. Mr. Chairman, I desire to read, for the information of the gentleman from Wisconsin, a memorandum from Dr. Melvin to Dr. Galloway on this proposition, as follows:

DEPARTMENT OF AGRICULTURE,
BUREAU OF ANIMAL INDUSTRY,
*Washington, D. C., February 27, 1914.*

Referring to your memorandum of yesterday, requesting certain information for the House Committee on Agriculture, I am inclosing memorandum from Mr. Bell in reply to the first inquiry and another prepared by Dr. Mohler in reply to the second; regarding the third, the present value of reindeer exported from Alaska is comparatively small. During the year 1912 it consisted of 127 carcasses, valued at $25 each. The total number of reindeer in Alaska is about 47,000. In a letter dated June 25, 1912, the First Assistant Secretary of the Interior states that the reindeer owned by the Eskimo have increased sufficiently to warrant the slaughter and sale each year of a limited number of the males. It is desired to dispose of part of the meat through the port of Seattle, and inspection is desired as a guaranty of the wholesomeness of the meat. Reports from Alaska indicate that the reindeer suffer from parasitic diseases and foot rot. The cost would probably not exceed one veterinary inspector's salary and expenses, about $2,000 per annum. His services could probably be utilized to advantage between slaughter seasons in making various investigations of livestock in Alaska.

A. D. MELVIN, *Chief of Bureau.*

Mr. STAFFORD. Then, it is intended to send an inspector up to Alaska to investigate the condition of the reindeer herd there?

Mr. LEVER. Between seasons, and when reindeer meat is being exported, in order to see that diseased reindeer meat is not put on board ship.

Mr. STAFFORD. It is an innovation to have reindeer meat exported into this country, as I understand from the reading of the letter?

Mr. LEVER. Yes.

Mr. STAFFORD. I withdraw the point of order.

The Clerk read as follows:

Total for Bureau of Animal Industry, $2,245,026.

[Mr. WINGO addressed the committee. See Appendix.]

Mr. MONDELL. I desire to offer an amendment.

The CHAIRMAN. The gentleman from Wyoming offers an amendment, which the Clerk will report.

Mr. FOWLER. Mr. Chairman——

The CHAIRMAN. The gentleman from Wyoming [Mr. MONDELL] is recognized to offer an amendment, which the Clerk will report.

The Clerk read as follows:

Insert, after line 4, page 14, the following proviso: "*Provided*, That of the sums appropriated for the Bureau of Animal Industry, not more than $5,000 will be expended for the importation of animals for breeding purposes."

Mr. BOOHER. Mr. Chairman, I reserve a point of order on that.

Mr. MONDELL. Mr. Chairman, I do not think it is subject to a point of order. It is simply a limitation on the appropriation. I trust the gentleman from Missouri [Mr. BOOHER] will withdraw the point of order.

Mr. BOOHER. Mr. Chairman, it was the same thing exactly that the Chair sustained a point of order against a few minutes ago.

Mr. MONDELL. No; it is in quite different form.

Mr. BOOHER. The "form" may be different, but the "substance" is the same.

Mr. MONDELL. I presume the gentleman from Missouri has no objection to making an importation not exceeding $5,000 in any event?

Mr. BOOHER. No.

Mr. LEVER. It does not increase the amount carried in the bill. I am perfectly willing to see it go in. In fact, I would like to see it go in. It was originally a committee recommendation. The amendment offered by the gentleman now would not increase the total at all as fixed by the bill. If it were adopted, the bill as passed would be $5,000 less than as reported to the House.

Mr. BOOHER. I am opposed to this way of doing business for the Government. I do not believe the Government ought to be in the horse-breeding business or in the sheep-breeding business. I am not positive—in fact, I do not know—whether it is subject to a point of order or not, but I will let the Chair pass on it.

The CHAIRMAN. Does the gentleman withdraw the point of order?

Mr. BOOHER. No; I did not withdraw it. I said that I could not tell whether it was subject to a point of order or not, but I would let the Chair pass upon it.

Mr. LEVER. Mr. Chairman, it seems to me the language in which the gentleman has drawn his amendment is clearly a limitation on the appropriation bill, and I do not think it is subject to a point of order.

Mr. MONDELL. Mr. Chairman, I do not want to take up the time of the Chair in discussing the point of order, but I think the amendment is clearly not subject to a point of order.

The CHAIRMAN. The Chair confesses that he has some little doubt about that coming within the rule indicated by the gentleman from Wyoming; but the Chair feels inclined, inasmuch as the chairman of the committee seems to agree with him, to give him the benefit of the doubt, and therefore overrules the point of order.

Mr. LEVER. Mr. Chairman, I ask for a vote.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Wyoming [Mr. MONDELL].

The amendment was agreed to.

Mr. LEVER. Mr. Chairman, that completes the Bureau of Animal Industry. My friend from Illinois [Mr. FOWLER] has an amendment which he wishes to offer. I ask that the next line of the bill be read.

Mr. FOWLER rose.

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. MANN. Let the Clerk read line 5.

The Clerk read as follows:

Bureau of Plant Industry.

Mr. FOWLER. I move, Mr. Chairman, to strike out the last word.

The CHAIRMAN. The gentleman from Illinois [Mr. FOWLER] moves to strike out the last word.

Mr. LEVER. Mr. Chairman, I understand the gentleman from Illinois [Mr. FOWLER] has an amendment to this item. I suggest to him that he offer it and let it be pending, and if it is subject to a point of order I shall reserve the point of order.

Mr. FOWLER. Mr. Chairman, I do desire to offer an amendment to this paragraph before we pass it; but I had conferred with the chairman of the committee and he informed me that he was going to move that the committee rise.

Mr. LEVER. Yes.

Mr. FOWLER. We can not dispose of the amendment now, to-night. I desire to confer further with the chairman and other members of the committee in order that we may expedite business, and I think it will be economy of time that that should be done. For that reason I prefer to wait until the next legislative day when this bill comes up to offer the amendment, so that we may have it understood as to whether it is advisable to offer it or not. I may not want to offer it after I have talked with the committee.

Mr. LEVER. Well, Mr. Chairman, in view of the statement of the gentleman from Illinois, and in view of the fact that this is Saturday and it is getting late, I move that the committee do now rise.

The motion was agreed to.

The committee accordingly rose; and Mr. BOOHER having taken the chair as Speaker pro tempore, Mr. HAMLIN, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 13679, the Agricultural appropriation bill, and had come to no resolution thereon.

ENROLLED BILL SIGNED.

Mr. ASHBROOK, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:

H. R. 13545. An act to extend the time for constructing a bridge across the Mississippi River at the town site of Sartell, Minn.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted to Mr. DAVENPORT, for 10 days, on account of important business.

ADJOURNMENT.

Mr. LEVER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 1 minute p. m.) the House adjourned until Monday, March 9, 1914, at 12 o'clock noon.

## EXECUTIVE COMMUNICATION.

Under clause 2 of Rule XXIV, a letter from the Secretary of the Treasury, transmitting draft of a bill for the relief of the Commissioner of Internal Revenue to cover the value of beer stamps stolen June 7, 1899, while in transit (H. Doc. No. 814), was taken from the Speaker's table, referred to the Committee on Claims, and ordered to be printed.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. GORDON, from the Committee on Military Affairs, to which was referred the bill (H. R. 8479) to repeal section 3 of article 110 of section 1342 of the Revised Statutes of the United States, enacted July 27, 1892; reported the same with amendment, accompanied by a report (No. 349), which said bill and report were referred to the House Calendar.

Mr. SMITH of Texas, from the Committee on Irrigation of Arid Lands, to which was referred the bill (H. R. 13921) extending the period of payment under reclamation projects, and for other purposes, reported the same with amendment, accompanied by a report (No. 350), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. RAYBURN, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 13985) to authorize the construction of a bridge across the Mississippi River at or near the city of Baton Rouge, La., reported the same with amendment, accompanied by a report (No. 351), which said bill and report were referred to the House Calendar.

## REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. STOUT, from the Committee on the Public Lands, to which was referred the bill (H. R. 6260) for the relief of Hyacinthe Villeneuve, reported the same with amendment, accompanied by a report (No. 348), which said bill and report were referred to the Private Calendar.

## CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 13648) granting a pension to Mariah E. Orange; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 13267) granting a pension to Charles Malicy; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 11371) granting a pension to Lauchling McDonald; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 13782) granting an increase of pension to James P. Barton; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 14122) granting an increase of pension to Levi S. Tanquary; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 10892) granting a pension to Alice Clapper; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 14214) for the relief of Joseph Glessner; Committee on Military Affairs discharged, and referred to the Committee on Pensions.

## PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. PADGETT: A bill (H. R. 14319) to create the grades of admiral and vice admiral in the Navy of the United States; to the Committee on Naval Affairs.

Also, a bill (H. R. 14320) to amend an act entitled "An act to promote the administration of justice in the Navy," to amend section 1624 of the Revised Statutes, and for other purposes; to the Committee on Naval Affairs.

By Mr. GUDGER: A bill (H. R. 14321) providing for the improvement of the French Broad River in North Carolina; to the Committee on Rivers and Harbors.

By Mr. WOODRUFF: Petitions of the employees of the Pere Marquette Railway, favoring investigation of the Pere Marquette Railroad; to the Committee on Interstate and Foreign Commerce.

## SENATE.

MONDAY, *March 9, 1914.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, Thou art the King of Truth. We thank Thee for the truth, not only as it pertains to our physical life but for that which comprehends all our spiritual relationships and all the functions of our spiritual nature. We thank Thee for the truth that pushes back the curtains of the eternal order and gives to us visions of the far-reaching vista of God's government, God's changeless laws, and God's attitude toward men. We thank Thee for truth tellers, prophets, foretellers of the things that are and are to be, and that Thou hast witnessed Thyself among men.

We pray Thee to make us passionate followers after truth that we may hold to the King of Truth, and that Thou wilt reveal to us clearly what is right and wrong, what is truth and error, what is light and darkness, that we may be found ready to follow with a passionate desire the truth to its end, and that we may see established the kingdom of truth in all the earth. For Christ's sake. Amen.

The Journal of the proceedings of Friday last was read and approved.

### RAILROADS IN ALASKA.

Mr. PITTMAN. On behalf of the conferees on the part of the Senate upon the disagreeing votes of the two Houses on Senate bill 48, I submit a conference report and ask for its immediate consideration.

The VICE PRESIDENT. The report will be read.

The report entire, which was in part read, is as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill S. 48, an act to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House and agree to the same with an amendment as follows: In lieu of the matter proposed in said House amendment insert the following:

"That the President of the United States is hereby empowered, authorized, and directed to adopt and use a name by which to designate the railroad or railroads and properties to be located, owned, acquired, or operated under the authority of this act; to employ such officers, agents, or agencies, in his discretion, as may be necessary to enable him to carry out the purposes of this act; to authorize and require such officers, agents, or agencies to perform any or all of the duties imposed upon him by the terms of this act; to detail and require any officer or officers in the Engineer Corps in the Army or Navy to perform service under this act; to fix the compensation of all officers, agents, or employees appointed or designated by him; to designate and cause to be located a route or routes for a line or lines of railroad in the Territory of Alaska not to exceed in the aggregate 1,000 miles, to be so located as to connect one or more of the open Pacific Ocean harbors on the southern coast of Alaska with the navigable waters in the interior of Alaska and with a coal field or fields so as best to aid in the development of the agricultural and mineral or other resources of Alaska and the settlement of the public lands therein and so as to provide transportation of coal for the Army and Navy, transportation of troops, arms, munitions of war, the mails, and for other governmental and public uses, and for the transportation of passengers and property; to construct and build a railroad or railroads along such route or routes as he may so designate and locate, with the necessary branch lines, feeders, sidings, switches, and spurs; to purchase or otherwise acquire all real and personal property necessary to carry out the purposes of this act; to exercise the power of eminent domain in acquiring property for such use, which use is hereby declared to be a public use, by condemnation in the courts of Alaska in accordance with the laws now or hereafter in force there; to acquire rights of way, terminal grounds, and all other rights; to purchase or otherwise acquire all necessary equipment for the construction and operation of such railroad or railroads; to build or otherwise acquire docks, wharves, terminal facilities, and all structures needed for the equipment and operation of such railroad or railroads; to fix, change, or modify rates for the transportation of passengers and property, which rates shall be equal and uniform, but no free transportation or passes shall be permitted except that the provisions of the interstate-commerce laws relating to the transportation of employees and their families shall be in force as to the lines constructed under this act; to receive compensation for the transportation of passengers and property, and to perform generally all the usual duties of a common carrier by railroad; to make and establish rules and regulations for the control and operation of said railroad or railroads; in his discretion, to lease the said railroad or railroads, or any portion thereof, including telegraph and telephone lines, after completion under such terms as he may deem proper, but no lease shall be for a longer period than 20 years, or, in the event of failure to lease, to operate the same until the further action of Congress: *Provided*, That if said railroad or railroads, including telegraph and telephone lines, are leased under the authority herein given, then and in that event they shall be operated under the jurisdiction and control of the provisions of the interstate-commerce laws; to purchase, condemn, or otherwise acquire upon such terms as he may deem proper any other line or lines of railroad in Alaska which may be necessary to complete the construction of the line or lines of railroad designated or located by him: *Provided*, That the price to be paid in case of purchase shall in no case exceed the actual physical value of the railroad; to make contracts or agreements with any railroad or steamship company or vessel owner for joint transportation of passengers or property over the road or roads herein provided for, and such railroad or steamship line or by such vessel, and to make such other contracts as may be necessary to carry out any of the purposes of this act; to utilize in carrying on the work herein provided for any and all machinery, equipment, instruments, material, and other property of any sort whatsoever used or acquired in connection with the construction of the Panama Canal, so far and as rapidly as the same is no longer needed at Panama, and the Isthmian Canal Commission is hereby authorized to deliver said property to such officers or persons as the President may designate, and to take credit therefor at such percentage of its original cost as the President may approve, but this amount shall not be charged against the fund provided for in this act.

"The authority herein granted shall include the power to construct, maintain, and operate telegraph and telephone lines so far as they may be necessary or convenient in the construction and operation of the railroad or railroads as herein authorized, and they shall perform generally all the usual duties of telegraph and telephone lines for hire.

"That it is the intent and purpose of Congress through this act to authorize and empower the President of the United States, and he is hereby fully authorized and empowered, through such officers, agents, or agencies as he may appoint or employ, to do all necessary acts and things in addition to those specially authorized in this act to enable him to accomplish the purposes and objects of this act.

"The President is hereby authorized to withdraw, locate, and dispose of, under such rules and regulations as he may prescribe, such area or areas of the public domain along the line or lines of such proposed railroad or railroads for town-site purposes as he may from time to time designate.

"Terminal and station grounds and rights of way through the lands of the United States in the Territory of Alaska are hereby granted for the construction of railroads, telegraph and telephone lines authorized by this act, and in all patents for lands hereafter taken up, entered, or located in the Territory of Alaska there shall be expressed that there is reserved to the United States a right of way for the construction of railroads, telegraph and telephone lines to the extent of 100 feet on either side of the center line of any such road, and 25 feet on either side of the center line of any such telegraph or telephone lines, and the President may, in such manner as he deems advisable, make reservation of such lands as are or may be useful for

furnishing materials for construction and for stations, terminals, docks, and for such other purposes in connection with the construction and operation of such railroad lines as he may deem necessary and desirable.

"SEC. 2. That the cost of the work authorized by this act shall not exceed $35,000,000, and in executing the authority granted by this act the President shall not expend nor obligate the United States to expend more than the said sum; and there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $1,000,000 to be used for carrying out the provisions of this act, to continue available until expended.

"SEC. 3. That all moneys derived from the lease, sale, or disposal of any of the public lands, including town sites in Alaska, or the coal or mineral therein contained, or the timber thereon, and the earnings of said railroad or railroads, together with the earnings of the telegraph and telephone lines constructed under this act, above maintenance charges and operating expenses, shall be paid into the Treasury of the United States as other miscellaneous receipts are paid, and a separate account thereof shall be kept and annually reported to Congress.

"SEC. 4. That the officers, agents, or agencies placed in charge of the work by the President shall make to the President annually, and at such other periods as may be required by the President or by either House of Congress, full and complete reports of all their acts and doings and of all moneys received and expended in the construction of said work and in the operation of said work or works and in the performance of their duties in connection therewith. The annual reports herein provided for shall be by the President transmitted to Congress."

And the House agree to the same.

KEY PITTMAN,
GEORGE E. CHAMBERLAIN,
W. L. JONES,
*Managers on the part of the Senate.*
W. C. HOUSTON,
FRANK E. GUERNSEY,
*Managers on the part of the House.*

The VICE PRESIDENT. Shall the bill embodied in the report be read?

Mr. CLARK of Wyoming. Has the report been printed?

Mr. JONES. It appeared in the RECORD a few days ago, when it was presented in the House.

Mr. CUMMINS. On what day does it appear?

Mr. PITTMAN. In the proceedings of Thursday last, I believe.

Mr. CUMMINS. I do not ask that the report be read, but I would like the Senator from Nevada to explain to the Senate what the amendment proposed really means. I particularly want to know whether his interpretation of the amendment means that the President is given power to begin the construction of the lines of railway that he may build at the northern terminus or termini of one or both the railroads now there, and to defer the acquisition of the existing railroads, if they are to be acquired at all, until after the parts of the road that he may build in the interior are completed. I have read hastily the proposal, and I confess great difficulty in understanding exactly what power is given to the President in this respect.

Mr. PITTMAN. In answer to the Senator from Iowa I will say that the bill, as the conferees on behalf of the Senate construe it, compels the President to build one continuous line from ports on the seacoast to river transportation in the interior, but it does not compel him to start that work at any particular point.

Mr. CUMMINS. If there is no particular urgency for the consideration of the report this morning, I would be very glad if the Senator from Nevada would allow it to be passed over until to-morrow morning.

Mr. CLARK of Wyoming. And have it printed.

Mr. CUMMINS. And have the report printed and put on our desks, although I understand the report has been printed in the RECORD.

Mr. CHAMBERLAIN. It is printed at page 4626 of the CONGRESSIONAL RECORD, I will say to the Senator.

Mr. PITTMAN. I will state to the Senator that it has been printed as a document in addition to being printed in the RECORD.

Mr. CUMMINS. I have not had an opportunity to see the document. It is a matter of very great importance, and I ask that the report be laid over until to-morrow morning.

Mr. PITTMAN. On the statement of the Senator from Iowa I consent, on behalf of the conferees on the part of the Senate, to postponing the report until to-morrow morning.

The VICE PRESIDENT. The report goes over until to-morrow morning.

### LIST OF CLAIMS (S. DOC. NO. 443).

The VICE PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting, pursuant to law, schedules of claims amounting to $119,847.64 allowed by the several accounting officers of the Treasury Department, the appropriations and balances of which have been exhausted or carried to the surplus fund, etc., which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

### JUDGMENTS OF COURT OF CLAIMS (S. DOC. NO. 441).

The VICE PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting a list of judgments rendered by the Court of Claims, amounting to $28,123.12, which have been presented to the Treasury Department and require an appropriation for their payment, etc., which, with the accompanying paper, was referred to the Committee on Appropriations and ordered to be printed.

### INDIAN DEPREDATION CLAIMS (S. DOC. NO. 442).

The VICE PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting a letter from the Attorney General, submitting a list of judgments rendered by the Court of Claims in favor of claimants in Indian depredation cases, amounting to $8,274, which require an appropriation for their payment, etc., which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

### MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed the bill (H. R. 1933) to limit the effect of the regulation of interstate commerce between the States in goods, wares, and merchandise wholly or in part manufactured, mined, or produced by convict labor or in any prison or reformatory, in which it requested the concurrence of the Senate.

The message also announced that the House had passed the concurrent resolution (S. Con. Res. 11) authorizing the printing of additional copies of Senate Document No. 357, Sixty-first Congress, and Senate Document No. 1063, Sixty-second Congress, being a compilation of treaties, conventions, etc., between the United States and other powers, with an amendment, in which it requested the concurrence of the Senate.

### ENROLLED BILL SIGNED.

The message further announced that the Speaker of the House had signed the enrolled bill (H. R. 13545) to extend the time for constructing a bridge across the Mississippi River at the town site of Sartell, Minn., and it was thereupon signed by the Vice President.

### PETITIONS AND MEMORIALS.

The VICE PRESIDENT presented a certificate from the governor of Ohio, transmitting a copy of a joint resolution passed by the General Assembly of the State of Ohio, relative to Federal action to abate the loss sustained from hog cholera, which was referred to the Committee on Agriculture and Forestry.

He also presented a memorial of the Young People's Society of the Congregation B'nai Abraham, of Newark, N. J., remonstrating against the enactment of legislation to provide an educational test for immigrants to this country, which was referred to the Committee on Immigration.

He also presented petitions of sundry citizens of Evansville, Greencastle, and Terre Haute, all in the State of Indiana, praying for the adoption of an amendment to the Constitution to prohibit polygamy, which were referred to the Committee on the Judiciary.

He also presented a memorial of Betsy Ross Branch, American Continental League, of Philadelphia, Pa., remonstrating against an appropriation for the celebration of the so-called "One hundred years of peace among English-speaking peoples," which was referred to the Committee on Foreign Relations.

He also presented memorials of Robert Morris Branch, American Continental League, of Philadelphia, Pa.; of Commodore Barry Branch, American Continental League, of Jersey City, N. J.; of New Britain Branch, American Continental League, of New Britain, Conn.; of John Adams Branch, American Continental League, of Pittsburgh, Pa.; of Jefferson Branch, American Continental League of America, of New Bedford, Mass.; of Washington Branch, American Continental League, of Youngstown, Ohio; of John Hancock Branch, American Continental League, of Lynn, Mass.; of Thomas Jefferson Branch, American Continental League, of Peoria, Ill.; of the Clan-na-Gael, of

Philadelphia, Pa.; and of the John Boyle O'Reilly Club, of Springfield, Ill., remonstrating against the repeal of that part of the Panama Canal act exempting American coastwise shipping from the payment of tolls, which were referred to the Committee on Interoceanic Canals.

Mr. GRONNA presented a petition of sundry citizens of Mott, N. Dak., praying for the enactment of legislation to provide an educational test for immigrants to this country, which was referred to the Committee on Immigration.

He also presented a petition of sundry citizens of Solen and Odense, in the State of North Dakota, praying for the adoption of a system of rural credits, which was referred to the Committee on Banking and Currency.

Mr. OLIVER presented petitions of General Putnam Council, No. 125, Fraternal Patriotic Americans, of Pittsburgh; of Washington Camp, No. 157, Patriotic Order Sons of America, of Williamsport; of Washington Camp, No. 366, Patriotic Order Sons of America, of Philadelphia; of Allegheny Council, No. 10, Daughters of America, of Pittsburgh; and of North Star Council, No. 67, Order United American Mechanics, of Quarryville; all in the State of Pennsylvania, praying for the enactment of legislation to further restrict immigration, which were referred to the Committee on Immigration.

He also presented memorials of the Federation of Liquor Dealers' Association of Sunbury and of sundry citizens of Philadelphia, Pittsburgh, Wilkes-Barre, Verona, Warriors Run, Rochester, Brownsville, and Bellevue, all in the State of Pennsylvania, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented petitions of the Board of Trade of Crafton, of the Allison Park Board of Public Service, of the York County No-License League, and of sundry citizens of Philadelphia and Van Order, all in the State of Pennsylvania, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented memorials of Liberty Bell Branch, American Continental League, of Philadelphia; of the Clan-na-Gael of Philadelphia; of John Paul Jones Branch, American Continental League, of Philadelphia; of Betsy Ross Branch, American Continental League, of Philadelphia; of Robert Morris Branch, American Continental League, of Philadelphia; and of John Adams Branch, American Continental League, of Pittsburgh, all in the State of Pennsylvania, remonstrating against an appropriation for the celebration of the so-called "One hundred years of peace among English-speaking peoples," which were referred to the Committee on Foreign Relations.

Mr. BRISTOW presented a petition of Prairie Center Local Union No. 640, of Kansas, praying for the enactment of legislation to prohibit gambling on exchanges, which was referred to the Committee on the Judiciary.

He also presented petitions of members of the bars of Lincoln County, Saline County, Buxton County, Lane County, Scott County, and Russell County, all in the State of Kansas, praying for the enactment of legislation providing for the establishment of a term of the district court for the district of Kansas at Salina, Kans., which were referred to the Committee on the Judiciary.

Mr. TOWNSEND presented petitions of sundry citizens of Caro, Prescott, Bay City, and Linden, all in the State of Michigan, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented the memorial of Frederick Menzer, of Turner, Mich., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

He also presented a petition of sundry citizens of Chelsea, Mich., and a petition of sundry citizens of Carsonville, Mich., praying for the enactment of legislation to provide an educational test for immigrants to this country, which were referred to the Committee on Immigration.

Mr. LEA of Tennessee presented a petition of Antioch Council, No. 258, Junior Order United American Mechanics, of Antioch, Tenn., praying for the enactment of legislation to provide an educational test for immigrants to this country, which was referred to the Committee on Immigration.

He also presented a memorial of sundry citizens of Nashville, Tenn., remonstrating against the enactment of legislation to compel the observance of Sunday as a day of rest in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented memorials of sundry citizens of Memphis, Tenn., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. SMITH of Maryland presented memorials of sundry citizens of Baltimore County; of the Catholic Workingmen's Union of the State of Maryland; of Society of Jaroslavz Dube, No. 45, of Baltimore; of Sharpshooters Council, Svornost, of Baltimore; of the Lodge Blanik, Bohemian Beneficial Association, of Baltimore; of the Bohemian Gymnastic Association, of Baltimore; of the Germania Quartet Club, of Baltimore; of the Bavarian Sick Beneficial Society, of Baltimore; of the Ladies' Society of Zion Congregation, of Baltimore; of the Brewmasters' Association, of Baltimore; of the East Baltimore Butchers' Mutual Aid Association; and of the Unkel Braesig Association, of Baltimore, all in the State of Maryland, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. THOMPSON presented petitions of sundry citizens of Anthony, Rice County, and Paola, all in the State of Kansas, praying for the enactment of legislation to further restrict immigration, which were referred to the Committee on Immigration.

He also presented petitions of the congregation of the Presbyterian Church of Garden City, Kans., praying for the adoption of an amendment to the Constitution to prohibit polygamy, which were referred to the Committee on the Judiciary.

He also presented a petition of sundry citizens of Clay Center, Kans., and a petition of sundry citizens of Pittsburg, Kans., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. GALLINGER presented a memorial of sundry citizens of Northfield, N. H., and a memorial of Local Union No. 633, Bartenders' League, of Nashua, N. H., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented the memorial of A. D. Porter, of Pasadena, Cal., remonstrating against an increase of postage on magazines, which was referred to the Committee on Post Offices and Post Roads.

He also presented a memorial of District Grand Lodge, No. 1, Independent Order B'nai B'rith, of Springfield, Mass., remonstrating against the enactment of legislation to provide an educational test for immigrants to this country, which was referred to the Committee on Immigration.

Mr. NELSON presented petitions of the congregations of the Lutheran Church at Rush Point, the First Methodist Episcopal Church of Redwood Falls, and the Clinton Avenue Methodist Episcopal Church, of St. Paul, and of the Home Missionary Society of the Methodist Episcopal Church of Minneapolis, all in the State of Minnesota, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

He also presented memorials of Local Union No. 365, Bartenders' Union, of Moorhead; of Cigarmakers' Local Union No. 351, of Mankato; and of sundry citizens of Moorhead, St. Paul, and Minneapolis, all in the State of Minnesota, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. BURTON presented a memorial of Lincoln Branch, American Continental League, of Niles, Ohio, and a memorial of Washington Branch, American Continental League, of Youngstown, Ohio, remonstrating against an appropriation for the celebration of the so-called "One hundred years of peace among English-speaking peoples," which were referred to the Committee on Foreign Relations.

He also presented petitions of the congregation of the Methodist Episcopal Church of Lisbon; of the Woman's Christian Temperance Union of Doylestown; of the Men's Adult Bible Class of the Presbyterian Church of Plain City; of sundry citizens of Franklin County; and of the board of the Walnut Street Methodist Episcopal Church, of Chillicothe, all in the State of Ohio, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation

of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented memorials of sundry citizens of New Straitville; of Toledo Sektion, No. 1, Bayerischer National Verband, of Toledo; and of the Toledo Central Labor Union, all in the State of Ohio, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented the petition of Albert Zettler, of Toledo, Ohio, praying for the enactment of legislation to make legal uniform price maintenance under certain restrictions, which was referred to the Committee on the Judiciary.

He also presented a joint resolution adopted by the General Assembly of the State of Ohio, praying for the enactment of legislation to abate the ravages of hog cholera, which was referred to the Committee on Agriculture and Forestry.

Mr. WARREN submitted a memorial of sundry citizens of Cheyenne, Wyo., and a memorial of Local Union No. 837, Bartenders' Union, of Kemmerer, Wyo., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. LODGE. I present resolutions adopted by the Legislature of the Commonwealth of Massachusetts, which I ask may be printed in the RECORD and referred to the Committee on Civil Service and Retrenchment.

There being no objection, the resolutions were referred to the Committee on Civil Service and Retrenchment and ordered to be printed in the RECORD, as follows:

THE COMMONWEALTH OF MASSACHUSETTS, 1914.

Resolutions relative to the retirement of civil-service employees of the United States Post Office Department.

Whereas there is now pending before the Congress of the United States a bill for the retirement of all civil-service employees of the United States Post Office Department, known as the Hamill bill, House of Representatives, No. 5139; and

Whereas the General Court of Massachusetts is in hearty accord with the principle of pensioning these faithful public servants: Therefore, be it

*Resolved*, That the General Court of Massachusetts respectfully recommends to Congress the speedy passage of the said bill, and requests the Senators and Representatives from Massachusetts to take such steps as may be proper to procure its passage; and be it further

*Resolved*, That a copy of these resolutions be sent by the secretary of the Commonwealth to the Postmaster General, to the Senators and Representatives in Congress from Massachusetts, and to the chairman of the Committee on Civil Service Reform of the Senate and of the House of Representatives.

In house of representatives, adopted, February 11, 1914.
In senate, adopted, in concurrence, February 24, 1914.
A true copy.
Attest:

FRANK J. DONAHUE,
*Secretary of the Commonwealth.*

Mr. LODGE presented a memorial of Local Lodge, Independent Order of B'nai B'rith, of Springfield, Mass., remonstrating against the enactment of legislation to provide an educational test for immigrants to this country, which was referred to the Committee on Immigration.

Mr. SHIVELY presented a memorial of sundry citizens of Connersville, Ind., and a memorial of the Alliance of German Societies of Evansville, Ind., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented memorials of sundry citizens of Ladoga, Ind., remonstrating against the enactment of legislation to compel the observance of Sunday as a day of rest in the District of Columbia, which were referred to the Committee on the District of Columbia.

He also presented a memorial of the Ministerial Association of Hartford City, Ind., remonstrating against the adoption of section 6 of the bill to amend the postal and civil-service laws, and for other purposes, which was referred to the Committee on Post Offices and Post Roads.

Mr. SMITH of Michigan presented memorials of Machinists' Local Union, No. 191, of Grand Rapids; of Cigar Makers' Local Union, No. 67, of Grand Haven; of the Arbeiter Society of Saginaw; of the Lansing Trades and Labor Council; and of sundry citizens of Grand Rapids and Detroit, all in the State of Michigan, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a petition of the faculty of Adrian College, Adrian, Mich., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

He also presented a memorial of J. M. Pond Post, No. 460, Grand Army of the Republic, Department of Michigan, of Saugatuck, and a memorial of J. B. McPherson Post, No. 183, Grand Army of the Republic, Department of Michigan, of Holly, Mich., remonstrating against any change being made in the United States flag, which were referred to the Committee on the Judiciary.

Mr. PAGE presented a memorial of Champlain Aerie, No. 793, Federation of Eagles, of Burlington, Vt., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. NORRIS presented a telegram, in the nature of a petition, from sundry citizens of Columbus, Nebr., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. JOHNSON presented a memorial of sundry citizens of West Peru, Me., remonstrating against the enactment of legislation to compel the observance of Sunday as a day of rest in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented a memorial of sundry citizens of Lisbon Falls, Me., and a memorial of sundry citizens of Maine, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. WEEKS presented a petition of the General Court of Massachusetts, praying for the enactment of legislation granting pensions for civil-service employees of the Post Office Department, which was referred to the Committee on Post Offices and Post Roads.

He also presented a petition of the State Board of Trade of Massachusetts, praying for the enactment of legislation to provide a legislative reference bureau in the Library of Congress, which was referred to the Committee on the Judiciary.

He also presented a memorial of H. M. Warren Post, No. 12, Grand Army of the Republic, Department of Massachusetts, of Wakefield, Mass., remonstrating against any change being made in the United States flag, which was referred to the Committee on the Judiciary.

He also presented memorials of John Hancock Branch, American Continental League, of Lynn; of Paul Revere Branch, American Continental League, of Leominster; and of John Hancock Branch, American Continental League, of Worcester, all in the State of Massachusetts, remonstrating against an appropriation for the celebration of the so-called "One hundred years of peace among English-speaking peoples," which were referred to the Committee on Foreign Relations.

He also presented a petition of Capt. John M. Pettingell Camp, No. 52, United Spanish War Veterans, of Amesbury, Mass., praying for the enactment of legislation to grant pensions to widows and orphans of soldiers of the Spanish-American War, which was referred to the Committee on Pensions.

He also presented a petition of sundry citizens of Boston, Mass., and a petition of sundry citizens of Whitman, Mass., praying for the enactment of legislation to further restrict immigration, which were referred to the Committee on Immigration.

He also presented memorials of the Federated Irish Societies of Massachusetts and of the John Boyle O'Reilly Club, of Springfield, Mass., remonstrating against the repeal of the clause in the Panama Canal act exempting American coastwise shipping from the payment of tolls, which were referred to the Committee on Interoceanic Canals.

He also presented memorials of Bartenders' Local Union No. 81, of Holyoke; of International Coopers' Local Union No. 89, of Boston; of Bartenders' Local Union No. 90, of Lawrence; of Local Union No. 499, International Brotherhood of Electrical Workers, of Brockton; and of sundry citizens of Boston, Springfield, and Milford, all in the State of Massachusetts, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. BRADLEY. I present 233 individual memorials from citizens of Kentucky, remonstrating against the passage of the joint resolution proposing an amendment to the Constitution for the prohibition of the manufacture and sale of alcoholic liquors. I ask that the memorials may be received and referred to the Committee on the Judiciary.

The VICE PRESIDENT. The memorials will be referred to the Committee on the Judiciary.

Mr. BRADLEY presented petitions of Grant Council, No. 52, of Williamstown; of Local Council No. 75, Daughters of America, of Hinton; of Baxter Council, No. 194, Junior Order United American Mechanics, of Louisville; and of Vale Council, No. 15, Junior Order United American Mechanics, of Vale, all in the State of Kentucky, praying for the enactment of legislation to provide an educational test for immigrants to this country, which were referred to the Committee on Immigration.

He also presented memorials of Local Branch No. 4, Catholic Mutual Benefit Association, of Covington; of Kenton Lodge, No. 151, of Covington; of the Covington Turngemeinde; of the Pike Street Mutual Aid Association, of Covington; of Old Kentucky Lodge, No. 214, Switchmen's Union, of Ludlow; and of the Anker Mutual Aid Society, of Newport, all in the State of Kentucky, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. McLEAN presented memorials of the Federation of Labor, of Danbury; of International Molders' Union, No. 298, of Waterbury; of Horse Shoers' Union, No. 14, of Hartford; and of sundry citizens of Bridgeport, Hartford, Norwich, Norwalk, and New Haven, all in the State of Connecticut, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a memorial of the Connecticut State Business Men's Association, remonstrating against the enactment of legislation authorizing the appointment by the President of clerks to United States courts, which was referred to the Committee on the Judiciary.

He also presented petitions of the congregations of the First Methodist Episcopal Church of Willimantic, the First Baptist Church of Willimantic, and the Congregational Church of Ellington, all in the State of Connecticut, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a memorial of the Connecticut State Business Men's Association, and a memorial of Local Division, Ancient Order of Hibernians, of Danbury, Conn., remonstrating against the repeal of the provision in the Panama Canal act exempting American coastwise vessels from the payment of tolls, which were referred to the Committee on Interoceanic Canals.

He also presented memorials of District Grand Lodge No. 1, Independent Order B'nai B'rith, of Connecticut, New York, Massachusetts, and Rhode Island; of the Italian Republican Club, of Torrington; of Ben Miller Council, No. 11, Junior Order United American Mechanics, of Danbury; of Gen. Joseph Walker Council, No. 14, Junior Order United American Mechanics, of Stratford; and of the United Hebrews' Societies of Stamford, all in the State of Connecticut, remonstrating against the enactment of legislation to provide an educational test for immigrants to this country, which were referred to the Committee on Immigration.

He also presented a petition of Mad River Grange, No. 71, Patrons of Husbandry, of Waterbury, Conn., and a petition of Excelsior Pomona Grange, No. 7, Patrons of Husbandry, of Waterbury, Conn., praying for the establishment of a system of rural credits, which were referred to the Committee on Banking and Currency.

He also presented a petition of Local Branch Civil Service Employees' Association, of South Norwalk, Conn., praying for the enactment of legislation to provide for the retirement of superannuated civil-service employees, which was referred to the Committee on Civil Service and Retrenchment.

He also presented a memorial of New Britain Branch, American Continental League, of New Britain, Conn., and a memorial of George Washington Branch, American Continental League, of Danbury, Conn., remonstrating against an appropriation for the celebration of the so-called "One hundred years of peace among English-speaking peoples," which were referred to the Committee on Foreign Relations.

He also presented resolutions adopted by the Connecticut State Branch of Post Office Clerks at their annual meeting at Bridgeport, Conn., favoring the enactment of legislation to provide for the retirement of superannuated civil-service employees and remonstrating against any change in the Sunday closing law affecting post-office clerks, which were referred to the Committee on Civil Service and Retrenchment.

Mr. CLAPP presented memorials of sundry citizens of Moorhead, St. Paul, and Minneapolis; of Local Union No. 598, Bartenders' Union, of East Grand Forks; and of Local Union No. 813, Bartenders' Union, of St. Cloud, all in the State of Minnesota, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a petition of sundry citizens of St. Paul, Minn., praying for the enactment of legislation to make lawful certain agreements between employees and laborers and persons engaged in agriculture or horticulture, and to limit the issuing of injunctions in certain cases, and for other purposes, which was referred to the Committee on the Judiciary.

Mr. BRANDEGEE presented petitions of Excelsior Pomona Grange, No. 7, Patrons of Husbandry, and of Mad River Grange, No. 71, Patrons of Husbandry, of Waterbury, Conn., praying for the enactment of legislation to establish a system of rural credits, which were referred to the Committee on Banking and Currency.

He also presented a memorial of the Connecticut State Branch, Post Office Clerks' Association, remonstrating against the enactment of legislation compelling employees in the Postal Service to work on Sundays, which was referred to the Committee on Post Offices and Post Roads.

He also presented a memorial of New Britain Branch, American Continental League, of New Britain, Conn., remonstrating against an appropriation for the celebration of the so-called "One hundred years of peace among English-speaking peoples," which was referred to the Committee on Foreign Relations.

He also presented a petition of William H. Hamilton Camp, No. 20, United Spanish War Veterans, of Danielson, Conn., praying for the enactment of legislation granting pensions to widows and minor children of soldiers of the Spanish-American War, which was referred to the Committee on Pensions.

He also presented a memorial of Wadhams Camp, No. 49, Sons of Veterans, of Waterbury, Conn., remonstrating against any change being made in the United States flag, which was referred to the Committee on the Judiciary.

He also presented a petition of General Joseph Walker Council, No. 14, Junior Order United American Mechanics, of Stratford, Conn., and a petition of Washington Camp, No. 8, Patriotic Order Sons of America, of New Haven, Conn., praying for the enactment of legislation to further restrict immigration, which were referred to the Committee on Immigration.

He also presented memorials of sundry citizens of Bridgeport, Stratford, and New Haven, all in the State of Connecticut, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. PERKINS presented a petition of the Associated Chambers of Commerce of the Pacific coast, favoring free tolls for vessels engaged in coastwise trade passing through the Panama Canal, which was referred to the Committee on Interoceanic Canals.

He also presented a petition of the congregation of the Methodist Episcopal Church of Hollister, Cal., and a petition of the congregation of the First Presbyterian Church of Arroyo Grande, Cal., favoring the suspension of the naval programs of the great powers, which were referred to the Committee on Naval Affairs.

He also presented a petition of Wheaton Camp, No. 8, Spanish War Veterans, of San Jose, Cal., praying for the enactment of legislation to grant pensions to widows and orphans of soldiers of the Spanish-American War, which was referred to the Committee on Pensions.

He also presented a memorial of sundry citizens of Monrovia, Cal., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented memorials of the Moving Picture Operators' Union of Sacramento; of Cigar Makers' Local Union, No. 469, of Bakersfield; of Bartenders' Local Union, No. 406, of Eureka; of Cooks and Waiters' Alliance, No. 31, of Oakland; and of sundry citizens of Los Angeles, all in the State of California, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a petition of the Sacramento Valley Improvement Association, of Sacramento, Cal., praying for the enactment of legislation to provide a system of rural credits, which was referred to the Committee on Banking and Currency.

Mr. MARTINE of New Jersey presented memorials of sundry citizens of Union County, Trenton, and Jersey City, all in the State of New Jersey, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture,

sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a memorial of the Young People's Society of the Congregation of B'nai Abraham, of Newark, N. J., remonstrating against the enactment of legislation to provide an educational test for immigrants to this country, which was referred to the Committee on Immigration.

He also presented a petition of sundry citizens of Essex County, N. J., praying for the enactment of legislation to further restrict immigration, which was referred to the Committee on Immigration.

Mr. POMERENE. I present a joint resolution adopted by the General Assembly of the State of Ohio, which I ask may be printed in the RECORD and referred to the Committee on Agriculture and Forestry.

There being no objection, the joint resolution was referred to the Committee on Agriculture and Forestry and ordered to be printed in the RECORD, as follows:

THE STATE OF OHIO,
EXECUTIVE DEPARTMENT.

UNITED STATES OF AMERICA,
*State of Ohio, ss:*

I, James M. COX, governor of the State of Ohio, do hereby certify that the following is an exemplified copy, carefully compared by me with the original rolls now on file in the office of and in the official custody of the secretary of state, as required by the laws of the State of Ohio, of a joint resolution adopted by the General Assembly of the State of Ohio on the 27th day of January, A. D. 1914.

In testimony whereof, I have hereunto subscribed my name and affixed the great seal of the State of Ohio at Columbus, this 6th day of March, A. D. 1914.

[SEAL.] JAMES M. COX, *Governor.*

**Senate joint resolution 3.**

**Joint resolution relative to proper Federal and State action to abate the loss sustained from hog cholera.**

Whereas it is estimated that on account of the ravages of cholera among hogs, the total annual diminution of the wealth of the United States is in excess of $50,000,000; and

Whereas it is further estimated that by reason of this disease there is a yearly waste of not less than 10 pounds of pork for every man, woman, and child in the Nation, a waste which, if it could be prevented, would aid materially in reducing the high cost of living; and

Whereas its ravages have become a menace to the national health and welfare, as well as being one of the most discouraging handicaps under which the American farmers labor: Therefore be it

*Resolved by the General Assembly of Ohio*, That the Congress of the United States be, and it is hereby, petitioned to enact the proper sanitary legislation to prohibit the interstate spread of this disease and to make such an appropriation of funds for its suppression as is commensurate with the magnitude of the damage and destruction inflicted by it upon the business and farming interests.

*Be it further resolved*, That the governor of this State be, and he is hereby, requested and directed to take all proper and necessary steps to secure conjoint action and cooperation on the part of all the State executives and legislatures to insure the complete eradication of this disease, which threatens to destroy and ruin the hog industry of the entire country; and

*Be it further resolved*, That the governor be, and he is hereby, directed to forward duly authenticated copies of this resolution to the President of the United States, to the President of the Senate of the United States, and to the Speaker of the House of Representatives of the United States, together with each Member of the Senate and Member of Congress for Ohio, with the request that the same be laid before the Senate and House for prompt consideration.

C. L. SWAIN,
*Speaker of the House of Representatives.*
W. A. GREENLUND,
*President of the Senate.*

Adopted January 27, 1914.

UNITED STATES OF AMERICA,
*State of Ohio, ss:*

I, Chas. H. Graves, secretary of state of the State of Ohio, do hereby certify that the foregoing is an exemplified copy, carefully compared by me with the original rolls now on file in this office, and in my official custody as secretary of state, as required by the laws of the State of Ohio, of a joint resolution adopted by the General Assembly of the State of Ohio on the 27th day of January, A. D. 1914.

In testimony whereof, I have hereunto subscribed my name and affixed my official seal at Columbus, this 3d day of March, A. D. 1914.

[SEAL.] CHAS. H. GRAVES,
*Secretary of State.*

## WOMAN SUFFRAGE.

Mr. THOMAS. Mr. President, on Friday last the Senator from Arizona [Mr. ASHURST] introduced and caused to have read a telegram from Mrs. O. H. P. Belmont relating to the pending unfinished business of the Senate. For that reason only I ask unanimous consent to have a letter, dated March 7, from Dr. Anna Howard Shaw read into the RECORD.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read as requested.

The Secretary read as follows:

NATIONAL AMERICAN WOMAN SUFFRAGE ASSOCIATION,
*505 Fifth Avenue, New York, March 7, 1914.*

Senator CHARLES THOMAS,
*United States Senate, Washington, D. C.*

MY DEAR SENATOR THOMAS: I have been reading of the various bills which have been introduced into Congress, of the debates on the floor of the Senate, and of the different groups of women who have made appeals for recognition before the judiciary and on the floor of the Senate.

As I wrote you some time since, the National Congressional Union in Washington, under the direction of Miss Paul, does not in any way represent the National Suffrage Association. There is no relation whatever between the two groups. The Congressional Union is largely made up of local people, with a few others scattered throughout the country, while the national association is an organized group of suffragists throughout the United States, which is represented by Mrs. Medill McCormick, Mrs. Antoinette Funk, Mrs. Helen Gardner, and Mrs. Booth in Washington. These ladies have been regularly appointed by the national association as their representatives, and no other group of women and no other woman from any part of the country is authorized by the national association to introduce any measure or to speak upon any measure in the name of the national association.

While I fully recognize that individual women and local societies have an equal right with all others to be heard, I also feel it my duty to state that none of these represent the organized suffragists of the country. So that whenever any individual or any representative of the Congressional Union in Washington makes any appeal to the Senate, or to yourself as chairman of the Senate committee, it is not to be understood as an appeal from the organized suffragists of the Nation. Nor when any threat is made of an attack upon the Democratic Party is it to be considered as coming from the organized suffragists of the Nation.

The National Suffrage Association and all of its auxiliaries, which are located in 42 of the States of the Union, are unalterably opposed to partisan action or to the attacks on any man or any group of men because they are allied with any particular political party.

With sincere regards.

Very truly, yours,

ANNA HOWARD SHAW.

Mr. SMOOT. Mr. President, in the RECORD of March 6 I am reported as saying that Mrs. Oliver H. P. Belmont, as I understood it, is a member of the National Board of Woman Suffrage. I stated that, as I understood it, she is not a member of the board. I should like to have that correction made.

The VICE PRESIDENT. The RECORD will be corrected.

## REPORTS OF COMMITTEES.

Mr. BRYAN, from the Committee on Post Offices and Post Roads, to which was referred the bill (H. R. 7967) to amend the act approved June 25, 1910, authorizing a postal savings system, reported it with amendments and submitted a report (No. 320) thereon.

Mr. NELSON, from the Committee on the Five Civilized Tribes of Indians, to which was referred the bill (H. R. 13091) to provide for drainage of Indian allotments of the Five Civilized Tribes, asked to be discharged from its further consideration and that it be referred to the Committee on Indian Affairs, which was agreed to.

## ADDRESSES BEFORE THE SOUTHERN COMMERCIAL CONGRESS (S. DOC. NO. 440).

Mr. FLETCHER. At the fifth annual convention of the Southern Commercial Congress held in Mobile, Ala., October 27–29, 1913, a number of very learned, instructive, and important addresses were delivered by the President of the United States, representatives of Latin-America, and the Pan American Union, including a letter from the Secretary of State, all as shown by the letter of transmittal. These I presented to the Committee on Printing for consideration, and that committee authorized a report favoring their publication as a Senate document. I therefore ask unanimous consent for the present consideration of the report and that it be agreed to.

The VICE PRESIDENT. The question is on agreeing to the report of the committee.

The report was agreed to.

## PAINT CREEK DISTRICT, W. VA.

Mr. SWANSON. Under authority of Senate resolution No. 37, passed by the Senate May 27, 1913, authorizing the Committee on Education and Labor to appoint a committee to make an investigation of conditions existing in the Paint Creek district, W. Va., I submit a report (No. 321) together with the individual views of the Senator from Idaho [Mr. BORAH], the Senator from New Jersey [Mr. MARTINE], the Senator from Iowa [Mr. KENYON], and the Senator from Tennessee [Mr. SHIELDS], which I ask may be printed.

The VICE PRESIDENT. The report will be received and printed.

## SOUTHERN CLAIMS.

Mr. OVERMAN. I wish to make a unanimous report from the Committee on the Judiciary and to ask unanimous consent for the present consideration of the bill. From the Committee on the Judiciary I report back favorably with an amendment the bill (S. 751) to repeal section 3480 of the Revised Statutes of the United States, and I submit a report (No. 319) thereon.

Mr. GALLINGER. Let the bill be read for information.

The VICE PRESIDENT. It will be read.

The Secretary read the bill, as follows:

*Be it enacted, etc.*, That section 3480 of the Revised Statutes of the United States be, and the same is hereby, repealed.

Mr. OVERMAN. Mr. President, I will say to the Senator from New Hampshire that the bill is one in which our old

friend, the late Senator Johnston, of Alabama, was very much interested. It has been passed by the Senate three times.

Mr. GALLINGER. I have no objection to it at all.

By unanimous consent the Senate, as in Committee of the Whole, proceeded to consider the bill.

The VICE PRESIDENT. The amendment of the committee will be stated.

The SECRETARY. After the word "repeal," in line 5, at the end of the bill, insert "so far as it affects payments for services in the Army of the United States prior to April 13, 1861."

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. WARREN:

A bill (S. 4714) to authorize Louis Eder to enter lands under the homestead laws (with accompanying papers); to the Committee on Public Lands.

By Mr. LEA of Tennessee:

A bill (S. 4715) for the relief of heirs or estate of David Jameson, deceased (with accompanying papers); to the Committee on Claims.

By Mr. THOMPSON:

A bill (S. 4716) granting an increase of pension to George Eichhorn (with accompanying papers); and

A bill (S. 4717) granting an increase of pension to Catharine J. Goodknight; to the Committee on Pensions.

By Mr. BRISTOW:

A bill (S. 4718) granting an increase of pension to Wilkison B. Ross (with accompanying papers); and

A bill (S. 4719) granting a pension to Thomas Jefferson Rothgeb (with accompanying papers); to the Committee on Pensions.

By Mr. KENYON:

A bill (S. 4720) granting a pension to Mary E. (Ross) Turner; to the Committee on Pensions.

By Mr. PERKINS:

A bill (S. 4721) for the relief of persons suffering damages by the construction of the canal diverting the waters of the Mormon Slough into the Calaveras River; to the Committee on Claims.

By Mr. CLAPP:

A bill (S. 4722) to create a bureau for the deaf and dumb in the Department of Labor, and prescribing the duties thereof; to the Committee on Education and Labor.

A bill (S. 4723) granting an increase of pension to Jennie J. Sheehan; to the Committee on Pensions.

By Mr. SMITH of Michigan:

A bill (S. 4724) granting an increase of pension to John Andrews; to the Committee on Pensions.

By Mr. JOHNSON:

A bill (S. 4725) providing for the establishment of a lobster-rearing station at some suitable point on the Atlantic coast; to the Committee on Fisheries.

A bill (S. 4726) granting an increase of pension to George W. Brawn;

A bill (S. 4727) granting a pension to Rosilla Dwelley (with accompanying paper);

A bill (S. 4728) granting an increase of pension to John H. Gordon (with accompanying papers); and

A bill (S. 4729) granting an increase of pension to George W. Eaton (with accompanying paper); to the Committee on Pensions.

By McLEAN:

A bill (S. 4730) granting an increase of pension to Hannora Harrigan (with accompanying papers); and

A bill (S. 4731) granting an increase of pension to Hiram F. Brundage (with accompanying papers); to the Committee on Pensions.

By Mr. BRADLEY:

A bill (S. 4732) granting a pension to George M. Mitchell (with accompanying papers); to the Committee on Pensions.

By Mr. RANSDELL:

A bill (S. 4733) for the relief of the Chettimanchi Band or Tribe of Indians of Louisiana, and for other purposes; to the Committee on Indian Affairs.

By Mr. CLARK of Wyoming:

A bill (S. 4734) authorizing the Northern Arapahoe Tribe of Indians to submit claims to the Court of Claims; to the Committee on Indian Affairs.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. CLAPP submitted an amendment authorizing the Secretary of the Treasury to pay to the officers and employees of the Senate and House of Representatives, etc., borne on the annual and session rolls on the 15th day of October, 1913, who are receiving an annual compensation of $2,500 or less, as reimbursement for mileage expenses, a sum equal to one-twelfth of the annual compensation then paid them by law, etc., intended to be proposed by him to the urgent deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. OLIVER submitted an amendment proposing to increase the appropriation for the ordnance service of the United States Army from $250,000 to $300,000, intended to be proposed by him to the Army appropriation bill, which was referred to the Committee on Military Affairs and ordered to be printed.

He also submitted an amendment proposing to appropriate $2,394,480 to reimburse the McClintic-Marshall Construction Co., of Pittsburgh, Pa., for extra cost in excess of contract obligations in the construction of the lock gates of the Panama Canal, etc., intended to be proposed by him to the urgent deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. OLIVER (for Mr. PENROSE) submitted an amendment providing that the unexpended balance of the appropriation of $10,000 for the completion of the post-office building at Hanover, Pa., be made available for the acquisition of additional land adjoining the present site, etc., intended to be proposed by him to the urgent deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. O'GORMAN submitted an amendment proposing to appropriate $17,655 for the rent of rooms for the United States courts and judicial officers and for the provision of necessary furniture and other equipment of courtrooms for New York City, etc., intended to be proposed by him to the urgent deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. NORRIS submitted an amendment authorizing the Washington Gas Light Co. to purchase, at a price to be ascertained and fixed by the Public Utilities Commission of the District of Columbia, as much of the 2,470 outstanding shares of the capital stock of the Georgetown Gas Light Co., etc., intended to be proposed by him to the District of Columbia appropriation bill, which was ordered to lie on the table and be printed.

He also submitted an amendment providing that on and after the 1st day of July, 1914, the Washington Gas Light Co. shall not charge or collect for gas furnished a consumer in any part of the District of Columbia a rate in excess of 75 cents per 1,000 cubic feet, etc., intended to be proposed by him to the District of Columbia appropriation bill, which was ordered to lie on the table and be printed.

NEW YORK, NEW HAVEN & HARTFORD RAILROAD.

Mr. GALLINGER. Mr. President, matters connected with the New York, New Haven & Hartford Railroad and the Boston & Maine Railroad have been made the subject of interesting discussions in the Senate. I have in my hand an article and an editorial from the morning Herald of this city, which I ask to have inserted in the RECORD without reading, as it will save time.

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

ONLY MEAGER PROFITS REALIZED BY J. P. MORGAN & CO. IN N. Y., N. H. & H. TRANSACTIONS—AT REQUEST OF CHAIRMAN ELLIOTT FIRM FURNISHES EVERY DETAIL, SHOWING THAT IN 20 YEARS NEARLY ONE-THIRD OF A BILLION DOLLARS' WORTH OF SECURITIES WERE HANDLED, THE NET PROFIT BEING $350,000—NOT INTERESTED IN OTHER PROPERTIES; YEARLY AVERAGE REFUTES MUCKRAKERS.

[House of Morgan's 20 years of financing with the New Haven road: Securities handled, $333,000,000; profit to Morgan & Co., $350,000; average yearly profit, $17,500.]

NEW YORK, *March 8.*

In correspondence made public to-day there are disclosed the details of the financial relations of J. P. Morgan & Co. to the New Haven road and its allied corporations.

It is shown that in relations extending for 20 years and covering transactions that aggregate $333,000,000 J. P. Morgan & Co. took a net profit of $350,000, an average of $17,500 a year for the past 20 years. It is further shown that neither the banking firm nor any of its partners was interested in any of the several properties acquired by the New Haven system.

Acting in response to questions submitted by directors of the road and others, Howard Elliott, chairman of the board of directors of the New Haven, wrote to Morgan & Co. on February 21 asking for the details of all financial transactions with the road and its allied companies, and as well that he be informed as to the interest of the firm or any of its partners in the properties bought by the company and the profits made by the banking firm.

RECITES LONG SERIES OF TRANSACTIONS.

The reply of Morgan & Co. bears the date of March 4 and, like the letter that brought it forth, is a striking document. It frankly recites

with detail and particularity a long series of transactions of large responsibility and the purchase or issuance of securities totaling one-third of a billion dollars in value, and in every instance discloses the profit or loss of the firm.

The popular impression, even in friendly quarters, has been that the banking firm took large profits from its transactions in the New Haven securities, and many fanciful tales as to the amount have been in circulation for weeks past.

No formal statement accompanied the publication of the two letters and the exhibits attached to the Morgan document. "The letters adequately explain themselves," said a representative of J. P. Morgan & Co., "and for that reason we have prepared no explanatory or other formal statement to accompany them. Our letter to Howard Elliott shows that in 20 years J. P. Morgan & Co. took part in the sale of $333,000,000 of securities of the New Haven companies and made a profit of $350,000 on the transactions."

NEITHER FIRM NOR PARTNERS INTERESTED.

It also shows that neither the firm nor its partners were interested in the properties acquired by the New Haven.

The correspondence, preceded by a brief explanatory statement from J. P. Morgan & Co., is as follows:

BOSTON, *February 21, 1914.*

Messrs. J. P. MORGAN & Co.,
*23 Wall Street, New York City.*

GENTLEMEN: I have been asked questions by our directors and by others about the transactions between your firm and this company, both before and since the fiscal agency contract, which was in effect from December 19, 1910, to December 4, 1913, and which was terminated by notice from your firm.

An examination of the books of the New Haven Co. will, of course, show these transactions, but as there are a number of subordinate companies and intercompany entries it would be a convenience to me, and would save some time, if I could obtain from you a complete statement of all transactions of the New Haven road and its allied companies, involving the placing of its securities or the purchase of securities for it, in which your firm or its predecessors, Messrs. Drexel, Morgan & Co., have taken part since January 1, 1894.

In addition to furnishing this information, it would assist me greatly, although I have no technical right to the information, if you would be willing to furnish me a statement showing the profits realized by your firm from the sale of securities purchased from the New Haven Co. or from any of its subordinate companies.

ASKS DATA OF MORGAN.

I should also be glad to have a statement from you as to whether your firm or any of its members ever had any interest in any properties acquired by the New Haven Co., such as the Westchester, the steam railways, the trolley lines, or the steamship companies.

I am also asked certain questions about the Millbrook Co., and I should be glad if you would inform me about the following:

1. The total amount of advances made by your firm to Mr. Oakleigh Thorne or to the Millbrook Co.

2. Whether your firm had any transactions with the Millbrook Co. other than for the account and by the order of the New York, New Haven & Hartford Railroad Co.

3. Whether there was any profit or commission to your firm, or any member of it, in these transactions, and if so, the extent of such profit or commission.

4. Whether your firm, or any member of it, had any interest in any of the securities purchased by the Millbrook Co.

If you are willing to give me the information suggested in this letter, it will assist me greatly in answering numerous inquiries that are made, and I shall be under obligations, particularly if you can send the information in the near future.

Yours, very truly,

(Signed) HOWARD ELLIOTT,
*Chairman.*

MORGAN & CO.'S REPLY.

NEW YORK, *March 4, 1914.*

HOWARD ELLIOTT, Esq.,
*Chairman, New York, New Haven & Hartford Railroad Co.,*
*South Station, Boston, Mass.*

DEAR SIR: We are in receipt of your letter of February 21, asking for certain information covering our relations with the New York, New Haven & Hartford Railroad Co. and its allied companies. In compliance with your request, and in the comparatively brief time available, we have had thorough examination made of all our books, the results of which we present herewith in the form of various statements, embracing all our transactions with the New Haven road and its subsidiaries during the past 20 years.

PROFIT WAS $350,000.

Our relations with the New Haven have been of the following character: From 1894 to 1910 the New Haven generally disposed of its securities by selling them outright—sometimes to us, sometimes to other houses. The securities thus purchased were afterwards sold by the purchasers for their own account, they taking the risk of profit or loss thereon. From December 19, 1910, until December 4, 1913, we acted, under contract, as the fiscal agent of the companies. In the course of these 20 years, from 1894 to 1914, we took part in the handling of New Haven and subsidiary company securities of the par value of $333,000,000, from which our firm realized a total net profit of approximately $350,000, all of the foregoing being set forth below in detail. All our calculations have included any participations by our Philadelphia, London, or Paris houses. The transactions are grouped under two headings, viz:

Schedule I. All securities purchased by us, either alone or in participation with others.

*Summary of Schedule I.*

| | |
|---|---|
| Total security purchases in which we participated | $131,724,000.00 |
| Amount of our participation in such purchases | 78,165,667.00 |
| Losses realized by us on certain of such purchases | 738,524.56 |
| Total profits accrued to us from all the remainder of such purchases | 555,164.42 |
| Net loss to our firm from the total of such purchases | 183,360.14 |

*Schedule II.*

| | |
|---|---|
| Section A: Transactions in which, prior to the fiscal agency contract, we acted as agent for the company, the total of securities involved in such transactions being a par value of | 58,851,803.00 |
| On these transactions total commissions paid by the company were | 158,561.13 |
| Being an average commission of less than three-tenths of 1 per cent. | |
| Of this commission the amount retained by us was | 148,645.25 |
| The balance being paid to others interested with us in the transactions. | |
| Section B: All transactions under fiscal agency contract (entered on Dec. 19, 1910, and terminated on Dec. 4, 1913) for all companies (including Boston & Maine), showing a total of | 142,507,000.00 |
| Of securities sold for account of the companies. | |
| Upon which they paid total commissions of | 837,605.00 |
| Or approximately five-eighths of 1 per cent for selling. | |
| Of this commission the amount retained by us was | 384,960.01 |
| The balance being paid to others interested with us in the transactions. | |

*Summary of Schedules I and II.*

| | |
|---|---|
| Schedule I: Amount of companies' outright sale of securities | 131,724,000.00 |
| Schedule II: Amount of companies' securities handled on commission | 201,358,803.00 |
| In all | 333,082,803.00 |
| Total amount of commissions paid by companies | 996,166.13 |
| Being a little less than one-half of 1 per cent. | |
| Total amount of such commissions retained by us | 533,625.20 |
| Net losses realized by us in the outright purchases (see Schedule I) | 183,360.14 |
| Difference, representing total profit to us | 350,265.12 |

DEAD FINANCIER'S INHERITANCE.

This total profit of $350,265.12 (being at the average rate of $17,500 per year) is, as aforesaid, the net result to our firms of all of our transactions with the New Haven and its allied companies during the 20-year period just ended. We have not received from the New Haven, or from the companies affiliated with it, any compensation or profit in any form, or on any other account, than those herewith described.

Answering your specific inquiry, we beg to state that none of our firms, nor any member of them, ever had any interest in any properties such as the Westchester, the steam railways, the trolley lines, or the steamship companies acquired by the New Haven Co. or any of its subsidiary companies. This broad statement has only one exception, the details of which are as follows:

Mr. J. P. Morgan, sr., inherited 1,222 shares of stock of the South Bay Wharf & Terminal Co. (being somewhat less than one-tenth of the whole) from his father in 1890. Seventeen years later, in January, 1907, he was asked to exchange this stock for 814 shares of New Haven stock and complied with the request. You may be interested in reading copy herewith of a letter under date of January 27, 1906, addressed to him by Mr. J. C. Cobb, explaining the method proposed for arriving, through outside appraisal, at a fair price to the New Haven in the matter. From this you will note that not only was Mr. Morgan's interest small, but that the transaction was carried through without participation by him.

Millbrook Co.: We are glad to make specific replies to your questions in regard to this company.

ROAD WAS "RESPONSIBLE."

(1) We hand you herewith statements of accounts from our books showing that from October, 1906, to September, 1907, we advanced Mr. Oakleigh Thorne, and afterwards the Millbrook Co., various sums aggregating $11,155,000. All these advances were made by order and for account of the New Haven Railroad Co. We inclose copy of an official letter to us from the New Haven Co., dated April 2, 1907, and received about that date, in which reference is made to an agreement dated December 4, 1906, between the New Haven Co. and the Millbrook Co., and to our advances on account of that contract. This letter confirms our understanding that all such transactions have been and are "for the account and benefit of the New Haven road," and furthermore that "that road is and will be responsible therefor." We hand to you also a list of the securities against which advances were made, such securities having been finally turned over to the Millbrook Co. under instructions of the New Haven Co.

(2) None of our firms, nor any member of them, had any transactions with the Millbrook Co. other than those for the account and by the order of the New Haven Co., as set forth in the statements of accounts furnished you herewith.

(3) In none of these transactions was there any profit or commission to our firms or to any member of them. The New Haven Co. opened with us an account which was designated as its "Account No. 2." In this account the company deposited from time to time (over $8,000,000 of the total prior to February, 1907) moneys to reimburse us for our advances for its account to the Millbrook Co. We inclose statement of that account, showing that any interest paid by Mr. Thorne was credited to the New Haven Co.'s "Account No. 2," and that we received no interest upon advances made.

$1,415,000 IN 11 YEARS.

(4) The securities thus purchased by the Millbrook Co. represented the ownership of those enterprises which afterwards became what is known as the New York, Westchester & Boston Railroad Co. None of our firms, nor any member of them, had any interest in the Millbrook Co., or in any of the securities or property purchased by the Millbrook Co., or received any advantage from such purchases. Nor had we any interest of any kind in any of the enterprises or properties which in any way became a part of the New York, Westchester & Boston.

DEPOSITS.

From the year 1903, when the first deposit account was opened with us, the companies have had with us total balances averaging for the 11 years about $1,415,000 (subject to draft) on which we have interest at 2 per cent.

We believe the foregoing covers all the points as to which you ask us. Should any point not be clear to you, or should you desire more detailed information on any point, we shall be very glad to give you explanation or further information you desire.

Yours, very truly,

J. P. MORGAN & Co.

WILL "SINK OR SWIM."

The letter from John C. Cobb to the elder Morgan, referred to in the firm's letter to Chairman Elliott, follows:

BOSTON, *January 27, 1906.*

MY DEAR MR. MORGAN: As representing your interest in the South Bay Wharf & Terminal Co., I would report that the present status of affairs is about as follows:

The question of adjustment of differences with the New Haven road has had further consideration, and our board of directors has appointed a committee consisting of Minot, Crocker, and Codman with full powers to adjust the matter as they may think best and to make a sale of the whole or any portion of the company's property. I have also stated to them that I control a majority of the stock of the company which I would sell at any price they might fix, other stockholders to have the opportunity to sell at the same price. These men were chosen as being men of unquestioned fairness, with large experience in real estate and railroad matters, and I would add each of them having a far larger interest in the New Haven road than they have in the South Bay Wharf & Terminal Co. They have recently made a careful and detailed estimate of the value of the company's property, which I figure would mean a value of about $170 a share for the stock.

Of the 12,387 shares of the company, about 7,500 shares, including yours, are directly in my control. Henry F. Dimock owns 1,282 shares which he says he prefers to hold, but will presumably do what the rest of us do. Minot, Crocker, and Codman, together hold about 1,000 shares and will presumably neither buy nor sell at the present time. As to the balance of the stock I have no definite knowledge beyond a general idea that 1,000 or 2,000 shares, possibly, might be purchased at or about par.

Yours, very truly,

JOHN C. COBB.

J. PIERPONT MORGAN, Esq.,
*Wall Street, New York.*

January 30, 1906, Mr. J. P. M. replied:

"I have received your letter of 27th and place my interest in the case in your hands. I am quite ready to sink or swim with you in the matter."

All above for Mr. Joyce's information. This had better be placed with the papers Mr. Joyce holds.

C. W. K.

—

LIGHT ON THE NEW HAVEN.

[Washington Herald editorial, Mar. 9, 1914.]

There is published to-day a chapter of modern financial history striking in its relation to the political thought and theme of the hour. J. P. Morgan & Co. have opened their books to disclose for public information the facts of their connection with the financing of the New Haven road.

The details are to be found on other pages of this newspaper in an extended dispatch from New York, and everyone should read them with care and thought; but we want to talk about them a little editorially, for the subject is high in the public mind and, incidentally, one which, in general and in variety, has been referred to in this particular column.

It appears that Howard Elliott, who is making encouraging progress toward the rehabilitation of the New Haven property, prompted by some of his directors and possibly inspired by a desire to satisfy himself, addressed an engagingly frank and pointed letter to J. P Morgan & Co. asking them for the facts of their former financial relations with his railroad and as to whether or not the house and its partners had interest, and if so, what, in the subsidiary properties acquired by the railway system.

The answer, equally frank and engaging, is going to be a distinct surprise to a large number of perfectly worthy persons, as well as to a considerable number who do not abide within that enviable class.

The response of the banking house, made as clear as simple English and plain figures can transmit meaning, shows that in financial operations aggregating just one-third of a billion dollars and extending over a period of 20 years its net profits were $350,265.12, and that the firm and its partners did not have interest in any properties bought by the railroad company.

We say this showing is going to be a surprise to the worthy and the unworthy because, between honest misconception and evil inspiration, there has been created the wide popular impression that Morgan & Co. had profited to the extent of many millions of dollars by methods that honest men abhor to the misfortune and partial wrecking of the New Haven system. It has been charged that Morgan & Co. led the railroad company on to destruction through the issue of securities for all manner of unwise and improper purposes, solely with the object of reaping dishonest profit through the sale of the securities which had to be issued. Discussion and agitation of the status of the New Haven property very properly claimed the attention of Congress and more than one Member of that body darkly hinted that the fiscal agents had robbed the railway system.

The inception and acceptance of such popular impressions, however unjust in their conclusions and harmful in their effects, are not to be wondered at. Truth is, the popular mind has long been in receptive frame along this line. Popular faith has been impaired, and on its more pessimistic side it has not only been prepared for the worst; it has hoped for the worst. Much of the political leadership of the time, many of our would-be molders of public opinion have deemed it wise or profitable to trade in broken faith and the discontent which it engenders, and do all they could to pass along and "bear in" these sensational and harmful tales. Nor have the stories lost anything in the telling, as is the way with the spoken word.

The lesson of the incident is a very simple one, but surely one not to be forgotten and overlooked in the higher politics of the time. It is that there are two sides to every tale, and that you'd better hear the other half before you adopt the story as your own.

For our own part, we are not surprised by the story told in this correspondence, unless it be at the smallness of the fee taken by J. P. Morgan & Co. They could have taken many times the toll that they did take and still have been within the decent bounds of legitimate business.

All through the months that the affairs of the New Haven have been under discussion we have doubted that this old and substantial firm of bankers had departed from the paths of honest dealing and fair play in its relations with the New Haven property. It has probably erred in judgment as to matters of policy, but its hands are clean and its integrity intact.

HOUSE BILL REFERRED.

H. R. 1933. An act to limit the effect of the regulation of interstate commerce between the States in goods, wares, and merchandise, wholly or in part manufactured, mined, or produced by convict labor or in any prison or reformatory, was read twice by its title and referred to the Committee on Education and Labor.

PRESIDENTIAL PRIMARIES.

The VICE PRESIDENT. Concurrent or other resolutions are in order. If there be none, the Chair lays before the Senate a resolution coming over from a preceding day, which will be read.

The resolution (S. Res. 284) yesterday submitted by Mr. CUMMINS was read, as follows:

*Resolved* That the Committee on Privileges and Elections be discharged from the further consideration of Senate bill 773, being a bill to establish a primary election for the nomination by political parties of candidates for President and Vice President of the United States, and for other purposes.

The VICE PRESIDENT. The Chair understands that by unanimous consent the resolution just read will be continued from day to day without prejudice. It accordingly will now go over without prejudice.

TOLL-EXEMPTION PROVISION OF PANAMA CANAL ACT.

The VICE PRESIDENT. The Chair lays before the Senate a resolution coming over from a preceding day, which will be read.

The Secretary read the resolution (S. Res. 289), submitted by Mr. POINDEXTER on the 6th instant, as follows:

*Resolved by the Senate of the United States,* That the President be respectfully requested to inform the Senate, in so far as not incompatible with the public interest, what "other matters of even greater delicacy and nearer consequence" are referred to in the President's message of March 5, 1914; and to so inform the Senate what connection such matters have with the proposed repeal of the toll-exemption provision of the Panama Canal act of August 24, 1912.

CONDITIONS IN MEXICO.

The VICE PRESIDENT laid before the Senate Senate resolution 164, requesting the President to transmit information relative to measures taken to protect citizens of the United States in Mexico.

Mr. FALL. Mr. President, on Thursday, March 5, the two Houses of this Congress met in joint session in the Hall of the House of Representatives—met in joint assembly to hear from the lips of the President of the United States a message in which, among other things, he said:

Mr. Speaker, Mr. President, gentlemen of the Congress, I have come to you upon an errand which can be very briefly performed, but I beg that you will not measure its importance by the number of sentences in which I state it. No communication I have addressed to the Congress carried with it graver or more far-reaching implications as to the interest of the country, and I come now to speak upon a matter with regard to which I am charged in a peculiar degree, by the Constitution itself, with personal responsibility.

Continuing, the President made this plea:

I ask this of you in support of the foreign policy of the administration. I shall not know how to deal with other matters of even greater delicacy and nearer consequence if you do not grant it to me in ungrudging measure.

Mr. President, I shall grant to the President that ungrudging measure of support which he has so solemnly requested. In yielding that support with my vote I shall give it because of convictions long since formed and often announced.

I shall not be guided in giving that support because of any knowledge I may possess of the pressing need of a repeal of the exemption clause in the Panama bill as an act in support of the foreign policy of this administration.

The President speaks of the personal responsibility with which he is charged under the Constitution, and refers, I presume, to his constitutional duty to direct and, in collaboration or cooperation with the Senate of the United States, to shape the foreign policy of this country.

By his plea he admits the constitutional duty of the Congress of the United States in the matter of the construction of the Hay-Pauncefote treaty, and yet he imparts to this Congress none of the reasons upon which he bases his plea for our support, and leaves the Congress and the country in entire ignorance of those affairs of foreign policy, gravely important as they must be, to which he refers.

Does not the President, so sincerely impressed with his personal responsibility, overlook the equally grave personal and collective responsibility under the Constitution of the Members of this coordinate branch of our Government? Is there not also resting upon the President a constitutional obligation to

keep the Congress informed as to affairs in which it has a constitutional right to act with him and an equally grave constitutional responsibility?

We learn from the public press, Mr. President, that possibly Great Britain is yet insisting upon her construction of the Hay-Pauncefote treaty; but while fully informed by Mr. Taft of that country's protest against proposed action upon canal tolls by this body, we have heard not one word from an authoritative source as to any further or other protest from her since we acted upon the subject.

We learn through the press that another country has protested against certain laws of a sovereign State of this Union, upon the ground that such State laws are in conflict with certain treaties or a treaty ratified by this body in the performance of its constitutional duty. Yet although a short time since requested by the President to join him in adopting an important arbitration treaty with that country, not one message, not one intimation have we received from the President concerning such reported protests.

On April 20, 1913, this Senate sent to the President a formally worded request for information as to the number of Americans killed in Mexico and the number driven out of that country; what steps had been taken by the President under his constitutional duty to see that solemn treaty stipulations for the protection of American citizens was enforced; and what measures were being pursued to obtain satisfaction for damages inflicted upon Americans in unhappy Mexico.

In the month of July following, no acknowledgment having been theretofore made even of the receipt of our respectful request, an answer was sent in informing us that the President did not deem it compatible with the public interest to furnish such information.

Mr. President, Abraham Lincoln, in the terrible days of our civil conflict, when the dark clouds of war hung low over this Capital City, thought it not incompatible with the public interests to fully inform the Senate of the United States concerning communications between this Government and that of France relating to matters of immense import touching the relative strength of the respective armies engaged in that strife, the conditions existing in the North and in the South, the offer of France to mediate, and so forth, as will be seen by reference to Executive Documents Nos. 37 and 38, Thirty-seventh Congress, third session.

Grover Cleveland thought it not incompatible with the public interests to fully inform the Senate as to the amount of damage claimed by our citizens in Cuba against Spain; as to the number of our citizens arrested in Cuba from February 24, 1895, to January 25, 1897; to forward to this body all papers and correspondence concerning the arrest, death, and so forth, of various Americans, and so forth, as will be seen by reference to special messages of January 22 and 25, February 1, 11, and 23, and March 2, 1897.

McKinley and other Presidents have thought it not incompatible with the public interest to furnish this body with similar information, realizing that in great national crises this is one branch of the department of government which must finally act.

Writers upon the subject of government and its different departments in this country have expressed appreciation of the difficulties under which Congress at times labors in the discharge of its constitutional responsibilities, and, passing such authorities as Brice and others, I will only quote from one, to-day recognized as the most authoritative upon this subject:

> But it is not always easy to get legislative questions fully and correctly answered, for the officers of the Government are in no way responsible to either House for their official conduct. They belong to an entirely separate and independent branch of the Government. Only such high crimes and misdemeanors as lay them open to impeachment expose them to the power of the Houses. The committees are therefore frequently prevented from doing their work of inquiry well, and the Senate has to act in the dark.

I have read, Mr. President, from page 530, The State, by Woodrow Wilson.

Mr. President, I fully appreciate and approve the invaluable service done the country and the assistance rendered this department of the Government by the press, from the great metropolitan dailies to the country weeklies, in giving out information concerning events in Mexico during the last three years and in calling attention from day to day to the deplorable state of affairs in that country and to the horrible outrages and atrocities perpetrated there upon defenseless men, women, and children, citizens of Mexico, and others, citizens of this great Nation and of other countries of the world. Personally I have been probably in closer touch with Mexico and have possibly had more ready access to accurate information than any other Senator, and I am oppressed with a sense of my personal responsibility, imposed upon me under the circumstances as I view them, by my sense of duty as a Member of this, one of the constitutional branches of this Government.

I shall ask indulgence, therefore, Mr. President, while I give to my colleagues some information in my possession. I shall refer, first, briefly to the outrages upon American citizens in the Republic of Mexico other than those resulting in death to the persons attacked. I shall go back into the history of the revolution in Mexico from the time of its inception or shortly thereafter. I shall only call attention to the fact that a committee of this body made a report containing 961 pages, over 500 of which contain instance after instance of attacks upon American citizens, of assaults upon innocent women and children—American citizens—in the Republic of Mexico, and I defy, Mr. President, the production of one scintilla of proof that anything whatsoever has been done by this Government or by any of its officials, further than in certain specific instances where matters were called to the attention of the State Department directly by Senators or others having some influence, to show one single instance in which anything more than merely a formal protest has been made, any single instance in which reparation has been sought or obtained.

Mr. President, among the witnesses whose testimony you will find included in this Senate report, I want to call the attention of Senators to the testimony of Stephenson, of Warren, of McKinney, of Fink, of Houghton, of Cobler, of Look, of Atwood, of Booker, and of Sutton. Among the hundreds, Mr. President, I mention these names because in every instance these men, not representing great corporations but representing their own private interests, speak to you through their sworn testimony of outrages committed upon American citizens in Mexico which have gone absolutely unrebuked. Everyone of these witnesses to whom I have referred is well known in his own State; each one of them has resided in Mexico for years; each one of them is familiar with the conditions in Mexico; and I have referred specifically to their evidence because they are among the men who came to Washington to plead with the Department of State in behalf of their fellow Americans in Mexico, but who were turned away from the department.

I am going to read, Mr. President, one affidavit from one of the 600 railroad men who were driven out of Mexico, a member of the Order of Railway Conductors. The affidavit is as follows:

AFFIDAVIT OF J. S. M'CRANIE AND J. D. KENNEDY.

EL PASO, TEX., *August 3, 1912.*

On May 11, 1911, we were conductor and engineer on passenger train No. 236 between San Luis and Anguas, and were caught by a bunch of Maderistas at Pena Blanco, and were forced to back up to Salinas. Before backing up to Salinas the Maderistas robbed all the passengers, abusing them and poking them with rifles, making them halloo "Viva Madero." I, the conductor, was robbed and called all the vile names in the Spanish language, and also spit on. After backing up to Salinas the soldiers all went over to the town of Salinas and got drunk, sent over a bunch of from three to five men about every 15 or 20 minutes, who would call us out, punch us in the ribs with rifles, hit us with machetes, makes us halloo "Viva Madero," and then take us between horses and run us for about 100 yards. Treated the passengers in the same way. They also shot the train all to pieces. There was about 14 American men on this train. We got loose on the morning of May 13 about 9.30 a. m.

On May 12 Conductor Kane was running train between Silao and Guanajuato with Engineer McFarland. A rail was taken out by a bunch of rebels; the rebels held this train up, robbed passengers and all people on it. After Conductor Kane had given them everything he had and the brakeman was begging for his life—as Conductor Kane could not speak Spanish—they shot Conductor Kane in the mouth and then shot the brakeman through the arm for begging Kane's life; also beat the engineer with machetes. This I did not see, but did see and help take Conductor Kane to the hospital on his arrival and ours. Also was told by people coming in that there was a lady on the train that they laid in the middle of the aisle and beat her on her feet with machetes trying to make her give up some diamonds and jewelry that they supposed she had. This was April 11, 1912.

Also, Supt. Hamilton, superintendent of the Guggenheim mines at Sandhill, was beat up by a bunch of rebels in May, 1911, until he couldn't sleep on his back for a week; abusing Mrs. Krutchniett, also Mr. Krutchniett and the rest of the Americans that were at the camp. This information I got from Mr. Hamilton before his back was well from the bruises.

J. S. MCCRANIE, *Conductor.*
J. D. KENNEDY, *Engineer.*

Subscribed and sworn to before me this the 3d day of August, A. D. 1912.

[SEAL.] H. E. CHAINIE,
*Notary Public in and for El Paso County, Tex., United States of America.*

Mr. President, I have here an extract from the report of W. W. Suit, the chief of the Order of Railroad Conductors in the Republic of Mexico prior to the time when all the American conductors and engineers, 600 or more in number, were driven out of that country. In this report, made through his official organ to his organization, he says:

> The United States of America, by the Monroe doctrine, assisted by sending an American Army to the Rio Grande in 1865, handed Mexico her liberty on a silver platter and has protected her ever since. Our reward is now being received in the form of about nine-tenths of our citizens fleeing from the country under humiliating circumstances to save their lives, while others are being shot down like mad dogs by a

lot of savages whose brains are pickled in alcohol and their nerves wrecked by immoral living, and who, convinced that they can not compete with honest business men in respectable pursuits of life, have turned loose to lay waste the country in their own natural way. Every American who has been in touch with the situation, and every citizen of other civilized countries, sees the necessity of adding the "big stick" to the Monroe doctrine, and the only question is, "When will it be done?"

I have here a letter from one of the conductors himself, Mr. T. J. O'Fallon:

I speak from experience. Four years as a conductor in Mexico gives me some knowledge of the country and the people I have seen in Guadalajara. The howling mob go through the streets crying death to the Americans, and our women and children scared very near to death. We had to stay in our rooms armed to protect ourselves for 24 hours before we could go out on the streets and view the wreckage of windows and doors of American-run business houses.

It was no use to apply to our Government. It was a dead one, as far as we Americans in Mexico were concerned. On account of the humiliating conditions that were being forced upon us, 600 conductors and engineers left the national lines of Mexico on 17th day of April, 1912; most of us came north of the Rio Grande. One of the first acts of myself and other ex-railroad men was to put our applications in at San Antonio to the Government for train service in Mexico. In case of intervention I hope in that case to run the first train into Mexico. It is time for our Representatives in Washington to show the firm hand. We expected this from our new administration, for we had nothing to expect from the old. You understand the conditions and what is needed in dealing with Mexico.

You surely have the hearty support of all the ex-Mexico railroad men and thousands of others.

This was in Guadalajara, said by the Mexicans to be the Athens of the Republic of Mexico.

Mr. President, I shall comment briefly upon some of the most outrageous cases which have occurred in Mexico as affecting American citizens, which cases I have personally investigated. I have not had the advantage of private access to the papers in the State Department, as have some of the Senators, doubtless, in this body. I hope, if they have had such access, they will give to the Senate of the United States, as supplementary at least to that which I am undertaking to give, the information they have obtained from the files of our State Department.

Mr. SHIVELY. Mr. President——

The VICE PRESIDENT. Does the Senator from New Mexico yield to the Senator from Indiana?

Mr. FALL. For a question.

Mr. SHIVELY. Do I misunderstand the Senator? Does he say that he has sought access to the papers in the State Department in a given case and has been denied access to them?

Mr. FALL. No; the Senator did not say anything of the sort, and I am very much surprised that the Senator from Indiana should have so construed the statement that was made.

Mr. SHIVELY. The Senator seemed to distinguish himself from other Senators, who, he says, have had access.

Mr. FALL. The Senate as a collective body asked for the information, and it was refused. If, under the President's constitutional duty to inform the Senate and the Congress as to the state of the Union, and to inform them upon matters upon which they must act in cooperation with the President, this body solemnly requests information, and it is refused to the body, I do not see how access to it would be given to a single Senator.

Mr. President, the cases to which I shall call attention, which I have investigated, and as to the facts of which I have been satisfied, I will comment upon as I proceed. In the case of any others, where I have not thoroughly satisfied myself as to the facts, I shall simply read the names as having established the fact of the occurrence.

Probably the State Department might be able to look through its files, if it were to consider it compatible with the public interests, and answer as to what has been done, if anything, to investigate the death of Mrs. Anderson, which occurred in Chihuahua on June 22, 1911, not under this administration. This is no partisan question, and I think I will be acquitted of any attempt to take any possible political or partisan advantage in what I shall say as to the last administration and this administration; but I should like to know whether there has been any attempt whatsoever made to investigate the case to which I have just referred.

Here was a poor woman, with her little girl, 13 years of age, and her little boy, 7 years of age, in their house, proceeding about their business, when soldiers of Madero's army entered the house and demanded that the woman should proceed to cook for them. She did so, and while she was placing the food on the stove she was shot. When she fell to the ground she was compelled to rise from the ground and continue her services for their benefit, bleeding as she was, bleeding to death; and while she was continuing to cook, her little daughter, 13 years of age, was outraged in her presence. A neighbor boy hearing the shot and running to their assistance, was shot in the door of the house and killed. The American colonists, at that time not quite so much intimidated as they have been since, secured the arrest of the men charged with this crime and their production before the judge having jurisdiction of the case. They admitted their guilt and made their depositions acknowledging every fact. They were punished by six months in jail and then turned loose upon the same community.

Mr. REED. Mr. President, if the Senator will pardon me, did the woman die?

Mr. FALL. She died.

Mr. REED. The Senator had not stated that fact.

Mr. FALL. Mr. President, the next case which was brought to my attention was that of Mabel Richardson, a little girl about 12 years of age, who was assaulted in a town 17 miles from where this first outrage occurred. Not only have her assailants never been punished, but not one word have I ever been able to find, not one line, where this Government has even protested concerning it.

These cases were all brought to the attention of the Government, and the cases to which I have referred were brought to the attention of the public in a speech made by myself in the Senate on July 22, 1912. I can not say that this specific case was otherwise brought to the attention of the Government.

James W. Harvey was killed in the State of Chihuahua in May, 1912, and mutilated with a spade. Nothing was done; no protest of any kind or character was made to anyone in so far as I have been able to discover.

William Adams was killed while his wife's dead body lay in an adjoining room. She had died from natural causes, and he had sent for her daughter and his, to come across from my State of New Mexico to attend the funeral. One of the officials of the Mexican Government, with whom this Government was dealing, despite the protests of this daughter and when her arms were thrown around her father for the purpose of protesting him, shot him through the head. I should like to ask if the records show that any protest was made or that any effort has been made to punish the perpetrator of this outrage?

You have heard something in the press of the case of Thomas A. J. Fountain an American citizen who was killed at Parai. I have all the official correspondence, including the deposition of Fountain, taken before his death by court-martial, and including the record from the State Department of the protest they made. They were notified by the consular agent at Parai through the consul, Marion Letcher, the present consul at Chihuahua, that Fountain was going to be killed for nothing except that he had been fighting in the forces opposed to those which had captured him. This Government was notified, and notified the man responsible, Mr. Jose Ynez Salazar, that he must not kill this American citizen.

We were more fortunate in this case than in the cases of Groce and Cannon, which brought down upon Zelaya, in Nicaragua, the wrath of this great Government, which resulted in this Government dismissing from this city the accredited minister of Nicaragua and taking active part, by armed intervention, in the affairs of Nicaragua and ejecting from the Republic Zelaya, the regularly elected President of that Republic. We were not so fortunate in those cases as we were in the Fountain case, where the flag of the Union was thrown around him as his shield and protection; but they tore aside the flag and killed the man. This Government protested to Madero, and served notice on Salazar and the other revolutionists in the field that the American people would hold the Mexican nation and the Mexican people responsible for such outrages, which must not be repeated. Has anyone heard anything further concerning the death of Fountain? Has any further protest been made, or any attempt to hold responsible the perpetrator of this offense?

Mr. LODGE. Mr. President, will the Senator allow me to interrupt him?

Mr. FALL. Certainly.

Mr. LODGE. Where is Salazar, who shot Fountain in that country, at the present time?

Mr. FALL. He is eating three square meals a day on this side of the river at Fort Bliss, near El Paso, Tex., protected by American soldiers. Meals are being furnished and paid for by the taxpayers of this Government for something over 4,000 of the Mexicans who came across the river at Ojinaga and other places at a cost to this Government, I have seen it stated, of $2,000 a day.

Joshua Stevens was killed near Colonia Pachecho, Mexico, on August 25, 1912. His two little daughters were attacked by Mexicans; and upon the father going to their assistance with a shotgun, and undertaking to drag the daughters away without using the gun, he was disemboweled by a machete in the hands of one of the men. They continued their attacks upon him, while the little girls defended him with sticks which they picked up from the ground and finally drove off the Mexicans, one of

them using the shotgun. Not a word of protest have I ever heard of coming from this Government, and I can say that this matter has been presented to the State Department.

Johnny Brooks was killed at Colonia, Chuichuipa, in May, I think, 1913. It was in 1913, I know. This man happened to be a Texan; and when he was attacked by five Mexicans, including one lieutenant, in a little closed room, with their guns down on him, he killed the lieutenant in command as he himself fell, riddled with bullets. Not a word has ever been heard in the way of demanding any reparation for the death of this man, who was then, and who had been, to my knowledge, living in Mexico for 10 years. He went there originally in my employ. He had been as gallant an officer as ever served in the noted Texas Rangers. His life was taken by these bandits without any earthly cause or provocation.

On July 26, 1913, in a little town a short distance up from Tampico, Mathew Gourd, from the State of Iowa, and his daughter and niece, living upon their little piece of land, were attacked by Mexicans. Gourd himself was tied to a tree and his daughter and his niece outraged in his presence. The Government of the United States sent word to the American consul at Tampico that they would have a Red Cross ship, which they were borrowing, sent down to Tampico in a short time, and requested that he might notify Americans that all who desired to go aboard would be allowed to do so and leave Mexico. Has the Government made any attempt to punish the perpetrators further than to notify some one who at one time happened to be occupying some position in Mexico that they would be held responsible for such outrages? Nothing, Mr. President, in so far as I have been able to learn.

Rogers Palmer, an English citizen, was killed with American citizens in Durango June 18, 1913, because he refused to open his safe and to turn over its contents to the bandits. At the same time Carlos Von Brandis and L. W. Elder, Americans, were wounded. One of them had his leg torn off, because they stood at the door of the McDonald Institute, in which the American women had taken refuge, and attempted to defend those women from the attack of Villa's bandits.

Has anything been done, Mr. President, in the attempt, I will not state to avenge, but to obtain reparation of any kind or character whatsoever for this outrage?

At the same time H. W. Stepp, an American, was shot because of his refusal to pay 500 pesos ransom.

A. W. Laurilaut, an English subject, was stripped, beaten, shot, and left for dead about the same time.

Mr. President, I will refer a little later to the other outrages which took place at this time and which have been communicated to this Government not only through consular reports, but by statements of eyewitnesses and presented to the President of the United States personally.

Edmund Hayes, an American employee of the Madera Co., and at the same time Robert Thomas, also an American citizen and an employee of that company, were killed by Santa Caravo, a captain in the federal army, at that time in full control of the State of Chihuahua. This matter was called to the attention of the State Department, and the Secretary of State telegraphed, making demands immediately for the arrest and punishment of the officer responsible for the killing of Hayes and Thomas. The killing was never denied. Santa Caravo belonged to Mercado's army, returned to Chihuahua, and remained there openly in charge of his men, and no attempt was made to arrest him, and nothing was done until two months later. It did happen, Mr. President, that I had been watching Mr. Caravo through my own men in Mexico and on the border, and, as I could show by the correspondence if I had time to go into it, I called the attention of the Secretary of State and of the President of the United States directly to the fact that Santa Caravo was walking the streets of Juarez, five minutes' ride from El Paso, Tex. Very promptly Mr. Bryan telegraphed to the Government in Mexico, and also to the consul at Juarez, Mr. T. B. Edwards, to demand the arrest and punishment, and that there might be an American representative at the trial which should be brought off promptly.

I should like to ask as to what the records of the State Department will show. He was arrested. What became of him? Where is he? Was he punished? Was anything whatsoever done by this Government to back up its threats to demand and to enforce the punishment of this man whom hundreds of citizens know was the murderer of one of our best American pioneers in Mexico? They had him. They caught him. Now, what did they do with him?

B. Stowe, shot by the rebels in 1912; a man living on his little ranch; a prosperous cattleman of a thousand head of good graded cattle. He was driven out; and he is now working in New Mexico for $40 a month. Every dollar of his savings and the accumulation of years is gone. The American consul and American Army and American soldiers under an American general were within 75 miles of him. Has there been any protest or any attempt to collect damages or to obtain reparation?

Benjamin Griffin, a ranchman, was murdered July 5, 1913, near Chuichupa, in the State of Chihuahua. Has there been anything further than a telegram sent by the State Department that it was expected that the perpetrators of outrages of this kind would be prosecuted? Has there been any attempt to obtain reparation or to hold anyone whatever responsible for the murder of this American citizen?

John H. Williams, mining engineer, was killed by a stray bullet at Nacozari March 8, 1913, when the rebels attacked that place.

Boris Garow, consulting engineer, was killed when an attack was made on Nueva Buena Vista, February 21, 1913.

U. G. Wolf, mining engineer, was murdered July 16, 1913, by outlaws in northern Sonora.

Mrs. E. W. Holmes was killed by a shell during the bombardment of Mexico City February, 1913. Of course that was one of the cases which was practically unavoidable, because the two contending forces were battling for supremacy in the City of Mexico.

Frank Ward, shot in the back by bandits near Yago, Tepic Territory, April 9, 1913. I endeavored to obtain information, not by asking it of the State Department, but from other sources, as I have been compelled to attempt to obtain information in other cases. For a long while it was impossible for me to get the facts of the occurrence resulting in Ward's killing, because when American women are attacked and outraged they themselves and their friends attempt to keep their names out of the press and avoid in every way possible publicity in matters of that kind. But I can say to you now, Mr. President, that an affidavit is on file in the American Embassy in the City of Mexico from Mrs. Ward herself stating that when her husband was shot, writhing in his wounds on the floor, she was outraged by Mexican bandits, who then killed him. The affidavit is on file. Has any attempt been made to secure the punishment of those guilty of this crime?

John S. H. Howard, United States customs inspector, was assassinated near Eagle Pass, Tex., February 1, 1913. In that case the State of Texas found one of the assassins and dealt with him as Texas is prepared to deal, I am glad to say, with other assassins.

Pablo Soto, a merchant of Naco, Ariz., was killed during a conflict between rebels and federals March 24, 1913. Two years before the United States Army had been drawn up at this identical place. They had communicated the instructions of this Government to both factions on the Mexican side that they must not precipitate a combat or a conflict within such distance of our lines as that the result of the firing of bullets might endanger the lives of our citizens. In spite of that warning, in the presence of the man who conveyed it, eight American citizens were shot down in the streets.

Again the same thing occurred in the presence of our troops two years thereafter. Has anything been done? Nothing, in so far as I have heard.

While I am upon this subject, Mr. President, I want to say that two months after the killing of these American citizens on the American side peacefully pursuing their daily occupation, these same forces—or at least the same forces from one of these conflicting factions—surrounded the city of Juarez, opposite El Paso, and they had a similar warning conveyed to them by the officer in charge of the United States troops. The United States troops patroled the city, the streets, the water front, and the boundary line. Telegrams were sent backward and forward, one of the officers, at least, demanding that he be allowed to go across into Mexico for the purpose of preventing the threatened danger to Americans on this side. In a city of 50,000 people. But they were not allowed to enforce their warning and 18 American citizens, including women, were shot down in the streets of El Paso.

Mr. President, when their friends asked of the Government of the United States that it might investigate the killing of American citizens on American soil and obtain for their families some little measure of relief in the payment of damages to those who needed it for their daily subsistence, this great Nation in writing refused to consider their cases and relegated them to the Mexican courts in the Republic of Mexico.

Finally this matter was brought to the attention of the Congress of the United States by the Senator from Arizona [Mr. SMITH] and myself, and when the Congress of the United States finally understood the matter they took it out of the hands of the State Department, which had proven itself incapable and unworthy in dealing with affairs of this kind, and placed it in

the hands of the War Department, who found damages to American citizens in El Paso for killing and wounding Americans, to the amount of $71,000, which should be paid by this Government, which might thereafter undertake to enforce its claims upon the Government of Mexico.

The Senate, Mr. President, I am proud to say, made an appropriation a year ago for the payment of these claims. Now the people are back here begging again at the hands of this Government that some little measure of justice to the children and widows of American citizens shot down on American soil may be provided as for two or three years they have been compelled to depend upon their own efforts; and to-day they see within a mile of their town 4,000 of the people who shot them down entertained as guests at the expense of the American Government.

L. Bushnell, mounted policeman, killed in Naco, Ariz., March 24, 1913, by a stray bullet fired by rebels.

Frank Howard, killed by bandits in Coalcoman, State of Micheacam, in March, 1913.

Herbert L. Russell, manager of American Vice Consul McCaughan's ranch near the city of Durango, murdered by rebels September 29, 1912. Consul Theodore C. Hamm cabled a report to the Department of State.

Has anything been done by the Department of State? I presume that Mr. Hamm possibly sent his telegram at Government rates. That is one advantage in being a consul.

Robert Williams, policeman, of Phoenix, Ariz., killed by Mexican bandits who crossed the line to attend a celebration of Mexican independence day in Phoenix on September 16, 1912.

Scott Price, bystander, killed when bandits were firing on Williams, Ariz., another American town.

N. Matheson, an aged and crippled Mormon, killed while fleeing from Colonia Morelos, Sonoro, on September 16, 1912, when bandits were looting the town.

Mr. McKinzie, an American resident, executed near Agua Prieta in September, 1912, because the rebels suspected he had given information to federal troops.

W. H. Waite, manager of the Esmeraldes plantation at Ochotal, Vera Cruz, killed in April, 1912, when he refused to pay money demanded by bandits. He was beheaded.

H. L. Strauss, formerly a correspondent for the New York Herald, killed with 34 other noncombatants when Zapatists held up a train August 11, 1912, near Cuantla, Morelos.

Thomas C. Kane, conductor on a Guanajuato railroad, shot through head when bandits wrecked a train at Silao and killed many passengers on April 10, 1912.

Pehr Olsson Seffer, formerly a professor in the University of California, killed by rebels on April 29, 1911, together with three of his servants, near Cuernavaca.

R. H. Ferguson, of San Francisco, a member of Troop F, Third United States Cavalry, killed by bullet fired over the border.

Two unidentified men, killed May 9, 1911, in El Paso, by stray bullets fired by federals and rebels.

Those were among the 15 whom I have mentioned—

Dr. R. C. Clarke, Taylorsville, Ill., shot dead in Mexico City, May 27, 1911, by a partisan of Gen. Diaz.

John R. Lockhart, Scotts City, Mo., mining engineer, killed by bandits in Durango in November, 1911.

R. N. Meredith, Troy, Ohio, struck by bullet in the Porter Hotel during the bombardment in Mexico City in February.

Mrs. Percy Griffith, legs shot off during bombardment in Mexico City.

A. E. Thomas, murdered by bandits while protecting wife and seven children near Nogales, Sonora, March 10, 1912.

Robert Huntington, railroad switchman, shot without cause near Agua Prieta, April 13, 1911.

J. C. Edwards, native of Virginia, shot to death while accidentally within rebel lines near Agua Prieta, April 13, 1911.

Stepson of J. M. Foster, of Newark, N. J., killed at Alamo, southern part of California, in June, 1911, because he had professionally treated a wounded insurgent a few days before.

John Hertling, Douglas, Ariz., a German-American citizen, hanged near Nogales by rebels under Orozco in July, 1912.

Guido Schubert, Douglas, Ariz., a friend of Hertling, hanged at the same time.

Investigated by Consul Sempich; responsibility fixed. Has anything been done? Consul Sempich, of Nogales, made a special request that he be allowed to investigate this case, and such request was granted, as I understand.

John Camp, killed near the United States immigration station in El Paso, Tex., May 9, 1911, when the rebels attacked Juarez.

Antonio Garcia, killed in El Paso, May 9, 1911, by stray rebel bullet.

Clarence H. Cooper, throat cut with a knife and robbed at Pearson—he was acting superintendent there—August 4, 1913.

Graham Taylor, at Aguas Calientes—English—robbed, stripped; an unknown American killed on same road two days before (August, 1913).

I mentioned this case because Taylor's wife was an American, and she was left in that country without a dollar with which to make her way to the United States. Finally the British consul furnished funds.

Thomas (or Theron) Kelly, American, extra passenger conductor, said to have been the son of Rev. Bernard Kelly, of Emporia, Kans., who was chaplain of the United States Congress at one time, so my informant says. That I can not vouch for. He was cremated in the Cumbre Tunnel a short time since.

H. F. Mauders, superintendent of the express service on the Mexico Northwestern; was a native of Woodland, Cal., where he has a father living. He died alongside Mr. Kelly.

Lee Williams, assistant to the commissary manager at Madero, son of E. H. Williams, of Philadelphia, died in the tunnel. John E. Webster, the conductor—Mr. Webster, Mr. President, was the oldest conductor on the road running from El Paso to Chihuahua and from Chihuahua out into the western part of the country—known and loved by every American and, as we thought, by every Mexican in the entire country; speaking Spanish almost like a native; having the universal respect and affection of everyone who knew him; poor Webster went to his death in the tunnel. E. J. McCutcheon, engineer, resident of El Paso, Tex.; M. J. Gilmartin, superintendent of the Northwestern Railway system, the great Pearson Syndicate in Mexico, and numbers of others. No one knows just how many American citizens were cremated at Cumbre; but among others were Mrs. Lee Carruth and five children, of Union Star, Mo., en route to join Mr. Carruth, a stationary engineer, the husband and father, at Madera.

Alfred Olcott, now of Los Angeles, was very recently shot in the foot in the State of Sonora while he and his American partner were defending that partner's wife and daughter from outrage by Mexicans. Both of them were shot. Olcott finally made his escape across the line by the assistance of Americans, and is now safe in Los Angeles.

Mr. LODGE. Mr. President, the Senator from New Mexico has concluded the list of those who were the victims of the tunnel disaster. I should like to ask him if it is not generally admitted that that was the work of Castillo?

Mr. FALL. Undoubtedly, Mr. President, that was the work of Castillo, who is now sojourning, along with Mr. Salazar, at Fort Bliss, Tex., as a guest of the United States Government.

Mr. LODGE. He has not been tried?

Mr. FALL. He has not been tried.

Mr. THOMAS. Mr. President, the Senator from New Mexico has several times referred, with disapproval evidently, to the fact that the refugees from the Battle of Ojinaga, across the line, have been entertained as "the guests of the United States." I should like to inquire of the Senator what policy should have been pursued by the Government with reference to those 4,000 refugees?

Mr. FALL. That, Mr. President, of course, is a question which would admit of debate and difference of opinion. I must say we were placed in a very difficult position; there is no question about that, because I myself, with the Senator from Arizona [Mr. SMITH] at one time transmitted to the department the protest of citizens down there against allowing similar cases to be transferred back to Mexico. I joined in that protest presented by the Senator. Now, Mr. President——

Mr. THOMAS. I have no desire to interrupt the Senator——

Mr. FALL. I think I will cover in my suggestions——

Mr. THOMAS. But in view of the fact that he so markedly and evidently disapproved of the course taken by the Government, it seemed to me quite pertinent to ascertain, if possible, just what his view was of what the Government policy should have been with reference to those refugees.

Mr. FALL. I will state to the Senator, if he will just allow me to answer the question he has asked me——

Mr. THOMAS. I beg the Senator's pardon. I thought the Senator had answered it, or I would not have interrupted him.

Mr. FALL. I shall undertake to tell the Senator, and I was proceeding to answer the Senator.

Mr. President, I do not believe this country has any constitutional authority to intern a foreign army. However, that is a matter of policy, which I know is one that is very difficult to decide. It may be that in interning this so-called army—for half of them were women and children who came across the

line, and 90 children have been born in the barracks where they are said to be interned—it may be that by interning them this Government pursued the most humane and the best policy. That part of it I am not criticizing.

Mr. President, I maintain that under international law—which I shall undertake to quote a little later—this Government should have recognized, as de facto and responsible, some man in Mexico, and when the bandit Castillo, who was not interned under the same law applicable to these other people, and when the bandit Salazar, who was not caught with arms when he crossed over into Texas, and was arrested under a warrant from my State for a violation of the laws of the United States—when these men were seized as they were, instead of being placed as our guests with these interned soldiers there should have been some responsibility placed upon Villa and Carranza in their relation to this country, and they should have been informed that this Government expected to turn Castillo over to the authority in Mexico which they recognized as de facto and responsible; that they expected to hold them responsible and to see that these men were dealt with according to civilized law and custom.

As to the Army, that is a very different proposition; as I say, that is a very hard question to answer. As a lawyer I do not believe that there is any power in this Government to hold those men at Fort Bliss that came across here with arms, and yet I think it is, as a matter of policy, possibly the best that could have been done; and, as I said, when citizens protested against the turning back of those who came across from Ojinaga to Nogales, I joined in presenting the protest of American citizens to the department.

Mr. REED. Mr. President, the Senator from New Mexico has referred to Salazar and Castillo——

Mr. FALL. I intend to refer to them a little bit later.

Mr. REED. But the Senator has referred to them as "guests of the United States." As a matter of fact are they not under arrest?

Mr. FALL. Oh, yes; they are under arrest.

Mr. REED. They are under arrest? Then, instead of being "guests of the United States," they are prisoners of the United States.

Mr. FALL. Mr. President, for the benefit of the Senator from Missouri, I will explain exactly the particulars. Jose Ynez Salazar was caught in the State of Texas by a United States marshal, with a warrant from the court of the district of New Mexico, for a violation of the neutrality laws. He was not under arms, but he was caught on a train, taken off the train, conducted to the nearest United States commissioner, and gave a bond, which was approved and accepted, for $5,000. He was then, through some process unknown, conveyed to Fort Bliss by the military authorities. The matter has been presented within the last day or two, I will say to the Senator, to the State Department and to the Secretary of War in this city; and the attorney for Mr. Huerta, representing Mr. Salazar, is now in the gallery and hearing my voice.

Mr. REED. But, Mr. President, the only question I wanted to ask the Senator—I wanted simply to get the facts—was whether these men are guests, being entertained at the expense of the Government or whether they are prisoners of the United States?

Mr. FALL. Mr. President, the Senator from Missouri——

Mr. REED. And that is a very important distinction, in my mind. Of course, the Senator will answer it in his own way.

Mr. FALL. I have sought to make a distinction. The Senator from Missouri has a very much broaedr vocabulary and a more voluminous vocabulary than have I. I am a plain man, and——

Mr. REED. Oh, but, Mr. President, the Senator from New Mexico knows the difference between a prisoner, who is being fed, because he is a prisoner, and a guest, who is being entertained because he is to be honored.

Mr. FALL. I know the difference.

Mr. REED. The Senator is giving us information that we are all greatly interested in and the American people also are undoubtedly greatly interested in, and I wanted a more accurate statement. I am challenging nothing the Senator says, but I should like to have him tell us in this plain, blunt English that he speaks of, whether these men are prisoners or guests?

Mr. FALL. The choice of my language may not suit the Senator, Mr. President, because I am speaking to the Senate of the United States, and I am not pleading technicalities to a criminal indictment in the courts of the State of Missouri or of some other State. However, I will repeat that Salazar was arrested on a criminal warrant charging him with the violation of the neutrality laws. This warrant was issued out of the United States court for the district of New Mexico, and he was conveyed before the nearest authority and gave a bond. He was not one of the soldiers who came across with arms and interned under the general policy—I can not, as I say, agree as to the law affecting that policy, but I am not criticizing it—applying to the other officers and soldiers who came across at Ojinaga. He did not come across at Ojinaga; he was not arrested there, but he was arrested by a United States marshal. In some way unknown, without a word to show for it, he came into the custody of the American military authorities, and I think I can go so far as to say that the Secretary of War has telegraphed to the commanding general at El Paso to know how he holds Salazar there. His bond has been approved; he is subject to release, and, as I have said, he was not interned as an officer or a soldier coming across to this side with arms in his hands. I did not intend to convey the idea that he was an invited guest, but he is a guest of this Government without any authority, so far as I know.

Mr. REED. But he is actually under restraint, if I understand the Senator, by the soldiers of the United States?

Mr. FALL. Mr. President, my information is that Mr. Salazar asked Gen. Scott to put him in a cell, because he was afraid some of the people on the outside would assassinate him for some of the offenses of which he was charged in Mexico.

Mr. REED. Mr. President, if the Senator will pardon me, I am not trying to be hypercritical at all, or to cavil about language; but there is a very important distinction between a man who is free to come and go, to escape from this country and to escape from the punishment of the law—there is a very important distinction between that man's situation and the man who is actually being held under arrest, because in the former case he could get away, while in the latter case he is being detained in a position where at the proper time, whenever it may arrive, he may be tried and punished. As I understand now, the Senator says this man is actually under arrest.

Mr. FALL. No; I do not so understand. I have endeavored to explain to the Senator——

Mr. REED. He is under detention, whether it is legal or illegal, by the soldiers of the United States.

Mr. FALL. I have tried criminal cases in my life, and if this were a criminal case before a judge, I possibly could undertake to differentiate as to the meaning of words, and so forth; but, Mr. President, I must ask the Senator to allow me to proceed. I have made myself as plain as I possibly could, and I think he has understood me. I desire to proceed with this statement.

Mr. President, I have referred to the cases of death at Agua Prieta and at El Paso, for which we are now asked to make appropriations.

The Government of the United States, or this administration, through the State Department, have, I believe, been attempting to secure the body of Gustav Bauch, an American, who has disappeared, and who it is reported has been killed by Mr. Villa in Juarez, Mexico. Apparently they have been unable to discover anything as to the death of this man—this American—born in Louisiana.

About the same time two or three deaths occurred, and practically the same statement has been made as to each of them. As to Gustav Bauch, at El Paso, Mr. Villa is reported to have said that he turned him loose, but that he was dead; "doubtless killed by his enemies before he could get back to this side." The other, Clemente Vergara, an American citizen, born in the county of Webb, in the State of Texas, and a resident in this country all of his life, was called to the other side of the river and killed. It has been claimed as a defense to the efforts of this Government and those of the State of Texas to secure his body and secure the punishment of his murderers that Mr. Vergara was not an American citizen. That has been disproven absolutely by the records, I can say, so far as my information from the governor of Texas goes. It was then claimed that he was not killed at all, but that he was allowed to escape, and is now a member of Villa's insurrecto band. My information, not only from the press but direct from the governor of Texas himself, is that Vergara's body is now on this side of the river, on American soil, and that the examination of the body shows for itself how Mr. Vergara came to his death; that it is the body of Vergara, the American citizen; and that Vergara is not a fugitive or in the insurrecto or any other army.

The case of Benton, Mr. President, we must consider apparently from a different aspect. Benton was an English subject. We really began to hear some discussion of Mexican matters and of outrages upon persons in Mexico when it became apparent that William Benton had disappeared. Then investigations were made; then information was sought; and I understand from the press that negotiations are still pending concerning

the Benton case. Is it possible that the Benton case attracted some attention because of the English policy as laid down long ago by Lord Palmerston in the House of Commons June 25, 1850? He then said that—

> We shall be told, perhaps, as we have already been told, that if the people of the country are liable to have stones placed upon their breasts and police officers to dance upon them, if they are liable to have their heads tied to their knees and to be left for hours in that state, or to be swung like a pendulum and to be bastinadoed as they swing, foreigners have no right to be better treated than the natives and have no business to complain if the same things are practiced upon them. We may be told this, but that is not my opinion, nor do I believe it is the opinion of any reasonable man.

Great Britain has never acquiesced in that opinion, Mr. President. It may be possible—I can not say positively, because I am laboring in the dark—that the fact that Great Britain does not and never has acquiesced in opinions such as cited by Lord Palmerston may be one reason why the President of the United States in his message delivered to the two Houses of Congress a few days ago pointed out the importance of foreign matters now pending, and besought the assistance of Congress in the repeal of a law which had been adopted by an overwhelming vote that he might in some way by some means be able to satisfy Great Britain. It is merely a supposition, Mr. President, upon my part.

Mr. SMITH of Michigan. Mr. President——

The PRESIDING OFFICER (Mr. HITCHCOCK in the chair). Does the Senator from New Mexico yield to the Senator from Michigan?

Mr. FALL. I do.

Mr. SMITH of Michigan. I think the Senator from New Mexico will recall the witness Rossman, a distinguished citizen of New Hampshire, who appeared before our committee and testified that it was the judgment of all his associates in Mexico that if he desired to return to Mexico for the purpose of looking after his business interests there, he ought to permit the impression to prevail that he is a German subject rather than an American citizen if he would receive good treatment.

Mr. FALL. I recall that. Further, I can testify to the fact, after 31 years' experience in Mexico, that prior to the year 1890 I have myself known Americans in Mexico to claim to be subjects of Great Britain. I have in mind one instance which occurred in 1883, when I first went to Mexico, where an American boy and a Canadian boy were in jail in the city of Zacatecas, where I was at that time mining. Both were arrested on some frivolous charge by Mexicans, and incarcerated. There was no British consul in the city at the time, but there was an American consul. The American boy, for himself and for his Canadian friend, appealed for assistance to the American consul. Not one thing in the world was done. Finally a letter was smuggled out from the Canadian. At that time Great Britain had no consuls in Mexico. She had severed diplomatic relations with Mexico and had no consuls or ministers in Mexico; but a letter was smuggled out by this Canadian, which, after several months, reached his family in Canada. A British ship of war was at once sent to Vera Cruz Harbor and a telegraphic demand made for the immediate release of that Canadian. When he was released and reported to the captain of the British ship, a demand was also made for the release of this American boy, and it was acceded to. This demand was made through Great Britain.

This is a circumstance that happened to come under my own observation; but we had believed those days were past, because under more recent administrations an American citizen had some standing in Mexico, until the outbreak of the Madero revolution.

I have referred to the fact that the last administration, when called upon to investigate the cases of American citizens killed on this side, in a report to the House of Congress which at that time had under consideration a resolution on the subject, stated in a report made to them that as a legal proposition American citizens killed on this side must be referred back to local Mexican tribunals on the other side for any damages. They absolutely refused to take up the matter, even diplomatically.

Not only that, Mr. President, but they went further. Claim after claim, thousands of claims, were filed or attempted to be filed with this administration. A circular note was finally issued from the State Department, under the administration of Mr. Knox, notifying all claimants in Mexico that they could, if they desired, file claims with the American embassy in the City of Mexico, and that as an errand boy the ambassador would turn them over to the foreign department of the Mexican Government; that in no instance would the State Department treat the matter diplomatically in an attempt to obtain any damages whatsoever, and that the only advantage which the claimant would receive by filing his claim with the American embassy would be that they, through courtesy, would send it over to the Mexican foreign office.

There was not one effort of any kind or character made to press a claim or to recover a dollar of damages for the hundreds of millions of dollars of damage done to American property up to the time of the incoming of this administration. Since that time not only has the order been issued to Americans to remove themselves from Mexico, but the Knox circular has been maintained in force in Mexico, and no further efforts have been made by this administration than were made by the last administration to obtain reparation for damages done to American interests and to American citizens, or to obtain any satisfaction whatever for the deaths of Americans occurring either before or since the 4th day of March last.

I am aware that if it were considered proper to undertake to make it, an argument might be made to the effect that probably not so many Americans have been killed during the last year as were killed during the two preceding years. I am willing to admit that the records would likely show that to be the truth. Why, Mr. President, the Americans have been driven out of Mexico by herds. Not only have they been invited out by their own Government, not only have they been told to come out, but they have been driven out at the mouth of guns, not only one man at a time but a hundred, driven over the line and chased by Mexican soldiers; not only men, but women; and not only women, but children.

Mr. President, the Secretary of State in this administration seems to have the idea very thoroughly impressed on him, as he has stated openly, that the only Americans who are in Mexico are those who are there to exploit the country, to make money, to rob the people, or else corporations which are at work there which, in his judgment, may be outlaws in this country. Whenever an appeal is made such as was made by Price McKinney, of Cleveland, Ohio, and others for the protection of the men in his employ, trying to save his property, who were being robbed and maltreated, the American citizens making the protests are informed that they are not telling the truth; that what they want is protection for their dirty dollars. When such men as Warren from Michigan, Stevens from California, McKinney from Ohio, Pence from Illinois, and men of that kind ask for protection for American citizens in Mexico, they are told that they are not telling the truth. That is what was told W. W. Turner, a State senator from El Paso, Tex., one of the most responsible citizens in the western part of the State, and I think I may say until the time of that conversation one of the most ardent supporters and admirers Mr. Bryan has ever had since Mr. Bryan first began his political career. He was told that he was pleading for dirty dollars.

Mr. REED. By whom?

Mr. FALL. By Mr. Bryan.

Mr. President, a few days after this matter was made public, with the names of these parties and how they were helpless, I went to the Secretary of State myself, for the purpose of presenting to him a concrete case which occurred in the town of Cananea, where an American citizen was threatened with deportation by the so-called authorities of that Mexican State. During that conversation the same subject was brought up with me, and it was stated that the Americans who were in Mexico were not Americans who were seeking to make homes there and help the country, but they were solely representatives of corporations there for the purpose of exploiting the people, obtaining possessions, getting hold of dollars, and coming back to this country, and that they had no right to demand protection for their property.

I declined to discuss the matter; but I returned to my office and wrote the Secretary a letter in which I referred to the conversation. In that letter I stated to him that I had then in my possession a list, which I had very hurriedly obtained, of 284 men, 301 women, and 1,266 children, 1,100 of the children having been born in Mexico, and every one of the men, women, and children having lived there from 10 to 27 years, retaining their American citizenship under both Mexican law and concessions, and being driven out across the border at the head of Salazar's forces.

Mr. SHIVELY. Did the Senator say, in that communication, that they had been driven across the border?

Mr. FALL. I do not know whether I said they had been driven or not. I will read the communication, if the Senator wants me to. I was not going into private matters any further than simply to refer to the case.

Mr. SHIVELY. The Senator will suit himself in that respect.

Mr. FALL. The Senator has asked the question, and I am going to read it for myself, at any rate, to see whether I did refer to the fact.

JULY 28, 1913.

Hon. WILLIAM J. BRYAN,
*Secretary of State, Washington, D. C.*

SIR: A few days since, during a conversation with you in your office, you seemed to be under the impression that Americans in Mexico were simply there temporarily to get money and later to leave that Republic. I remarked to you at the time that your information upon this subject was not entirely correct.

I have now a list of 284 men, 301 women, and 1,266 children, all American citizens, who were residing in Chihuahua and Sonora, the heads of the families owning their homes, and 85 per cent of these children born in Mexico.

Under articles 14 and 15 of the treaty of 1831, these people, together with all other Americans, whether transiently or more permanently being or residing in Mexico, were and are entitled to the most absolute protection. These provisions of this treaty are still in full force and effect. These people whom I am now calling your attention to were American citizens, and under the treaty referred to, under the Mexican foreign code, and under the colonization code of Mexico and the general laws of Mexico, these people and their children are American citizens.

I can furnish you at any time with a list of the names of the heads of families and fathers of these 1,266 children. This, I may say, is only a partial list of the Americans who have been run out of Mexico who were actually residing on their little homes there and who have lost every dollar in the world, which they had accumulated by the labor of their hands. In the majority of instances their little cottages have been burned to the ground, and I have now two heads of families from these colonies working on my ranch in New Mexico; one of whom could have sold his holdings for $35,000 a short time ago, and who is now working for me for wages, with every dollar of this property gone; the other a year ago was the owner of 1,000 head of cattle running near his little home; the home is destroyed, the cattle and all property gone, and he is now working for me for $40 a month. These particular people referred to have been residing in Mexico each for from 10 to 27 years.

This list does not comprise more than one-half the American people who from Sinoloa, Sonora, and Chihuahua alone have been forced to leave their little homes and lose all that they had accumulated.

This for your information.

Respectfully.

---

I presume that answers the Senator's question.

Mr. CLARK of Wyoming. What reply did the Senator get?

Mr. FALL. I received the following reply, Mr. President:

JULY 30, 1913.

The honorable ALBERT B. FALL,
*United States Senate.*

SIR: I have the honor to acknowledge the receipt of your letter of July 28, in regard to American settlers in Mexico, in which you state that you have a list of 284 men, 301 women, and 1,266 children, all American citizens, who lived in Sonora and Chihuahua until they were forced to seek refuge in the United States, the adults having resided in Mexico and owned their homes there for from 10 to 27 years.

I have the honor to be, sir,

Your obedient servant,

W. J. BRYAN.

[Laughter in the galleries.]

Mr. President, since it seems that if in my own words I voice the slightest criticism of the State Department, they are somewhat objected to, I am going to use the words of a lifelong Democrat, an ex-mayor of the city of El Paso, a county judge of that city, forwarded me to-day, with reference to the manner in which he and others have been treated by the State Department when they have presented matters to that department. This is J. J. Ochoa, a native of Texas, a citizen of the United States who lived in New Mexico. I knew him there for 28 years, and saw him two months ago on the streets of El Paso or at the hotel:

On the 10th of February, 1914, we wrote to the Department of State about Mr. Ochoa's case, and from that letter I will quote the following extract:

"Our letter book shows that from the downfall of President Diaz on we have had occasion to lay many distressing cases before the Department of State, and that we have always in substance declared that delay of action would only increase the number and the gravity of the outrages. That the men who were temporarily in power in Mexico, or in any part thereof, would use the forms of international law to avoid responsibility for past misdeeds to secure the time to commit new."

You will note that this letter was written just before the Benton and Rauch outrage and distinctly foretold the methods which would be resorted to by the murderers to avoid the natural consequences of their crimes.

The house in which it is believed that Villa shot Benton and the yard in the rear thereof, in which it is believed that his mutilated and partially cremated corpse lies buried, belong to Mr. Ochoa. The house which Villa announces he is preparing for the residence in Juarez of Mr. Carranza is also the property of Mr. Ochoa. American diplomatic agents who have business with the last-named chieftain will visit him in Mr. Ochoa's house, and yet the Department of State informs us that that house has not been confiscated, because some shadowy clerk of a "civil" governor says that he has not ordered the confiscation.

The fact is, Senator, for three years last past, the Department of State, in the face of the plainest warnings, now amounting to fulfilled prophecies, has acted upon the apparent belief that the various temporary chiefs of Mexico were animated by a desire to do justice, and possessed the power to administer it. We can not believe that we are the only persons who long ago called the truth to the attention of our foreign office, and Lord knows we have done so often enough. Really, Senator, it looks as if we have incurred the ill will of a great American department by our frequent and always unsuccessful efforts to obtain some measure of redress for the many clients who have suffered and are suffering outrages at the hands of the various Mexican parties. Every Mexican excuse, evasion, or denial was accepted as gospel truth, and we regarded or neglected as irresponsible trouble makers, seeking to mar the friendly relations existing between two sister Republics. We have twice been solemnly reprimanded, because, speaking through us, our clients have been unable to modulate their groans to the pitch of diplomatic propriety suitable to the ears of the State Department, but no of our clients has ever received one particle of benefit from the State Department or the Government of the country to which he owes allegiance. It is a fit subject for the artist of a comic newspaper—an American citizen stretched on the rack of Mexican outrage, Orosco, Salazar, Villa, Mercado, straining at the levers and Uncle Sam standing by, and instead of coming to the relief of their tortured sufferer, magisterially rebuking him for his bad manners in shrieking in such distinguished and polished company. Such a cartoon, Senator, will be but a truthful representation of what is not only now the fact but has always been the fact during three continuous years.

Don't think that the Department of State is the only place in the United States where there is any knowledge of the outer world. We know better perhaps than its staff, certainly much better than the various Secretaries who have held that office in the last few years, the attitude of the Spanish-Americans generally in Mexico and out of it, toward the United States. We can surmise some of the other foreign embarrassments which occupy the attention of our rulers, and the advisability of a Democratic administration perfecting its internal reforms and not allowing its attention to be diverted therefrom by foreign complications; but is American citizenship a burden to be borne, his allegiance a duty, and yet protection not a right?

Senator, Mr. Ochoa is a citizen of Texas as well as of the United States

He happened, through inheritance, three or fours ago to become possessed of a very large amount of real property in the city of Juarez. Forty tenant houses are owned by him. As the letter continues to say, they have been taken away from him. They are being used by the rebels, and the house that Villa occupied and in which our diplomatic representative, Mr. Carothers, visited him is Mr. Ochoa's house.

Mr. GALLINGER. Who is the author of that letter?

Mr. FALL. The author of the letter is Mr. J. U. Sweeney, the first commission-form mayor of El Paso, a very prominent attorney, whose responsibility will be vouched for, I think, by any man in Texas who has even known him at all.

Mr. GALLINGER. A Democrat?

Mr. FALL. A Democrat.

[At this point Mr. FALL was interrupted by the expiration of the morning hour, when the unfinished business was laid before the Senate, which, by unanimous consent, was laid aside that Mr. FALL might conclude his remarks.]

Mr. FALL. Mr. President, I have referred to specific instances of outrages on American citizens—women and children—in Mexico, and I have referred the Senate for further information to the committee report before this body.

I wish to call attention to the fact that entire American colonies have been absolutely wiped off the face of the earth in the Republic of Mexico, their houses have been burned to the ground, and the Americans driven across the border or outraged and killed, and that this has not been confined to any one part of Mexico or to any one class of colonies.

The colonists of Las Mochis, for example, were compelled to surrender the homes which they had there because they were told they must do so by our sailors, who were out in the harbor near there, and that they would be allowed to take refuge upon our vessels. They were compelled to take what they could get for the supplies which they had on hand, and that in State scrip, with absolutely not even a promise behind it. Property which had been the accumulation of years had been taken from them in a moment.

This state of affairs commenced three years ago in Mexico and it so exists to-day. Within the last four weeks Mr. Carranza has confiscated the banks of Sonora and the business houses of the merchants there simply because they would not open their doors and continue to do business with State scrip to be handed over the counters, goods costing gold to be returned for it.

What has the Government done? It has had the protests. There is no doubt of that. It has had the protests from our merchants, from our miners, from others, that they are being compelled to part with everything they have, everything which is necessary for the operation of their mines and their other purposes, and they are being compelled to accept a piece of paper with absolutely nothing behind it, and if they do not accept it they subject themselves to a fine, and if they take this same paper money with which to pay their fine the paper money is refused by the officers of the law.

Mr. President, it is almost impossible to imagine that a condition of affairs will exist so close to the American border; but, as a matter of fact, within a month, a man was arrested in Cananea because he refused to take the constitutional scrip. He went up to the court and admitted that he had refused to take the scrip, because he could not continue to give over his goods for nothing. He was fined $50 for his refusal, and when he paid that $50 in their scrip they refused it and sent him to jail until he dug up silver money to pay his fine.

What are we doing, Mr. President? Are we going to allow things of that kind to continue? An American settlement near which one of these horrible outrages was perpetrated has been practically depopulated, almost a little paradise in the valley of

the mountains near Tampico, inhabited by a prosperous American colony, driven out, and no protection afforded by their Government.

The same is true of the colonies of Garcia, Paceco, Juarez, Dublan, and other colonies throughout the States of Sonora and Chihuahua.

I have here an interview with a man I know very well, published in a paper July 26, 1913, referring to one of these colonies:

There must have been 125 houses destroyed in Colonia Diaz, and I believe this colony suffered more than the others. We had just three hours to get out, leaving all the accumulations of years of hard work. Oh, it was hard. I don't want to think of it. We left June 2—

This is 1913—

as the bandits burned my two-story granary and thrashing machine. I laid out that place 28 years ago, and, so to speak, grew up with it, so you can imagine how I feel in the matter.

Several times the Mexicans thrashed through the colony, playing havoc with it each time, until now it is an absolute ruin. Beautiful homes all destroyed, farm equipment burned. Everything those wretches could lay their hands on they burned or wrecked. I had 300 head of polled angus cattle; I saved only 29 head. Of 80 horses we had on the ranch, only 8 escaped the hands of the vandals. In that section there were 10 stallions worth $50,000. We did manage to save 3 or 4 from the bandits. I had 6,000 bushels of wheat on my ranch a year ago. It went quick when the revolutionists showed up. In the colony altogether there must have been 40,000 bushels, all of which went. There were about 4,000 people in the colonies; there are now only a few families left, and they are in danger.

Without respect to their own people, the band of one of these conflicting factions or the other goes into a town where there is anything to loot, and loots. It makes no difference whether they are Huerta's soldiers, so called, or whether they are the Villa bandits or the Carranza constitutionalists; the action is the same. When Urbina, who is the right-hand man of Villa, and has more troops than Villa himself in his own command, attacked the city of Durango, a city of 6,000 inhabitants, they looted every bank, they looted every store, and they outraged hundreds of women on the streets. They shot right and left and killed with impunity, and when the British and American consuls went to Urbina and demanded that some protection be extended, and then later that some punishment be meted out to the perpetrators of these outrages, what was the answer? "When did this particular offense occur?" "Day before yesterday." "Oh, no; that was within the 24 hours. I gave my men liberty for 24 hours to do what they pleased. None can be held responsible for any act committed during the 24 hours, and no investigation can be held."

Mr. WORKS. Mr. President——

The PRESIDING OFFICER (Mr. SAULSBURY in the chair). Does the Senator from New Mexico yield to the Senator from California?

Mr. FALL. I do.

Mr. WORKS. In this connection I will state that while I was at home in California during the summer I had an interview with an American citizen who was a merchant in one of those cities. He told me of just that occurrence when the Americans there undertook to protect the American citizens who were in the city. They went to the commanding officer, and he told them in plain terms that he had no control over his soldiers during the first 24 hours; that under the arrangement that was made with them they were entitled to do what they pleased during that time. The Americans then got their people together the best they could to protect them during that time. Some of them were maltreated. After the 24 hours had expired they attempted then to have something done by the commanding officer, and he declined. He said that there could be no punishment for any act committed within the 24 hours. This man was himself a sufferer. He was a merchant there. He had two stores, and they were both looted and finally burned. He was then a fugitive. He had come out of Mexico under the order that had been given. He said he was left without a dollar in the world; that all his property was destroyed.

Mr. FALL. The outrages that I speak of at Durango, where both English subjects and American citizens were looted, robbed, and outraged, were reported not only through the consul, who sent out reports some 11 days after the occurrence—or, at least, it took the parties 11 days to go overland from there to Mazatlan—but they were reported in a sworn statement to the State Department, and then they were reported in a statement made directly to the President of the United States by an eyewitness of the outrages, who himself says that he, with his own eyes, witnessed 25 of these outrages upon women in the streets.

Mr. President, I have been at a loss for words with which to describe the conditions in Mexico. I have not wanted to appear to be drawing too lurid a picture of actual conditions there. I have not wanted to be placed in the light of an agitator or one urging, for selfish motives, action on the part of this Government such as I shall urge.

I am going to say one word with reference to myself now, and with reference to my attitude. I sit here representing the only Mexican constituency which is represented, I believe, upon this floor or in either branch of Congress. I have been in politics with Mexican people for 28 years in the Territory and the State of New Mexico, where a majority of the population are even yet of Spanish descent. I think that I know something of the people and of their characteristics. These people whom I have the honor to represent are of exactly the same character as the better class of people living in the northern States of the Mexican Republic.

I have been accused in the press and otherwise of being selfishly interested. In fact, it was discovered by one of the great papers nearly a year ago that from my biographical sketch in the Congressional Directory it appeared that I was mining in Mexico. That is true, Mr. President, but in this way: In 1906 I sold all interests which I had in Mexico except some odds and ends which I was unable to dispose of and which I still retain an interest in. Since that time I have been called back to the Republic by clients and friends with whom my business was almost inextricably entangled for several years, and particularly, Mr. President, because of the threatened death of a man who had been my partner. I have been in Mexico since. I have been closely identified with affairs in northern Mexico through my efforts to assist his family in some way.

Therefore I have kept up my interest, and I still have such interests, as I have stated, none of which was producing a dollar prior to the revolution, and certainly it has not produced any since. That is my interest, Mr. President, and I wanted to say that much in justice to myself. I have, as I said, hesitated for a time to express myself fully as to what I know from personal knowledge of the conditions in Mexico.

I have been in a position, Mr. President, with reference to all the factions of Mexico, where, while agreeing with none, and none of them agreeing with me as to the final action which should be taken, yet Gen. Huerta's attorney, Gen. Felix Diaz's friends, and myself meet in my office, not for consultation among themselves, but to talk over certain matters with me. I have brought the attention of the Foreign Relations Committee to the fact that there were prominent constitutionalists in the city, and took great pleasure in seeing that an officer on the staff of Gen. Carranza, who is now in charge of the attacking force upon Mazatlan, was afforded an opportunity first privately and then later, I believe, by the committee for a hearing. I am recognized I think generally, Mr. President, while temporarily they may not agree with me, by the different factions as having at heart really and sincerely the interests of Mexico.

In May of last year a prominent Mexican lawyer came to this country as the private representative of the Huerta government. He could not be received, of course, because no representatives of either factions were being received officially at the White House. This man is a lawyer of standing, a man of world-wide experience and education. After visiting 22 of the Mexican States, in the attempt to see if it was not possible for him to persuade others to join with him in the effort to support the Huerta government and restore order, he came to the United States as the representative of the government for the purpose of establishing a newspaper bureau, which he did establish, to influence the minds of the people of the United States in behalf of Huerta that they might bring pressure upon this administration to recognize Mr. Huerta.

Upon his arrival here he furnished me with duplicates of his communications which he had sent to the President of the United States. I answered his letter of transmittal, disagreeing with him entirely as to his ideas as to what should be done in Mexico. I had some little correspondence with him of quite an animated character. I had not heard of him for several months. This man holds credentials from Mr. Huerta as a member of the present Mexican Congress, and he has refused to use those credentials because they were not issued upon an election but by Mr. Huerta, so that he might have "a Congress on his hands." This man holds credentials in the present Congress. He has been offered high diplomatic office by the Huerta government. Under date of the 7th of this month, I have a letter from him in which he says:

Some time ago, in May last, I had the honor to address you a letter regarding the affairs of my country, and you had the kindness to answer it, stating, in turn, your views on the Mexican situation.

I have to confess, so far as recognition of the Huerta government is concerned, that what I considered a wise course when the Madero government was overthrown is quite different now, more so after the dissolution of the Mexican Congress October 10, 1913.

I hope that you will do me the favor to read the inclosed memorandum that will be published in the next two or three weeks.

Inclosed with his letter was a memorandum. As he did not give me authority to make any portion of it public, I telegraphed for such authority and received it last night.

Mr. President, I have said that I could not find words with which to express my ideas or conclusions as to the conditions in the Mexican Republic to-day. This man, who came here as Huerta's representative, this member of the Mexican Congress, has fortunately furnished me with a description of affairs such as I do not believe the Senators here ever read or dreamed of. He speaks of both parties, as you will see further along, both of Huerta and of the constitutionalists.

Mr. THOMAS. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Mexico yield to the Senator from Colorado?

Mr. FALL. I do.

Mr. THOMAS. I do not think that I got from the Senator's statement a proper impression, perhaps, as to just for whom this gentleman speaks.

Mr. FALL. He speaks for himself, as a member of the Mexican race.

Mr. THOMAS. He does not assume to represent either one of the factions?

Mr. FALL. No. He was a representative of the Huerta government. He writes me now that I was right and that he was wrong. He wants me to read over—that is, I construed it to be personal—a certain memorandum which he sent me, which I wired for permission and obtained permission to read.

Mr. THOMAS. The Senator made that statement; but I wanted to be sure now he does not represent anyone in the communication except himself.

Mr. FALL. No one else. He is an educated Mexican lawyer, and his only position is that he holds credentials as a member of the Mexican Congress.

Their only aim is to fight, they only take pride in winning, in killing, in shooting, in severing heads from bodies, in eating the raw flesh or burying alive their enemies; ferocity is their natural condition, temerity is their supreme virtue. What a lot of savages! And such cannibal feasts, such anarchical dances, such political orgies and dignified by some with the name of "government" and with the title of "constitutionalism" by others who don't know their ilk!

Not a single word about peace, not a single thought about harmony, not a ray of hope about conciliation, not a voice raised in remembrance, not a single soul which would throb in favor of order, country, and humanity.

The Government and the revolution, both of them are unhealthy and have gone mad, as their aim is none other than to thwart civilization and reestablish barbarism. With natural unconcernedness or in the clash of arms, in the light of day or in the darkness of night, they commit such violent actions and deliver themselves into such excesses that they are causing nausea and horror everywhere and have created a state of panic around them; they have lost the social respect; they have been wrecked in the human love; they have lost all standing; they have rendered themselves unable to govern Mexico in the years to come. Our motherland is truly ashamed, bleeding profusely, writhing in desperation and anger at seeing herself helpless, owned, and disgraced by these nefarious men. Similarly stupid, blind, and obstinate, lacking in prudence, dignity, and patriotism, both the men of the Government and those of the revolution are waging a personal struggle, so personal, in fact, that they are better known under the names of Huertistas and Carrancistas; it is a fight to the death, by revolution to revolution, by misgovernment to misgovernment, by anarchy to anarchy; it is a war deprived of reason, ceaseless, flagless, principleless, and aimless, carried along solely by hatred, by money, or by ambition; a savage war in which there is respect neither for age, sex, property, law, nor human lives. It is a struggle of seething passions, satanic abominations, cowardice, and infamies, of crimes and horrors, which are unknown even to the wild beasts; a struggle which resembles the unconscious fury of the elements, it is an anarchical illness whose sole purpose is to annihilate civilization, without knowing why and what for, but causing the misfortune, the ruin, the retrogression, and the death of the best people and the richest country on the face of the earth.

The Mexicans have forgotten Mexico, their Republic, their nation, their motherland. Poor country! Fifteen million peaceful inhabitants, blameless, for whom there seems to be no mercy, are enduring the burning sorrows of war and misery. Why? Through the stupid whim, the moral deformity, the original unfitness of a few conscienceless and honorless politicians; thus we see well-known highwaymen, their breasts and shoulders literally covered with medals, golden braid, and straps, suddenly transformed into heroes of extolled bloody orgies, demanding, under penalty of death, the ransom and homage of honest people; professional murderers filling the most prominent public offices, exercising an unlimited authority upon a frightened and defenseless society, and all that occurs before the throbbing expectation of the whole world.

* * * * * * *

Certain it is that they are entirely ignorant of the problem, would not know how to devise it, could not solve it at all if they were called upon to tackle it.

That is, constructing a government.

Worshiped as idols by chance, heroes by treachery and coup de barracks, victors by accident, generals by improvisation, lifted up in a jiffy from the cattle yard to the palace, we must retrace our steps before them because they carry weapons in their hands, threatening everybody with death, and overcoming the Government by sheer assault. The men who so recklessly behave themselves are lewd, intoxicated, cruel, and savage, and while they do not know the most elementary principles of either cleanliness, morality, politics, or social manners, yet they indulge themselves in numberless and endless blunders and infamies. The abstemious qualities displayed in all but the use of intoxicating liquors, the agility of the greyhound in running, the endurance shown against all privations and outdoor sufferings, the sublime manifestations of the wild beasts in rutting time, the love for gaudy beads and raw skins, the cold cruelty and impunity, the fierce exhibitions of insanity and sensuality, the obstreperous howling, the supine ignorance and supreme temerity which enter into the make-up of a cannibal are not, indeed, necessarily the specifications and gifts most highly appreciated in a genuine statesman, who, before all and over all, should be a decent, brave, and honorable man.

Fighting each other for the possession of pieces of land, of the spoils of war, of the trophies of crime, investing and taking this or the other place, losing or reoccupying this or the other village, that or the next town, the men who now hold sway in Mexico are shedding torrents of blood or spending millions of dollars in an aimless way, without any possible practical result.

* * * * * * *

The men who reckon their brave deeds by the number of their brethren they have killed, the men who reckon their wealth by the number of families they have ruined, the men who reckon the glories by the number of defenseless and innocent victims they have butchered can not govern a people.

* * * * * * *

Those who now rule in Mexico, both at the Aztecan capital and that of the revolution, are by their bloody deeds a legion of intoxicated demons who are courting fiat failure.

Mr. Presideht, I have given in the words of this man a picture which I can say, from my own knowledge of Mexico, is not overdrawn. The army of one of them—that of Huerta—all above the number of 7,000 men, is made up entirely of men impressed from the jails into his army—turning them loose upon a community—and they rob and loot and do even more brazen crimes in the open light of day than do the revolutionists, because the one travels under a badge of some kind of government and claims to represent something, while the other claims to represent—or, at least, they do represent—nothing.

Now, sir, I have no intention of attacking this administration upon the ground that it is intentionally allowing conditions to continue in Mexico, by its dealings with the two factions of that Republic, with any ulterior or selfish motive in view; of course, that would be impossible. I have the very greatest respect for the integrity, the sincerity, the ability, and the patriotism of the President of the United States; none of you Senators on the other side respect him more than do I; but, Mr. President, he knows absolutely nothing of Mexican conditions. He is mistaken, and has been mistaken, in every move that was made in Mexico. Huerta, of course, is impossible; a man who was placed by his President in command of soldiers to defend his Government and his President's life betraying that President and killing him—of course, he is impossible.

Mr. President, were this all it might be forgotten; but how many of you have heard of the fate of several of the different governors of the States of Mexico? Have you ever heard what became of Abran Gonzales, the duly elected governor of the State of Chihuahua, with which we are more nearly in touch than any other? Gonzales refused to acknowledge the Presidency of Huerta. He had been living in the State of Chihuahua, garrisoned by Federal troops, with whom he was working in perfect harmony. He was a Madero governor. These troops were Madero troops.

When he received a telegram that Huerta had killed the President and taken over the administration of Mexico he refused to acknowledge Huerta as President. He was immediately arrested, and he disappeared from view for days. I called upon the State Department here to ascertain if they knew anything concerning the whereabouts of Gonzales, a man known to all the Americans along the border. The State Department had resolutions sent to it from the Live Stock Association of Texas, which happened to be then in convention, practically every one of whom knew Abran Gonzales, a friend of America and prominent in Texas. He was arrested by Huerta's order; and they told our State Department that they understood that he was coming to the border under a guard of his own friends, when he was being conducted upon a train toward the City of Mexico. When he arrived near the little town of Santa Rosalia he was pushed between two cars, with hands tied together. When the train ran over him, and the "friends" who were guarding him, Gen. Rabago's soldiers, dismounted from the train and discovered that he was still living in agony and not dead, they backed the train over him again, and finished him.

Why, of course, Mr. President, the President is justifiable for more than one reason in not recognizing Huerta, and I do not intend to go into that; but, sir, if Huerta is a murderer, he is a murderer on a grand scale, at any rate. He does not stoop to murder a man just to see him kick; he does not stoop to shoot down an ordinary poor Mexican, who is begging on his knees for justice and for right; he, at least, leaves that to some underling; but, sir, while we have no diplomatic communications with Mr. Huerta, we have a special representative at the court of Francisco Villa, and we have had for months. We have sent a special representative of this Government past the consulate at Juarez, 225 miles north of Chihuahua, to meet Francisco Villa and to consult with him about certain matters, while we have at Chihuahua an American consul, Marion Letcher, from

Georgia, one of the most efficient men, in my judgment at least, who has ever been in the Consular Service in the Republic of Mexico.

Marion Letcher is ignored, while our special representative deals directly with Francisco Villa. George R. Carothers, of Torreon, is this gentleman. Mr. Carothers I know personally, and I think Mr. Carothers is going to do all that he can for the United States up to a certain point. He has no hesitancy at all in telling anyone just exactly what his position is. He is the consular agent of the United States at the city of Torreon, with business interests there, and he is not going to do anything for this Government which will in any way conflict with his business interests. He has said to me that he has so notified the Government. Whether or not that is true I do not know. Lately, within the last week or two, apparently this Government has been recognizing Marion Letcher; but for weeks he was ignored, and Villa had it communicated to him that the American consul in Chihuahua, which was Villa's headquarters, was ignored by this Government.

Mr. GALLINGER. Mr. President——

The PRESIDING OFFICER (Mr. BRYAN in the chair). Does the Senator from New Mexico yield to the Senator from New Hampshire?

Mr. FALL. I do.

Mr. GALLINGER. The Senator from New Mexico has characterized the provisional President, Huerta, in very caustic language, and I apprehend in just language. Has the Senator anything to tell the Senate and the country of the character of the man Villa?

Mr. FALL. I shall refer to Mr. Villa in just a moment. Villa's character is known, and has been known for years; known to every American in northern Mexico and on the border; known as an ordinary, common, ignorant, brutal murderer for hire. He is now being romanced about in the public press as having assassinated or killed an army officer because of the seduction of his sister by the officer.

The warrant shows for whom it was issued. The warrant was issued for his arrest in Chihuahua, and can be obtained by the authorities of this Government if they choose to investigate it, and is for "Doroteo Arango, alias Francisco Villa." It is for the murder of a peon, who was working for him in a butcher shop, where he was selling beef from stolen cattle. So much for the romance. He was said to have been loyal to Madero. He was with the Orozco forces in the attack on Juarez when that city fell. He then went to Parral. When the Orozco revolution broke out he looted the city of Parral, taking everything which he could find loose, and loosening some things which nobody else would have undertaken to remove. The loot amounted to something like $700,000, largely from Americans, because whenever a thing of this kind happens in a mining camp it is the American who suffers. He was arrested, and a report was made to Madero upon the subject. The report says that the measure of his looting was simply that of his capacity, and that was of 500 hands; that he took everything he could get. He was incarcerated in San Luis Potosi and at one time sentenced to be shot. It is supposed that he managed to escape because of the friendly feeling that Madero had for him, because he had been with him at Juarez when Juarez was captured and the Diaz government was overturned. He made his way through and came to El Paso, Tex., in February of last year. He there called upon myself. He made some statements with reference to his plans, largely to the effect that some of the loot which he had acquired at Parral he had hidden, and, as he was broke, he was going back to try to get it. He made his way across the border without any following at all. Within a few days, with eight men, he attacked the American bullion train near San Andres, just west of the city of Chihuahua, which was conveying bullion to the city of Batopilas from a mine belonging to former Gov. Sheppard, of Washington; bullion produced from a mine belonging to Joseph Qualey, of New York; and bullion produced from the Dolores mines, also owned by Americans, with headquarters in Chicago and New York, $180,000 worth of bullion being upon this train. He captured it, and, knowing to whom it belonged, notified Charles Qualey, the brother of Joseph Qualey, who was then in Chihuahua, that he was unable to get away with the bars of bullion because they were too heavy, and therefore he would sell them for $40,000. Qualey came over to the city of Washington with that telegram and went before the State Department; but nothing could be done for him, of course. In my office he wrote a telegram to pay $40,000 to get the bullion back. With this $40,000 Mr. Villa started out upon his career of establishing constitutional government in the Republic of Mexico.

On his way from the little station where he had robbed the bullion train he passed through the little Mexican town of Casas Grandes, a town of several hundred inhabitants, near one of the railroads that run south of El Paso, and situated in a beautiful valley, irrigated and in a high state of cultivation. When he arrived at the town they had 125 home guards—not soldiers, except that they had been armed by the Government for the protection of themselves and their property against just such marauding bands. These 125 men made the best fight possible, but finally surrendered. Then 115 of them were stood up against the wall and shot, one after another, by Mr. Villa, and 90 women, including 17 little girls, were outraged.

He came to the American border, remained for some time opposite Columbus, which is a port of entry into New Mexico, across from the little Mexican town of Ascension. He made his headquarters at Ascension, and finally started back. On the trip, which resulted in his capture of Torreon, when he went through this little town of San Andres, near which he had formerly captured the bullion, he attacked that town and captured it. Then he stood 100 of the men who had tried to defend the town up against the wall and shot them. When he was asked—these are his admissions; these are not mere statements; he admits them—when he was asked by this very man, Charles Qualey, why he had shot those men, his answer was that he had all he could do to feed his own men, and that he did not propose to feed these.

At Torreon he slipped in between the lines of the other rebels, Urbina and others—Carranzistas, as they call themselves—and made his way into the town with his command of something over a thousand men. Of course, then all the other rebels, who had been besieging the town for something over six weeks, came in. He demanded of the bankers and the business men of the town $3,000,000 as ransom, or else he would turn the town over, as Urbina had turned Durango over, for 24 hours to the tender mercies of his soldiers and of Urbina's.

The Spaniards were compelled very largely to put up the money, but every American and every other citizen there was compelled to donate his mite, until the amount of 3,000,000 pesos was raised and placed in his hands, when he left, leaving the other rebel soldiers there, and returned to Chihuahua. He thought that Mercado, who was defending the town, had already been paid, but they had not quite reached Mercado properly, and when Villa attacked the town a very strong defense was made, particularly by Orozco and Salazar, the two volunteer leaders in the garrison. Villa was whipped away and driven off. He came to Juarez and captured it at night, arriving when no one was expecting him, so the world is told—he is a great hero, this man—but the day before Juarez was captured the commander, Gen. Castro, was over in El Paso and received 50,000 pesos of Pancho Villa's money to turn the town over.

These are matters of proof. As it happens, I was in the city and in the Hotel Sheldon, in El Paso, when the deal was being made. I was not present, but I was in the city, and I was informed of the transaction as it was being carried on by the revolutionary agents.

Portillo had taken $2,000 for which he was to put some of his men in Salazar's command, and they were to kill Salazar. He had 2,000 pesos of Villa's money in his pocket. He had not carried out his promise, and when Juarez was captured Mr. Portillo was shot by Mr. Villa, and then, when this Government announced that it did not approve of those things, it was told by Mr. Carranza that it was perfectly all right; that the thirty-odd men who were stood up and shot by Mr. Villa were shot because they were traitors to their country. Mr. Carranza has announced through the columns of the London Times that, of course, they were not going to murder or kill everybody, but he went on to state, "Of course, you understand that we propose to kill every man who recognizes any president who is not the constitutional president of Mexico."

Domingo Flores, residing in El Paso, on February 22 of this year went across the river to have a settlement with Pancho Villa. His mother and sister lived on this side of the line. He had been smuggling arms for Villa, in partnership with another man. The partner had left, taking with him $3,500 out of the $10,000 which had been intrusted to them with which to buy arms and ammunition. Flores went over to account for $6,500, and to explain to Villa that his partner had left, taking with him $3,500, and that he could not deliver it. Villa put him in jail. The mother of Flores, living at El Paso, went over in an attempt to secure the liberty of her son, and was told by Villa that if she would raise $3,500 he would release him. The old lady returned to her home in El Paso, made every effort, and finally succeeded in selling her little house and lot—everything in the world that she had—and raised $3,200,

lacking only $200 of the correct amount. She went to Villa with that money and begged him to accept it and turn her son loose. Villa promptly accepted the money, and then refused to turn the boy loose until she paid the other $200. His sister finally managed to secure $200 and took it over to Villa. She was allowed to go to see her brother in the jail, expecting him to be turned loose when Villa had received the $200. Villa took the money and sent the girl into the jail to see her brother released. The brother was shot in her presence; she was outraged, and was told by Villa personally to get back into the United States and not to come to Mexico again.

A man by the name of Mestas was killed in Juarez by Villa under almost identical circumstances as those surrounding the killing of Benton. The residence of Mestas had been looted, and he went to Villa to protest, when Villa, telling him he would give him satisfaction, shot him down where he stood.

When the federals abandoned Chihuahua recently, they had in jail a man by the name of Andana, suspected of being a rebel spy. When they left they released this man and told him he could follow the army to Ojinaga if he liked. He left with the army, but returned to Chihuahua before reaching Ojinaga. When Villa entered Chihuahua he was received at the depot by the people who remained there, all sympathizers or would-be sympathizers. Among the crowd who met him was the wife of Andana, and she put a wreath of flowers over Villa's shoulders. Some days afterwards Andana himself arrived and went to see Villa. He approached Villa with words of congratulation on his lips, when Villa pulled his revolver and shot him dead in his tracks, because, as he said, Andana was a federal spy.

Mr. President, this man Villa is now engaged in stealing everything in the world he can lay his hands on in the State of Chihuahua or in any other locality over which he has temporary jurisdiction. He rounded up every Spaniard in the city of Chihuahua, after killing no one knows how many in Torreon and driving the others out of the State. He went to the Spanish stores in the city of Chihuahua, took charge of the stores, confiscated every dollar of the Spaniards' property in the city of Chihuahua, amounting to ₱10,000,000, and drove the Spaniards out, put them on a special train, went down to the train himself, counted them, and told them to get out of the country and never to return, or he would kill every one of them. When he found that on the train there were wives and children of some of the Spaniards and some of the wives had been born in Mexico, he took off the train the wives and children who had been born there, and would not let them go with their fathers to the American side of the line, where they might seek safety and have some means of support. This occurred while the American consul was there. The American special representative was in Juarez at the time.

Mr. President, the cause of the Benton killing was this: Villa had been stealing every head of cattle that he could lay his hands on in the entire State of Chihuahua, and had been selling them in the city of Juarez to Americans, who were bringing them over to this side. The International Live Stock Association of the United States and the Texas Live Stock Association under their rules and regulations attempt to protect the property of all their members. Nearly all the cattle owners of northern Mexico are members of these stock associations and their brands are of record with the associations. Under the custom of the range, the brand upon an animal is proof of the ownership. Where animals are run in herds of 10,000 or of a thousand, it is impossible to prove ownership otherwise. Under the laws of all the border States in Mexico, as well as in this country, proof of ownership of the brand and proof of the brand is proof of the ownership of the cow. The live-stock associations on this side, when Villa undertook to send the stolen cattle across, looked at the brands, and wherever there was on one of those cows the brand of one of their members they had their attorneys employed there to sequester it under the laws of the State. When Villa found that he could not ship the cattle over here, that it was almost impossible for him to get the cattle through and get payment for any stolen cattle, he became angry and issued a decree that no cattle whatever should thereafter be taken out of the State of Chihuahua by the owners or otherwise. He then had a butcher shop established in Juarez, Mexico, and he proceeded to butcher the stolen cattle, to pack the hides up in bales, and to send the hides into the United States for sale. When he found that they would also be held, he sent the hides through in bond to Canada and sought to dispose of the meat to butchers in El Paso and to those who would ship it out.

Mr. Benton had cattle, which he had had permission to bring out, and through which he expected to procure some funds with which to support himself and his family. Villa, however, stated that, as the Americans were not treating him right, he would not let any of them carry the cattle out. It was about that matter that Benton went to see him.

Carranza had issued a decree which had been posted up all along the border to the effect that cattle could be exported upon the payment of from $3 up to $7, an average of less than $5 gold per head. Any American or anyone buying cattle over on the other side had the right to export them under this Carranza decree. Mr. Villa, who it is claimed is recognizing the authority of Carranza and is a loyal follower of Carranza, decreed, however, that nobody should bring them out at all. It was because of this that Benton went across the line to see Villa and tell him that he needed the funds and wanted his cattle brought out. Villa killed him.

Mr. President, Villa now has in his hands in the city of Chihuahua Luis Terrazas, known as Luis Chico, to distinguish him from old Gen. Terrazas. He is the son of one of the few remaining men who made Mexico. Old Luis Terrazas was the man who restored Juarez to power. When Juarez was driven into this country, when he took refuge at El Paso, Tex., and lived there, old Luis Terrazas organized the Indians in the Sierra Madre Mountains, gained the first victory over the French which was ever gained by the Mexicans, drove them out of the city of Chihuahua and put Juarez in a position where he could finally make headway against their common enemy. This is his son, an educated gentleman, a man whom I have personally and intimately known for twenty-odd years. I have been associated with him in almost every possible way. He is a gentleman whose society either of you gentlemen might be honored to enjoy and which you would appreciate if you knew the man.

This man is one man of the entire Terrazas family who has always been against the Huerta government. It was impossible for Mrs. Terrazas, who was eighty-odd years old, and the other ladies to go with old Gen. Terrazas and the other members of the family across to Ojinaga when Mercado evacuated Chihuahua. They could not stand the overland journey on foot or on horseback. Therefore they remained in the city.

Luis Terrazas had always been a sympathizer with the revolution. They had always known him as a sympathizer with the revolutionists, although not with their methods. It was supposed that he was one man of the prominent Mexican family who would be absolutely safe if he remained in Chihuahua; but, to make assurance doubly sure, he took refuge in the office of the acting British consular agent, as Great Britain has no consul in Chihuahua nor in that part of the country. He took refuge at Capt. Scovell's office simply for the purpose of remaining there until the army came in, when he would be able to meet one of the generals in command—Villa or some of the others—without being stopped or interfered with by the rank and file of the army galloping through the streets. He feared that he might be injured if he ran into the army, but felt confident that as soon as the officers came in he would be at liberty to go where he pleased. He took all the title papers to their enormous estates with him to Capt. Scovell's office.

As soon as Villa found he was there, he sent a squad of soldiers after him and demanded that he come out. Scovell objected. He was notified that unless he produced Terrazas they would come in and take what they wanted and take Terrazas out of his office. For the purpose of avoiding trouble, thinking that he would be safe, Terrazas told Scovell that he would not put him to the inconvenience of having his office raided by these fellows, and he said: "I shall go out." He did; he walked out, and they captured him and have held him since.

They have demanded of him every dollar of money he had in the world, and they have received it. They then demanded of his father 500,000 pesos ransom for him. Other parties, friends of his, were attempting to secure his release. Representations were being made. Mr. Terrazas was hung by the neck until he was made to disclose the hiding place of $590,000 in gold which had been buried when the Federals evacuated the town of Chihuahua, one-third of which belonged to his father. That was, of course, taken. He was not at any time released from confinement. Again the demand was made for 500,000 pesos for his release.

They feel the need of a little money every now and then. Five hundred and ninety thousand dollars in gold does not last very long when the leader who gets hold of it sends it over on this side and stows it away in American banks for future contingencies. When the men call for the money they know the leader has secured in this way he must make some pretense of paying them something of the money he has acquired. Therefore he needs a little more.

Villa now demands of old Gen. Terrazos $250,000 in gold, not for the surrender of his son, but simply as an agreed price for the life of the boy at the present moment. If he is paid $250,000, he will not kill him. If he is not, he will kill him.

We represented to him, however, that this Government would not look with pleasure upon the killing of Luis Terrazas simply for failure to pay a ransom. The whole civilized world has passed the age where it looks with equanimity upon those things. Therefore we are notified to-day that he is not going to be killed, but that they are going to put him on the firing line when they advance against any federal enemies.

Why, Mr. President, the old men of 1848 could tell you what will happen. If you are not shot from in front, you will be shot from behind. It is just exactly as convenient as one of Villa's courts-martial. Of course if he ever goes to the front, Mr. Villa will report to the United States, and we will accept it, that he was killed in action, fighting gallantly for his country.

However, Mr. President, a little different state of affairs was recently brought about by the killing of Benton. It seems to have aroused a good deal of interest. Bauch had disappeared; others had disappeared; hundreds and hundreds of others had disappeared in Mexico; but when a British subject disappeared there was some little question.

There were read into the RECORD several days ago some resolutions adopted at a meeting in El Paso. They were pretty strong. One of the reasons was that at that meeting one of the speakers was an ordinary fireman on a railroad train, who had been running in and out of Mexico on the Mexican Northwestern road and had been driven out of there 11 or 12 months before. He had been compelled to work at any employment he could obtain on this side of the border. He had been run out by Salazar and Castillo and that brand of constitutionalists and patriots. He addressed this meeting. He was scarcely able to express himself as he desired. He was not a public speaker. He was just a common, ordinary, everyday American; but he said this in substance—of course I am not going to undertake to tell his exact words, but this was the sentiment:

Mr. Chairman, I have felt pretty sore at the United States. I have been run out of Mexico. My little house, which was all that I and my family had in the world, down here at Madero, was taken. I have spent years in accumulating a little money to buy a little home and a little piece of ground there. That was taken away from me and the home burned, and the train that I was running hurled over a precipice and destroyed. It is true that I was allowed to get off.

Mr. Chairman, a few days ago the superintendent under whom I worked was cremated in the tunnel through which I used to pull my trains.

He proceeded to mention the names of those whom he had known and worked with, who had all died a few days ago. He then said:

Mr. Chairman, no man can have any more sympathy with this man Benton or his family than I have. If there were anything in the world I could do to undo the death of Benton, to restore him to his family, I would do it. But, Mr. Chairman, if somebody else had to be killed by these scoundrels I thank God it was a citizen of a nation that knows how to, and will, defend her citizens.

Mr. President, that one speech was very largely the cause of the sending in of the resolutions which were adopted at that meeting and which were read here.

I do not intend to go into this matter in detail, as I might, for the next two or three hours. I have already detained the Senate a great deal longer than I had expected upon this aspect of the matter. But, sir, I think it is time that some one attempted to secure some expression as to the feeling in this country and to throw some light, if possible, upon the duty of this Government under such conditions as we are compelled to contend with and to face every day in Mexico. For that reason I am going to ask the indulgence of the Senate while I explain what I conceive to be the duty of this Government.

Mr. President, the policy of this Government as announced, at least through the platform pledges of the two great political parties from 1860 to the present day, has been protection of its citizens and their property.

Democratic platform, 1860:

*Resolved*, That it is the duty of the United States to afford ample and complete protection to all its citizens, whether at home or abroad and whether native or foreign.

Republican platform, 1860:

That the Republican Party is opposed to any change in our naturalization laws or any State legislation by which the rights of citizens hitherto accorded to immigrants from foreign lands shall be abridged or impaired; and in favor of giving a full and efficient protection to the rights of all classes of citizens, whether native or naturalized, both at home and abroad.

Republican platform, 1872:

The National Government should seek to maintain honorable peace with all nations, protecting its citizens everywhere, and sympathizing with all peoples who strive for greater liberty.

Republican platform, 1876:

The United States of America is a nation, not a league. By the combined workings of the National and State Governments, under their respective constitutions, the rights of every citizen are secured at home and abroad and the common welfare promoted.

Democratic platform, 1884:

The Democratic Party insists that it is the duty of the Government to protect with equal fidelity and vigilance the rights of its citizens, native and naturalized, at home and abroad, and to the end that this protection may be assured United States papers of naturalization, issued by courts of competent jurisdiction, must be respected by the executive and legislative departments of our own Government and by all foreign powers. It is an imperative duty of this Government to efficiently protect all the rights of persons and property of every American citizen in foreign lands and demand and enforce full reparation for any invasion thereof. An American citizen is only responsible to his own Government for any act done in his own country and under her flag, and can only be tried, therefore, on her own soil and according to her laws, and no power exists in this Government to expatriate an American citizen to be tried in any foreign land for any such act.

This country has never had a well-defined and executed foreign policy save under Democratic administration. That policy has ever been in regard to foreign nations, so long as they do not act detrimental to the interests of the country or hurtful to our citizens, to let them alone; that as a result of this policy we recall the acquisition of Louisiana, Florida, California, and of the adjacent Mexican territory by purchase alone, and contrast these grand acquisitions of Democratic statesmanship with the purchase of Alaska, the sole fruit of a Republican administration of nearly a quarter of a century.

Democratic platform, 1888:

It has adopted and consistently pursued a firm and prudent foreign policy, preserving peace with all nations while scrupulously maintaining all the rights and interests of our own Government and people at home and abroad.

Republican platform, 1896:

Our foreign policy should be at all times firm, vigorous, and dignified, and all our interests in the Western Hemisphere carefully watched and guarded.

Republican platform, 1900:

The American Government must protect the person and property of every citizen wherever they are wrongfully violated or placed in peril.

Democratic platform, 1904:

We pledge ourselves to insist upon the just and lawful protection of our citizens at home and abroad and to use all proper measures to secure for them, whether native born or naturalized, and without distinction of race or creed, the equal protection of laws and the enjoyment of all rights and privileges open to them under the covenants of our treaties of friendship and commerce.

Republican platform, 1904:

We commend the vigorous efforts made by the administration to protect American citizens in foreign lands, and pledge ourselves to insist upon the just and equal protection of all our citizens abroad. It is the unquestioned duty of the Government to procure for all our citizens, without distinction, the rights of travel and sojourn in friendly countries, and we declare ourselves in favor of all proper efforts tending to that end.

Democratic platform, 1908:

We pledge ourselves to insist upon the just and lawful protection of our citizens at home and abroad and to use all proper methods to secure for them, whether native born or naturalized, and without distinction of race or creed, the equal protection of the law and enjoyment of all rights and privileges open to them under our treaties.

Republican platform, 1908:

We commend the vigorous efforts made by the administration to protect American citizens in foreign lands and pledge ourselves to insist upon a just and equal protection of all our citizens abroad.

Democratic platform, 1912:

The constitutional rights of American citizens should protect them on our borders and go with them throughout the world, and every American citizen residing or having property in any foreign country is entitled to and must be given the full protection of the United States Government, both for himself and his property.

Mr. President, that was not breaking precedents. It was simply following the doctrine announced by the Democratic Party from the time it first held a convention, acquiesced in and adopted by the Republican Party after its formation. It has been the doctrine of every party that has ever dared to appeal to the American people for votes, so far as I know; but apparently it is not now the popular doctrine.

I introduced a resolution couched in the exact terms of this plank in the Democratic platform, word for word, without crossing a "t" or dotting an "i," and I never was able even to get consideration for it. That was over six months ago.

One of the great newspapers of the country, the New York World, which I believe at times assumes to represent the views of those high in authority, on July 26, 1913, replied to an invitation from the New York Times of the day before to extend an apology to me, saying that I had not been the author of this very obnoxious declaration of principles, but that it was in the Democratic platform. The New York World replied as follows:

The Times invites the World to join it in an apology to Senator FALL, because his Mexican resolution "was taken from the Baltimore platform of the Democratic Party."

The Times is mistaken, and it owes no apology to Senator FALL. The Baltimore platform contained a plank protesting against Russia's discrimination against American Jews. The plank was proper and

reasonable, but it was clumsily and crudely drawn in its attempt to define the equal rights of all American citizens regardless of "race or creed."

I have sincere respect for the utterances of the World, Mr. President, in the interpretation of Democratic declarations, but yet I can not believe that in this instance it correctly represents the attitude of that great party and its leaders.

I am in favor of the proper protection of the citizens of this country who may be classed as Jews; I am equally in favor of the protection of citizens of this country without reference to the blood which flows in their veins, even if it be the old Scotch-Irish or what is ordinarily known as the Anglo-Saxon blood.

This question is not political. The duty of the citizen to his State and the duty of the State to its citizens are reciprocal duties, lying at the foundation of organized society. As Halleck says:

So a nation is bound to protect its subjects in all their just rights.

Hall says:

A nation is not bound to allow them (its citizens) to be treated in defiance of law, even though they may be so treated in common with all the other inhabitants of the country in which they are.

And—

It is regarded as a pure question of expediency * * * or of the importance of the occurrence whether the State shall interfere, and if it does interfere, whether it * * * shall adopt measures of constraint falling short of war, or even resort to war itself.

Oppenheim says:

Now, a State may have a right of intervention against another State for several grounds * * *. Thus, secondly, the right of protection over its citizens abroad, which a State holds, may cause intervention by right to which the other party is bound to submit.

Judge Pollock, speaking for the circuit court, in the case of Hamilton v. McClaughry (Kansas), says:

It has been well said that the safety of the people is the supreme law of the land. The first duty of the State is the protection of the lives and property of its citizens wherever lawfully situate, by peaceful means if possible; if not, by force of arms.

In 1853, Martin Koszta, a Hungarian, banished from Austria for political offences, had declared his intention to become an American citizen. He was not even naturalized. He was seized by Austrian agents at the Turkish port of Smyrna and confined aboard the Austrian vessel *Hussa*. Capt. Ingraham, of the American vessel of war *St. Louis*, trained his guns upon the Austrian vessel, and by this argument enforced his demand and secured the release of Koszta, and Ingraham was extended a vote of thanks by the Congress of the United States. See Senate Executive Document No. 1, Thirty-third Congress, first session.

Mr. President, I hold in my hand a memorandum prepared by the Solicitor for the State Department, entitled "Right to protect citizens in foreign countries by landing forces." I call attention, without reading, to pages 31, 32, 33, and 34 of this document, in which are set forth some 98 cases, I think, in which the United States, without any hesitation, for the protection of her citizens or for the purpose of retaliating or demanding from some official or from some individual reparation for injury done to her consul, an insult to her consul, or for some injury done to an individual, has landed her armed troops and sent them into a foreign country. I ask that these citations may be made a part of my remarks, and, if there is no objection, I should think it would be very advisable if this memorandum were made a public document.

The PRESIDING OFFICER. Is there any objection to printing the matter in the RECORD without reading? The Chair hears none.

The matter referred to is as follows:

1. PURPOSES FOR WHICH FORCES HAVE BEEN LANDED.

The purposes for which forces have been thus landed may be roughly classified as follows:

(a) *Simple protection of American citizens located in disturbed areas.*

This was the purpose of the landing of forces in China, 1854 (Appendix, 52); Uruguay, 1855 and 1858 (Appendix, 54 and 55); China, 1859 (Appendix, 56); Africa, Kisembo, 1860 (Appendix, 56); Panama, 1860 (Appendix, 56); Japan, 1868 (Appendix, 58); Uruguay, 1868 (Appendix, 59); Egypt, 1882 (Appendix, 61); Korea, 1888 (Appendix, 61); Navassa Island, 1891 (Appendix, 62); Chile, 1891 (Appendix, 62); Hawaii, 1893 (Appendix, 63); Korea, 1894 (Appendix, 63); Nicaragua, 1899 (Appendix, 65); China, 1900 (Appendix, 65); Santo Domingo, 1903 (Appendix, 65); Honduras, 1907 (Appendix, 66); Nicaragua, 1910 (Appendix, 67); Honduras, 1910 and 1911 (Appendix, 69).

(b) *Destruction of pirates infesting certain areas, whether nationals of the disturbed areas or otherwise.*

This was the purpose of landing forces in Amelia Island, 1811 (Appendix, 47); Cuba, 1823 (Appendix, 49); China, 1854 (Appendix, 52).

(c) *Punishment for murder of American citizens.*

Sumatra, 1832 (Appendix, 51); Fiji Islands, 1840 (Appendix, 51); Samoa, 1840–41 (Appendix, 51); Fiji Islands, 1858 (Appendix, 56); Formosa, 1867 (Appendix, 58).

(d) *Punishment for insults or injuries to American citizens or American officers, such injuries not resulting in death.*

Porto Rico, 1824 (Appendix, 49); Falkland Islands, 1831 (Appendix, 50); Nicaragua, 1854 (Appendix, 53); Fiji Islands, 1855 (Appendix, 54); China, 1856 (Appendix, 54); Japan, 1863 (Appendix, 57); Korea, 1871 (Appendix, 59).

(e) *Reestablishment of American legation, collection of indemnities, and protection of minister.*

Japan, 1864 (Appendix, 57).

(f) *Suppression of local riots.*

Hawaii, 1874, landing at instance of Government to restore order (Appendix, 60); Egypt, Alexandria, 1882, landing to restore order, extinguish fires, etc. (Appendix, 61).

(g) *Preservation of order during interregnum between control of regular government and revolutionary government.*

Mexico, 1876 (Appendix, 60).

(h) *Establishment of presumed regular government.*

Samoa, 1899, joint action, United States and Great Britain (Appendix, 64).

(i) *Protection of customhouse at the instance of regular local officials.*

Uruguay, 1868 (Appendix, 59).

(j) *Securing of indemnity.*

Island of Johanna, 1851 (Appendix, 52); Japan, 1864 (Appendix, 57); Haiti, 1888 (Appendix, 62).

(k) *Invasion of foreign territory for protection of American citizens and American territory.*

Spanish Floridas, 1817 (Appendix, 48).

2. LANDING OF AMERICAN FORCES IN TIMES OF FOREIGN REVOLUTIONS.

(a) *Without the invitation of either faction.*

This Government has repeatedly, both alone and jointly with others, landed forces in times of revolutions in foreign countries in order adequately to protect American interests. These landings were made as set forth below. Unless otherwise stated, our attitude seems to have been neutral as between the contending factions.

China, 1854, the operations were conducted against the regular imperialist troops, who had captured an American pilot boat in the harbor of Shanghai (Appendix, 52); Uruguay, 1855, operations directed against both factions (Appendix, 54); Uruguay, 1858 (Appendix, 55); Africa, Kisembo, 1860 (Appendix, 56); Japan, 1868, semble, neutral (Appendix, 58); Egypt, 1882 (Appendix, 61); Korea, 1888 (Appendix, 61); Chile, 1891 (Appendix, 62); Hawaii, 1893 (Appendix, 63); Nicaragua, 1899 (Appendix, 65); China, 1900 (Appendix, 65); Santo Domingo, 1903 (Appendix, 65); Nicaragua, 1910 (Appendix, 67); Honduras, 1911 (Appendix, 69).

(b) *At the instance of the regular local officials.*

Panama, 1860 (Appendix, 56); Uruguay, 1868 (Appendix, 59); Hawaii, 1874 (Appendix, 60).

(c) *Interference between two fighting factions, i. e., the revolutionists and the forces of the regular Government.*

Uruguay, 1855, massacre of insurgents prevented (Appendix, 54); Samoa, 1899, one faction actively supported (Appendix, 64); Dominican Republic, 1904, a zone established in which no fighting permitted (Appendix, 65); Honduras, 1911, a zone established in which no fighting permitted (Appendix, 69). See also Japan, 1864 (Appendix, 57).

3. LANDING OF AMERICAN FORCES IN TIME OF WAR BETWEEN TWO FOREIGN NATIONS.

Korea, 1894 (Appendix, 62); Honduras, 1907 (Appendix, 66).

4. OPERATIONS OF AMERICAN FORCES LANDED ON FOREIGN SOIL FOR THE PROTECTION OF AMERICAN INTERESTS.

(a) *Forces merely land and apparently undertake no hostile measures.*

Uruguay, 1858 (Appendix, 55); China, 1859 (Appendix, 56); Africa, 1860 (Appendix, 56); Panama, 1860 (Appendix, 56); Japan, 1868 (Appendix, 58); Uruguay, 1868 (Appendix, 59); Hawaii, 1874 (Appendix, 60); Mexico, 1876 (Appendix, 60); Korea, 1888 (Appendix, 61); Navassa Island, 1891 (Appendix, 62); Chile, 1891 (Appendix, 62); Hawaii, 1893 (Appendix, 63); Korea, 1894 (Appendix, 63); Nicaragua, 1899 (Appendix, 65); Santo Domingo, 1903 (Appendix, 65); Honduras, 1907 and 1911 (Appendix, 66 and 69); Nicaragua, 1910 (Appendix, 67).

(b) *Forces conduct belligerent operations.*

Amelia Island, 1811 (Appendix, 47); Cuba, 1823 (Appendix, 49); Porto Rico, 1824 (Appendix, 49); Falkland Islands, 1831 (Appendix, 50); Sumatra, 1832 (Appendix, 51); Fiji Islands, 1840 (Appendix, 51); Samoa, 1840–41 (Appendix, 51); China, 1854 (Appendix, 52); Nicaragua, 1854 (Appendix, 53); Fiji Islands, 1855 (Appendix, 54); Uruguay, 1855 (Appendix, 54); China, 1856 (Appendix, 54); Fiji Islands, 1858 (Appendix, 56); Formosa, 1867 (Appendix, 58); Korea, 1871 (Appendix, 59); Samoa, 1899 (Appendix, 64); China, 1900 (Appendix, 65).

5. USE OF THE NAVY TO PROTECT AMERICAN INTERESTS.

Japan, 1864, to open to navigation the Straits of Shimonoseki (Appendix, 57); Haiti, 1888 (Appendix, 62); Brazil, 1893, Navy interfered to secure noninterference with neutral commerce by insurgents (Appendix, 63).

6. ULTIMATUM DEMANDING SATISFACTION DELIVERED BEFORE LANDING MADE.

Porto Rico, 1824 (Appendix, 49); island of Johanna, 1851, indemnity paid without landing forces (Appendix, 52); Nicaragua, 1854 (Appendix, 53); Fiji Islands, 1858 (Appendix, 56); Formosa, 1867 (Appendix, 58); Korea, 1871 (Appendix, 59).

7. AMERICAN FORCES LANDED IN COOPERATION WITH OTHER POWERS FOR THE PROTECTION OF FOREIGNERS.

China, 1854, United States and Great Britain (Appendix, 52); Uruguay, 1855, United States, Great Britain, France, and Spain (Appendix, 54); China, 1856, United States and Great Britain (Appendix, 54); Uruguay, 1858, United States and other powers (Appendix, 55); Africa, 1860, United States and Great Britain (Appendix, 56); Panama, 1860, United States and Great Britain (Appendix, 56); Japan, 1864, United States, Great Britain, France, and Netherlands (Appendix, 57); Japan, 1868, United States, Great Britain, and France (Appendix, 58); Uruguay, 1868, United States and other powers (Appendix, 59); Samoa, 1899, United States and Great Britain (Appendix, 64); Nicaragua, 1899,

United States and Great Britain (Appendix, 65); Honduras, 1911, United States, Great Britain, and Germany (Appendix, 69).

8. LANDING OF FORCES BY OTHER POWERS.

Great Britain: Bombarded Omoa, Honduras, in 1873 (Appendix, 59). Germany: Landed force in Samoa, 1899 (Appendix, 61). Great Britain: Landed force at Corinto, Nicaragua, 1895 (Appendix, 64); landed force at Greytown, Nicaragua, 1910 (Appendix, 66).

9. DISPLAY OF NAVAL FORCE TO SECURE PROTECTION OF AMERICAN CITIZENS.

Egypt, Palestine, Syria, Asia Minor, and Jaffa, 1858 (Appendix, 55).

Mr. FALL. Mr. President, not only is the doctrine I have just referred to recognized as a matter of right in a nation, not justifying another nation in declaring war, by all the legal authorities we have, and by all the precedents of which I have any knowledge, but it has been directly recognized by Mexico as a right on the part of this Government with reference to Mexico itself by the treaty of 1859, which they entered into and which it was provided did not need any ratification by the Mexican Government. That treaty, it is true, was rejected by this Government in the heat of the discussion growing out of the trouble between the States which finally resulted in the Civil War, but it was solemnized by Mexico itself in absolute recognition of the right of this Government to go across the line into Mexico, by permission of that Government if it was possible for us to reach its local or national authorities in time; but if not, and occasion demanded, they have permission to go across there without such permission for the purpose of protecting our citizens and enforcing our treaty stipulations.

I shall not undertake to read the treaty itself; but I desire to call attention to the language of two paragraphs of the letter accompanying the treaty, sent to the Senate by the President of the United States for two purposes, to which I shall refer.

Mr. McLane says:

Although I have on all occasions represented to the constitutional Government that I was instructed to adhere to the fixed policy of the United States and avoid all intervention with the domestic administration of Mexico, yet I have steadily insisted that it was the recognized duty of the Government of the United States to intervene and interfere whenever its own security or what was due to itself in the abstract or in virtue of treaty stipulations required such intervention, as also to protect and defend the lives and property of citizens of the United States within the territory of Mexico.

Then he says:

I am aware that I have acted very much on my own discretion and responsibility in concluding this convention, though I have endeavored to follow the spirit of your instructions, and I am persuaded that if the Government of the United States declines the responsibility imposed upon it by the adoption and ratification of this convention—

Now, Senators, listen:

further anarchy will prevail in Mexico until it will be terminated by direct intervention from some other quarter in the Federal politics of Mexico, or by an intervention of our own, caused by some sudden and unforeseen provocation that will expose us to the responsibilities of a general war and a conquest that few would desire to undertake or consummate.

The last paragraph is most significant in its application to the present condition of affairs, and as a prophecy, fulfilled on October 31, 1861, when, while involved in a struggle involving the very existence of this Union, we were compelled to see the Monroe doctrine violated, the American policy set aside, and the safety of this country jeopardized by French intervention in Mexico, following the withdrawal of Britain and Spain—intervention, as France claimed in her answer to our protest, for the purpose of protecting French citizens and obtaining reparation for outrages upon them and loss of their property. Fortunately for us, when we did intervene, as between France and Mexico, we were prepared for all eventualities with 800,000 veteran soldiers, the best whom the world has ever known, thousands of whom we threw upon the border, and thus were enabled to enforce our demands upon France and emphasize our warning to Austria.

Mr. President, is not our Monroe doctrine, our American doctrine and our safety as a Nation, in jeopardy now as it was in 1859, when McLane wrote so prophetically?

Should foreign troops effect a lodgment in Mexico now, would we be able to enforce our desires and preserve the prestige of this country, or even protect our safety, if we wait until that which now only threatens has become an accomplished fact?

It has been said that the Monroe doctrine is not international law, but it is certainly as much international law as is the balance-of-power doctrine of Europe, and Oppenheim, Lawrence, and others have insisted that this balance-of-power doctrine is international law.

Pradier Frodére says:

That the balance-of-power doctrine is intervention for self-preservation, and that the Monroe doctrine is of itself intervention, for to prevent other Governments from intervening is to intervene.

Edgington, in his discussion of the "Monroe doctrine," insists that the Monroe doctrine is merely the original foreign policy of this Government as promulgated by Washington, and only announced by Monroe in a more extended form.

The Monroe doctrine was and is no "mere abstraction," nor is it a nebulous theory. It was promulgated through no mere excess of enthusiasm for republican principles, nor antagonism to those of a monarchic state.

The fundamental principles of this doctrine are as old as society or as sovereignty.

The individual right of self-defense and self-preservation is a natural right as old as man. The national right of self-preservation and self-defense is as old as the family, and is a natural right of nations, so recognized by all authorities upon international law, public or private, and depends not at all for its full enjoyment and universal recognition upon precedents, customs, treaties, or decisions.

The right of the individual, because of the protection supposed to be extended to him by organized society, is to some extent a qualified right. The life of the individual is a limited span. The justification for the individual right of self-defense is usually the resistance to sudden and unexpected attack against which the more or less ponderous machinery of society could not protect him. The life of the nation is not measured by the arbitrary laws of nature, while it may extend into the future beyond any span of time which can be appreciated when compared with the human "ripe old age" of threescore and ten. The nation should not only be prepared for present defense but must look forward even into the centuries, and by constant care and precaution outline its policy for the future. Those charged with the destinies of the nation from time to time must, while bearing in mind history and precedent as prudent councillors, look forward with the prescience of the seers, realizing that the honor, welfare, and liberty of unborn generations are in their hands, together with the possible destiny of the nation itself.

The fiscal and other internal policies of nations may change from time to time, and while each stage may mark its effect upon some numbers of individuals, yet such policies may be changed or amended without causing appreciable effect upon either the present or the future of the nation. In dealing with other countries and with foreign affairs the life span of the nation itself may be cut short, or its history changed until the end of all things by an action or omission, or failure to act at a moment when such action or omission may seem of little or no importance.

The announcement made by Monroe was that of the doctrine of intervention by this country upon the ground of self-defense and future self-preservation.

Bonfils says:

By a strange abuse of words there is presented as announcing the theory of nonintervention the famous declaration of the President of the United States celebrated under the name of the Monroe doctrine. This declaration is contained in a message addressed to the Congress of the United States December 2, 1823, by President Monroe, on the occasion of the struggle of the Spanish colonies for independence. The message contained two declarations—the one without object to-day, which relates to the colonization of the American Continent; the other which refers to the attempts made to replace the Spanish colonies under the yoke of the mother country. Monroe has taken the opinion of Jefferson. Authors have interpreted the meaning of this message differently.

Halleck says (p. 92, Sir Sherston Baker's edition):

Briefly, the doctrine is not to interfere in the internal concerns of Europe, while it repudiates the interference of the allied powers with the American continents.

Mr. President, when the note of Adams and of Jefferson is read I do not believe any man will rise in the Senate and undertake to assert the doctrine of the Monroe doctrine is obsolete, and that it was announced simply for a purpose which has long since become unnecessary, or to meet which it is not now necessary, because there is no danger of Spain recovering her colonies by the assistance of the "Holy Alliance."

In our eyes, at the end of this message the United States poses as protector of the entire American Continent. The message admits the interference of the United States in all American affairs, north and south. Far from being an act of nonintervention, this declaration is itself a formal intervention. The President resorted to menace to prevent European States from mixing in the quarrel existing between Spain and her colonies.

The announcement of this doctrine was merely the declaration of the old self-preservation doctrine, directed specifically as a warning to European powers.

Acquisition of territory in this hemisphere or interference with the affairs of any country on this hemisphere by any country, European or Asiatic, which might be deemed to threaten our peace 100 years from now, would justify action and immediate action by this country as strongly as would threatened acquisition of territory upon this continent by any European country, and upon the same ground.

Disturbances between two or more countries, or internal troubles in one, upon this hemisphere which, in the judgment of those charged with the safety of this country and its institutions, might endanger our present or future safety or peace by tending to bring about complications between this and other countries or which in any other way might jeopardize our safety or our national interests would justify and demand action by this Government, and, failing peaceful means of avoiding any such danger, would justify the use of the necessary force to avoid and prevent it. The right of one country to intervene in the affairs of another, internal or external, when its own future may be threatened, is the natural right of national self-preservation, and is one of the natural principles of international law, of which the Monroe doctrine is a declaration.

Mr. President, I have here quotations from various authorities upon the Monroe doctrine, from the Canning letter down to the comments of the English press upon the Lodge resolution, which was passed by the Senate last year. I ask that they may be printed at this point as a portion of my remarks without reading.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

The initiatory steps which led up to the formulation of the so-called Monroe doctrine were taken by Great Britain.

On August 20, 1823, George Canning, foreign secretary of Great Britain, wrote to our minister at St. James, Richard Rush:

Is not the moment come when our Governments might understand each other as to the Spanish-American colonies? And if we can arrive at such an understanding, would it not be expedient for ourselves and beneficial for all the world that the principles of it should be clearly settled and plainly avowed?

For ourselves we have no disguise.

1. We conceive the recovery of the colonies by Spain to be hopeless.

2. We conceive the question of the recognition of them as independent States to be one of time and circumstances.

3. We are, however, by no means disposed to throw any impediment in the way of an arrangement between them and the mother country by amicable negotiations.

4. We aim not at the possession of any portion of them ourselves.

5. We could not see any portion of them transferred to any other power with indifference.

If these opinions and feelings are, as I firmly believe them to be, common to your Government with ours, why should we hesitate mutually to confide them to each other and to declare them in the face of the world?

Rush communicated immediately with John Quincy Adams, Secretary of State, and also directly with President Monroe. The latter wrote to Jefferson and asked the advice of the latter as well as that of Madison.

Jefferson's advice, at once given, was:

Our first and fundamental maxim should be never to entangle ourselves in the broils of Europe.

Our second, never to suffer Europe to intermeddle with cisatlantic affairs; America, North and South, has certain interests distinct from Europe and peculiarly its own. She should therefore have a system of her own, separate and apart from that of Europe. While the last is laboring to become the domicile of despotism, our endeavors should surely be to make our hemisphere that of freedom.

One nation most of all could disturb us in this pursuit. She now offers to lead, aid, and accompany us in it. By acceding to her proposition we detach her from the bonds, bring her mighty weight into the scales of free government, and emancipate a continent at one stroke which might otherwise linger along in doubt and difficulty.

But the consequences in which the present proposition might engage us should be in its outcome not hers but ours. It is to maintain our principle, not to depart from it. But I am clearly of Mr. Canning's opinion, that it will prevent instead of provoking war.

On December 2, 1823, Monroe, in his annual message to Congress, said:

We owe it, therefore, to candor and to the amicable relations existing between the United States and those powers to declare that we should consider any attempt on their part to extend their system to any portion of this hemisphere as dangerous to our peace and safety.

With the existing colonies or dependencies of any European power we have not interfered and shall not interfere. But with the Governments who have declared their independence and maintained it, and whose independence we have, on great consideration and on just principles, acknowledged, we could not view any interposition for the purpose of oppressing them or controlling in any other manner their destiny by any European power in any other light than as the manifestation of an unfriendly disposition toward the United States. * * *

Our policy in regard to Europe, which was adopted at an early stage of the wars which have so long agitated that quarter of the globe, nevertheless remains the same, which is not to interfere in the internal concerns of any of its powers; to consider the governments de facto as the legitimate government for us; to cultivate friendly relations with it, and to preserve those relations by a frank, firm, and manly policy, meeting in all instances the just claims of every power, submitting to injuries from none.

But in regard to those continents circumstances are eminently and conspicuously different. It is impossible that the allied powers should extend their political system to any portion of either continent without endangering our peace and happiness; nor can anyone believe that our southern brethren if left to themselves would adopt it of their own accord.

It is equally impossible, therefore, that we should behold such interposition in any form with indifference. If we look to the comparative strength and resources of Spain and those new Governments, and their distance from each other, it must be obvious that she can never subdue them.

This message was sent in after a letter had been written by Secretary Adams on November 30 to Mr. Rush, in which the Secretary communicated to the minister the conclusion that under all the circumstances it was deemed best that this country should act alone and not by an alliance with England in the matter, and in which letter he used the following language:

As a member of the European community Great Britain has relations with all the other powers of Europe, which the United States have not, and with which it is their unaltered determination not to interfere. But American affairs, whether of the northern or of the southern continent, can henceforth not be excluded from the interference of the United States. All questions of policy relating to them have a bearing so direct upon the rights and interests of the United States themselves that they can not be left at the disposal of European powers animated and directed exclusively by European principles and interests.

Daniel Webster in 1843, with reference to Cuba, wrote as Secretary of State:

The Spanish Government has long been in possession of the policy and wishes of this Government in regard to Cuba, which have never changed, and has repeatedly been told that the United States would never permit the occupation of that island by British agents or forces upon any pretext whatever; and that in the event of any attempt to wrest it from her she might securely rely upon the whole naval and military resources of this country to aid her in preserving or recovering it.

Mr. Polk, in his message of December, 1845, says:

This principle will apply with greatly increased force should any European power attempt to establish any new colony in North America—

And—

In the existing circumstances of the world, the present is deemed a proper occasion to reiterate and reaffirm the principle avowed by Mr. Monroe and to state my cordial concurrence in its wisdom and sound policy. The reassertion of this principle, especially in reference to North America, is at this day but the promulgation of a policy which no European power should cherish the disposition to resist.

On September 6 Mr. Seward, Secretary of State, wrote Mr. Bigelow:

First. That the United States earnestly desire to cultivate sincere friendship with France.

Second. That this policy would be brought into imminent jeopardy unless France could deem it consistent with her interest and honor to desist from the prosecution of armed intervention in Mexico.

He closes this letter by saying that—

The United States will not recognize Maximilian, even if the French troops should be withdrawn from Mexico.

On April 4, 1864, the House of Congress passed the following resolution:

The Congress of the United States are unwilling by silence to have the nations of the world under the impression that they are indifferent spectators of a deplorable event now transpiring in the Republic of Mexico, and they think it fit to declare that it does not accord with the policies of the United States to acknowledge any monarchical government erected on the ruins of any republican government in America under the auspices of any European power.

In April, 1866, Seward notified Napoleon to remove the French troops from Mexico, and later the Emperor of Austria, that no troops must be sent there. He reaffirmed in a letter to our envoy to Chile, then at war with Spain, the Monroe doctrine, saying that the United States would—

maintain and insist, with all the decision and energy which are compatible with our existing neutrality, that the republican system which is accepted by any one of those [Latin-American] States shall not be wantonly assailed, and that it shall not be subverted as an end of a lawful war by European powers.

Seward wrote in 1867, referring to the British North American act of the British Parliament confederating Quebec, Ontario, New Brunswick, and Nova Scotia:

British Columbia, by whomsoever possessed, must be governed in conformity with the interests of her people and of society upon the American Continent.

On December 5, 1870, with reference to Santo Domingo, President Grant said:

The acquisition of Santo Domingo is an adherence to the Monroe doctrine; it is a measure of self-protection; it is asserting our just claim to a controlling influence over the great commercial traffic soon to flow from west to east by way of the Isthmus of Darien.

And on May 31, of the same year, said:

The doctrine promulgated by President Monroe has been adhered to by all political parties, and I now deem it proper to assert the equally important principle that hereafter no territory on this continent shall be regarded as subject of transfer to a European power.

In 1883 Secretary Frelinghuysen wrote to the American minister at Caracas, Venezuela, that—

In view of our interest in all that touches the independent life of the Republics of the American Continent, the United States could not be indifferent to anything that might impair their normal self-control—

And so forth.

Mr. Secretary Bayard wrote concerning the Haitian claims:

The United States has proclaimed herself the protector of the western world. * * * She can point with proud satisfaction to the fact that over and over again she has declared effectively that serious indeed

would be the consequences if European hostile foot should, without just cause, tread those States of the New World which have emancipated themselves from European control. * * * I feel bound to say that if we should sanction by reprisals in Haiti the ruthless invasion of her territory and insult to her sovereignty which the facts now before us disclose, if we approve by solemn executive action and congressional assent that invasion, it will be difficult for us hereafter to assert that in the New World, of those rights we are the peculiar guardians, those rights have never been invaded by ourselves.

On July 20, 1895, Secretary Olney wrote to Mr. Bayard:

Another development of the rule, though apparently not necessarily acquired by either its letter or spirit, is found in the objection to arbitration of South American controversies by a European power. American questions, it is said, are for American decision, and on that ground the United States went so far as to refuse to mediate in the war between Chile and Peru jointly with Great Britain and France.

And, in the same letter, said:

Those charged with the interests of the United States are now forced to determine exactly what those interests are and what course of action they require. It compels them to decide to what extent, if any, the United States may and should intervene in a controversy between and primarily concerning only Great Britain and Venezuela, and to decide how far it is bound to see that the integrity of Venezuelan territory is not impaired by the pretensions of its powerful antagonist.

When Mr. Olney's contentions were resisted by the British minister and Secretary for Foreign Affairs, Mr. Cleveland sent a message to Congress, in which, among other things, he said:

Without attempting extended argument in reply to these positions, it may not be amiss to suggest that the doctrine upon which we stand is strong and sound, because its enforcement is important to our peace and safety as a nation and is essential to the integrity of our free institutions and the tranquil maintenance of our distinctive form of government. It was intended to apply to every stage of our national life and can not become obsolete while our Republic endures. If the balance of power is justly a cause for jealous anxiety among the Governments of the Old World and a subject for our absolute noninterference, none the less is an observance of the Monroe doctrine of vital concern to our people and to their Government.

And, in his vigorous English, he further stated that—

There is no calamity which a great nation can invite which equals that which follows a supine submission to wrong and injustice, and the consequent loss of self-respect and honor, beneath which are shielded and defended a people's safety and greatness.

But the basis of the Monroe doctrine he further declared to be:

The Monroe doctrine finds its recognition in those principles of international law which are based upon the theory that every nation shall have its rights protected and its just claims enforced.

President Roosevelt said in August, 1905:

When we announce a policy such as the Monroe doctrine we thereby commit ourselves to accepting the consequences of the policy, and these consequences from time to time alter.

Let us look for a moment at what the Monroe doctrine really is. It forbids the territorial encroachment of non-American powers on American soil. Its purpose is partly to secure this Nation against seeing great military powers obtain new footholds in the Western Hemisphere and partly to secure to our fellow Republics south of us the chance to develop along their own lines without being oppressed or conquered by non-American powers. As we have grown more and more powerful, our advocacy of this doctrine has been received with more and more respect; but what has tended most to give the doctrine standing among the nations is our growing willingness to show that we not only mean what we say, and are prepared to back it up, but that we mean to recognize our obligations to foreign peoples no less than to insist upon our rights.

And:

We can not permanently adhere to the Monroe doctrine unless we succeed in making it evident in the first place that we do not intend to treat it in any shape or way as an excuse for aggrandizement on our part at the expense of the Republics to the south of us; second, that we do not intend to permit it to be used by any of these Republics as a shield to protect that Republic from the consequences of its own misdeeds against foreign nations; third, that inasmuch as by this doctrine we prevent other nations from interfering on this side of the water, we shall ourselves in good faith try to help those of our sister Republics which need such help upward toward peace and order.

And:

Should any of our neighbors, no matters how turbulent, how disregardful of our rights, finally get into such a position that the utmost limits of our forbearance are reached, all the people south of us may rest assured that no action will ever be taken save what is absolutely demanded by our self-respect; that this action will not take the form of territorial aggrandizement on our part, and that it will only be taken at all with the most extreme reluctance and not without having exhausted every effort to avert it.

Again, referring to the debt of and conditions in Santo Domingo, Roosevelt used this language:

The Dominican debt owed to European creditors is about $22,000,000, and of this sum over $18,000,000 is more or less formally recognized. The representatives of European governments have several times approached the Secretary of State, setting forth the wrongs and intolerable delays to which they have been subjected at the hands of the successive Governments of Santo Domingo in the collection of their just claims, and intimating that unless the Dominican Government should receive some assistance from the United States in the way of regulating its finances the creditor governments in Europe would be forced to resort to more effective measures of compulsion to secure the satisfaction of their claims

If the United States Government declines to take action and other foreign governments resort to action to secure payment of their claims, the latter would be entitled, according to the decision of The Hague tribunal in the Venezuelan cases, to the preferential payment of their claims, and this would absorb all the Dominican revenues and would be a virtual sacrifice of American claims and interest in the island. If, moreover, any such action should be taken by them, the only method to enable them to secure the payment of their claims would be to take possession of the customhouses; and, considering the state of the Domingo finances, this would mean a definite and very possibly permanent occupation of Dominican territory, for no period could be set to the time which would be necessarily required for the payment of their obligations and unliquidated claims.

Hon. ELIHU ROOT delivered a speech in New York on December 22, 1904, in which he is quoted as saying:

All sovereignty in this world is held upon the condition of performing the duties of sovereignty. In the parliament of man the rights of the weakest State are recognised; the right of the sovereign ruler or the sovereign people to be protected against aggression is recognized and protected by the common influence of mankind.

But that right is held upon condition that the sovereign ruler of the sovereign people perform the duties of sovereignty; that the citizens of other powers are protected within the territory; that the rules of international law are observed; that national obligations are faithfully kept. And while we assert that we are entitled to say that no foreign power shall undertake to control an American Republic; that no foreign power shall take possession with or without the will of an American people of their territory, that assertion is justified only upon the same condition.

* * * * * * *

And if we are to maintain this doctrine, which is vital to our national life and safety, at the same time, when we say to the other powers of the world, "You shall not push your remedies for wrong against these Republics to the point of occupying their territory," we are bound to say that whenever the wrong can not be otherwise redressed we ourselves will see that it is redressed.

* * * * * * *

The most extreme declaration of the Monroe doctrine which I know of was made by Mr. Olney in his letter at the time of the Venezuela boundary question in 1895, when he said: "To-day the United States is practically sovereign on this continent, and its fiat is law upon the subject to which it lends its interposition." The tremendous scope and meaning of those words for the weak little Republics of Central and South America can not be exaggerated. "The United States is sovereign to-day upon this continent, and its fiat is law."

The Monroe doctrine has, of course, been the subject of discussion and controversy by writers and statesmen. It was discussed during the consideration of the Clayton-Bulwer treaty in the Senate in 1853, those contending that it had answered its sole purpose and was an obsolete doctrine being led by Clayton, and those opposed to this idea by Douglas. This debate was referred to by Senator Sam Houston, of Texas, in the Senate in 1858. Houston had been a Member of Congress from Tennessee, when Monroe sent in his message, and the old statesman and warrior in the course of his speech, in closing upon this subject, said:

The Monroe doctrine has been repeatedly ridiculed of recent years, and by grave Senators, as the merest of abstractions—as unmeaning and valueless. But let me tell you, sir, that but for that doctrine Texas probably had never entered your confederacy. Canning might have yielded to Polignac for the consolidation of a monarchical or aristocratical form of government of the ci-devant colonies or have included it as one of those colonies, had it not been for the seasonable declaration of that doctrine, and the thrill of joyous delight with which it was hailed by the votaries of liberty everywhere. On this account alone I may be pardoned for fancying that it is deserving of a worthier designation, even by the most violent tongue, than an abstraction.

The English press commented upon the Lodge resolution passed by this Senate in 1912, the Spectator saying:

It is well within the purpose, if not within the actual words, of the original Monroe declaration. Foreign corporations and foreign governments are not identical things, but in certain circumstances the one may easily be turned to the use of the other.

From the point of view of Great Britain this action of the Senate need cause no uneasiness. With the principle of the Monroe doctrine we are familiar, and Mr. LODGE'S resolution does not really go beyond it. It is hardly possible that it should injure anyone in this country, and it certainly serves as a protection against a real danger.

While the Times stated:

Whether this (resolution) is to be described as an extension of the Monroe doctrine or as an application of the wider principle that each State may take what measures it deems essential for its safety is a question of words.

The new policy is not unexpected. It has been repeatedly pointed out in the Times that with the construction of the Panama Canal there was likely to be a reconsideration and extension of the Monroe doctrine. Admiral Mahan has indicated the strong objections to any power having a base within striking distance of the isthmus; and in commenting upon Mr. Knox's journey to Panama last February and the closer relations which must be formed between the United States and Central America, our Washington correspondent remarked: "It is obvious, even apart from the canal, Central America, and possibly Mexico, must now be the primary concern of those who are called upon to interpret and enforce the policy formuinted by President Monroe." In fact, each generation has its own version of that doctrine.

The Monroe doctrine has been reaffirmed repeatedly by both the great political parties in this country and neither has dared to repudiate it.

Monroe doctrine—Republican platform, 1888:

The conduct of foreign affairs by the present administration has been distinguished by its inefficiency and its cowardice. Having withdrawn from the Senate all pending treaties effected by Republican administrations for the removal of foreign burdens and restrictions upon our commerce and for its extension into better markets, it has neither effected nor proposed any others in their stead. Professing adherence to the Monroe doctrine, it has seen, with idle complacency, the extension of foreign influence in Central America and of foreign trade everywhere among our neighbors. It has refused to charter, sanction, or encourage

any American organization for constructing the Nicaragua Canal, a work of vital importance to the maintenance of the Monroe doctrine and of our national influence in Central and South America and necessary for the development of trade with our Pacific territory, with South America, and with the islands and farther coasts of the Pacific Ocean.

Republican platform, 1892:

We reaffirm our approval of the Monroe doctrine and believe in the achievement of the manifest destiny of the Republic in its broadest sense.

The Democratic platform of 1856 declared:

That our geographical and political position with reference to the other States of this continent, no less than the interest of our commerce and the development of our growing power, requires that we should hold as sacred the principles involved in the Monroe doctrine. Their bearing and import admit of no misconstruction; they should be applied with unbending rigidity.

The Republican platform of 1864, at Baltimore, said:

That we approve the position taken by the Government that the people of the United States can never regard with indifference the attempt of any European power to overthrow by force or to supplant by fraud the institutions of any republican government on the Western Continent, and that they will view with extreme jealousy, as menacing to the peace and independence of their own country, the efforts of any such power to obtain new footholds for monarchical governments, sustained by foreign military force, in near proximity to the United States.

In 1896 the Republican platform contained the following plank:

We reassert the Monroe doctrine in its full extent, and we reaffirm the right of the United States to give the doctrine effect by responding to the appeal of any American States for friendly intervention, in case of European encroachment. We have not interfered and shall not interfere with the existing possessions of any European power in this hemisphere, but these possessions must not on any pretext be extended. We hopefully look forward to the eventual withdrawal of the European powers from this hemisphere and to the ultimate union of all the English-speaking part of the continent by the free consent of its inhabitants.

And the Democratic platform of this same year indorsed the Cleveland Venezuelan message of December, 1895, as follows:

The Monroe doctrine, as originally declared and interpreted by succeeding Presidents, is a permanent part of the foreign policy of the United States, and must at all times be maintained.

In 1900 the Republican platform said:

We assert our steadfast adherence to the policy announced in the Monroe doctrine.

While the Democratic platform followed with:

The declaration in the Republican platform adopted at the Philadelphia convention held in June, 1900, that the Republican Party steadfastly adheres to the policy announced in the Monroe doctrine, is manifestly insincere and deceptive. This profession is contradicted by the avowed policy of that party in opposition to the spirit of the Monroe doctrine to acquire and hold sovereignty over large areas of territory and large numbers of people in the Eastern Hemisphere.

We insist on the strict maintenance of the Monroe doctrine in all its integrity, both in letter and spirit, as necessary to prevent the extension of European authority on this continent and as essential to our supremacy in American affairs. At the same time we declare that no American people shall ever be held by force in unwilling subjection to European authority.

In 1904 the Democratic platform declared, shortly, that—

We favor the maintenance of the Monroe doctrine in all its integrity.

The Republican platform language of the same year was:

Our foreign policy under his administration has not only been able, vigorous, and dignified, but to the highest degree successful. The complicated questions which arose in Venezuela were settled in such a way by President Roosevelt that the Monroe doctrine was signally vindicated and the cause of peace and arbitration greatly advanced.

* * * * * * *

A Navy powerful enough to defend the United States against any attack, to uphold the Monroe doctrine, and watch over our commerce is essential to the safety and the welfare of the American people. To maintain such a Navy is the fixed policy of the Republican Party.

Mr. FALL. I have for two years been calling the attention of Senators to Mexican affairs, with the hope that others might see, as I saw, the difference so well explained by John Bassett Moore, between interposition, or nonpolitical intervention, upon the one hand, and political intervention in the domestic affairs of Mexico upon the other.

The first, a duty due to our citizens for their protection and the protection of their property, and when necessary, because of the failure of the country in which they are residing to provide protection, in the eyes of all nations a national right, not justifying a declaration of war upon the part of Mexico, and a duty and right recognized and solemnly agreed to by Mexico in 1859, as I have shown.

But, Mr. President, while declining thus to interpose or intervene, the President has seen proper by his action in dispatching John Lind to Mexico, with the instructions, to which he referred in his message to this body on August 27, 1913, and by his subsequent actions, to intervene in the domestic affairs of that Republic.

Such intervention—"political" intervention—while often justifiable under the rules of international law, is of much graver consequence than interposition, and is always justification for a declaration of war by the nation with whose domestic affairs, form, or personnel of government the intervening nation interferes.

Such intervention, however, since March 4, 1913, has been an accomplished fact, and yet during the last 12 months we have fiddled while Mexico burned. We have seen more of our citizens murdered and outraged and hundreds of millions of dollars more of their property destroyed. We have declared that no government exists in Mexico, and have refused to bring to account for outrages upon our citizens and those of other countries those whom we should treat as de facto responsible.

We owe a duty to Spain, whose citizens have been murdered and driven like dogs from Mexico, where they had a right to be.

We owe a duty to England, to France, to Germany, whose citizens Pancho Villa has openly threatened to deal with as he has dealt with the Spanish.

We owe a duty to China.

The so-called constitutionalists whom we so much admire now, Mr. President, under their same hero when they took Torreon, which is now being threatened by his successor, Villa, dragged through the streets 300 poor, pitiful, defenseless Chinese and cut their throats—men, women, and children. We owe a duty to the citizens of Germany. When the German press gives an utterance with reference to German policy the world knows that that utterance is inspired, and when the German official press says that if German citizens are murdered Germany will not acquiesce as did Great Britain in the course to be followed by this country, then I say to you, Senators, there is imminent and threatened danger of a conflict between this country and one with which we always have been and always should remain at peace.

The same thing could equally well be said with reference to our policy to the citizens of all nations.

We owe the duty to ourselves to avoid the imminent danger of conflict with some other country growing out of the conditions in Mexico and our policy in dealing with that country.

We owe a duty to the Mexican people themselves; and, sir, we owe a duty to humanity which we can not escape.

I realize, Mr. President, and no one more fully, the consequences which might ensue from taking the necessary steps to discharge the duties to which I have referred. To defer action is to aggravate the conditions and invite more serious consequences.

With the solemn declaration that we do not war upon the Mexican nation nor people; that it is not our purpose to acquire territory, upset their laws nor overturn their constitution, and an invitation to the masses of the Mexican people to cooperate with us, we should immediately direct the use of the land and naval forces of this Government for the protection of our citizens and other foreigners in Mexico wherever found, and lend their assistance to the restoration of order and the maintenance of peace in that unhappy country, and the placing of the administrative functions in the hands of capable and patriotic citizens of Mexico, to be left with them to the end that under their own laws and customs, without interference from ourselves or others, elections may be held and those elected allowed to administer their own Government.

I might cite authority after authority and pile precedent upon precedent as justification under international law for such action, Mr. President, but I will only read from the message of the martyred McKinley, with the suggestion that we insert the name "Mexico" in lieu of that of Cuba and Spain:

* * * It is not to be forgotten that during the last few months the relation of the United States has virtually been one of friendly intervention in many ways, each not of itself conclusive, but all tending to the exertion of a potential influence toward an ultimate pacific result, just and honorable to all interests concerned. The spirit of all our acts hitherto has been an earnest, unselfish desire for peace and prosperity in Cuba, untarnished by differences between us and Spain, and unstained by the blood of American citizens.

The forcible intervention of the United States as a neutral to stop the war, according to the large dictates of humanity and following many historical precedents where neighboring States have interfered to check the hopeless sacrifices of life by internecine conflicts beyond their borders, is justifiable on rational grounds. It involves, however, hostile constraint upon both the parties to the contest as well to enforce a truce as to guide the eventual settlement.

The grounds for such intervention may be briefly summarized as follows:

First. In the cause of humanity and to put an end to the barbarities, bloodshed, starvation, and horrible miseries now existing there, and which the parties to the conflict are either unable or unwilling to stop or mitigate. It is no answer to say this is all in another country, belonging to another nation, and is therefore none of our business. It is specially our duty, for it is right at our door.

Second. We owe it to our citizens in Cuba to afford them that protection and indemnity for life and property which no Government there can or will afford, and to that end to terminate the conditions that deprive them of legal protection.

Third. The right to intervene may be justified by the very serious injury to the commerce, trade, and business of our people, and by the wanton destruction of property and devastation of the island.

Fourth. And which is of the utmost importance, the present condition of affairs in Cuba is a constant menace to our peace—

Remember the declaration of the President with reference to the difficulties in foreign affairs—

a constant menace to our peace, and entails upon this Government an enormous expense.

For three years we have maintained almost the entire military force of this Nation on the border.

With such a conflict waged for years in an island so near us, and with which our people have such trade and business relations, when the lives and liberty of our citizens are in constant danger and their property destroyed and themselves ruined, * * * all these and others that I need not mention, with the resulting strained relations, are a constant menace to our peace, and compel up to keep on a semiwar footing with a nation with which we are at peace.

Mr. President, I have delivered my message poorly, but under a sense of duty, under a high sense of responsibility. I have believed that the time had arrived when it was necessary that this matter should be discussed openly. I am one of those who believe that the American people can be left to handle any critical condition or any circumstance arising, no matter of what character, no matter what the circumstances may be, provided they are allowed to be informed of the subject.

In matters of this kind, when the public press is full of the outrages committed on Americans and when it is from day to day detailing the horrible conditions existing in the Republic of Mexico, I am not one of those who believe that it can be incompatible with the public interest for the list of Americans who have been injured in Mexico to be sent here to the Senate, that appropriate action may be taken if we deem such action necessary. I am not one of those who believe, Mr. President, that the Constitution of the United States should be ignored and that one man should arrogate to himself legislative and executive power.

During the delivery of Mr. FALL's speech,

The PRESIDING OFFICER (Mr. HITCHCOCK in the chair). The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated.

The SECRETARY. A joint resolution (S. J. Res. 1) proposing an amendment to the Constitution of the United States extending the right of suffrage to women.

Mr. ASHURST. I ask unanimous consent that the unfinished business be temporarily laid aside.

Mr. FALL. Mr. President——

The PRESIDING OFFICER. Is there objection? The Chair hears none. Without objection, it is so ordered.

Mr. THOMAS. I do not wish to consent to that except on the understanding that the unfinished business will not lose its place upon the calendar, but will be proceeded with as soon as the Senator from New Mexico finishes.

Mr. LODGE. When it is temporarily laid aside it retains its place.

The PRESIDING OFFICER. The unfinished business will not lose its place.

Mr. SWANSON. From the Committee on Education and Labor I wish to submit a report.

Mr. SMITH of Maryland. I wish to state that I desire to have my notice regarding the consideration of the District of Columbia appropriation bill hold its place on the calendar and apply to to-morrow. It is a very important measure.

The PRESIDING OFFICER. The unfinished business will be the order after 2 o'clock. It is only temporarily laid aside by unanimous consent.

Mr. GALLINGER. I suggest to my colleague on the committee, the chairman of the subcommittee, who has charge of the District of Columbia appropriation bill, that he give notice that upon the conclusion of the morning business to-morrow he will ask for the consideration of that measure.

Mr. SMITH of Maryland. Very well; I give that notice now.

Mr. MARTINE of New Jersey. Out of order I desire to submit some petitions.

Mr. LODGE. The Senator from New Jersey is out of order.

Mr. BRANDEGEE. I object to the introduction of any routine business.

Mr. LODGE. Under the rule it can not be received.

Mr. BRANDEGEE. The rule distinctly provides that the Senator who has the floor may not yield for such a purpose.

The PRESIDING OFFICER. No one has the floor.

Mr. FALL. I thought I had been recognized.

Mr. LODGE. The unfinished business was laid aside that the Senator from New Mexico might conclude.

The PRESIDING OFFICER. The Chair has not recognized anyone since the unfinished business was laid before the Senate and was temporarily laid aside.

Mr. FALL. I have asked for recognition several times.

The PRESIDING OFFICER. The Chair will give recognition to the Senator as soon as the report submitted by the Senator from Virginia is received.

Mr. BRANDEGEE. I make the point of order that the report presented by the Senator from Virginia is out of order and can not be received under the rule of the Senate. The rule distinctly provides that the Senator having the floor may not yield for the purpose of the reception of a report or the introduction of a bill or joint resolution, and that it is the duty of the Chair to enforce the rule without the point being raised; but I do raise the point.

The PRESIDING OFFICER. The Chair thinks that the rights of the Senator from New Mexico were concluded at 2 o'clock. He can only proceed on the unfinished business being laid aside, and only then upon the recognition of the Chair.

Mr. LODGE. Very well; and I make the question of order that the unfinished business has been laid aside, and therefore reports are now out of order and can only be submitted by unanimous consent.

The PRESIDING OFFICER. That is true. If there is any objection, the report can not be received.

Mr. LODGE. I make objection.

[The routine business referred to was subsequently submitted, and it appears under appropriate heading.]

Mr. SMITH of Maryland. I ask unanimous consent that the Senate agree to take up the District of Columbia appropriation bill to-morrow morning after the close of the morning business.

Mr. GRONNA. I object.

Mr. McCUMBER. I object to any unanimous consent of that kind.

The PRESIDING OFFICER. The Chair will state the request. The Senator from Maryland asks unanimous consent that the District of Columbia appropriation bill be taken up to-morrow morning immediately upon the close of the morning business. Is there objection?

Mr. McCUMBER. I object.

The PRESIDING OFFICER. Objection is heard. The Senator from New Mexico will proceed.

After the conclusion of Mr. FALL's speech,

Mr. SHIVELY. Mr. President, the Senator who just resumed his seat [Mr. FALL] has delivered what is evidently a long-considered and carefully prepared speech on the situation in Mexico and the relations of the United States to that situation. In this speech he has collated and recited a series of cases of violence and alleged violence suffered by citizens of the United States, citizens of Mexico, and subjects of other countries in the Republic south of us. No one will expect me to follow him in the details of these cases, as no one could foresee what cases occurring or rumored as occurring through over three years of revolution he would select for the purposes for which he has addressed the Senate.

In the course of his remarks the Senator informed the Senate of his 30 years' acquaintance and experience with Mexico and his former and present interests in Mexico, and his consequent qualifications to speak with knowledge of the real situation in that country. The Senator also assures the Senate that he is nonpartisan on this subject. In this I readily assent to his contention. He has drawn an indiscriminate indictment of both the administrations of President Taft and President Wilson on the subject of our relations with Mexico. To reinforce this indictment he invokes the series of cases which he has recited, the full accuracy of which recital and the fairness of his comments on which I deny.

But on his own premises, what is his purpose? If I recall his statements correctly, he himself says that the cases he recited have heretofore been brought to the attention of the public through the press of the country. Had he wished to impress his collated information on the special attention of the Senate, an executive session has been available to him at any time. It is manifest that he preferred a renewed publicity in the form he has chosen to present the case.

On the case as he has submitted it, what is his solution of the problem? Does he regard Huerta as a suitable person to compose conditions and reestablish order? Manifestly not. He describes Huerta as a man unworthy of power and incapable of handling the question. Would he turn to Carranza to compose the difficulties confronting Mexico? Manifestly not. Would he ignore Carranza and turn to Villa? Manifestly not. Villa is his pet aversion. Has he some figure in the background who he believes that with a friendly attitude on the part of the United States could compose the contending factions and bring order out of chaos? If so, he has not suggested any such possibility in his address to-day.

Then to what remedy does he remit the country? He presents only one. That is, intervention. Of what kind of intervention and what his proposed intervention means, I may speak later. But here I must be permitted to repudiate his contention of indifference on the part of the State Department to the rights

and interests of our citizens in Mexico. The difficulties confronting the department are manifest to all who reflect on the situation in that country. The topography of much of the country is rough. The revolution extends over a wide area of territory. The de facto governments in the region of the struggle change with the shifting fortunes of the contending forces. The task of extending aid and securing redress, and often even of ascertaining the facts, is a difficult one. The truth is bad enough. But it must be borne in mind that it is a part of the system of warfare in that country to send broadcast the most lurid fabrications or gross exaggerations as to atrocities committed, for the purpose of inflaming the public mind against the opposite partisans who are charged with the crimes. Despite the perplexities and embarrassments inseparable from such a situation, the department is aiding our citizens in every way within its means and power. It is fixing responsibility for loss of life or property suffered by them. When, because of present local conditions, present punishment or reparation is impossible it is gathering the facts and making up the record for the day of settlement.

As illustrating the activity of the department, I instance the case of Matthew Gourd. This was not a case of a powerful corporation about which the Senator was pleased to speak. It was not the case of some especially notable and influential individual. The report came to the department that on the night of July 26, 1913, a band of marauders entered on the premises of Matthew Gourd, an American citizen and farmer, residing with his family near Coco, in the State of San Luis Potosi; and that the trespassers tied Mr. Gourd to a tree, entered his household, and committed or attempted to commit violence on his daughter and his niece. The department immediately instructed our chargé d'affaires at Mexico City to investigate the case, and if the facts should be found as reported, to demand apprehension and punishment of the culprits. The local authorities in San Luis Potosi promptly pronounced the report a fabrication, and denied that anything of the kind had occurred. The Secretary of State was unwilling to accept the disclaimer, and after further exchange of telegrams with our chargé d'affaires, and under date of August 5, 1913, instructed him as follows:

> You are instructed to immediately and most urgently represent that this Government demands that the perpetrators of the dastardly crime on American women in Coco be at once apprehended and adequately punished. You are instructed to telegraph the result of your representations, keeping the matter before the authorities until the necessary action is taken. The victims of the attack have been brought from Coco to Tampico on the way to the United States.
>
> (Signed) BRYAN.

The literature in this case is voluminous. What I have here [exhibiting a bundle of papers] is scarce half of it. The presentation of the evidence of what has been done in all the cases would require the production in the Senate of tomes of documents. Like most others, the Gourd case presented many and serious difficulties. From a natural sense of delicacy, the women involved had been reticent and reluctant to testify. For like reasons the father was reluctant to testify. Despite the inevitable difficulties and because of the energy, resolution, and persistence of the State Department in following up the case, four of the culprits were apprehended, tried, convicted, and executed. Yet the report was circulated in the United States that this case was not even investigated.

As illustrating the exaggerations to which conditions in Mexico give rise, I instance the case of Durango. On the night of June 17, 1913, a force of 4,000 revolutionists assaulted the city of Durango and on the following day captured the city. On June 30 the then ambassador from the United States wired the State Department from the City of Mexico that personal letters received in that city from Durango stated that over 50 women of the best families had committed suicide after having been ravished. The same report was carried in a Washington paper of July 2, except that the number of suicides was fixed at 40 instead of 50. The report struck a shiver of horror through the minds of all who read it. In reply to the State Department, the American consul, who had been instructed to investigate and report, said that "except in a few isolated cases, nothing of the sort occurred," and that "life and honor were respected much better than anticipated." Not one American woman was molested. The one case I have cited is as typical of the activity and persistence of the department in enforcing redress for wrongs suffered by American citizens in Mexico as the other is of exaggerated reports going to the world from that country.

Now, Mr. President, the Senator is not in advance of me in his appreciation of the right of an American citizen to security. The value of his citizenship involves the sense of security it brings. This freely conceded, it must be remembered that revolution is not a novel thing in Mexico. From the first day of her independence to the accession of Diaz to the presidency her history was one of a long series of revolutions. The country always has been, and still is, politically volcanic. Under Diaz the country presented a state of smoldering insurrection. It was into a country with this background of revolution marking its history that our citizens entered and made their investments or sought employment. The history of the country was notice to all of the insecurity to life and property as compared with conditions within our own borders. This does not mean that the power of our Government should not accompany the citizen to a foreign land, but it does mean that the citizen should beware when he selects an environment where in a crisis the utmost exertion of the power of his Government may be unavailing to secure him against danger.

At the end of the year 1910, when the revolt against the Diaz government commenced, it was estimated there were 60,000 citizens of the United States in Mexico. The majority of these citizens lived far from our southern border, and many at long distances from the Mexican seaport towns. The aims of that and subsequent revolutions were purely domestic in character. The animus back of them was not against the United States nor against citizens of the United States in Mexico. And, however embittered the strife among the factions, all factions were a unit against intervention by a foreign power. The Senator has himself portrayed, and has read into the RECORD from others, the ferocities with which the native Mexicans conduct war. Had we intervened under these circumstances, who could have answered for the lives of these 60,000 men, women, and children scattered through Mexico between the time of our forces crossing the border and their arrival at the points of rescue?

President Taft did advise our citizens to withdraw from the theater of war. President Wilson, on mature consideration, approved the policy of his predecessor, gave like advice, instructing our consular agents to extend all possible assistance and to take charge of abandoned property. At the same time the President warned all those in authority in Mexico that they would be held to strict accountability for wrongs committed against American citizens in that country; and, amid all the vexations attending the situation since, he has steadily pursued a policy wise in itself and justified by the highest considerations of humanity.

Moreover, Mr. President, he who points to the record of violence in recent years in Mexico should not forget that this condition is not confined exclusively to times of war. In the periods of comparative tranquillity under Diaz every year brought its cases of violence to American life and property in Mexico to the attention of our State Department. In some cases the violence arose in a common brawl; in others in a general riot; in others it was assault from ambush by bandits; in others murder in cold blood. With such records in times of peace it is not strange that cases of violence should occur amid the turbulence of war. The situation is deplorable enough at best, but it should be noted that in exhausting the subject the Senator covered all the years of the war and that the vast majority of the cases occurred in the earlier period of the war. This may be claimed to be due to the fact that many of our citizens withdrew from Mexico, but this claim is a tribute to the wisdom that advised this course.

Mr. President, it has been illustrated to-day how easy is the task of attacking any given policy of government. They who attack are free to make their assault from any and all angles. They are free to project their criticism and censure from every sign in the zodiac and to give any complexion to a transaction that suits their purpose or their fancy.

The Senator referred to and commented on the cases of Salazar and Castillo. He called these men our "guests," and appeared to seek to leave the impression on the Senate that they are the cherished guests of the United States and the favored subjects of the courtesies, hospitalities, and amenities of the social life of the country. These men are restrained of their liberty at Fort Bliss. Of this conduct he doubts the constitutionality. What would he do with them? They are Mexican citizens. Their crimes were committed on Mexican soil. Would he remit them to the justice of any government in Mexico that he has described? One of them has been indicted in the United States district court in Texas for an inferior offense committed on this side of the line. He gave bond for $5,000. Would the Senator have him released from Fort Bliss, left free to return into Mexico, forfeit his bond, and resume his career of crime?

Then comes the cases of Abram Gonzales and Louis Terrazas. Gonzales was a citizen of Mexico. He was a former governor of the State of Chihuahua. There is no pretense that he was a citizen of the United States, or that he met his fate on American soil. In fact, the most harrowing details of the Senator's speech relate to atrocities committed by Mexicans

on Mexicans in Mexican territory. In December last the Senator wired the State Department from Three Rivers, Mexico, urging action in behalf of Louis Terrazas, the son of Gen. Terrazas, stating that Louis Terrazas was held for ransom by Villa and threatened with death in default of payment of the demanded ransom. Louis Terrazas is about 50 years of age. Gen. Terrazas, like his son Louis, is a Mexican citizen and always has been. Gen. Terrazas is the reputed owner of more than half the territory of the State of Chihuahua. Though neither the father nor the son is a citizen of the United States, the State Department is exerting its influence against violence to the son.

Finally, the Senator makes the climax of his recital the case of Benton, and suggests that only the death of a British subject aroused the State Department into activity. I am not disposed to retort in kind. But it will be recalled that the other morning the Senator presented to the Senate and had read into the RECORD a number of telegrams from El Paso, Tex., and a series of resolutions adopted at a mass meeting in that city denunciatory of the death of Benton and demanding action by the Federal Government. It is true that Benton was a British subject. But which among any of the cases presented by the Senator this afternoon of the deaths of American citizens, whether at El Paso or elsewhere, produced a mass meeting, denunciatory resolutions, and a demand for action from the city of El Paso? Was the deplorable death of Benton only the pretext for this movement at El Paso? Were the unfortunate exigencies of the Terrazas family the real cause and inspiration of the El Paso propaganda?

Now, I come, Mr. President, to the proposition of the Senator for which all his recital of wrongs and alleged wrongs is the background. His proposal is intervention. What kind? The contending forces in Mexico have not united in any suggestion of a friendly intervention to compose the distractions and restore peace in that country. No one of the organized and armed parties to the conflict has invited intervention. All parties and factions have been and are opposed to intervention from any foreign quarter. Under these circumstances nothing but armed intervention is possible, and this means war. Does this country shrink from a necessary or just war? No. But for all the purposes for which the Senator proposes intervention, intervention is the long way, the dreary way, the last way. There are still American citizens in that country. These would prove the natural and nearest sacrifices to blind rage. The property interests of our citizens would become the special subjects of spoliation. Even when our forces should reach the Mexican Capital the same problems would confront us then that confront us now, except that they would be more aggravated and difficult of permanent solution. To produce and maintain order would mean to police substantially the whole country, and this for an indefinite period of time. Should circumstances require even this, we are equal to the sacrifice; but I repeat that intervention should not be thought of until all other resources of policy have been exhausted.

The demand for intervention presents no persuasive appeal to the courage and valor of the people of the United States. No theme could appeal less to these qualities. Is there a thoughtful citizen inside or outside of this Chamber who on reflection would not scorn to make an armed invasion of divided, distracted, mangled, and bleeding Mexico a test of the courage of our citizens or the valor of our soldiers?

Reference has been made to the watching and waiting policy. This is not a novel policy in the history of this country. It was the policy observed toward all the peoples of South America in their struggles for independence. It has been the policy observed toward them in their revolutions since. Because of our close neighborship with Mexico there are exceptional and aggravating circumstances in the situation. But while these circumstances increase the difficulties they do not relieve us from resolute observance of a rule of action conceived in wisdom and vindicated by experience, and which makes affirmative interference a last resort. It is worth while to try out the effect of a firm pressure of peaceful agencies before appealing to those which it is never too late to employ.

The Senator insists that the President has not sufficiently taken the Senate into his confidence and laid before us detailed information on our foreign relations. I have seen no disposition to withhold any matter from the Senate or the Congress which can be submitted compatibly with the public interests. But if I may digress, speaking only for myself, I must be permitted to say that the treatment of the subject of our foreign relations is not without difficulties. It will be recalled that some weeks ago the President invited all the members of the Committee on Foreign Relations into conference at the White House. There the President took the committee into his confidence in the largest degree, giving them a full statement of the facts in relation to our foreign affairs, and especially with reference to the situation in Mexico. He stated clearly what in his judgment conditions required to be done and asked the judgment, confidence, counsel, and cooperation of the committee in handling the several problems. For reasons of the highest public importance it was understood and expressly agreed that the proceedings of the conference were to be regarded as strictly executive and confidential in character. Yet on the following morning a detailed account of the proceedings appeared in the press. The newspapers were not to blame. It is their business to print the news.

Of all measures, treaties are regarded as essentially the proper subjects of consideration in executive sessions. Not long since a series of treaties was before the Senate on the treaty calendar and under consideration in executive session. On the morning following a certain session the press published almost verbatim portions of the text of a number of the speeches made, and to others which were not quoted gave a complexion not at all warranted by the text. A few days ago a request came to me as acting chairman of the Committee on Foreign Relations from a Senator that two distinguished Mexican citizens might be heard before the committee on the situation in Mexico. The request was promptly granted and the gentlemen appeared before the committee. It was expressly agreed at the meeting that the hearing should be regarded as executive. The men who appeared before the committee were putting to the hazard the lives of their families in Mexico should their errand become known in that country. Every consideration of prudence and humanity suggested that publicity be avoided. Yet an elaborate report of the hearing with the names of those who addressed the committee appeared in the newspapers the following day. I mention these instances as showing that the conduct of our foreign relations is not without embarrassments, aside from any difficulties that may attach to the substantive questions involved in these relations.

But to return, Mr. President, I note with interest that the Senator produces an unratified treaty of the year 1859, negotiated by the diplomatic departments of the United States and Mexico, which contained a clause authorizing our Government, under certain conditions, to intervene in Mexico. He invokes this clause in support of his project of intervention. The Senator's argument proves too much to serve his cause. The question of making intervention in the affairs of Mexico the settled policy of this Government was then squarely presented to the Senate. The Senate declined to ratify the treaty, declined to commit the country to the burdensome policy, declined to reduce the sovereignty of the Mexican Government or relieve Mexico from the duties and responsibilities that go with sovereign power. If the history of that treaty means anything, it admonishes against intervention rather than invites it.

Nor is the Senator more fortunate when he cites the precedent of 1898. In that case the mortality of American citizens in a single night was more than twice that reported from Mexico in three years. It is known with what reluctance even then action was taken by those who were immediately charged with the conduct of our foreign relations. The consequences entailed on the country are sufficient to give thoughtful men pause before committing the Nation to the muster, the march, the camp, and the battle field. I repeat that it is not a question of courage. It is a question of steadily exerting the forces of peace to permanently compose a vexed situation to both the credit of our people at home and the security of our citizens and their interests in Mexico, rather than to choose the long way, wherein, after the certain success of our arms should be attained, the real and larger problem would confront us. The Senator points out that by proper public assurances to the Mexican people, how easy, simple, and effective would be the task of going in and coming out, but before that he gave a character to the Mexican people which utterly nullifies his program of simplicity and effectiveness.

On the President rests primarily the responsibility for our foreign relations. The difficult problems that confront him came as an inheritance. Before him lies the whole circle of our foreign relations and the bearing of each problem in them on other problems in them. It is not difficult to foresee that on the comprehension, discernment, delicacy, tact, and far vision with which the Mexican question is handled may depend for long in the future the temper of our foreign relations with all the other Republics south of us.

Mr. President, when I reflect on our own history as a people, I make some allowance for revolutions. Whatever of capacity for self-restraint, which is capacity for self-government, we boast is not the product of a day nor of a century. Its heraldry runs in unbroken strain through a thousand years. It goes back into the forests of Germany. It was not created by constitu-

tions and statutes. It is an intellectual and moral enfranchisement. The men who wrung the Magna Charta from the unwilling hand of King John did not do so to be freemen, but because they were freemen. The men who gave to the world our own Declaration of Independence did not do so to be free, but because they were free. Magna chartas and constitutions are created by freemen as barriers and breakwaters against power, and bonds to future security. It was a cherished doctrine of the founders of this Republic that revolution is a natural right. Our Republic is based on a revolution. Not long after the Republic entered on its career under the Federal Constitution an armed insurrection took place in one of the States of the Union.

The enforcement of our first internal-revenue laws was resisted by armed force. We had our four years of continuous war between the States of the Union and years more of exploitation of a portion of the States in which property interests of aliens were sacrificed. Even in times of general peace and with all the years of practiced self-restraint back of us the lives of certain classes of aliens have been destroyed by organized violence, for which our Government was constrained to respond in damages.

The history of the Mexican people is quite unlike our own. They have not had the advantages we enjoy. Their character, their traditions, their temper, their capacities for self-restraint are different from our own. The vast majority of those people are descendants from the aborigines of that country. But our own way to civil liberty and order was not a path of roses. Whatever of pledges to order we have were fashioned in storm, in struggle, in tribulation, in blood. In the wish that present conditions in Mexico were otherwise I freely join. The notion that our Government is neglecting anything that would make for the honor of our country or the security of our citizens in Mexico I repel.

Mr. TILLMAN. Mr. President, for three days I have been trying to get consideration of Senate resolution No. 42, the anti-smoking resolution; but things have changed about so and shaped themselves in such a manner that I do not know whether I ought to try to force it on this evening or not. I believe, however, I ask for its consideration now.

I move that Senate resolution 42 be laid before the Senate.

The VICE PRESIDENT. Without objection, the resolution will be laid before the Senate.

The Secretary read the resolution (S. Res. 42), as follows:

*Resolved*, That Rule XXXIV be amended as follows:

Strike out the period at the end of the first clause and insert a semicolon, and then add the following: "no smoking shall be permitted at any time on the floor of the Senate, or lighted cigars be brought into the Chamber."

Mr. JONES. Mr. President, a parliamentary inquiry. I understood the Senator to move to take up this resolution. Would that set aside and displace the unfinished business?

The VICE PRESIDENT. The Senator from South Carolina asks unanimous consent to take up the resolution.

Mr. TILLMAN. I did not ask unanimous consent; I moved to take it up.

Mr. SMOOT. I understand the unfinished business was temporarily laid aside by unanimous consent.

The VICE PRESIDENT. Yes.

Mr. SMOOT. If the Senator will ask unanimous consent for the consideration of this resolution, I presume he will secure it, which would be very much better than to move to take it up.

Mr. TILLMAN. I give notice that if consent is not given I shall then move to take it up. I ask unanimous consent to have the resolution laid before the Senate.

The VICE PRESIDENT. Is there any objection? The Chair hears none, and the resolution is before the Senate.

Mr. TILLMAN. Mr. President, I desire to explain my reasons for pressing this resolution changing the rules. Nineteen years' service in the Senate has taught me to believe that two of its most distinguishing characteristics are courtesy and an insistent demand that each Senator shall have as much consideration and enjoy as many rights as any other Senator.

A majority of the Senators—a large majority, at that—are smokers; and, unfortunately, a pernicious habit has so mastered them that they are nervous and miserable when they do not get the nicotine poison which soothes their nerves. Consequently, as soon as the doors are closed for executive session they light their cigars and puff away, and the Chamber soon has the appearance of a beer garden. When the executive session is not on they have to go to the cloak rooms to smoke.

I did not mind tobacco smoke formerly, although I have never been a smoker myself; but since I was paralyzed four years ago the smell of tobacco smoke nauseates me and makes me sick. Consequently I do not remain in the Senate during executive sessions any more than I can possibly help, although I have almost always responded to my name on roll calls on any important matter, whether in executive session or not.

The point I desire to make is this: Senators who enjoy smoking and feel obliged to do it can retire to the cloakrooms to indulge in it; but I have to leave the Chamber, and that infringes on my rights as a Senator and compels me to seek relief.

It may be said, and has been said by some of my friends here who will vote against this change in the rules, that when they observe me in the Chamber they do not smoke; and I am very grateful for the consideration of those men who watch and cease smoking while I am present. I have noticed frequently, however, that men who have told me of their desire to protect me in my weakness—and I know they are sincere—forget it and smoke right along. Then, too, I have found my Democratic colleagues so intent on gratifying their feverish desire to smoke that they feel compelled to light cigars in the caucus—so much so that I have almost had to leave the caucus or sit by an open window, for my very life depends upon a full supply of pure air. So I am beset with the danger of being driven out of the party and of the Senate itself, and I do not know where to turn.

Tobacco, I have been told by physicians, is a narcotic or sedative, while whisky is a stimulant, as everyone knows. Many men use both, and are constantly on the journey from the garret to the cellar and back, being whipsawed and their nerves racked by the constant conflict going on in their systems while the stimulant and the sedative contend for mastery. It is the abuse, not the use, of whisky and tobacco that is so dangerous to health, for in moderation they are both harmless, I think.

When I first offered this resolution I wrote letters to every Senator, asking an expression of opinion and urging the adoption of this rule. I have replies from nearly all of them, but many made verbal answers on the floor of the Senate itself. I shall read extracts from several, but there are two typical ones which I shall read in full.

Considering that you are entitled to be in the Senate Chamber at all times, and that you wish and that your State is entitled to have the benefit of your services on the floor at all times that may be necessary, I will vote with you to have the rule passed prohibiting smoking at any time.

* * * * * * *

I sympathize with you in the matter, but I should feel a delicacy in urging prohibition against the wishes of a majority of the Senators. I do not, as you know, smoke at all.

* * * * * * *

While it is true that the smoking of tobacco is a very great pleasure and comfort, to my mind that affords no reason why an old Senator, and a sick one at that, should be driven from the executive sessions by tobacco smoke. I expect to vote for your resolution when the same comes up.

* * * * * * *

Although I am a confirmed smoker of many years' standing, I will, out of the respect and consideration which I have for you, do anything in my power to aid you in your effort in this regard.

I will let the Secretary read two letters that I have here, if you please.

The VICE PRESIDENT. In the absence of objection, the Secretary will read as requested.

The Secretary read as follows:

UNITED STATES SENATE,
*Washington, May 12, 1913.*

Hon. BENJAMIN R. TILLMAN,
*United States Senate, Washington, D. C.*

MY DEAR SENATOR TILLMAN: I think the informality and freedom with which business is conducted in the executive sessions of the Senate has a very valuable influence in preventing friction and unnecessary delay, and I am inclined to think that that informality is a good deal aided by the fact that the Members are at liberty to smoke. That seems to be rather a visible evidence that the proceeding is informal and friendly.

I am, however, quite willing, so far as I am concerned, to forego the privilege if it inconveniences you. I should think that that might be accomplished by a general understanding as to the conduct to be observed when you are present without making a new rule.

Very sincerely, yours,

ELIHU ROOT.

—

UNITED STATES SENATE,
COMMITTEE ON CUBAN RELATIONS,
*Washington, D. C., May 19, 1913.*

Hon. B. R. TILLMAN,
*United States Senate, Washington, D. C.*

DEAR SENATOR TILLMAN: I have yours of the 16th, and your appeal goes straight to my heart. If I were a smoker, I know I would not hesitate a moment to give you an unqualified assurance that I would support you in your contention, because I hope I am sufficiently unselfish to make any reasonable sacrifice for you.

Not being a smoker—I never use the weed—I do not know but all the smokers of the Senate would think I was absolutely selfish in this matter, whereas the exact reverse is true. Much as I would like to have a change made in the manner you suggest, I feel that it is due to my brother Senators who smoke that I accept with best possible grace the discomforts that result from the gratification of their appetites for tobacco.

I think you catch my point, my dear Senator. I enjoy making sacrifices for my friends, and regard this as one of the qualities of a gentle-

man. I hope I am a gentleman, and I hope I am not deceiving myself when I reach the conclusion that in my own heart I love to be good and unselfish to my friends.

Now, Senator TILLMAN, you know that I count you among my list of dearest senatorial friends. You have always been more than kind to me, and I have never seen a moment when I would not have enjoyed a keen sense of pleasure in making any reasonable sacrifice in your behalf, but I would like to so act in this matter that I do not seem to be what I really hope I am not, selfish, and I should seem selfish if, disliking the intense smoke of the Senate, which sometimes reaches a density that is quite offensive, I should act from a selfish standpoint and vote against smoking in the Senate.

Of course you can not expect to win out in this contest unless you secure the votes of the smokers. I hope you will make your appeal to them and win out, and if I could manage to make my real position clearly understood by my brother Senators, nothing would give me greater pleasure than to support you in your contest for the abolition of smoking in the Senate Chamber, and, in any event, I am more than likely to do so, although from what I have above said you can see that I am placed in a position where I think that were I to vote against smoking my action would be misinterpreted.

I hope you will win out, and the chances are that I shall help you, but, in any event, I have written you with entire candor and am sure you will believe me sincere in what I have said to you.

With kindest regards and best wishes, believe me,

Always cordially yours, CARROLL S. PAGE.

Mr. TILLMAN. Mr. President, taking them all together, the letters I have received are a very interesting study in psychology, showing how men differ about important matters and the numerous points of view which they have. One thing I have noticed is that the nonsmokers are far more anxious lest they have the appearance of selfishness than some of the smokers.

I hate to have the feeling of being a nuisance. It makes me very uncomfortable, because I am naturally kind of heart and desire to be courteous to everybody. But when I enter a place where Senators are smoking, as I sometimes do, in the committee rooms, I catch a glance from their eyes which I can only interpret to mean, "Here comes old BEN TILLMAN, and I have got to stop smoking," and that makes me very uncomfortable and, in a way, unhappy.

Since my illness four years ago I have learned more about the human body than during all the balance of my life put together, and I am sure I have discovered some of the secrets of nature and laws of health of which most men know nothing whatever. The pity of it is that I had to ruin my health before I discovered these things and learned how to live rationally. Had I lived 10 years ago as I am living now my health never would have broken down at all.

I believe I could lengthen the life of every man in this Chamber from six to fifteen years if I could only get them to believe what I tell them and follow my advice. But all men are prone to consider "old age, sickness, death, and hell" as for other people and not for themselves. [Laughter in the galleries.]

The VICE PRESIDENT. Order must be preserved in the galleries. Any disturbance at all in the galleries is absolutely prohibited by the rules of the Senate.

Mr. TILLMAN. To give advice is the easiest thing in the world, for, as Shakespeare says:

> I can easier teach twenty what were good to be done,
> Than be one of twenty to follow mine own teaching.

I owe what degree of recovery I have made—and I am constantly being told I look a great deal better, and I know it is so—to will power and self-control in eating; the will power to exercise my muscles and nerves sufficiently to give them tone and keep the rust out of the joints; but the greatest help to my health arises from the self-control which enables me to keep from eating things I ought not to.

Since I was paralyzed four years ago, and read my own obituary, 25 Senators, including Vice President Sherman, and Sergeant-at-Arms Ransdell, who worked in this Chamber, most of them younger men than I, have died.

Think of it, Mr. President, 25 men in four years. Just for the sake of refreshing your minds and impressing you, I give the list as copied from the official records. I will send it to the desk and let it be incorporated in the RECORD without reading.

The VICE PRESIDENT. Without objection, that may be done.

The matter referred to is as follows:

MEMBERS OF THE SENATE OF THE UNITED STATES SERVING ON FEBRUARY 16, 1910, AND SUBSEQUENT TO THAT DATE WHO HAVE DIED.

NAME AND DATE OF DEATH.

McEnery, June 28, 1910.
Daniel, June 29, 1910.
Dolliver, October 15, 1910.
Clay, November 13, 1910.
Elkins, January 4, 1911.
Hughes, January 11, 1911.
Frye, August 8, 1911.
Carter, September, 1911.
Taylor, March 31, 1912.
Nixon, June 5, 1912.
Money, September, 1912.
Heyburn, October 17, 1912.
Sherman (Vice President), October 30, 1912.
Rayner, November 25, 1912.
Terrell, November, 1912.
Gordon, November, 1912.
Davis, January 3, 1913.
Briggs, May, 1913.
Johnston, August 8, 1913.
Cullom, January 28, 1914.
Bacon, February, 1914.
Massey, March 5, 1914.
Ransdell (Sergeant at Arms).

MEMBERS OF THE SENATE OF THE UNITED STATES WHO SERVED WITH SENATOR TILLMAN PRIOR TO FEBRUARY 16, 1910, WHO HAVE DIED.

NAME AND DATE OF DEATH.

McLaurin, December 27, 1909.
Johnson, October 21, 1909.
Platt, March, 1910.
Call, August, 1910.
Hill, October, 1910.
Quarles, October, 1911.
Dryden, November, 1911.
Peffer, October, 1912.
Wilson, November, 1912.
Jones (John P., of Nevada), November 29, 1912.
Berry, January, 1913.
Palmer, June, 1913.
Teller, February 23, 1914.

Mr. TILLMAN. No wonder, as I look around the Chamber and see the changes that have come and miss the many old familiar faces of friends who are dead, that I feel as though I were serving with ghosts as well as living men. There is no doubt in the world to my mind that this great mortality among us is due to the way we live in Washington. The life here is indeed an arduous one; the mental strain is intense. There is a continuous succession of banquets, dinners, and receptions. Automobiles and street cars are used by Senators instead of walking, and pure air and sunshine are things of which we get too little. There is no surer way to undermine the health than eating too much or eating irregularly. All these explain the unusual mortality among the Members of Congress.

A fitting epitaph for most of the Senators who have died in service would be: "He lived not wisely, but too well, and killed himself eating." Indeed, that can be said about most men and women in official life in Washington.

There is nothing more deadly than to breathe air that has already been breathed by others and thus robbed of its oxygen, besides being poisoned in other ways. The ventilation of this Chamber is poor, as everyone knows; and when we increase its impurities by tobacco smoke, as is being done all the while, the air is never cleansed and is very unwholesome and unhealthy.

Let us stop this smoking in the Senate Chamber, and have the attendants open the gallery doors every night, as well as prop open the Senate doors, and have the windows leading to the open air outside opened all night so that pure air can come into the Chamber and wash it out and make it habitable and more healthy, and there will be fewer deaths among us.

The VICE PRESIDENT. The question is on agreeing to the resolution.

The resolution was agreed to unanimously.

## CONDITIONS IN MEXICO.

Mr. SHEPPARD. Mr. President, representing the State of Texas in this body, I deem it my duty to give a brief expression to my views on the Mexican situation.

I have refrained from discussing the Mexican question heretofore on the floor of the Senate, because I have felt, and feel to-day, as I believe the American people have felt and feel to-day, that the President and the Secretary of State have handled, are handling, and will continue to handle this delicate and difficult problem in the best possible manner. Every day that passes without intervention and without war is an additional tribute to the ability with which they have handled this matter.

What would the critics of the administration have done had they been in control? Would they long ago have plunged the country into war? Could they have pursued any other course than that pursued by the administration without involving the country in war?

A publication by the State Department of the numerous appeals that have come to this country from Americans and others who claim to have been injured or to have been threatened with injury in Mexico will show that the department has rendered all possible assistance short of the declaration of actual war; and the publication will show that the national honor has been preserved.

In a number of instances I have transmitted to the department complaints of American citizens in Mexico, and in every instance the State Department has responded promptly and effectively. I wish to give the Senate one instance which is

somewhat different from the instances cited by the Senator from New Mexico.

A constituent of mine in El Paso went to Juarez, across the river, one day, and immediately disappeared. His friends and relatives were in a panic. They sent me telegram after telegram, urging me to have the State Department inquire as to what had become of this American citizen. They feared that he had been shot by the rebels. The machinery of the State Department was set in motion; and it turned out that while he had not been entirely shot he had been half shot with rotgut whisky, had been imprisoned in a lockup in Juarez, and was later released on the deposit of the necessary collateral.

The logic employed by the critics of the administration is peculiar. They say that they want bloodshed stopped; that they want outrages stopped; that they want these mutilations stopped; and yet any other practicable course than the course pursued by the administration would mean intervention; intervention would mean war; war would mean infinitely more bloodshed, infinitely more outrages, and infinitely more mutilations.

They say that they want to stop murder in Mexico, and yet intervention, which they say is inevitable, would mean the death of thousands of American citizens, the expenditure of unlimited American treasure, the creation of enormous war taxes and war debts, and of complications that would vex us for 50 years to come. They want to substitute for a condition which they now call bloody and distressing a condition vastly more bloody and vastly more distressing. Bad as present conditions may be, war would be infinitely worse.

I think I know something of the feeling of the people of Texas on this subject; and I think it due the Senate and the country to say that the people of Texas are almost unanimously in sympathy with Woodrow Wilson and William Jennings Bryan in the course they have pursued as to Mexico. They are not in sympathy with the governor of Texas on this question. They deplore his attitude, if I know anything about their attitude, and they deplore the position he has assumed as to the advisability of entering Mexico with rangers of Texas. I have been much relieved to hear this afternoon that an armed force of Texans did not cross the border and did not enter Mexican soil to recover the body of Vergara.

A short while ago a delegation of some six or eight representative Texans, who live along the Rio Grande border, came to Washington to assist me in pushing a bill I had introduced for a roadway along the Rio Grande. These gentlemen advised me that the American citizens along the border, outside of the refugees and some parts of the Mexican element, were almost solidly in sympathy with Mr. Wilson and Mr. Bryan on the Mexican question. They said that Texans were crossing the border every day, were engaging in business transactions with both sides in Mexico, and that as long as they attended to their own affairs they were not molested.

If you will consider the Vergara affair and the Benton affair, you will recall that in both instances these men voluntarily crossed the Rio Grande and voluntarily invited trouble. These gentlemen said that the Texans going into Mexico realize that they cross the border at their peril, and that they subject themselves to the dangers that naturally exist in a war-blasted land. These Texans, fresh from the border, told me that probably 60 or 75 per cent of the people living close to the border on the Texas side are Mexicans, and that while they are citizens of the United States in name, so far as their political sympathies and interests go, they are more a part of the Mexican nation than of the United States.

Clement Vergara was one of these Mexican Americans, these Texans said, and in all probability became involved in some Mexican affair. They added that there was no excitement on the border over this incident, except in the imagination of the governor of Texas and a few adventurous spirits along the river; and that, in any event, all the Texans along the border, except as I have indicated, were entirely willing to leave the matter to Wilson and to Bryan.

Let me add here that the Mexican-American element along the Rio Grande has not as yet expressed any considerable sympathy or interest in Texan affairs or in American affairs. These misguided Mexicans, so far as Texas affairs are concerned, have been herded for years by the reactionary interests along the Rio Grande and have been voted solidly against the best interests of our State. I trust that this political slavery will soon be ended by the Mexicans themselves. The dawn of liberty in Mexico will also mean liberty from bosses on the Texas side of the Rio Grande.

Mr. President, if the American people will continue to lend their support and sympathy to Wilson and Bryan, they will guide us through Mexican affairs without war, without intervention, without imperiling a single American principle, without reflecting on the honor of the Nation or the glory of the flag. Mr. President, I pray, and I know the American people pray, that the foolhardiness of reckless men and the schemes of hostile politicians may not drive this country into war.

### CICERO L. LINCOLN, ADMINISTRATOR, V. UNITED STATES.

Mr. SMOOT. I have been requested by the Senator from Mississippi [Mr. WILLIAMS] to ask to have referred to the Committee on Printing, with the view to having it printed as a public document, the opinion of the court delivered by Judge Howry, of the United States Court of Claims, in the case of Cicero L. Lincoln, administrator for Joseph Harvey, deceased, against The United States.

The VICE PRESIDENT. The matter will be referred to the Committee on Printing.

### CIVIL WAR OFFICERS' RETIRED LIST.

Mr. KENYON. Mr. President, I wish to give notice, if it does not conflict with any parliamentary rights which have been secured by notices already given, that following the conclusion of the consideration of Senate joint resolution No. 1 I will move to take up the bill (S. 392) to create in the War Department and Navy Department, respectively, a roll designated as "the Civil War officers' retired list," to authorize placing thereon with retired pay certain surviving officers who served in the Army, Navy, or Marine Corps of the United States in the Civil War, and for other purposes.

Mr. McCUMBER. A notice has already been given to press another bill, the bill (S. 120) to provide for the inspection and grading of grain entering into interstate commerce, and to secure uniformity in standards and classification of grain, and for other purposes. I have begun to speak on that bill, and I have not finished my address as yet, owing to lack of opportunity.

Mr. KENYON. I did not know just the parliamentary situation. I wanted to save any right I might obtain for second or third place.

### EXECUTIVE SESSION.

Mr. SHIVELY. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After seven minutes spent in executive session the doors were reopened, and (at 5 o'clock and 10 minutes p. m.) the Senate adjourned until to-morrow, March 10, 1914, at 12 o'clock meridian.

---

## NOMINATIONS.

*Executive nominations received by the Senate March 9, 1914.*

### UNITED STATES ATTORNEY.

Lee Douglas, of Nashville, Tenn., to be United States attorney, middle district of Tennessee, vice Abram M. Tillman, whose term has expired.

### COLLECTOR OF INTERNAL REVENUE.

John Y. Fauntleroy, of New Orleans, La., to be collector of internal revenue for the district of Louisiana, in place of Walter Y. Kemper, superseded.

### SURVEYOR GENERAL.

I. C. Thoresen, of Salt Lake City, Utah, to be surveyor general of Utah, vice Thomas Hull, term expired.

### RECEIVERS OF PUBLIC MONEYS.

Frank A. McCall, of Sandpoint, Idaho, to be receiver of public moneys at Coeur d'Alene, Idaho, vice William Ashley, removed.

Jacob A. Mayer, of Havre, Mont., to be receiver of public moneys at Havre, Mont., vice Louis W. Pierson, removed.

### REGISTER OF THE LAND OFFICE.

Frank Langley, of Coeur d'Alene, Idaho, to be register of the land office at Coeur d'Alene, Idaho, vice William H. Batting, term expired.

### PROMOTIONS IN THE ARMY.

#### CORPS OF ENGINEERS.

Capt. Alfred B. Putnam, Corps of Engineers, to be major from February 27, 1914, to fill an original vacancy.

Capt. Clarence O. Sherrill, Corps of Engineers, to be major from February 27, 1914, to fill an original vacancy.

Capt. Ernest D. Peek, Corps of Engineers, to be major from February 27, 1914, to fill an original vacancy.

Capt. George R. Spalding, Corps of Engineers, to be major from February 27, 1914, to fill an original vacancy.

Capt. Elliott J. Dent, Corps of Engineers, to be major from February 27, 1914, vice Maj. Herbert Deakyne, promoted.

Capt. W. Goff Caples, Corps of Engineers, to be major from February 27, 1914, vice Maj. Charles S. Bromwell, promoted.

First Lieut. Edward D. Ardery, Corps of Engineers, to be captain from February 27, 1914, to fill an original vacancy.

First Lieut. Charles K. Rockwell, Corps of Engineers, to be captain from February 27, 1914, to fill an original vacancy.

First Lieut. James G. Steese, Corps of Engineers, to be captain from February 27, 1914, to fill an original vacancy.

First Lieut. Roger G. Alexander, Corps of Engineers, to be captain from February 27, 1914, vice Capt. Alfred B. Putnam, promoted.

First Lieut. James A. O'Connor, Corps of Engineers, to be captain from February 27, 1914, vice Capt. Clarence O. Sherrill, promoted.

First Lieut. Lewis H. Watkins, Corps of Engineers, to be captain from February 27, 1914, vice Capt. Ernest D. Peek, promoted.

First Lieut. Gilbert E. Humphrey, Corps of Engineers, to be captain from February 27, 1914, vice Capt. George R. Spalding, promoted.

First Lieut. Richard Park, Corps of Engineers, to be captain from February 27, 1914, vice Capt. Elliott J. Dent, promoted.

First Lieut. Daniel I. Sultan, Corps of Engineers, to be captain from February 27, 1914, vice Capt. W. Goff Caples, promoted.

Second Lieut. William C. Sherman, Corps of Engineers, to be first lieutenant from February 27, 1914, to fill an original vacancy.

Second Lieut. Rudolph C. Kuldell, Corps of Engineers, to be first lieutenant from February 27, 1914, to fill an original vacancy.

Second Lieut. Roscoe C. Crawford, Corps of Engineers, to be first lieutenant from February 27, 1914, to fill an original vacancy.

Second Lieut. Earl G. Paules, Corps of Engineers, to be first lieutenant from February 27, 1914, vice First Lieut. Edward D. Ardery, promoted.

Second Lieut. Bradford G. Chynoweth, Corps of Engineers, to be first lieutenant from February 27, 1914, vice First Lieut. Charles K. Rockwell, promoted.

Second Lieut. Milo P. Fox, Corps of Engineers, to be first lieutenant from February 27, 1914, vice First Lieut. James G. Steese, promoted.

Second Lieut. John C. Gotwals, Corps of Engineers, to be first lieutenant from February 27, 1914, vice First Lieut. Roger G. Alexander, promoted.

Second Lieut. Francis K. Newcomer, Corps of Engineers, to be first lieutenant from February 27, 1914, vice First Lieut. James A. O'Connor, promoted.

### POSTMASTERS.

#### CALIFORNIA.

Margaret Messick to be postmaster at Victorville, Cal. Office became presidential January 1, 1914.

#### ILLINOIS.

R. A. Thompson to be postmaster at Thompsonville, Ill., in place of R. F. Rotramel. Incumbent's commission expires April 1, 1914.

#### IOWA.

H. F. A. Hilmer to be postmaster at New Hampton, Iowa, in place of J. H. Kolthoff. Incumbent's commission expired January 28, 1914.

E. P. McManus to be postmaster at Keokuk, Iowa, in place of S. W. Moorehead. Incumbent's commission expired February 4, 1914.

John R. Strickland to be postmaster at Parkersburg, Iowa, in place of Elmer E. Schrack, resigned.

#### LOUISIANA.

J. M. Cook to be postmaster at Oakdale, La., in place of James H. Leggett, declined.

#### NEBRASKA.

Byron Busby to be postmaster at Wakefield, Nebr., in place of C. H. Merritt. Incumbent's commission expires March 11, 1914.

John Canfield to be postmaster at Tekamah, Nebr., in place of J. M. Crowell. Incumbent's commission expired March 8, 1914.

Patrick H. Green to be postmaster at Creighton, Nebr., in place of Charles A. Sweet. Incumbent's commission expired March 8, 1914.

#### NEW JERSEY.

James A. Mahaney to be postmaster at Roebling, N. J., in place of Samuel L. Major. Incumbent's commission expired February 4, 1914.

#### NEW YORK.

J. F. Lantry to be postmaster at Massena, N. Y., in place of J. B. Andrews. Incumbent's commission expired August 2, 1913.

#### OHIO.

Jacob D. Yocum to be post master at Mechanicsburg, Ohio, in place of Edward L. Byers. Incumbent's commission expires March 30, 1914.

#### OKLAHOMA.

Mathias Schiefelbusch to be postmaster at Yale, Okla., in place of W. S. Hartshorn. Incumbent's commission expired February 16, 1914.

#### TEXAS.

B. M. Richardson to be postmaster at Athens, Tex., in place of William A. Hawn. Incumbent's commission expired February 8, 1914.

Robert E. Speer to be postmaster at Fort Worth, Tex., in place of L. M. Barkley. Incumbent's commission expired February 18, 1914.

#### WASHINGTON.

George B. Day to be postmaster at Walla Walla, Wash., in place of E. L. Brunton. Incumbent's commission expires April 15, 1914.

---

## CONFIRMATIONS.

*Executive nominations confirmed by the Senate March 9, 1914.*

### INTERSTATE COMMERCE COMMISSIONER.

Henry Clay Hall to be an interstate-commerce commissioner.

### INTERNAL-REVENUE COLLECTOR.

John Y. Fauntleroy to be collector of internal revenue for the district of Louisiana.

### UNITED STATES MARSHAL.

John M. Boyle to be United States marshal for the western district of Washington.

### PROMOTIONS IN THE ARMY.

#### CORPS OF ENGINEERS.

Capt. Edward N. Johnston to be major.
First Lieut. Henry A. Finch to be captain.
Second Lieut. Howard S. Bennion to be first lieutenant.

### PROMOTIONS AND APPOINTMENTS IN THE NAVY.

Asst. Surg. Irving W. Robbins to be a passed assistant surgeon.
Carleton I. Wood to be an assistant surgeon.
James M. Quinn to be an assistant surgeon.
Machinist Adolph J. Merkt to be a chief machinist.

### POSTMASTERS.

#### FLORIDA.

Robert O. Cresap, Lakeland.

#### MICHIGAN.

Elmer E. Hymers, Pontiac.
Herbert I. Wright, Three Rivers.

#### NORTH DAKOTA.

A. I. Koehmstedt, Langdon.

#### TENNESSEE.

Y. Q. Caldwell, Paris.
Frank W. Latta, Dyersburg.
James M. Scarborough, Dover.

#### TEXAS.

Robert E. Speer, Fort Worth.

#### VIRGINIA.

George N. Reed, Reedville.

#### WASHINGTON.

Jasper J. Cameron, Harrington.

---

## REJECTION.

*Executive nomination rejected by the Senate March 9, 1914.*

Adolph P. Hill to be postmaster at Santa Fe, N. Mex.

## HOUSE OF REPRESENTATIVES.

### MONDAY, *March 9, 1914.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

God of the universe, Father of all souls, dispenser of every good, always ready to help those who would help themselves and do good unto their fellow men, make clear the obligations resting upon these Thy servants and quicken every noble impulse which leads on to new life and action, that with fidelity, patience, courage, fortitude they may discharge the duties of this day. In the spirit and strength of the Lord Jesus Christ. Amen.

The Journal of the proceedings of Saturday last was read and approved.

#### BUILDING REGULATIONS OF THE DISTRICT OF COLUMBIA.

Mr. JOHNSON of Kentucky. Mr. Speaker, this being District day, I desire to call up for consideration the bill (H. R. 8593) amending the building regulations of the District of Columbia by providing for the better protection of persons engaged in and about the construction, repairing, alterations, or removal of buildings, bridges, viaducts, and other structures.

The SPEAKER. The Clerk will report the bill.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the title and substance of section 157 of the District of Columbia building regulations be amended so as to read:

"REGULATIONS DURING THE COURSE OF CONSTRUCTION, ALTERATION, REMOVAL, OR PAINTING OF BUILDINGS, BRIDGES OR VIADUCTS, AND OTHER STRUCTURES.

"SEC. 157. SUBSECTION 1. That any house, building, bridge, viaduct, or other structure being constructed or erected by any person, firm, or corporation in the District of Columbia shall be so erected and constructed as to give proper and adequate protection to the life and limb of any person or persons employed or engaged thereon or passing under or by the same.

"SUBSEC. 2. All scaffolds, hoists, cranes, stays, ladders, supports, or other mechanical contrivances erected or constructed by any person, firm, or corporation in the District of Columbia for use in the erection, repairing, alteration, removal, or painting of any house, building, bridge, viaduct, or other structure shall be erected and constructed in a safe, suitable, and proper manner, and shall be so erected and constructed, placed, and operated as to give proper and adequate protection to the life and limb of any person or persons employed or engaged thereon or passing under or by the same, and in such manner as to prevent the falling of any material that may be used or deposited thereon.

"SUBSEC. 3. Scaffolding or staging, swung or suspended from an overhead support more than 20 feet from the ground or floor shall have, where practicable, a safety rail properly bolted, secured, and braced, rising at least 34 inches above the floor or main portion of such scaffolding or staging and extending along the entire length of the outside and ends thereof and properly attached thereto, and such scaffolding or staging shall be so fastened as to prevent the same from swaying from the building or structure.

"SUBSEC. 4. All swinging and stationary scaffolding, platforms, and other devices shall be so constructed as to bear four times the maximum weight required to be depended therein or placed thereon when in use, and such swinging scaffolding, platform, or other device shall not be so overloaded or overcrowded as to render the same unsafe or dangerous.

"SUBSEC. 5. Any person, firm, or corporation in the District of Columbia hiring, employing, or directing another to perform labor of any kind in the erecting, repairing, altering, or painting of any water pipe, standpipe, pole, staff, dome, or cupola, when the use of any scaffold, staging, swing, hammock, support, temporary platform, or other similar contrivance are required or used in the performance of such labor, shall keep and maintain at all times while such labor is being performed and such mechanical device is in use or operation a safe and proper scaffold, stay, support, or other suitable device not less than 16 feet below such working scaffold, staging, swing, hammock, support, or temporary platform when such work is being performed at a height of 32 feet or more, for the purpose of preventing serious injury to the person or persons performing such labor in case of any accident to such working scaffold, staging, swing, hammock, support, or temporary platform.

"SUBSEC. 6. Any workman or mechanic whose duties require him to use a scaffold, hoist, crane, ladder, or other contrivance in connection with the construction, alteration, repairing, removing, cleaning, or painting of any building, bridge, viaduct, or other structure may notify the inspector of buildings, calling attention to any defect or weakness which, in the employee's opinion, renders the scaffold dangerous, and such communication shall be strictly confidential.

"SUBSEC. 7. Whenever it shall come to the notice of the inspector of buildings that the scaffolding or the slings, hangers, blocks, pulleys, stays, braces, ladders, irons, or ropes of any swinging or stationary scaffolding, platform, or other similar device used in the construction, alteration, repairing, removing, cleaning, or painting of buildings, bridges, or viaducts within the District of Columbia are unsafe or liable to prove dangerous to the life or limb of any person, the said inspector shall immediately cause an inspection to be made of such scaffolding, platform, or device, or the slings, hangers, blocks, pulleys, stays, braces, ladders, irons, or other parts connected therewith. If after examination, such scaffolding, platform, or device, or any of such parts, is found to be dangerous to the life or limb of any person, the inspector shall at once notify the person responsible for its erection or maintenance of such fact, and warn him against the use, maintenance, or operation thereof, and prohibit the use thereof, and require the same to be altered and reconstructed so as to avoid such danger. Such notice may be served personally upon the person responsible for its erection or maintenance, or by conspicuously affixing it to the scaffolding, platform, or other such device, or the part thereof declared to be unsafe. After such notice has been so served or affixed the person responsible therefor shall cease using and immediately remove such scaffolding, platform, or other device, or part thereof, and alter or strengthen it in such manner as to render it safe. The building inspector or any of his deputies shall have free access at all reasonable hours to any building or structure or premises containing scaffolding, platforms, or other similar device, or parts thereof, or where they may be in use.

"SUBSEC. 8. Any owner, contractor, subcontractor, foreman, or other person having charge of the erection, construction, repairing, alteration, removal, or painting of any building, bridge, viaduct, or other structure within the provisions of this act shall comply with all the terms thereof, and any such owner, contractor, subcontractor, foreman, or other person violating any of the provisions of this act shall, upon conviction thereof, be fined not less than $25 nor more than $500 or imprisoned for not less than three months nor more than two years, or both fined and imprisoned, in the discretion of the court."

SEC. 2. That there be added to the District of Columbia building regulations the following section:

"115a. It shall be the duty of the owner of every house, building, or structure (except a private house, used exclusively as a private residence) now under construction, or hereafter to be constructed, to affix and display conspicuously on each floor of such building during construction a placard stating the load per square foot of floor surface which may with safety be applied to that particular floor during such construction, or if the strength of different parts of any floor varies, then there shall be such placards for each varying part of such floor. It shall be unlawful to load any such floors or any part thereof to a greater extent than the load indicated on such placards. All such placards shall be verified and approved by the inspector of buildings."

SEC. 3. That section 192 of the District of Columbia building regulations be amended to read:

"SEC. 192. SUBSECTION 1. In all buildings in the District of Columbia in course of construction and in all buildings having elevators intended for freight lifts only, and not constructed, protected, and operated as required for passenger elevators, it shall be unlawful to use hoists and elevators for hoisting materials, etc., in any such building or buildings unless the wellholes or openings for such elevators or hoists on each and every floor of the building shall be closed to a height of at least 6 feet, with no opening greater than 2½ inches; and semiautomatic gates or doors at least 5 feet, with no opening greater than 2½ inches. By semiautomatic gates or doors it is meant to provide gates or doors which will close automatically when the car leaves the landing. Such other safety or equivalent appliances as the inspector of buildings may determine to be necessary for the protection of life and limb shall also be provided.

"SUBSEC. 2. Any hoisting machine or engine used in building construction shall, where practicable, be set up or placed on the ground, and where it is necessary in the construction of such building to place such hoisting machine or engine on some floor above the ground floor, such machine or engine must be properly and securely supported with a foundation capable of safely sustaining twice the weight of such machine or engine. If a building in course of construction is three stories or more in height, no material needed for such construction shall be hoisted or lifted over a public street or alley unless 15 feet or more of such street or alley shall be barricaded from use by the public.

"SUBSEC. 3. If elevating machines or hoisting apparatus operated or controlled by other than hand power are used in the construction, alteration, or removal of any building or other structure, a complete and adequate system of communication by means of signals shall be provided and maintained by the owner, contractor, or subcontractor during the use and operation of such elevating machines or hoisting apparatus in order that prompt and effective communication may be had at all times between the operator of engine or motive power of such elevating machine and hoisting apparatus and the employees or persons engaged thereon or in using or operating the same."

SEC. 4. That section 158 of the District of Columbia building regulations be amended to read as follows:

"SEC. 158. Where the plans and specifications require the floors to be arched between the beams thereof, or where the floors or filling in between the floors are fireproof material or brickwork, the owner, contractor, or subcontractor shall complete the flooring or filling in as the building progresses to not less than within three tiers or beams below that on which the ironwork is being erected. If the plans and specifications of such buildings do not require filling in between the beams of floors with brick or fireproof material, the owner, contractor, or subcontractor for work in course of construction shall lay the underflooring thereof or a safe temporary floor on each story as the building progresses to not less than within two stories or floors below the one to which such building has been erected. Where double floors are not to be used, the owner or contractor shall keep planked over the floor two stories or floors below the story where the work is being performed. If the floor beams are of iron or steel, the contractor for the iron or steel work of a building in the course of construction, or the owner of such building, shall thoroughly plank over the entire tier of iron or steel beams on which the structural iron or steel work is being erected, except such spaces as may be reasonably required for the proper construction of such iron or steel work and for the raising and lowering of materials to be used in the construction of such buildings and such spaces as may be designated by the plans and specifications for stairways and elevator shafts."

SEC. 5. That there be added to section 21 of the District of Columbia building regulations the following provision:

"It shall be the duty of all architects or draftsmen engaged in preparing plans, specifications, or drawings to be used in the erection, repairing, altering, or removing of any building or structure within the District of Columbia to provide in such plans, specifications, and drawings for all the permanent structural features or requirements specified in the District of Columbia building regulations; and any failure to comply with these requirements shall subject the architect or draftsman to a fine of not less than $25 nor more than $200 for each offense."

SEC. 6. That for any injury to person or property occasioned by any willful violations of this act or willful failure to comply with any of its provisions a right of action shall accrue to the party injured for any direct damages sustained thereby, and in case of loss of life by reason of such willful violation or willful failure as aforesaid a right of action shall accrue to the widow of the person so killed, his lineal heirs or adopted children, or to any other person or persons who were, before such loss of life, dependent for support on the person or persons so killed, for a like recovery of damages for the injuries sustained by reason of such loss of life or lives.

Mr. CANTRILL. Mr. Speaker, I make the point that no quorum is present.

The SPEAKER. Evidently there is no quorum present.

Mr. UNDERWOOD. Mr. Speaker, I move a call of the House.

The motion was agreed to.

The SPEAKER. The Doorkeeper will lock the doors, the Sergeant at Arms will notify the absent Members, and the Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

| | | | |
|---|---|---|---|
| Anthony | Davenport | Johnson, S. C. | Reilly, Conn. |
| Austin | Deitrick | Jones | Richardson |
| Avis | Dickinson | Kahn | Riordan |
| Bailey | Dillon | Key, Ohio | Roberts, Nev. |
| Baker | Dooling | Korbly | Rupley |
| Barchfeld | Doughton | Kreider | Saunders |
| Barnhart | Driscoll | L'Engle | Sharp |
| Brockson | Eagan | Lesher | Sherley |
| Brodbeck | Edmonds | Levy | Slemp |
| Brown, W. Va. | Evans | Lewis, Md. | Smith, J. M. C. |
| Browning | Fairchild | Lewis, Pa. | Stanley |

| Crisp | Hayes | Oglesby | Wilson, Fla. |
| Cullop | Hobson | O'Shaunessy | Wilson, N. Y. |
| Dale | Howell | Plumley | |
| Danforth | Hoxworth | Porter | |

The SPEAKER. On this call 314 Members have answered to their names; a quorum is present.

Mr. UNDERWOOD. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The SPEAKER. The Doorkeeper will open the doors.

Mr. JOHNSON of Kentucky. Mr. Speaker, under the rules of the House this day is set apart for the consideration of matters pertaining to the District of Columbia. Later along I propose to address myself briefly to the bill which is under consideration. Prior to that, however, I wish to make some remarks that are personal to myself. I will do that by inviting attention to an article which appeared in the Washington Herald March 1, 1914, which reads as follows:

"CITIZENS WILL START FIGHT ON BEN JOHNSON—COMMITTEE OF 100 TO BE APPOINTED TO URGE NEW HEAD FOR DISTRICT COMMITTEE.

"With a view to organizing a compact body to protest against BEN JOHNSON as chairman of the House District Committee, Brainard H. Warner yesterday publicly advertised a mass meeting to be held at the New Willard Thursday afternoon at 4 o'clock.

Mr. Warner was not in town last night to elaborate on his plan. It is known, however, he contemplates the organization of a committee of 100 citizens to urge a new chairman for the House committee."

Mr. Speaker, that article was first published in the Washington Herald. It has found its way into the press largely in the United States. The naked article itself may not be libelous, but the colloquium is. But to that I hope to pay no sort of attention, either now or hereafter.

If the chairman of so important a committee is to be removed, or if a body of citizens of the Capital City contemplate undertaking the removal of me as chairman of a committee, there must of necessity be a motive or reason behind it. So the question first arising is: What is the motive or reason which suggests that Mr. Warner should advertise for a meeting of the citizens of Washington, to be held at the New Willard Hotel on last Thursday afternoon at 4 o'clock, to remove me? The inference would follow that this movement was taken up because I, as chairman, had done something dishonorable. Let me say to you that this originated simply and purely for no reason except that I refused to do something that was dishonorable. [Applause.] I purpose to show to you that Mr. Warner offered to me a bribe but thinly disguised. Mr. Brainard H. Warner, who has grown rich here as a real estate agent, came to my office, accompanied by a gentleman whose name it is not now, at least, necessary to call, because that gentleman did not do the talking. Mr. Warner himself did the talking, and he did it in the presence of the gentleman to whom I have just referred, and also in the presence of my secretary, Mr. J. Rogers Gore. Mr. Warner came to my office and began to argue with me that I was getting in the way of some of his real estate projects and asked me to desist. Coupled with that request upon his part that I desist or get out of his way in furthering the schemes which he had, he went on to say that an ex-member of the Committee on the District of Columbia had cooperated with him in furthering some of his schemes; and that because of that cooperation upon the part of the ex-member of the committee, whom he called by name, that ex-member of the committee had made large sums of money. Upon that occasion Mr. Warner, figuratively speaking, took me to the mountain top and there showed me the great avenues of graft which permeate the Nation's Capital. He told me how the named ex-member of the District Committee had cooperated with him, and how, when this ex-member of the committee did not have the money, he, Warner, had put it up for him; and that when he had got his acreage ground plotted and laid out in streets, with the streets and pavements built through it, he sold it, and that without this ex-member having put up a cent of money he took to him his proportion of large profits. Under this thin veil this proposition was made to me. It is not necessary, I believe, before this House for me to say that that conversation came to a sudden termination. [Applause.]

I was not willing to let the matter rest there. This body of the people's representatives was entitled to know the method by which things had been accomplished here. I immediately came to this floor, and I got together the Speaker of the House of Representatives, Mr. CLARK, and Senator OLLIE JAMES, of Kentucky. I told them that I thought I should have this man brought to the bar of the House because of his having offered that indignity not only to me but to this House. [Applause.] We talked over the matter, we three, the Speaker, Senator JAMES and myself; and after they had thought over the matter very carefully and deliberately they said, in substance: Here is a man who is a self-admitted corruptionist, who has brought in the name of an ex-member of that committee, who almost certainly had not been the tool of this self-admitted corruptionist; but if Warner is brought before the bar of the House, the other man, innocent though he may be, must have his name divulged to the public; and the rest of his life would have to be spent at least under the odium of having been charged with having received a bribe. Therefore the matter was not brought before the House. I could see the injury that would be done this innocent man, and if his name were brought here in a scandal of that kind he would never outlive it. For that reason, as I said, the matter was not brought before the bar of the House. But of Mr. Warner I will say a little more later.

Mr. MOORE. Mr. Speaker, will the gentleman yield?

Mr. JOHNSON of Kentucky. Yes.

Mr. MOORE. So far the gentleman has indicated that the Member of the House who was referred to in this conversation was an ex-member of the District Committee. The gentleman has not indicated whether he is at present a Member of the House.

Mr. JOHNSON of Kentucky. I purposely said no more than I did, because I did not believe the process of elimination should be begun.

Mr. MOORE. The gentleman does not indicate whether he is now a Member of the House?

Mr. JOHNSON of Kentucky. I shall decline to go into the process of elimination further than to say that he is not now a Member of the House.

Mr. Speaker, the meeting called by Mr. Warner was held at the New Willard Hotel at 4 o'clock on Thursday last. Those who answered the call of Mr. Warner after gathering there were induced to drop the particular purpose for which the meeting was called, because they knew that it was an absolute impossibility to prevail upon this House to remove me as chairman of that committee. But they took up another feature of District matters. That other feature was, as they say, the repeal of the half-and-half principle; and their only claim that there was then actively going on a movement to repeal the half-and-half principle which they sought to defeat, is another measure, a measure which, I say, no man, except he be a single taxer, can oppose. The matter to which I refer is the amendment, written principally by me, which was adopted in the District Committee to what is known as the George bill. The District Committee struck out section 2 of the George bill and inserted in lieu thereof the following; and, since there is a systemized plan of misrepresentation upon the part of the press going on here, I will be very glad if those who are present will listen and ascertain for themselves just exactly what that amendment is. It reads as follows:

"SEC. 2. That, for the purpose of establishing a uniform rate of taxation in the District of Columbia, there is hereby levied upon the aforesaid real estate an annual tax equal in rate to that rate which is now or which hereafter may be imposed by Congress upon taxable personal property in the District of Columbia; and, further, the same rate of taxation is hereby levied upon all intangible property in the District of Columbia which would be taxable under existing law were it tangible personal property, including moneys, credits, shares of stocks, bonds, annuities, and all other evidences of indebtedness.

"Nothing herein shall be so construed as to impose a tax upon any bonds of the United States or of the District of Columbia. Neither shall a tax be imposed upon shares of the capital stock in any corpora-

tion which corporation pays to the District of Columbia the tax herein provided for upon all the property represented by its capital stock, or which pays tax on its gross income; and all persons, firms, and corporations shall be allowed to deduct from the total amount of their moneys, credits, stocks, annuities, and evidences of indebtedness any bona fide debt made or created for actual value received.

"Every parsonage and every rectory owned by a religious congregation or organization and used by its pastor, preacher, minister, or rabbi as a residence is hereby made exempt from taxation in the District of Columbia."

The local newspapers have heralded, notwithstanding they were assembled for the purpose of undertaking to remove me as chairman of the District Committee, the statement that their meeting was really for the purpose of seeing that the 40,000 humble homes in the District of Columbia should not be excessively taxed. The question arises: What was the real interest of those who assembled there? Their real interest can best be ascertained by giving the names and the occupations of the 100 men who were appointed as a committee to see that justice, in the way of taxation, be done to the District of Columbia. I have here a list of that 100 men. I have looked through the city directory and opposite their names I have put their respective occupations as shown by the city directory. Where the city directory gives no occupation I have supplied it from the best occupation I could get. The list is as follows:

Byron S. Adams, publisher; Elijah S. Alford, jr.; Frank E. Altemus, grocer; Col. George A. Arms, retired Army officer.

Dr. Alexander Graham Bell, physician; Connecticut Avenue; Mrs. W. D. Bigelow; Gist Blair, lawyer, Union Trust Building; Thomas Bradley, lawyer and real estate; A. A. Birney, lawyer; Warren W. Biggs, president Biggs Heating Co.; Sidney I. Bessellevre, consulting naval architect and secretary Citizens' Savings Bank; Lester A. Barr, real estate agent; Alexander Britton, lawyer; Aldis B. Browne, lawyer; Charles S. Bundy, judge municipal court; William J. Boardman; H. Marion Butler, Bureau of Corporations; Thomas W. Buckey, broker; Chapin Brown, lawyer (real estate practice a specialty); L. E. Breuninger, real estate dealer; Ralph Barnard, lawyer; Mrs. R. V. Belt; F. W. Bolgiano, dealer in seeds; C. J. Bell, president American Surety & Trust Co.; Miss Mabel Boardman; R. B. Behrend, lawyer; Southwick C. Briggs, real estate dealer.

Charles J. Cassidy, president Cassidy Co., contractors; J. Doyle Carmody, lawyer; S. W. Curriden, lawyer; Ashton G. Clapham, president Commercial National Bank; William A. H. Church, lumber dealer, chairman of board, the Commercial National Bank; Wade H. Cooper, president United States Savings Bank; John I. Costello, lawyer; Frank B. Crosthwaite, lawyer; George S. Cooper, architect; W. V. Cox, president Second National Bank; Myer Cohen, lawyer; Murray A. Cobb, of Story & Cobb, real estate loans and insurance; William McK. Clayton, lawyer; George H. Chandlee, patent attorney; D. J. Callahan, general manager Norfolk & Washington Steamboat Co.; C. I. Corby, baker; Charles H. Cragin, lawyer; John G. Capers, lawyer; William G. Carter, commission merchant; Levi Cooke, lawyer; Edwin Callow, speculative agent; Joseph H. Cranford, president and treasurer Cranford Paving Co.

H. Bradley Davidson, president Real Estate Trust Co.; John Dolph, superintendent Metropolitan Life Insurance Co. of New York; Carl Droop, vice president Edward F. Droop & Sons, musical instruments; Col. Edward Parker Dean; Mrs Henry Dimmock; Floyd E. Davis, real estate dealer; Jules A. Demonet, president "Demonet's," wine merchants; P. A. Drury, president Abner-Drury Brewing Co.; H. Rozier Dulany, real estate, loans, and insurance; Charles A. Douglas, lawyer; J. J. Darlington, lawyer.

John Joy Edson, president Washington Loan & Trust Co.; George W. Easterday, real estate, loans, insurance; William John Eynon, publisher; William Corcoran Eustis, capitalist.

Frederick A. Fenning, lawyer; Mrs. Duncan U. Fletcher, wife of United States Senator; Albert F. Fox, real estate broker; Edmund K. Fox, real estate broker; John W. Foster, lawyer; Daniel Fraser; J. W. Frizzell; Creed M. Fulton, lawyer; Roe Fulkerson, optician.

George H. Gall, journalist; H. T. Galloway, Assistant Secretary, Department of Agriculture; William T. Galliher, president W. T. Galliher & Co., lumber dealers; Isaac Gans, manager Saks & Co., merchants; Paul G. Garber, oriental rugs; Frank E. Gibson, physician; Charles C. Glover, president Riggs National Bank; Robert A. Golden; Edwin C. Graham, president National Electrical Supply Co.; G. H. Grosvenor, editor; William F. Gude, president Chamber of Commerce; Prof. J. H. Gore.

Charles B. Hanford, actor; Randall H. Hagner, real estate, loans, and insurance; D. Percy Hickling, physician; William D. Hoover, president National Savings & Trust Co.; Frank J. Hogan, lawyer; Samuel J. Henry, vice president and treasurer United States Trust Co.; Samuel B. Hege, passenger agent Baltimore & Ohio Railroad Co.; Thilman Hendricks, manager central eastern department Manhattan Life Insurance Co.; Robert N. Harper, president District National Bank; Thomas S Hopkins, lawyer; W. B. Hibbs, banker and broker; J. Phillip Herrman, furniture dealer; Chr. Heurich, brewer; Mrs. Archibald Hopkins; Percival Hall, liveryman.

Guy H. Johnson, lawyer; Bernar T. Janney, principal of school.

J. Miller Kenyon, president Sloan & Co., auctioneers; Lewis Kann, importer and retailer dry goods, etc.; William J Kehoe, capitalist; Rudolph Kauffman, managing editor Evening Star; Gen. G. C. Kniffin; D. J. Kauffman, merchant; A. M. Keppel; Clarence P. King, president Washington Railway & Electric Co.

John B. Larner, lawyer; Wilton J. Lambert, lawyer; C. A. Langley, contractor; M. A. Leese, wholesale and manufacturing optician; A. E. L. Leckie, lawyer; Charles C. Lancaster, lawyer; Benjamin F. Leighton, lawyer; Miss Constance Leupp; Norton M. Little; Colin H. Livingstone, vice president American National Bank; William A. Leetch, manager the Consolidation Coal Co.; A. Lisner, proprietor Palais Royal; L. D. Latimer, president F. H. Smith Co., real estate, loans, and insurance; James B. Lambie, hardware dealer.

H. B. F. McFarland, lawyer; E. B. McLean, capitalist; Archibald M. McLachlan, president McLachlan Co., bankers; John McElroy, editor National Tribune; George W. McLanahan, lawyer; William A. Mearns, banker; P. T. Moran, dealer in feed, etc.; Edward B. Moore, Commissioner of Patents; Edward P. Mertz, manager Orrine Co.; Daniel Murray, Congressional Library; Claude E. Miller, automobile supply dealer; William F. Mattingly, lawyer; Dr. Kelly Miller, professor; Oliver S. Metzerott, lawyer, and treasurer Columbia Theater Co.; Col. Henry May; A. C. Moses, president A. C. Moses Construction Co.; George C. Maynard, musician; Arthur C. Moses; Frank Munsey, president Washington Times; Thomas P. Morgan, jr., assistant manager Mutual Life Insurance Co.; Mrs. Guion Miller; G. T. Marye.

John L. Newbold, president Merchants' Transfer & Storage Co.; Theodore W. Noyes, editor in chief of Evening Star; H. T. Newcomb, lawyer; Clarence F. Norment, president National Bank of Washington; Frank B. Noyes, president Evening Star; Edwin A. Newman, real estate dealer; Edwin H. Neumeyer, broker; John H. Nolan, contractor and builder.

James F. Oyster, merchant; Clarence J. Owens, managing director Southern Commercial Congress.

R. Ross Perry, lawyer; T. H. Pickford, real estate dealer; A. D. Prince, with R. Harris & Co., jewelers; Andrew Parker, vice president Washington Loan & Trust Co.; Col. M. M. Parker, investments; Joseph Paul, real estate dealer; Julius Peyser, lawyer; A. K. Phillips, secretary Potomac Insurance Co.; D. S. Porter, manager Chesapeake & Potomac Telephone Co.; John Poole, president Federal National Bank; James L. Parsons, contractor; C. Pierce, lawyer.

Mrs. A. R. Quaiffe.

William H. Rapley, president National Publishing Co.; Albert M. Read, president Security Storage Co.; William B. Robinson; Dr. Charles W. Richardson, physician; Oscar Ricketts, general agent Equitable Surety Co.; H. L. Rust, real estate, loans, and insurance; William L. Robins, physician, the Rochambeau; Cuno H. Rudolph, ex-commissioner, hardware dealer; Charles Rauscher, caterer and confectioner; Miss Janet E. Richards, lecturer; Maurice D. Rosenberg, president Bank of Commerce; Hugh Reilly, president Hugh Reilly Co., paints, oils, etc.; Howard S. Reeside, vice president American Security & Trust Co.; Arthur E. Randle, president East Washington Heights Traction R. R. Co.; Arthur Ramsay, principal Fairmount Seminary; Mrs. S. C. Richey; Mrs. Wallace Radcliffe.

Joseph I. Saks, importer of fine furs, etc.; Frank T. Sanner; B. F. Saul, real estate, loans, and insurance; George F. Schutt, proprietor Ebbitt House; N. H. Shea, second vice president Federal National Bank; James L. Sherwood, produce dealer; Joseph Strasburger, president Joseph Strasburger Co., fine shoes; William E. Shannon, president Middaugh & Shannon, real estate; James Sharp, president Viava Co., proprietary remedies; Louis P. Shoemaker, real estate, loans, and insurance; Thomas W. Sidwell, president Friends School; Mrs. Thomas W. Sidwell; A. Leftwich Sinclair, lawyer; Henry K. Simpson, insurance; J. Henry Small, florist; Thomas W. Smith, lumber and millwork; Emmons S. Smith, fine pianos; Ellis Spear, lawyer; Orrin G. Staples, capitalist; E. J. Stellwagen, president Union Trust Co.; Joseph M. Stoddard, president Cook & Stoddard, automobiles; Charles P. Stone, president Stone & Fairfax, real estate, loans, etc.; John P. Story, jr., real estate, loans, and insurance; G. W. F. Swartzell, president Swartzell, Rheem & Hensey, real estate; Mrs. L. B. Swormstedt.

Edward H. Thomas, lawyer; Galen L. Taft, real estate dealer; Corcoran Thom, vice president American Security & Trust Co.; Leon Tobriner, lawyer; George Truesdell, real estate dealer; Robert R. Tuttle, president Commercial Fire Insurance Co.; Lewis M. Thayer, printer; Dr. W. H. Tunnell; Evans H. Tucker, real estate dealer; J. Selwyn Tait, president Washington & Southern Bank.

Bates Warren, lawyer; Somerset E. Waters, wine and liquor dealer; Harry Wardman, builder and contractor; Brainard H. Warner, capitalist; Oscar W. White, real estate, loans, and insurance; George W. White, president National Metropolitan Bank; John L. Weaver, real estate, loans, and insurance; J. I. Weller, real estate and insurance; M. I. Weller, president East Washington Savings Bank; Richard B. Watrous, secretary American Civic Association; John F. Wilkins; Edward O. Whitford, president National City Dairy Co.; Court F. Wood, principal Wood's Commercial School; Alexander Wolf, lawyer; Simon Wolf, lawyer and insurance; S. W. Woodward, president Woodward & Lothrop; William C. Woodward, health officer District of Columbia; M. A. Winter, president Winter Medicine Co.; George Y. Worthington, real estate, loans, and insurance; Henry K. Willard, real estate dealer; J. Lee Whitmore, Berry & Whitmore, jewelers; A. Coulter Wells, lawyer; Henry L. West, editor; W. R. Van Wickle, president F. G. Smith Piano Co.

Aquilla Yeakle, real estate, loans, and insurance; John W. Yerkes, lawyer, B. & O. R. R. Co.

There is one thing to which I wish to invite your attention now, and it is that that list is made up mostly of men who are themselves the owners of and trustees for others who own the stocks, bonds, and other securities that my amendment proposes to tax. [Applause.] Not one of them is the occupant of a humble home, for whose benefit they now pretend this assembly was held. Another feature that presents itself is this: That on that list there are men who have become professional jurymen here, to rob Uncle Sam every time a piece of property is to be condemned for public use. [Applause.] They would now like to hold it out that it was a meeting of those who own these 40,000 humble homes, and yet that meeting was in the "Red Room" of the Willard Hotel at the hour of 4 o'clock. That hour no doubt (?) was selected for the convenience of the owners of these 40,000 humble homes because, perhaps, they had been there that day to luncheon; and, smoking their Habana cigars, were loafing about there; and 4 o'clock would be a suitable hour for them. [Laughter.] Now, these 40,000 owners of humble homes assemble (?) there, and they take their luncheons there every day and, perhaps, their dinners, too. But last Saturday, day before yesterday, they held another meeting in the interest of these 40,000 humble homes; never for an instant, of course, turning their minds to the proposition that bonds and stocks and promissory notes and credits might not be taxed. Oh, no!

They printed a special bill of fare down at the Willard Hotel that day for the owners of those 40,000 humble homes, and down in the corner it is dated "Saturday, March 7, 1914," the same day of the meeting. Now, when a poor man goes there hungry, with all these things on the bill of fare that he may not have at his everyday meal at home, the supposition is that he

ordered them on this occasion. Now, to start with, we will take it that he ordered "caviar" on this bill of fare. That is quoted at $2. [Laughter.] The next thing on the list that these owners of humble homes would order served would be "seatags," at 40 cents. The next would be a portion of celery, which is on this bill of fare and priced at 60 cents. Then, if that poor man wanted some salted almonds, they are put down on the bill of fare at 25 cents. Then comes a plate of soup; and, taking the bill of fare, we find green-turtle soup is quoted at $1 a plate. Then comes planked shad roe, or, in other words, fish eggs, and that item is put down on the bill at $3.50 a portion. Then comes a broiled celery-fed duckling, and one of these owners of the humble homes must pay for that $3. Then, of course, he would want potatoes, and a portion of potatoes on this bill of fare is quoted at only 45 cents. Then, of course, he would take a little asparagus, which on this bill of fare is quoted at $2.25 a portion. Then peas are down at 40 cents a portion. Then beans are down at 45 cents a portion. Then comes a salad, and alligator pear salad is quoted at $1. A slice of hot gingerbread is quoted at 30 cents. That would go very nicely with ice cream, and that is quoted at 30 cents. Then a small piece of cheese, which is quoted at 30 cents; hothouse grapes, $1.50. They finally come to a portion of extra prepared coffee, quoted on this bill of fare at 50 cents. Now, those are the people who were down there upon that occasion, and these items which I have just enumerated all come to $18.10. [Applause.]

Where two prices are opposite an article of food the smaller price is for a "half" portion only, and the larger price is for a whole portion. I suppose the whole portion is for men, and the half portion for children.

The bill of fare in full is as follows:

THE NEW WILLARD.

WASHINGTON.

*Luncheon.*

Buffet russe: Lobster cocktail, 85 cents; Beluga caviar, $2; crabflake cocktail, 60 cents.

Oysters (oysters received daily by express from Cape Cod, Sayville, and Lynnhaven Bay, guaranteed by certificates issued by boards of health of those districts): Blue points, 30 cents; Seatags, 40 cents; Lynnhavens, 35 cents; Cape Cods, 35 cents.

Clams: Little necks, 30 cents; Cherrystones, 35 cents.

Relishes: Radishes, 25 cents; celery, 35 cents and 60 cents; salted almonds, 25 cents; olives, 25 cents.

Soups: Beef broth, a l'Anglaise, 30 cents and 50 cents; consomme celestine, 30 cents and 50 cents; chicken okra, 40 cents and 70 cents; clear green turtle, 60 cents and $1.

Fish: Broiled bluefish, 50 cents and 85 cents; scallops, fried, with bacon, 50 cents and 85 cents; filet of sole, Tartare sauce, 45 cents and 75 cents; smelts, split and broiled, 50 cents and 85 cents; halibut steak, maitre d'hotel, 50 cents and 85 cents; pompano, grille, 50 cents and 85 cents; planked Florida roe shad, half $1.75, whole $3.50; Chesapeake diamond-back terrapin, $3.25; English sole, $1.25; oyster crabs, $1.25.

Entrées: Ragout of lamb, Parisienne, 40 cents and 70 cents; stewed duckling, with olives, 65 cents and $1; pork chops, with fried apples, 40 cents and 75 cents; frog legs sauté, meunière, 80 cents and $1.50; chicken croquettes, with green peas, 40 cents and 75 cents; oysters, a l'Ancienne, 40 cents and 70 cents; fried oyster crabs, en croustade, 75 cents and $1.25; eggs, Bercy, 50 cents; broiled fresh mushrooms, $1.25.

Roast: Lamb, mint sauce, 60 cents and $1; ribs of beef, per cut, 50 cents; chicken, stuffed, $1 and $2; broiled squab chicken, 75 cents and $1.50; broiled chicken, $1 and $2; broiled spring turkey, $2 and $4; squab chicken, a la Dixie, $2; broiled Guinea chicken, $1 and $2; squab, broiled or roasted, $1; broiled celery-fed duckling, half $1.50, whole $3.

Cold: Crab ravigotte, 60 cents and $1; chicken, $1 and $2; lamb, mint jelly, 60 cents and $1; lobster, plain, $1.50; lobster, New Willard, $1.50.

Vegetables: Potatoes, Ortiz, 25 cents and 40 cents; French artichoke, 60 cents; hothouse asparagus, $1.25 and $2.25; fresh California asparagus, $1.25 and $2.25; spinach, 35 cents and 60 cents; Brussels sprouts, 40 cents and 75 cents; cauliflower, 40 cents and 60 cents; celery, braise, 60 cents; new peas, 45 cents and 80 cents; new string beans, 45 cents and 80 cents; Bermuda potatoes, 25 cents and 40 cents; beets, 30 cents and 50 cents.

Salads: Endive, 40 cents and 75 cents; chiffonade, 50 cents and 75 cents; alligator pear, 60 cents and $1; hearts of Romaine, Russian dressing, 40 cents and 70 cents; hothouse tomato, 40 cents and 70 cents; bijou, 45 cents and 75 cents; fetticus, 35 cents and 60 cents; cucumber, 35 cents and 60 cents; escarole, 30 cents and 50 cents; chicory, 30 cents and 50 cents.

Pastry and desserts: Cherry pie, 25 cents; cocoanut custard pie, 25 cents; hot gingerbread, 30 cents; mince pie, 30 cents; Rhine wine jelly, 20 cents; French pastry, 15 cents; assorted eclairs, 25 cents.

Ice cream and ices: Chocolate, pistache, vanilla, coffee, fresh strawberry, 30 cents; orange and raspberry ice, 30 cents; maple mousse, 40 cents.

Cheese: Roquefort, 20 cents and 30 cents; Gorgonzola, 20 cents and 30 cents; Camembert, 20 cents and 30 cents; Neufchatel, 25 cents; Edam, 30 cents; cream, 15 cents and 25 cents; Swiss, 15 cents and 25 cents; imperial, 30 cents; American, 15 cents and 25 cents.

Fruits: Fresh strawberries, 60 cents and $1; hothouse grapes, $1.50; coupe Florida, 75 cents; Malaga grapes, 40 cents and 60 cents; king oranges, 15 cents and 30 cents; grapefruit, supreme, 75 cents; South African peaches, 50 cents and 80 cents; South African plums, 50 cents and 80 cents; mixed nuts and raisins, 25 cents and 40 cents.

Demitasse, 15 cents; special coffee, 20 cents, pot 50 cents; café Turc, 20 cents; café Diable, per cup 50 cents.

Half portions served to one person only.

SATURDAY, *March 7, 1914.*

Mr. Speaker, in the Washington Times of March 7, 1914, which was day before yesterday, when that cheap bill of fare was gotten up for the owners of these 40,000 humble homes, there appeared in the Washington Times a cartoon which I have here before me. That cartoon represents the District of Columbia as a large man dressed in colonial style "winking his other eye," and opposite him are some roughly drawn things which might be taken for human beings, and they are topped off with blockheads. One of these blockheads is a Member of the House of Representatives District Committee from Iowa. [Laughter.] In that they refer to Judge PROUTY, of Iowa. The next blockhead is the chairman of the District Committee [laughter], which is myself. Then, down the row we have eight other blockheads. Those blockheads are the other eight members of the committee who stood up like men and said, "Yes; we will cast our vote in favor of taxing stocks and bonds in this community, and not permit the burden of that tax to fall upon our constituents at home." [Applause.] And who are those other eight? This newspaper does not do them the honor to name them, but they are Messrs. O'LEARY, REED, THOMPSON, CLAYPOOL, CARY, CARAWAY, MAPES, and HART. The other two, making 10 members, are Judge PROUTY and myself. The heads of them all are pictured as "square." But, gentlemen, there is another thing in connection with this cartoon which the casual observer might overlook. Down at the bottom of it is printed this:

The man representing the District of Columbia and "winking his other eye" is looking over this array of blockheads and saying: "It is very evident they are not owners of District property." Thank God, I am put in that class as not being an owner of District property, and voting half the tax upon my constituents.

Mr. MOORE. Mr. Speaker——

The SPEAKER. Does the gentleman from Kentucky yield to the gentleman from Pennsylvania?

Mr. JOHNSON of Kentucky. I yield.

Mr. MOORE. Before the gentleman quits the meeting at the Hotel Willard, where these high prices prevail, will he tell us who the speakers were at that meeting at 4 o'clock in the afternoon?

Mr. JOHNSON of Kentucky. I only know from the papers, as I was not there. [Laughter.] I do not own one of these "humble (?) homes."

Mr. MOORE. Was not one of the most distinguished Democrats of the Nation, and one who hails from Kentucky, a leading speaker that afternoon?

Mr. JOHNSON of Kentucky. The papers say that ex-Senator J. C. S. Blackburn was one of the speakers.

Mr. MOORE. Is it not a fact that since the Democratic Party came into power there have been more Democrats dining at the Hotel Willard, many of them Members of Congress, than there ever were before in the history of the Nation? [Laughter.]

Mr. JOHNSON of Kentucky. I will answer the gentleman very frankly by saying I do not know. I do not frequent the Willard Hotel. My pocketbook will not stand it, as I do not own property here.

Mr. HEFLIN. If my friend from Pennsylvania [Mr. MOORE] will allow me for a moment, the reason for that is that since the Underwood bill passed and reduced the tariff tax it has enabled the Democrats to pay a little more for their food.

Mr. MOORE. Will the gentleman yield to me further?

The SPEAKER. To whom does the gentleman yield?

Mr. JOHNSON of Kentucky. I yield to the gentleman from Pennsylvania [Mr. MOORE].

Mr. MOORE. Is it not true that the prices have actually gone up at the Hotel Willard, even as high as they were last year, since the Democratic Party came into power?

Mr. JOHNSON of Kentucky. That may be; but, I take it, they were reduced on this particular day for the 40,000 humble home owners. [Laughter.]

Mr. MOORE. Does the gentleman know of his own knowledge that the distinguished gentleman from Alabama [Mr. HEFLIN], whose eloquence we frequently hear on this floor, and which we all admire, is one of those who occasionally drops into the Willard Hotel and partakes of one of these dollar-and-a-half luncheons that have been described by the gentleman from Kentucky?

Mr. JOHNSON of Kentucky. I imagine that he might be able to buy a dollar-and-a-half luncheon, but I do not suspect him of being one of those poor property owners that can pay $18.10 for a luncheon.

Mr. MOORE. He does not belong to the laboring class that works in the mill district of Kensington, but after hearing his speech the other day I imagine he lives on a farm in Alabama.

Mr. HEFLIN. I suggest that if the gentleman from Pennsylvania [Mr. MOORE] would go down to Alabama and go to work on a farm he would be helped very materially.

Mr. JOHNSON of Kentucky. Now, Mr. Speaker, this article which stated that this meeting was to remove me from the chairmanship of the District Committee appeared in the Washington Herald. That paper has had many ups and downs, so the local people say. I know absolutely nothing about it myself, and I care less. But one hears it rumored around that this paper is kept for saying things that the other papers do not want to say. To say that it is a "kept" paper may not be wrong. The main part of the vilification, particularly of me, that comes out of the Washington Herald is written by a little fellow, about 4 feet high, who calls himself Joseph P. Annin. In order that he may avoid opportunity for criticism I imagine that he has purposely dropped the last three letters of what his name ought to be, those three letters being "l-a-s." [Laughter.]

He does not concern me any more than his newspaper does. He reminds one very noticeably of a cock snowbird in pin feather. He goes about everywhere, an active little fellow, even while the snow is on the ground. There is no danger from that. However, it might be that somebody, through accident, would spit on him and drown him.

Mr. MOORE. I hesitate to interrupt the gentleman again——

The SPEAKER. Does the gentleman from Kentucky yield to the gentleman from Pennsylvania?

Mr. JOHNSON of Kentucky. I do.

Mr. MOORE. I want to say to the gentleman from Kentucky [Mr. JOHNSON] that the young man to whom he now refers is present in the gallery, can be seen by everybody, and is listening to what the gentleman says. That statement is fair to the gentleman from Kentucky.

Mr. CARAWAY. Let him stand up.

Mr. JOHNSON of Kentucky. I do not care whether he is present or not. I rather he would be.

Mr. MOORE. I know the gentleman is ready to speak in the presence of a man whom he denounces, and——

The SPEAKER. The House has no power to make a member of the press gallery stand up. [Laughter.]

Mr. JOHNSON of Kentucky. But, Mr. Speaker, there are many places where, if he were present, all that would be done is that somebody would go to the chimney corner, pick up a shovel, reach into the fireplace and get some ashes and sprinkle them on him, and then run the shovel in under him and pitch him out of the back window, burn a little sugar in the room, and the whole matter would be over. [Laughter.]

Let me return to Mr. Warner. This is not the first meeting of a "committee of one hundred" that Mr. Warner is said to have inaugurated. Some time ago I introduced a bill requiring the real consideration to be recited in all deeds of conveyance. The first man who raised himself against that bill was Brainard H. Warner. But I believe if there is any man in the District of Columbia who ought to rise and protest against the passage of the real-consideration bill, that man is Mr. Warner.

The real-consideration bill has for one of its purposes the prevention of fraud in the transfer of real property in the District of Columbia. The practice here is—and Mr. Warner himself has indulged in it—that when the owner of property goes to a real estate agent to have it sold he makes to somebody in the real estate office a deed of conveyance. The usual consideration recited is $10. Then when the real estate agent, whoever he may be, finds a purchaser for it this straw man, or this clerk or somebody in the office of the real estate man, makes a deed to the purchaser. The seller never knows what he gets; and only the purchaser and the real estate agent know what he was paid.

In the law reports in appeal cases, District of Columbia (vol. 11, p. 149) we find the case of Patten against Warner. The court, in rendering its opinion, recites the main facts, which are, in substance, as follows: That there were four sisters who were the owners of a piece of property on F Street. One of these sisters was married and the other three were not getting along with her any too well. In fact, I believe they did not speak. The unmarried sisters sought to purchase the interest of the married sister. They went to a reputable attorney by the name of Davis. His first name is Henry. I forget his middle initial. Mr. Davis told them he was not in the real estate business, but advised them that he would see a real estate agent for them. Mr. Davis then went to Mr. Brainard H. Warner. Mr. Warner set about to purchase the interest of the married sister. By and by he reported, through Mr. Davis, to the unmarried sisters that they could purchase the interest for $13,000. They paid the $13,000, and a deed was made to them. After a while those of the sisters who were unmarried and the one who was married became reconciled; and after their reconciliation it was disclosed that the married sister, Mrs. Glover, sold her interest in the property for $9,000, but that Mr. Warner collected $13,000 from the unmarried sisters on account of the sale.

It is but fair to say that the opinion rendered by the court was in favor of Mr. Warner, but only upon a technical ground, which is well set out in the syllabus of the case, which I will read:

"The mere reposing of confidence does not create a trust cognizable in equity or convert into a trustee the person in whom confidence has been reposed; but the assent, express or implied, of the person sought to be placed in such fiduciary relation, or where a trust has been devolved in consequence of privity of estate, or for any other reason, the assent of the person from whom such trust has been derived, must be shown in order to charge such person as trustee."

Upon that technicality the opinion was rendered in behalf of Mr. Warner.

Mr. FOWLER. Mr. Speaker, will the gentleman yield?

The SPEAKER. Does the gentleman from Kentucky yield to the gentleman from Illinois?

Mr. JOHNSON of Kentucky. Yes.

Mr. FOWLER. I would be glad if in that connection the gentleman will state whether he, Mr. Warner, collected a fee from the unmarried sisters for his services?

Mr. JOHNSON of Kentucky. I can not say as to that, because I have no knowledge on the subject of my own, and the opinion does not say.

Now, gentlemen, the Washington Herald a few days ago started a movement that all of the Members of Congress were to be "seen." In that step, however, it honors me and the gentleman from Iowa [Mr. PROUTY] by saying that it is not necessary to see either me or him, and that even a postage stamp need not be wasted on either him or me. I feel especially complimented by that.

But, last Saturday afternoon at 5 o'clock, this committee of one hundred met down at the Willard Hotel in pursuance to their previous appointment, not, of course (?) to see that stocks and bonds continued to escape taxation here, but that the homes of these 40,000 humble people might not be overtaxed. There the program was to call the roll, and as it was called each and every man on that committee of one hundred was asked to respond to his name and rise to his feet, and then to call the names of those in Congress with whom he was on such terms that he could take up this subject with them and prevail upon them to vote—not, (?) mind you, to let the stocks and bonds escape taxation, but that the homes of these humble people might not be overtaxed.

When they got to that feature of it one gentleman got up in the meeting and said, "Now, that arrangement is all right, but let us not use the words 'to be seen.'" He said, "You know, in the parlance of the day, that carries with it quite a significant meaning." And he said, "We must see them, but let us, at least out in public, avoid the use of the expression that they are to be 'seen.'"

Now, here is a movement that Members are to be "seen," but by whom are they to be seen? By the people who send them here? No; but by these philanthropic(?) fellows who care nothing about the taxation on stocks and bonds, but who do not want the homes of these humble people overtaxed.

I am not to be "seen," so the Washington Herald says; Judge PROUTY is not to be "seen," so the Herald says; and I hope none of you are willing to be "seen."

But, reverting just here to the cartoon of "blockheads" who do not own property in the District of Columbia, and referring to some statements made here the other day to the effect that owning property did not change anybody's views, let us see what the Washington Post thinks about it. This article appeared in the Washington Post:

"The drift of the well-to-do and influential toward this city could take no better turn than we see in the increasing number of congressional homes. Once they become interested, it is noticed that Members undergo a change of heart that bodes no ill for the municipality. Naturally they come to see that Washington really needs all that Washington people are asking for. Already we owe much to the efforts of Senators and Representatives who have made permanent investments here, and conceivably the good offices of many others would be quickened if proper influences were brought to accelerate the movement from the "deestrict" to the District."

[Laughter and applause.]

You all heard the statement made the other day that just a few trifling dollars paid for a lot upon which it was contemplated to build a home certainly would not influence a Member in his vote; but it developed that instead of being a lot upon which to erect a humble home, which never has been erected, there are nine lots charged up on the assessor's books, and those nine lots are assessed at the insignificant sum of $99,485, and the tax is $995.46.

Now, what does this cartoon in the Washington Times mean, that the 10 men upon the District Committee who voted to tax stocks and bonds did not own any real estate here? Down at the meeting the other day Mr. Warner insisted upon being 1 of 10 of an executive committee when he arose and said that the principal argument for his being put upon that executive committee was that he was one of the original committee of one hundred who had "seen" the Members of Congress when the half-and-half bill was adopted in 1878.

By the way, I was about to forget to give you the names of some of the poor who paid no taxes, or at least who should not be overtaxed in the District of Columbia, and if I can lay my hand on it quickly, I will give it to you. I find from court records that the Mary Leiter Curzon estate has $1,500,000 in stocks and bonds in the District of Columbia that are not taxed; and, because they are not taxed, a greater burden is imposed thereby upon the owner of a humble home—not only here, but that tax must be put upon the back of every constituent of every Member of this House.

The Blanchard estate has more than $700,000 in the District of Columbia in untaxed securities, and not one farthing of tax is imposed upon it.

The Clapp estate has more than $1,000,000 in securities which bear no tax. It has, however, some real estate, upon which it pays a tax of $1,295.

Then we have the Eugene Peters estate of $600,000; but that is taxed. He has the furniture stored down here in a warehouse, and that bears a tax of $27 a year. The rest of the $600,000 escapes taxation.

The Richardson estate has $150,000 in securities which pay no tax in the District of Columbia, but that estate does pay $30.98 in taxes on a piece of realty.

I, for one, shall not return to the people who sent me here and tell them that I have been "seen"; and in consequence, have voted to let these millions of dollars of securities escape taxation in order that a greater burden may be placed upon the backs of every man, woman, and child in Kentucky. That is the situation in the congressional district of every Member here. Because of this condition my State is bearing her proportionate part of this gift to the District of Columbia and is paying out $156,000 a year.

Mr. DIES. Will the gentleman yield for a question?

The SPEAKER. Does the gentleman from Kentucky yield to the gentleman from Texas?

Mr. JOHNSON of Kentucky. I do.

Mr. DIES. I should like to ask the gentleman from Kentucky if property of the character which he is just now describing—stocks and bonds—is generally taxed outside of the District of Columbia?

Mr. JOHNSON of Kentucky. The other day in committee I made the statement that this character of property is taxed in my State, and that I did not know of a State where it was not taxed. A gentleman arose in the committee and said that there are several States in the United States which do not have a tax upon securities of this kind.

Now, gentlemen, all this to-do has come up because of the George bill. The prominent features of the George bill are that there shall be "annual" assessments of real estate. The assessments are now made only every three years. Another part of the George bill provides that these annual assessments shall be made at full value instead of at two-thirds value, as now. It also provides for an increase of the salary of the assessor, and it creates nine new offices.

Another prominent feature of the George bill is that it provides for a flexible rate of taxation as to real estate, that rate to be fixed by the commissioners. To that I for one, at least, object. The George bill leaves standing the tax rate of $1.50 a hundred on tangible personal property, with a flexible rate to be fixed by the commissioners on real estate. Already there is a discrimination in the rate of taxation against personal property and in favor of real estate in the District of Columbia. Tangible personal property is taxed at the rate of $1.50 a hundred, full value, while real estate is taxed at $1.50 on two-thirds value, which makes it $1 a hundred on its real value. I have never been able to see, and I can not see now why the man who moves his taxable goods and chattels into a rented house should pay $1.50 tax upon them, while the owner of the house, the landlord, should be relieved of one-third of his taxation on the house.

They say that the commissioners should fix this rate. One of the commissioners is Mr. Siddons. He made a speech the other night at Georgetown, and in that speech he said this:

"Therefore as an essential part of the plan for the assessment of property at its true value is the further requirement of a fluctuating tax rate. If this were not a part of the proposed law the commissioners would not favor at this time a change in the present practice of valuing real property at two-thirds of its real value."

Now, if you are to let the commissioners fix the rate, you must bear in mind that we have before us the admission of one of the commissioners that he would not be in favor of permitting the present rate to be changed unless it was permissible by the act for real estate still to be taxed less than tangible personal property. Should we, therefore, put in the hands of this or any other set of Commissioners of the District of Columbia the right to fix the rate of taxation here upon real property, when it is announced in advance that they do not wish to advance above the two-thirds rate of taxation on real estate?

The fundamental principle from the beginning of civilization until now is that taxation must be "uniform"; yet in the Nation's Capital we have the little personal effects of a man taxed at the rate of $1.50 a hundred and the real estate of his landlord taxed at $1 a hundred. I am in favor of "uniformity" of rate upon taxable property, and there is no man of any consequence in the District of Columbia who has yet been brought face to face with that proposition who has had the temerity to say that any other system should prevail.

Not a great while ago Mr. Louis P. Shoemaker, one of the wealthy men of the District of Columbia and a large real estate owner, made a speech at Brightwood, and almost the first sentence of his speech contained the broad and equitable declaration that the rate of taxation should be "uniform."

Dr. Wiley, in opening this meeting at the Willard Hotel the other day, declared that taxation should be "uniform." The Washington Star last Saturday laid down the declaration that taxation in the District should be "uniform" as to all classes of property. And yet every mother's son of them is fighting to-day to prevent "uniformity" in rate of taxation.

Many people here have arrayed themselves in such a forcible way that they have at least put in jeopardy the passage of an amendment which strives at a system to obtain "uniform" taxation, and also to tax stocks and bonds and other intangible personal property. I take off my hat to them; they have arrayed against that proposition men whose philosophy is exactly opposed to them. In other words, they are playing "both ends against the middle" of these two conflicting propositions.

I see before me the gentleman from Missouri [Mr. RUCKER], who, when this question was up in 1902, made a great argument in favor of the proposition for which I now stand. His then colleague, the lamented De Armond, made one of the best speeches on that subject that ever was made in this Hall, and one which will go down in history as a sound economic proposition. I am glad to say that our distinguished colleague the gentleman from New York [Mr. PAYNE] lent aid to them in that fight.

Now, let us talk a little about the history of this proposition. You all know, and the country knows, that these people here hold sacred, above the right of amendment or interference, what they call the "organic act." That act contains the half-and-half proposition. But let me invite your attention to one thing, that in the very clause of that act—June 11, 1878—which establishes the half-and-half principle follows a proviso, and that proviso is one of limitation, which says the half-and-half shall prevail, provided the rate of taxation therein fixed is maintained.

The SPEAKER. The time of the gentleman from Kentucky has expired.

Mr. DIES. Mr. Speaker, I ask unanimous consent that the gentleman be allowed to conclude his remarks.

The SPEAKER. The gentleman from Texas asks unanimous consent that the gentleman from Kentucky may be allowed to conclude his remarks. Is there objection?

Mr. MANN. Reserving the right to object, I would like to ask the gentleman from Kentucky how much time he expects to use?

Mr. JOHNSON of Kentucky. I have already spoken longer than I intended, but I would be glad to have half an hour more.

Mr. MANN. If the gentleman has a prepared speech——

Mr. JOHNSON of Kentucky. I have not a prepared speech.

Mr. DIES. Mr. Speaker, I ask unanimous consent that the gentleman's time be extended half an hour.

The SPEAKER. Is there objection?

Mr. MANN. Reserving the right to object, and I shall not object to the request, I want to say that I have understood that it was the expectation that the bill now before the House would be recommitted.

Mr. JOHNSON of Kentucky. I will say that I have not been in charge of the bill—a bill to regulate building in the District of Columbia—and have not made a study of it. The subcommittee brought it before the whole committee and the whole

committee reported it out on the subcommittee's report. I have heard it suggested since it came in that some alleged defects have been discovered which were overlooked in the committee, and that probably it would be better to recommit the bill.

Mr. MANN. I only speak of it so that gentlemen interested in the Agricultural bill, which I presume will be taken up next, might have notice that they may be here.

The SPEAKER. It may elucidate the situation a little for the Chair to state that he has been notified that a Member would move to recommit the bill.

Mr. O'LEARY. Mr. Speaker, I am the one who notified the Chair of a motion to recommit, and I am the one that spoke to the gentleman from Illinois about the matter. Such a motion will be made at the conclusion of the speech of the gentleman from Kentucky.

The SPEAKER. Is there objection to the request of the gentleman from Texas that the time of the gentleman from Kentucky be extended half an hour?

There was no objection.

Mr. JOHNSON of Kentucky. The above-mentioned bill is not the one I am now discussing.

Mr. Speaker, I have alluded to the attitude of the Washington Star as to the "uniformity" of taxation. I find a little clipping from that paper which reads as follows:

"What Washington needs is 'uniform' application of the present system to everybody and all kinds of property."

The Washington Star forgets that there is no "uniformity" of taxation in the District of Columbia. When interrupted I was calling attention to the act of 1878, known as the organic act, which made taxation "uniform," and which taxes real estate and personal property of all kinds, including stocks and bonds and other securities.

The organic act of 1878 was not materially interfered with until 1883. That act broke into the organic act of 1878 in the way of annual assessment and made triennial assessments. The next breaking into the organic act was in 1902, by which intangible personal property, stocks and bonds and securities, were relieved from all taxation. At the same time "uniformity" of rate of taxation was destroyed by leaving tangible personal property taxed at $1.50 a hundred and by taxing real estate at $1 a hundred.

Nobody heard a cry from the people who are now raising all this noise for fear the organic act may be interfered with. They sat quietly by and acquiesced in the destruction of a fair assessment by saying that they were willing to accept two-thirds valuation on real estate and three-thirds valuation on tangible personal property. At that time they permitted to escape from taxation great wealth in stocks and bonds and securities of that character in the District of Columbia.

But before that act was passed the Commissioners of the District of Columbia, to which commission you now propose, under the terms of the George bill, to give the right to fix the rate——

Mr. HAMLIN. Will the gentleman yield?

Mr. JOHNSON of Kentucky. Yes.

Mr. HAMLIN. Is it not a fact that tangible personal property is now exempt from taxation to the amount of $1,000?

Mr. JOHNSON of Kentucky. That is correct; tangible personal property to the extent of $1,000 is not taxed.

Mr. HAMLIN. Can the gentleman give any reason for that exemption?

Mr. JOHNSON of Kentucky. No; I do not know certainly the theory on which that was done in 1902.

Mr. LINTHICUM. If the gentleman will pardon me, I will say that in the city of Baltimore we exempt to the amount of $300, and we propose to increase the amount to $500, for the purpose of relieving those people who merely pay a small tax, perhaps, on furniture.

Mr. JOHNSON of Kentucky. I think it a very good rule. In the State of Kentucky we exempt $250 of personal property, if it be on hand; and I will be very glad to see that limit increased.

But as I was endeavoring to say, the tax rate of the organic act was practically destroyed by the act of 1883 and by the act of July 1, 1902, and not one of those people now raising such a fuss lifted a voice in protest against it. Let me tell you how and the circumstances under which the change as to the taxation of real estate was made from $1.50 a hundred to only $1 a hundred. This House went on record emphatically in 1902 in favor of taxing all kinds of personal property. The bill passed the House in that shape. It went over to the Senate. The Senate put on some amendments, and then the bill came back from the Senate amended, and it went to conference, and while the subject had not been brought up either in the House or in the Senate, the conferees brought back to this House a proposition which was adopted, without debate and without a roll call, reducing the rate on real estate one-third.

Mr. Speaker, I just read from a newspaper clipping what Commissioner Siddons said relative to his attitude in taxing real estate. For fear that the question may come up afterwards as to whether or not Mr. Siddons did say that which I have read from his address, I addressed a communication to him, and I have an answer from him now in which he says he was correctly quoted. In addition to that, he was kind enough to send me a copy of his entire speech, which I now have before me, in which is the statement just as the newspapers copied it.

The right of the commissioners to make the rate upon taxable property in the District of Columbia is contended for upon the ground that practically all of the other cities have a body which fixes the rate of taxation other than the legislative body. I do not know whether that is true or not, but that has been urged before the committee; but if that be true, there is a legislative enactment upon the statute books of the State from which I come which fixes a limit of taxation, State, county, and municipal, and if it be true that a commission should be given the right to fix the rate of taxation, then I say that that should not be true here. My reason for that is this, that the commissioners must be appointed from among men who have resided in the District for three years next preceding their appointment. You can not find three men in the District of Columbia prominent enough to be considered as Commissioners of the District who can withstand the pressure that can be brought to bear upon them to fix a rate of taxation that will raise the revenue they need, if it should thereby relieve the United States from contributing to the support of the District. Baltimore and every other city in the country must levy a rate which will pay its operating expenses.

If they fail to levy and collect it, then they will have a deficit; but if this city—or, rather, the District of Columbia—should fail to make a levy sufficient in rate to meet its demands, then what? Then there is but one thing to be done, and that is for the Members here to put their hands into the Treasury of the United States and bring out the remainder of the sum which is needed but which has not been levied. If you will give to Baltimore the same authority which is given to the District of Columbia now, and say to them, "You can levy a rate of tax upon real estate which you think ought to be levied under all the circumstances, but if you levy less than will pay your expenses then the Federal Government will make it good," is there a man here or anywhere else who does not believe that Baltimore, under those circumstances, would make an insufficient levy? Every city in the Nation would do it, and Washington would do likewise. If the United States is to continue to contribute to the maintenance of the District of Columbia, then I say the Congress of the people whose money is taken should hold the right to fix the rate of this levy. No other proposition is equitable. Four hundred and thirty-five Members of Congress can better be trusted with that duty than three men whose selection must come from the immediate vicinity to be affected.

The amendment which I have just read and which has brought so much criticism does everything that the George bill does "and then some." It leaves the George bill stand as it is, except in section 2, and the proposed amendment does not give the commissioners the right to fix this rate of taxation, but keeps it with Congress, where it now is. In addition to that the amendment taxes intangible personal property such as stocks and bonds, and those two propositions are the only questions which arose in committee over this proposed amendment.

Mr. SIMS. Mr. Speaker, will the gentleman yield?

Mr. JOHNSON of Kentucky. Certainly.

Mr. SIMS. If I understood that amendment, it exempts from taxation notes given for real estate in the District of Columbia that have not been paid?

Mr. JOHNSON of Kentucky. There has been always a disposition on the part of the Commissioners of the District of Columbia not to tax any kind of personal property. When they first began to operate under the organic act of June 11, 1878, they were given the right to abolish all offices that they thought should be abolished. They abolished the only piece of machinery which could collect taxes on personal property, and but little tax was collected on personal property for years and years under that act, notwithstanding the fact that the half-and-half plan was conditioned upon and implied the collection of that tax. I just referred to the Peters case, which estate has $600,000 in untaxed securities in the District of Columbia. When the District Commissioners undertook to collect some sort of personal tax in 1901, I believe it was, from that estate, the attorneys for the estate brought suit of injunction to stop the

collection of the tax upon the personal property, and Justice Clabaugh, who died a few days ago, was compelled to grant that injunction upon the ground that the commissioners had abolished the offices of the only men who could collect that tax. However, later commissions have done some better, and they are collecting a tax upon personal property, but they are not—and can not, because they are not permitted by law—collecting tax on intangible personal property such as stocks and bonds.

Mr. SIMS. Mr. Speaker, are there not some instances where there is a very large amount of tangible personal property kept in storage, and does not that entirely escape taxation because they can not investigate who is the owner?

Mr. JOHNSON of Kentucky. I do not know about that, but last Saturday I asked the assessor of the District of Columbia, naming an estate, whether or not he knew there was $60,000,000 of securities belonging to that estate now in the District of Columbia escaping taxation.

He said it was his opinion, but he had no way of getting at it as an absolute certainty, that that amount of securities was stored in the vaults of one of the banks of the District of Columbia.

Mr. SIMS. I had reference to the storage companies for household goods, furniture, and the like of that. If personal property was stored in a storage warehouse, the assessor has not the right to go and demand the names of those who stored it. That is one of the defects of the law, as I understand it.

Mr. JOHNSON of Kentucky. I understand so. Now, the amendment about which all this fuss has been raised proposes to go back to the organic act of 1878. It proposes, in substance, to reenact the taxing clause of the organic act, but those who say that the organic act is too sacred to be interfered with permitted that act to be outraged in 1883 and again in 1902; and now, when a proposition comes up to restore the system of taxation as it has been provided for in the organic act, they are the first people to raise a "holler." It is perfectly excusable for members of this community not to be familiar with the terms of the George bill and the proposed amendment to it, because their newspapers will not give them information. The first section of the George bill provides for an annual assessment of all real estate in the District of Columbia at its true value. That is contained in the George bill in the first two lines, yet here is the Washington Times of February 27, 1914, in double display type, making this statement. In speaking of the Committee on the District of Columbia, it says:

"The committee will also write into the George bill, over the protest of its author, provision that assessments shall be at full value."

That is one of the fundamental principles of the George bill, and the committee has shown no disposition to take it out, and it is still in the bill and, therefore, there is no necessity for the committee to write it into the bill, either with or without the consent of the author. The article further says:

"The result will be"—

If the committee writes that into the bill over the protest of Mr. GEORGE—

"that the District tax bills will raise annually at least $11,000,000 to $12,000,000, and the argument then will be advanced that the District is self-supporting and that further help from the Federal Government is unnecessary."

Are we to infer from that that when the act of 1902 reduced the rate of taxation upon real estate from $1.50 a hundred to $1 a hundred they were seeking to avoid the raising of that $3,000,000 or $4,000,000? If so, then they deliberately sought in 1902 to get through Congress, and they did get it through, a proposition which would destroy the rate of taxation fixed in the organic act of June 11, 1878, in order that they might not reach a point in income where they could pay their own expenses.

I say there has been a studied attempt to misrepresent the George bill as well as the proposed amendment to it. The papers have gone so far as to even undertake to arouse the poor people of the District of Columbia, upon the theory that if you tax stocks and bonds and promissory notes that the rate of taxation must of necessity be increased upon the humble homes. That argument, of course, will not stand the test. It is not worth anybody's while to assert to the poor man that a tax upon property which he has not got, but which other people have, is going to raise his rate of taxation; yet they have undertaken to arouse the poor people of this community with that kind of an argument. The Star said a few days ago that this proposition to tax intangible property was "inquisitorial." Is not the income-tax law "inquisitorial," and ought it not to be? But the Star goes further still and says that the committee amendment which is proposed to tax intangible personal property will induce untold perjury in the District of Columbia. I do not believe that; but I will enter into no argument with the editor of the Star upon that question, because he may know his own people better than I do. [Laughter.]

When the tariff bill was under consideration in the Senate every Member of the Senate was put under oath to state whether or not he had any interest in the provisions of that tax bill. That was "inquisitorial," and if that inquisition were extended a little further to the assessors' books in the District of Columbia you might find there are those in Congress who have interests in measures which come before Congress twice in every month. I, for one, would not object to that "inquisition."

Some of the prominent speakers at the meeting held at the Willard Hotel the other day said that the Government owns all the streets in the city of Washington, and therefore should bear half the tax. That was the false argument made by Boss Shepherd in 1874 in connection with his further erroneous statement, which has long since been exploded, that the Federal Government owns half the property in the District of Columbia. But it is easy enough to get up with a sympathetic, cheering crowd of those who have met, not (?) to prevent the taxation of intangible property but to protect the humble home owner in the District of Columbia, and make the declaration that the Federal Government owns the streets in the District of Columbia. The law in the case has been repeatedly stated in the Supreme Court of the United States. In the case of Smith *v.* The Corporation of Washington (20 Howard), referring to the powers of the corporation of Washington, the court says:

"It is unnecessary in the consideration of this point to recur to the early history of the foundation of the city of Washington; suffice to say the land was originally conveyed to trustees, to be laid out as a Federal city, with such streets, etc., as the President shall approve. It has been so laid out and the streets dedicated to the public. As in all other cities and towns, the legal title to the public streets is vested in the sovereign as trustee for the public."

Then they tell you that the Federal Government ought to bear half of these expenses because it owns more than half. Every once in awhile some Rip Van Winkle, with real estate in the District of Columbia owned in his family, awakens to tell us that that is a fact, when, as a matter of fact, I say that the Federal Government does not own in the District of Columbia 100 acres which it uses "exclusively" for Federal purposes. Take Potomac Park, which the Federal Government owns. Does any man tell me that Potomac Park is owned for the Government, and not for the citizens of the District of Columbia? The Federal Government invested largely in the acquirement of about 2,000 acres for Rock Creek Park. Is that, as stated in the title of the Rock Creek Park act, for the benefit and pleasure of the people of the United States? Not at all. Rock Creek Park was acquired for the rich of the District of Columbia. I made the assertion once upon this floor, perhaps about a year ago, that nine out of ten, or an even greater per cent, of all the people found in Rock Creek Park were there in automobiles or in carriages. One gentleman who owns more than $100,000 of real estate in the District of Columbia said that that was not the case. He said that you could find thousands of pedestrians in Rock Creek Park to every one you could find in a carriage or automobile. I take it for granted that each and every one of you has been through Rock Creek Park, and I am willing to submit that issue to any man, whether he be a Member of this House or not, who has ever gone through that park.

Mr. BARTON. I would like, as a matter of information, to know where we would go to find exactly the amount of property the Government owns and how much is owned by the District of Columbia in the District?

Mr. JOHNSON of Kentucky. You would have to have an abstractor do that.

Mr. BARTON. But there is nothing of that kind now so that we can know definitely?

Mr. JOHNSON of Kentucky. No.

Mr. GOULDEN. In the gentleman's judgment, about how much is owned by the Government and used by the Government for its own use?

Mr. JOHNSON of Kentucky. Take the White House grounds; they are used exclusively for the Federal Government, and the Treasury grounds are used exclusively for the Federal Government. One can name different pieces of property like that that are used exclusively for the Federal Government. The ground on which this house stands is used exclusively for the Federal Government, but the park which surrounds it is not; and while the highways through the grounds are kept up by the Federal Government, the highways are used in exclusion to the others which surround the Capitol Grounds. In the last Congress and in the one before you have provided three and one-half million dollars to be invested in a park between the Capitol and the

Union Station. The District did not participate in the payment for that. Can anybody tell me that that is to be acquired for the use and enjoyment of the people of the United States and not for the people of the District of Columbia?

But you see it "harped upon" in every day's paper here, in speaking to the people back in the States, that the city of Washington is "theirs." You can take a search warrant and go to the householders in the congressional district in Kentucky from which I hail and ask them to point out the particular lot in the District of Columbia which anyone of them owns and I dare say you will find none. Let the casual stranger, a visitor to Washington, who comes here believing that this is "his" city, lay claim to a single piece of property and in an hour and a half he will be confined in the lunatic asylum over here at St. Elizabeth's.

In conclusion, let me liberally paraphrase what John says in the Good Book:

Because thou hast been "seen," thou hast believed; blessed are they that have not been "seen" and have believed.

The SPEAKER. The time of the gentleman has again expired.

REFERENCE OF BILL.

Mr. O'LEARY. Mr. Speaker, since the gentleman from Kentucky has commenced to address the House certain matters in relation to the bill H. R. 8593 have been called to my attention as chairman of the subcommittee which seem to make it important to refer the bill. I move, therefore, to refer the bill to the Committee on the District of Columbia.

The SPEAKER. The gentleman from New York [Mr. O'LEARY] moves to refer the bill mentioned to the Committee on the District of Columbia.

The motion was agreed to.

Mr. CARY. Mr. Speaker, I ask unanimous consent to extend a few remarks in the RECORD on this matter.

The SPEAKER. Is there objection?

There was no objection.

AGRICULTURAL APPROPRIATION BILL.

Mr. LEVER. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 13679, the agricultural appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 13679, the agricultural appropriation bill, with Mr. HAMLIN in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 13679, which the Clerk will report.

The Clerk read as follows:

H. R. 13679. A bill making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1915.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Total for Bureau of Animal Industry, $2,245,026.

Mr. LEVER. Mr. Chairman, when the committee rose on Saturday evening the gentleman from Illinois [Mr. FOWLER] had asked permission that it be permitted to offer an amendment to the item with reference to this bureau. Since that time he has agreed that his amendment ought not to come in at this part of the bill, but that he will offer it to the section relating to the Bureau of Chemistry. Therefore, I will ask the Clerk to read.

The Clerk read as follows:

BUREAU OF PLANT INDUSTRY.

Salaries, Bureau of Plant Industry: One physiologist and pathologist, who shall be chief of bureau, $5,000; 1 chief clerk, $2,750; 1 executive assistant in seed distribution, $2,500; 1 officer in charge of publications, $2,250; 1 landscape gardener, $1,800; 1 officer in charge of records, $2,250; 1 superintendent of seed weighing and mailing, $2,000; 1 executive clerk, $2,250; 3 executive clerks, at $1,980 each; 1 assistant superintendent of seed warehouse, $1,400; 1 seed inspector, $1,000; 9 clerks, class 4; 14 clerks, class 3; 2 clerks, at $1,500 each; 20 clerks, class 2; 52 clerks, class 1; 1 clerk, $1,080; 9 clerks, at $1,020 each; 33 clerks, at $1,000 each; 55 clerks, at $900 each; 30 clerks, at $840 each; 18 clerks, at $720 each; 1 laborer, $780; 42 messengers or laborers, at $720 each; 12 messengers, messenger boys, or laborers, at $660 each; 26 messengers, messenger boys, or laborers, at $600 each; 1 artist, $1,620; 1 clerk or artist, $1,200; 1 photographer, $1,400; 1 photographer, $1,200; 1 photographer, $900; 1 photographer, $840; 1 laboratory aid, $1,440; 1 laboratory aid, $1,380; 3 laboratory aids or clerks, at $1,200 each; 1 laboratory aid or clerk, $1,080; 2 laboratory aids or clerks, at $1,020 each; 5 laboratory aids, at $840 each; 8 laboratory aids, at $720 each; 6 laboratory aids, at $600 each; 1 laboratory apprentice, $720; 2 map tracers, at $720 each; 2 map tracers, at $600 each; 2 gardeners, at $1,440 each; 4 gardeners, at $1,200 each; 8 gardeners, at $1,100 each; 15 gardeners, at $900 each; 19 gardeners, at $780 each; 2 skilled laborers, at $960 each; 2 skilled laborers, at $900 each; 3 skilled laborers, at $840 each; 1 assistant in technology, $1,400; 1 assistant in technology, $1,380; 1 mechanical assistant, $1,200; 1 blacksmith, $900; 1 carpenter, $900; 1 painter, $900; 1 teamster, $840; 1 teamster, $600; 21 laborers, at $540 each; 27 laborers, messengers, or messenger boys, at $480 each; 4 laborers or charwomen, at $480 each; 2 laborers or charwomen, at $360 each; 2 laborers, at $420 each; 15 charwomen, at $240 each; 11 messenger boys, at $360 each; 6 messenger boys, at $300 each; in all, $476,520.

Mr. FOWLER. Mr. Chairman, I reserve a point of order against the paragraph. I desire to inquire of the chairman of the committee the reason for increasing the salary of one officer in charge of records, on page 14, lines 11 and 12, from $2,100 to $2,250.

Mr. LEVER. Mr. Chairman, the bill last year as reported from the Committee on Agriculture carried an increase of $250, I believe, for this official. It was stricken out on the floor of the House by a point of order, went to the Senate, and the Senate restored the estimate of the Department of Agriculture and the recommendation of the House Committee on Agriculture. In conference it was agreed that the salary should be fixed as it is in the current law. The Assistant Secretary of Agriculture in presenting this roll made a very urgent appeal that this salary be increased $150, making a statement that this official had been connected with the department for a long time, and was a most efficient man, and that he ought to make the estimate in keeping with the recommendation of the committee itself, and the committee, pursuing its former policy and believing its former policy was wise, allowed it.

Mr. FOWLER. Mr. Chairman, I desire to ask the chairman if he does not think these salaries ought to be classified, with a fixed salary for each class, so that there will be a regular line of promotion, and no opportunity for making distinction over employees of the same grade and of the same ability?

Mr. LEVER. I would say to my friend from Illinois that the salaries are in a large measure classified, so far as clerks are concerned. For instance, you have clerks of the first, second, third, and fourth classes; and then, of course, it is necessary in a great big department like the Department of Agriculture to have people filling these extra places that can not be called, accurately, "clerks," such as gardeners and keepers of records and files, and places of that character. It would be almost impossible to classify those; but, so far as the clerks are concerned, I think the department has classified them pretty well, and I think it ought to classify them.

Mr. FOWLER. I desire to call the attention of the chairman to what he already knows, and that is, that in the Committee on the Post Office and Post Roads we never make an appropriation for a salary above that which is fixed by law, and that all of the employees are graded in the Post Office Department.

Mr. LEVER. Yes. I would say to my friend, in that connection, that, so far as the clerks or the compensations in the Department of Agriculture are concerned, they are classified in the same way under a statute which I read a moment ago. I happened to put my finger on it.

Mr. FOWLER. That is true as to some of the clerks. I am sure of that. But I believe they all ought to be classified, so that there would be no chance for anyone to even suspect that a salary is increased for any other reason than because of merit.

Mr. LEVER. It would be a very hard matter to do that; but, if we could, it would be very desirable, I will say to my friend from Illinois.

Mr. FOWLER. Mr. Chairman, I desire to ask the chairman of this committee, further, how many increases in the force in that Bureau of Plant Industry are made by this paragraph?

Mr. LEVER. I will say to my friend from Illinois that the only promotion whatever and the only new place whatever, except in the way of transfer from other bureaus or from the lump fund, is this official to whom he has called attention. The fact is that the salary roll of the Bureau of Plant Industry shows an increase of only $30, there being transfers to and from it, the only actual promotion being the one to which the gentleman has referred.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. LEVER. Mr. Chairman, I ask unanimous consent that the gentleman be permitted to proceed for two minutes more.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that the gentleman from Illinois [Mr. FOWLER] be permitted to proceed for two minutes. Is there objection?

There was no objection.

Mr. FOWLER. In line 16 of page 14 there are 20 clerks of class 2, whereas the last bill carried only 17. That is on line 16 of page 14. Twenty clerks are there provided for, whereas the former bill provided for only 17. And following that are 52 clerks of class 1, whereas the former bill provided for only 49.

Mr. LEVER. The explanation of that is this: There is an increase there of 3 clerks in lieu of 6 clerks, at $720 each, dropped, making a net decrease in the statutory roll of $120. It is an actual decrease, although I am frank to say there is a small increase in the salary of these 3 clerks.

Mr. FOWLER. There must be an increase, because the appropriation is increased from $427,690 to $476,250.

Mr. LEVER. There have been 6 clerks at $720 dropped and 3 clerks of class 2 provided for, making an actual difference of $120 as a decrease.

Mr. FOWLER. There is something like a $50,000 increase over the last bill.

Mr. LEVER. There have been transferred from the Division of Accounts and Disbursements 1 clerk of class 3, with transfer from lump funds of this bureau clerks whose salaries total $48,800, making an apparent increase of $48,120, but an actual increase of only $30.

Mr. FOWLER. On the same page you have increased a laborer from $720 to $780.

Mr. LEVER. That is a transfer from the lump fund.

Mr. FOWLER. And one photographer, on line 1 of page 15, beginning on page 14, line 25; one photographer at $840.

Mr. LEVER. That is a transfer from the lump fund at the same salary.

The CHAIRMAN. The time of the gentleman from Illinois has again expired.

Mr. FOWLER. Mr. Chairman, if the Chair will permit, I do not desire to make a point of order against this increase on the explanation of the chairman, but I do desire to say that I am not in favor of this character of increases of salaries. I do not think it is healthful. I do not think it can bring any good to the department; neither do I think it can bring satisfaction to the employees. But I am disposed, under this explanation of the gentleman, who is a very high-minded and conscientious gentleman, to allow it to pass at this time.

Mr. LEVER. I thank the gentleman.

The CHAIRMAN. The gentleman from Illinois withdraws his reservation of a point of order. The Clerk will read.

Mr. MURRAY of Oklahoma. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Oklahoma [Mr. MURRAY] moves to strike out the last word.

Mr. MURRAY of Oklahoma. Mr. Chairman, while discussing the question of "order," and in view of events recently transpiring, it occurs to me that this incident would explain some of these matters of order: In the seventies and the early eighties, when the Comanche Indians swooped down on Texas and robbed, scalped, and murdered people, the Texas Rangers had run them out. After peace was restored an Indian went to the Indian agent at Anadarko and said, "I want a rifle." The agent said to him, "You can not have it. You might shoot a soldier with it." The Indian replied, "No; I don't want it to shoot a soldier. We kill soldier with a stick; but I want it to shoot a Texas Ranger with." [Laughter.]

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For investigating the ginning, handling, grading, baling, and wrapping of cotton, and the establishment and demonstration of standards for the different grades thereof, and for carrying into effect the provisions of law relating thereto, $80,580: *Provided*, That of the sum thus appropriated $60,000 is to be used for testing the waste, tensile strength, and bleaching qualities of the different grades of cotton as standardized by the Government in order to determine their relative spinning values and for demonstrating the results of such tests.

Mr. ANDERSON. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Minnesota offers an amendment, which the Clerk will report.

The Clerk read as follows:

Strike out the paragraph beginning in line 18, page 17, and insert the following:

"For investigating the ginning, handling, grading, baling, and wrapping of cotton, and the establishment and demonstration of standards for the different grades thereof, and for carrying into effect the provisions of law relating thereto, and for investigating the handling, grading, and transportation of grain, and the fixing of definite grades thereof, and for carrying into effect the provisions of law relating thereto, $1,000,000: *Provided*, That of the sum thus appropriated $60,000 is to be used for testing the waste, tensile strength, and bleaching qualities of the different grades of cotton as standardized by the Government in order to determine their relative spinning values and for demonstrating the results of such tests: *Provided further*, That the Secretary of Agriculture shall organize in the Bureau of Plant Industry of his department a section of grain inspection and grading, and shall, according to the rules of the civil service, appoint such experts and other employees as may be deemed by him necessary to carry out the provisions of this act.

"SEC. 2. That said Secretary shall also appoint, in accordance with the rules of the civil service, at each of the following cities, to wit, Portland, Me.; Boston; New York; Philadelphia; Baltimore; Chicago; Minneapolis; Duluth; Superior; Kansas City, Mo.; St. Louis; New Orleans; Seattle; Tacoma; San Francisco; Galveston, Tex.; Atlanta, Ga., and at such other important centers of interstate trade and commerce in grain and cotton as he may consider necessary or proper for carrying out the provisions of this act, one chief inspector and such assistants as may be required to inspect and grade grains and cotton as herein provided: *Provided, however*, That said Secretary may appoint a chief or deputy inspector at such important point of intrastate grain or cotton trade as shall furnish sufficient inspection service to fully pay the expenses of maintaining an inspection at such point, when the said Secretary is assured that the grain or cotton trade interests at such point are desirous of securing Federal inspection; but in no case shall such inspector inspect or grade such intrastate grain or cotton except upon request of the owner thereof or his agent.

"SEC. 3. That said inspectors shall be paid a salary or compensation to be fixed by the Secretary of Agriculture, which shall correspond as nearly as possible to salaries and compensations paid other officers or employees of the Government performing similar duties.

"SEC. 4. That the Secretary of Agriculture shall make all needful rules and regulations governing the inspection and grading herein provided for.

"SEC. 5. That said Secretary of Agriculture be, and he is hereby, authorized and required, as soon as may be after the enactment hereof, to determine and fix, according to such standards as he may provide, such classifications and grading of cotton, wheat, flax, corn, rye, oats, barley, and other grains as in his judgment the usages of trade may warrant and permit. In the inauguration of the work herein provided he may, if in his judgment the best interests of trade and commerce in said grains or cotton require it, adopt the standards of classification and grades now recognized by commercial usages or established by the laws of any State or by boards of trade or chambers of commerce, and may modify or change such classifications or grades from time to time as in his judgment shall be for the best interests of interstate and export grain and cotton trade, but the grades established shall be uniform throughout the United States.

"SEC. 6. That when such standards are fixed and the classifications and grades determined upon the same shall be made matter of permanent record in the Agricultural Department, and public notice thereof shall be given in such manner as the Secretary shall direct, and thereafter such classification and grades shall be known as the United States standard.

"SEC. 7. That from and after 30 days after such classifications and grades have been determined upon and fixed, and duly placed on record as hereinafter provided, such classification and grading shall be taken and held to be the standard in all interstate commerce in grain and cotton.

"SEC. 8. That it shall be the duty of any railroad company, steamship company, or other firm or corporation or private individual engaged in the transportation of grain or cotton destined to any State, Territory, or country other than that in which it is received for inspection, or received from any other State, Territory, or country than that to which it is consigned, to notify the chief inspector at the place of destination of any consignment of grain or cotton, within 24 hours after its arrival, that a shipment, cargo, or load of grain or cotton is in its, their, or his hands and the place of destination of said grain or cotton.

"That it shall be unlawful for any person herein named to willfully unload or otherwise discharge any load, cargo, or consignment of grain or cotton which has been at any time during the period of its transit an article of interstate commerce and which has not been inspected in accordance with the provisions of this act, until the same has been inspected as provided herein.

"Upon the receipt of such notice the said chief inspector shall cause the said grain or cotton to be inspected and graded in accordance with the classification and standards fixed by said Secretary, and to issue and deliver a certificate of inspection showing such grade and classification in such form as may be provided by rules prescribed by said Secretary.

"SEC. 9. That it shall be the duty of said inspectors to inspect and grade all grain and cotton which at the time of inspecting and grading of the same has been shipped from any other State, Territory, or country than the State, Territory, or country in which the same is inspected, or is intended for shipment into any other State, Territory, or foreign country before the same is unloaded from the car, vessel, or other vehicle in which the same was or is being transported, and to charge and collect from the owner thereof such fees for the inspection of said grain or cotton as may be fixed by the Secretary of Agriculture, who shall have the power to fix the rate of charges for the inspection of grain and cotton and the manner in which the same shall be collected, and which charges shall be regulated in such manner as will, in the judgment of the Secretary of Agriculture, produce sufficient revenue only to meet the necessary expenses of the inspection service, said fees to be covered into the Treasury of the United States as miscellaneous receipts, in the same manner as for other miscellaneous receipts: *Provided, however*, That such inspector, upon request of the owner or agent of any grain or cotton at the point or place where an inspector may be located, whether or not the grain has entered into interstate commerce, shall inspect the same and deliver his certificate therefor in the same manner as other inspections are made and for the same charge; and whenever the owner of grain or cotton at such place shall request and furnish facilities therefor, said inspector shall also weigh such grain or cotton and deliver to the owner or his agent his certificate showing the gross and net weight of such grain or cotton, under such rules and regulations as may be prescribed by the Secretary of Agriculture.

"SEC. 10. That no inspector or deputy inspector of grain or cotton shall, during his term of service, be interested, directly or indirectly, in the handling, storing, shipping, purchasing, or selling of grain or cotton, nor shall he be in the employment of any person or corporation interested in the handling, storing, shipping, purchasing, or selling of grain or cotton.

"SEC. 11. That any person interested in any consignment of grain or cotton inspected under the provisions of this act may appeal from an inspection made by any assistant inspector to the chief inspector at the point where such grain or cotton is inspected, and from said chief inspector to the Secretary of Agriculture. Said Secretary shall make all needful rules and regulations to govern appeals.

"SEC. 12. That when any grain or cotton which having been inspected and certificate of inspection issued hereunder is mixed with any other grain or cotton not inspected or with grain or cotton which has been inspected and certified at a different grade, the same shall not be shipped out of the State where such mixing is done without being reinspected and graded; any such person or corporation shipping such grain or cotton as aforesaid without reinspection shall be deemed guilty of a misdemeanor.

"SEC. 13. That the shipment or consignment of any grain or cotton aforesaid from any of the places mentioned herein to another State or foreign country without the same being inspected and graded as herein provided is hereby prohibited; but where grain or cotton has been once inspected hereunder, and remains unmixed with other grain, the same need not be reinspected at the place from which it is exported: *Provided, however,* That said Secretary may in his discretion reinspect any cargo of such grain or cotton before the same is exported.

"SEC. 14. That it shall be the duty of the inspectors and assistants to investigate the handling and weighing of grain and cotton inspected by them, and to make such report thereon as the said Secretary may require; and it shall be the duty of every person or corporation weighing such grain or cotton to allow inspection of such weighing and handling by said inspectors.

"It shall also be the duty of the inspectors and assistants to inspect and grade "samples" of cotton, grain, and seeds when received for inspection and grading at any of the places named herein, and the inspector shall make a report specifying the grade and transmit the same to the owner or sender of such sample of grain or cotton.

"SEC. 15. That any person or corporation who willfully does any act prohibited herein or who willfully refuses or neglects to do or perform the things required of him under the provisions of this act shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished by a fine in a sum not to exceed $5,000.

"SEC. 16. That this act shall take effect and be in force from and after the 1st day of January, 1915."

Mr. MANN. Mr. Chairman, I make a point of order against the amendment.

Mr. LEVER. It is undoubtedly subject to a point of order. I thought perhaps the gentleman from Minnesota might want to make some statement about it.

Mr. ANDERSON. I do not think it is quite so certain that it is subject to a point of order as some gentlemen seem to think.

The CHAIRMAN. Does the gentleman from Illinois make the point of order?

Mr. MANN. I make the point of order.

The CHAIRMAN. The Chair has no doubt about it himself.

Mr. ANDERSON. I do not care to discuss the point of order, if the Chair has made up his mind.

The CHAIRMAN. The Chair thinks there is no question about it. The Chair sustains the point of order.

The Clerk read as follows:

For investigating the handling, grading, and transportation of grain and the fixing of definite grades thereof, $76,320.

Mr. TALBOTT of Maryland. Mr. Chairman, I reserve a point of order against the paragraph. I desire to ask the chairman of the committee if this paragraph is intended to authorize the Department of Agriculture to investigate the handling, grading, and transportation of grain and the fixing of definite grades thereof for export or for domestic use?

Mr. LEVER. In reply to the question of the gentleman from Maryland permit me to say that these grades, after being fixed and established, must, of course, be accepted voluntarily by the trade. There is no provision of law anywhere of which I am aware which forces upon the grain trade the acceptance of these grades after they are fixed.

Mr. TALBOTT of Maryland. That is all I want to know.

Mr. LEVER. My information is that standards of grades for wheat, oats, and barley have not as yet been fixed, and the probability is that it will be at least two years before they can be definitely fixed upon. The standard for corn has been fixed, and a promulgation of the grades has already been published, to become effective July 1, but there is no authority anywhere under which the Secretary of Agriculture could force these grades upon the grain trade, either for domestic consumption or for export.

Mr. TALBOTT of Maryland. I am much obliged to the gentleman. I withdraw the point of order.

Mr. LINTHICUM. This has been carried in the bill for some years, has it not?

Mr. LEVER. This provision has been carried in the bill for many years—as long as I have been a Member, according to my recollection.

Mr. MADDEN. I think it is only about three years since this was put into the bill.

Mr. LEVER. I think it is probably six or eight years. It is quite a while since it first began to be carried.

Mr. MADDEN. I remember very well when it was inserted in the bill.

Mr. HAUGEN. Mr. Chairman, if the gentleman will permit, I will give the gentleman the information desired. This is not a new item. Congress has for years made appropriation for the investigation, the handling, grading, and transportation of grain, and the fixing of definite grades thereof, also for investigating the ginning, handling, grading, baling, and wrapping of cotton, and the establishment of a standard for the different grades thereof.

The appropriations on account of grain have been as follows: In 1907, $15,000; in 1908, $40,000; in 1909, $53,700; in 1910, $52,440; in 1911, $51,000; in 1912, $57,080; in 1913, $55,640; for the fiscal year 1914, $15,000, a total of $389,880. On account of cotton the appropriations have been as follows: For 1909, $7,350; for 1910, $12,250; for 1911, $36,650; for 1912, $32,350; for 1913, $26,000; for 1914, $46,120; total, $160,720. Total for grain and cotton, $550,600.

It is now proposed to appropriate for grain $76,320 and for cotton $80,580, which will bring the amount up to $707,500.

Mr. Chairman, if the grading and fixing of grades of cotton or grain are of any value whatever, I submit that now is the time to provide for the machinery for inspection and grading, and if Federal inspection and grading are not desired, as contemplated, then it is time that we discontinued these appropriations. We have appropriated $550,000 for investigation, which is of no value whatever unless followed up by legislation authorizing the fixing of standards of inspection and grading.

Mr. MADDEN. As a matter of fact, then, it does not do any good to expend all this money?

Mr. HAUGEN. The expenditure of $550,000 is of no value whatever, and the proposed appropriation of $76,000 for grain and another appropriation of $80,580 for cotton will be of no value whatever.

Mr. MADDEN. That is what I think.

Mr. HAUGEN. If this inspection is desired, I believe that now is the time for Congress to provide the machinery to provide for efficient inspection.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HAUGEN. I ask to be recognized in my own time.

Mr. TALBOTT of Maryland. I withdraw the point of order.

Mr. HAUGEN. Mr. Chairman, I move to strike out the last word. Is the point of order pending?

The CHAIRMAN. The point of order has been withdrawn.

Mr. HAUGEN. Mr. Chairman, all I wish to say in the matter is that if the inspection service is desired, if it is of any value whatever, we ought to authorize the department to inspect and grade cotton and grain and provide money and machinery necessary to inspect and grade cotton and grain. Of what value can the proposed investigation and appropriation be if we do not authorize the inspection and grading?

Mr. CANDLER of Mississippi. Is the gentleman in favor of striking out the item?

Mr. HAUGEN. I am in favor of standardizing inspection and grading; that is the purpose for which the appropriations have been made.

Mr. CANDLER of Mississippi. That could be done by amendment.

Mr. HAUGEN. The amendment has just been offered by the gentleman from Minnesota [Mr. ANDERSON], and it was ruled out of order.

Mr. CANDLER of Mississippi. I only wanted to know if the gentleman wanted to strike out the appropriation. A motion to strike it out would be in order.

Mr. HAUGEN. The proposition of the gentleman from Minnesota [Mr. ANDERSON] was to provide for inspection and grading.

Mr. SHERWOOD. Will the gentleman yield?

Mr. HAUGEN. Certainly.

Mr. SHERWOOD. Suppose a cargo of grain is sent from Chicago to New Orleans, and on its way it passes through a wet and damp climate and absorbs moisture, so that when it arrives at the destination it is not the same grain as when it was shipped from the consignor. Do you propose to have it inspected at the point of delivery? If you do, it would amount to confiscation.

Mr. HAUGEN. The contract between the buyer and seller would determine where it should be inspected and graded.

Mr. MADDEN. The Government does not inspect the grain under this provision at all.

Mr. HAUGEN. That question would be determined by the buyer and the seller.

Mr. SHERWOOD. All boards of trade have first-class inspectors.

Mr. HAUGEN. If the gentleman buys a car of grain for delivery in New York, he would naturally arrange for its inspection in New York. If he buys a carload of grain to be delivered in Chicago, he would have it inspected and graded in Chicago. The trouble now is that we have the grain graded in Minneapolis and St. Louis and different places, and we have three or four different grades. The testimony before the Senate committee was that very often No. 2 grain shipped into Chicago and other terminals would be shipped out as No. 1 grain. We want a uniform system of grading and inspection, so that the seller and the buyer may know what they are doing and what they are getting, and we should have competent inspectors to determine the grade of cotton and grain. If inspection and

grading is not contemplated, then this appropriation is useless. If it is to be of value, then Congress should provide for inspection and grading. If standardization, inspection, and grading are not contemplated or desired, why have we appropriated money for the investigation? If the service is not of any value, why should we expend $155,000 next year for something not desired and of no benefit?

Mr. SHERWOOD. I say it ought not to be appropriated.

Mr. HAUGEN. Certainly if it is not the purpose to standardize, inspect, and grade, then strike it out.

Mr. SHERWOOD. The boards of trade now have inspectors under the State law; they have their own inspectors. Do you propose that the General Government shall take charge of the inspection?

Mr. HAUGEN. What does the gentleman mean by "their own inspectors"?

Mr. MADDEN. State inspectors.

Mr. HAUGEN. The gentleman from Illinois is mistaken. If he will read the testimony before the committees, he will see that the States do not have inspectors of the kind.

Mr. MADDEN. They do in Illinois.

Mr. HAUGEN. The testimony is that the boards of trade control the inspection.

Mr. MADDEN. They are controlled by the State under the State law.

Mr. HAUGEN. The contention is that the inspectors are controlled by the board of trade; that is the testimony before the committee.

Mr. MADDEN. But they are under the State law, under the railroad warehouse commission.

Mr. HAUGEN. Mr. Chairman, if I may have time, I think I can tell the gentleman what Chicago wants. I believe I know. Chicago wants to be let alone. It wants its own inspection, thus making the manipulation of grades possible. I know what the farmers and shippers want. I have had 35 years of experience in farming, some 15 or 20 in shipping, hence I have not only come in contact with the farmers and shippers, but I have had actual experience, and claim to have some knowledge of the needs and desires of the farmers and shippers. What they need and desire is a square deal, the fixing of standards, Federal inspection and grading, or, in other words, uniformity in grading grain and cotton. They have been here before Congress ever since I came here, and that is 15 years ago. I take it that they were here a number of years before that. There is practically no difference of opinion between the farmers, the independent millers, and shippers on that proposition, hence the terminals want one thing, the farmers, the independent millers, and the shippers want another, so if Congress wants to act in accord with the wishes of the farmers, for whom so many of its Members profess great friendship, then let it do away with this diverse system, this manipulation of grades which always works to the detriment of the producer, miller, and shipper, and provide for uniformity in grading. The farmer, the miller, and shipper are opposed to one grade for one market and one for another, and against one grade fixed for one buyer and another for another; or, in other words, they are opposed to the terminals or interested parties determining the grades as is now being done in many of the terminals. On the other hand, the terminals are in favor of delay. As before stated, they want to be left alone; they want cotton and grain graded to suit themselves; they do not want to be interfered with; they want cotton, wheat, corn, and other grain coming in graded No. 2 or No. 3, or a low grade, and graded No. 1, or a higher grade, going out; they want the cotton and grain inspected and graded by inspectors under their control; they want the board of appeals composed of persons either directly or indirectly interested or controlled by the purchaser of the cotton or grain to be inspected; they believe in the present system of robbing the producer, miller, and shipper of the difference in value of a low and high grade through the process of imposing upon the shippers' grain a low grade and to have a better grade fixed on grain going out by inspectors dominated by great elevator interests; they believe in buying on one grade and selling on another, thus robbing the producer and shipper outside of the ring; they believe in continuing the fraud perpetrated in certifying grain to suit their sweet will, or, in other words, improper certification.

The Government inspects meats at the packing houses at its own expense. Why not give the cotton and grain producers Federal inspection and grading which the farmers and independent grain dealers and millers outside of the ring so much desire? Why should not this Congress, professing so much friendship for the farmer, now come to his rescue? Certainly this universal and earnest plea for inspection and grading coming from the farmer as it does ought to appeal to those who have so eloquently and persistently proclaimed their friendship and interest in the matter. The delay has cost the farmers, millers, and shippers outside of the ring millions of dollars. They have been led to believe that the $550,000 appropriated in the past really meant something; that Congress in making the appropriations had for its object standardization, Federal inspection, and grading of cotton and grain. Five hundred and fifty thousand dollars of the people's money has already been appropriated, and so far no inspection nor grading has been done by the department; that is, the portion allotted to the fixing of definite grades is a waste of money unless followed up by legislation authorizing and providing for Federal inspection and grading. Federal inspection and grading can harm no one except those benefited by the present unjust and wrongful system—they have made their millions at the expense of the producers, millers, and shippers. Why should they continue the practice? The amendment providing for the proposed inspection and grading of cotton and grain will do away not only with the injustice and fraud perpetrated in the past but will provide for an inspection and grading which can be relied upon and will establish a better market for our grain, as everybody knows. Not only the people of our own country but foreign countries have no confidence in the grading of cotton and grain in the great terminal markets where our cotton and grain are sold. It goes without saying that if the foreigners can get a square deal in grades they will purchase more, and instead of going to Canada and other countries, where they do get a square deal, they will come here. Under the present system the purchasers at the terminals are compelled to accept the certification of the terminals; they have no recourse, they must accept, good or bad, and as a result we lose millions of dollars every year in trade with foreign nations. Why continue a practice detrimental to the producer for whom so many tears have been shed in this and previous Congresses? I submit that $550,000, if appropriated simply to deceive, ought to be sufficient, and that the time has now come when Congress can be of some real service to its farmer constituency. Gentlemen, in my opinion the proposed increase in appropriation and the authorization of standardization, Federal inspection, and grading will prove of greater benefit to the farmer than all the other money appropriated in this bill. Will you do it? Oh, the gentleman says that it can not be taken onto the Agricultural appropriation bill; that the question has not been considered. My answer is that it has been considered for at least 15 years. How much more time is needed? A bill providing for inspection and grading grain has been reported to the Senate; it is now on the calendar; the amendment offered by the gentleman from Minnesota is identical with the bill reported by the Senate committee, hence it is not a new matter.

Mr. MANN. Oh, the bill has not been reported to the House.

Mr. HAUGEN. Bills have been considered every year the gentleman has been here. It is not a new matter. I read from the Senate report:

The Committee on Agriculture and Forestry, having had under consideration the bill (S. 120) to provide for the inspection and grading of grain entering into interstate commerce, and to secure uniformity in standards and classification of grain, and for other purposes, begs leave to report the bill with amendment.

Your committee incorporates and makes a part of this report the former report made upon similar bills favorably reported in the Sixtieth, Sixty-first, and Sixty-second Congresses, which report is adopted by this committee, and is as follows:

"Full and complete hearings were had before the committee, and every question raised by this proposed measure quite exhaustively considered. Many witnesses were heard, both for and against the measure.

"Our grain trade has grown up from the rather ancient and simple system of barter between the producer and purchaser, upon personal inspection of the product, to the present almost universal system of contracts for vast quantities by grades in great central markets hundreds of miles from the place of production and in a different jurisdiction. The producer, for the most part, is without any voice in determining the rules or regulations governing the handling or grading of his grain, the price which is fixed by such grading, and helpless to reform or eliminate the many abuses which have entered into the system of handling and grading grain at these great terminals, and which operate as a fraud and injustice upon both the producer and consumer.

"These evils, which have been established by both the positive evidence of witnesses and the record admissions of the boards of trade and State warehouse commissions, for the most part govern the commerce in grain."

The gentleman from Minnesota [Mr. DAVIS] says that the State of Minnesota regulates the grading. I will tell the gentleman that that is not the fact. I will refer him to the reports made by the State warehouse commission, where he will find that in one city in his own State 99,711 bushels of No. 1 northern were put in and 196,288 shipped out from the very same terminals—more than double. For the benefit of the gentleman, I read from the Senate report:

(11) The reports of the State warehouse commissions, where such reports are kept, show that there are shipped out from the great terminals from two to four times as many of the higher grades as are received into the elevators at such places, while nearly all of the lower

grades, such as No. 4, no grade, and rejected, purchased in, disappear entirely in the out shipments.

(12) A report from a committee appointed by the Bankers' Association of North Dakota, which takes its figures from the records of the grain-inspection department of Minnesota, shows the following table of receipts and shipments of a single terminal elevator for only three months:

| | Receipts. | Shipments. |
|---|---|---|
| | *Bushels.* | *Bushels.* |
| No. 1 northern | 98,711.40 | 196,286.30 |
| No. 2 northern | 141,455.10 | 467,764.00 |
| No. 3 northern | 272,047.20 | 213,459.30 |
| No. 4 | 201,267.20 | [1] |
| No grade | 116,021.10 | [1] |
| Rejected | 50,742.30 | [1] |
| | 880,245.10 | 877,512.00 |
| On hand (estimated) | | 12,733.10 |
| | | 890,245.10 |

[1] None.

The profit in mixing at this elevator for three months, as shown by their report, over and above the regular elevator charges, was $83,720.69. There should be added to this the amount realized from the screenings at about $8 per ton.

A glance at this table will show that there were shipped out of this elevator about twice as many bushels of No. 1 northern as were received in; that there were shipped out about three and one-half times as many bushels of No. 2 northern as were received in. It will also show that 201,000 bushels of No. 4 were received in and none shipped out; that 116,000 bushels of "no grade" were received in and none shipped out, and about 60,000 bushels of "rejected" were received in and none shipped out. In other words, about one-half of the entire grain received in passed from No. 4, "no grade" and "rejected," to No. 1 and No. 2. Anyone acquainted with the grain trade will know at a glance that this great difference arising from changing a grade from a low grade to two or thre grades higher, whereby all of the lower grades are entirely lost, could not be produced by any system of mixing if both the inspection in and the inspection out were made by the same standard.

Mr. DAVIS. Does the gentleman know what the laws of Minnesota are upon the subject of the inspection of grain and how it is done?

Mr. HAUGEN. I know what the practice is in Minnesota.

Mr. DAVIS. I will state this——

Mr. HAUGEN. The gentleman may have more confidence in the inspectors of Minnesota than I have. I am not questioning the integrity of the inspectors, but he will find all over this country farmers and elevator men who will, I believe, question in some degree the integrity of the inspection of that great terminal.

Mr. DAVIS. Will the gentleman yield for a statement?

Mr. HAUGEN. Yes.

Mr. DAVIS. The gentleman is placing me in a very false light in this matter.

Mr. HAUGEN. Not at all.

Mr. DAVIS. I have no reason on this floor to sustain or maintain any system of inspection that there is now in Minnesota or elsewhere. If the gentleman has insinuated that I am, I wish he would withdraw the statement.

Mr. HAUGEN. Oh, no; I am not insinuating anything of the kind.

Mr. DAVIS. I wish to make this statement, however: My memory has been refreshed within the last two or three days by reason of the testimony before the Committee on Rules on the Manahan resolution. The law of Minnesota, without giving the exact words, is as follows: The grain and warehouse commission of Minnesota are given full power to inspect and weigh grain in Minnesota. They appoint the inspectors; they appoint the weighmasters. There is no grain received at any of these terminal elevators or shipped out of these without the inspection of those State inspectors and weighmasters.

Mr. HAUGEN. Exactly.

Mr. DAVIS. The Chamber of Commerce of Minneapolis does not have anything to do with the inspection, unless, as the gentleman insinuates, and it was insinuated the other day, they do it by getting possession or control of these State inspectors.

Mr. HAUGEN. Exactly.

Mr. DAVIS. That I know nothing about, but the law of Minnesota is positive and strictly adhered to, so far as the employment of inspectors and weighmasters is concerned, and no member of the Chamber of Commerce of Minneapolis has anything to do with grain at all. It is laid down on the table, with State inspection, and the chamber of commerce simply deals with it as thus inspected. Now, as to the number of bushels that go out of those terminal elevators. I am somewhat posted. There are perhaps more bushels of a certain grade of grain shipped out than there are placed therein originally.

Mr. HAUGEN. Two to one.

Mr. DAVIS. But there is no law to prevent the mixing and cleaning of grain. For instance, grain of high character comes in there and the law of the United States permits the mixing of the different characters of grain. Higher grades of grain may come in and it may be by this mixing that the elevators raise it, so that the two will grade the contract grade, and thus a greater number of bushels will go out of a certain grade than went in there, but that is not the fault of the inspection, it is not the fault of the chamber of commerce, and it is not the fault of anybody except the man who mixes it in the elevator, which the law permits.

Mr. SHERWOOD. Is there any complaint among the farmers of the gentleman's section?

Mr. DAVIS. There are among a certain class, and among others there is not. If the gentleman had listened for two or three days to the testimony before the Committee on Rules, he would have seen the class that were objecting and the class that were not.

Mr. HAUGEN. Does the gentleman contend that we should fix the grades?

Mr. DAVIS. I am in favor of standardizing the grades.

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. HAUGEN. Mr. Chairman, I ask unanimous consent that I may proceed for five minutes more.

Mr. LEVER. Mr. Chairman, I ask unanimous consent that debate on this paragraph and all amendments thereto close in 15 minutes.

The CHAIRMAN. Is there objection?

Mr. HAUGEN. I reserve the right to object. I do not care to take up much of the time of the House——

Mr. LEVER. Mr. Chairman, I withdraw the request.

The CHAIRMAN. There is nothing before the committee.

Mr. MANN. Mr. Chairman, I ask unanimous consent that the gentleman from Iowa may proceed for five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. DAVIS. Mr. Chairman, will the gentleman yield?

Mr. HAUGEN. Yes.

Mr. DAVIS. The gentleman seems to be placing me in a false light.

Mr. HAUGEN. Not at all.

Mr. DAVIS. I am not opposed to proper standardization or grading of grain. My people are all interested in that, and I agree with what the gentleman from Illinois said, that I think it is probably the duty and should be the duty of the Agricultural Bureau down here to fix and standardize all grain, and then pass that along to the buyers and handlers of grain, the elevator men, or the men on the chamber of commerce, and make them conform to that.

And I am not opposing that, and when I was on the Committee on Agriculture that was the object. I do not know what your appropriation is now, but let the great department down here standardize the grain and I think you will find no man honestly dealing in grain will object to it at all.

Mr. HAUGEN. Mr. Chairman, I did not question the gentleman's integrity. If this House ever had a conscientious and industrious Member, one who has had the best interest of the farming community at heart, certainly it has been the gentleman from Minnesota. [Applause.] But I do not deem it necessary here to pass bouquets. I was simply suggesting that if the gentleman is in favor of fixing standards, now is the opportune time. The gentleman referred to appropriations made in the past. He ought not now oppose this appropriation——

Mr. DAVIS. Am I opposing it? Have I said a word about opposing it?

Mr. HAUGEN. If it is the purpose to standardize grain, why not do it now, when we have the opportunity?

Mr. DAVIS. I have no objection.

Mr. HAUGEN. Then I want the gentleman to join with the rest of us.

Mr. DAVIS. Wait until the time for voting comes and I will do it.

Mr. HAUGEN. Exactly; that is what I am after and what I am trying to get——

Mr. MADDEN. How many are there to join with?

Mr. HAUGEN. Well, I would like to know. I know what the people out in the country think. If I am alone here, very well; I have stood up alone here before——

Mr. DAVIS. So have I.

Mr. HAUGEN. This is not the only time that I have stood here practically alone. The gentleman's city has many industrious, enterprising, law-abiding, and well-meaning men. It also has a few selfish men, and this is not the only time I have taken issue with some of the people of that great city. I recall one instance when certain interests with headquarters in Chicago were opposing appropriations and rigid inspection of

meat products; that after a Federal inspection was made necessary in all packing houses in order to dispose of the product, appropriations for the inspection were held down to an amount sufficient to provide only for the inspection of Beef-Trust-owned plants, thus giving the Beef Trust, with headquarters in Chicago, an absolute monopoly of the packing industry. Some 86 independent packers were denied the inspection necessary to continue their business. The department was helpless in the matter. Congress stubbornly refused to appropriate the money necessary to extend the inspection to the smaller and independent packers. I took up the fight, and on the division of the House I stood up with 15 other Members out of a total membership at that time of about 250, practically all then, as now, proclaiming to be friends of the farmer and shipper. The fight went on; the President with the big stick came to our rescue, and six months later we obtained not only the legislation desired, but a permanent annual appropriation of $3,000,000, so that since then the independent packer, the farmer, and the shipper have not had to come to Washington, on bended knee, asking for an appropriation; and as a result the inspection service has been extended to about a thousand establishments, while then only 36, and all practically owned and controlled by the Beef Trust, were inspected. Three packing houses have been built and are doing a large and successful business within 30 miles of my home town, and as a result hogs and cattle are killed practically at home, thus largely eliminating transportation charges not only in the shipping of stock to Chicago for slaughter, but the shipping of beef back into the country, in many instances from the point where the live stock started, as was done under the scheme of the benevolent Beef Trust. I have no apology to offer. I stood up practically alone then; I am willing to stand here alone on a proposition that is of even greater importance. I survived then; I will take my chances now.

Mr. DAVIS. I have not objected——

Mr. HAUGEN. If this is going to go out on the point of order, what is the use of discussing a proposition that is not before the House? I am not in the habit of taking up the time of the House simply to hear myself talk.

Mr. Chairman, with the permission of the House, I append to my remarks extracts from resolutions passed by independent grain dealers:

(1) Lack of uniformity in the grading of grain at the various terminal markets. A resolution adopted at Salina, Kans., January 15, 1907, by independent grain dealers succinctly presents the injustices resulting from this evil. The portion referred to reads as follows:

"Too much can not be said and done in favor of a national inspection law. We have no uniform inspection of grain and cotton, the principal farm products which are so largely dealt in and which are of such great importance to both the producer and consumer. A shipper of grain can not send a car of wheat from one point to another with any degree of security at the present time, take all the precaution he may. A shipper at some point in Kansas may have a car of grain inspected at some point in the State as No. 2, send it to Missouri, where it is inspected by the Missouri State grain-inspection department as No. 3; the same car of grain may be forwarded to Illinois and there inspected as No. 4, and from Illinois it may be sent to New Orleans and there inspected as 'no grade'; discounted from place to place anywhere from 1 to 15 cents per bushel, until it falls into the hands of the trust exporter, when it is again inspected as No. 2 and sold for No. 2 at No. 2 price, the difference falling into the hands of the trust instead of the farmer and producer."

The grain raised on a farm in Iowa may be shipped to three different points—Minneapolis, Chicago, and Kansas City. The rules of grading in Minneapolis for a certain grade of grain would require that it weigh a given number of pounds per measured bushel, contain a certain percentage of a particular kind of grain, possess a certain color, etc. The Chicago rule for determining the same grade will differ considerably from the Minneapolis standard, and the Kansas City standard will be different from either of the others. Now, as the price of the grain is dependent solely upon the grade it receives, this same grain would have three different values placed upon it at these three different terminals. These divers systems open up an immense field for manipulation in grades, which always works to the detriment of the producer. Because of this lack of uniformity one shipment of grain may receive as many different grades as there are different markets through which it passes.

(2) Practically all grain passes through one or more great terminal markets before reaching the consumer. Its value is fixed by the grade that is placed upon it at such terminals. Under the present system, whether under State laws or board of trade rules, the parties in interest as purchasers at the great terminals dominate and control all rules governing the handling of grain, its inspection, and grading. That such rules should be in the interest of the terminal purchasers under such a system is not surprising.

(3) The appointment of inspectors and the fixing of grades are under the control of the boards of trade. The relation between the inspection and grading power and the purchasing interest is most close and intimate.

(4) Appeals from the decision of inspectors are almost invariably taken to a board of appeals composed of persons who are either directly or indirectly interested in the purchase of grain, from the inspection of which the appeal is taken.

(5) That the inspection and grading departments at these great terminals are subservient to and dominated by the great elevator interests is established beyond question.

(13) One single example of the inefficiency in inspecting and grading will be sufficient. The testimony shows that a short time ago one inspector in the city of Chicago inspected in about half a day 250 cars of grain. This required the inspector to walk about 5 miles in going down one side and returning on the other side of the cars. The inspection certainly could not have been very thorough unless he inspected both sides, and with proper implements could determine not only what was at the top but in the bottom and in the middle of each car. He earned for the board of trade in that time $73 at the regular charges for inspection. The very most that could be said of his inspection would be that he made 250 guesses as to what was inside of those cars, and that these 250 cars were sold in the markets upon those guesses.

(14) Under the present conditions an enormous system of mixing or adulteration of grain has been built up, and this adulterated grain is forced on all the home markets and also into the foreign market, destroying all confidence in our grades and working to the detriment of the grain trade. That the manipulators and mixers reap enormous benefit through this system is beyond question, but always at the still greater detriment of the producers.

(15) Due to the improper certification and the almost impossibility of securing a high grade of American grain abroad, our grain is being discredited in all foreign countries to such an extent as to rapidly decrease our export trade in many sections, while that of Argentine Republic, Canada, and Australia is increasing in the same proportion that our trade is decreasing.

(16) Under the present system purchasers are compelled to accept the certification at the great terminals, and have no recourse when the product received fails to measure up to the standard of certification.

(17) The independent buyers at the country elevators dare not trust their own judgment in the matter of grades, because they have no confidence in the grades at the great terminal markets where they must dispose of the grain purchased. From experience, however, they know that on the whole the grain will be graded lower than it is entitled to, and they are therefore compelled to resolve every doubt against the producer.

(23) It is estimated that less than 4,000 men, comprising the various boards of trade, control the trade of the country in grain and arbitrarily fix the grades and price to be paid the producer. These boards of trade are banded together for the purpose of controlling the business, while the farmers or producers and small shippers are unorganized and unable to secure adequate justice.

(24) In those sections where the great terminal elevators have their line of smaller elevators throughout the country they are enabled not only to fix the price, but in many instances give instructions as to what grade shall be given at any elevator, irrespective of what the grain would properly grade.

(27) The Federal Government could adopt a uniform system that would answer all practical purposes and would meet the demands of the commercial world. This would eliminate the present injustices that are perpetrated against dealers, producers, and consumers alike. The employees would be free from obligation to the power that secures their appointment.

(28) Federal inspection and grading can not possibly harm anyone except him who is being benefited by the present wrongful system.

(29) Federal inspection would do away with this rigid and loose system of inspection and grading under which the greater proportion of frauds and injustices are perpetrated, and in its place that certainty in grades so essential to the grain business would be substituted.

(32) But it has been suggested that by the adoption of a Federal system of inspection we would force a double system upon the country. This is not true. Ninety per cent of the grain handled at the great terminals is interstate grain, and no board of trade or State would attempt to continue its inspection system over the other 10 per cent.

(33) Again, every producer who desires to secure the actual grain desires also that that grain measure up to the standard of its certification, and such purchasers would demand the Government certificate because it would carry the greater confidence.

(34) So, too, the foreign demand is universal for a Government certification, and they would purchase on the Government certificate only.

(35) Under our present system of meat inspection all meat at the packing house is inspected by the Government without regard as to whether it is intended for domestic or foreign use. The packers desire this to be done for their own benefit. If the Government can do this for the packers at its own expense, it certainly would not refuse to inspect and grade the other 10 per cent of intrastate grain at these terminals for the fees which would be charged and which would cover its expense. This would do away entirely with State inspection.

(36) It is safe to say that all the grain producers of the Northwest heartily desire Federal inspection. All of the independent grain dealers desire it. The great majority of the millers desire it. The foreign purchasers ask it. The legislature of at least one of the States, and it is one of the greatest grain-producing States in the Union, has petitioned repeatedly by resolution for Federal inspection. This universal demand of itself should be sufficient to secure this proposed legislation.

(37) Those who are charged, and, in our opinion, justly charged, with profiting by the misuse of the authority and powers placed in their hands under the present system are the only ones who are objecting to Federal inspection. And the only reason that they have attempted to urge it is that it is not feasible to have uniformity or Federal inspection. A complete answer to both of these propositions is that the Government can certainly do as well as is being done under the present system. It can enforce uniformity of grading and it can eliminate the present injustices in grading.

39. We believe that the only efficient remedy for the present injustices is the absolute divorce of the purchasing interest from the inspection and grading of grain, and this can alone be done by Federal authority.

The enactment of this law will not cause any additional expense to the Government for the reason that under the terms of the bill the service will be self-supporting. To have a competent corps of inspectors at the present markets, it is estimated, would require from 300 to 500 persons, including laborers and clerical force, at salaries ranging from $500 to $3,500 per annum. At an average of $1,200 per annum the expense of the service would be from $350,000 to $600,000 per annum. The present charge for inspection is from 35 to 75 cents per car or thousand bushels, and from one and one-half to two million cars are inspected annually, which, at the present price of inspection, would bring in a sum largely in excess of what would be necessary for the service. It is believed by your committee that under the terms of this bill the inspection charges will average much less than the present charges and still produce an adequate sum to cover all the expenses of the service.

The passage of the bill is recommended.

Mr. MANN. Mr. Chairman, this item for investigating and handling and grading the transportation of grain and fixing the definite grades thereof came into the agricultural appropriation

bill some years ago. It came in about the time the Committee on Interstate and Foreign Commerce, of which I was then a member, had given protracted hearings upon bills which proposed to have the Government of the United States grade all grains that entered into interstate and foreign commerce instead of having it graded by States or boards of trade. In most of the States where large amounts of grain are handled it is now graded by State inspectors. When the item was first placed in the bill my recollection is, although I may be mistaken, that I made a point of order on it, and it was stated then expressly by the gentleman in charge of the bill that it was not designed or proposed—and I call this to the attention of my friend from Iowa, who I think was a member of the committee at that time—that it was not designed or proposed to have the Government grade the grain or inspect the grain, but it was desirable to have the Government study the subject and fix standards for the grades. I remember it very distinctly, because after the Government organized its plant the board of trade at Chicago asked the Agriculture Department to establish one of its stations in Chicago, and the department replied to the Chicago Board of Trade that Mr. MANN on the floor of the House had said that they did not want anything of the kind in Chicago, for they did not need it. They made me take back water on the proposition. They said that they did want it to study the subject as to the moisture content.

That proposition is still up in various ways. Bills are pending desiring to have the Government inspect the grain. At the hearings before our committee, which were somewhat exhaustive and which lasted quite a while, the result was that after the hearings the committee did not recommend the passage of the bill, or any bill, that proposed to have the Government of the United States appoint inspectors and do the inspecting and grade the actual grain in interstate and foreign commerce. This provision, I think, is proper, notwithstanding what the gentleman from Iowa has said about it as useless, because we have not yet learned all there is to know on the subject of grading grain, especially as to moisture content, and no one yet has devised a method, so far as I know, by which you can be certain that grain shipped from New Orleans will have the same moisture content when it leaves as when it arrives at London. They are working on that subject, trying to ascertain what change of moisture will take place or how to avoid the change of moisture. You can not be certain in shipping grain from San Francisco that the moisture content will be the same when it starts as when it arrives. You can not be certain in shipping it even from Chicago to Baltimore, a great export center, in reference to the same thing. We do not know it all yet, and hence I think it is desirable to keep the item in and learn what we can and determine afterwards—but that can not be done by offering an amendment on the floor of the House to the agricultural appropriation bill—whether we will proceed to have the Government do all the work which is now done by all the numerous inspectors throughout the country.

Mr. LINTHICUM. Mr. Chairman, will the gentleman yield?

Mr. MANN. Certainly.

Mr. LINTHICUM. But it says here:

It has been proven that there is fully 5 per cent between the highest and lowest moisture in 50 grams, or, say, 150 to 170 kernels, of corn——

Mr. MANN. Oh, that is an article gotten up by somebody who may be biased on that side.

Mr. LINTHICUM. There is an absolute change in the moisture. The gentleman will admit that.

Mr. MANN. There may be.

Mr. TOWNER. Mr. Chairman, I think we ought to understand what is the real crux of the controversy. In order for the United States to properly establish grades for grain it will certainly be necessary to expend much more than $76,320.

Mr. ANDERSON. Will the gentleman yield?

Mr. TOWNER. In a moment. My colleague from Iowa thinks there ought to be a much larger appropriation for this purpose.

Mr. HAUGEN. No; the gentleman did not understand me. I want to fix the grade, and that is all I am after.

Mr. TOWNER. And a larger amount is necessary for that purpose. The gentleman from Minnesota [Mr. ANDERSON] thinks that there ought to be a much larger appropriation made for that purpose. However that may be, Mr. Chairman, I do not think that is the real matter now for determination, because the point of order, as I understand it, has been made.

Mr. HAWLEY. No; it has been withdrawn.

Mr. TOWNER. Not against this paragraph, but against the preceding one it has been made and sustained.

The CHAIRMAN. There is no point of order pending against this paragraph.

Mr. TOWNER. Not against this paragraph, but against the preceding one, which increases the appropriation. Now, the question before the committee for consideration is as to whether or not the appropriation in this paragraph ought to remain. I think it ought to remain, because I think even with this appropriation of $76,620 much may be done that will aid in this work. For instance, it is a well-known fact that out in the Central West there are different standards for grain, in Minneapolis and St. Paul, and Chicago, and also in Kansas City, Mo., so there is no uniformity between the markets regarding grades and standards. Much may be done by the National Government to bring these various standards that are in effect in the various cities into correlation and more into harmony with each other, and to that extent at least this appropriation may be valuable. I think that an investigation might be instituted by the department and very much done that would really be beneficial to the farmer.

My colleague from Iowa says the farmers know what they want. They want to be able to determine on some kind of standard that is fixed. They want to know what grade their grain is going to be when it reaches the market. They do not want to have it done in either a haphazard sort of way or determined by the whim or caprice of men who may be acting in their interests. It is of vast importance to them whether it is graded No. 1 or No. 2, or what the grade may be. It is of vast importance when it comes to be considered that these bushels of grain are numbered by the million and that a very slight increase or change in the grades means millions of dollars to the farmer, and so I certainly hope that this item may remain in the bill.

Mr. HAUGEN. Will the gentleman yield?

Mr. TOWNER. I will.

Mr. HAUGEN. I do not wish to be misrepresented here. I do not know of anybody who has offered an amendment here to strike out the appropriation or who has offered an amendment to reduce it; but what really I had in mind was the fixing of the standard——

Mr. TOWNER. I know.

Mr. HAUGEN. And providing the machinery.

Mr. TOWNER. I am not suggesting that the gentleman from Iowa, my colleague, is doing that.

Mr. LEVER. I would like to suggest, Mr. Chairman, that there is absolutely nothing before the committee; no motion pending to strike this item out or to increase or decrease it.

The CHAIRMAN. The gentleman from Iowa [Mr. TOWNER] moves to strike out the last word. However, the pro forma amendment will be withdrawn and the Clerk will read:

The Clerk read as follows:

For testing and breeding fibrous plants, including the testing of flax straw, in cooperation with the North Dakota Agricultural College, which may be used for paper making, $10,840.

Mr. MADDEN. Mr. Chairman, I reserve a point of order against the item, for the purpose of asking the chairman of the committee whether or not it was ever estimated for.

Mr. LEVER. I will say very frankly to the gentleman from Illinois that this item was not estimated for in the present bill. It has been carried in former bills for several years. After the cross-examination of the gentleman who has charge of this line of work before the committee and upon the personal statement of the gentleman from North Dakota [Mr. HELGESEN] the committee came to the conclusion that there were other lines of work which had not been touched upon and which might lead to valuable results, and we thought we should continue this work for several years to come.

Mr. MADDEN. But it was the opinion of the department that it was no longer necessary?

Mr. LEVER. The opinion of the department was expressed in language about like this: That they felt sure that there were other more important lines of investigation than this to which they could put their money; but the committee felt that it could still afford, on account of the commercial possibilities of flax from which paper of a very high grade could be made, it would be a good investment to continue this work for a short time.

Mr. HAWLEY. And I would like to ask the chairman if this is not true also, that one of the reasons leading the department not to estimate for this work at this time was the fact that under the new tariff law the importation of pulp wood and pulp for making paper from outside had lowered the price of paper, so that possibly the flax paper could not be sold in competition?

Mr. LEVER. Exactly.

Mr. HAWLEY. And that the flax paper would make a grade of paper much in demand, and would not come in competition with the outside paper?

Mr. MADDEN. They thought it was wise to continue it?

Mr. LEVER. Yes; and it was the unanimous opinion of the committee.

Mr. PLATT. Can the fiber of this flax in North Dakota be used to make linen cloth from?

Mr. LEVER. I would like my friend from North Dakota [Mr. HELGESEN] to answer that question.

Mr. HELGESEN. What is the question?

Mr. PLATT. It can not be used to make linen cloth from, can it?

Mr. HELGESEN. It probably could. The trouble with flax is it is not raised for linen, but for the seed alone, and there are about 400,000 tons of flax tow used for upholstering, and such other things, but we would like to have experiments made for paper for this reason:

There is a report before the committee in which it says that undoubtedly flax will produce a paper that is strong, and, ranging all the way from writing paper down to packing paper, that is much stronger and more expensive than ordinary paper. They say because of economic conditions now prevailing, which I presume is the tariff question and the way the tariff affects the newspaper industry, you can not make print paper out of flax to compete with pulp paper. You can make expensive paper from writing paper down to the strongest kind of packing out of flax. From their experiments they have found it advisable to continue them.

Mr. PLATT. As I understand, this flax, in order to get the seed which is necessary, has to be carried on to a greater maturity?

Mr. GOULDEN. How long have these experiments been going on in North Dakota?

Mr. HELGESEN. I think they have been going on for two years.

I will insert herewith the memorandum to which I have referred, as follows:

[Statement accompanying letter of Dr. Galloway to Mr. LEVER of February 7, 1914.]

MEMORANDUM ON PROGRESS OF TESTING CROP AND WILD PLANT MATERIALS THAT MAY BE SUITABLE FOR PAPER STOCK.

The current appropriation act, and for several years back, has carried an item "for testing and breeding fibrous plants, including testing of flax straw, in cooperation with the North Dakota Agricultural College, which may be used for paper making."

EXPERIMENTS WITH FLAX STRAW.

Flax straw, because of the unusually promising nature of its fiber, has lured a great many inventors and promoters into projects involving its utilization. At the present time there is practically no commercial industry based on this material for paper-making purposes, although between three and four hundred thousand tons per year of tow for upholstering furniture is produced. In addition, very considerable quantities of binding twine are made from flax straw, which is specially handled, and which is grown chiefly in southern Minnesota and adjacent parts of Iowa.

Flax straw has proven very refractory in the experiments of the department, but the work of the present season has been more successful than any previously conducted. This is due in part to an improvement of our methods due to careful study and experiment, and in part to a new digestor, constructed especially for our experiments, which was installed and used for the first time during the past summer.

An examination of the samples designated with pink-numbered tabs in the sample book will illustrate the range of papers and pulps that have been prepared from flax straw.

In cooperation with the Dickinson branch of the North Dakota Agricultural College and Experiment Station a carload of flax straw, grown under typical North Dakota conditions, was secured and transported to Cumberland Mills, Me., to the cooperating paper mill for experimental working up. The experiments have not been completed, but the progress thus far made indicates a strong possibility of producing fine white writing paper, extremely strong paper suitable for flour and cement sacks, and wrapping papers from flax straw. As the cooks have been made in lots of 200 pounds or less it has not been possible to get accurate cost figures, but it may be said that the experiments gave evidence of a sufficiently low chemical requirement for digestion and bleaching as to give commercial promise. In this connection it should be borne in mind that several million dollars have been wasted through stock selling in insolvent and ill-conceived companies, and in promotional enterprises without establishing an industry based on the material. The experiments indicate good promise, but prospective investors should not be misled into financial loss through failure to scrutinize most carefully solicitations to purchase stock in companies organized to exploit flax straw as a paper stock.

The yield of pulp in proportion to raw material used has been more satisfactory than in any previous experiments, averaging for a considerable number of cooks at least 46 per cent.

The ultimate commercial success of flax straw as a paper material would depend not upon its cheapness, but upon its adaptability for special uses requiring unusual strength for which unusually high prices are paid. The experiments, while incomplete, are certainly promising.

Mr. CANDLER of Mississippi. This is a recent appropriation, and it proposes to continue it at this time, as suggested a moment ago, because it is proposed to continue a line of investigation which promises results, and the committee wishes to put it in for that reason.

Mr. HELGESEN. The last paragraph of the letter which I have inserted reads:

The ultimate commercial success of flax straw as a paper material would depend not upon its cheapness, but upon its adaptability for special uses requiring unusual strength for which unusually high prices are paid. The experiments, while incomplete, are certainly promising.

Mr. GOULDEN. From whom is that letter?

Mr. HELGESEN. This is a letter from Dr. Galloway to the gentleman from South Carolina [Mr. LEVER].

Mr. GOULDEN. Dr. Galloway is the Assistant Secretary of Agriculture, and a very good one, too.

Mr. BYRNS of Tennessee. Mr. Chairman, I move to strike out the last two words. I wish to refer to the following paragraph:

For the investigation and improvement of tobacco and the methods of tobacco production and handling, $25,000.

You will see that only $25,000 is appropriated. This is a reduction, if I remember correctly, of about $6,000 from the amount allowed last year. I want to ask the gentleman from South Carolina what brought about the action of the committee in reducing that appropriation?

Mr. LEVER. I will be very glad to read what was the statement of the department itself in submitting its estimates. It says:

NOTE.—There is a decrease in the above item of $6,630. The decrease in this item is due to a proposed modification of the work which will involve the abandonment of some features of the field work, including variety testing, curing, etc., a great deal of this work having reached a point where it is believed that it can be very satisfactorily carried on by the State or local organizations. It is proposed to utilize the funds chiefly for laboratory work, there still being a number of important problems to solve. Experiments will also be made looking to the development of crop rotations which will include tobacco, which has heretofore been grown largely as a special crop.

In other words, the department's statement is to the effect that certain lines of work have been completed and that they do not need the money.

Mr. BYRNS of Tennessee. The gentleman will remember that about two years ago, I think it was, the House, by an amendment proposed and adopted on the floor of the House, increased the appropriation at that time by a certain amount for the purpose of placing a Government expert at Clarksville, Tenn. That was the real object of the amendment. That expert has been sent there, and he has been there now a little more than a year, possibly, and he has given great satisfaction. The tobacco growers are very much pleased with the fact that he is there and pleased with the work he has accomplished and is expected to do in the future. I wondered whether this contemplated the abandonment of that work.

Mr. LEVER. I think not. This report is furnished me by the department:

The investigations in Ohio have advanced to the point where the principal factors have been largely completed and the investigations will be brought to a close at the end of the present year.

I take it from that statement that there will be no interference with the gentleman's work.

Mr. BYRNS of Tennessee. That is entirely satisfactory. I am gratified to know that this place at Clarksville is not to be discontinued. I withdraw my pro forma amendment.

The CHAIRMAN. The gentleman from Tennessee [Mr. BYRNS] withdraws his pro forma amendment.

Mr. NORTON. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from North Dakota [Mr. NORTON] moves to strike out the last word.

Mr. NORTON. Mr. Chairman, from the item now under discussion as good results may be reasonably expected to follow as from almost any other item of appropriation in this bill. Under existing farming methods every year throughout the country millions of tons of flax straw containing valuable fiber is allowed to go to waste. It has, of course, been known for centuries that most durable and most beautiful cloth can be made from the fiber of the common flax plant (Linum usitatissimum), which produces the seed now of such great commercial importance. The best linen cloth is made from fiber of the plant which is gathered before the seed ripens. When the seed is allowed to ripen the fiber becomes hard, and it is then found difficult to manufacture it into cloth or any other commercial product at a profit to the manufacturer. A few years ago experiments were begun by the Department of Agriculture to discover, if possible, a method of converting the fiber in flax straw into paper in such a way that the manufacturing process would be commercially profitable. Considerable success has been met with in the experiments already made. While it has not yet been found that the cheaper qualities of paper can be manufactured from the fiber in flax straw it is now thought that with some slight improvements in the best method of manufacture already discovered the finest qualities of paper can be manufactured from this fiber at paying profits to the manufacturer. The discovery of an economical method of manufacturing this by-product of the flaxseed grower into the cheaper qualities of

paper will mean millions of dollars of profits each year into the pockets of American farmers.

The acreage of flax in North Dakota in 1909 was more than one-half that of the whole United States. Thus it is most fitting that the experiments provided for in this appropriation should be carried on in connection with the agricultural college of our State, which, as many gentlemen here know, is one of the best and most useful institutions of its kind in the country. From reports that have already been made on experiments conducted along this line, I am confident that the final results from the experiments contemplated to be continued and conducted under this specific appropriation will be ample justification for every cent of the appropriation.

The CHAIRMAN. The gentleman from North Dakota withdraws his pro forma amendment. The Clerk will read.

The Clerk read as follows:

For beet-sugar investigations, including studies of diseases and the improvement of the beet and methods of culture, $41,495: *Provided*, That of this sum $10,000 may be used for investigations in connection with the production of table sirup, including the breeding, culture, and diseases of cane, and the methods of manufacture, standardization, and marketing of sirup, and the utilization of cane by-products.

Mr. ANDERSON. Mr. Chairman, I reserve a point of order on the proviso.

The CHAIRMAN. The gentleman from Minnesota [Mr. ANDERSON] reserves a point of order on the proviso.

Mr. ANDERSON. Mr. Chairman, I do so for the purpose of asking an explanation from the committee. I wanted an explanation of the item. It is apparently new.

Mr. LEE of Georgia. Mr. Chairman, that is really an item that was carried back in 1902. It is really an old item. For a few years the experiment was carried on. I presume the gentleman understands the object of the appropriation. In four or five of the Southern States, namely, South Carolina, Georgia, Florida, Mississippi, Louisiana, and perhaps Texas—in the eastern part of Texas—they grow a quality of cane known as ribbon cane for sirup. It is not the sugar cane that is grown for sugar. The great trouble about this proposition is that, though this particular quality of cane makes a very delicious sirup, if it is not properly handled it does not turn out satisfactorily. It seems that the little planters throughout the country have not discovered a way to do it. If it is too green or not cooked quite enough, it sours; and if it is cooked too much, it granulates.

Now, this investigation is for the purpose of discovering the best methods of growing this cane and manufacturing this sirup.

Mr. ANDERSON. Is it not a fact that the purpose of this appropriation is to encourage the growth of this kind of cane in sections where it is admitted that the sugar-cane industry will be destroyed?

Mr. LEE of Georgia. No. The gentleman is entirely mistaken about that. It is an entirely different kind of cane. It has been grown for 50 years, I take it.

Mr. MANN. Mr. Chairman, may I ask the gentleman a question?

Mr. ANDERSON. Certainly.

Mr. MANN. Are they trying to grow a sorghum cane that will make sirup that is not so strong but that northern people can eat it?

Mr. LEE of Georgia. We are growing a kind of cane that the gentleman has probably not eaten.

Mr. MANN. Oh, yes; I have eaten it. It is too delicious for me to eat. It is too strong. [Laughter.]

Mr. LEE of Georgia. This sirup is not too strong. If you keep it too long, of course it might get too strong.

Mr. MANN. Oh, I had it sent to me from Georgia a number of times by kindly disposed gentlemen. It is delicious sirup, except that it is too strong.

Mr. LEE of Georgia. Well, if you eat too much of it it has a bad effect, perhaps. [Laughter.]

Mr. MANN. Oh, not too much of it.

Mr. CANDLER of Mississippi. This character of sirup, I will say to the gentleman from Illinois, if the gentleman from Minnesota [Mr. ANDERSON] will permit, is not too strong. It is very mild and sweet and delicious, and commends itself to everybody's appetite.

Mr. MANN. It requires a vicious and false appetite. [Laughter.]

Mr. CANDLER of Mississippi. Oh, no. I have tried some of it, and I recently had my better half in my household, my wife, try it, and she was very much delighted with it. I think the gentleman must have gotten a different variety.

Mr. MANN. No. I will say that when we passed the pure-food law Dr. Wiley, who was very strongly in favor of pure sirups, convinced me that sirups ought not to be adulterated, and so forth. He said, "I will send you some that you can eat; it is good Georgia sirup." He did. I tasted a little of it. It was very strong. If you adulterate it, it makes it very good sirup, but without adulteration it is too strong. You can not get a market for it.

Mr. COLLIER. Doubtless the gentleman has never tasted the Mississippi sirup.

Mr. LEE of Georgia. The only adulteration you need for this sirup is a hot biscuit and a little butter. [Applause.]

Mr. ANDERSON. Mr. Chairman, I withdraw my reservation of a point of order.

The CHAIRMAN. The gentleman from Minnesota withdraws his reservation of the point of order. The Clerk will read.

The Clerk read as follows:

To investigate and encourage the adoption of improved methods of farm management and farm practice, and for farm demonstration work, $400,000: *Provided*, That of the amount hereby appropriated the sum of $9,180 may be used in the investigation and utilization of cacti and other dry-land plants as food for stock.

Mr. McLAUGHLIN. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from Michigan [Mr. McLAUGHLIN] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend, page 19, line 19, by striking out the figures "$400,000" and insert in lieu thereof "$518,800"; and at the end of line 22 insert the following:

"*And provided further*, That hereafter no part of this or any other appropriation herein made for the Department of Agriculture shall be used in paying salaries or expenses of officers, agents, collaborators, or other employees who are paid in part by contribution of money from any source whatever outside the State where such officers, agents, collaborators, or other employees carry on their work; and hereafter in carrying on the work of the Department of Agriculture, and in all work or service in connection therewith, the Secretary of Agriculture shall not employ or permit employment of any person unless such employment or service is or hereafter shall be authorized by law, or unless the compensation and expenses of such person be paid wholly by the United States or partly by the United States and partly by a State or some agency, association, or authority within the State in which the work or service is to be performed."

Mr. LEVER. Mr. Chairman, I reserve a point of order against the amendment.

The CHAIRMAN. The gentleman from South Carolina reserves a point of order against the amendment.

Mr. McLAUGHLIN. Mr. Chairman, I have offered this amendment believing thoroughly that all work done by the Federal Government, or for which the Federal Government is responsible, ought to be paid for by the Federal Government, and that assistance ought not to be received from private sources. For the purpose of assisting in carrying on this very important and necessary work of "farm management" and "farm demonstration" private contributions have been made, some of it coming from sources which are, I think, objectionable, and from which no money ought to be received. In order that the work may be carried on by the Department of Agriculture in the manner and on the scale contemplated by the department without receiving contributions from outside sources, I have offered this amendment increasing the amount sufficiently, I believe, to take the place of the contributions from private sources.

Mr. DAVIS. Will the gentleman give us a statement of the sources from which some of this illegal money has been received and the use to which it has been put?

Mr. McLAUGHLIN. In answer to the gentleman, I might speak of the work done under this paragraph and the work done under the following paragraph, the "cooperative demonstration" work in the boll-weevil section of the country.

In speaking of the latter first, I will say that the general education board works with money contributed by Mr. Rockefeller. If my friend wishes to call it tainted money——

Mr. DAVIS. I did not call it that.

Mr. McLAUGHLIN. The gentleman from Illinois [Mr. MADDEN] did. The Government has for several years accepted $250,000 a year, and some 600 men are employed by the Government and carried on the rolls of the department at $1 a year each, the remainder of their salaries being paid out of moneys received from the general education board, which board receives its money from Mr. John D. Rockefeller.

Mr. MADDEN. Will the gentleman yield right there?

Mr. McLAUGHLIN. I yield to the gentleman from Illinois.

Mr. MADDEN. Is it the idea of the gentleman from Michigan that the work done by these men may not be as well done because of the private contributions, or is it his idea that it may be done in such a manner as to favor some private interest?

Mr. McLAUGHLIN. Speaking plainly, I will say there is abundant evidence of the fact that the gentlemen who furnish the money or control its distribution demand or request the

uming and selection of the men who are to be employed by the department and who are to receive their money.

Mr. MADDEN. Then all that the Government does is to give the authority and the title?

Mr. McLAUGHLIN. The secretary of the general education board assumes to dictate, or asks the privilege of selecting the men; asks the department to clothe them with the dignity and authority attaching to and possessed by agents of the Federal Government. The department directs the work and accepts it.

Mr. MADDEN. The Government is responsible for what they do?

Mr. McLAUGHLIN. The Government is responsible for what they do.

Mr. MADDEN. And it is said to be a Government service, while, as a matter of fact, it is a private service. Is that it?

Mr. McLAUGHLIN. My point is, and the reason of my objection is, that it is or may be a private service while it appears to be a public service. As I understand it, these gentlemen who furnish the money insist that they be permitted to dictate the appointment of the men, and it is believed that they wish so to dictate because they wish their particular doctrines disseminated by these men amongst the people with whom they do their work.

Mr. MADDEN. What difference can there be between their particular doctrine and the doctrine of the Government?

Mr. McLAUGHLIN. The gentleman from Illinois knows as well as I do what their doctrines are.

Mr. JOHNSON of Washington. Is there not a great amount of press-agent work that goes on in connection with this work, apparently done by the Government?

Mr. McLAUGHLIN. I believe there is more or less objectionable work done along these lines or growing out of it. I am not going into a full discussion of it. I am stating only a few facts and giving briefly some evidence in support of them; am calling the attention of the House to a very objectionable practice into which we have fallen. I have not time for full discussion of it.

The CHAIRMAN. The time of the gentleman has expired.

Mr. McLAUGHLIN. I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. The gentleman from Michigan asks permission to proceed for five minutes. Is there objection?

There was no objection.

Mr. McKENZIE. I should like to ask the gentleman from Michigan whether an account is rendered by the Government of the amounts received and disbursed given by private contributions?

Mr. McLAUGHLIN. I suppose a record is kept. I do not know whether any report is made. I have never seen any.

Mr. ANDERSON. There is a report or account of this fund on page 130 of the hearings, and I direct attention to the fact that all this money is spent in some 10 Southern States.

Mr. McLAUGHLIN. There is a report of a contribution of $250,000 a year by the General Education Board, which we all know uses money contributed by Mr. Rockefeller. Now, I do not wish to question the quality of the work done by the men employed in this way and paid out of this fund, but it seems to me no authority except the United States itself should make the selection of the men to do this work, and that it ought to be carried on in such a way that no suspicion whatever can attach to it, so that no question whatever can arise as to who these men are, how they are employed, and what they are doing.

Mr. CANDLER of Mississippi. Will the gentleman yield?

Mr. McLAUGHLIN. Yes.

Mr. CANDLER of Mississippi. Does the gentleman undertake to make the statement that all of the employees who are employed in the expenditure of this fund are arbitrarily selected by the people contributing the fund, and that it receives the approval of the people of the United States Government, and that the United States Government thereby adopts that work and is responsible for it?

Mr. McLAUGHLIN. In answer to the gentleman from Mississippi, I will say I do not make the charge that the employment of all of these men is dictated by the persons who contribute the money; but I will say there is abundant evidence of the fact that the men who contribute the money try to dictate the appointments, and I have it from one of the highest officials of the Department of Agriculture that he has refused further offers of money from the General Education Board because its secretary has offered the money on condition that he be permitted to dictate the appointment of the men.

Mr. MADDEN. These men only endeavor to show the farmers how to improve the methods of farm management, do they not?

Mr. McLAUGHLIN. They are employed to go out among the farmers, to meet them and talk with them about their work and endeavor to assist them. I would very much prefer, and I think it absolutely ought to be required, that men going out in that way, bearing the stamp of the Federal Government, be really and in fact the employees of the Federal Government, paid by Federal money, not selected by any other authority and not responsible in any manner or respect to any other authority.

Mr. FESS. Will the gentleman yield?

Mr. McLAUGHLIN. I will.

Mr. FESS. Does the gentleman know whether any member of the directorate of the Rockefeller fund is an identified official of the Government?

Mr. McLAUGHLIN. I believe the Secretary of Agriculture has been, if he is not now, a member of the General Education Board.

Mr. CANDLER of Mississippi. I never heard any criticism of the expenditure of this money. I call attention to the fact that the gentleman from Minnesota seems to be troubled because the money is spent in Southern States. If the people want to contribute money to spend in the Southern States, they have a right to have their money spent where they please.

Mr. McLAUGHLIN. If the gentleman will permit, I will say that while I have offered this amendment to the paragraph beginning in line 7, which provides money to be used largely in the North, I shall be pleased to offer a similar amendment to the paragraph occupying the last three lines of the page, which appropriates $378,000 for work in the South. I spoke of the work in the South because more of the General Education Board's money is used in the South, or in connection with the $378,000 appropriation, than in the North, although some of the $400,000 appropriated in the paragraph above is used in work in the South. I find by examination of statements made by the officials of the Department of Agriculture that under that $400,000 appropriation 84 men are employed at $1 a year, and the balance of their salaries and all their expenses are paid by money contributed by the General Education Board; that there are 30 more men paid out of that fund whose salaries run from $100 to $200 a year. It is evident that these men must be paid more than that; their expenses must be paid, and the Government pays no part of them, except the trifling sums stated above. They get their pay, or most of it, from this private fund of which I speak.

Mr. BUTLER. Will the gentleman yield?

Mr. McLAUGHLIN. Certainly.

Mr. BUTLER. What occasion is there for this contribution? The gentleman has excited my curiosity. Is it done through benevolence? Why should not the Government do the whole of it? Why does Mr. Rockefeller make such a contribution? Does the gentleman know the reason, or has it ever appeared in the hearings?

Mr. McLAUGHLIN. I do not know why Mr. Rockefeller makes these contributions. I think it would not be so objectionable if no strings were attached to them. Answering further, I will say that the Government is abundantly able to do this kind of work, and it ought to do it, especially when some suspicion attaches to the character of the work of the employees who receive the money and to the source from which the money comes. It is time for the Government to refuse these contributions and furnish all the money itself.

Mr. McKENZIE. Will the gentleman yield?

Mr. McLAUGHLIN. I will.

Mr. McKENZIE. In your investigation of this matter, have you ascertained whether or not any of these gentlemen appointed at the dictation of the men making these gifts to the Government are made use of as advertisers of something that the donor has to sell, such as fertilizers, or anything of that kind?

Mr. McLAUGHLIN. I know in the North that the International Harvester Co. contributes a million dollars a year for work similar to this, and the same amount of money has been contributed by one of the great department houses of Chicago—Sears, Roebuck & Co.—for carrying on work, or assisting in carrying on work similar to this.

It seems to me, Mr. Chairman, that the Government of the United States is abundantly able to carry on this work itself. Knowing something of the character of the work, how it is received throughout the country, I believe it ought to be continued and it ought to be enlarged. And because I think it ought not to be curtailed I have offered this amendment increasing the amount to $518,000 over what is carried in the bill—$400,000.

Mr. CANDLER of Mississippi. Will the gentleman yield?

Mr. McLAUGHLIN. Yes.

Mr. CANDLER of Mississippi. Does the gentleman know, as a matter of fact, that Dr. S. A. Knapp, in charge of the cooperative work, appeared before the educational board and secured the first contribution that was ever given to engage in this work through the South as well as through the country?

Mr. McLAUGHLIN. I never knew the origin of it. I never knew how the contribution was made in the first instance, but I do know that an attempt is now being made by gentlemen who control the distribution of this money to dictate the appointment of the men to whom the money shall be paid.

Mr. CANDLER of Mississippi. We will all agree that that ought not to be. But the origin of that donation came from that source. Dr. Knapp came before the educational board and set forth the developments which might be secured, and it was satisfactory to them and they made the first appropriation. Dr. Knapp would never engage in anything improper or dishonorable to this Government.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. McLAUGHLIN. I ask unanimous consent for five minutes more.

The CHAIRMAN. The gentleman from Michigan asks that his time be extended five minutes more. Is there objection?

There was no objection.

Mr. McLAUGHLIN. I would not have the gentleman understand that anything I have said was intended as a reflection on Dr. Knapp. I knew him during his life, and I believe I appreciate the value of the work he did. I would be the last to say anything reflecting upon him.

Mr. CANDLER of Mississippi. I did not mean to insinuate that the gentleman would for a moment suggest anything of the kind. I merely suggested it as the source from which the first original donation came. I know the gentleman would agree with me in saying that Dr. Knapp would not engage in anything that was not proper and honorable.

Mr. McLAUGHLIN. I am speaking about the men who make the contribution, who control its distribution. I am speaking against the system of Government cooperation with any private individuals or firms or corporations like the Standard Oil Co. or any other agency whatever. I do not think it is right; it is certainly unnecessary. I think the work ought to be carried on in such a way as to be altogether above suspicion.

Mr. MANN. Does the gentleman know how much this general education board contributes?

Mr. McLAUGHLIN. Two hundred and fifty thousand dollars a year for this work in connection with the $378,000 appropriation in the cotton States.

Mr. MANN. That is contributed to the Government?

Mr. McLAUGHLIN. To the department.

Mr. MANN. They pay it into the Treasury?

Mr. McLAUGHLIN. I believe they do.

Mr. MANN. Who has control of this amount when paid in?

Mr. McLAUGHLIN. If it is paid into the Treasury, it is controlled by the Department of Agriculture.

Mr. MANN. The department is not obliged to appoint a man unless it wishes, is it?

Mr. McLAUGHLIN. Of course not.

Mr. MANN. What real objection is there, if we are going to let these people contribute the money, to their having something to say about the men who are to receive the salaries where the Government contributes one dollar and the other people contribute a thousand, so long as those employees are under the control of the Government?

Mr. McLAUGHLIN. If we were unable to contribute the money ourselves——

Mr. MANN. We are unable to. I want to get some for my county, and I can not do it. I have been unable to.

Mr. McLAUGHLIN. It is because Congress refuses to make the appropriation.

Mr. MANN. I know; and it will continue to refuse. That is the trouble.

Mr. McLAUGHLIN. And I will remind the gentleman that only two years ago, when I asked for a substantial increase in this appropriation, out of which money to his own county might be paid, he opposed it on the floor of this House and said the work ought to be done by the States.

Mr. MANN. Oh, the gentleman is mistaken. I have always supported this proposition, so far as I recall. Of course, if the gentleman has read a speech of mine lately on the subject, very well. I have helped to maintain all of these items, and my State gets nothing, although our counties all over the State would like to have this work. The gentleman may get it in Michigan, but I do not think he gets very much there.

Mr. McLAUGHLIN. If the gentleman from Illinois will read the debate on the Agricultural bill before the House two years ago, when I offered an amendment increasing the appropriation to $250,000 and the gentleman from Illinois [Mr. STONE] offered an amendment increasing the appropriation to $251,000, the gentleman will find that he joined with the gentleman from Virginia, Mr. Lamb, then the chairman of the Committee on Agriculture, and opposed these amendments.

Mr. MANN. Oh, I expect that is likely. I have supported the Agricultural bill every year for years, but not upon the ground stated by the gentleman.

Mr. TOWNER. Mr. Chairman, will the gentleman yield?

Mr. McLAUGHLIN. Yes.

Mr. TOWNER. I believe the gentleman stated earlier in his remarks that these men were carried on the rolls at an annual salary of $1?

Mr. McLAUGHLIN. One dollar per year.

Mr. TOWNER. And subsequently I understood the gentleman to say that they were paid their salary out of the Treasury of the United States.

Mr. McLAUGHLIN. I do not know how they receive their salaries. I know that the only call on the Treasury of the United States for these men is $1 a year.

Mr. TOWNER. Is it not true that no money is paid out of the Treasury of the United States to these men, except that $1, which carries them on the roll, and that all of the rest of the expense is paid from the Rockefeller fund?

Mr. McLAUGHLIN. I do not know just the manner in which these men are paid nor just how the bookkeeping of the department is done, but I do know that these men are taken and accepted as employees of the Department of Agriculture, and this work is done as if it were work of the Department of Agriculture. The department vouches for it and approves it, while it is paid for by money from private sources.

Mr. McKENZIE. Mr. Chairman, will the gentleman yield?

Mr. McLAUGHLIN. Yes.

Mr. McKENZIE. How much money was donated to the Government last year in this way and for this purpose?

Mr. McLAUGHLIN. I know of only the $250,000 which was used in connection with this boll-weevil appropriation in the South.

Mr. McKENZIE. To whom is that paid?

Mr. McLAUGHLIN. I do not know the modus operandi, but I know that $250,000 came from the Rockefeller fund, and I know that the Department of Agriculture pays only $1 a year for each of these men.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. McLAUGHLIN. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection?

Mr. LEVER. Mr. Chairman, reserving the right to object, I desire to call the gentleman's attention to the fact that he is a very influential member of the committee and a member of the subcommittee of the Committee on Agriculture, and I think the gentleman knows the chairman's own feelings in this regard. I exceedingly regret the gentleman, as a member of the committee, has not brought this matter to the attention of the full committee. It surprises me and other members of the committee that it is brought here now for the first time. It is clearly subject to a point of order. It has already provoked a great deal of discussion, and I would like very much to get along with the consideration of the bill. I will say to my friend that I am bound to make the point of order, although, in the main, I agree with his proposition; but it is not a proposition that the committee has considered. I shall not object to his request, of course, if he desires to proceed for five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. McLAUGHLIN. Mr. Chairman, I regret that I did not bring this before the committee. Perhaps I should have done so; but it is a matter of great importance, and I trust that I am not out of order, that I am doing nothing unbecoming in bringing this important matter to the attention of the House.

Mr. LEVER. I do not want the gentleman to think my words carried that insinuation. The gentleman has a perfect right to offer his amendment.

Mr. McLAUGHLIN. And I feel sincerely, Mr. Chairman, that the Government, abundantly able to furnish the money itself, ought not to receive money in this way, especially when it comes or is offered under such circumstances as to arouse suspicion. As I say, one very important official of the department told me that he was offered money to carry on this work, and, speaking of contributions made by the General Education Board.

said that he had found it objectionable to receive money from that source because its secretary had assumed or requested the right to name the men who should be employed and paid under this appropriation or out of the money contributed by the board. And the same kind of work also is being carried on throughout the States. The secretary of this education board goes to a State and asks the State to accept money from that board and to refuse money from the Federal Government, on condition that the secretary of that board be permitted to dictate the selection of men who shall be paid out of the fund. Now, it seems to me that it is time for this House to know where this money comes from, the condition on which it is offered, and how it is being used, and of the suspicion that attaches to it. If we are poor and unable to make the appropriation ourselves, then we may perhaps be humiliated by being compelled to accept money from outside sources, but we are abundantly able to furnish all the money ourselves, and I insist, Mr. Chairman, that we ought to do it.

Mr. CANDLER of Mississippi. Will the gentleman yield?

Mr. McLAUGHLIN. I will.

Mr. CANDLER of Mississippi. The gentleman has stated that certain suspicion attached to it. That is a very indefinite term. What suspicion attaches to it?

Mr. McLAUGHLIN. I have told the gentleman officials of the department have told me——

Mr. CANDLER of Mississippi. Has the gentleman got any specific charge? If his suspicion has any vitality——

Mr. McLAUGHLIN. I have learned that the department dislikes to receive money because there is a string to it, and that the secretary of the General Education Board wishes to dictate the selection of men.

Mr. CANDLER of Mississippi. There might be a string to it, but that would not be a suspicion. The word "suspicion" indicates something wrong, something corrupt, something that is not proper; and the gentleman has used that word three or four times, and I want to know what the extent of that suspicion was.

Mr. McLAUGHLIN. Mr. Chairman, I am sure I am right in saying that suspicion has been, and ought to be, aroused on account of the source from which these large contributions of money come, on account of the manner in which the money has been used, and on account of the improper and very offensive demand of the secretary of the General Education Board that, in consideration of further money which he offers to supply, he shall be permitted to name the men who will receive the money and carry on the work among the farmers of the country.

I am not assailing Mr. Rockefeller, who supplies the money with which the General Education Board carries on its work. This House and the country know Mr. Rockefeller. I am calling attention to the fact that Mr. Rockefeller's money is, and for several years past has been, contributed to and used by the Department of Agriculture in its farm-demonstration work in the cotton-growing sections of the South. The general plan of the work is good, and it ought to be continued and extended, but I believe, under existing circumstances, the Federal Government ought not to accept the money. It certainly ought not to accept the Rockefeller contribution, in view of the fact that the secretary of the board is demanding the privilege of naming the men who are to receive the money and who are to go out among the farmers of the country, giving the impression that they are employed by the Department of Agriculture. There is a well-founded suspicion that the donor of this money and the secretary of the board, who directs its distribution, are seeking to employ their own men, or men of their own kind, who will go about the country bearing the stamp of the Department of Agriculture and ostensibly working for the department while they are really employed by Mr. Rockefeller and are disseminating ideas and doctrines favorable to him and to his methods of business. The people of the United States ought not to carry on the Government by cooperation with any man or set of men, and this Congress ought not to be beguiled by an offer of large sums of money from a private source, made for the purpose of supplementing the Federal appropriation, when it is made clearly to appear that the offer of money has a string attached to it or that the money is used in such a way as to arouse suspicion of the motives of the person who offers it. I think it is very objectionable indeed to have men employed to go out among the people of the country, men ostensibly representing the Department of Agriculture and for whom that department vouches, whereas in fact they are men employed by the General Education Board, paid out of money furnished by Mr. Rockefeller, and who represent him instead of the Government of the United States.

The work of farm management and farm demonstration, carried on in part by this appropriation, is very helpful to the farmers of the country when carried on right. The department has expended untold millions of money in making experiments and investigations, the results of which are piled up in the department. These are the only appropriations ever made for the purpose of taking those results to the men whose money produced them and who have a right to know and have the advantage of them. The people of the country wish these appropriations made and wish men employed to assist farmers in learning and applying the information which has been obtained for their use and benefit, but I am sure they will resent the employment of men and the presence among them of men who come to them under suspicion of employment by one who is suspected of using his money solely for his own benefit. The Government of the United States is not a mendicant; it is abundantly able to provide money for every legitimate purpose; and every appropriation of money and every use of money ought to be above suspicion.

What the chairman of the committee has said is an admission of my charge to the effect that the secretary of the General Education Board has attempted to dictate the selection of employees of the Department of Agriculture, or improperly to influence their appointment, and that suspicion attaches to the acceptance and use of the money contributed by this board. The chairman says that the Committee on Agriculture will consider a measure and present it to the House to make contribution of money from objectionable sources impossible in the future. Such a bill can apply only to appropriations hereafter to be made and to the work of the department in future years. The amendment I have offered, if adopted, will stop the objectionable practice now and enable the department to carry on its work, as I know it wishes to do, free of all suspicion.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. LEVER. Mr. Chairman, the appropriation for farm-demonstration work in the South has been carried in this bill, according to my recollection, for about eight years. It was carried in this bill long before I became chairman of the committee. It has been understood by all the members of the committee that a portion of the funds for farm-demonstration work in the South was contributed by the general education board. The truth is, not a dollar of the general education board money is expended in the boll-weevil section of the South. My understanding is that the general education board fund is expended only in sections outside or beyond the boll-weevil sections—that is, in Georgia, South Carolina, North Carolina, Virginia, Maryland, West Virginia, and probably Kentucky.

Mr. McLAUGHLIN. Is not the money contributed by the general education board used to supplement this appropriation, this particular appropriation?

Mr. LEVER. The money contributed by the general education board is not used to supplement the boll-weevil fund, but is used in sections outside the boll-weevil district; but that makes no difference. It does not change the principle involved at all. What I wanted to do was to call the attention of the gentleman——

Mr. McLAUGHLIN. If what the gentleman says is true, it means this money is being improperly used because this money is to be used to meet the ravages of the cotton-boll weevil.

Mr. LEVER. I am afraid my friend does not understand my proposition.

Mr. HAWLEY. The gentleman is referring now to the last paragraph of the page; the amendment is to the next to the last paragraph.

Mr. LEVER. I am speaking of the farm-demonstration work in the South—the boll-weevil work. I understand what the gentleman from Michigan has in mind. What I want to call his attention to is the fact that these contributions from the general education board have been going on for the past six or eight years. I myself believe that probably the time has come, probably it has been here some time, when the Federal Government, through Congress, should prohibit any of these contributions for work that the Federal Government can do. I think the gentleman from Michigan is willing to admit that I suggested that to him in a private conversation not long ago, but I do not believe that legislation of this important character ought to be put upon an appropriation bill without the consideration of any committee or without a full understanding of what its general effect will be. The fact is there is a number of items in this bill which are being contributed to by private donation. I recall there is the provision of the Forestry Service, a new provision, by which we permit that very thing to be done. It was put in the bill this year; but, upon the whole, I think probably it is not wise to have these things done, but I do not want to have that change made in this appropriation bill with-

out a full consideration at the hands of the proper committee. I now yield to the gentleman from New York [Mr. GOULDEN].

Mr. GOULDEN. I would like to ask the gentleman from South Carolina what proportion, in the judgment of the committee, is contributed by this general educational board?

Mr. LEVER. None of that.

Mr. GOULDEN. What proportion in any part of this bill is contributed? What amount do they contribute, if anything, in this bill to general education?

Mr. LEVER. My recollection of the figures here—but the gentleman from Michigan [Mr. MCLAUGHLIN] may be right and I may be wrong about it, because I have not looked up the facts lately—is that the general board's contribution to the work in the South is $120,000 a year. I accept his statement.

Mr. GOULDEN. I agree with the chairman of the committee that the time has arrived when the people can afford to do this.

The CHAIRMAN. The time of the gentleman from South Carolina [Mr. LEVER] has expired.

Mr. LEVER. Mr. Chairman, I ask unanimous consent for two minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. LEVER. I think there is quite a number of members of the Committee on Agriculture who know the feeling of the chairman of the committee in this respect. It has been my intention to introduce a bill along these lines prohibiting such contributions, not only for work in the Department of Agriculture but in all other departments where contributions may be made, but I do not want to see that legislation go through without the thorough consideration of a committee, and, therefore, Mr. Chairman, I am constrained to make the point of order against the amendment on the ground that the amendment is new legislation and contrary to the rules.

The CHAIRMAN. The gentleman makes a point of order against the amendment. Does the gentleman from Iowa [Mr. TOWNER] desire to be heard?

Mr. TOWNER. Will the gentleman from South Carolina [Mr. LEVER] withhold the point of order for five minutes?

Mr. LEVER. I will withhold it for five minutes, with the understanding that I will make the point at the end of five minutes.

The CHAIRMAN. The gentleman from Iowa [Mr. TOWNER] asks unanimous consent for five minutes. Is there objection. [After a pause.] The Chair hears none.

Mr. TOWNER. Mr. Chairman, it should be thoroughly understood just what it is against which the gentleman from Michigan [Mr. MCLAUGHLIN] is protesting. Here are a number of men who are carried on the rolls as Government employees and who are paid from the Government Treasury only the sum of $1 for a year's services. As a matter of fact, these men are paid their salaries and their expenses by private persons and from private funds. We are in this situation, then, in regard to this matter. There are men who are authorized to go out into the country and call themselves Government employees, and who proceed to act with governmental authority, who are being paid from private funds both their salaries and their expenses. It certainly can not be, Mr. Chairman, that this House or the people of this country will approve of that. The other day we had under consideration a bill that came from the Committee on Education, in which the Commissioner of Education asked for authority to receive from private contributors money to aid in the extirpation of illiteracy in the United States. It was objected by gentlemen on the floor of the House that the bill ought not to pass and that authority ought not to be so given for a good many reasons. It was argued that men who act ostensibly for the Government, but who are under pay received from private individuals, would recognize that the real source of their authority was not governmental, but would be influenced in the performance of their duties by those from whom they received their compensation.

I was convinced that was a good objection to that provision of the bill and agreed that it should be withdrawn. And here is a situation vastly worse than that, because there the Government could expend the money as it chose; it was to be considered as an absolutely unqualified donation, to be used by the Government employees as they should deem best; but here the amount of the salary is fixed, the amount of compensation for expenditures is fixed, all by outside parties, and the Government employee, in order to please those who employ him and pay him, must do it in accordance with the desires of such private individuals and not primarily for the best interests of the Government. It seems to me the time has come when we should abandon that practice, and I can hardly see how anybody can object that a proviso should be here inserted saying that this practice should not be longer continued.

Mr. LEVER. Will the gentleman from Iowa yield?

Mr. TOWNER. Yes.

Mr. LEVER. I just wanted to suggest to him that I could hardly see how so vigilant a man as he had not discovered that this thing is being done and has been done for 10 years.

Mr. TOWNER. I think the gentleman will agree with me that there is nothing in this bill or in any other bill that has ever been reported that would apprise the House or apprise the country that such conditions existed. I will say to the gentleman that no vigilance would apprise anyone of that fact, so far as could be ascertained from any Government document or committee report, not even from the able report that the chairman of the committee has furnished us.

Mr. LEVER. I ask the Chair to rule.

The CHAIRMAN. Does the gentleman from Michigan want to be heard on the point of order?

Mr. MCLAUGHLIN. Possibly the latter half of the amendment, the second clause, is objectionable. It is suggested that the chairman rule on the matter, and then I will offer another amendment.

The CHAIRMAN. The Chair is of the opinion that the point of order is well taken, especially as to the last proviso.

Mr. MCLAUGHLIN. Mr. Chairman, then I offer another amendment, which is the same as the first half and without the last clause.

The CHAIRMAN. The gentleman from Michigan offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend, page 19, line 19, by striking out the figures "400,000" and insert in lieu thereof "518,800," and at the end of line 22 insert the following:

"*And provided further*, That hereafter no part of this or any other appropriation herein made for the Department of Agriculture shall be used in paying salaries or expenses of officers, agents, collaborators, or other employees who are paid in part by contributions of money from any source whatever outside of the State where such officers, agents, collaborators, or other employees carry on their work."

Mr. LEVER. Mr. Chairman, I make the point of order against that.

The CHAIRMAN. Will the gentleman state his point of order?

Mr. LEVER. I will state to the Chair very frankly that I am in doubt whether or not the point of order is good. I make the point of order, and if the Department of Agriculture is now doing the class of work set out in the amendment proposed by the gentleman they must have authority to do it, and this would be a limit upon that authority, and hence legislation.

Mr. MANN. This amendment, as the gentleman will see, is only a limitation on the appropriation in this bill. It does not affect the authority of the department to make these employments at all, but would not permit the use of the money in this bill appropriated in connection with such persons. That is purely a limitation upon the appropriation.

Mr. LEVER. I will say, Mr. Chairman, that I would like to have the Chair rule. I am rather of the opinion that the gentleman from Illinois [Mr. MANN] is correct.

The CHAIRMAN. The Chair thinks so. The Chair thinks the point of order is not well taken, and therefore overrules it.

Mr. FOWLER. Mr. Chairman, has the Chair ruled on the point of order?

The CHAIRMAN. Yes. The Chair has ruled, and overrules the point of order.

Mr. NORTON. Mr. Chairman, may we have the amendment again reported?

The CHAIRMAN. Without objection, the amendment will be again reported.

There was no objection.

The Clerk read as follows:

Amend, page 19, line 19, by striking out the figures "$400,000" and insert in lieu thereof "$518,800"; and at the end of line 22 insert the following: "*And provided further*, That hereafter no part of this or any other appropriation herein made for the Department of Agriculture shall be used in paying salaries or expenses of officers, agents, collaborators, or other employees who are paid in part by contribution of money from any source whatever outside the State where such officers, agents, collaborators, or other employees carry on their work.

Mr. LEVER. Mr. Chairman, this amendment does two things. First it increases the appropriation in this item $100,000. That is a proposition which the committee did not consider and which the Department of Agriculture did not estimate for. The committee on its own initiative increased the appropriation for this item $35,000.

Mr. MANN. No; $25,000.

Mr. LEVER. No; $35,000, I will say to my friend.

Mr. MANN. It was $375,000 in the current law, I think.

Mr. MCLAUGHLIN. There was a reduction of $10,000 on account of a transfer.

Mr. MANN. The real increase on this item is $35,000.

Mr. LEVER. Yes. In the second place, the amendment seeks to make a prohibition of policy, which probably is not a bad proposition. But I repeat, as I said a while ago, that that matter has not been well considered by the members of the committee. At least I think it is too important a piece of legislation to be put upon this bill without full consideration. Therefore I hope that the committee will vote down the amendment. I ask for a vote.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Michigan [Mr. MCLAUGHLIN].

The question was taken; and the Chairman announced that the "noes" seemed to have it.

Mr. MCLAUGHLIN. A division, Mr. Chairman.

The committee divided; and there were—ayes 20, noes 30.

So the amendment was rejected.

The CHAIRMAN. The Clerk will read.

Mr. TREADWAY. Mr. Chairman, I desire to offer the following amendment.

The CHAIRMAN. The gentleman from Massachusetts [Mr. TREADWAY] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 19, line 22, after the word "stock," insert: "*Provided further*, That no part of this appropriation shall be expended for any purpose for which a specific appropriation is made."

Mr. LEVER. Mr. Chairman, I reserve a point of order on that.

The CHAIRMAN. The gentleman from South Carolina [Mr. LEVER] reserves a point of order on the amendment.

Mr. TREADWAY. Mr. Chairman, I desire to call attention, in connection with this item, carrying an appropriation of $400,000, to the close resemblance that that appropriation bears to the next one of $378,240, which is designated especially for demonstration work in connection with the ravages of the boll weevil.

Now, there is no way whereby this first item, to which I refer, can be eliminated from use also in connection with demonstration work regarding the cotton-boll weevil or any other of the various specific appropriations made in this bill. I call attention to this fact because several statements have been made here as to the relative position and relative amounts of appropriations carried in this and other bills wherein the South is directly affected.

We have had the Smith-Lever agricultural extension bill, we have had the Shackleford good roads bill, and I think I am not raising a sectional or a partisan issue when I say that it is clearly demonstrated that the appropriations in these bills are very much more favorable to the South than they are to other sections of our country.

Now, in connection with the amendment I have offered, I wish to say that we of New England, and I of Massachusetts, wish to see more farm-demonstration work and encouragement for improved agricultural methods pushed in that section of our country. We want some of these appropriations arranged in such a way that there may be a fair chance for New England and Massachusetts. No section of our country offers a greater opportunity for agricultural improvement than that. We would like to have this item so limited and arranged that all of these appropriations do not go for the benefit of the Southern States.

Let me just call attention to the fact, Mr. Chairman, that in this one bill which we are considering here to-day there are eight distinct items, footing up $1,025,020 out of a total of less than $19,000,000 carried in the whole agricultural appropriation bill, which are directly limited in such a way as to be beneficial entirely to the South. Therefore I ask that this item here be so specified that it can not be used in the places where will also be used the items of $1,025,020, already designated. I would like to see various improvements made in the expansion of farm-demonstration work throughout our section of the country. I would like to see the Federal authorities assist in that line of work to the full capacity of our section to absorb it, and I do ask that we be given a fair chance under this item.

Mr. LEVER. Mr. Chairman, I have heard the statement made several times during the consideration of this bill that the bill was sectionally drawn and that the South was getting too much of the funds carried in it. I have been greatly surprised at that. It is the first time during my connection with this bill that the charge has been made, and I know that if I had the time I could go through the bill item by item and demonstrate to the satisfaction of any fair-minded man here that the bill we are now considering is drawn in exact keeping with the bill last drawn, when Mr SCOTT was the Republican chairman of this committee, and that the increases in all the items have been in about the same proportion.

Mr. GARNER. Does not the gentleman think he ought to congratulate New England, and especially the gentleman from Massachusetts [Mr. TREADWAY], in waking up an interest in the farmer at this late day? [Laughter and applause.]

Mr. TREADWAY. Mr. Chairman, if I may be allowed to answer my friend who so successfully supports the Angoras in the South, I may say that I have been here only one year. I am serving my first term, and I have not waked up at a late day. I have always been awake. [Applause.]

Mr. GARNER. The country, and especially the State of Massachusetts, is to be congratulated on the sending of such a distinguished gentleman here, and one who will take an interest in farming. [Applause.]

Mr. LEVER. The Department of Agriculture was largely built up under the magnificent leadership of Secretary James Wilson. [Applause.] I have no apologies whatever for paying my tribute to that grand old man. The South has had no better friend than Uncle Jimmy Wilson showed himself to be. He knew that we had great problems down there. He came to our committee with his estimate, and the then chairman of that committee [Mr. SCOTT], and the ranking Republican member, my friend from Iowa [Mr. HAUGEN] were too big and too broad and too patriotic to raise the miserable cry of sectionalism. [Applause.] I resent the idea that there is any sectionalism in this bill, or in the bill to which my friend from Massachusetts [Mr. TREADWAY] has referred.

Mr. GREEN of Iowa and Mr. ANDERSON rose.

Mr. LEVER. I do not yield just now. I do not believe the fact that the South is getting its proportionate share of these funds, or even more than its proportionate share, would be a sufficient basis upon which to predicate the charge of sectionalism. I was particularly pained to have my friend from Minnesota [Mr. ANDERSON] in his opening statement make that charge, because he is as beardless as I am, and I thought the young men of the South, the young men of the North, the young men of the West, and the young men of the East would get together and forget the differences of the past. [Applause.]

Oh, they say it is a sectional bill. I congratulate myself upon the compliment they pay me in that charge. If you will take your Congressional Directory you will see that the Committee on Agriculture is composed of 21 Members and one Delegate. If you will read down the list you will find that of those 21 Members, 6 come from below the Potomac River, and 15 Members and the Delegate from above it. Oh, great is GORDON LEE, great is JIMMY YOUNG, great is TOM HEFLIN, great is ZEKE CANDLER, great is JACOWAY, great is LEVER, that these six men from the South are so much more able than these gentlemen from the North that they can absolutely take the committee, hog tie it, and do anything they please with it. [Laughter.] Why, Mr. Chairman, the charge is so ridiculous that it is absolutely absurd, and I hope and trust it will not again be repeated on this floor.

The CHAIRMAN. The time of the gentleman has expired.

Mr. LEVER. Mr. Chairman, I have not occupied much of the time of committee. I ask five minutes more.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent for five minutes. Is there objection?

There was no objection.

Mr. LEVER. I called upon the Assistant Secretary of Agriculture to give me a statement about this proposition, because I wanted to meet it once and forever, and I want to read his letter. It is dated March 5, 1914, and is as follows:

DEPARTMENT OF AGRICULTURE,
*Washington, March 5, 1914.*

Hon. A. F. LEVER,
*House of Representatives.*

DEAR MR. LEVER: Answering your inquiry as to whether it would be practicable to estimate the manner in which the funds appropriated for the department are expended, with special reference to geographical districts, I beg to say that this would be difficult. As you are well aware, the organization of the department is such that men engaged in one project frequently assist also in other projects. For this reason there are constant changes and shifts being made in expenditures, making it extremely difficult to give anything like definite figures along the lines you desire.

From the best of our information, however, we have prepared and submit herewith a summary statement as to the distribution of expenditures made by the department during the past four fiscal years. You will note this statement shows expenditures during that period of $71,077,433.48. In the division of the country we have followed the census plan, and titles of divisions, therefore, correspond with those adopted by the census in each of its 10-year periods of work.

The figures speak for themselves and show that, for all practical purposes, the distribution of the department's funds, so far as work is concerned and so far as expenditures are concerned, are practically uniform throughout the entire country. The large amount of money expended throughout the mountain section, including Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, and Nevada, is accounted for from the fact that it is in these States that we administer the Forest Service, which, as you know, is an expensive service. The same holds true to a considerable extent for the Pacific district, including Washington, Oregon, and California. You will note we have estimated the ex-

penses for the Washington office for the four years at $8,484,092.64. This is given as a lump item, but, of course, applies uniformly to all of the districts in question and should be equally prorated.

Trusting this information will be of service to you, I am,

Very sincerely,

B. T. GALLOWAY,
*Acting Secretary.*

Then he submits the following table:

*Summary of expenditures of the Department of Agriculture for the fiscal years 1910, 1911, 1912, and 1913, showing the amount used for each census district.*

| | |
|---|---|
| New England (Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, and Connecticut) | $3,959,049.93 |
| Middle Atlantic (New York, New Jersey, and Pennsylvania) | 4,548,695.13 |
| East North Central (Ohio, Indiana, Illinois, Michigan, and Wisconsin) | 7,143,617.05 |
| West North Central (Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, and Kansas) | 7,657,552.16 |
| South Atlantic (Delaware, Maryland, Virginia, West Virginia, North Carolina, South Carolina, Georgia, and Florida | 6,111,045.98 |
| Washington office | 8,484,092.64 |
| East South Central (Kentucky, Tennessee, Alabama, and Mississippi) | 2,751,472.57 |
| West South Central (Arkansas, Louisiana, Oklahoma, and Texas) | 4,413,637.26 |
| Mountain (Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, and Nevada) | 16,468,144.68 |
| Pacific (Washington, Oregon, and California) | 9,540,126.08 |
| Total | 71,077,433.48 |

So that even last year the Pacific division—Washington, Oregon, and California, three States—received the expenditure of $3,400,000 more than was expended in Delaware, Maryland, Virginia, West Virginia, North Carolina, South Carolina, Georgia, and Florida.

That is the statement of the Secretary of Agriculture. I did not prepare it. I believe it is true; but whether it is or not, I think the time has come when men representing great districts on the floor of this House ought to make up their minds that this is one country, one flag, and one people [applause], and that we are devoting ourselves to one purpose—the glory, prosperity, happiness, and development of our common country. [Applause.] Gentlemen, let us stop the cry of sectionalism. [Applause.]

Mr. HAUGEN. Mr. Chairman, the committee and the department have been criticized; it seems proper that I should say at least a few words in reply. It has been charged that the committee and the department have discriminated against the North in favor of the South. All that it seems necessary to say in reply is that the Committee on Agriculture has pursued along the same lines as other committees have, and generally lump-sum appropriations have been made for a specific line of work or project or projects; in other words, Congress has specified for what purpose the money should be expended, and has left it to the discretion of the department how and where the money should be expended.

Attention has been called to the $378,000 appropriation for farmers' cooperative demonstrations and for the study and demonstration of the best methods of meeting the ravages of the cotton-boll weevil. Appropriations have been made for that purpose for many years. First, the appropriations were made for the eradication of the boll weevil, and when it was found that the weevil could not be eradicated appropriations were made for the study and demonstration of the best methods of meeting the ravages of the weevil. No direction has ever been given by Congress as to where the money should be expended. It simply directed for what purpose the appropriation should be used; and inasmuch as cotton is grown down South and not up North, of course it was fair to assume that the department's activity and the money appropriated would go to the South, where the cotton-boll weevil was to be found, and not to the corn or wheat fields of the North. When it became known that the money thus appropriated was not being used for the eradication of the cotton-boll weevil, but simply for farm demonstration down South, it was suggested that an equal amount be appropriated for farm demonstration up North, and the committee has reported $400,000 for farm management and farm demonstration, and last year's appropriation bill carried an appropriation of $365,000 for the same purpose, or as an offset—or, rather, to balance the account between the North and South—that being the understanding, of course it was assumed that the department would expend that amount in the Northern States. Now, it appears that a large portion, or $33,285, of that amount, has been expended in the South. That, of course, is contrary to the purpose for which the appropriation is made and as generally understood; and if so diverted, that is a matter for the department to explain.

The committee has had confidence in the department. If the department can not be trusted in justly apportioning the money between the various sections of the country, then the committee has misplaced confidence. My understanding is that its aim is to render assistance where assistance is most needed; if so, in my opinion there are no grounds for criticism; on the other hand, if it yields to pull and fails to give due regard for the needs of assistance and results, and if appropriations are made available for political expediency or as an auxiliary to a political party for the return of Representatives or Senators to Congress, then the department should be abolished; but I can not believe that a great department like the Department of Agriculture is guilty of entertaining any such view or purpose. To the contrary, I believe its head, the heads of the bureaus charged with the responsibility of apportioning appropriations, have due regard for the needs of the country; that the patriotic and well-meaning men who take a deep interest and pride in our Nation's growth and greatness, in speeding on the wheel of progress and in sympathy with this marvelous expansion, that in making these apportionments and expenditures of this money they give due consideration to every section of this country and to the development of our natural resources and every worthy and legitimate enterprise of this country. [Applause.]

Mr. HAWLEY. Mr. Chairman, it is the good fortune of the agricultural interests of the country that the problems we deal with in this bill are localized. The bill is made up of difficulties or problems that in each section of the country find need of solution. There is an appropriation for the eradication of the cattle tick in Texas. I am sorry that the people of Texas have to bear that burden, but it is the extraordinary good fortune of the people of Iowa, Indiana, and Illinois and every other cattle-growing section that we have been able to limit the ticks to Texas and that section of the country.

They have the cotton-boll weevil in the South. If we grew cotton in the Northern States or the Pacific coast, the appropriation would cover every part of that country where the cotton-boll weevil makes its ravages. I have studied this bill carefully along this line because it has been suggested several times in the course of the preparation of the bill, the question whether it is a sectional bill, and I must say that the matter never disturbed my mind. The gentleman from Massachusetts, who is known for his commendable activities in the House, has called attention to many items and thinks that too much is being expended in certain sections.

Now, they have certain problems in New England which I am afraid will cover an area of the country larger than it does now, and that is the gypsy moth and the brown-tail moth. We appropriate nearly $300,000 in that section for those two pests alone. We are sorry that you have them there, but we want to keep them in that part of the country.

Mr. TREADWAY. They were imported into that part of the country.

Mr. LEVER. So was the cotton-boll weevil and the cattle tick imported into the South.

Mr. HAWLEY. I know that those pests were imported into this country, and it was a most undesirable immigration. We want to keep the moths in the country where they are now. If they spread into the great portions of the Pacific coast they will do incalculable damage; they would destroy the forests in that part of the country and our fruit industry.

The solution of the problem and the great salvation of the country is that we can keep these pests where they now are. The bill is made up on that theory clear through. Wherever there is a problem of agriculture we provide the sinews of war to attack it. If all the problems affecting the South were spread over the entire country, if all the problems that affect New England extended in an equal measure over the entire country, if all the problems that affect the Middle West extended over the entire country, we would be powerless in the face of that situation. There are many Southern States in which the boll weevil has not yet come. We want to restrict it to the area that it is now occupying. The more we can restrict the evil the greater possibility of its final eradication. If they finally extend over the entire country, it becomes a problem so great in magnitude that we never could find the amount of money to get rid of them. I can find nothing in the bill which entitles it to be called a sectional bill. [Applause.]

Some sections are more unfortunate than the rest. They have more problems to deal with, more difficulties to cope with. I would be willing, if I could be assured, or if we had solved all the problems in the State that I have the honor to represent affecting agriculture and we had no problems existing there, I should be perfectly willing to have not a dollar of money expended there. I would be glad if the conditions were such that no money was needed to be expended there. And so would the gentleman from South Carolina be glad if the conditions were such in his State that he had no need of any money to be expended in that State, and the gentleman from Mississippi would

take the same position, and so would the gentleman from Georgia. It is a misfortune that we have these evils, and it is our good fortune that they are localized in certain sections. [Applause.]

Mr. GREEN of Iowa. Mr. Chairman, I do not care to discuss the question of any sectional appropriations in this bill. I desire to speak entirely independent of that question. I am at a loss to understand how anyone can oppose the amendment offered by the gentleman from Massachusetts. If there was any purpose in making up this bill—and I say at this time that I do not for a moment insinuate or intimate that the gentleman from South Carolina or any other member of the committee would have any such purpose—but if there was any purpose in making up this bill to put under one head or one item an appropriation which was intended to apply to that which was already covered by another item, I think such purpose would be highly improper.

Mr. MANN. Mr. Chairman, will the gentleman yield?

Mr. GREEN of Iowa. Yes.

Mr. MANN. This item is farm-demonstration work. If this amendment should prevail, would the farm demonstrator paid under it be permitted to teach the farmer anything that was covered by other items in the bill, in work we are investigating? Take, for instance, the investigation and improvement of cereals and cereal productions. Would the farm demonstrator be permitted to teach the farmer anything about the method of cereal production and the improvement of cereal production under this amendment?

Mr. GREEN of Iowa. I insist that the House is entitled to know how much is expected to be expended for any particular purpose, and when the amount is specified in a paragraph of the bill the House ought to understand that that is the amount which it is expected will be expended for that purpose. We have here an item of some $378,240, to be expended for the extermination of the boll weevil, or for meeting ravages of the cotton-boll weevil, for I believe it is now agreed that it can not be exterminated.

Mr. MANN. That is not what the item says.

Mr. HAUGEN. We are on the $400,000 item.

Mr. GREEN of Iowa. I understand that; but what the gentleman from Massachusetts wishes to accomplish by his amendment is this: That no part of the $400,000 should be expended for meeting the ravages of the cotton-boll weevil, which is already appropriated for, and the House ought to know that that is the sum which is expected to be used for that purpose and not any more. I think it is ample and more than ought to be expended, but I yield to the judgment of the committee.

Mr. MANN. The gentleman knows that that item of $378,240 is not expended for the purpose of meeting the ravages of the cotton-boll weevil, or the major portion of it.

Mr. GREEN of Iowa. I know what the bill recites.

Mr. MANN. The item is:

For farmers' cooperative demonstrations and for the study and demonstration of the best methods of meeting the ravages of the cotton-boll weevil, $378,240.

Mr. GREEN of Iowa. Very well; but it all applies to the boll weevil, and that does not alter the situation in the least.

Mr. MANN. It is farmers' demonstration work in the South, and that is all it covers.

Mr. GREEN of Iowa. Then the House ought to understand it.

Mr. MANN. The House does understand it.

Mr. GREEN of Iowa. It ought not to be put in in that way. If the gentleman from Illinois is correct, then few Members in the House understand this bill or can understand it with the language used in it.

Mr. HAUGEN. Mr. Chairman, if the gentleman will permit, the appropriation is made making it available for the department to send its people down there in the cotton district and demonstrate to those farmers how to grow their crops.

Mr. GREEN of Iowa. In connection with the ravages of the boll weevil.

Mr. HAUGEN. It is demonstration work and nothing else.

Mr. GREEN of Iowa. In connection with the ravages of the boll weevil.

Mr. HAUGEN. Under that name; yes.

Mr. MANN. This item at the bottom of the page has been carried in the bill for years. The item just above it, which is now under consideration, is a comparatively new item.

The language in the item at the bottom of the page includes, among other things:

And for the study and demonstration of the best methods of meeting the ravages of the cotton-boll weevil.

That is the fund used in the farm demonstration work in the South. The other item was put in the bill for the purpose of appropriating money for farm demonstration work in the North, but neither item is confined to ravages of the boll weevil and does not say so.

The CHAIRMAN. The time of the gentleman has expired.

Mr. GREEN of Iowa. I only want about two minutes.

The CHAIRMAN. The gentleman from Iowa asks for two minutes more. Is there objection? [After a pause.] The Chair hears none.

Mr. GREEN of Iowa. Granting what the gentleman from Illinois has said, it shows that we have a bill here before us which nobody can understand to what the money is to be applied, and nobody knows about the limitation. There may be some understanding on the part of the committee with the experts of the department or the officials of the department. Now, then, I submit that is not the proper way for a bill to be drawn. It ought to be so drawn that the House can know what the money is going for, and therefore I submit the amendment of the gentleman from Massachusetts ought to be adopted.

Mr. HAUGEN. I will state for the information of the gentleman that the House made several efforts to change the language and adopt the language referred to, but the committee or Members of this House never succeeded in doing it.

Mr. COOPER. Will the gentleman yield for a question?

Mr. GREEN of Iowa. I will.

Mr. COOPER. Reading on page 21 of the report of the committee, I see this particular item, page 19, line 23:

This item has for its purpose the improvement of agricultural conditions of the farmers by inducing them, through actual demonstrations and otherwise, to put into practice the best methods known for farming along all lines, including systems of cropping, rotations for soil improvement, production of home supplies, and proper attention to animal husbandry, and to enable the farmers in the cotton-boll weevil States to meet the ravages of the boll weevil by diversification and the adoption of better methods of farming, including the raising of cotton under boll-weevil conditions.

So the interpretation put upon it by the gentleman from Illinois seems to be the one the committee itself had in view.

Mr. LEVER. It is the interpretation the committee put upon it——

Mr. GREEN of Iowa. If the gentleman will pardon me, I can not yield for an interruption, as I have but two minutes. Granting all that, I still insist that that is not a proper way to draw a bill.

Mr. COOPER. That is true; it is not.

The CHAIRMAN. The time of the gentleman has expired.

Mr. COOPER. The language ought to be changed entirely.

Mr. CANDLER of Mississippi. Mr. Chairman, my friend is evidently mistaken when he criticizes the language of the bill, because the appropriations made in this bill are well defined and well understood, not only by the Agricultural Department but by the Treasury Department, and the appropriations can not be made for one purpose in this bill and used for another purpose, because it has to pass not only the approval of the Agricultural Department itself but has to pass the approval of the Treasury Department and the auditing authorities of both departments before they can ever be paid, hence the provisions of this bill are specific and well known and are for the specific and direct purposes for which the appropriations are made.

Mr. COOPER. Will the gentleman permit an interruption? Do not these two items overlap each other?

Mr. CANDLER of Mississippi. No; one is for one purpose and the other for another purpose, and they are well defined.

Mr. GREEN of Iowa. Why not accept the amendment?

Mr. COOPER. The gentleman will observe that $400,000 is for part of the farm demonstration work.

Mr. CANDLER of Mississippi. To investigate and encourage the adoption of improved methods of farm management and farm practice and for farm demonstration work. That is the language, and it is thoroughly understood.

Mr. COOPER. But the $400,000 is for farm-demonstration work, and part of the $378,240 is for farm-demonstration work, according to the report of the committee; and under a fair interpretation of the language of the bill the two provisions do, in my judgment, plainly overlap, and the language ought to be changed.

Mr. CANDLER of Mississippi. But it is thoroughly understood for what purpose these appropriations are made, and they are used for the purposes for which the sums are appropriated. The intent of the legislative body is always considered.

Mr. COOPER. This language ought not to permit them to do anything else.

Mr. CANDLER of Mississippi. It does not permit them to do anything else except to use money for the specific appropriations for which they are made.

Mr. TOWNER. Will the gentleman yield?

Mr. CANDLER of Mississippi. Yes.

Mr. TOWNER. Is it not true that $33,000 from the $400,000 intended for the North, as the gentleman stated, was used of the appropriation last year for the South?

Mr. CANDLER of Mississippi. Not so far as my information goes.

Mr. TOWNER. I have been told it was, but I am asking the gentleman.

Mr. CANDLER of Mississippi. I am not specifically advised in reference to that, and I am not prepared to give full credence to that statement unless I have the facts.

Mr. ANDERSON. Will the gentleman allow me to ask his attention to the hearings on that subject and the statement filed by the department in connection with it? If he will look on page 124, he will find under this item of farm management investigational work, not demonstration, in West Virginia, Kentucky, Tennessee, Delaware, Maryland, Virginia, North Carolina, Georgia, Florida, Arkansas, Louisiana, Texas, and Oklahoma, $33,285. That was not demonstration work, and it was taken out of the $400,000.

Mr. CANDLER of Mississippi. Where is it stated it was taken out of this $400,000?

Mr. ANDERSON. The statement says it.

Mr. CANDLER of Mississippi. According to the gentleman's conclusion it states that.

Mr. ANDERSON. Does the gentleman deny it?

Mr. CANDLER of Mississippi. Does the witness state in these inquiries that it was taken out of this $400,000?

Mr. ANDERSON. The statement says that.

Mr. CANDLER of Mississippi. Does the witness state, or any official of the department state, that it was taken out of the $400,000.

Mr. ANDERSON. Here is the statement rendered by the department to the committee, which in itself shows this $33,000 was spent as I have stated.

Mr. CANDLER of Mississippi. Out of this $400,000 instead of out of the $378,000?

Mr. ANDERSON. Not out of this one, but the appropriation of last year.

Mr. CANDLER of Mississippi. Out of the $400,000 instead of the $378,000? For what purpose?

Mr. ANDERSON. For the purpose I have stated—for investigational work.

Mr. CANDLER of Mississippi. I want to call attention now, in support of the position taken by the gentleman from Oregon [Mr. HAWLEY] a moment ago, to exactly the work that is being done, to show that there is no sectionalism or divisions in this bill. Take the item of $400,000, to which attention has just been called, which is intended to be expended in the North for farm-demonstration work.

The next item is $378,240, and is to be used in the South, as was stated a moment ago. The next item is for the investigation and improvement of methods of crop production under semi-arid or dry-land conditions in the West, $145,000. The next is for studying the methods of clearing off "logged-off" lands with a view to their utilization for agricultural purposes; for their irrigation; for testing powders in clearing them; and for the utilization of by-products arising in the process of clearing, in cooperation with the States, companies, or individuals, or otherwise, $5,000.

That is for the western country. And then, for investigation in connection with western irrigation agriculture, the utilization of lands reclaimed under the reclamation act, and other areas in the arid and semiarid regions, $70,380.

And for the investigation and improvement of fruits and the methods of fruit growing, harvesting, packing, storing, handling, and shipping, and for experimental shipments of fruits from the United States into foreign countries, $107,500.

That is for use upon the Pacific coast. All of this shows that every section of this country is represented almost in every item of this bill. When a man can charge sectionalism in this bill it shows that his imagination can go a long ways. [Applause.]

Mr. TREADWAY. Mr. Chairman, may I have five minutes, please?

Mr. LEVER. I sincerely wish that the gentleman would not delay the passage of this bill. I have been as patient as a man could be, I think, and the gentleman has made his speech.

Mr. MANN. I ask that the gentleman have three minutes.

Mr. LEVER. With the understanding that the debate shall be closed on this paragraph at the end of that time?

Mr. CANDLER of Mississippi. Ask unanimous consent.

Mr. LEVER. Mr. Chairman, I ask unanimous consent that the debate on this paragraph and all amendments thereto be closed in three minutes.

Mr. ANDERSON. I would like to offer an amendment.

Mr. CANDLER of Mississippi. That does not cut you off.

Mr. ANDERSON. They are closing debate on the paragraph, and I would like to offer an amendment, and, besides, the gentleman has made reference to me, and I would like to answer.

Mr. MANN. Suppose you take five minutes on a side.

Mr. LEVER. Mr. Chairman, I ask unanimous consent that the debate on this paragraph and all amendments thereto be closed in 13 minutes, 3 minutes to be controlled by the gentleman from Massachusetts [Mr. TREADWAY], 5 minutes by the gentleman from Minnesota [Mr. ANDERSON], and 5 minutes by myself.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that debate on this paragraph and all amendments thereto close in 13 minutes, 3 minutes of which shall be used by the gentleman from Massachusetts [Mr. TREADWAY], 5 by the gentleman from Minnesota [Mr. ANDERSON], and 5 by himself. Is there objection? [After a pause.] The Chair hears none.

Mr. TREADWAY. Mr. Chairman, the gentleman from Oregon [Mr. HAWLEY] made references to certain evils that exist in rural communities in various sections of the country. I for one am only too glad to vote for any appropriation eradicating those evils, and I am very sorry that any of them exist anywhere, whether it be in New England, on the western line of our country, or in the South. He referred particularly to the item for the extermination of the boll weevil. I shall be only too glad to support that item or any similar one.

My particular reference was that I want a chance for the agricultural interests of New England and of my own State of Massachusetts to have the support of appropriations which will develop agriculture, which will aid bringing back the use of the farm in every desirable sense. Many of these items to which I have referred are for demonstration work, rather than for the study and extermination of existing pests.

Now, the gentleman from Mississippi [Mr. CANDLER] has said that this item which we are considering, of $400,000, is to apply to the North. There is absolutely nothing in the phraseology of the bill, Mr. Chairman, to show that it is to be used there. And that is what my amendment calls for—to show that it will be used in a certain line of work not otherwise specified. The gentleman from Iowa [Mr. HAUGEN] has also said that out of a similar appropriation last year $33,285 was used absolutely in the same line of work as the next item appropriating $378,000 for boll-weevil extermination and demonstration work. My request is that this demonstration work be continued more fully, and be more thoroughly done, and more to the advantage of the country, not limiting it anywhere, but that we do not overlap these appropriations in the way it has been shown we do in this bill.

Mr. GARNER. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. TREADWAY. Yes.

Mr. GARNER. I think the gentleman is in error with reference to the $33,000.

Mr. TREADWAY. I stated it on the authority of the gentleman from Iowa [Mr. HAUGEN].

Mr. GARNER. I do not doubt that the $33,000 was used for the purpose stated by the gentleman, but the purpose was to investigate and to encourage in the matter of improved farm management. Does the gentleman think that no investigation or encouragement of the adoption of improved farm management ought to be conducted in the South?

Mr. TREADWAY. I have just stated, Mr. Chairman, that I approve of that in every way, but I would like also to see some of that same work done in Massachusetts. There is no section of the country that needs protection of the farmers' interests more than does Massachusetts, nor is there any section where farm-demonstration work can be done to better advantage than Massachusetts.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. ANDERSON. Mr. Chairman, I would like to have the previous amendment disposed of, and then I shall offer an amendment.

The CHAIRMAN. A point of order was reserved against the pending amendment. Does the gentleman from South Carolina withdraw his point of order?

Mr. LEVER. I withdraw the point of order for the purpose of asking for a vote on that particular amendment. Then the gentleman from Minnesota [Mr. ANDERSON] can offer his amendment and can take his five minutes under that. I ask for a vote, Mr. Chairman.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Massachusetts [Mr. TREADWAY].

The question was taken, and the amendment was rejected.

Mr. ANDERSON. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Minnesota [Mr. ANDERSON] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 19, line 19, after the figures "$400,000," insert: "of which not less than $300,000 shall be used outside of Washington in educational and demonstrational work, in seed selection, and in intensive cultivation of cereal crops, with a view of increasing the per-acre production."

Mr. LEVER. Mr. Chairman, I reserve a point of order on that.

The CHAIRMAN. The gentleman from South Carolina [Mr. LEVER] reserves a point of order on the amendment.

Mr. ANDERSON. Mr. Chairman, anybody who makes any investigation at all of the statistics of cereal production will be struck with three very important facts. One of them is that the per acre production of cereals in the leading agricultural countries of Europe is very much greater than it is in this country; and, second, that the ratio of increase per acre of production in the agricultural countries of Europe is also greater in the last two decades than it is in the United States; and, third, that the per acre production is greater in the New England States than it is anywhere else in the United States.

The reason for this situation is, in my opinion, comparatively obvious. One of the reasons is that the longer period of cultivation, both abroad and in the New England States, and the denser population there have necessitated more intensive methods of cultivation. The fact of the matter is that, out in the West especially, the possibilities of profit in turning grain into cattle and hogs have caused us very materially to neglect the matter of cereal production, and incidentally, in my opinion, the bureau has neglected instruction and demonstrational work in cereal production.

Now, anybody who knows anything about farming at all must know that underlying the increase of the production of cattle and hogs must be an increase of the cereal production, and the purpose of my amendment is to compel the Department of Agriculture to use the funds intended for farm management work, or at least a large proportion of them, in demonstrational and educational work in increasing the per-acre production of the cereal crops. They have not done this in the past. Of $375,000 for this purpose during the current year but $157,000 was used in the field.

Now, the gentleman from South Carolina [Mr. LEVER], for whose intelligence, ability, and integrity I have the greatest admiration, and for whom I may say I have the kindliest feelings of friendship, has made some complaint because I and a few other gentlemen have found it necessary to criticize this bill. Does the gentleman from South Carolina think that he ought to bring his bill in here and have it passed without any debate or criticism whatever? The gentleman knows that the membership of the House is so large that more and more of the work is done in committee, and if we are not permitted to discuss this bill, if we are not permitted to criticize his bill, if the gentleman from South Carolina and his colleagues are not to be put to the test as to the items which his bill contains, then we may as well pass the bill without any debate or consideration whatever.

Now, I want to say that the little speech that I made the other day was made without any spirit of sectionalism or antagonism to the South, or to any other section of the country. My intention was simply to call attention to some irregularities, to some discriminations, in order that the chairman might insist, as I hoped he would, upon the department's removing these occasions for honest criticism. I made my criticism not with any idea of arousing the antagonism of the gentleman from South Carolina, not with the idea of setting one section against the other, but with the idea of pointing out certain facts; and I challenged the gentleman from South Carolina or the department or any Member of the House to show that the comparisons that I made were not borne out by the testimony and the statements submitted by the Department of Agriculture to the committee in its hearings.

The gentleman from South Carolina [Mr. LEVER] himself raises the issue of sectionalism, because he is unable to defend these discriminations, and so raises the cry that gentlemen on this side are raising the sectional issue to befog the real situation.

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. LEVER. Mr. Chairman, the amendment offered by the gentleman from Minnesota [Mr. ANDERSON] provides that of the $400,000 appropriated to investigate and encourage the adoption of improved methods of farm management and farm practice and farm-demonstration work, $300,000 shall be used outside of Washington.

I rise to oppose that amendment for these reasons: The Office of Farm Management in the Department of Agriculture, up to two years ago, engaged itself solely in investigational work. The first farm-demonstration work ever undertaken outside of the South by the Department of Agriculture was begun in 1911. The appropriation for that purpose was then small. It has been growing by leaps and bounds until it has now reached the sum of $400,000. It is a good work. It has had the encouragement of every member of the Committee on Agriculture, among whom none has been more enthusiastic within reasonable limits than myself. But the Office of Farm Management is concerned not only with the matter of doing demonstration work, but it is engaged also in doing investigational and research work—gathering facts. I will read my friend the figures, so that we may know just exactly how much of this appropriation is going to be used for one purpose, how much for another purpose, and how much for the demonstration work pure and simple.

The estimates coming from the Secretary of Agriculture call for an appropriation for the fiscal year 1915 of $365,520, allotted as follows: $23,935 for administration purposes, $53,157 for farm economics, $42,122 for special farm-management studies, $237,126 for field study and demonstration, and $9,180 for the utilization of cacti and other dry-land plants.

Mr. ANDERSON. Will the gentleman yield just a moment?

Mr. LEVER. Yes; just a moment.

Mr. ANDERSON. I want to call the attention of the gentleman to the fact that last year their statement was that they were going to spend $240,000 in the field, and they did not do anything of the kind.

Mr. LEVER. I am going upon the allotment suggested by the department itself.

Now, as I figure it out, under the allotment proposed by the Department of Agriculture, there will be expended for purposes other than farm demonstration in the field the sum of $127,000 and for field work $273,000. In other words, the committee allowed an increase of the estimate of $35,000, which the committee are sure—at least I am sure—will be spent for the demonstration work and not for the investigational and research work. So the amendment of the gentleman carries out of the city of Washington only $27,000 more than is going to be carried out, anyhow, under the allotment of these funds by the Secretary of Agriculture.

Mr. ANDERSON. I only wanted to make certain that the prophecy which the gentleman makes will come true.

Mr. LEVER. I think if the gentleman had had the experience with the Department of Agriculture that the members of the Committee on Agriculture have had he would agree that the Department of Agriculture is very anxious to follow the will of Congress in the distribution of its funds. I am satisfied there will be no doubt about that.

I withdraw the point of order and ask for a vote.

The CHAIRMAN. The point of order is withdrawn. The question is on the amendment offered by the gentleman from Minnesota.

The amendment was rejected.

Mr. MANN. Mr. Chairman, in line 19, page 19, I move to strike out "$400,000" and insert in lieu thereof "$500,000."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 19, line 19, strike out "$400,000" and insert in lieu thereof "$500,000."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois.

The amendment was rejected.

The Clerk read as follows:

For farmers' cooperative demonstrations and for the study and demonstration of the best methods of meeting the ravages of the cotton-boll weevil, $378,240.

Mr. FOWLER. Mr. Chairman, I move to strike out the last word.

In 1908–9, when there was a proposition in the Agricultural appropriation bill to appropriate $896,200 for the plant industry, a reservation was made of $10,000, for immediate use, for the purpose of dealing with the boll weevil. Since that time nearly $2,000,000 have been appropriated, mostly under that head. I believe it has been demonstrated that no means has ever been devised for the purpose of destroying the boll weevil as we destroy other insects and farm pests.

Mr. Chairman, I regard this subject as one of the greatest that demands the attention of the people and of the Department of Agriculture to-day. [Applause.] I am only too sorry that we have not been able to devise some means of destroying this most devastating pest on one of the greatest industries of the world.

Mr. Chairman, 10 years ago there was a wise proposition submitted by Mr. James Berry, the Chief of the Climate and Crop

Division of the Weather Bureau, in an official letter to the Chief of the Weather Bureau, suggesting that that portion of Texas which had then lately been invaded by the boll weevil from Mexico should be segregated from the other portions of the cotton belt in the South. At that time but little damage had been done by his pest, and its operations were confined to a very small area adjacent to the Rio Grande River. At the time when this suggestion was made it would have been a comparatively inexpensive matter to have suspended the cultivation of cotton in the affected area for a number of years, which, in all probability, would have resulted in stamping out the boll weevil entirely, as developments since that time have revealed that segregation is the only remedy against its ravages. I commend the wisdom of this far-sighted proposition and submit Mr. Berry's letter in full for the benefit of the Members of Congress.

UNITED STATES DEPARTMENT OF AGRICULTURE,
WEATHER BUREAU,
*Washington, D. C., December 9, 1904.*

Prof. WILLIS L. MOORE,
*Chief United States Weather Bureau, Washington, D. C.*

SIR: As a means of checking the progress of one of the most destructive pests that has ever appeared in this country I beg permission to suggest that there be brought to the attention of the honorable Secretary of Agriculture the question of considering the advisability of recommending the enactment of legislation to prevent the cultivation of cotton during 1905 and in subsequent years if necessary within the area affected by the Mexican cotton boll weevil.

Some recent estimates place the value of the cotton crop of 1904 at more than $600,000,000, and the total production at 11,000,000 or more bales, about one-third of which is produced in Texas where the boll weevil is practically confined, only a few border parishes in Louisiana being affected as yet.

As I understand the investigations conducted by the entomologists of the department, it is impossible to produce more than half a crop in regions where the boll weevils are most numerous. It will thus be seen that if the boll weevil overspreads the entire cotton belt, as in the opinion of experts seems inevitable unless some effective remedial measures can be applied, the value of the cotton destroyed by this pest will eventually approximate $300,000,000 annually. The problem of dealing with this pest, therefore, is a very important one, and the danger which threatens so large a part of the United States is most grave.

The spread of the boll weevil over the entire cotton belt would take away almost the entire profit to be derived from the cultivation of one of the most important products of the country and would practically destroy all profit in the cultivation of the principal staple of the South. The suppression of the boll weevil is not a matter that concerns Texas alone or even the entire South, but in a measure the civilized world, especially the countries that depend upon the United States for their supply of cotton.

From what I have read of the pest and of the measures that have been employed so far in dealing with it, I am of the opinion that one of the best means of dealing with it that could be devised would be the prohibition of the cultivation of cotton for a year or two within the limits of the region now affected. As the matter is of grave concern to the entire country the National Government should do its part. If the Legislature of Texas should enact a law prohibiting the cultivation of cotton during the year 1905 in the affected region and the National Government should provide relief for those whose interests would be injuriously affected by the payment of some proportion, possibly 25 per cent to 50 per cent of the value of the crop grown in such area in 1904, I believe the experiment would be worth the trial and the cost. If the prohibition of the cultivation of cotton in the area affected cost the Government $50,000,000 annually for a year or two, and if such a course led to the extermination of the boll weevil, the outlay would be more than justified, for unless this pest is successfully dealt with it will eventually cost the Southern States two or three hundred million dollars per year.

The suggested method of dealing with this pest would be very costly, but nothing in the way of expense should prevent the adoption of any means promising to be effective in dealing with the most serious evil that has confronted the agricultural interests of the Southern States in their entire history.

Very respectfully,

JAMES BERRY,
*Chief Climate and Crop Division.*

Senator D. U. FLETCHER, of Florida, in commenting upon Mr. Berry's suggestion on the 29th day of July, 1913, expressed himself in a letter to Mr. Berry as follows:

I think it a great pity your suggestion of 1904 was not acted upon. It differs somewhat from the plan proposed now in that your idea was to discontinue growing cotton in the infected area, whereas the present suggestion is to quarantine the boll weevil by leaving a strip of territory 100 miles wide east and north of it free from the growing of cotton for one year.

If current information can be relied upon, the question of dealing with the boll weevil is a very grave one, and if some remedy can not be devised to check its spread and ravages, it will cost the American people an immense sum to handle it in the future. Ten years ago, when Mr. Berry made his suggestion, it was confined to a small horseshoe-shaped area in Texas, but now it has spread out over a vast area and threatens the extreme eastern and northern districts of the cotton belt.

Mr. Chairman, Mr. James Berry gave 32 of the best years of his life in the service of the Weather Bureau, during which time he built up the climate and crop division of that bureau to a degree of efficiency not surpassed in any civilized nation of the world. He originated and for years edited what was popularly known over the country as the Climate and Crop Bulletin, a bulletin most highly prized by the farmers of the country because of the valuable information it contained concerning current weather conditions and their effects upon farming operations and the cultivation and growth of crops.

Mr. Chairman, the value of the services which Mr. Berry has rendered to this country can not be too highly estimated. He was not only a man of ability in scientific knowledge of the subjects to which he had devoted a long service, but he was a man of conscience, which armed him with the courage to oppose evil and wrongdoing in high places, a man who, when confronted with the choice to consent to wrongdoing in the Weather Bureau or surrender his position, had the courage to tender his resignation to the Secretary of Agriculture and go back to private life in order to preserve his own honor and the honor of the bureau in which he had served so long and so well. [Applause.]

[Mr. TREADWAY, Mr. HAUGEN, and Mr. ANDERSON, by unanimous consent, were given leave to extend remarks.]

Mr. YOUNG of Texas. Mr. Chairman, I move to strike out the last word. There has been much discussion in recent years of the boll-weevil item carried in this bill, and I am glad to have the expert opinion of my friend from Illinois [Mr. FOWLER], who has just preceded me, living, as he does, a thousand miles from the cotton belt, expressing an opinion as to how to grapple with the pest that has destroyed land values and property rights of the people in the great cotton belt. The gentleman's idea, as I gather it, of segregating the infested section is by establishing quarantine lines over which the boll weevil should not pass under pain and penalty of the law. I would suggest to my friend that he is forgetful of the fact that this pestiferous insect has feet to walk and wings to fly and refuses to be bound by quarantine regulations.

I want to say that in the cotton belt we have for years been grappling with the boll weevil and its ravages. It has been a serious problem that has brought forth the best thought and energies of as great a people as live on this continent, and the problem has not been solved. I think that the Government in entering on this line of work displayed wisdom, because it went to the relief of that great industry in the South that not only is the mainstay of the people who live in that section of the country but to other great sections, whose citizenship must be clothed, and of the manufacturers, whose spindles must run. But for the cotton crop the balance of trade would be against this Nation of ours. [Applause.] Sixty-five per cent of this crop goes abroad and brings our gold supply in return.

Mr. Chairman, I come from a State where the boll weevil first made its appearance. It is supposed that this pest originally came from Mexico, and the Lord deliver us from any more Mexican troubles. [Laughter and applause.] When it came across the line and entered the southern border of Texas there were great cotton fields that had theretofore produced three-quarters of a bale or a bale of cotton to the acre in the rich valleys of the Brazos and other streams, and I have seen magnificent areas of farm lands swept until the farmers would not enter them, because there was nothing to gather. What was the effect of it? It carried the land values down from $300 and $200 an acre until they could not be sold at any price. The individual citizenship was forced to move to other sections of the country that they might have sustenance. Every man made an effort to find some remedy for this pest. I have seen men, women of the household, and children walking up and down the cotton rows gathering the punctured bolls and fallen squares, one by one, carrying them and burning them, seeking to destroy this pest. We have cut the fields clear of stalks and burned them. We have tried early planting and intensive cultivation; improved seed, rotation in crops—in fact, every method that could be thought of—and we have succeeded to some extent.

Mr. Chairman, the boll weevil is nearing the Georgia line. I want to say to the Members from Mississippi, Louisiana, Arkansas, Georgia, and other cotton States that they and their citizenship should not be foolish, as we were in Texas, and sacrifice their land values as our people did. There is a brighter day coming. I believe this great cotton industry will survive, as it has survived. Texas year before last made its record crop of 4,500,000 bales of cotton, notwithstanding the boll weevil. [Applause.]

Last year we made almost equally as good a crop. Our land values have jumped again. In the district I have the honor to represent I have seen these land values crumble, farms abandoned, the citizenship moving to other sections and entering other lines of business, many sacrificing their acres, the earnings of a lifetime. To-day not a foot of the choice land can be bought for less than from $25 an acre to as high as $200 an acre. We are winning this fight, and no braver or more patriotic people ever set about a task than the cotton grower of the South, who knows no repulse and will not cease his efforts till the fight is won. [Applause.]

The $378,000 carried in this bill and referred to as the boll-weevil appropriation covers the expense of the whole farm-demonstration work in the cotton States of the South. A very small part of it is spent on the boll weevil directly. Intensive and more scientific farming is being taught and practiced. Thrifty orchards, successful trucking, and a variety of crops are being successfully grown all over the Southland. The perseverance and the indomitable courage of our people will not admit defeat at the hands of a myriad of insects, and this Government can not better expend the taxes taken from the whole people than the investment it has been making and is now proposing to make in the $378,000 under controversy. And I am sure this Congress delights to make the investment. [Applause.]

The Clerk read as follows:

For the investigation and improvement of methods of crop production under semiarid or dry-land conditions, $145,000: *Provided*, That the limitation in this act as to the cost of farm buildings shall not apply to this paragraph.

Mr. SELDOMRIDGE. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 20, line 3, strike out the figures "$145,000" and insert the figures "$200,000."

Mr. SELDOMRIDGE. Mr. Chairman, in support of the amendment I desire to say briefly that I believe the appropriation carried in the bill for this work is not commensurate with its necessity and importance. Representing, as I do, in large part a constituency living in the arid region, I believe that no work the department can do will return more in benefit than that which can be done and should be done for the dry farmer. We have seen a section of the country that 20 years ago was devoted entirely to open-range industry becoming rapidly settled with those who are building homes, and through the policy pursued by the Agricultural Department we are learning that the possibilities of this region along agricultural lines has not yet been reached. I believe that with an adequate appropriation not only in the State which I represent but also in the neighboring States in which there are large areas of dry farming land great increase in production will be brought about. What is needed, in my judgment, to develop and increase the settlement of this particular region is that the Department of Agriculture should give to the settlers in our dry-farming country adequate means of information and demonstration.

The farmers complain that while the department is profuse in its dissemination of literature, there is a lack of that practical knowledge which comes in the way of demonstration, which is so much needed at the present time. When the settler in the arid region takes up his claim and settles upon it, he too often adopts methods of agriculture which have been followed in the Eastern States, and which prove to be unsatisfactory and unproductive. He needs the knowledge that can come to him only through practical demonstration to inform him of the most successful and remunerative methods of work. Therefore I believe that we should increase this appropriation to the amount named in the amendment, which will provide the department with larger means for touching the life of the dry farmer and bringing to him that aid which is quite apparent to those who are directly acquainted with it, of giving him practical and efficient demonstration work.

In this connection I wish to insert in the RECORD a statement showing the great increase in population in nine arid-land counties in Colorado and also a statement from an agriculturalist showing just what practical work is being accomplished in the way of practical demonstration.

The CHAIRMAN. Is there objection?

There was no objection.

The statements referred to are as follows:

*Table showing the growth of population in nine of the counties in the eastern part of Colorado, known as the ary-farming region, during the decade 1900 to 1910.*

[Taken from the Thirteenth Census Report. Accurate comparison of the other counties in this dry-farming region is not obtainable for the reason that they were all restricted and changed in boundaries during the decade.]

| County. | 1900 | 1910 | Increase. | |
|---|---|---|---|---|
| | | | | *Per cent.* |
| Baca | 759 | 2,516 | 1,757 | 331 |
| Elbert | 8,101 | 5,331 | 2,230 | 171 |
| Kiowa | 701 | 2,899 | 2,198 | 415 |
| Kit Carson | 1,589 | 7,483 | 5,903 | 473 |
| Logan | 3,292 | 9,549 | 6,257 | 290 |
| Phillips | 1,583 | 3,179 | 1,596 | 200 |
| Sedgwick | 971 | 3,061 | 2,090 | 315 |
| Washington | 1,241 | 6,002 | 4,761 | 485 |
| Yuma | 1,729 | 8,499 | 6,770 | 491 |

WHAT ONE COLORADO COUNTY IS DOING FOR ITS FARMERS.

[By W. H. Lauck, agriculturist for El Paso County.]

The work that is now being done in El Paso County is the outgrowth of a pressing need that has been felt for many years in the county. There are in every locality those persons who see ahead, who recognize certain valuable results to be obtained while the matter is still unnoticed by the majority. This was true in El Paso County. It is only of late years that the agricultural possibilities of this county have been recognized. In the past the land was used largely for grazing cattle, horses, and sheep. A constant influx of new settlers has increased the rural population. Most of these filed on homestead land on the plains and started farm operations. The severe droughts of 1910 and 1911 brought the settlers who in many cases were not well established to the spring of 1912 with a shortage of feed for stock and no seed for planting their fields. This came to the notice of several of the older settlers and also to some of the business men in Colorado Springs, who saw the need of assisting these people and the value they would be to the county if they could be helped in developing the plains section. A delegation of business men with the county commissioners made a tour of inspection, holding several meetings to get direct from the farmers the exact conditions. It was evident that the failure of the crops in the majority of cases was not due to the neglect or inability of the farmers. Conditions were against successful crop production because the farm land had been only recently broken and because of the protracted drought.

GOING THE FIRST MILE.

Acting on the theory that "a friend in need is a friend indeed," those interested started a campaign to secure money to be loaned out to those farmers needing assistance in $40 amounts, $16 for seed and $24 for horse feed, so as to make the farm operations possible. A favorable season followed and the farmers in almost every instance were able to meet their obligations when due. Besides this, there was seed for another year, feed for the stock, and some produce to sell. One of the requests made of the farmers was that they report on the crops grown, so that the agricultural committee of the chamber of commerce, as well as the business men, might know the possibilities of the plains as an agricultural section. Acting on the information obtained, the agricultural committee set about devising a plan to help these and other farmers in the county to solve their problems and to develop the agricultural resources of El Paso County to the fullest extent.

Through the education work of the agricultural department of the Rock Island line, representatives of the United States Department of Agriculture and the chamber of commerce were brought together and plans were evolved whereby an agricultural expert for El Paso County could be secured. In the maintenance of this work the board of county commissioners is in partnership with the United States Department of Agriculture. The county pays $1,800 and the Federal Government $1,200 a year, besides the franking privilege. It also has the cooperation of the Colorado Agricultural College and the Colorado Springs Chamber of Commerce. Each cooperating party has faithfully supported the work for "better agriculture" in El Paso County.

The agriculturist began his work October 16, 1912. He has had the hearty cooperation of the farmers, business men, and county officials. A preliminary survey was made of the several farming sections to ascertain the most important problems to study and work out. To increase the farmers' crop yields is only one of the things to consider. Distance from market, pure-bred live stock, cooperation in marketing, better farm management, better home conditions, better schools, etc., are among the things to plan for and consider.

Fifty or more silos have been built the past season as an outgrowth of the educational work carried on in the county.

Seven farmers' clubs have been organized for the social, educational, moral, and financial benefits to be obtained. At these club meetings timely subjects are discussed. The Colorado Springs Chamber of Commerce has supplied the agriculturist with a stereopticon and slides besides furnishing money for some photographic work. The stereopticon is used as a means of entertainment as well as education.

A carload of new seed potatoes was imported with the idea of replacing the potato industry of the county on its former basis.

A campaign against the prairie dog and other pests has been started.

Education work in the selection and testing of all farm grains for seed was carried on.

Ten farmers' institutes were held besides the farmers' club meetings. There were six silo day meetings with business men from the cities and towns in attendance which resulted in a tour of the farming section. Another tour of 125 miles was made by 50 Colorado Springs business men and bankers to learn the conditions and visit some of the farms in the plains section of the county. A delegation of six farmers from different vicinities met the business men at the point where lunch was served. These farmers made short talks telling of the conditions of their several vicinities and the possibilities of development.

THE SECOND MILE.

"And whosoever shall compel thee to go a mile, go with him twain." After most of the loans from the seed and feed fund had been repaid, the question of what should be done with the fund came up. A meeting of the subscribers was held, and they voted to turn the money over to the Farm Loan Co., organized at that time for the purpose of loaning money at a low rate of interest to farmers. This company is operated independently of the chamber of commerce. The tour of business men helped to strengthen the company financially, so that to-day money is being loaned at reasonable rates of interest for farm improvement and development. The main object of loaning this money is to encourage the dairy industry of the county. We are making dairying our leader.

Good roads have been and are being extended throughout the farming districts, which aid much in the development of the agricultural resources.

In conclusion, may I say that while the results of the past year's work are very gratifying there still remains much to do.

The agricultural acres are not producing as they can be made to produce; very few farmers are following crop rotation judiciously or intelligently. We need more and better milch cows, the keeping of records of the cows to eliminate the unprofitable ones. We want more silos. The keeping of farm records should be more common. It will be necessary to replan and reorganize the farm work of many farms, so that the farmer will realize a better income on his investment and have a better labor income than he has now. When these are brought about he will then improve his conditions and add to conveniences about the home he now has, and he and his family will be better satisfied, because of better farm management.

Mr. MONDELL. Mr. Chairman, I desire to support the amendment offered by the gentleman from Colorado. I appre-

ciate the fact that the committee has dealt fairly with this item and that the amount carried in the bill is perhaps sufficient to carry on the work in the way in which it has been carried on for a number of years past; but I believe the committee would be justified in the increase suggested. I know of no class of agricultural development more hopeful than that class of development which seeks to convert into farms lands that have heretofore been considered only valuable for pasture purposes. As the tide of settlement has moved westward we were constantly reaching the territory of gradually diminishing rainfall, and we finally reached a point where in the opinion of the average farmer it was impossible to attempt agriculture without irrigation. In those regions we began agricultural development under irrigation; but that is a slow and costly process, and it has its limitations in the comparatively small amount of water available for irrigation purposes; but in that territory between the actual desert and the land of sufficient rainfall there are very considerable areas having a precipitation of from 12 to 15 inches. Formerly it was not believed possible to carry on successfully farming operations with that amount of precipitation; but by the adoption of improved methods, by deep plowing, by surface cultivation, by the rotation of crops under the method of biennial cropping, the American farmer in that frontier territory has demonstrated the possibility of raising most of the cereals and a very considerable variety of hardy vegetables on those lands that were formerly believed to be valuable only for grazing purposes.

Several millions of acres of land of that character have been brought under the plow in the last three or four years. There is a large area still available for farming of this character. Under what is known as the enlarged-homestead law, passed several years ago, farmers from the Middle States have been going upon these so-called dry lands, and though their efforts are in some cases doomed to failure owing to the fact that the lands they have selected do not contain the soil adapted to dry-farming methods, because of the fact that some of them have gone into regions where the rainfall is too small, still a great many of those men have been and will be successful, and we are looking forward to a time when very largely increased areas in all the intermountain States will be brought under the plow and made profitable for agricultural farming purposes. Fifty cents an acre is the estimated value of the average western grazing land for grazing purposes. If these lands——

The CHAIRMAN. The time of the gentleman has expired.

Mr. MONDELL. Just one minute more.

The CHAIRMAN. The gentleman from Wyoming asks unanimous consent to proceed for one minute. Is there objection? [After a pause.] The Chair hears none.

Mr. MONDELL. If these lands can be made to produce a fair agricultural crop once in two years—and most of them can where the soil is of the proper kind and where the precipitation is not too small—we shall increase their productive capacity from 50 cents to at least $10 per acre per annum. That is equivalent to increasing twenty times the productive capacity of those lands and adding to our area in its productive capacity 19 acres every time we transform an acre of grazed land into an acre of farming land.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. BARTON rose.

The CHAIRMAN. Is the gentleman for or against the amendment?

Mr. BARTON. Mr. Chairman, I move to strike out the last word. I rise to support the amendment offered. I believe if it were possible for Members of Congress and members of this committee to see the conditions in the semiarid country along about harvest time, when the water is needed, and needed badly, that the little appropriation asked by the Member from Colorado would be granted. No one can tell the great results that would come from an investigation by experts. In the district I have the honor to represent we have suffered for six or seven years with a partial crop failure. What we need in that locality is a doctor to diagnose the case. The wealth is there, the men are there, the settlers are there, and have been there and will remain there, and when we ask for investigations along this line we are met with the reply that there are not sufficient funds to carry on the investigation. Now, I believe if there is any item in this bill—and, by the way, I have heard it all read, and have not lifted my voice yet to take up the time of the committee—if there is an item in this bill that deserves the support of this body, it is this item, because it makes productive a country that is practically nonproductive, and this request should be favored by every Member of this House. I gladly vote for an appropriation to wipe out the boll weevil, the cattle tick, or the hog cholera. I deplore that those conditions exist in any part of our country, and I think that sectionalism should never creep into this bill, for we are for the betterment of the entire country; and I do trust that your generosity will extend and that the same reasoning will be applied to the semiarid conditions in the West. [Applause.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Colorado.

Mr. LEVER. Mr. Chairman, before the Chair puts the question I would like to be heard for one moment. I desire to say to members of the committee that the committee allowed the estimates submitted by the department and those estimates carried an increase of $15,000 for this work, and the committee thought that a liberal allowance.

The question was taken, and the Chairman announced the noes seemed to have it.

Mr. SELDOMRIDGE. Mr. Chairman, I ask for a division.

Mr. LEVER. Mr. Chairman, I make the point it is too late.

Mr. MANN. Oh, no.

Mr. SELDOMRIDGE. I ask for a division.

The committee divided; and there were—ayes 17, noes 19.

So the amendment was rejected.

The Clerk read as follows:

For studying methods of clearing off "logged-off" lands with a view to their utilization for agricultural and dairying purposes; for their irrigation; for testing powders in clearing them; and for the utilization of by-products arising in the process of clearing, in cooperation with the States, companies, or individuals, or otherwise, $5,000.

Mr. COX. Mr. Chairman, I move to strike out the last word. I have not read any hearings on this subject and I do not know whether any hearings were had upon it. I wish the chairman would give me some information as to any expert or anybody else sent out by the Agricultural Department who can tell those people anything about how to clear up logged-off land, and test powder for the purpose of blowing up stumps, and so forth.

Mr. LEVER. In reply to the gentleman I will say that the best-informed man on that subject is my friend from Oregon [Mr. HAWLEY].

Mr. HAWLEY. This provision is for this purpose: There are in the West lands already cut over or that are being cut over—burned-over land—that are open to settlement, and homesteads are being made upon them——

Mr. COX. Now, to get down to a concrete proposition. How can they teach them anything? I do not see how they can tell an old farmer how to clear off logged-off land. I was raised in a wooded country myself, and I know that farmers can get rid of those old trees and stumps without the assistance of the Department of Agriculture or anybody else.

Mr. HAWLEY. There are a number of questions involved in this. First, as to the large pine and fir stumps; many of them can be used if properly blown out with powder. A great many of them are very pitchy, and from them turpentine and other products can be extracted.

Mr. COX. And they want that general knowledge as to how those by-products can be utilized for certain things?

Mr. HAWLEY. No. How to get them out.

Mr. COX. How do they test the powder?

Mr. HAWLEY. I am not advised as to that particular operation, but there are a number of different powders, and there are different ways of putting them under the stumps in order to accomplish the results, so that a certain amount of powder——

Mr. COX. All that literature is sent out by the du Pont powder people, and all of my people who live in a wooded country get that literature which is sent out by that company. They either use powder or dynamite, without any aid or assistance from the Agricultural Department or any other person to tell them how to use it.

Mr. HAWLEY. Will the gentleman yield to me again?

Mr. COX. Yes.

Mr. HAWLEY. In addition to that, they tell them how to use it. That is true. But it is not sufficient just simply to tell people who come from places where they have never seen stumps removed——

Mr. COX. But these experts that go out there, do they actually take an auger and bore a hole down into the stump themselves and then tell the farmers how to put the dynamite in there? Do they perform the work themselves, or do they go there and boss and superintend it?

Mr. HAWLEY. They have so far gone upon the ground and tested the value of various powders, and told them how to use them. They have instructed the people. Now, for instance, there are large colonies coming in there from other portions of the country, buying up from the lumber companies vast areas of this logged-off land and settling them. These people are not accustomed to a logged-off country. The land, however, is very

fertile, and if they can find a way of getting rid of the stumps and the snags and the bigger logs they can make a good and profitable living out of their places. But they have never been used to that, and they do not know how to accomplish the work.

The CHAIRMAN. The time of the gentleman from Indiana [Mr. Cox] has expired.

Mr. HAWLEY. Mr. Chairman, I would like to oppose the amendment to strike out the last word.

Take a stump that is as wide as from where I stand to where the gentleman from Iowa sits——

Mr. COX. Twelve to fourteen feet?

Mr. HAWLEY. Yes. And down from that size to from 6 to 8 in diameter—and they occur very frequently. And there are certain dead trees and snags of trees, dead but yet standing, logs that can not be used for lumber purposes because they are crooked or have some other defect, scattered all over that land. That land, I know, will support a cow for a year, and the cow will earn $110 in that time. But the land is now so covered with logs and stumps as to be practically useless. Now, it is a great problem to get rid of those stumps at such a cost that the farmer or the homesteader can afford to do the work and pay the cost. For instance, there are some new machines that have been designed——

Mr. COX. Stump pullers?

Mr. HAWLEY. No; not stump pullers. They would be too expensive. How would you pull up a stump 14 feet in diameter?

Mr. COX. They do that in my country before they get the stumps out, but they are stumps ranging from 4 to 5 feet in diameter.

Mr. HAWLEY. They go on top of the stump. They probably were cut 10 feet above the ground in the old days of logging, and with a gasoline engine of 4 or 6 horsepower, costing $60 or $80, they bore a hole down through the stump——

Mr. COX. That is the point. Do these experts do that work themselves?

Mr. HAWLEY. They go out and investigate the matter and take with them the machine. For instance, a gentleman connected with the State Agricultural College in Oregon told me that they go out there and watch these men and supervise the work and determine whether those methods are efficient or not, and whether they can be improved and what improvements can be made.

Mr. COX. Where have these men obtained their training who do that? Did they get it in the first place from practice?

Mr. HAWLEY. I could not tell where they got their information.

Mr. COX. Are there not two propositions here—first, the work; and second, the money? Can not any man do that who has enough sense to operate a farm?

Mr. HAWLEY. No. But, going on with my illustration, they bore another hole in that stump at an angle, and in that hole they put a pint of kerosene, and with an asbestos-tipped rod they pump gasoline in and start a fire in that stump; and if it is properly done the whole stump will burn out with its own fuel, and all that is needed is a couple of hours' work to start it.

Mr. COX. The farmer learned that 40 years ago out in my district.

Mr. HAWLEY. Then there is another method. One of the most important is where they bore a number of holes in the stump all around it, start fires in these holes, and keep them burning with jets of air through iron piping to convey compressed air from a pump run by a gasoline engine, and so burn it out, roots and all, just as far below the surface as they want to go with the plow.

I may say, further, that problems that are old in one part of the country are new in another part. We are doing work over and over again in this bill every year. People are coming in from the East all over that western country, and they want to buy these lands, but they do not know the solution of the problem of clearing them up.

That area is as large as all the area of New England, and it seems to me it would be a justifiable expenditure and a good expenditure to put land which is as valuable as that under the plow and under cultivation. I think the gentleman will agree that if that land can be made available for cultivation, where one acre will support a cow for a year, and where that cow will earn $110, it is a valuable proposition.

Mr. COX. I agree with the gentleman that it is a valuable proposition, but the question that occurs to my mind is that it is not a matter that requires an expert to teach a man how to do it.

Mr. MANN. The gentleman from Indiana [Mr. Cox] must remember, if I may be allowed to interject a remark, that he comes from a country where they raise the finest forest timber in the world——

Mr. COX. Yes; that is correct about the quality of the timber produced in Indiana——

Mr. MANN. And what is trite in the gentleman's district may be new in another man's district. If you were to take the gentleman from Indiana out there to Oregon, they would not have need of any more information about timber.

The CHAIRMAN. The pro forma amendment will be considered withdrawn. The Clerk will read.

The Clerk read as follows.

For investigations in connection with western irrigation agriculture, the utilization of lands reclaimed under the reclamation act, and other areas in the arid and semiarid regions, $70,380.

Mr. STEPHENS of Texas. Mr. Chairman, I offer an amendment, which I send to the Clerk's desk.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Texas [Mr. STEPHENS].

The Clerk read as follows:

Page 20, line 14, after the figures "$70,380," insert the following: "*Provided*, That $10,000 of this sum shall be used on the semiarid plains of western Texas, at or near the city of Plainview."

Mr. MANN. I reserve a point of order on that, Mr. Chairman.

Mr. LEVER. Mr. Chairman, I reserve a point of order against that, and I desire to say that I trust the gentleman will not use over five minutes, because I want to move to rise at 6 o'clock, and I would like to get along a little on this bill.

The CHAIRMAN. The gentleman from South Carolina [Mr. LEVER] reserves a point of order on the amendment.

Mr. STEPHENS of Texas. Mr. Chairman, the necessity for this amendment is shown by the following letter from the board of trade of the city of Plainview, Tex., and is as follows, viz:

PLAINVIEW, TEX., *February 25, 1914.*

Hon. JOHN H. STEPHENS, M. C.,
*Washington, D. C.*

DEAR SIR: In looking over some old newspapers a few days ago I came across an article from you in one of them dated September 20, 1912, in which you stated you had taken up the question of an agricultural station for this place and expected the passage of your bill the following winter. You also stated that the Agricultural Committee had passed favorably on it. Since the second winter has come and almost gone without any word on the subject, we ask you to kindly inform us if any further progress has been made for securing the station for this place. We are in sore need of something of this kind, and believe you are the one man who can work it through for us.

If your coworkers could only be on the ground and see the great progress we are making along irrigation lines without the aid of Uncle Sam in any way, we do not believe they would hesitate for a minute to give what you are asking for us.

I presume you are perfectly conversant with the situation here. Up to date we have in 75 to 100 wells, and by the end of 1914 there will be in enough additional ones to run the number up to over 200, which will mean over 20,000 acres under irrigation, and that is just the beginning of the development that will in the end place close to a half million acres under water from well pumping.

Not only has the Texas Land & Development Co., after an exhaustive investigation of soil and water conditions here, shown their faith in the proposition by purchasing 60,000 acres of land in the Plainview shallow-water district, but the "blue-sky" law States of Ohio, Kansas, and Nebraska, after an investigation by their representatives, also passed favorably on it, and Mr. W. L. Rockwell, the Government irrigation man situated at San Antonio, is also more than favorably impressed with what he seems to think are unlimited possibilities along this line.

Comparatively speaking, our Government has spent but little money in the aid of development in west Texas. Most of the appropriations have gone to the central, eastern, and southern portions of the State. If we can get some help now when we need it most, we will show to the world the garden spot of the earth in the course of a little time.

Hoping you can see your way clear to push the matter for us and assuring you of our appreciation of your efforts in our behalf, I am,

Sincerely, yours,

O. M. UNGER, *Secretary.*

Mr. Chairman, to further show the necessity and justice of this amendment, I desire to state that the State of Texas has within its borders more semiarid lands than any other State in this Union, and we have never received a cent of the vast irrigation fund, amounting to $70,000,000, within the borders of our State. But if this point of order is sustained and this small sum denied us, we will still remain on the map and continue to raise more live stock and cotton than any other State, and, in addition, we will as always roll up a larger Democratic majority than any other of our States.

Mr. Chairman, the following statement will more clearly show the necessity for this appropriation than I have time now to present to this House. I can verify by personal observation the statement and letters, which are as follows:

Plainview is the county seat of Hale County; is located on the Pecos & Northern Texas Railway (Santa Fe), and is reached through connections at Amarillo and Sweetwater. A branch line of the Pecos & Northern Texas Railway extends from Plainview to Floydada and Lockney.

Plainview has a population of more than 5,000; has $50,000 invested in public school buildings, with an annual enrollment of more than 1,000 students; has the Wayland Baptist College and Seth Ward Methodist College, with an average enrollment of more than 200 pupils each; has 10 churches of various denominations; has three national

banks with a capital stock of $100,000 each; has 40 brick and cement stores; has a modern $35,000 opera house; has a $24,000 Elks' home; has a Masonic temple costing $25,000; has a 100-barrel flour mill, 2 elevators, and other institutions

The Plainview irrigation district includes all of Hale and portions of Swisher, Lubbock, Lamb, and Floyd Counties in northwest Texas. Plainview is at the center. The elevation of Plainview is about 3,000 feet.

The area is covered with a deep, rich, residual soil varying from a chocolate sandy loam to clay loam in texture and ranging from 3 to 10 feet or more in depth. There is a general slope to the south and east of about 10 feet to the mile.

There are no rocks, no roots or grubs, no alkali in either soil or water, no ravines or gulches, and no hills.

IRRIGATION IN THE PLAINVIEW DISTRICT IS BOTH PRACTICAL AND PROFITABLE.

In 1910 our citizens decided to drill a test well to determine the quantity and quality of water underlying this section. The well was drilled on the farm of J. H. Slaton. A wonderful amount of fine, pure water was struck, which gave rise to much excitement, and many individuals drilled wells.

Being desirous of knowing the value and extent of our water for irrigation purposes, we requested the United States Department of Agriculture, at Washington, D. C., to send us an irrigation expert to conduct an examination and make report of the facts found here.

This request was complied with, and Mr. P. E. Fuller came, and, after a critical and thorough examination of the logs of the several wells then in operation, together with the soils, climatic conditions, and the source of water, he made his official report to the department at Washington, approving the Plainview district as being feasible and practicable for profitable irrigation by pumpage. In his report Mr. Fuller stated that the water was of excellent quality, abundant in quantity, and lasting in character. A copy of this report can be had by anyone applying to the Department of Agriculture at Washington, D. C. According to this report and the demonstrated facts, this water is found in numerous strata, the first being encountered at depths varying from 20 to 60 feet.

NOT A SINGLE DRY WELL.

From this it will be seen that the quantity of water obtained is dependent on two things: First, the number of strata of the underflow you drill through, and, second, the size of your pump and engine. There have been over 50 wells drilled in Hale County, and they produce amounts ranging from 400 to 3,000 gallons per minute, being 576,000 to 4,320,000 gallons in 24 hours' run. These wells range in depth from 130 to 300 feet, the deeper wells furnishing the greater abundance of water, for the reasons above given.

It is gratifying to all concerned to know that of all the wells so far drilled in the Plainview district not a single one failed to get ample water.

In 1912 the attention of what is known as the Pearson Syndicate, of New York and London, England, was called to the wonderful possibilities of the Plainview irrigation district. This company sent their expert irrigation engineers here to investigate and verify the Government report made by Mr. Fuller two years previous. After a most thorough investigation, they gave their approval of the proposition as an ideal district for irrigation.

PEARSONS INVEST $3,000,000.

Relying on these reports and the demonstrated facts shown by the numerous wells in operation, this great syndicate incorporated under the laws of Texas under the name of the Texas Land & Development Co., and its initial purchase was over 60,000 acres of this land, the purchase price of which, together with the cost of development for irrigation purposes, represents an investment of more than $3,000,000.

This company has shown its faith by its works and by the expenditure of its millions. Why should other wide-awake business men hesitate to follow its lead?

The question is often asked, "What can be grown here?" This question is answered by stating that all the staple crops, such as alfalfa, corn, wheat, oats, barley, rye, and millet, can be successfully grown here every year by supplementing the annual rainfall by irrigation.

Almost every variety of garden vegetables, such as Irish and sweet potatoes, beans, peas, onions, turnips, cabbage, lettuce, tomatoes, celery, asparagus, beets, pumpkins, etc., all do well here.

We can raise as fine grapes, plums, and cherries as California, and we can beat that State growing peaches. Apples, pears, and, in fact, nearly all other fruits and berries, do well here, except such as are confined to tropical climates.

PROOF OF THE PUDDING.

As proof along this line we submit statements from men who live here and have produced the articles by them severally mentioned, which follow:

PLAINVIEW, TEX., *September 9, 1913.*

*To the Plainview Chamber of Commerce.*

GENTLEMEN: I have a No. 7 Advance pump, a 40-horsepower Herr engine. I did not get my well completed until about the last days of April, 1913. At this time the wheat and alfalfa were both suffering for water. I thrashed 40 bushels of wheat per acre on 17 acres. I had 15 acres set to alfalfa and got an average of 5½ tons per acre. I watered the wheat twice and the alfalfa four times, and each watering of the wheat and alfalfa averaged $2 per acre. I am sure I would have gotten at least 10 bushels more of wheat per acre and a ton of alfalfa per acre if I had gotten my well completed in time.

By leveling my land properly and correcting other errors I feel sure I will be able to reduce the cost of watering my land from one-third to one-half the cost for this year.

The cost of my pumping plant, complete, was $2,250.

C. S. EBELING.

SOUTH PLAINS NATURAL VINEYARD.

SEPTEMBER 18, 1913.

CHAMBER OF COMMERCE,
*Plainview, Tex.*

GENTLEMEN: Nearly 23 years ago I planted one of the first vineyards on the plains. This vineyard was about 1 mile east of Plainview, on a place I settled in 1889. In planting my grapes I first communicated with T. V. Munson, of Denison, Tex., who was decorated by the French Government with the Legion of Honor for his superior ability in grape culture, and is a leading authority on grape growing in the world.

Mr. Munson furnished me with a list of grapes he thought would succeed here. I planted over 40 different varieties, such as Concord, Delaware, Worden, Niagara, etc. At the same time I planted most all the California varieties.

From this experience I can frankly state that there is not another part of the United States where the eastern varieties of grapes can be grown as well as on the South Plains. This conclusion is deduced from actual test of over 20 years. The California grapes will not succeed here. They winter kill. I venture to say that more and better Concords, Niagaras, Wordens, etc., can be raised here to the same amount of space than any other part of the country.

Respectfully,

(Signed) L. S. KINDER.
*Judge Sixty-fourth Judicial District of Texas.*

Mr. MANN. I think the amendment is subject to a point of order. It is not a limitation upon the appropriation at all, and while under the organic act of the Department of Agriculture we have the authority to make an appropriation for this purpose, when the appropriation is made it must be left in the discretion of the Secretary of Agriculture as to where it shall be expended. Now, here is not a limitation, but a direction that a certain amount of it shall be expended in a certain place. It has been repeatedly held that such a proposition is subject to a point of order.

Mr. LEVER. I ask the Chairman to rule.

The CHAIRMAN. The Chair is of opinion that the point of order is well taken, because, by law, the Secretary of Agriculture is given certain discretion in the use of these appropriations, and this would restrict his discretion. Therefore the point of order is sustained.

The Clerk read as follows:

For studying methods of clearing off "logged-off" lands with a view to their utilization for agricultural and dairying purposes; for their irrigation; for testing powders in clearing them; and for the utilization of by-products arising in the process of clearing, in cooperation with the States, companies, or individuals, or otherwise, $5,000.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word. I desire to ask the gentleman how long he intends to run to-night.

Mr. LEVER. It is my hope to run until 6 o'clock. I will move that the committee rise promptly at 6.

Mr. STAFFORD. It is within 10 minutes of that hour.

Mr. LEVER. Does the gentleman wish to offer an amendment?

Mr. STAFFORD. I wish first to inquire how long the gentleman plans to run, and next point out to the gentleman that there is not a very large attendance here at the present time.

Mr. LEVER. I was in hopes, I would say to my distinguished friend from Wisconsin, that he would let me go as far as the seed item, which may provoke some discussion. If we can get there in 10 minutes, I shall be glad to do it. If not, I will move to rise at 6 o'clock.

Mr. STAFFORD. On Saturday evening, near 5 o'clock, to accommodate the gentleman, we passed over an item on which I wished to obtain certain information, and that was as to certain buildings that were being constructed by the Agricultural Department on some experimental farm over here in Maryland, at Beltsville. We have another experimental farm somewhere in the State of Virginia, nearby, on the Arlington estate. Recently I was surprised, after my 10 years of service, to learn that the Government had experimental farms. I find by following this bill closely that the department has several experimental farms; that it has one over here at Beltsville that has a Guernsey bull and 11 Jersey cows. Last year there was an appropriation recommended of some $15,000 for modern buildings for the accommodation of the Guernsey bull and the 11 Jersey cows. In this item we find a similar appropriation of $15,000 for necessary improvements, I suppose for housing some needed caretaker's family. Now, will the gentleman explain how many experimental farms we have, whether we have them for hogs, for cattle, for horses, and for other incidents of the Agricultural Department?

Mr. LEVER. Mr. Chairman, the work at the Arlington experimental farm is really the outdoor laboratory work of the Department of Agriculture. There is where they test out various seeds. There is where they propagate plants. There is where they make experimental tests. There is where the outdoor laboratory work is conducted. It is very important work.

Mr. STAFFORD. Is only $15,000 expended on that Arlington estate farm?

Mr. LEVER. Fifteen thousand dollars.

Mr. STAFFORD. For maintenance and everything connected with this farm?

Mr. LEVER. Yes. It has been carried in the bill for many years. There is no increase at all.

Mr. STAFFORD. So this $15,000 is not to be expended for buildings?

Mr. LEVER. Oh, no. It is for the experimental farm simply.

Mr. STAFFORD. How about the farm at Bethesda?

Mr. LEVER. The work at Bethesda is the study of the diseases of animals. It is run in connection with the Bureau of Animal Industry, and there they study various serums and various maladies and diseases of animals, like tuberculosis, blackleg, the foot-and-mouth disease, and other animal diseases. There they bring diseased animals of all kinds for investigational study and experimentation upon them. Of course, it is necessary to have buildings, but the improvements of the buildings last year cost practically nothing—$600 is my recollection. The subcommittee went out to Beltsville and made a very careful inquiry into that situation, and were much pleased with the work being done. Beltsville is 12 miles distant from Washington, between here and Baltimore. I will say to my friend that we are doing two general lines of work there. The Dairy Division is doing a great deal of investigational work. They are making, also, some very important breeding investigations, making experiments in regard to the proper kind of silos, and experimenting as to proper ventilation and heating of dairy plants. Of course, these are only a few of the lines of work being carried on.

Then there are being made by the Chief of the Division of Animal Industry experiments as to the mixture of feed for different animals—hogs and cattle—experiments with reference to the subject of inbreeding and other experiments along that general line of research. It is scientific work with reference to both animals and poultry, and is regarded as very important and necessary.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent for five minutes more

Mr. LEVER. Let me ask my friend if he will press these inquiries further to-morrow if I move that the committee do now rise?

Mr. STAFFORD. Yes; I am pressing these inquiries in good faith. There are several more questions that I wish to direct to the gentleman.

Mr. LEVER. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HAMLIN, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 13679, the Agricultural appropriation bill, and had directed him to report that the committee had come to no resolution thereon.

Mr. LEVER. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock to-morrow.

Mr. MANN. I will say to the gentleman that Tuesday is a very important day for committees; many committees meet on that day.

Mr. LEVER. We have not a quorum here to enforce my proposition. The gentleman from Illinois understands that we have not read but about six pages of the bill to-day.

Mr. MANN. I think we will get through with the bill this week, and that is all that is expected.

The SPEAKER. Is there objection?

Mr. MANN. I object.

ADJOURNMENT.

Mr. LEVER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly the House (at 5 o'clock and 58 minutes p. m.) adjourned until to-morrow, Tuesday, March 10, 1914, at 12 o'clock noon.

## EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of Narragansett Pier, R. I., with a view to the construction of a breakwater at or near the life-saving station (H. Doc. No. 818); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

2. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of Black Lake Harbor, Mich., with a view to obtaining a uniform depth of 21 feet from Lake Michigan to the turning basin opposite the city of Holland (H. Doc. No. 817); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

3. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of Fox River, at Kaukauna, Wis., consideration being given to any proposition involving cooperation on the part of local interests (H. Doc. No. 815); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

4. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, United States Army, report on preliminary examination of Crooked Channel, Fla. (H. Doc. No. 816); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. FERRIS, from the Committee on the Public Lands, to which was referred the bill (H. R. 14233) to provide for the leasing of coal lands in the Territory of Alaska, and for other purposes, reported the same without amendment, accompanied by a report (No. 352), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

By Mr. RAKER, from the Committee on Irrigation of Arid Lands, to which was referred the bill (H. R. 117) to amend the act of June 23, 1910, entitled "An act providing that entrymen for homesteads within the reclamation projects may assign their entries upon satisfactory proof of residence, improvement, and cultivation for five years the same same as though said entry had been made under the original homestead act," reported the same with amendment, accompanied by a report (No. 353), which said bill and report were referred to the House Calendar.

Mr. WATKINS, from the Committee on Revision of the Laws, to which was referred the bill (H. R. 14331) to amend section 19 of an act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, approved March 3, 1899, reported the same without amendment, accompanied by a report (No. 356), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. LEWIS of Maryland, from the Committee on Labor, to which was referred the bill (H. R. 14330) to prohibit the importation and entry of goods, wares, and merchandise made in whole or in part by convict, pauper, or detained labor, or made in whole or in part from materials which have been made in whole or in part or in any manner manipulated by convict or prison labor, reported the same with amendment, accompanied by a report (No. 358), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. MURRAY of Oklahoma, from the Committee on Indian Affairs, to which was referred the bill (H. R. 13133) to provide for the payment of drainage assessments on Indian lands in Oklahoma, reported the same without amendment, accompanied by a report (No. 359), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

## REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. McKELLAR, from the Committee on Military Affairs, to which was referred the bill (H. R. 11166) for the relief of Wilhelmina Rohe, reported the same without amendment, accompanied by a report (No. 354), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (H. R. 11256) granting relief and an honorable discharge to Jacob Barger, reported the same without amendment, accompanied by a report (No. 355), which said bill and report were referred to the Private Calendar.

Mr. DIES, from the Committee on Claims, to which was referred the bill (H. R. 3843) for the relief of the heirs of the late Peter Deel, reported the same without amendment, accompanied by a report (No. 357), which said bill and report were referred to the Private Calendar.

Mr. McKELLAR, from the Committee on Military Affairs, to which was referred the bill (S. 1829) for the relief of W. D. McLean, alias Donald McLean, reported the same without amendment, accompanied by a report (No. 360), which said bill and report were referred to the Private Calendar.

Mr. JOHNSON of Utah, from the Committee on the Public Lands, to which was referred the bill (S. 540) for the relief of

Joseph Hodges, reported the same without amendment, accompanied by a report (No. 361), which said bill and report were referred to the Private Calendar.

## PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. MAHER: A bill (H. R. 14376) to regulate the wages of laborers and mechanics employed in or under any and all departments of the Government; to the Committee on Labor.

By Mr. ALEXANDER: A bill (H. R. 14377) to amend section 4472 of the Revised Statutes; to the Committee on the Merchant Marine and Fisheries.

By Mr. QUIN: A bill (H. R. 14378) to prohibit common carriers, telephone companies, and telegraph companies from engaging in the sale of merchandise; to the Committee on Interstate and Foreign Commerce.

By Mr. EDWARDS: A bill (H. R. 14379) providing for the purchase of a site and the erection thereon of a public building at Midville, Ga.; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 14380) providing for the purchase of site and for public building at Darien, Ga.; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 14381) providing for the purchase of site and for public building at Oliver, Ga.; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 14382) providing for the purchase of site and for public building at Springfield, Ga.; to the Committee on Public Buildings and Grounds.

By Mr. GEORGE: A bill (H. R. 14383) to establish a commission to inquire into the financial relations between the Government of the United States and the District of Columbia; to the Committee on the District of Columbia.

By Mr. BAILEY: A bill (H. R. 14384) to regulate the assessment of property for taxation in the District of Columbia, and for other purposes; to the Committee on the District of Columbia.

By Mr. SIMS: A bill (H. R. 14385) to amend section 5 of "An act to provide for the opening, maintenance, protection, and operation of the Panama Canal and the sanitation of the Canal Zone," approved August 24, 1912; to the Committee on Interstate and Foreign Commerce.

By Mr. HELVERING: A bill (H. R. 14386) providing for the establishment of a term of the District Court for the District of Kansas at Salina, Kans.; to the Committee on the Judiciary.

By Mr. FITZHENRY: A bill (H. R. 14387) to amend chapter 1, section 17, and chapter 6, section 120, of the Judicial Code, and to repeal chapter 1, section 18, of the Judicial Code; to the Committee on the Judiciary.

By Mr. IGOE: A bill (H. R. 14388) to amend an act entitled "An act to amend sections 4415, 4416, 4423, 4426, 4449, 4452, 4470, 4472, 4498, and 4233 of the Revised Statutes of the United States, relating to steamboat inspection," approved March 3, 1905; to the Committee on the Merchant Marine and Fisheries.

By Mr. BURKE of Wisconsin: A bill (H. R. 14389) authorizing the Secretary of War to donate to the trustees of Rhine Center Cemetery, in the town of Sheboygan, in the county of Sheboygan and State of Wisconsin, two bronze or brass cannon or fieldpieces; to the Committee on Military Affairs.

By Mr. NEELY of West Virginia: Joint resolution (H. J. Res. 226) authorizing and directing the Secretary of Commerce to investigate, through the Commissioner of Corporations, the organization, conduct, and management of Follansbee Bros. Co., a corporation of Follansbee, W. Va.; to the Committee on Interstate and Foreign Commerce.

By Mr. GILMORE: Memorial of the Legislature of the State of Massachusetts, favoring the Hamill bill to pension civil-service employees in the Postal Service; to the Committee on Reform in the Civil Service.

By Mr. ASHBROOK: Memorial from the Legislature of the State of Ohio in favor of action by the United States Government for the eradication of hog cholera; to the Committee on Agriculture.

By Mr. WILLIS: Memorial from the Legislature of the State of Ohio, in favor of action by the United States Government for the eradication of hog cholera; to the Committee on Agriculture.

By Mr. ALLEN: Memorial from the Legislature of the State of Ohio, in favor of action by the United States Government for the eradication of hog cholera; to the Committee on Agriculture.

By Mr. LEVY: Memorial of the Legislature of the State of New York, requesting the United States Government to protest against the anti-Semitic demonstrations in Russia; to the Committee on Foreign Affairs.

## PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ALEXANDER: A bill (H. R. 14390) granting a pension to Fannie Wells; to the Committee on Invalid Pensions.

By Mr. ANTHONY: A bill (H. R. 14391) granting an increase of pension to Alexander S. Bowen; to the Commitee on Invalid Pensions.

Also, a bill (H. R. 14392) for the relief of Drs. Langworthy & Langworthy and others; to the Committee on Claims.

By Mr. ASHBROOK: A bill (H. R. 14393) granting a pension to Fred Tish; to the Committee on Pensions.

By Mr. BALTZ: A bill (H. R. 14394) granting a pension to Edward Dzengolewski; to the Committee on Invalid Pensions.

By Mr. BATHRICK: A bill (H. R. 14395) granting a pension to William Camp; to the Committee on Pensions.

Also, a bill (H. R. 14396) granting a pension to William Croft; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14397) granting a pension to Clarence J. Hoskins; to the Committee on Pensions.

Also, a bill (H. R. 14398) granting a pension to Irvin M. Kyle; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14399) granting an increase of pension to George P. Leroux; to the Committee on Pensions.

Also, a bill (H. R. 14400) granting an increase of pension to Homer C. Ried; to the Committee on Invalid Pensions.

Also, a bill H. R. 14401) granting an increase of pension to John A. White; to the Committee on Invalid Pensions.

By Mr. BRODBECK: A bill (H. R. 14402) granting an increase of pension to John O. Drawbaugh; to the Committee on Invalid Pensions.

By Mr. BURKE of Wisconsin: A bill (H. R. 14403) granting a pension to Regine Arentsen; to the Committee on Invalid Pensions.

By Mr. CANDLER of Mississippi: A bill (H. R. 14404) for the relief of E. F. Anderson; to the Committee on the Public Lands.

Also, a bill (H. R. 14405) for the relief of C. F. Jackson; to the Committee on the Public Lands.

By Mr. DAVENPORT: A bill (H. R. 14406) for the relief of Gray & Adkins; to the Committee on Indian Affairs.

By Mr. DONOHOE: A bill (H. R. 14407) granting a pension to Hannah A. Caldwell; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14408) granting a pension to Catherine Longshore; to the Committee on Invalid Pensions.

By Mr. DONOVAN: A bill (H. R. 14409) granting an increase of pension to Bridget Carey; to the Committee on Invalid Pensions.

By Mr. DYER: A bill (H. R. 14410) granting a pension to George C. Emmert; to the Committee on Pensions.

By Mr. FIELDS: A bill (H. R. 14411) for the relief of the legal representatives of William Ragan, deceased; to the Committee on War Claims.

By Mr. GOEKE: A bill (H. R. 14412) granting an increase of pension to Permelia A. Wise; to the Committee on Invalid Pensions.

By Mr. HELVERING: A bill (H. R. 14413) granting a pension to Harriet A. Butler; to the Committee on Invalid Pensions.

By Mr. KEATING: A bill (H. R. 14414) granting a pension to Hattie E. Pringle; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14415) granting an increase of pension to Henry Venning; to the Committee on Invalid Pensions.

By Mr. KELLY of Pennsylvania: A bill (H. R. 14416) for the relief of Revilow N. Spohn; to the Committee on War Claims.

By Mr. KENNEDY of Connecticut: A bill (H. R. 14417) granting an increase of pension to Nellie M. Gaunt; to the Committee on Invalid Pensions.

By Mr. KIRKPATRICK: A bill (H. R. 14418) granting a pension to Hannah Phillips; to the Committee on Invalid Pensions.

By Mr. LA FOLLETTE: A bill (H. R. 14419) granting a pension to Charlotte D. Bainbridge; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14420) granting certain lands to school district No. 44, Chelan County, Wash.; to the Committee on the Public Lands.

By Mr. LEE of Pennsylvania: A bill (H. R. 14421) granting a pension to Edwin L. Barker; to the Committee on Pensions.

By Mr. McGILLICUDDY: A bill (H. R. 14422) granting a pension to Hattie A. Wilson; to the Committee on Invalid Pensions.

By Mr SELLS: A bill (H. R. 14423) granting an increase of pension to William H. Pleasant; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14424) granting an increase of pension to James R. Stout; to the Committee on Invalid Pensions.

By Mr. TAGGART: A bill (H. R. 14425) for the relief of David H. Lewis; to the Committee on Claims.

By Mr. TRIBBLE: A bill (H. R. 14426) granting a pension to Robert Wilson; to the Committee on Pensions.

By Mr. WALLIN: A bill (H. R. 14427) granting a pension to Sarah Hinds; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14428) for the relief of the estate of Edgar S. Dudley; to the Committee on Claims.

By Mr. WHITACRE: A bill (H. R. 14429) granting a pension to Darius Spitler; to the Committee on Invalid Pensions.

## PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Petition of J. Wesley Brown, of Marshalltown, Iowa, asking that a law be framed to the effect that no subject of Great Britain shall hold any office in national soldiers' homes of the United States; to the Committee on Military Affairs.

Also (by request), petition of sundry citizens of Missouri, favoring national prohibition; to the Committee on the Judiciary.

Also (by request), petition of J. Wesley Brown, of Marshalltown, Iowa, asking that a law be framed granting a pension of $30 per month to every person in the Civil War who was in any hospital by reason of wounds or sickness incurred while in the Army and without regard to the length of service of said soldier in the Army or to his present disability; to the Committee on Invalid Pensions.

Also (by request), memorial of the Haines (Alaska) Democratic Club, favoring additional appropriation for providing exhibit from Alaska at Panama-American Exposition at San Francisco, Cal.; to the Committee on Appropriations.

Also (by request), memorial of the New York Chamber of Commerce, favoring repeal of canal-tolls exemption; to the Committee on Interstate and Foreign Commerce.

Also (by request), memorial of sundry citizens of Greencastle, Evansville, and Terre Haute, Ind., protesting against practice of polygamy in the United States; to the Committee on the Judiciary.

Also (by request), petition of the National Sons of the Revolution of Louisville, Ky., favoring passage of bill for "One hundred years peace celebration"; to the Committee on Foreign Affairs.

By Mr. ADAIR: Petition of sundry citizens of Indiana, against national prohibition; to the Committee on the Judiciary.

Also, petitions of sundry citizens of Anderson, Ind, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. ALLEN: Petitions of L. C. Fillmore and 26 other citizens of Hamilton County, Ohio, favoring national prohibition; to the Committee on the Judiciary.

Also, petitions of 400 citizens of Cincinnati and Hamilton County, Ohio, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. ANTHONY: Petition of the First National Bank of Troy, Kans., suggesting an amendment to the income-tax law; to the Committee on Ways and Means.

By Mr. ASHBROOK: Petition of the German Pioneer Society, Ohio, also J. A. Himes and others, of New Philadelphia, Ohio, against national prohibition; to the Committee on the Judiciary.

By Mr. BAILEY: Petition of sundry citizens of Hyndman, Pa., favoring House bill 8047, relative to extension of free-delivery Postal Service; to the Committee on the Post Office and Post Roads.

Also, petition of sundry citizens of Altoona, Pa., against national prohibition; to the Committee on the Judiciary.

By Mr. BALTZ: Petition of Harry Lichtfield, Oakdale, Ill., and sundry citizens, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. BARCHFELD: Petition of sundry citizens of Homestead, Pa., against national prohibition; to the Committee on the Judiciary.

By Mr. BELL of California: Memorial of the Associated Chambers of Commerce of the Pacific Coast, protesting against repeal of the canal tolls exemption; to the Committee on Interstate and Foreign Commerce.

By Mr. BRUCKNER: Memorial of the Memphis Cotton Exchange, favoring certain conditions to be inserted in contracts for futures; to the Committee on Agriculture.

Also, petitions of sundry citizens of the twenty-second congressional district of New York, protesting against national prohibition; to the Committee on the Judiciary.

Also, petition of the Heights Taxpayers' Association, favoring Government ownership of the telegraph, telephone, etc.; to the Committee on Interstate and Foreign Commerce.

Also, petitions of sundry citizens of the State of New York, favoring a two-battleship program; to the Committee on Naval Affairs.

Also, petition of the Chamber of Commerce of the State of New York, favoring repeal of canal tolls exemption; to the Committee on Interstate and Foreign Commerce.

By Mr. BURKE of Wisconsin: Remonstrance of the Rev. F. J. Bliefernicht, of Hartford, Wis., and 13 other ministers of the second congressional district of Wisconsin, protesting against the passage of House joint resolution 168 and Senate joint resolutions 50 and 88, and similar prohibition measures; to the Committee on the Judiciary.

Also, petition of sundry citizens of Jefferson, Wis., against national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens of Eau Claire, Wis., against national prohibition; to the Committee on the Judiciary.

By Mr. CALDER: Petition of sundry citizens of Brooklyn, N. Y., favoring constitutional amendment forbidding polygamy in the United States; to the Committee on the Judiciary.

Also, petition of sundry citizens of New York, against national prohibition amendment; to the Committee on the Judiciary.

By Mr. CARY: Petitions of C. Bartsch, George Sieglitz, C. Reinhard, C. Darnkert, B. Lemke, H. Schmeker, Paul Trepazyk, John Helm, George Hirsch, E. Kalb, Charlie Dunam, Frank Schallitz, Mike Kirsch, Robert Bayle, Joseph Theinn, Frank King, H. Kallath, Ferd Feller, B. C. Pagek, B. Lange, Adam Albert, Joseph Dudenkocpt, George H. Marsh, John Gresnunehl, jr., J. Schoenfelder, Reed Herrelbein, William Fleischer, Philipp Kissel, Peter Mather, George Schlegel, William Klehm, Aaron Pawock, William L. Bollow, John Zickuke, Martin E. Wilde, Joseph J. Albert, Henry Pafenkunb, T. Peffer, August Villiock, John Mabkes, Frank Nouck, Calude Wegier, Edward Pawelsky, Hugo Roemer, Richard Knuth, W. J. Nolan, Fergus M. Nolan, Felix Kasza, Albert Kolwitz, George Burke, William Mesler, Math Zimgbluth, George J. Keid, John Lemmer, Arthur Huennekem, and Ernest Janren, all citizens of Milwaukee, Wis., protesting against the passage of House joint resolution 168 and Senate joint resolutions 88 and 50, or any other prohibition measures introduced in Congress, as an unwarranted interference with the rights of all American citizens and a usurpation by the Federal Government of a domestic question belonging to the several States; to the Committee on the Judiciary.

Also, petitions of Jack Raedel, John M. Johnson, Walter Reetz, Fritz Holtsinger, Atto Pape, Frank Mackow, Sam Akey, Charles Thomas, Hugo Albert, Martin Peterson, A. Olson, Ewalt Zutter, Joseph Stein, Henry Lass, Fred Bloulein, Fred Zutters, S. J. Rue, A. M. Johnson, August Holim, William Sandman, R. F. Collun, Peter Sneider, Theodore Batalia, and Leo Martin, all citizens of Eau Claire, Wis., protesting against the passage of House joint resolution 168 and Senate joint resolutions 50 and 88, or any other prohibition measures which will interfere with the rights of American citizens; to the Committee on the Judiciary.

Also, petition of the Associated Chambers of Commerce of the Pacific Coast against repeal of exemption clause in Panama Canal Act; to the Committee on Interstate and Foreign Commerce.

By Mr. DALE: Memorial of the Associated Chambers of Commerce of the Pacific Coast, protesting against repeal of clause for free tolls in Panama Canal bill; to the Committee on Interstate and Foreign Commerce.

Also, petition of Frank Knizek Naval Camp, No. 49, United Spanish War Veterans, favoring passage of House bill 13044 for pensions for widows and orphans; to the Committee on Pensions.

Also, petition of the Federated Central Body of New York City, favoring passage of the seamen's bill (S. 136); to the Committee on the Merchant Marine and Fisheries.

Also, memorial of District Grand Lodge, No. 1, Independent Order B'nai B'rith, of Springfield, Mass., relative to provision exempting certain persons from literacy test in immigration bill; to the Committee on Immigration and Naturalization.

By Mr. DONOVAN: Petition of sundry citizens of Connecticut, against national prohibition; to the Committee on the Judiciary.

Also, petition of the George Washington and New Britain (Conn.) Branches of the American Continental League, against

"One hundred years of peace celebration"; to the Committee on Foreign Affairs.

Also, memorial of District Grand Lodge, No. 1, Independent Order B'nai B'rith, of Springfield, Mass., relative to exemption for certain persons from the literacy test in the immigration bill; to the Committee on Immigration and Naturalization.

By Mr. EAGAN: Petitions of sundry citizens of Hoboken, West New York, Guttenberg, Weehawken, West Hoboken, Union Hill, and Jersey City, all in Hudson County, N. J., protesting against national prohibition; to the Committee on the Judiciary.

By Mr. ESCH: Petition of the Federated Central Body, of New York City, favoring passage of the seamen's bill (S. 136); to the Committee on the Merchant Marine and Fisheries.

Also, petition of the National Association Bureau of Animal Industry Employees, favoring passage of House bill 9292, relative to classification of salaries of employees; to the Committee on Agriculture.

Also, petitions of various voters of the seventh congressional district of Wisconsin, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. GOOD: Petition of W. C. Dimmitt Post, No. 400, Department of Iowa, protesting against any change in the American flag; to the Committee on the Judiciary.

By Mr. GORDON: Petition of William Walsh and 37 other citizens of Cuyahoga County and of C. W. Bradway, of Mentor, Ohio, and 47 other citizens of Lake County, protesting against House joint resolution 168 and Senate joint resolutions 50 and 88 or any other similar prohibition measures; to the Committee on the Judiciary.

Also, petition of C. L. Kaufman and 915 other citizens of Cleveland, Ohio, protesting against House joint resolution 168 and Senate joint resolutions 50 and 88 and similar prohibition measures introduced in Congress as an unwarranted interference with the rights of all American citizens and a usurpation by the Federal Government of a domestic question belonging to the States; to the Committee on the Judiciary.

Also, petitions of sundry citizens of Ohio, favoring investigation of publication called the Menace; to the Committee on the Post Office and Post Roads.

By Mr. GRAHAM of Pennsylvania: Memorial of the Chamber of Commerce of the State of New York, favoring the repeal of the clause in the Panama Canal bill for free tolls; to the Committee on Interstate and Foreign Commerce.

Also, petitions of sundry citizens of Hartford, Conn., favoring House joint resolution No. 1, for right of suffrage for women; to the Committee on the Judiciary.

By Mr. HELVERING: Petition of the Salina (Kans.) Retail Merchants' Association, relative to establishment of a term of court at Salina, Kans.; to the Committee on the Judiciary.

By Mr. IGOE: Memorial of the Federated Central Body of New York City, favoring passage of the seamen's bill (S. 136); to the Committee on the Merchant Marine and Fisheries.

Also, memorial of the Associated Chambers of Commerce of the Pacific Coast, protesting against repeal of canal tolls exemption; to the Committee on Interstate and Foreign Commerce.

Also, petition of the Brown Shoe Co., of St. Louis, Mo., realtive to Ransdell-Humphreys bill for flood control; to the Committee on Rivers and Harbors.

Also, petition of New York Typographical Union, No. 6, favoring passage of House bill 1873, the anti-injunction bill; to the Committee on the Judiciary.

By Mr. JOHNSON of Utah (by request): Petitions of Nathan Offer and 16 other citizens of Utah, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. KEATING: Petitions of sundry citizens of Pueblo, Colo., protesting against national prohibition; to the Committee on the Judiciary.

Also, petitions of sundry citizens of Subert, Colo., favoring passage of the Linquist pure-fabric bill; to the Committee on Interstate and Foreign Commerce.

By Mr. KELLY of Pennsylvania: Petition of sundry citizens of Braddock, Pa., and vicinity, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. KENNEDY of Connecticut: Petition of sundry citizens of Waterbury, Conn., against national prohibition; to the Committee on the Judiciary.

Also, petition of Mad River Grange, No. 71, of Waterbury, Conn., favoring adoption of a rural-credit system (H. R. 11897); to the Committee on Banking and Currency.

Also, memorial of Division No. 1, Ancient Order of Hibernians, of Bridgeport, Conn., protesting against "One hundred years of peace celebration"; to the Committee on Foreign Affairs.

By Mr. KENNEDY of Iowa: Petition of the Cigarmakers' Union of Keokuk, Iowa, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. KIESS of Pennsylvania: Petition of sundry citizens of Covington, Pa., favoring national prohibition; to the Committee on the Judiciary.

By Mr. KONOP: Petition of sundry citizens of Wisconsin against national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens of Wisconsin against Sabbath-observance bill; to the Committee on the District of Columbia.

Also, petition of the National Association of the Bureau of Animal Industry, of Milwaukee, Wis., favoring Lobeck bill, relative to classification of salaries of employees in Department of Agriculture (H. R. 9292); to the Committee on Agriculture.

Also, petition of M. J. Blick and A. G. Myse and others, of Appleton, Wis., protesting against national prohibition; to the Committee on the Judiciary.

By Mr. LEE of Pennsylvania: Petition of Theodore Roosevelt Camp, United Spanish War Veterans, favoring House bill 13044, to provide pensions for widows of Spanish War veterans; to the Committee on Pensions.

By Mr. LIEB: Petitions of the Evansville Office Equipment Co., the International Steel & Iron Construction Co., the Evansville Desk Co., P. H. Reddinger Carving Works, Richardt Realty Co., Klamer-Goebel Furniture Co., the Buehner Chair Co., the Lindenschmidt Co., Koch Outfitting Co., and the Wm. E. Meier Grocery Co., all of Evansville, Ind., protesting against national prohibition; to the Committee on the Judiciary.

By Mr. LONERGAN: Petition of District Grand Lodge, No. 1, Independent Order B'nai B'rith, of New York, protesting against the literacy test in the Burnett immigration bill; to the Committee on Immigration and Naturalization.

By Mr. MAHAN: Memorial of Division No. 1, Ancient Order of Hibernians, of Bridgeport, Conn., protesting against "One hundred years of peace celebration"; to the Committee on Foreign Affairs.

By Mr. MAPES: Petition of sundry citizes of Michigan, favoring investigation of Pere Marquette Railroad; to the Committee on Interstate and Foreign Commerce.

Also, petition of sundry citizens of Michigan, against national prohibition; to the Committee on the Judiciary.

By Mr. McKELLAR (by request): Petition of sundry citizens of Tennessee, relative to national prohibition; to the Committee on the Judiciary.

By Mr. McKENZIE: Petitions of sundry citizens of the State of Illinois, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. METZ: Memorial of the Chamber of Commerce of the State of New York, favoring repeal of canal-tolls exemption; to the Committee on Interstate and Foreign Commerce.

Also, petitions of sundry citizens of Brooklyn, N. Y., protesting against national prohibition; to the Committee on the Judiciary.

By Mr. MOTT: Petition of the Associated Chambers of Commerce of the Pacific coast against repeal of exemption clause in Panama Canal act; to the Committee on Interstate and Foreign Commerce.

Also, petitions of Kirkland Grange, No. 684, Patrons of Husbandry, of Redwood, N. Y., and North Hannibal (N. Y.) Grange, Patrons of Husbandry, No. 672, favoring House bill 11897, relative to farm credits; to the Committee on Banking and Currency.

Also, petition of the Washington (D. C.) Central Labor Union, favoring House bill 12873, relative to taxation in the District of Columbia; to the Committee on the District of Columbia.

Also, petition of New York Typographical Union, No. 6, favoring Bartlett-Bacon anti-injunction bill; to the Committee on the Judiciary.

By Mr. J. I. NOLAN: Telegrams from the San Francisco Retail Cigar Dealers' Association, S. Bachman Co. (Inc.), and 15 other wholesale cigar dealers of San Francisco, Cal., favoring the passage of House bill 13723, known as the Underwood anti-coupon bill; to the Committee on Ways and Means.

By Mr. PAIGE of Massachusetts: Petition of the Clinton (Mass.) Branch, German-American Alliance, and sundry citizens of Massachusetts, against national prohibition; to the Committee on the Judiciary.

Also, petition of Paul Revere Branch, American Continental League, of Leominster, Mass., against repeal of exemption clause in Panama Canal act; to the Committee on Interstate and Foreign Commerce.

By Mr. PATTEN of New York: Petition of District Grand Lodge No. 1, Independent Order of B'nai B'rith, against literacy test in Burnett immigration bill; to the Committee on Immigration and Naturalization.

By Mr. PLUMLEY: Petition of Patrick McGreevy, of Winooski, Vt., protesting against national prohibition; to the Committee on the Judiciary.

By Mr. REILLY of Connecticut: Memorial of the Chamber of Commerce of the State of New York, favoring repeal of clause for free tolls in Panama Canal bill; to the Committee on Interstate and Foreign Commerce.

Also, petition of the New Britain (Conn.) Branch of the American Continental League, protesting against "One hundred years peace celebration"; to the Committee on Foreign Affairs.

Also, petition of District Grand Lodge, No. 1, Independent Order B'nai B'rith, of Springfield, Mass., favoring provision in immigration bill exempting certain persons from literacy test; to the Committee on Immigration and Naturalization.

Also, memorial of the Associated Chamber of Commerce of the Pacific Coast, protesting against repeal of clause in Panama Canal bill for free tolls; to the Committee on Interstate and Foreign Commerce.

Also, memorial of the executive board of the Connecticut Federation of Labor, protesting against national prohibition; to the Committee on the Judiciary.

Also, petition of the Federated Central Body of New York City, favoring passage of the seamen's bill (S. 136); to the Committee on the Merchant Marine and Fisheries.

By Mr. RAKER: Petition of the Oceanic Steamship Co., of San Francisco, Cal., favoring a bill providing for construction of revenue cutters; to the Committee on Interstate and Foreign Commerce.

By Mr. SABATH: Petition of the Grand Lodge, Independent Order of Vikings, favoring passage of bill to erect monument to John Ericsson; to the Committee on the Library.

Also, petition of the Federated Central Body of New York City, favoring passage of seamen's bill (S. 136); to the Committee on the Merchant Marine and Fisheries.

Also, petitions of sundry citizens of the fifth congressional district of Illinois, protesting against national prohibition; to the Committee on the Judiciary.

Also, petition of the National Association of Clothiers, of New York City, protesting against passage of House bill 1873, anti-injunction bill; to the Committee on the Judiciary.

Also, memorial of the city council of Chicago, protesting against literacy test in immigration bill (H. R. 6060); to the Committee on Immigration and Naturalization.

By Mr. SCULLY: Petition of James A. Raske, of South Amboy, N. J., protesting against national prohibition; to the Committee on the Judiciary.

Also, petition of the Federated Central Body of New York City, favoring passage of the seamen's bill (S. 136); to the Committee on the Merchant Marine and Fisheries.

Also, petition of the Memphis Cotton Exchange, relative to certain conditions to be inserted in contracts for futures; to the Committee on Agriculture.

Also, memorial of the city of Newark, N. J., relative to dredging in Newark Bay; to the Committee on Rivers and Harbors.

By Mr. SELDOMRIDGE: Petition of the Washington (D. C.) Central Labor Union, favoring House bill 12873 relative to taxation in the District of Columbia; to the Committee on the District of Columbia.

By Mr. SMITH of Idaho: Petition of 13 business firms of Wendell, Idaho, favoring passage of House bill 5308, relative to mail-order houses; to the Committee on Ways and Means.

By Mr. THACHER: Petition of sundry citizens of Massachusetts, against national prohibition; to the Committee on the Judiciary.

By Mr. WHITACRE: Petitions of sundry citizens of Youngstown, Ohio, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. WILLIAMS: Memorial of the Chamber of Commerce of Freeport, Ill., favoring plan for park extension in the District of Columbia; to the Committee on the District of Columbia.

Also, resolutions of the East St. Louis Bar Association, in reference to Baltz resolutions changing boundaries of the Federal judicial districts in Illinois; to the Committee on the Judiciary.

Also, memorial of the Grand Lodge, Independent Order of Vikings, favoring passage of bill for monument to John Ericsson; to the Committee on the Library.

Also, petition of the Excelsior Stove & Manufacturing Co., of Quincy, Ill., protesting against passage of House bill 1873, the anti-injunction bill; to the Committee on the Judiciary.

Also, memorial of the Associated Chambers of Commerce of the Pacific Coast, protesting against repeal of canal-tolls exemption; to the Committee on Interstate and Foreign Commerce.

Also, memorial of Doctor Page Camp, No. 59, United Spanish War Veterans, favoring placing veterans of Spanish War on same basis as veterans of Civil War; to the Committee on Pensions.

Also, petition of Local No. 7, International Brotherhood of Foundry Employees, of Belleville, Ill., protesting against national prohibition; to the Committee on the Judiciary.

Also, memorial of Pike, Will, and Adams Counties (Ill.) Bar Association, protesting against moving United States court from Quincy, Ill.; to the Committee on the Judiciary.

Also, memorial of the National Association of the Bureau of Animal Industry Employees, favoring passage of House bill 9292, relative to classification and salaries of employees; to the Committee on Agriculture.

Also, memorial of the Wiley Church, Fulton Co., Ill., favoring national prohibition; to the Committee on the Judiciary.

Also, memorial of sundry citizens of Cincinnati, Ohio, protesting against immigration bill in present form; to the Committee on Immigration and Naturalization.

By Mr. WILLIS: Petition of P. O. Robinson and 60 other citizens of Plain City, Ohio, in favor of House joint resolution 168, relating to national prohibition; to the Committee on the Judiciary.

Also, petition of A. A. Scott and 16 other citizens of Crawford County, Ohio, against House joint resolution 168, relating to national prohibition; to the Committee on the Judiciary.

By Mr. WINSLOW: Petitions of sundry citizens of Worcester County, Mass., protesting against national prohibition; to the Committee on the Judiciary.

By Mr. YOUNG of North Dakota: Petition of sundry citizens of North Dakota, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of D. C. Poindexter, of Bismarck, N. Dak., and others, favoring Bartlett-Bacon anti-injunction bill; to the Committee on the Judiciary.

## SENATE.

### TUESDAY, *March 10, 1914.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, Thou dost give to us but little time, and yet Thou dost require great things at our hands. Thou dost put us in a place to build a mighty empire and to cooperate with God in the establishment of a kingdom of righteousness, and yet our time is but a day, a step, a span. So we find our need of God; for who is sufficient for these things? Who then can be saved? By Thy power alone can we be fitted for the great duties of life and empowered to meet the responsibilities of life.

We pray that through Thy power we may address ourselves to the tasks of this day, and with a passionate devotion to duty and a true estimate of the greatness of human life may so discharge all duties as to bring God's favor and blessing and help to us. For Christ's sake. Amen.

The Journal of yesterday's proceedings was read and approved.

#### RAILROADS IN ALASKA.

Mr. PITTMAN. I move that the Senate proceed to the consideration of the conference report on the bill (S. 48) to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes, and I ask that the report be adopted.

The VICE PRESIDENT. The question is on agreeing to the conference report.

Mr. JONES. Of course, I should like to see it adopted right away, but the Senator from Iowa [Mr. CUMMINS], I think, is interested in it. I would dislike to have it adopted in his absence, as he wanted to submit some remarks on it.

Mr. CUMMINS entered the Chamber.

Mr. SMOOT. If the Senator from Nevada will withhold his request for a little while, I am quite sure the Senator from Iowa will be in.

The VICE PRESIDENT. The Senator from Iowa is in the Chamber now. The question is on the adoption of the conference report on the Alaska railroad bill

Mr. CUMMINS. Mr. President, if the Senate adopts the conference report it will have surrendered the most important amendment which was made to the bill during the course of its consideration in this body. I desire to put before the Senate as briefly as I can the reasons which seem to me to be conclusive against the abandonment of the amendment to which I refer.

The situation there is known to all Senators. There are two railroads that I have especially in mind, beginning with the tidewater and extending into the interior or toward the interior of Alaska. One of them, the Copper River & Northwestern Railroad, begins, I think, at Cordova Bay and runs up two or three hundred miles into Alaska. The other begins at Resurrection Bay and runs a lesser distance into Alaska.

We are authorizing the President of the United States to spend $35,000,000 in the construction of a Government railroad or railroads in that Territory. We are investing him with very great power, probably greater power than we have ever before conferred upon an administrative officer of the Government. I think it is wise to confer upon him great power, because it is impossible for the Congress of the United States to exercise the discretion which will be required in the location and construction of a transportation system in that Territory.

The objection to the bill as it was reported by the Committee on Territories was that it permitted the President to begin the work of constructing the Government railroads at the termini of the railroads already there and to build it or them into the interior and then make such traffic connections or such leasing arrangements as might be feasible with the privately owned railroads now in Alaska and operate them as an entire system or lease them to be operated as an entire system. This condition would leave the United States thus: It would own detached parts of railroads in the interior and have no way of reaching the harbors of Alaska over its own lines.

I know just what the people of Alaska want. It is natural for them to want what they do. I am betraying no confidence whatever when I say that it has been the hope of many people in Alaska that the Government would spend the entire amount authorized here in the construction of new lines of railroad so that in the end the Territory would have not only the roads that are already built and privately owned but would have also the miles of railroad that can be built through the expenditure of the $35,000,000 here provided for. It is a natural feeling upon the part of those people; but it contravenes, as it seems to me, all the policies and all the principles that underlie this undertaking on the part of the Government.

I am unalterably opposed to the proposal that the Government shall take up the lines of road already there and build from their northern termini into the interior of the Territory. I gave my reasons for that belief when the bill was on its passage. I will repeat them now with such brevity as I can.

First, let me say that it is no answer to my position to insist that the President will not do this thing. I do not know whether he will or not. I do know, however, that all the influences that arise from what I have called the pride of the people of Alaska and all the influences which can emanate from the ownership of the railroads already there will be brought to bear upon him to induce him to pursue that course.

One gentleman from Alaska, whose name I will not give, although I feel at perfect liberty to give it if it should be demanded, a very well-known man from Alaska, a very eminent man, a man of whose integrity I have no doubt, a man whom I have never heard criticized or disparaged in any way, came to me and sought to induce me to forego my advocacy of the amendment which was adopted by the committee and afterwards adopted by the Senate. Why? He said to me that if the Government would extend the two lines already there and build a thousand miles of railroad, or substantially a thousand miles of railroad, according to the cost, with the appropriation we are now making, then Alaska would have not only the Government-constructed railways, but would have the railroads already there and that they could be used in conjunction to the great advantage of the Territory.

I will not speak of the other influences, because they have not sufficiently crystallized under my observation to warrant me in speaking of them. I know, however, that they exist, and I know the direction in which they have been and are now being exerted.

But, Mr. President, if we authorize the Chief Executive to do what the people of Alaska want and what this conference report will permit him to do, we will finally reach this condition. We will have a reasonably long line of railroad already built from Cordova Bay into the interior owned by the Copper River & Northwestern Railroad Co. It is not a valuable property now. It is not a revenue-producing property now, as we are informed. We will have, however, 300 miles of railway added to this fragment, this unprofitable venture, reaching toward the north, toward Fairbanks or some other point upon the navigable interior waters of Alaska. We will then have a privately owned railroad constituting part of a line to the sea and the Government-owned railroad constituting a part of the line toward the interior. Then the Chief Executive or Congress will have to consider one of two alternatives. Either the Government will then be called upon to buy the Copper River & Northwestern Railroad and thus complete its line from the interior to tidewater, or it will lease the line that we have constructed to the Copper River & Northwestern Railroad or to some other corporation that will operate them both.

There can be no other alternative, because we can not lease the Copper River & Northwestern Railroad and we can not operate the Copper River & Northwestern Railroad without the assent of that corporation, and I doubt very much whether this bill gives to the President the right to take a lease of that railroad.

If we exercise then our power to buy the Copper River road we must make another appropriation for that purpose, because the entire $35,000,000 that we here propose to expend in order to benefit Alaska and give its people an opportunity for development and growth will have been expended, or we must lease our line to the Copper River & Northwestern or some other corporation that takes them both over.

Assume now that we find it to be the best plan to buy the Copper River & Northwestern at that time, we will buy it under the most disadvantageous conditions that can possible be imagined. We will, by the expenditure of our money, have converted a fragment of a railroad, reaching nowhere save a copper mine, into a trunk line touching the interior navigable waters of Alaska; and we will have added in that way an immense value to the property which it does not now possess and which its owners ought not to receive, because they would receive it from the enterprise into which we are now entering, and they would receive it through the expenditure of the money of the people of the United States.

Is it not obvious, Senators, that if we ever intend to buy the Copper River & Northwestern Railroad, now is the time to buy it? The price at which it can be bought is vastly less now, or the condemnation price, if we resort to condemnation, must be vastly less now than it will hereafter be. Personally I am not in favor of ever buying the road. I am not in favor of locating a line of railroad into the interior of Alaska from that point. I think it would be most ill advised. I think that the men who have built that road ought to operate it as best they can. If they can make it profitable, let them do so; but if they have incurred a loss through their ill judgment, let them bear that loss. What we now propose to do will be in effect to relieve the Morgan-Guggenheim syndicate from the loss which it has suffered through the building of the Copper River & Northwestern Railroad. I am very far from asserting that that is the purpose of this surrender on the part of the Senate; but that will be its effect, and no one can gainsay it, if the President takes that course and locates the railroad at that point.

I think the President of the United States ought to know the price of the Copper River & Northwestern Railroad before he exercises his judgment in the location or the designation of a railroad of which this already constructed line constitutes a part. That ought to be one of the things that he should consider in order to determine the availability of the route or the wisdom of expending the public money by constructing or creating a line into the interior. That is one alternative. What is the other?

Unfortunately, we have granted in this bill to the President the right to lease the railroad line or lines that we are to construct. That is a mistake—an unfortunate mistake. We ought not to give the President the power to lease the railroad to any person or any corporation without we ourselves understanding the situation as it exists at that time and exercising our own judgment with respect to the propriety of leasing it as distinguished from operating it. But I made myself understood upon that point when the bill was before the Senate, and other Senators expressed their opinions about it. I have not changed my opinion; but that is not the chief point of my present objection.

Mr. CLARK of Wyoming. If the Senator just on that point will allow me to interrupt him, I wish to ask does not the conference report leave the President little or no option in that matter? The conference report, as I read it, allows the Government to operate the road only on one condition, to wit, that the President is unable to lease it to other parties.

Mr. CUMMINS. I am not sure that it is the interpretation of it, though I think it will bear that construction.

But, to pursue my point, if the President does not buy this railroad, and buy it with a value which we ourselves have added and which it does not now possess, then he has the right to lease the road that we have added at the end of it to some one who will operate them both. I want Senators just to think a moment of what the conditions will then be. Imagine the

President engaged in a negotiation for the leasing of the property that we have built. I do not know what President will then occupy the presidential office, but I assume that he will be an intelligent patriot, and will do whatever he can do to preserve the rights of the people and to accomplish the purposes for which we make this vast appropriation; but the argument will be—and it will be overpowering; it will be unanswerable—that if the Government can lease this property so that it will receive 3 per cent on its investment, it ought to do it. The bonds of the United States bear 3 per cent; that is the ordinary rate of interest for an investment in the obligations of the United States; and the danger, if not the certainty, of that negotiation will be that the road that we build will then be leased to the Morgan-Guggenheim syndicate, or whoever owns the Copper River & Northwestern Railroad, for a 3 per cent return upon our investment. One can easily understand that any private ownership of a common-carrier system would be very glad to pay 3 per cent for capital invested in that system. The railroads are now paying more than that; they are earning a great deal more than that.

But we have given the President of the United States by this bill power to lease this road, and unless we do connect it in some way with the sea, he will lease it, and he will be compelled by the very circumstances which surround him to lease it, and he will lease it at the ordinary rate at which the property of the United States, namely, its bonds, its obligations, bear; and we, with all the patriotism which underlies this bill—and there is no man in this Chamber who is more earnestly in favor of the Government owning and operating a railroad in Alaska than am I—with all this patriotism, with all this sentiment, we will simply have furnished some private corporation with a railroad capitalized at 3 per cent. To me it is a most shocking outcome, and I can not contemplate it with any sort of tolerance. We know that is wrong; we know it ought not to be done. I am willing to give the President all the discretion that he needs in determining between two or three or four things that may be right, but I am not willing to give him the discretion to do anything that we know is wrong, even though we may assume that he will not exercise that discretion.

Mr. JONES. Mr. President——

Mr. CUMMINS. I yield to the Senator from Washington.

Mr. JONES. I understand the Senator is objecting to the proposition to permit the President to lease the road.

Mr. CUMMINS. I am objecting to the proposition that the Government can take the $35,000,000 that we here appropriate and build detached portions of railroads from the northern termini of railroads that are already there; and I am pointing out that the power to lease, coupled with the construction of these railroads in that way, will inevitably bring disaster upon the undertaking we are now authorizing.

Mr. JONES. As to the first proposal, I may have something to say a little later on. I merely want to suggest that the power to lease was given to the President by both the House and the Senate, and the conferees could not change it.

Mr. CUMMINS. Certainly. I said in the beginning that I was not objecting to that, because it had passed the point of objection. We did object to it here, but our objection was unavailing. It was in both bills, and was not before the conference committee, and I am not assailing the report of the conference committee on that ground. I am assailing it on the ground that we are about to expend $35,000,000 to build 750 or 1,000 miles of railroad in Alaska without a single road touching a harbor; without a single facility for reaching the commerce of the sea; without a chance to do the very thing for the people of Alaska that this bill was intended to do.

Now, turning from the Copper River & Northwestern Railroad, which I think never ought to be bought, which I think ought not to form any part of a Government line, I come to the other railroad which has been discussed here, namely, the one called, I believe, the Alaska Northern, running from Resurrection Bay north. There, I think, the chief main line of railroad into the interior of Alaska ought to be built by the Government. But I do not insist upon my judgment with respect to that. I am willing to give the President the discretion to adopt that line or some other, for he may be better informed and will be better informed when he comes to exercise his power than I can be; but it is nevertheless true that the Alaska Northern will in all probability form a part of one of the lines of railroad upon which we are to reach the interior of Alaska. I will ask the Senator from Oregon how long is the Alaska Northern Railroad—70 miles?

Mr. CHAMBERLAIN. About 70 miles.

Mr. CUMMINS. About 70 miles in length. I am just as much opposed to the proposition of the Government building a line beginning at the northern terminus of the Alaska Northern as I am to the Government building a line from the northern terminus of the Copper River & Northwestern. There is a road now—a broken, dilapidated, unsuccessful venture—and it is not the business of the Government to restore to the people who invested their money in that property the losses which they have incurred. We are not bestowing a largess or a subsidy upon the men who have undertaken to build railroads in Alaska. We are undertaking to furnish to the people of Alaska a facility which they do not now possess, but we are giving the President the power to leave this little fragment of railroad line reaching the sea—touching a harbor—in private ownership and extending it toward the north to the navigable rivers of the interior with Government money, and then to be compelled to deal with the Alaska Northern Railroad, either by way of lease or by way of purchase, is a proposal so shocking to the common sense of all who have studied this subject that it ought not to be entertained for a single moment. If the President chooses that route, we ought to know from the time we expend our first dollar that the Government will own a railroad from Resurrection Bay or some other harbor in that vicinity; we ought to know that when we come to move the products of Alaska we can reach tidewater, that we can reach the open ocean, that we can reach the ships which are to convey these products to and from the shores of Alaska.

Mark my word, that if the Government expends $35,000,000 in building a railroad from the northern terminus of the Alaska Northern Railway, with its branches and its feeders and its other facilities for reaching particular enterprises, and we then come to deal with the Alaska Northern Railway concerning either its purchase or its lease, we will have guaranteed to these investors every penny that they have invested, and, in my opinion, vastly more; we will have contributed to them a value which our efforts have created.

I should like to know—and I suppose I will presently hear—why it is that the conference committee believes that the President should be given the power, the discretion to do this thing. I know, as I have said before, why the people of Alaska want it. It is perfectly natural for them to want it; they would be very glad if we would appropriate a hundred million dollars instead of $35,000,000; they are not so much interested in governmental policies as we are; they are not the custodians of the Public Treasury; they are not the directors of governmental problems, and it is therefore to be expected that they would like the Government to spend the $35,000,000 in building new lines of railroad, even though not a single rail touched the sea or gave any outlet at all to the world. They understand that private enterprise would be glad to connect the interior portions of railroads with the sea; and I suppose that they are not particularly concerned as to whether or not the Government operates these railroads.

I think, from what I have heard, they are entirely willing that they shall be operated by private corporations—of course under the control of the Interstate Commerce Commission. For us to spend this money, however, and then arrive at the miserable outcome of 700 miles of railroad in the interior of Alaska that either must be operated through some sort of an arrangement with the existing railroads or must be leased to these railroads for a rental which represents the ordinary interest upon Government investments, or else that we must buy these railroads when we have made them going concerns and profitable railroads and have given them an increased value, I look upon as entirely wrong.

Mr. REED rose.

Mr. CUMMINS. I yield to the Senator from Missouri.

Mr. REED. I am not sure that I do not agree with the Senator about many things he has said; but I should like to know if the Senator really means to assert that if these railroads are hereafter leased they will be leased at merely the amount sufficient to make the interest the Government is paying on its bonds, or is that something that he anticipates may be possible?

Mr. CUMMINS. Of course I do not know. It is impossible for anyone to know. I say that will be the natural course of affairs.

The railroads in Alaska will not be remunerative in the first instance. We will have invested the $35,000,000. Morgan and Guggenheim will come to the United States and say: "Now, you have built this road. Lease it to us and we will pay you a fair rate of interest upon the money you have expended."

What is a fair rate of interest for the Government to receive? That, of course, will depend largely upon the situation as it exists at that time, but the argument in favor of excepting a guaranty of the rate of interest which the Government ordinarily pays upon its own bonds will be exceedingly persuasive. I do not want any man to have the power even to listen to an argument of that kind.

Mr. REED. The Senator simply anticipates that whoever may be President when the situation arises may do something which the Senator thinks would be wrong, and which, it seems to me, would not only be wrong, but exceedingly foolish.

I rose, however, to ask the question, because I thought the Senator was really discussing the bill as though the result of leasing at the mere interest rate were the inevitable result, but I understand it now.

Mr. MARTINE of New Jersey. Mr. President——

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from New Jersey?

Mr. CUMMINS. I yield to the Senator.

Mr. MARTINE of New Jersey. If the Senator will permit me a word. I trust we may never come to a situation where the Government will lease the railroad built by the Government in Alaska. I want these railroads operated by the Government for the people. I am not going to anticipate that they will be turned over to the Guggenheim interests or any other interests.

This great conservation should take place for the people, and the great avenues or highways of commerce should be built by the people. We ought to build the road, and when we have done so, in Heaven's name let us reap the benefit of it and not parcel it out to any private interest. I believe public sentiment will sustain that position to-day in this country with éclat.

Mr. CUMMINS. The Senator is right. We ought not to have given the President any power to lease this property. I did everything I could do, on the passage of the bill through the Senate, to take away that power; but it is in the bill and the time is past when we could have changed it so far as the conference committee is concerned. The bill is so devised at this time that the President will be compelled to lease these detached portions of road which we build with our money to these other railroads which reach the same part of the country. He will be compelled to lease them unless we appropriate more money to build parallel roads to the sea.

Mr. PITTMAN. Mr. President——

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Nevada?

Mr. CUMMINS. I do.

Mr. PITTMAN. Is there anything in the bill that would compel the President to build detached roads?

Mr. CUMMINS. No, Mr. President; there is nothing in the language of the bill that compels him to do so.

Mr. PITTMAN. Then would it be a wise thing to build detached roads?

Mr. CUMMINS. I only know this, and the Senator from Nevada knows it, too, perfectly well: The influence which has succeeded in substituting the conference report for the Senate bill—and I am not saying it is a corrupt influence at all; I have described it several times—is an influence which intends that all the money we now appropriate shall be expended in the construction of new roads, and that no part of it shall be spent in the acquisition of railroads that are already there. If that influence prevails with the President, then he will begin the construction of this line in the interior of Alaska.

Mr. PITTMAN. As I understand the Senator, the building of these detached roads would be foolish; it would be an economic mistake; and the Senator himself, if in charge of the matter, would not build them. Does the Senator believe the influences he has spoken of, that might work on the President, would work on him if he were building these roads?

Mr. CUMMINS. It is very difficult, of course, for me to prescribe limits to the influences of which I speak. I know what they are and I know that they intend to accomplish their object if they can.

If those influences were of an improper or corrupt character, I might be willing to assume that they would not prevail; but they are not. They are influences which have reached and which have controlled the men who brought forward this proposition, and have controlled them because they are inclined to believe that this money ought to be expended in the construction of new lines of railroad, instead of beginning at the sea and being sure that we have a line of railroad from the sea to the interior before we expend a single dollar.

Mr. WALSH. Mr. President——

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Montana?

Mr. CUMMINS. Certainly.

Mr. WALSH. The Senator from Iowa says the necessity will be imposed upon the Government of leasing the road it constructs to the short lines now in existence, provided they form a portion of the entire route to the seaboard.

Mr. CUMMINS. I do not believe we ought to have anything to do with the private lines or any connection with the private lines. I think the Government ought to own all that is necessary in order to give the people of Alaska the relief to which they are entitled, and that it ought to operate the line for their benefit.

Mr. WALSH. I understand the position of the Senator, but I did not understand why, in his view, it would necessitate leasing the roads which the Government is to construct. Does the Senator dismiss altogether the idea of entering into a traffic arrangement either by voluntary agreement or under the direction of the Interstate Commerce Commission?

Mr. CUMMINS. I do not. I recognize that that is provided for.

Mr. WALSH. Then how does the Senator come to state that it necessitates leasing the railroads which the Government proposes to construct?

Mr. CUMMINS. Because I know a little about railroading. I was brought up in the business, and I have an opinion about the practicability of doing certain things. I have never known an enforced joint traffic arrangement that was satisfactory to either of the parties to it. There must be a voluntary arrangement in order to move traffic successfully and properly over two connecting lines of railroad.

If we were ever to reach that point and were to appear before the Interstate Commerce Commission in order to see what sort of traffic arrangement we should make with the Copper River & Northwestern Railroad, and were compelled to struggle over that and accept such a decision as the commission might make, and then attempt to run our engines and our trains to the meeting point with the Copper River & Northwestern, or the meeting point with the Alaska Northern, and there transfer the freight from the Government railroad to the private railroad, we would encounter such difficulties, we would be so embarrassed, that we would have spent our money in vain for the benefit of the people of Alaska.

It is therefore that I say that at the time of which I have spoken there will be just two alternatives, namely, the leasing of our railroad or the acquisition of their railroad.

Mr. CHAMBERLAIN. Mr. President, may I interrupt the Senator?

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Oregon?

Mr. CUMMINS. Yes.

Mr. CHAMBERLAIN. As I understand the Senator, he insists that the Government ought not under any circumstances to utilize any portion of any railroad that has been already constructed in Alaska. I understand from the reading of this bill that the President may, in his discretion, condemn or purchase either one of the lines now constructed there. Assume, however, that he exercises his power and his duty of constructing a line from tidewater into the interior, and he concludes that the route of which the Senator speaks, from Resurrection Bay over the Alaska Northern, is the best route, and he has an opportunity to parallel it, because the evidence does show that he can parallel either one of them. If he finds that he can purchase the Alaska Northern, for instance, from tidewater into the interior cheaper or as cheaply as it is possible for him to parallel it, does the Senator still say that he ought not to purchase the Alaska Northern?

Mr. CUMMINS. On the contrary, I think he ought to purchase it. I think the very first thing that should be ascertained is the price at which either of these railroads can be purchased; if that price is not satisfactory, then the cost of condemnation; and the further construction of the railroad ought to depend upon whether the President of the United States is willing to take these railroads, or either of them. If he can not acquire them at a fair cost in their present condition, then he ought to parallel them; or, if not that, he ought to choose some harbor that would come within the provisions of the bill and commence construction there.

I do not want to see parallel roads built, provided the existing railways that form a part of the route which is finally determined upon by the President can be acquired at their fair value; but I am unalterably opposed to changing conditions with our money so that when we do come to condemn or do come to acquire we shall be compelled to pay twice as much for the existing roads as we would be compelled to pay now.

That is the whole proposition. I am unalterably opposed to the expenditure of any money in Alaska for the purpose of building a railroad, unless the Government owns the railroad from the sea, and has the ocean to which to give the freight that it may bring from the interior. I reassert that if the President begins the construction of these roads in the interior, and builds them in the detached way that I know is anticipated at this moment, when the roads are built we shall either be compelled to buy the existing railroads at an exaggerated price, very much more than they would cost now, or we shall be com-

pelled to lease our roads to the existing railroads at a compensation which I fear will be very inadequate.

Mr. CHAMBERLAIN. Mr. President, may I interrupt the Senator?

Mr. CUMMINS. Certainly.

Mr. CHAMBERLAIN. I dissent from the view of the Senator from Iowa in insisting that under this bill the President will be compelled to commence the construction of the road in the interior of Alaska.

Mr. CUMMINS. I did not say he would be compelled to do it.

Mr. CHAMBERLAIN. That he may do it, then.

Mr. CUMMINS. Yes; he may do it.

Mr. CHAMBERLAIN. I dissent from that view of the Senator. I wish to say now that I am in sympathy with the Senator in most of the contentions he makes as to the impropriety of the Government expending its money to enhance the value of roads already constructed. My insistence is, and I differ from the Senator to that extent, that the President of the United States is compelled to commence to locate and lay out a road from tidewater into the interior; and in doing that, if he finds that he can do it more economically by taking one of the roads already constructed, he can do it. I do not think the Senator would deprive the President of that power.

Mr. CUMMINS. Not at all.

Mr. CHAMBERLAIN. It would not be a business proposition if he did.

Mr. CUMMINS. Mr. President, if the Copper River & Northwestern road should form a part of the line which the President thinks ought to be built—I hope he will not think so; I do not think we ought to expend a penny in that locality, but I am willing to give him that discretion; I think he can exercise it, probably, better than I could exercise the same discretion—if he concludes to adopt that line, then I want him to know how much that line will cost before he enters into the construction, and I want him to acquire that road before he expends the Government's money in building the line from its northern terminus into the interior.

It may very well be that if the President takes the necessary steps to ascertain what that road will cost the United States, that will determine him at once not to build a road from that point; to abandon that point and go to some other. He can not exercise a wise discretion without knowledge as to the cost of any roads that it is probable the United States may desire to acquire as a part of the line to be built.

As I have said before, however, if there is a man here who believes that we ought to build these isolated portions of railroads in the interior of Alaska without knowing how we are to reach the sea or upon what terms we are to reach the sea, without knowing what conditions may be imposed upon us by the private corporations that now own these properties, then I will hear an argument in favor of vesting this discretion in the President. If, however, we all believe that this would be an unwise policy, then I hope that we shall not give to the President the power to do a thing which we all agree ought not to be done.

In concluding what I have to say at this moment upon the subject, I repeat that I want a bill on this subject to pass. I want this bill rereferred to the committee, with a vote of the Senate with regard to this particular subject. I do not know just how to reach that end in a parliamentary way, and therefore I may stumble; but if I do, I am sure that I have friends here who will promptly lift me up.

I move that the bill be rereferred to a conference committee—of course I am perfectly willing it shall be the same conference committee—that a further conference be requested with the House, and that the conferees on the part of the Senate be instructed that it is the sense of the Senate that no amendment be agreed to that will make it possible to build Government railroads in the interior without connection with the sea. I am not at all sure that I have made a parliamentary motion, but I have indicated what I want.

Mr. CLARK of Wyoming. Mr. President, I rose not with reference to the particular matter which the Senator from Iowa has been discussing, although I thoroughly agree with him. I will go a little further. It seems to me from the reading of the bill that the main purpose is to build this road for the purpose of leasing it to other people. It is only to be operated by the Government in the event that the President can not make a satisfactory lease of the property. I think that is quite plain from the conference report. But it was another part of the report—which is purely technical, probably—to which I want to call the attention of the Senator from Nevada. It is a part of it which might necessitate its going back to conference for that purpose alone.

The Senator will notice in this House document, which I understand is the conference report, and I ask the Senator from Nevada if I am correct in that——

Mr. PITTMAN. I beg the Senator's pardon, but there was so much noise in the Chamber I could not hear what he said.

Mr. CLARK of Wyoming. I understood the Senator yesterday to say that the conference report is to be found in a House document that also presented the report.

Mr. PITTMAN. Yes; Document 341.

Mr. CLARK of Wyoming. It is 337 that I have.

Mr. PITTMAN. The last report is 341.

Mr. CLARK of Wyoming. It is the same?

Mr. PITTMAN. No; it is an amended report.

Mr. CLARK of Wyoming. Then there have been two reports. I will say that the amended report, to which I have not had my attention called, remedies the matter of which I intended to speak.

Mr. PITTMAN. Mr. President, this matter was debated for several days on the floor of the Senate, and the Senator from Iowa devoted a great deal of time to the question that he has debated so extensively to-day. Particularly did he debate the question as to granting the power to the President to lease these roads, and that question was disposed of.

The other amendment offered by the Senator from Iowa was adopted by this body, and I believe that every member of the conference on behalf of this body voted with the Senator.

As I construed, and do now construe, the amendment of the Senator from Iowa, its meaning is plain. Its meaning is that the President shall construct or buy or condemn one continuous road from some harbor on the coast to the interior waterways. The present bill means exactly the same thing. The bill as reported by the conferees provides that the President shall lay out a continuous road or roads from harbors on the coast of Alaska to interior points on the waterways. It also provides that he shall acquire by purchase, condemnation, or otherwise, and therein the bill reported by the conference is broader than the other bill, because the bill as it passed the Senate only allowed the President to acquire by condemnation and purchase, while the present bill allows the President to acquire by condemnation, purchase, and otherwise. But it might include the power of leasing.

Now, then, the only distinction between the two bills is this: This bill directs the President to build a continuous railroad or railroads from the coast to the interior, giving him the power to utilize existing roads as a part of that line when acquired by condemnation, purchase, or otherwise, while the amendment of the Senator from Iowa went further and stated that the line so located, embracing any part of another line, could not be utilized even to the extent of commencing construction until the existing line was acquired by purchase or condemnation. It is reasonable; it seems to me that it will occur to any reasonable man, to any man of plain, common business judgment, that you should acquire or have the power of acquiring by option or contract a part of a line that is to become part of a main line before starting in to build the main line.

We all agree on that, and we all agree that if the President is a man of that character, is a man of common business judgment, you would not have to tie him with handcuffs to compel him to do something that would appeal to the common judgment of an ordinary business man.

As for the influences the Senator from Iowa speaks of, I want to say that those influences would not affect any honest man. They would not affect the judgment of any plain, common business man, because the subject is too plain, it is too easily understood. If we are afraid that the power to which we have intrusted the building of these roads has not the ordinary judgment of a common business man, we should not grant any of the powers included in the bill.

I want to say to the Senator from Iowa that if you can not trust the President to conduct this as any ordinary business man, then you can not trust the President to select the routes for the roads to be laid out from the coast to the interior. If you can not trust him to obtain an option to buy a road before he connects it, then you can not trust him in the building of any of these roads, because if he has not sufficient business judgment, or if he can be so easily influenced and deceived, he might build such roads in the most extravagant manner and to parts of Alaska that will least benefit that Territory and the people of this country.

Mr. CUMMINS. Mr. President——

The VICE PRESIDENT. Does the Senator from Nevada yield to the Senator from Iowa?

Mr. PITTMAN. I do.

Mr. CUMMINS. If the argument of the Senator from Nevada were carried to its logical end, the result would be that

we ought to take out of the bill every guide, every restriction, every suggestion save the one which appropriates $35,000,000 and devotes it to the building of railroads in Alaska. If we can trust the President—and the Senator from Nevada has no higher opinion respecting his ability and his integrity than have I—if we can trust the President, then why surround him with any conditions at all? We have put into the bill scores of conditions and provisions, all of which limit in a way the discretion of the President. If the Senator from Nevada agrees with me that the thing I seek to accomplish is right, that no sane man of good judgment would do the thing I fear may be done, why should we give the President the discretion to do it?

Mr. PITTMAN. I was just getting to that point. That arose by reason of the efforts of the conferees to agree. There are some things in the bill that we as Senators did not want. There are some things in the bill that the conferees on the part of the House did not want. The object of the appointment of the conference was to reach an agreement if possible on a working bill.

Now, the Senator asks why put any restrictions in the bill if we have confidence in the President. I do not believe in putting any restrictions in the bill that I would not place upon any other business man to whom a business enterprise is intrusted. The bill expresses the principle. As to limiting the President as to the details of carrying it out, I think it is an utter mistake. The principle involved is the building of a railroad from the coast to the interior. The bill provides for that. The Senator says that the road may perhaps start and be built from the interior to the coast, and he wants to limit the President in that regard. I say that is limiting the President as you would not limit the superintendent of any such works, as such limitation would be unnecessary.

Mr. CUMMINS. The Senator is in error about that. It does not provide for the construction of a railroad from the ocean to the interior. It provides for the designation of a route from the sea to the interior, but the plain purpose is to enable the interior part to be built first and to use the privately owned railroads to reach the sea.

Mr. CLARK of Wyoming. Both Senators are mistaken, because it does not say the road shall be built from the ocean to the interior. It says it shall be located and constructed so as to connect the interior and the ocean. I want to ask the Senator's construction on one part of the conference report which changes the wording of the Senate bill. I ask for the construction put by the conference committee and by the Senator himself on that part of the first section which provides that the President may lease the road so constructed. I will call his attention to the exact words:

> In his discretion, to lease the said railroad or railroads, or any portion thereof, including telegraph and telephone lines, after completion, under such terms as he may deem proper, but no lease shall be for a longer period than 20 years, or, in the event of failure to lease, to operate the same until the further action of Congress.

I ask the Senator what he thinks that language really imposes as a duty upon the President. Would not the proper construction of it be, after constructing, equipping the road, to lease it, and in case he can not lease it, then to operate it?

Mr. PITTMAN. I think that is a matter of discretion left to the President. I think it was the intention of both bills to leave it to the discretion of the President.

Mr. CLARK of Wyoming. I have no question whatever but that it was the intention of this body, but if it was the intention of the other body, I can not understand just why the Senate language was o changed, at least as to throw into the conference report and into the bill, if the conference report shall be adopted, language that is open to very different construction.

Mr. PITTMAN. It says the President shall have power to lease.

Mr. CLARK of Wyoming. Yes.

Mr. PITTMAN. It does not state that the President shall lease, and if he can not lease that he shall operate.

Mr. CLARK of Wyoming. No; but it gives him the power to operate in case he can not lease.

Mr. PITTMAN. Yes.

Mr. CLARK of Wyoming. That is what it does.

Mr. PITTMAN. It says that he shall operate it if he can not lease it——

Mr. CLARK of Wyoming. If he can not lease it?

Mr. PITTMAN. Yes.

Mr. CLARK of Wyoming. If he can not lease it, what then?

Mr. PITTMAN. If he can lease it on terms satisfactory to him, he is empowered to lease it.

Mr. CLARK of Wyoming. No; but he is directed to lease it. Then, if he can not make satisfactory terms for a lease he may operate it as a governmental utility.

Mr. PITTMAN. As a matter of fact he is not directed to lease it. He is empowered to lease it in his own judgment and discretion.

Mr. CLARK of Wyoming. Yes.

Mr. PITTMAN. If he does not lease it, he shall operate it.

Mr. CLARK of Wyoming. Yes; but I will ask the Senator what would be the first step that the President is directed to take under the language of the conference report?

Mr. PITTMAN. I think the first step that he would take is that he would ascertain——

Mr. CLARK of Wyoming. I mean after the road is constructed.

Mr. PITTMAN. I think the first step would be to ascertain the best way to operate the road, and I think that that determination would require an investigation of both the leasing and the operation by the Government.

Mr. CLARK of Wyoming. Mr. President, I asked for the Senator's opinion on that matter, not intending to express my own; but it strikes me that if that was the purpose, the language should be turned around and he should not be directed to operate in case he can not lease, and in that case only; as the language now stands, he must first make an effort to lease, failing of success in that, he may then operate it, but not otherwise.

Mr. PITTMAN. I will deal in a few minutes with the language that we had under discussion in the conference committee.

Mr. CUMMINS. Mr. President, I must dissent from the apparent agreement between the Senator from Wyoming [Mr. CLARK] and the Senator from Nevada [Mr. PITTMAN] with regard to the action of the Senate. The Senate did not express the opinion that the President ought to lease the roads; the Senate did not——

Mr. CLARK of Wyoming. Mr. President, I want to say that I do not agree to any such proposition as that, and I did not so intend to express myself.

Mr. CUMMINS. I understood it to be said by the Senator from Nevada, and agreed to by the Senator from Wyoming, that the conferees did what both Houses had decided upon, namely, to give the preference to leasing; and that, therefore, the conference report was an expression of the judgment of both Houses in that respect.

Mr. PITTMAN. I do not think my language conveyed that idea.

Mr. CUMMINS. All that the Senate did was to refuse to strike out of the bill the provision which gave the President the power to lease; but it did not in any way suggest that it was better to lease than to operate.

Mr. CLARK of Wyoming. Mr. President, I can hardly understand how the Senator from Iowa could have understood me in that way, for the very purpose of my rising was to dispute that proposition. The Senate bill gave the President authority to contract for the operation by lease, but did not intimate in any way that his first duty was to attempt to make a lease; he could lease or operate by the Government, at his discretion.

Mr. CHAMBERLAIN. If I may interrupt the Senator from Nevada for just a moment, Mr. President, I wish to say that I think the view that the Senator from Wyoming places upon the construction of this language is that the President in his discretion may lease; but if he does not see fit to lease, then he shall operate; in other words, that the President must first try to lease. I think that is the view of the Senator.

Mr. President, let me say in this connection that I, personally, if I had had my own way, would have left the leasing proposition entirely out, but the Senate, after discussing the matter, determined to lease, and they vested in the President the discretion to lease. The other House passed the bill with that same discretion vested in the President; and when the conference committee got together, after many days of discussion, we simply adopted the House language; that was all. If, however, Mr. President—and I challenge contradiction of the proposition—if you take the whole of the first section of the bill, it means plainly, on the face of it, and the language is susceptible only of that construction, that the President has the power to operate, without any regard to the question of leasing or not—if I may take the time of the Senator for just one moment—in other words, the President has the right to receive compensation for the service performed by the railroad, and to perform generally the usual duties of a common carrier by rail. What are those duties? The carrying of passengers and freight, the operation of the railroad. It was the purpose of the bill, after having given that absolute power to the President, to go further and say that if he did not do that he could, in his discretion, lease the road for operation; and if he did not exercise that discretion, then, in that event, he could continue to operate it until further action of Congress. There was not anything

secret about that proposition; it was fully discussed in the other House.

One of the peculiar situations about this—and I call the attention of the Senator from Iowa [Mr. CUMMINS] to it—was that after we had fully discussed the provision which the Senator had inserted in the bill, and it went over to the other House, protecting the Government against the purchase of a railroad already in Alaska—we thought we had safeguarded that—the House took the very position which the Senator says he sought to avoid, namely, that that provision which the Senator had inserted in the bill would have compelled the Government to have purchased the Guggenheim rights before they did anything at all. We know over here that that was not the purpose of the Senator from Iowa.

Mr. CUMMINS. We know more——

Mr. CHAMBERLAIN. We know it was the purpose of the Senator to protect against that very thing.

Mr. CUMMINS. It is not a question of purpose; but that is not the effect of it. No one but the most superficial observer could put such an interpretation upon it.

Mr. CHAMBERLAIN. If the Senator will observe the House discussion, he will see that it is the construction they put on it, though we know the Senator had no such purpose. His purpose in offering the provision was to protect against that very thing.

Mr. PITTMAN. Mr. President, the question whether the President has the right to lease is not before this body at the present time. As the Senator from Iowa [Mr. CUMMINS] has stated, that was determined by the Senate adversely to his position, and was determined by the other House adversely to his position. Both bills contain the provision allowing the President the right to either operate or to lease this road, so we need not discuss that subject any further. The conference report at the present time before the Senate says that the President is authorized—

to designate and cause to be located a route or routes for a line or lines of railroad in the Territory of Alaska not to exceed in the aggregate 1,000 miles, to be so located as to connect one or more of the open Pacific Ocean harbors on the southern coast of Alaska with the navigable waters in the interior of Alaska, and with a coal field—

And so forth.

The bill provides that that line is to be so located as to connect the harbor with the interior. Now, what next?

to construct and build a railroad or railroads along such route or routes as he may so designate and locate.

There is an absolute instruction to the President to lay out a continuous line from the coast to the interior and to construct a continuous line from the coast to the interior. In the bill as now framed he is granted the power to purchase lines to become a part of the system so laid out. The Senator from Iowa proposed to provide that the President should buy those intermediate lines before construction should commence. As I say, we had no objection to that. Now, the Senator says if the President is not compelled to buy the intermediate lines before construction by the United States that he may go to the northern terminus of the Copper River Railroad and build from there to the interior. It is true he may do that. The Senator says that that would be an economic mistake, and the Senator has shown clearly that that would be almost an outrage upon the people of this country; the Senator has shown that it would be a violation of the theory upon which this bill was passed, and he has shown it so plainly and so clearly that that fact would naturally occur to any man of ordinary judgment. It certainly would occur to the President of the United States, and if the President of the United States did see it in the light in which we see it, in which the Senator sees it, he would not make such error. He could only do it under one of two conditions, namely, that he is not a man of ordinary business judgment or that he is subject to influences to which the Senator referred, none of which we believe and none of which the Senator will admit. Therefore I state that the Senator is urging some particular language which he himself has formulated and which he would like to see in the bill to protect against a mistake, to protect against an outrage, which he says is so apparent that anyone can see it. I want to state that when you say to the President of the United States that he shall build a continuous line from the coast to the interior and that he may utilize by purchase or condemnation existing lines, it is unnecessary to tell him not to commence to build in the interior and build down to an existing line. I say that would be an absurdity on the face of it. To do such a thing as that would be casting suspicion on every power which you have granted the President in this bill.

Mr. SMITH of Michigan. Mr. President, does not the Senator from Nevada believe that the influences which have been so successful in authorizing the construction of a railroad in Alaska will also be directed toward the immediate completion of a railroad from the northern terminus of the Alaska Northern road to Fairbanks?

Mr. PITTMAN. No; I do not.

Mr. SMITH of Michigan. Surely it is deemed very desirable that that road should be completed.

Mr. PITTMAN. But not under present conditions, because the Senator from Iowa has shown how unfortunate that would be.

Mr. SMITH of Michigan. Yes; but here are 70 miles of railroad practically unused, on which not an engine or car are moving. What is more natural than that the influences which have been so successful in authorizing the construction of a Government railroad in Alaska will be directed toward the prompt completion by the Government of the remainder of that line necessary to connect Seward with Fairbanks?

Mr. PITTMAN. The influences which have been used for the building of railroads in Alaska have been good influences for a good purpose; the influences of which the Senator speaks, if utilized for the purpose of connecting the proposed road with existing railroads, would be bad influences for a bad purpose, as has been stated by the Senator from Iowa, and I am not willing to concede, and neither does the Senator concede, that the President of the United States would be subject to any bad influence.

Mr. SMITH of Michigan. Mr. President, anybody at all familiar with the Alaska situation knows that the Alaska Northern Railroad is practically useless now. They have no charter upon which they can go ahead; they are unable to raise money; and it would seem the point of wisdom, at least, not to put ourselves at the mercy of that company, who are foreigners, I believe, for the most part, and whose property, if used at all, should be acquired by the Government while it may be obtained reasonably. I am not inimical to the work which the Government is about to undertake. I would prefer, however, to see the experiment limited to one road, therefore I did not agree with the Senator from Nevada that we should invest $35,000,000 or $40,000,000 at one time in railroad building in Alaska. I have felt that one road from tidewater to Fairbanks, well directed and carefully built, would serve every purpose of Alaska's needs for many years to come. I think there is very good reason for the apprehensions of the Senator from Iowa, and wish the conferees would avoid all doubt as to the desire and intention of the Senate in this matter.

Mr. PITTMAN. Now, Mr. President, we come down to the question as to why the conferees representing the Senate receded from their demand for the amendment of the Senator from Iowa. I was stating that we had no objection to that amendment, because it simply required of the President that which we knew the President would do, that which we knew any business man would do. I know the Senator was very earnest in his desire to prevent the Government from favoring the Guggenheim-Morgan syndicate, but I want to tell him that the Members of the House of Representatives misinterpreted his language in the amendment. If he had followed the speeches on the floor of the House of Representatives on this bill, he would have seen that it was there charged that this amendment was in the interest of the Morgan-Guggenheim syndicate and for the purpose of compelling the President to buy their road.

Mr. CUMMINS. Mr. President, I am not unaware of that; but that does not frighten me at all. It is a very common thing for one who is attempting to accomplish a purpose to ascribe or impute an improper purpose to his opponent. I have never given that a thought. I am quite willing to submit the amendment, of which I am the author, to intelligent judgment. As I have said before, the man who says that the amendment which I offered can be utilized even for the benefit of these railroads is either a shallow thinker or a malicious slanderer, and the man who says it can take his choice as between those two alternatives. I do not know that anyone has ever said it, and I am not thinking of any person. The Senator from Nevada knows, and has said over and over again, that he is in favor of not doing the very thing that my amendment would prevent, and when I have the support of his judgment in the matter I am quite indifferent to any criticism that may be uttered elsewhere.

Mr. PITTMAN. However, the criticism was uttered by men for whom we have the highest respect. Members of the House of Representatives for whom the Senator has the highest respect. I have no doubt of that. I am satisfied, as I said before, that it was a misinterpretation of the Senator's language and a misinterpretation of the intention of the Senate, yet, nevertheless, during the debate that took place over there, that was the construction placed time and time again upon that amendment. The House came very near defeating the bill on the ground that that amendment was placed in the bill, if not for the purpose of accomplishing, at least that it would accomplish the purpose

of forcing the President to buy the Guggenheim railroad; and men who afterwards supported that bill when that provision was eliminated fought it from start to finish while that provision was in the bill. That amendment was the subject of the principal fight on this bill in the House, as the Senator will see if he will read the debates that occurred over there.

Mr. CUMMINS. I understand that, and I only retort that the amendment that has been insisted upon elsewhere, and that is in this conference report, gives the President the only power that the bill confers to favor the Morgan-Guggenheim syndicate. I am not saying or even suggesting that the President would use that power in order to favor that company of men, but I do assert, and I want it to be understood here and elsewhere and everywhere, that it is this conference report insisted upon by the House which gives the Chief Executive the only chance that he would have to do anything for this railroad, that is now a losing venture upon the hands of its owners.

Mr. PITTMAN. I am only bringing this matter up for the purpose of showing to the Senator the reason why the conferees receded from the language used by the Senator from Iowa. It was contended in the debate in the other House that the Senator's amendment provided that any road which became a part of the system as laid out should be purchased before the construction commenced or should be relocated. What did that mean? It was said that the railroad commission had reported favorably on the Copper River route. It was said that the Copper River route did not have room for the relocation of two roads in that valley and that it meant buying the Copper River road, and it meant that it should be bought first before construction started; it meant the same influence that the Senator from Iowa was talking about, and that is the thing they were afraid of.

Mr. CUMMINS. The Senator from Nevada has said over and over again, and I know he is sincere about it, that if the Copper River road is to be bought it ought to be bought before we add value to it by building an extension into the interior. As I said before, I had hoped the President would never even consider the purchase of the Copper River Railroad. I do not think he ought to do so. I think every obstacle we can put in his way to prevent him from buying the Copper River & Northwestern Railroad ought to be put there. The Senator from Nevada believes just as I do about that, for I have heard him express the view a dozen times on the floor of the Senate.

Mr. PITTMAN. There is not any question about it, but I am telling the Senator that his language has been misinterpreted. They do not put upon his amendment the construction that the Senate put upon it. That language, left in the bill, would have defeated the bill in the House, and would have defeated it on the ground that it was a "joker" in the bill for the purpose of compelling this country to buy the Guggenheim road.

Mr. CUMMINS. May I ask the Senator from Nevada if he believes that the idea itself, if incorporated in the bill, would defeat the measure in the House? If the idea is right, if the principle is right, as I think it is and as the Senator from Nevada says it is and as the Senator from Oregon believes it is, I am perfectly willing that the Senator from Oregon and the Senator from Nevada shall put the idea into any form that will properly express it. It is not in the form in which I prepared it, anyhow. I submitted my amendments originally to the committee, and the committee took those amendments and separated them because they consisted of various parts, and put them into the bill just exactly as they saw fit.

I do not want to stand here and take up the time of the Senate a single moment with regard to the phraseology of the amendment or bill as it passed the Senate. I give to the Senator from Nevada and to the Senator from Oregon carte blanche to express this idea in any way they may see fit to express it.

Mr. PITTMAN. When this matter was under consideration we had the Senator from Iowa come before the conference committee, and we suggested to him this very difficulty; we suggested the rock upon which we had split; and we asked him to suggest some other language, some other form, something else. Is not that true?

Mr. CUMMINS. No; that is to say, it may be true, but I do not remember it. I do not recall that I was asked to do anything of that kind.

Mr. PITTMAN. The Senator was there when we read it.

Mr. CUMMINS. I was before the conference committee, but, as I understood, the objection there was to the thing itself and not to the way in which it was expressed. If I could correctly draw a conclusion from the argument around the table, it was that we must not take away from the President the power to build these interior portions of the road, to connect those portions with roads already in existence, and operate them through a traffic arrangement.

Mr. PITTMAN. I do not understand it as the Senator understood it.

Mr. CUMMINS. I do not say the Senator from Nevada is not right, but I did not understand that any such suggestion was made.

Mr. PITTMAN. But the matter was discussed while the Senator was there. Now, the situation has come down to this: There was an awful fight on this bill in the House. There would have been a more bitter fight had the bill gone back to the House with any material changes in it. I want to say to you that the members of the conference committee from this body were sincerely anxious for the development of the Territory of Alaska, and they would rather surrender the details than sacrifice this bill. I want to say to you now that some of those who seem to be for this bill seem also to be more anxious for some policy or some principle not necessary to the construction of this road than sincerely in favor of the development of Alaska.

Mr. CHAMBERLAIN. May I interrupt the Senator there just a moment?

Mr. PITTMAN. Certainly.

Mr. CHAMBERLAIN. I may say to the Senator from Iowa that the conference committee, after thoroughly discussing this matter, concluded that if the President exercised any business judgment at all, even under the terms of the House bill, he would do exactly what the Senator's resolution suggested that he should do; that is, before he undertook to construct the line into the interior, if he was going to use a line already there he would purchase it in advance.

The Senator, however, seems to assume that the President of the United States would exercise the unbusinesslike judgment of starting the road in the interior and building it up to one of the termini of the present road. We could not assume, in the discussion of the matter before the conference committee, that any such result would follow the President's action.

Mr. CUMMINS. Mr. President, I can only say that people from Alaska who have been very much interested in the matter, and I believe interested from a public-spirited standpoint, have been arguing with me, hoping and insisting that I should withdraw the opposition I have felt toward the House provision, on the ground that the President would do that very thing; that he would take up these railroads from their northern points, or one of them, and build them into the interior, and that then Alaska could have the benefit of the expenditure of $35,000,000 in new roads without having had to expend anything for roads already constructed. That is the very thing the people from Alaska, or some of them at least, desire to accomplish, and it was the argument made to me, that the President ought to spend the entire appropriation in new railroads, so that the people could utilize the roads already there under private ownership. Now, it is useless to try to disguise from ourselves that that is the view taken by a great many of the people in Alaska.

Mr. PITTMAN. Mr. President, I was simply trying to state why the conference committee apparently receded from some of the provisions of the Senate bill. I have shown the view that the House took of the amendment of the Senate. The Senator now says: "Why not place an amendment in this bill embodying practically the same thing, in the same manner—that is, the same principle?"

My answer to that has been given time and time again. That is, while we had no objection to the amendment, because it stated something that we knew the President would do, we do not consider it worth while to fight for an amendment which will accomplish no more than the President himself will accomplish, just for the purpose of satisfying the desires of this body or any of the Members of this body.

The Senator from Iowa is sincerely in favor of this bill, and I know it. He is just as sincere and earnest in behalf of it as any member of this body. He has fought for it; but some of the amendments he has suggested, a number of us believe, are dangerous to this bill. We believe that they might cause the defeat of the bill in the House.

I know the Senator will say: "Why should we have principles interfered with by reason of the fear of defeat in the House?" I want to say here that we believe that when you can accomplish the same thing by yielding language it is your duty to do it; and the members of the conference committee were satisfied that the amendment of the Senator from Iowa was not necessary; that it did nothing except to compel the President to do what any intelligent, fair, honest man would do who had charge of the building of that road.

I want to say to you now that if you amend this bill in any material respect and send it back to the House you are in danger of having the bill defeated. The Senator knows that a great many Members of the House of Representatives voted for

the bill largely against their own judgment. They voted for the bill because it was stood for by the administration. The Senator from Iowa knows that a great many of these Representatives, coming principally from the South, have been bitterly criticized in their own homes for having supported the bill; and the Senator should know that the passage of the bill is in danger if he sends it back to the House with any material amendments.

For these reasons the committee asks you and asks the Senate to stand by the conference report.

Mr. CUMMINS. I desire to ask a question of the Senator from Nevada. I did not know that any opposition had been aroused against the bill since its consideration here.

Mr. PITTMAN. That is true.

Mr. CUMMINS. I know, of course, that there are people who believe that the Government ought not to enter upon the enterprise. I said when the bill was on its passage here that I should be very glad to exclude, by positive amendment, the purchase or acquisition of the Copper River & Northwestern Railroad in any way. Now, I ask, if that is the difficulty in the House does the Senator think that if we should put in the bill, as I should like to see put in it, a provision entirely excluding the purchase or condemnation of the Copper River & Northwester Railroad, it would obviate the difficulty and avoid the opposition?

If he is of the opinion that it will, I do not believe there will be any difficulty in this Chamber in agreeing to that exclusion.

Mr. PITTMAN. I think it would arouse debate in the House that would last for weeks.

Mr. WEEKS. Mr. President——

The VICE PRESIDENT. Does the Senator from Nevada yield to the Senator from Massachusetts?

Mr. PITTMAN. I do.

Mr. WEEKS. I wish to ask the Senator from Nevada if he really thinks a majority of the House of Representatives is opposed to this legislation and has been coerced by the administration into supporting it?

Mr. PITTMAN. No; I did not say they had been coerced into it, nor do I think they have been coerced into it, nor do I think the party was coerced into passing the monetary legislation; but I am satisfied that the administration has given a great deal of beneficial information to this body and to other bodies, and I am satisfied that the Senator from Massachusetts himself has profited by it to a certain extent.

Mr. WEEKS. One more question. Does the Senator think that if it were not known that the administration wished the Alaska railroad bill passed, the House of Representatives would have supported it?

Mr. PITTMAN. I think it is very probable that had it not been for the fearless stand taken by the administration on this bill there would have been Members in the House of Representatives from various parts of this country who, through fear rather than through judgment, would have voted against the bill.

### WOMAN SUFFRAGE.

The VICE PRESIDENT. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated.

The SECRETARY. A joint resolution (S. J. Res. 1) proposing an amendment to the Constitution of the United States extending the right of suffrage to women.

Mr. THORNTON. Mr. President, before the unfinished business is taken up I should like, if I have the right to do so at this time, to address the Senate briefly on a matter of personal privilege, which I wished to do yesterday, but had no convenient opportunity.

Mr. POINDEXTER. I ask unanimous consent that the unfinished business be temporarily laid aside.

The VICE PRESIDENT. Is there any objection? The Chair hears none. The unfinished business is laid aside, and the Senator from Louisiana is recognized.

### PERSONAL EXPLANATION—PANAMA CANAL TOLLS.

Mr. THORNTON. Mr. President, on Saturday last I noticed in the CONGRESSIONAL RECORD of Friday an allusion to myself by the junior Senator from Washington [Mr. POINDEXTER], in which he quoted what he styled a purported interview published in the Washington Post with myself, referring to the question of my changed attitude on the question of the Panama Canal tolls exemption.

I do not understand that the Senator from Washington impugned my motives in his remarks, but it does seem to me that he has possibly confounded the statements made by the President and the statements made by myself.

I wish to say in this connection there was never any personal interview with me by any representative of the press nor any personal interview between the President and myself on this matter. What the Senator mistook for a personal interview was really an extract from a signed statement furnished by myself to the reporters of the press gallery in the Senate on the afternoon of the 2d of March. I hold in my hand a carbon copy of that statement which I will ask permission to have read by the Secretary in order that the matter may be fully understood.

The VICE PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

SIGNED STATEMENT BY SENATOR THORNTON FOR THE PRESS.

WASHINGTON, D. C., *March 2, 1914.*

When the question of exempting American vessels engaged in our coastwise trade from the payment of Panama Canal tolls was before the Senate, I spoke and voted in favor of the exemption.

I did so believing that the United States had the legal and moral right under the Hay-Pauncefote treaty to enact such legislation, and hoping its passage might stimulate the upbuilding of our merchant marine and help our Atlantic, Gulf, and Pacific seaport cities, and without any injury to the interior sections of our country.

Having now concluded after careful thought that when the question of repealing this exemption clause comes again before the Senate it will be my duty to advocate its repeal, I wish in justice to myself to give the reason for my changed attitude.

I believe now just as firmly as before that the exemption clause of the Panama Canal act is not a violation of our treaty obligations, but I recognize now, as I always did, the substantial difference between our right of exemption and our enforcement of that right.

Understanding through newspaper reports only that the President believed our national interests would be subserved by the repeal of the exemption clause in the present law, I have appealed to him directly for an expression of his views.

Responding to my request, he has answered that in his judgment the repeal of the exemption clause is necessary for the continuance of our present friendly relations with foreign powers and the success of our foreign policies.

Considering the canal tolls exemption law previously enacted to be a question of policy and not of principle, and recognizing the great responsibility resting on the President for the successful conduct of our foreign relations, and also the delicacy of the present trying situation in regard to those relations, I feel it my public duty to assist the President in carrying out his wishes in this matter.

Of course, my change of attitude, based on my conception of duty, must not be construed as the slightest criticism of my brother Senators who think it is their public duty to maintain their former attitude on this question.

J. R. THORNTON.

Mr. THORNTON. It will be observed that the only statement attributed by myself to the President was "that in his judgment the repeal of the exemption clause is necessary for the continuance of our present friendly relations with foreign powers and the success of our foreign policies." The subsequent statement, "recognizing the great responsibility resting on the President for the successful conduct of our foreign relations and also the delicacy of the present trying situation in regard to those relations," is my individual statement.

On account of physical disability due to illness to call at the Executive office, this interchange of views between the President and myself was entirely in writing on my suggestion. The matter originated entirely on my own initiative, the President's part consisting in a courteous compliance with the request that I addressed to him in writing.

### RAILROADS IN ALASKA.

Mr. SHAFROTH. Mr. President——

Mr. PITTMAN. I think that the conference report is still under consideration. I believe that it is privileged.

The VICE PRESIDENT. The Chair is of opinion that it is a matter of very high importance, and it is before the Senate.

Mr. PITTMAN. And it is always in order. I ask for a vote on agreeing to the conference report.

Mr. GALLINGER. Mr. President, I beg to suggest that a conference report is not always in order. The submission of the report itself is always in order, but it must take its chances for consideration with other business. I have no objection to continuing the consideration of the report, but under our rules it has no special privilege at the present time.

The VICE PRESIDENT. The Chair meant to rule that either by a majority vote on motion or by unanimous consent it is in order to take it up now.

Mr. GALLINGER. Undoubtedly that is so.

The Senate resumed the consideration of the report of the committee of conference on the disagreeing votes of the two Houses on the bill (S. 48) to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes.

The VICE PRESIDENT. Does the Senator from Nevada yield to the Senator from Colorado?

Mr. SHAFROTH. No; I do not desire to take the floor.

The VICE PRESIDENT. The question is on agreeing to the conference report.

Mr. JONES. Mr. President, with the intentions of the Senator from Iowa [Mr. CUMMINS] with reference to what is desired in connection with this matter I am in hearty agreement for his purpose to be accomplished in reference to the building of this railroad. I am very strongly in favor of the Government having a line from tidewater to the interior wholly and entirely under its control. If I did not think that the language of the conference report itself provides for that very thing I would not have agreed to it.

I think there has been a misconception of the situation growing out of the impression that the House provision did not require that. I will say that I had that impression myself when I went into the conference. I am satisfied that those to whom the Senator from Iowa refers as interested in having all the money appropriated by the bill expended in the construction of entirely new lines of railroad in Alaska had that impression, but I do not think the language of the bill as it has been agreed to in conference warrants any such construction.

There is not any question but that the language provided in the Senate bill in the amendment of the Senator from Iowa was perfectly clear. There was not any room for doubt about what it meant or as to what it required. I was heartily in favor of it and should have been glad if we could have had it in the conference report, as far as that is concerned.

Mr. BRISTOW. Mr. President——

The PRESIDING OFFICER (Mr. LEA of Tennessee in the chair). Does the Senator from Washington yield to the Senator from Kansas?

Mr. JONES. Certainly.

Mr. BRISTOW. I interrupt the Senator now because I will have to leave the Chamber very soon. I think it is very unfortunate if there is a difference of opinion as to the construction that may be put upon the language. I could not vote to adopt a report that leaves it at all doubtful as to whether the President can construct at the end of the private line or whether he has either to buy the private line or build a road from the harbors.

Mr. JONES. I will say to the Senator that I think I can speak for all the members of the conference committee on the part of the Senate when I say they were convinced that there was no room really for doubt that the President by the language of the bill as it was adopted is required to have a Government line made under Government control from the seacoast the the interior. I do not think I violate any of the confidence of the conference committee when I say that the House members came around substantially to that view.

I want to call the Senators' attention to the language of the bill, because if I am mistaken in the construction of it I would be very much inclined to think the bill ought to go back to the conference, for I believe the Government ought to have its railroad from the coast to the interior. The language of the bill is—

> That the President of the United States is hereby empowered, authorized, and directed * * * to designate and cause to be located a route or routes for a line or lines of railroad in the Territory of Alaska not to exceed in the aggregate 1,000 miles, to be so located as to connect one or more of the open Pacific Ocean harbors on the southern coast of Alaska with the navigable waters in the interior of Alaska, and with a coal field or fields.

It seems to me that language is plain. The President can not locate any line that begins at some point in the interior and ends at some point in the interior. He must locate a line from a harbor on the coast to connect "with the navigable waters in the interior of Alaska, and with a coal field or fields."

Mr. BRISTOW. But does not the leasing provision enable him to lease and thereby make this connection?

Mr. JONES. I think not. I want to call the Senator's attention to some other language further on. Here is further power to the President "to construct and build a railroad or railroads along such route or routes." That is the only place that he is authorized to build or construct a road. It is "along such route or routes as he may so designate and locate, with the necessary branch lines," and so forth. So after the President locates a line or lines from the seacoast to the interior he has power to build a road only along the line so designated and so located. Then, further, the bill provides as follows:

> To purchase, condemn, or otherwise acquire, upon such terms as he may deem proper, any other line or lines of railroad in Alaska which may be necessary to complete the construction of the line or lines of railroad designated or located by him.

That gives him authority so that if in locating a line of road and constructing upon it a Government road it shall be necessary to acquire some part of an existing line as a part of the Government road he may acquire it by purchase, by condemnation, or otherwise. As I understand the words "or otherwise" this would authorize him to lease, but it must be a part of the Government line, and it must be under the control and operation of the Government. It does not authorize him to lease a part of our line to private companies and to make it a Government road.

Mr. BRISTOW. But I am just as much opposed to the Government having an interior road and being compelled to lease another line in order to get to tidewater as I would be opposed to the Government leasing its end of the road to the road that already existed.

Since we had the question as to the construction of the seventeenth amendment to the Constitution up, where the Senate was within one of a majority of putting a construction upon it that nobody had ever thought about when it was before the body, I think we ought not to pass a bill where a large number of Senators can not understand what it means. That is the objection I have to this conference report.

Mr. JONES. I agree with the Senator on that. I think probably I was more insistent upon the Senate provision than anyone else. We did not recede from our contention for the Senate provision until the House members simply said "we do not feel that we could take this language back to the House and have the controversy over it there which would come by reason of an agreement to the Senate provision." By taking this language and putting it altogether it seems to me that there is really no room for the construction sought to be placed upon it.

There is this difference, I think, between this provision and the amendment of the Senator from Iowa. Under this proposition the President could begin the construction of a line in the interior after he located it from the coast. He could begin the construction from the interior toward the coast without having first made arrangements to acquire any existing line that he might consider necessary. The President could do that, but to me it is inconceivable that he would do it. Suppose he should locate the line that we thought the Government ought to have along the Copper River Railroad to the navigable waters of the Yukon or the Tanana, it seems to me it is almost inconceivable to think that the President, after having located that line and ascertained that it would be necessary to have the Copper River road as a part of the Government line, before making any arrangements to acquire that road would begin the construction of the Government line from the Tanana downward, depending upon the future for making satisfactory arrangements with the Copper River road. I conceive that the President would simply do this: If he should decide that the Government road should be from Cordova, or the Copper River line, through to the Tanana or the Yukon, he would say to the agencies he might designate to construct the road, before we begin any construction we must make satisfactory arrangements with the Copper River road. First, we must either get a satisfactory agreement with them to buy it upon satisfactory terms or we must begin the condemnation proceedings and get it that way, or else we must make satisfactory arrangements by way of a lease, for instance, a long-term lease. While I would rather have the Government, of course, own the road outright, I can not see any insuperable objection to it if he should make a 99-year lease for the road, because if he were to make that lease before he had started the construction of a Government line, I am satisfied he would make it upon terms reasonable and fair to the Government of the United States.

Mr. BRISTOW. Mr. President, I am sorry to interrupt the Senator——

Mr. JONES. That is all right.

Mr. BRISTOW. The Senator knows that I have been as strongly in favor of this legislation as anybody.

Mr. JONES. I do know that.

Mr. BRISTOW. And am now.

Mr. JONES. I know it.

Mr. BRISTOW. But I could not think for a moment of supporting a measure that would enable the President of the United States to lease this road and make it a part of the Government line and not have the ownership, even if the lease was for 50 years or 100 years, because in the development of that Territory we would have developed this private property to what I believe would be an enormous value. There is but one thing to do, to build the road from tidewater, new and outright, or buy the tracks from there, one of the two, and we ought not to leave any other opportunity open. If it is thought best to construct a road from the beginning and pay no attention to the existing lines, all right. If it is thought better to purchase the roads that are there, let us purchase them and then construct the additional lines that are necessary.

It has been said to mean that it will take too much of this $35,000,000 to purchase these roads; that Alaska needs the $35,000,000. That very statement alone is what has given me apprehension in regard to the provision being left in this loose

and doubtful way. I would rather make the sum $50,000,000 and let the Government own every foot of the track from tidewater to the interior where it proposes to build the line. I do not think we ought to take any chances on that proposition.

Mr. JONES. The Senator and I are in entire agreement as to what should be accomplished.

Mr. CHAMBERLAIN. I wish to make just one suggestion to the Senator. I think he said a while ago that under the terms of the bill the President might lease one of the roads that is now in operation, or that has already been constructed. There is absolutely no authority in the act conferred on the President to lease any of those roads.

Mr. JONES. It says he can otherwise acquire it. I do not know of any other way of acquiring it, except by a long-time lease.

Mr. BRISTOW. That is, if only by purchase he shall acquire it——

Mr. JONES. "By purchase, condemnation, or otherwise."

Mr. BRISTOW. Or otherwise. That is the very doubtful point I have in mind.

Mr. JONES. I think probably that that language would authorize the leasing of the road. I do not know what these words would mean if they did not mean that; but while I would rather see these words out and see the straight-out requirement that he should acquire it by purchase or condemnation, I do not believe that there is any possibility, on account of the conditions up there, of the President acquiring by purchase or condemnation or leasing the Copper River Railroad. I would be perfectly willing myself, as the Senator from Iowa suggested, to have a provision absolutely prohibiting that to be done, but it was beyond the power of the conference committee to cover that.

I will say that the conference committee took the language of the House amendment, as it was an amendment, and we endeavored to have it modified in every way that we possibly could to carry out the purposes of the Senate bill in the language of that bill. The House conferees insisted that they would have very great trouble in the House if we changed the language of the House much more than we actually did change it.

It seemed to me that on account of the conditions up there, and because of the language of our bill, which requires the President to locate the line from the coast into the interior, I understand it would authorize him to do absolutely nothing that the provision of the Senator from Iowa would not permit him to do, except, possibly, to make a lease of any existing line and make it a part of the Government line, and also permit him, possibly, to begin the construction into the interior before he had made an arrangement with an existing line; but our language does require him to have a Government line from some point on tidewater to the interior that the Government will absolutely control.

Mr. CUMMINS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Iowa?

Mr. JONES. Certainly.

Mr. CUMMINS. I think the Senator from Washington is wrong about the last statement. It does not require the Government to own a line from tidewater. The very purpose of the bill as passed by the House and as accepted by the conferees is to enable the Government to own a line in the interior and connect with a privately owned line and thus reach tidewater.

Mr. JONES. I beg the Senator's pardon. I went over that point when he was not here. That, in my judgment, is not the purpose of the House bill. It was the thought of a good many people without any examination of it.

Mr. CUMMINS. It may not be the purpose, but that is its effect. That is the authority which it gives to the President. But I was about to suggest——

Mr. JONES. That is the very point. The sole issue is right there, to my mind, because if the bill does not require the President to locate a line from tidewater to the interior, then I am with the Senator from Iowa, because I believe that the Government ought to have its line.

Mr. CUMMINS. It does not.

Mr. JONES. I think it does.

Mr. CUMMINS. I am willing to argue that question before the Senate and allow the Senate to decide it.

Mr. JONES. I think that is the whole point.

Mr. CUMMINS. The very thing that is desired is to spend the $35,000,000 in building new roads.

Mr. JONES. I know that is the desire of a good many people in Alaska, but that is not authorized by the bill. Under the bill they can not require to have the President to do it.

Mr. CUMMINS. Now, let us see. The Senator from Washington said that the bill requires the President to acquire a line from tidewater to the interior. If that is so, when does the Senator from Washington think the line already there should be acquired, if it is to be acquired?

Mr. JONES. I think the Senator was not here when I pointed out the difference between his amendment and our provision—that the language of the bill does not require the President to make his arrangement about an existing line before he starts the construction to the interior.

Mr. CUMMINS. So the Senator from Washington is willing to give the President power to build a detached line to the interior knowing that the bill itself absolutely commands him after that to acquire the roads already there to tidewater.

Mr. JONES. Yes; because I am satisfied that the President would not consider the proposition of doing that for one moment. It is not that I want to do it, but simply because it seemed that was the only proposition we could get from the conference committee.

Mr. CUMMINS. Very well.

Mr. JONES. I do not believe the President would think about beginning the construction of a part of a Government line for one moment before he had made a satisfactory arrangement for acquiring the other lines, and if he could not make such an arrangement he would go to some other line.

Mr. CUMMINS. Yet you are willing to give this President or some other President 5 years, 10 years hence, whose name you do not know, whose character you do not know, whose disposition you are entirely unfamiliar with, the power to do the very thing that you say would be fatal to the interests of the whole enterprise. I can not understand why you are willing to do it.

Mr. JONES. I do not suggest that the Senator questions the character, the integrity, the honesty, and the patriotism of any man who may be President when I say I have no doubt that we will ever have any President in whom such a power can not be safely trusted. I am satisfied that we will never have any President who would say we want a line from Cordova to the Tanana, but before he would make any arrangements with the Copper River road he would begin the construction of a part of the line from Tanana down.

Mr. CUMMINS. Let us see about that.

Mr. JONES. It would be so inconceivable that I can not allow a suggestion of that kind to have weight.

Mr. CUMMINS. Suppose that were so, it is generally asserted that the Copper River & Northwestern road, if bought, will require $22,000,000 or $25,000,000.

Mr. JONES. That is asserted; but I do not think so.

Mr. CUMMINS. Well, that is asserted.

Mr. JONES. Yes.

Mr. CUMMINS. Now, do you think the President ought to take $22,000,000 or $25,000,000 out of this $35,000,000 appropriation to buy the Copper River & Northwestern road and leave $10,000,000 for the rest?

Mr. JONES. I do not believe the President would consider that for a moment.

Mr. CUMMINS. You do not think so, but you are saying to him he can do it if he wants to. That is my objection to it.

Mr. JONES. We are giving the President, of course, a great deal of power. I have been willing, so far as I am concerned, from the beginning to give the President a great deal of power in this matter, because I have the utmost confidence not only in the present President but in whoever may be President after him.

Mr. CUMMINS. Is the Senator from Washington willing to give him power to take this appropriation of $35,000,000 and spend $10,000,000 of it in extending the Copper River & Northwestern road and $25,000,000 of it then in buying the Copper River & Northwestern road? The Senator from Washington has stated that he thinks the bill absolutely commands the President to acquire a line to the sea; and if he extends the Copper River & Northwestern road he is bound, according to the Senator's interpretation, to buy the Copper River & Northwestern.

Mr. JONES. If I thought that the President would entertain any proposition of that kind for one moment, of course I would not be in favor of giving him the power; but I do not think so. Then, furthermore, there is another point that has some weight with me. Under the bill as it is now reported the President can not complete any purchase until Congress has made the appropriation for it.

Mr. CUMMINS. Congress has made the appropriation.

Mr. JONES. No.

Mr. CUMMINS. It makes an appropriation in this bill.

Mr. JONES. No. We appropriate only $1,000,000.

Mr. CUMMINS. $35,000,000.

Mr. JONES. No. We simply provide that the money spent under the bill shall not exceed $35,000,000, but we appropriate only $1,000,000.

Mr. CUMMINS. But when you have given the President authority to obligate the United States to the extent of $35,000,000, of course the appropriation inevitably follows——

Mr. JONES. No.

Mr. CUMMINS. Because there is no Congress that has assembled, or that ever will assemble, that would repudiate a contract made by the President of the United States under authority given by Congress.

Mr. JONES. Well, I think that if the President were to make a contract along the lines suggested by the Senator under the authority given in this bill Congress would be very slow about appropriating the money to carry out such a contract, because every man who negotiates with the President and every company that negotiates under this conference report and under this bill would know that any contract the President might make could not be consummated until Congress appropriated the money to carry out such contract; and I think that is a further check upon the exercise of unwise power by the President.

Now, Mr. President, as I stated in the beginning, this bill is not as I would like to have it; it is not worded as I would like to have it. I preferred the provision of the Senator from Iowa [Mr. CUMMINS], because it was perfectly clear; there was not any doubt about it; and it made a restriction that I should really like to see placed in the bill, which required the President, before he began construction, to make whatever arrangements were necessary to acquire any existing line that he deemed to be necessary; but the other House, as I have said, came to the conclusion that the construction of the language that is in this report would require the President to have a line from the seacoast to the interior, and all of the Senate conferees agreed that that was the logical and reasonable and fair intendment of the language of the report. So we were willing to do that and to omit the provision to require the President to make his arrangements before he began any construction, because we believed that it was inconceivable that any President would be so unwise and act in such an unbusinesslike way as to begin the construction of a line that would become a part of a Government line with an existing road before he had made any arrangement with that road.

But, Mr. President, without going over what I said in the beginning or quoting the language of the report, I will say that I do not believe that there is any doubt whatever that the language employed does require the President, at any rate, to have a Government line from the coast to the interior, and there is not any doubt that it does direct him to begin the construction before he acquires the existing line. Of course, if any Senator fears that the President would begin to construct before making such a line, he is fully justified in voting against this conference report. I can not believe that the President would do it.

Now, just one word with reference to the leasing provision. As has already been said, the Senate voted to authorize the President to lease this line. I was against that proposition. I would much prefer that we should operate it until Congress, at least, otherwise provides; but the Senate voted in that way and the other House voted in that way, so the conferees had nothing to do but to accept that proposition.

Then, the only question between the other House and the Senate was as to the language of the House provision regarding leasing and the language of the Senate provision regarding it. As I say, we started out taking the House text as the basis for our work, because it was an amendment presented and adopted by the other House. We wanted to change the House language just as little as possible where it would convey the meaning that we could agree upon. The House language in regard to the leasing is as follows:

> In his discretion, to lease the said railroad or railroads, or any portion thereof, including telegraph and telephone lines, after completion under such terms as he may deem proper, but no lease shall be for a longer period than 20 years, or in the event of failure to lease, to operate the same until the further action of Congress.

I do not think, resolving it down to its real meaning, that that means anything except that the President may lease the road for a period of 20 years, as we provided in our provision, if he obtains terms that are satisfactory to him. He is the sole judge; he is the sole arbiter.

There may be some force in the contention that we suggest to the President in this language here that he ought to lease the road. I think there probably is some force in that suggestion, but nevertheless we do not command him to lease it; we do not require him to lease it; we do not compel him to lease it, but we expressly say that in his discretion he may lease it. So, while the language may be unfortunate, still the power is left in the President to determine just as we provided in the Senate, whether or not he can lease it upon terms that are satisfactory to him. If he can not get such terms, of course he will not lease it. It seems to me that is all there is to that provision.

I think that the language of the Senate bill is much better. I think that the language of our bill, or almost the whole of it, is much better than this, because the House bill goes into details, after stating general propositions, and we always get into trouble in legislation when we do that. Nevertheless the House Members wanted to be sure that they would be able to get the report accepted in the House, and we felt that this language in regard to the lease was practically the same in effect as the provision in the Senate bill. Therefore we accepted it, and the President has full authority and full discretion under this language used to accept the terms of any lease that may be proposed or to reject it as he sees fit.

Mr. NORRIS. Mr. President, I intend to vote against this conference report, and I am induced to do so more on account of the leasing provision than any other one provision that has been mentioned. Since the Senator from Washington [Mr. JONES] has just discussed that question, and has done it so frankly, as he always does such things, I want to call the matter to the particular attention of the Senator from Washington and of the other conferees, so that, if this report does go back to conference, they may make an attempt to remedy this defect, which I think, to give a fair construction to the Senator's own words, he admits is a defect, and one that the conferees have made no particular effort to rectify.

Like the Senator from Washington, I was one of those who were opposed to giving to the President the right to lease these roads after they were constructed. I did everything I could in my weak way to strike out of the bill that particular provision that gave the President the power to lease the roads. That, as has been well said by the Senator from Nevada [Mr. PITTMAN], is now past, because those of us who thought that way were defeated in the Senate, and the provision was left in the bill giving the President the power to lease the roads after they were constructed.

The Senator from Washington has himself admitted that this language brought in by the conferees at least is suggestive to the President that he should first make an attempt to lease the roads before he tries to operate them.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Idaho?

Mr. NORRIS. I yield to the Senator.

Mr. BORAH. Is the language not something more than suggestive?

Mr. NORRIS. That is the admission of the Senator from Washington [Mr. JONES]. I myself think it is more than suggestive; but the Senator from Washington, who agrees with me that the power to lease ought to be entirely taken away from the President, has in reality, as I understand it—and I should be glad to have him correct me if I am not putting the proper construction on his words—admitted that the language brought in here by the conferees is, at least, not so favorable toward the idea of taking that power away as is the language of the Senate bill.

Mr. JONES. I think that is correct. I admit that myself.

Mr. NORRIS. Now, I should like to ask the Senator if there was any controversy in the conference over this particular point?

Mr. JONES. Mr. President, I suppose it would not be improper to answer that question, as some suggestions have been made here as to what occurred in the conference room. I will say to the Senator that I myself suggested that the language did indicate or suggest to the President that he ought to try to lease the roads; but the majority of the conferees thought that the language left the matter entirely to the discretion of the President; and the House conferees were particularly insistent, unless there was something especially pressing or controlling to change their language, that their language should be left, because they said that there was a very strong division over that proposition in the House, possibly much more so than in the Senate. As I say, I suggested that proposition in the conference, but the majority of the conferees thought the provision as reported did leave the matter entirely to the discretion of the President, and so I did not feel justified on that account to refuse to sign the conference report.

Mr. NORRIS. Mr. President, it seems to me that if the two Houses agree that the President shall have the discretion to operate the road or to lease it, and that no instruction either directly or indirectly be given to him to prefer one to the other,

that ought to be satisfactory to both the House and the Senate, and if the language——

Mr. JONES. I will say that I agree with the Senator on that, so far as that is concerned.

Mr. NORRIS. And if the language here did no more than that, I would not be finding fault with the conference report on this particular account. I want to say to the Senator from Washington and to the other conferees that, in conversations which I had with various Senators here, most of them, at least those with whom I have talked, considered this as a serious defect. I have heard expressions from some of those, at least from one Senator who was one of the original advocates of the Government building the road in Alaska, to the effect that he would rather see the bill fail than to see the language left in the bill just as it is here.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER (Mr. SHEPPARD in the chair). Does the Senator from Nebraska yield to the Senator from Idaho?

Mr. NORRIS. I yield.

Mr. BORAH. The Senator from Nebraska is discussing, as I understand, the clause with reference to the leasing contained in the middle of the report, beginning—

To make and establish rules and regulations—

Mr. NORRIS. Yes.

Mr. BORAH. Where the language is:

To make and establish rules and regulations for the control and operation of said railroad or railroads; in his discretion, to lease the said railroad or railroads, or any portion thereof, including telegraph and telephone lines, after completion under such terms as he may deem proper, but no lease shall be for a longer period than 20 years, or in the event of failure to lease, to operate the same until the further action of Congress.

If that were a contract running between one individual in private life and another individual there would be no question about the fact, in my judgment, but that he would have to first make every effort to lease the road before he would be permitted to operate it at all.

Mr. NORRIS. I agree with the Senator; and that was the idea I was going to convey when I got along a little further in my argument.

Mr. BORAH. Of course, being binding only upon the Executive, it does not make very much difference, as he has a large discretion and not reviewable.

Mr. NORRIS. I was going to read, Mr. President, the language of the bill as it passed the Senate. After providing for the construction of the road, the bill as passed by the Senate contained this proviso:

*Provided further*, That the President may cause said road or roads to be operated by contract or lease or by the Panama Railroad Co., but no contract or lease shall be for a longer period than 20 years.

Now I desire to suggest to the Senate, and particularly to the conferees, that that language can not be objectionable if we are going to give to the President a free hand either to operate or to lease; and, as I understand, that was the object of those who insisted that that provision should be retained in the bill. Some of those who voted in favor of retaining that provision in the bill themselves said that personally they would rather it were out, but they wanted to give a broad discretion to the President. When the bill comes back from conference we have the language which has been read by the Senator from Idaho [Mr. BORAH]. If you wanted to leave it open and give the President a free hand, then, why should you not stop with the word "years," so that it would read in this way:

In his discretion, to lease the said railroad or railroads, or any portion thereof, including telegraph and telephone lines, after completion under such terms as he may deem proper, but no lease shall be for a longer period than 20 years.

I submit that language is fair that far, and gives the President the right either to operate or to lease without either directly or indirectly giving him instruction as to what he had better do first. That language is followed by this clause:

Or, in the event of failure to lease, to operate the same until the further action of Congress.

In other words, if that language means anything, it means that this proposed law instructs the President to lease these roads if he can; and I would say, if we pass it in this form, that it would be his duty to lease them if he could, and that he would only be authorized to operate those roads after he had made an honest and a fair attempt to lease them; so that it is practically an instruction to the President, and says to him, "After this road is constructed, lease it; but if nobody will lease it, operate it." I do not believe that is the kind of a law Congress desires to pass; I do not believe that is what the Senate wants to enact into law; and I believe, Mr. President, if this bill is passed in this form that we will never, so long as that law remains on the statute books, see the Government operating any of the roads which it will construct in Alaska. It would be possible, it is true, for the President to do otherwise. Of course he could make an attempt to lease, and might demand terms that perhaps those who wanted to lease would not be willing to give, but it seems to me that it is an expression on the part of Congress, the lawmaking body, that it shall be the duty of the President to lease if he can do so on any fair or reasonable terms.

Mr. BORAH. And, Mr. President, it is a direct——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Idaho?

Mr. NORRIS. I yield.

Mr. BORAH. It is a direct instruction from Congress that the Congress desires that the President shall use every reasonable effort to lease before he operates the road; that it is the expressed wish and judgment of Congress that the first step shall be toward a leasing of the road.

Mr. NORRIS. Certainly; I agree with that exactly. I think that that is a fair construction of the language; and, Mr. President, so far as I am concerned, I am in doubt whether I would support a bill providing for the building of railroads in Alaska if the law provided that, after they were built, they should be leased and not operated by the Government. As to those who are opposed to the Government having anything to do with the building of railroads or their operation, who have voted for this bill on the theory that this is an exceptional case and that it is perhaps a good place for the Government to try out this experiment, it seems to me, in order to be consistent, they ought to insist that the experiment be tried clear through to the other end, and that when the Government undertakes to build railroads, if they consider it an experiment, they should also insist that the Government go on and operate the railroads.

Mr. SUTHERLAND. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Utah?

Mr. NORRIS. I yield to the Senator.

Mr. SUTHERLAND. I can not agree with either of the Senators who have discussed this subject as to the meaning of this expression:

Or, in the event of failure to lease, to operate the same until the further action of Congress.

It seems to me that it is at most merely suggestive. It is not a direction that the President shall undertake to lease; but, failing that, that he shall operate the road. If that were the intention of Congress, we should have said, "In the event of inability to lease."

Mr. NORRIS. We might have used other language.

Mr. SUTHERLAND. The two words "failure" and "inability" have a very different meaning. What we do say here is that "in the event of failure to lease."

Mr. BORAH. Mr. President——

Mr. SUTHERLAND. If the Senator will pardon me for just a moment, that failure might arise either from the desire of the President not to enter into a lease at all, when there would be a "failure to lease," or, conceding his desire to make a lease, his inability to procure anybody to take it. If the President concluded that he wanted to operate the road and should make no attempt to lease it, then there would be a "failure to lease" in the meaning of this provision.

Mr. NORRIS. That would be a failure, it is true, but——

Mr. SUTHERLAND. So it seems to me, if the Senator will allow me to conclude, that the utmost that can be said about it is that the language is suggestive, but it is not in any manner binding upon the President; in other words, the Senator from Idaho [Mr. BORAH] suggested a moment ago that if it were a contract between two private parties, it would bind the party against whom it was directed to first attempt to lease.

Mr. NORRIS. I think it would.

Mr. SUTHERLAND. I do not think so, because if that had been the intention, the framers of the provision would have used the other word—that "in the event of 'inability' to lease," not "in the event of a 'failure' to lease."

Mr. BORAH. Well, Mr. President, the word "failure" implies an effort to do a thing and a falling down upon it; and would not the Senator from Utah say that, before there had been a failure, the President must have in good faith undertaken to lease?

Mr. SUTHERLAND. I do not think so; I do not think that the word "failure" can be construed quite so strictly as that——

Mr. NORRIS. I should like to ask the Senator——

Mr. SUTHERLAND. Because, if the Senator will allow me to finish, that would be to give the word "failure" the meaning of "unable"; and obviously it has not that meaning. The Senator may fail to do a thing because he does not want to do it, and not because he is not able to do it.

Mr. NORRIS. Mr. President, I do not believe that anyone can put that construction on this language. I do not believe we ought to say here that the President is going to disregard the wishes of Congress, if he can gather the wishes of Congress from the law it enacts; and, even though, as the Senator says, the President might be opposed to leasing, as this provision does not compel him to lease therefore he would not lease, and therefore there would be a failure to lease, and then he could operate; we ought not, it seems to me, say that the President, even though he himself were opposed to leasing the road, would not make an honest effort to lease it if the law said he should do so.

Now, I should like to ask the Senator from Utah a question. Suppose he were President and this language were put up to him and he wanted to comply—as he would, of course, if he were President—with the law of Congress, would he feel that he would be justified under this language in going ahead and operating that road without making any effort whatever to lease it?

Mr. SUTHERLAND. I think so, Mr. President. In the first place, the preceding clause is—and that is set off by itself by a semicolon—

In his discretion, to lease the said railroad or railroads, or any portion thereof.

Now, evidently that leaves it to the discretion of the President to lease or not to lease.

Mr. NORRIS. Yes.

Mr. SUTHERLAND. Then he has a choice in the matter.

Mr. NORRIS. Then what is the use of putting in the other clause? What good does it do?

Mr. SUTHERLAND. I have not finished. Suppose the President concludes that he does not want to lease and does not lease, although he would be able to obtain a lease if he tried, he has exercised his discretion under the terms of the law; he has exercised his discretion against making a lease.

Mr. NORRIS. But he has made no effort to lease.

Mr. SUTHERLAND. Well, he does not have to do so, because "in his discretion" he may lease. That means, if it means anything, that he can exercise his discretion either to undertake to lease or to decline to undertake to lease.

Mr. NORRIS. Then, if the Senator's construction is right, what good does it do and what does it add to the proposed law to say:

Or, in the event of failure to lease, to operate the same.

Mr. SUTHERLAND. The words may not have been happily chosen; but I am simply undertaking to show that the President would not be violating the terms of this law if he were to decline to lease at all.

Mr. NORRIS. Technically that may be right.

Mr. SUTHERLAND. Or to decline to make any attempt to lease, because, in the first place, the whole matter of leasing is put in his discretion. Then, either having determined that it is not wise to undertake to make a lease, and for that reason exercising his discretion not to make any attempt to do so, or, having made the attempt and failed to make the lease, then the second clause becomes operative upon a failure to lease either by his own desire or by his inability.

Mr. BORAH. Well, Mr. President——

Mr. SUTHERLAND. I was going to say that I am only interested in the matter, perhaps, in an intellectual way, because I am indifferent as to whether or not the language means what the Senator says. I am opposed to the whole proposition; I think it is clearly unwise. I voted against the bill; and I am not so very particular about the details in that respect, but it does seem to me, from a critical consideration of the language, that it can not be made to mean what the Senator claims it means.

Mr. NORRIS. Mr. President, I should like to have the Senator tell the Senate what it does mean if it does not mean that.

Mr. SUTHERLAND. Mr. President, it means what I have already undertaken to show, and I will repeat it. The language is, speaking of the President—

In his discretion, to lease the said railroad or railroads, or any portion thereof—

And so on. If there were nothing else in the bill but that, it would be clearly a matter for the President to exercise his discretion——

Mr. NORRIS. I think everybody will concede that.

Mr. SUTHERLAND. As to whether he would make the lease or not.

Mr. NORRIS. Yes.

Mr. SUTHERLAND. We will suppose that the President has exercised his discretion, and has determined that he will not undertake to make a lease, deeming it better that he should operate the road himself. Then he looks for his authority to operate the road, and he finds in the next clause the provision—

or, in the event of failure to lease, to operate the same until the further action of Congress.

Mr. NORRIS. And that is his authority to operate the road.

Mr. SUTHERLAND. In the event of failure. Now, he has failed to make a lease.

Mr. NORRIS. Yes.

Mr. SUTHERLAND. The reason the President has failed to lease is because he has deemed it unwise to make the attempt at all, and he is warranted in refusing to make any attempt under the first provision.

Mr. NORRIS. I do not think so.

Mr. SUTHERLAND. What does it mean by saying "in his discretion to lease"?

Mr. NORRIS. Under this clause, "or, in the event of failure to lease"——

Mr. SUTHERLAND. No.

Mr. NORRIS. Let us suppose——

Mr. SUTHERLAND. Now, Mr. President——

Mr. NORRIS. Let me answer the Senator. As he has said, when the President looks for his authority to operate the railroad he finds it in this clause.

Mr. SUTHERLAND. Yes.

Mr. NORRIS. I presume without that clause he would not have any right to operate the railroad?

Mr. SUTHERLAND. Yes.

Mr. NORRIS. That is the clause that gives the President authority to operate the railroad. Now, let us see what it is:

Or, in the event of failure to lease, to operate the same.

When he finds his authority to operate, it is coupled with language that only gives him the authority to operate if there is a failure to lease.

Mr. SUTHERLAND. Yes.

Mr. NORRIS. It seems to me that any well-meaning President would certainly construe that language to mean that he ought not operate the road if he could lease it, because he must first fail to lease it before he can operate it.

Mr. SUTHERLAND. The Senator did not answer my first question.

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Utah?

Mr. NORRIS. Yes; I am yielding.

Mr. SUTHERLAND. When the President is considering the question whether or not he shall lease, he goes to the law and he finds that in his discretion he may lease the railroad. Now, what is he warranted in understanding—that he may or may not exercise his discretion; that he may or may not make any attempt to lease? If he determines that he will make no attempt whatever to lease this property, is he not exercising his discretion under the law?

Mr. NORRIS. Yes.

Mr. SUTHERLAND. Then he is warranted in declining to make any attempt.

Mr. NORRIS. I think when he construes that with the modifying clause that follows, he is not warranted in operating it unless he has first made an honest attempt to lease it.

Mr. SUTHERLAND. If that had been the intention of Congress, he would have found language far different. In the first place, there would have been no provision of the law vesting discretion in him. It would have directed that he lease it, and then it would have said that being unable to lease he should operate the road.

Mr. NORRIS. There are two things he can do. There is no dispute but that he can build the road. I think nobody will dispute that. After it is built there are two things to do. One is to lease it and the other is to operate it. Now, let us look for his authority for each one and see what the language is.

First, what is his authority to lease it? Now, we will find that—

In his discretion, to lease the said railroad or railroads, or any portion thereof, including telegraph and telephone lines—

And so forth.

That is his authority to lease, modified, it is true, by the words "in his discretion." That is his authority to do one of the two things. Let us look at the law and see what his authority is to do the other one, and see whether they are put on an equal basis. The other one, the authority to operate it, comes from this language:

Or, in the event of failure to lease, to operate the same.

I can not for the life of me understand how any fair-minded man in construing that law would not have to say that the real intent of it is to have the President lease the road if he can, and operate it if he fails to lease it.

Mr. LANE and Mr. SUTHERLAND addressed the Chair.

The PRESIDING OFFICER. To whom does the Senator from Nebraska yield?

Mr. NORRIS. To the Senator from Oregon.

Mr. LANE. When the language of the bill is "in his discretion," does it not mean the same as if it said "he is hereby empowered to lease; and in the event of his failure to do so, then he may operate it"? Is not that what it means?

Mr. NORRIS. I presume that construction might be put upon it; yes.

Mr. SUTHERLAND. Does not the Senator fail to do a thing notwithstanding he intends to fail?

Mr. NORRIS. Certainly; I think so. I would fail if I intended to fail, to be sure. There is not any doubt about that, because I would not try.

Mr. SUTHERLAND. Equally as though he intended to do the thing and was unable to do it? He has failed in either instance.

Mr. NORRIS. Yes.

Mr. SUTHERLAND. Whether he intends to fail or not.

Mr. NORRIS. I think he has failed.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Idaho?

Mr. NORRIS. I yield.

Mr. BORAH. I do not agree that there would be a failure, in the contemplation of this provision of the statute, if there were no effort whatever made to lease this road.

We are imposing here upon a public servant the performance of a duty. We say to him, it is true, that he has the discretion to lease; but that discretion is to be exercised with reference to whether or not he can make fair terms, whether or not he can make a desirable contract. When you take it in connection with the proposition that until he does exercise that discretion he is not permitted to operate—because you say "in the event of failure"—it presupposes an effort upon the part of the President for the honest exercise of the discretion which we have vested in him.

Mr. NORRIS. I do not believe anybody, not even the Senator from Utah, will dispute that the failure presupposes an effort to do something. If the President is going to follow the instructions given him by the law—and I feel that any President would, regardless of his individual opinion as to what ought to be done—it seems to me that if you put this language before it, he would feel in duty bound to make an honest effort to lease the road.

Mr. SUTHERLAND. It does not seem so to me.

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Utah?

Mr. NORRIS. I yield.

Mr. SUTHERLAND. It seems to me very clear that taking the two clauses together, one of which invests the President with full discretion—because there is no limitation upon the word "discretion"—to lease these railroads or not, as he pleases, having failed to do it, either because he did not want to or because he could not, then there has been a failure. If I give my promissory note to a bank, I have failed to pay it, whether I make an effort to pay it or not.

Mr. NORRIS. The man who held the note would have a reasonable right to expect that you would make an effort to pay it. If he did not think you would, he would not have given you the money in the first place.

Mr. SUTHERLAND. Still, I would have failed if I did not try.

Mr. NORRIS. Yes.

Mr. SUTHERLAND. And so the President would have failed if he did not try.

Mr. NORRIS. The President would be different from a man borrowing money from a bank who did not intend to pay it. He would not go on that kind of a theory. He would say, "I have gotten this money, and here is the note, and it is my duty to make an effort to pay it."

Mr. SUTHERLAND. He would go to the same dictionary to find out what was meant by the word "failure."

Mr. McCUMBER. Mr. President, may I ask the Senator a question?

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from North Dakota?

Mr. NORRIS. I yield.

Mr. McCUMBER. As I understand, the bill first provides clearly that the President may either lease or operate.

Mr. NORRIS. No; it does not say it in those words.

Mr. McCUMBER. But, I mean, it gives him discretion either to lease or to operate.

Mr. NORRIS. It does not say it in that language, by any means.

Mr. McCUMBER. I want to get the definition or construction that should be given to the word "failure." Suppose, instead of using the word "failure," it should read "if he fails to lease, he shall then proceed to operate." If we should use the word in that way, would the Senator still claim that the words "if he fails to lease," taken in connection with the previous paragraph, would mean that there must be an attempt? Would he make any distinction between "if he fails to lease" and "in the event of his failure to lease"? Would not the Senator give the same construction in either instance?

Mr. NORRIS. I do not know that there would be much difference in the construction if you put it in that language.

Mr. CUMMINS. Mr. President, may I say a word?

Mr. NORRIS. I should like to answer the question of the Senator from North Dakota. If we put it in the identical language that the Senator does, perhaps it would not be quite so forceful, as I understand the words he has used, as it is here; but if we did not want him to make an attempt, we would not use the word "failure." If we wanted to give him full discretion to operate or lease, and express no legislative opinion as to which he ought to do, we would not use the words that are used here. No man in the Senate would use that language if he wanted to give to the President the absolute discretion of leasing or operating without giving him any legislative opinion in the law as to which was his duty. We would say, "The President, in his discretion, may either lease or operate the road."

Mr. CUMMINS and Mr. BORAH addressed the Chair.

The PRESIDING OFFICER. To whom does the Senator from Nebraska yield?

Mr. NORRIS. I yield to the Senator from Iowa.

Mr. CUMMINS. I desire simply to suggest to the Senator from Nebraska that if in a former part of this bill or any other part of the bill power had been given to the President to lease or operate, then his suggestion might have had force; but this particular provision is the only provision that gives him power either to operate or to lease.

Mr. NORRIS. I think so. Now I yield to the Senator from Idaho.

Mr. BORAH. Suppose we read this clause with these controverted words left out and see how it reads:

> In his discretion, to lease the said railroad or railroads, or any portion thereof, including telegraph and telephone lines, after completion, under such terms as he may deem proper, but no lease shall be for a longer period than 20 years, or to operate the same until the further action of Congress.

That would clearly leave it with the President to choose whichever course he saw fit to pursue, either to lease or to operate, without anything being dependent upon any presupposed effort to do one or the other before he accepted the latter.

Mr. NORRIS. In other words, if that is the construction which is to be put on it, this language ought to be left out?

Mr. BORAH. Exactly.

Mr. NORRIS. That is just what I have been contending for.

Mr. BORAH. If the language is to have any effect at all, if it is not entirely surplusage, it presupposes an effort upon the part of the President to do the thing that is suggested.

Mr. NORRIS. Yes. In other words, if this language has any meaning whatever, it is in the nature of an instruction to the President to attempt to lease before he operates; and the President, like a court, if he submits this question to his Attorney General for legal advice as to what it means, will give, if it is possible, full force to all the language used. That is one of the fundamental principles of construction, known to everybody who construes language, and particularly to courts—that if they can they will give effect to all of the sentences used in the disputed matter.

Mr. BORAH. Since this bill came up for discussion and since its passage there has been a vast amount of discussion, in the public prints and elsewhere, as to the inadvisability of the Government operating the road at all. The most severe attack has been made upon the Government operating the road. It was bad enough to build it, but it was worse to operate it. In view of the public discussion, and in view of the public sentiment as thus expressed, this is clearly a suggestion to the President that he must first make an effort to get rid of the proposition to operate the road, and it is a modus operandi by which they will arrive finally at the proposition that it should not be operated at all; that it was the clearly expressed will of Congress that it should be leased, and the President is therefore under obligation to lease this road, even under obligation to lease it at a disadvantage rather than that the Government shall operate it. It will take the vital force out of the proposition of the Government operating the road.

Mr. NORRIS. Mr. President, I have no doubt whatever but that if we agree to this conference report, and make this statutory law, that is what will be immediately said, and I believe it would be a fair construction for the Attorney General to put on the law. I believe it would be the duty of the President, under the law, to lease these roads if he could. I should like to have the Government operate them; and I am satisfied that the President, at least when he delivered his message, was not only in favor of Government building but Government operation of the road. When this bill was before the Senate, and the leasing clause was up for discussion, I called attention to the language of the President himself, and that of the Secretary of the Interior in his report. The President, in the message he delivered to Congress, said, "to build and operate a railroad in Alaska." He used the word "operate."

As the Senator from Idaho said, some newspapers and others have been finding fault with the bill since it passed the Senate and have made an attempt—legitimately, of course; I am not finding fault with it—to get us in a position, I think, where the President would be almost compelled to surrender one proposition in connection with this matter of railroad building in Alaska, namely, the operation of the railroad, and to lease it.

I for one am not willing to go any further than we went in the Senate bill. I was opposed to going that far, and I thought we ought at least to leave it in the law so that the President would have the right to do either one. If it were within our power now to take away from the President the right to lease the road, I should be very glad to have it done; but, as has been said, the parliamentary situation now has gone beyond that point. We ought, however, at least to insist that the discretion shall remain open to the President, and that we shall not give him any instruction in the law or in any other way as a result of which any such meaning could be given to the words that he would first have to make an attempt to lease before he operated.

Mr. SUTHERLAND. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Utah?

Mr. NORRIS. I yield. I will yield the floor if the Senator wishes to speak on the matter.

Mr. SUTHERLAND. No; I wanted to ask the Senator a question.

Mr. NORRIS. All right.

Mr. SUTHERLAND. I think, as the Senator from Nebraska does and as the Senator from Idaho does, that there is no need of this phrase in the law. In my judgment it does not add anything to the meaning of the law, but I think it is suggestive. I have already said that; but I do not believe it compels the President in any sense whatever to make an effort to lease.

I wanted to ask the Senator whether he could point us to any dictionary or to any case where it has ever been said that the word "failure" was equivalent to the words "can not." The word "failure" is equivalent to the words "do not," and it is as though the phrase were, "in the event that the President do not lease, he shall do this other thing"; not "in the event that the President can not lease," which would have been the equivalent of the word "unable" or "inability." If that had been the intention of Congress, it would have said either "if the President can not lease" or "in the event of inability to lease" then he shall do the other thing; but it says "in the event of failure," which is equivalent to saying "if he do not lease."

Mr. BORAH. Mr. President, suppose the President were standing in the position of a private individual, and were seeking to enforce specific performance of a contract, and he should undertake to show that he had a right dependent upon the failure to accomplish another thing. Suppose a man had contracted with him that "in the event you fail to do so and so, he would do so and so," and the individual comes into court and shows that the President did not make any effort at all; that is, that he was calling upon this man to perform his part of the contract without his ever having made any effort to perform the other part. Would the court enforce that contract as a matter of specific performance if the President had failed to make any effort at all to do his part?

Mr. SUTHERLAND. Yes; if the contract had provided, as this bill provides, that as to the first alternative he may do as he pleases; that is, if it had said "in his discretion he may do this or the other thing," he may do that thing, "and if he fail to do that thing, he shall do another."

Mr. BORAH. The discretionary power of a public officer and the discretionary power of a judge with reference to these matters is not a mere ipse dixit, nor the unbridled will of either of the individuals, but it is a matter which has a well-defined meaning at law. For instance, a judge is given discretion with reference to certain matters, but he can not act pro forma in regard to them. He must exercise a sound discretion, or else his action will be reviewed and reversed. So if a public officer is called upon to exercise a discretion, it does not mean his mere ipse dixit, or what his will may suggest, without any effort at all to comply with the law; but it means, in this case, an honest effort to make a lease which would be beneficial to the Government. Failing in that, he would be expected to operate.

Mr. SUTHERLAND. Does the Senator think when the law says that the President, in his discretion, may lease, that binds him to try to lease?

Mr. BORAH. I have no doubt——

Mr. SUTHERLAND. If it does, then he is not exercising discretion at all. He is proceeding under a mandatory provision of the law.

Mr. BORAH. He has a discretion when he comes to take up the question of the lease with reference to the second proposition, whether he thinks it is advisable or wise, or whether he can get proper terms in a lease. When, however, you say that he must lease, or in the event of his failure to lease he must do another thing, I can not see it otherwise than that it presupposes an effort upon his part fairly and in good faith to try to do the first thing, and that is to lease.

Mr. SUTHERLAND. Let me ask the Senator from Idaho a question. Suppose the Senator from Idaho were in favor of leasing the railroad as opposed to its operation, and he desired by the law to make it certain that the President must lease if he were able to do so, and he could operate it only in case he were unable to lease it. Would he express it in this way?

Mr. BORAH. Not at all.

Mr. SUTHERLAND. Would he not say "In the event of his inability to lease," and not use the word "failure" at all?

Mr. BORAH. I undoubtedly would, to be exact; but we are discussing the language as it is.

Mr. CHAMBERLAIN. Mr. President, may I interrupt the Senator for just a minute?

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Oregon?

Mr. NORRIS. I do.

Mr. CHAMBERLAIN. It seems to me that the Senator from Idaho, in discussing the discretionary power that is vested in the President, entirely overlooks the proposition in the bill before he reaches the point of discretion. It provides in terms, just a few lines above the clause which vests the discretionary power in the President, that he is authorized—

> To receive compensation for the transportation of passengers and property, and to perform generally all the usual duties of a common carrier by railroad; to make and establish rules—

And so forth.

Evidently that is equivalent to an instruction to the President to go ahead, not only to locate and construct the road, but further to operate it as a common carrier is operated. Not only that, but before the discretionary clause is reached it provides that no free passes shall be granted, and that the employees can be carried only under the terms of a former act of Congress.

In other words, the bill provides specifically for the operation of the railroad as a common carrier by the President of the United States before it attempts to vest in him a discretionary power to lease.

Mr. NORRIS. I should like the Senator to point out that language.

Mr. CHAMBERLAIN. It is just above there. The Senator has House report 341.

Mr. BORAH. I see the language, and I do not want to take issue with anyone who supposes that the President will be compelled to do either thing under this law, because we are dealing with the Chief Executive. I am not speaking now of the individual, but I am speaking of the office. I have no doubt, however, but that this will be interpreted by the President as a clear and explicit suggestion, if not a direction to him, to make an earnest effort to lease this road before he operates it, and that he will feel compelled under the law to exercise his discretion in good faith to enter into a lease. The objection I have to it is that I prefer to make the suggestion to operate rather than to lease.

Mr. CHAMBERLAIN. I must say if I were acting as Executive and had the power of doing the work provided for in this act, I should consider that I was instructed to operate the road first, but would have left in me the discretion to lease it if I saw fit to do so. That was the purpose of the committee.

Mr. NORRIS. I should like to ask the Senator from Oregon what is the use of this language: "or, in the event of failure to lease"?

Mr. CHAMBERLAIN. There might have been a happier expression used than the word "failure." We might have used the words "and if he fails to exercise the discretion vested in him, then and in that event he shall do so and so." It would have been a happier expression, but the language means the same thing.

Mr. BORAH. It would have been better, then, to have omitted it entirely.

Mr. NORRIS. Why put it in there at all? What is the use of this language? If the meaning is what the Senator contends, what is the earthly use of the words I have read?

Mr. CHAMBERLAIN. It does not impair the force of the act. It does not strengthen it. Better language might have been used. There is not any doubt about that.

Mr. NORRIS. But what is the use of using any?

Mr. CHAMBERLAIN. It might have been left out. It was used by the conference committee simply because it is the exact language of the bill as it came from the House.

Mr. NORRIS. It seems to me if those who put the construction on it which the Senator from Oregon does believe, that it means that with the words there, and they will read it with the words out, they will certainly come to the conclusion that it means that with the words out, and therefore there would be no objection to omitting those words.

Mr. CHAMBERLAIN. I contend for that, and that was the view of the conference committee, I think—that it was only intended that in case the President did not exercise his discretion to lease the road he should then go ahead and operate it.

Mr. NORRIS. Assuming that to be right, there is no earthly use of the words I have just read. If that is the intention, if that is the construction which a fair-minded man must put on this law, you certainly ought to leave out that language, because that would remove it from any doubt and give it the same construction.

Mr. BORAH and Mr. CHAMBERLAIN addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Idaho, or to the Senator from Oregon?

Mr. NORRIS. I yield to the Senator from Idaho.

Mr. BORAH. I was going to say to the Senator from Oregon that in looking at the definition of the word "failure" you will find that the dictionary says it means the act of failing or the state of having failed to accomplish a purpose. When the President comes to operate this road he must stand in the position of having failed to accomplish the purpose of leasing, and he can not stand in that position in the eye of the law and in the discharge of a public duty as a public servant until he has made an honest effort to lease it. Failure must necessarily include an effort upon the part of the President, and a failure after the effort is put forward. I do not mean to say that that is what the committee intended, because I think the committee, perhaps, was more in favor of operation than leasing; but that must necessarily be the construction which a court will put upon it. But I am aware it will be construed by the Executive and not necessarily in a technical or strict way.

Mr. GALLINGER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from New Hampshire?

Mr. NORRIS. Yes.

Mr. GALLINGER. I have listened very attentively to this debate, and I think the Senator from Idaho is absolutely correct in his interpretation of the language—that the President must first make an effort to lease the road, and, failing to do so, that it shall be operated in the name of the United States. I think, however, we need not worry much over this matter. Nobody will ever lease that railroad, costing $35,000,000 or $40,000,000, and pay a dividend to the Government of the United States. We shall not have any trouble on that score.

Mr. POINDEXTER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Washington?

Mr. NORRIS. I yield to the Senator.

Mr. POINDEXTER. I simply wanted to suggest to the Senator from New Hampshire that we undoubtedly would provide a bonus to go along with the railroad. [Laughter.]

Mr. GALLINGER. I think certain Senators would have to forego their opposition to subsidies and grant a very substantial subsidy. That is my judgment.

Mr. NORRIS. To avoid that, Mr. President, I should like to say to the Senator that if we will eliminate these words and let the Government operate the road, we could avoid the embarrassment of giving subsidies; so, at least, we ought to go that far.

Mr. GALLINGER. And we will pay the subsidy in the deficiency bills when we reach them.

Mr. NORRIS. Yes. If the Government operates it, there will be no subsidy.

Mr. GALLINGER. A subsidy would be necessary in either event, in my opinion.

Mr. NORRIS. Mr. President, I have no desire to detain the Senate longer. I wish to say, in conclusion, however, that from the admissions of the Senator from Washington, who himself says he thinks this is at least a suggestion to the President, and the construction put upon the law by the Senator from Utah, who practically agrees with that construction, it seems to me that if we went no further and put no other construction on it that would be a sufficient reason why the conference report should be rejected. It is conceded by everybody, I think, as far as they have expressed themselves, that at least this language is a suggestion in favor of leasing.

Mr. CUMMINS. Mr. President——

The VICE PRESIDENT. Does the Senator from Nebraska yield to the Senator from Iowa?

Mr. NORRIS. I yield to the Senator.

Mr. CUMMINS. The Senator from Nebraska is primarily in favor of operation, and so am I. I should like to ask, though, whether he thinks that right would be very valuable if three or four hundred miles of interior line were attached to the Copper River & Northwestern road, and we were trying, as a government, to operate that isolated line in connection with a railroad that belonged to a private corporation that owned the line between our railroad and the seaboard?

Mr. NORRIS. As I understand the Senator's question, it is whether I think it would be a profitable proposition if we should build one end of a trunk line and have the Copper River Railroad at the other end.

Mr. CUMMINS. Whether with the Government operating the interior end and the Guggenheims operating the sea end we would be able to afford very much relief to the people of Alaska?

Mr. NORRIS. No; I do not believe we would, and of course I am not in favor of anything of that kind occurring. I would not favor the bill if I thought that were going to be the result.

Mr. CUMMINS. The Senator from Nebraska sees, of course, that we are giving the President—not necessarily the present President, but some President—the power to do that very thing.

Mr. NORRIS. Of course, that goes back to the Senator's proposition which he has so ably argued. I agree mainly with what he has said, but the Senator from Iowa must understand that I was not depreciating that point at all. I was arguing an entirely different one.

Mr. CUMMINS. I know it.

Mr. NORRIS. I do not care to argue it again, because the Senator from Iowa had already covered the ground much better than I could.

Mr. CUMMINS. I am in entire concurrence with what the Senator from Nebraska has said. Inasmuch as we are both in favor of operation rather than leasing, and the President will have to determine as between operation and leasing, the Senator from Nebraska can easily see that if we own two or three hundred miles in the interior and the Morgan people own two or three hundred miles running out from the seacoast, the President would very likely come to the conclusion that rather than operate his end he would lease it.

Mr. NORRIS. Yes.

Mr. CUMMINS. There is the milk in this coconut.

Mr. NORRIS. I think that is a very good suggestion on this point, and I hope if the bill goes back to the conference that the conferees will take it into consideration.

Mr. POINDEXTER. Mr. President, I think that under the bill, either as it was passed by the Senate or as it was reported by the conference committee, the unfortunate possibilities which have been described by Senators could very well occur, and I think that they could occur under the one as well as under the other. I voted, as did the Senator from Iowa and the Senator from Nebraska, when the bill was pending in the Senate against the discretionary power to lease, but nevertheless we were outvoted and that power was contained in the bill as it passed the Senate, in my judgment, to as full an extent as it is contained in the form reported by the conference committee.

The bill as it passed the Senate provided that the President "may cause said road or roads to be operated by contract or lease." The language of the bill as reported from the conference committee is that the President "may in his discretion lease said railroad or railroads." It takes an astute lawyer like the Senator from Nebraska, the Senator from Iowa, and the

Senator from Idaho to distinguish any substantial difference in the effect of this language. One trouble on the part of courts is that there is so much ingenuity and ability expended by lawyers and judges in finding out something that is different from the very plain meaning of the language.

Mr. BORAH. Mr. President——

Mr. POINDEXTER. I yield to the Senator from Idaho.

Mr. BORAH. The Senator from Washington has been engaged in that business quite as long as the Senator from Idaho.

Mr. POINDEXTER. That does not justify it, of course.

Mr. BORAH. Does not the Senator from Washington think that it is a pretty good idea to expend our technical knowledge here rather than after the bill has been signed by the President?

Mr. POINDEXTER. Undoubtedly. The Senator's object is exactly the same as mine, so far as shaping the bill to at least leave out of it anything that would encourage the leasing of a railroad after it shall have been constructed; but, in view of the situation that we are in here, I fail to see any such difference in the language of the two bills as would justify one in voting against the conference report. Under either form it is entirely possible that an economic tragedy might happen in the exercise of the discretion vested in the President. But we need not suppose that it will happen because possibly it may happen. I think it would be a vast misfortune if the President should use his discretion to purchase the Guggenheim railroad at undoubtedly a liberal price, as the Government would always have to pay, and turn around and lease that road back to the Guggenheims on such terms as the Government would be called on to make as were profitable to them. That is one of the possibilities under the bill. But those of us who voted for the bill have been induced, through the great desire we have to see something done in Alaska, to see some steps made toward the development of the rich dormant resources of that vast land, to take those chances.

As to the other objection which the Senator from Iowa urged with a great deal of cogency, I am not entirely in agreement with him upon that proposition; certainly not to such an extent as, it seems to me, ought to induce us to defeat the bill at the final stage of its progress.

I do agree with the Senator from Iowa that it would be a misfortune for the Government to have anything to do with the Copper River & Northwestern Railroad, either to purchase it or to build an extension to it and operate it jointly with the present railroad. That road is already there, and it will remain there whether we pass this bill or not. It is in the power of the Government, to a certain extent at least, to compel a reasonable use and operation of that railroad, and it would be still more in the power of the Government, and still more practicable, to compel reasonable rates, to prevent extortion, to prevent discrimination and lack of uniformity in the service and in the rates of the Copper River & Northwestern Railroad, if the Government, unfortunately, should own a railroad from the terminus of the Copper River & Northwestern into the Yukon Valley, connecting with water transportation on the 2,000 miles of navigable water of that stream.

I can readily see the full power and full opportunity of the Government, through the Interstate Commerce Commission and the President, by the rules and regulations which may be made under the inherent authority granted by the bill to insure a reasonable joint traffic arrangement between the extension of the road which the Government might possibly build—but which I hope it will not build and which it ought not to build—and that part of it which is now owned by the Alaska Syndicate.

It will cost, in my judgment, though Senators have differed with me in that opinion, at least $25,000,000 to buy the Copper River & Northwestern Railroad, and I am not in favor of the Government expending that amount of money to buy a railroad which is already in operation in Alaska, simply in order to acquire the difference between Government operation and private operation, even though we should build the 300 miles of extension from Chitina to Fairbanks.

Mr. CUMMINS. Mr. President——

Mr. POINDEXTER. I yield to the Senator from Iowa.

Mr. CUMMINS. The junior Senator from Washington and myself agree upon that entirely. I think it would be utterly unpardonable for the Government to buy that railroad. I hope that the junior Senator from Washington has noted the admission made by or construction given by the senior Senator from Washington [Mr. JONES], one of the conferees. I suppose that the other conferees, the Senator from Oregon [Mr. CHAMBERLAIN] and the Senator from Nevada [Mr. PITTMAN], concur with the senior Senator from Washington in his interpretation of the conference report. The senior Senator from Washington has said that the bill as reported by the conferees compels the President to acquire the railroad from the interior to the seacoast, and if the President designates the route now occupied by the Copper River & Northwestern Railroad as the route or one of the routes to the interior, then he is compelled to acquire that railroad.

Mr. POINDEXTER. I understand that is the object which the Senator desires.

Mr. CUMMINS. I do not want to acquire it at all.

Mr. POINDEXTER. The Senator from Iowa proposed the amendment which was incorporated into the bill as it passed the Senate which required the President to do that.

Mr. CUMMINS. But that is an obstacle in the way of acquiring it and not an instrumentality for acquiring it. But pursuing the thought, I wanted to ask the Senator from Washington a question after I made the statement. If it is the view of the conference committee that their bill means that, if the President adopts that route as one of the routes or the only route to the interior, he must buy or acquire the Copper River & Northwestern Railroad, then the only difference between that construction of the conference report and the position for which I am struggling is that I say if he does it, he must do it before we expend money in extending it, for I know, and the Senator from Washington knows, that if we attempt to acquire the Copper River & Northwestern Railroad now and any such value as he has suggested is put upon it, that route will be at once abandoned; but if we spend ten or fifteen million dollars in extending it, then we are at the mercy of the Copper River & Northwestern Railroad, because we not only have to acquire it in order to preserve what we have expended, but we have added millions of dollars to its value.

I ask the Senator from Washington whether, if the interpretation put upon the bill by his colleague is correct, we ought not to say now that before the United States expends this money in the extension of that road we shall find out what it will cost us to buy it, so that the President can know what expenditure will have to be made before he adopts the route and expends the money.

Mr. POINDEXTER. I am opposed, Mr. President, I will say in answer to the Senator's question in the first place, to the purchase of the Copper River & Northwestern Railroad at all, and consequently I am opposed to putting anything into the bill which deals with that subject. I am going on the assumption and in the hope that the President will not purchase the Copper River & Northwestern Railroad.

In further answer to the Senator's question, I fail to see any substantial result which would be accomplished by changing the language in the manner the Senator desires. If the President approves the plan to develop the Copper River & Northwestern route extending into the Yukon, and as a part of that plan under the construction of the law the Senator from Iowa says must be put upon it, that he shall be required to acquire the Copper River & Northwestern Railroad, if he knows that he must acquire that railroad he will take into consideration in making his plan the amount of money which it would cost the Government to buy it, whether he buys it before or after he makes the extension.

Mr. CUMMINS. But——

Mr. POINDEXTER. Furthermore, if the Senator will pardon me, I do not believe there would be any substantial difference in the amount the Government would be required to pay for that road if it should unfortunately acquire it at any time, whether we buy it before we build the extension or whether we buy it after we build the extension, because if we proceed to acquire it everyone knowing the minute that we take the first step in that direction—and this was argued in the Senate when the bill was on its passage—not only that it was the intention of the Government to extend it to the Yukon but that the Government would be required to do so, it would instantly acquire the value which would come from that knowledge and from that law.

Furthermore, Mr. President, there is a provision in the proposed law as it is reported from the conference committee which fixes the measure of value for this road at the physical valuation. It is true that it has left out of the Senate bill the words "the cost of reproduction," which was a much better provision than that which was reported from the conference committee; but, nevertheless, the proper construction of the words "physical valuation" will have substantially the same meaning as would be given to "physical valuation and the cost of reproduction," because the two, properly defined, are substantially synonymous.

Mr. CUMMINS. Mr. President——

Mr. POINDEXTER. Unless the Senator wants to ask me a question, I have concluded what I desire to say.

Mr. CUMMINS. I do. It will be remembered that the construction which I stated as being the construction of the Senator's colleague is not the interpretation that I put upon the

conference report. I used it solely as the interpretation that has been stated for it.

Mr. POINDEXTER. I understand the Senator supposed that that construction would be put upon it.

Mr. CUMMINS. Yes. I do not concur in it, and I will give my reasons for that presently. But the Senator from Washington is mistaken, I think, in one thing, and that is in assuming that the standard or test of ascertaining value, first the cost of reproduction and second the value of the physical property or physical value of the property are the same. I think they are very different. I do not know whether the Senator from Washington——

Mr. POINDEXTER. I admit, Mr. President, that there may be a difference, but whether there is a difference and the extent of the difference will depend very largely upon the circumstances.
